(2.) The comparison of gifts, in both the lists given by St. Paul (1 Cor. xii. 8–10, 28–30), places that of tongues, and the interpretation of tongues, lowest in the scale. They are not among the greater gifts which men are to "covet earnestly" (1 Cor. xii. 31, xiv. 5). As signs of a life quickened into expression where before it had been dead and dumb, the Apostle could wish that "they all spake with tongues" (1 Cor. xiv. 5), could rejoice that he himself "spake with tongues more than they all" (1 Cor. xiv. 18). It was good to have known the working of a power raising them above the common level of their consciousness. They belonged, however, to the childhood of the Christian life, not to its maturity (1 Cor. xiv. 20). They brought with them the risk of disturbance (*ibid.* 23). The only safe rule for the Church was not to "forbid them" (*ibid.* 39), not to "quench" them (1 Thess. v. 19), lest in so doing the spiritual life of which this was the first utterance should be crushed and extinguished too, but not in any way to covet or excite them. This language, as has been stated, leaves it hardly possible to look on the gift as that of a linguistic knowledge bestowed for the purpose of evangelizing.

(3.) The main characteristic of the "tongue" (now used, as it were, technically, without the epithet "new" or "other")[a] is that it is unintelligible. The man "speaks mysteries," prays, blesses, gives thanks, in the tongue (*ἐν πνεύματι* as equivalent to *ἐν γλώσσῃ*, 1 Cor. xiv. 15, 16), but no one understands him (*ἀκούει*). He can hardly be said, indeed, to understand himself. The *πνεῦμα* in him is acting without the coöperation of the *νοῦς* (1 Cor. xiv. 14). He speaks not to men, but to himself and to God (comp. Chrysost. *Hom.* 35, *in* 1 *Cor.*). In spite of this, however, the gift might and did contribute to the building up of a man's own life (1 Cor. xiv. 4). This might be the only way in which some natures could be roused out of the apathy of a sensual life, or the dullness of a formal ritual. The ecstasy of adoration which seemed to men madness, might be a refreshment unspeakable to one who was weary with the subtle questionings of the intellect, to whom all familiar and intelligible words were fraught with recollections of controversial bitterness or the wanderings of doubt (comp. a passage of wonderful power as to this use of the gift by Edw. Irving *Morning Watch*, v. p. 78).

(4.) The peculiar nature of the gift leads the Apostle into what appears, at first, a contradiction. "Tongues are for a sign," not to believers, but to those who do not believe; yet the effect on unbelievers is not that of attracting but repelling. A meeting in which the gift of tongues was exercised without restraint, would seem to a heathen visitor, or even to the plain common-sense Christian (the *ἰδιώτης*, the man without a *χάρισμα*), to be an assembly of madmen. The history of the day of Pentecost may help us to explain the paradox. The tongues *are* a sign. They witness that the daily experience of men is not the limit of their spiritual powers. They disturb, startle, awaken, are given *εἰς τὸ ἐκπλήττεσθαι* (Chrysost. *Hom.* 36, *in* 1 *Cor.*), but they are not, and cannot be, the grounds of conviction and belief (so *Const. Apost.* viii.). They involve of necessity a disturbance of the equilibrium between the understanding and the feelings. Therefore it is that, for those who believe already, prophecy is the greater gift. Five clear words spoken from the mind of one man to the mind and conscience of another, are better than ten thousand of these more startling and wonderful phenomena.

(5.) There remains the question whether these also were "tongues" in the sense of being languages, of which the speakers had little or no previous knowledge, or whether we are to admit here, though not in Acts ii., the theories which see in them only unusual forms of speech (Bleek), or inarticulate cries (Bunsen), or all but inaudible whisperings (Wieseler, in Olshausen, *in loc.*). The question is not one for a dogmatic assertion, but it is believed that there is a preponderance of evidence leading us to look on the phenomena of Pentecost as representative. It must have been from them that the word *tongue* derived its new and special meaning. The companion of St. Paul, and St. Paul himself, were likely to use the same word in the same sense. In the absence of a distinct notice to the contrary, it is probable that the gift would manifest itself in the same form at Corinth as at Jerusalem. The "divers kinds of tongues" (1 Cor. xii. 28), the "*tongues* of men" (1 Cor. xiii. 1), point to differences of some kind, and it is at least easier to conceive of these as differences of language than as belonging to utterances all equally wild and inarticulate. The position maintained by Lightfoot (*Harm. of Gosp. on Acts* ii.), that the gift of tongues *consisted* in the power of speaking and understanding the true Hebrew of the O. T., may seem somewhat extravagant, but there seems ground for believing that Hebrew and Aramaic words had over the minds of Greek converts at Corinth a power which they failed to exercise when translated, and that there the utterances of the tongues were probably in whole, or in part, in that language. Thus, the "Maranatha" of 1 Cor. xvi. 22, compared with xii. 3, leads to the inference that that word had been spoken under a real or counterfeit inspiration. It was the Spirit that led men to cry *Abba*, as their

[a] The reader will hardly need to be reminded that "unknown" is an interpolation of the A. V.

Digitized by Google

recognition of the fatherhood of God (Rom. viii. 15; Gal. iv. 6). If we are to attach any definite meaning to the "tongues of angels" in 1 Cor. xiii. 1, it must be by connecting it with the words surpassing human utterance, which St. Paul heard as in Paradise (2 Cor. xii. 4), and these again with the great Hallelujah hymns of which we read in the Apocalypse (Rev. xix. 1–6; Stanley, *l. c.*; Ewald, *Gesch. Isr.* vi. 117). The retention of other words like Hosanna and Sabaoth in the worship of the Church, of the Greek formula of the Kyrie Eleison in that of the nations of the West, is an exemplification of the same feeling operating in other ways after the special power had ceased.

(6.) Here, also, as in Acts ii., we have to think of some peculiar intonation as frequently characterizing the exercise of the "tongues." The analogies which suggest themselves to St. Paul's mind are those of the pipe, the harp, the trumpet (1 Cor. xiv. 7, 8). In the case of one "singing in the spirit" (1 Cor. xiv. 15), but not with the understanding also, the strain of ecstatic melody must have been all that the listeners could perceive. To "sing and make melody" is specially characteristic of those who are filled with the Spirit (Eph. v. 19). Other forms of utterance less distinctly musical, yet not less mighty to stir the minds of men, we may trace in the "cry" (Rom. viii. 15; Gal. iv. 6) and the "ineffable groanings" (Rom. viii. 26) which are distinctly ascribed to the work of the Divine Spirit. To those who know the wonderful power of man's voice, as the organ of his spirit, the strange, unearthly charm which belongs to some of its less normal states, the influence even of individual words thus uttered, especially of words belonging to a language which is not that of our common life (comp. Hilar. Diac. *Comm. in 1 Cor.* xiv.), it will not seem strange that, even in the absence of a distinct intellectual consciousness, the gift should take its place among the means by which a man "built up" his own life, and might contribute, if one were present to expound his utterances, to "edify" others also.[a]

(7.) Connected with the "tongues," there was, as the words just used remind us, the corresponding power of interpretation. It might belong to any listener (1 Cor. xiv. 27). It might belong to the speaker himself when he returned to the ordinary level of conscious thought (1 Cor. xiv. 13). Its function, according to the view that has been here taken, must have been twofold. The interpreter had first to catch the foreign words, Aramaic or others, which had mingled more or less largely with what was uttered, and then to find a meaning and an order in what seemed at first to be without either, to follow the loftiest flights and most intricate windings of the enraptured spirit, to trace the subtle associations which linked together words and thoughts that seemed at first to have no point of contact. Under the action of one with this insight the wild utterances of the "tongues" might become a treasure-house of deep truths. Sometimes, it would appear, not even this was possible. The power might be simply that of sound. As the pipe or harp, played boldly, the hand struck at random over the strings, but with no διαστολή, no musical interval, wanted the condition of distinguishable melody, so the "tongues," in their extremest form, passed beyond the limits of interpretation. There might be a strange awfulness, or a strange sweetness as of "the tongues of angels," but what it meant was known only to God (1 Cor. xiv. 7–11).

VII. (1.) Traces of the gift are found, as has been said, in the epistles to the Romans, the Galatians, the Ephesians. From the Pastoral Epistles, from those of St. Peter and St. John, they are altogether absent, and this is in itself significant. The life of the Apostle and of the Church has passed into a calmer, more normal state. Wide truths, abiding graces, these are what he himself lives in and exhorts others to rest on, rather than exceptional χαρίσματα, however marvelous. The "tongues" are already "ceasing" (1 Cor. xiii. 8), as a thing belonging to the past. Love, which even when "tongues" were mightiest, he had seen to be above all gifts, has become more and more, all in all, to him.

(2.) It is probable, however, that the disappearance of the "tongues" was gradual. As it would have been impossible to draw the precise line of demarcation when the προφητεία of the Apostolic age passed into the διδασκαλία that remained permanently in the Church, so there must have been a time when "tongues" were still heard, though less frequently, and with less striking results. The testimony of Irenæus (*Adv. Hær.* v. 6) that there were brethren in his time "who had prophetic gifts, and spoke through the Spirit in all kinds of tongues," though it does not prove, what it has sometimes been alleged to prove, the permanence of the gift in the individual, or its use in the work of evangelizing (Wordsworth *on Acts* ii.), must be admitted as evidence of the existence of phenomena like those which we have met with in the church of Corinth. For the most part, however, the part which they had filled in the worship of the Church was supplied by the "hymns and spiritual songs" of the succeeding age. In the earliest of these, distinct in character from either the Hebrew psalms or the later hymns of the Church, marked by a strange mixture of mystic names, and half-coherent thoughts (such, *e. g.*, as the hymn with which Clement of Alexandria ends his Παιδαγωγός, and the earliest Sibylline verses), some have seen the influence of the ecstatic utterances in which the strong feelings of adoration had originally shown themselves (Nitzsch, *Christl. Lehre*, ii. p. 268).

After this, within the Church we lose nearly all traces of them. The mention of them by Eusebius (*Comm. in Ps.* xlvi.) is vague and uncertain. The tone in which Chrysostom speaks of them (*Comm. in 1 Cor.* xiv.) is that of one who feels the whole subject to be obscure, because there are no phenomena within his own experience at all answering to it. The whole tendency of the Church was to maintain reverence and order, and to repress all approaches to the ecstatic state. Those who yielded to it took refuge, as in the case of Tertullian (*infra*), in sects outside the Church. Symptoms of what was then looked on as an evil, showed

[a] Neander (*Pflanz. u. Leit.* i. 15) refers to the effect produced by the preaching of St. Bernard upon hearers who did not understand one word of the Latin in which he preached (*Opp.* ii. 119, ed. Mabillon), as an instance of this. Like phenomena are related of St. Antony of Padua and St. Vincent Ferrer (*Acta Sanctorum*, June 24 and April 5), of which this is probably the explanation. (Comp. also Wolf, *Curæ Philolog. in N. T.* Acts ii.)

Digitized by Google

themselves in the 4th century at Constantinople — wild, inarticulate cries, words passionate but of little meaning, almost convulsive gestures — and were met by Chrysostom with the sternest possible reproof (*Hom. in Is.* vi. 2, ed. Migne, vi. 100).

VIII. (1.) A wider question of deep interest presents itself. Can we find in the religious history of mankind any facts analogous to the manifestation of the "tongues?" Recognizing, as we do, the great gap which separates the work of the Spirit on the day of Pentecost from all others, both in its origin and its fruits, there is, it is believed, no reason for rejecting the thought that there might be like phenomena standing to it in the relation of foreshadowings, approximations, counterfeits. Other *χαρίσματα* of the Spirit, wisdom, prophecy, helps, governments, had or have analogies, in special states of men's spiritual life, at other times and under other conditions, and so may these. The three characteristic phenomena are, as has been seen, (1) an ecstatic state of partial or entire unconsciousness, the human will being, as it were, swayed by a power above itself; (2) the utterance of words in tones startling and impressive, but often conveying no distinct meaning; (3) the use of languages which the speaker at other times was unable to converse in.

(2.) The history of the O. T. presents us with some instances in which the gift of prophecy has accompaniments of this nature. The word includes something more than the utterance of a distinct message of God. Saul and his messengers come under the power of the Spirit, and he lies on the ground all night, stripped of his kingly armor, and joining in the wild chant of the company of prophets, or pouring out his own utterances to the sound of their music (1 Sam. xix. 24; comp. Stanley, *l. c.*).

(3.) We cannot exclude the false prophets and diviners of Israel from the range of our inquiry. As they, in their work, dress, pretensions, were counterfeits of those who truly bore the name, so we may venture to trace in other things that which resembled, more or less closely, what had accompanied the exercise of the Divine gift. And here we have distinct records of strange, mysterious intonations. The ventriloquist wizards (*οἱ ἐγγαστρίμυθοι, οἱ ἐκ τῆς κοιλίας φθεγγόμενοι*) "peep [a] and mutter" (Is. viii. 19). The "voice of one who has a familiar spirit," comes low out of the ground (Is. xxix. 4). The false prophets simulate with their tongues (*ἐκβάλλοντας προφητείας γλώσσης*, LXX.) the low voice with which the true prophets announced that the Lord had spoken (Jer. xxiii. 31; comp. Gesen. *Thes.* s. v. נְאֻם).

(4.) The quotation by St. Paul (1 Cor. xiv. 21) from Is. xxviii. 11 ("With men of other tongues (*ἐν ἑτερογλώσσοις*) and other lips will I speak unto this people"), has a significance of which we ought not to lose sight. The common interpretation sees in that passage only a declaration that those who had refused to listen to the prophets should be taught a sharp lesson by the lips of alien conquerors. Ewald (*Prophet.* in loc.), dissatisfied with this, sees in the new teaching the voice of thunder striking terror into men's minds. St. Paul, with the phenomena of the "tongues" present to his mind, saw in them the fulfillment of the prophet's words. Those who turned aside from the true prophetic message should be left to the darker, "stammering," more mysterious utterances, which were in the older, what the "tongues" were in the later Ecclesia. A remarkable parallel to the text thus interpreted is found in Hos. ix. 7. There also the people are threatened with the withdrawal of the true prophetic insight, and in its stead there is to be the wild delirium, the ecstatic madness of the counterfeit (comp. especially the LXX., *ὁ προφήτης ὁ παραφρονῶν, ἄνθρωπος ὁ πνευματοφόρος*).

(5.) The history of heathen oracles presents, it need hardly be said, examples of the orgiastic state, the condition of the *μάντις* as distinct from the *προφήτης*, in which the wisest of Greek thinkers recognized the lower type of inspiration (Plato, *Timæus*, 72 B; Bleek, *l. c.*). The Pythoness and the Sibyl are as if possessed by a power which they cannot resist. They labor under the *afflatus* of the god. The wild, unearthly sounds ("nec mortale sonans"), often hardly coherent, burst from their lips. It remains for interpreters to collect the scattered utterances, and to give them shape and meaning (Virg. *Æn.* vi. 45, 98 ff.).

(6.) More distinct parallels are found in the accounts of the wilder, more excited sects which have, from time to time, appeared in the history of Christendom. Tertullian (*de Anim.* c. 9), as a Montanist, claims the "revelationum charismata" as given to a sister of that sect. They came to her "inter dominica solemnia;" she was, "per ecstasin, in spiritu," conversing with angels, and with the Lord himself, seeing and hearing mysteries ("sacramenta"), reading the hearts of men, prescribing remedies for those who needed them. The movement of the Mendicant orders of the 13th century, the prophesyings of the 16th in England, the early history of the disciples of George Fox, that of the Jansenists in France, the revivals under Wesley and Whitefield, those of a later date in Sweden, America, and Ireland have, in like manner, been fruitful in ecstatic phenomena more or less closely resembling those which we are now considering.

(7.) The history of the French prophets at the commencement of the 18th century presents some facts of special interest. The terrible sufferings caused by the Revocation of the Edict of Nantes were pressing with intolerable severity on the Huguenots of the Cevennes. The persecuted flocks met together with every feeling of faith and hope strung to its highest pitch. The accustomed order of worship was broken, and laboring men, children, and female servants, spoke with rapturous eloquence as the messengers of God. Beginning in 1686, then crushed for a time, bursting forth with fresh violence in 1700, it soon became a matter of almost European celebrity. Refugees arrived in London in 1706, claiming the character of prophets (Lacy, *Cry from the Desert*; N. Peyrat, *Pastors in the*

[a] PEEP. The word, omitted in its place, deserves a separate notice. It is used in the A. V. of Is. viii. 19, x. 14, as the equivalent of צִפְצֵף, "to chirp" or "cry." The Latin *pipio*, from which it comes, is, like the Hebrew, onomatopoetic, and is used to express the wailing cry of young chickens or infant children. In this sense it is used in the first of these passages for the low cry of the false soothsayers, in the second for that of birds whom the hand of the spoiler snatches from their nests. In Is. xxxviii. 14, where the same word is used in the Hebrew, the A. V. gives, "Like crane or a swallow, so did I chatter."

*Wilderness*). An Englishman, John Lacy, came first a convert and then a leader. The convulsive ecstatic utterances of the sect drew down the ridicule of Shaftesbury (*On Enthusiasm*). Calamy thought it necessary to enter the lists against their pretensions (*Caveat against the New Prophets*). They gained a distinguished proselyte in Sir R. Bulkley, a pupil of Bishop Fell's, with no inconsiderable learning, who occupied in their proceedings a position which reminds us of that of Henry Drummond among the followers of Irving (Bulkley's *Defense of the Prophets*). Here also there was a strong contagious excitement. Nicholson, the Baxter of the sect, published a confession that he had found himself unable to resist it (*Falsehood of the New Prophets*), though he afterwards came to look upon his companions as "enthusiastick impostors." What is specially noticeable is, that the gift of tongues was claimed by them. Sir R. Bulkley declares that he had heard Lacy repeat long sentences in Latin, and another speak Hebrew, though, when not in the Spirit, they were quite incapable of it (*Narrative*, p. 92). The characteristic thought of all the revelations was, that they were the true children of God. Almost every oracle began with "My child!" as its characteristic word (Peyrat, i. 235–313). It is remarkable that a strange Revivalist movement was spreading, nearly at the same time, through Silesia, the chief feature of which was that boys and girls of tender age were almost the only subjects of it, and that they too spoke and prayed with a wonderful power (Lacy, *Relation*, etc., p. 31; Bulkley, *Narrative*, p. 46).

(8.) The so-called Unknown Tongues, which manifested themselves first in the west of Scotland, and afterwards in the Caledonian Church in Regent Square, present a more striking phenomenon, and the data for judging of its nature are more copious. Here, more than in most other cases, there were the conditions of long, eager expectation, fixed brooding over one central thought, the mind strained to a preternatural tension. Suddenly, now from one, now from another, chiefly from women, devout but illiterate, mysterious sounds were heard. Voices, which at other times were harsh and unpleasing, became, when "singing in the Spirit," perfectly harmonious[a] (Cardale, *Narrative*, in *Morning Watch*, ii. 871, 872). Those who spoke, men of known devotion and acuteness, bore witness to their inability to control themselves (Baxter, *Narrative*, pp. 5, 9, 12), to their being led, they knew not how, to speak in a "triumphant chant" (*ibid.* pp. 46, 81). The man over whom they exercised so strange a power, has left on record his testimony, that to him they seemed to embody a more than earthly music, leading to the belief that the "tongues" of the Apostolic age had been as the archetypal melody of which all the Church's chants and hymns were but faint, poor echoes (Oliphant's *Life of Irving*, ii. 208). To those who were without, on the other hand, they seemed but an unintelligible gibberish, the yells and groans of madmen (Newspapers of 1831, *passim*). Sometimes it was asserted that fragments of known languages, Spanish, Italian, Greek, Hebrew, were mingled together in the utterances of those who spoke in the power (Baxter, *Narrative*, pp. 133, 134). Sometimes it was but a jargon of mere sounds (*ibid.*). The speaker was commonly unable to interpret what he uttered. Sometimes the office was undertaken by another. A clear and interesting summary of the history of the whole movement is given in Mrs. Oliphant's *Life of Irving*, vol. ii. Those who wish to trace it through all its stages must be referred to the seven volumes of the *Morning Watch*, and especially to Irving's series of papers on the Gifts of the Spirit, in vols. iii., iv., and v. Whatever other explanation may be given of the facts, there exists no ground for imputing a deliberate imposture to any of the persons who were most conspicuous in the movement.

(9.) In certain exceptional states of mind and body the powers of memory are known to receive a wonderful and abnormal strength. In the delirium of fever, in the ecstasy of a trance, men speak in their old age languages which they have never heard or spoken since their earliest youth. The accent of their common speech is altered. Women, ignorant and untaught, repeat long sentences in Greek, Latin, Hebrew, which they had once heard, without in any degree, understanding or intending to remember them. In all such cases the marvelous power is the accompaniment of disease, and passes away when the patient returns to his usual state, to the healthy equilibrium and interdependence of the life of sensation and of thought (Abercrombie, *Intellectual Powers*, pp. 140–143; Winslow, *Obscure Diseases of the Brain*, pp. 337, 360, 374; Watson, *Principles and Practice of Physic*, i. 128). The mediæval belief that this power of speaking in tongues belonged to those who were possessed by evil spirits rests, obviously, upon like psychological phenomena (Peter Martyr, *Loci Communes*, i. c. 10; Bayle, *Dictionn.* s. v. "Grandier").

IX. These phenomena have been brought together in order that we may see how far they resemble, how far they differ from, those which we have seen reason to believe constituted the outward signs of the Gift of Tongues. It need not startle or "offend" us if we find the likeness between the true and the counterfeit greater, at first sight, than we expected. So it was at the churches of Corinth and of Asia. There also the two existed in the closest approximation; and it was to no outward sign, to no speaking with languages, or prediction of the future, that St. Paul and St. John pointed as the crucial test by which men were to distinguish between them, but to the confession on the one side, the denial on the other, that Jesus was the Lord (1 Cor. xii. 3; 1 John iv. 2, 3). What may be legitimately inferred from such facts is the existence, in the mysterious constitution of man's nature, of powers which are, for the most part, latent, but which, under given conditions, may be roused into activity. Memory, imagination, speech, may all be intensified, transfigured, as it were, with a new glory, acting independently of any conscious or deliberate volition. The exciting causes may be disease, or the fixed concentration of the senses or of thought on one object, or the power of sympathy with those who have already passed into the abnormal state. The life thus produced is at the furthest pole from the common life of sensation, habit forethought. It sees what others do not see, hears what they do not hear. If there be a spiritual power acting upon man, we might expect this phase

[a] Comp. the independent testimony of Archdeacon Stopford. He had listened to the "unknown tongue," and had found "a sound such as I never heard before, unearthly and unaccountable." He recognised precisely the same sounds in the Irish Revivals of 1859 (*Work and Counter-work*, p. 11).

Digitized by Google

of the life of the human soul to manifest its operations most clearly. Precisely because we believe in the reality of the Divine work on the day of Pentecost, we may conceive of it as using this state as its instrument, not as introducing phenomena, in all respects without parallel, but as carrying to its highest point, what, if good, had been a foreshadowing of it, presenting the reality of what, if evil, had been the mimicry and counterfeit of good. And whatever resemblances there may be, the points of difference are yet greater. The phenomena which have been described are, with hardly an exception, morbid; the precursors or the consequences of clearly recognizable disease. The Gift of Tongues was bestowed on men in full vigor and activity, preceded by no frenzy, followed by no exhaustion. The Apostles went on with their daily work of teaching and organizing the Church. The form which the new power assumed was determined partly, it may be, by deep-lying conditions of man's mental and spiritual being, within which, as self-imposed limits, the Spirit poured from on high was pleased to work, partly by the character of the people for whom this special manifestation was given as a sign. New powers of knowledge, memory, utterance, for which education and habit could not at all account, served to waken men to the sense of a power which they could not measure, a Kingdom of God into which they were called to enter. Lastly, let us remember the old rule holds good, "By their fruits ye shall know them." Other phenomena, presenting approximate resemblances, have ended in a sick man's dreams, in a fevered frenzy, in the narrowness of a sect. They grew out of a passionate brooding over a single thought, often over a single word;[a] and the end has shown that it was not well to seek to turn back God's order and to revive the long-buried past. The gift of the day of Pentecost was the starting-point of the long history of the Church of Christ, the witness, in its very form, of a universal family gathered out of all nations.

But it was the starting-point only. The newness of the truth then presented to the world, the power of the first experience of a higher life, the ongoing expectation in men's minds of the Divine kingdom, may have made this special manifestation, at the time, at once inevitable and fitting. It belonged, however, to a critical epoch, not to the continuous life of the Church. It implied a disturbance of the equilibrium of man's normal state. The high-wrought ecstasy could not continue, might be glorious and blessed for him who had it, a *sign*, as has been said, for those who had it not; but it was not the instrument for building up the church. That was the work of another gift, the prophecy which came from God, yet was addressed from the mind and heart of one man to the minds and hearts of his brethren. When the overflowing fullness of life had passed away, when "tongues" had "ceased," and prophecy itself, in its irresistible power, had "failed," they left behind them the lesson they were meant to teach. They had borne their witness, and had done their work. They had taught men to believe in one Divine Spirit, the giver of all good gifts, "dividing to every man severally as He will;" to recognise his inspiration, not only in the marvel of the "tongues," or in the burning words of prophets, but in all good thoughts, in the right judgment in all things, in the excellent gift of Charity.

E. H. P.

**TOPARCHY** (Τοπαρχία). A term applied in one passage of the Septuagint (1 Macc. xi. 28) to indicate three districts to which elsewhere (x. 30 xi. 34) the name νομός is given. In all these passages the English Version employs the term "governments." The three "toparchies" in question were Apherema (Ἀφαίρεμα), Lydda, and Ramath. They had been detached from Samaria, Peræa, and Galilee respectively, some time before the war between Demetrius Soter and Alexander Bala. Each of the two belligerents endeavored to win over Jonathan, the Jewish High-Priest, to their side, by allowing him, among other privileges, the sovereign power over these districts without any payment of land-tax. The situation of Lydda is doubtful; for the toparchy Lydda, of which Pliny speaks (v. 14), is situated not in Peræa, but on the western side of the Jordan. Apherema is considered by Grotius to denote the region about Bethel, captured by Abijah from Jeroboam (2 Chr xiii. 19). Ramath is probably the famous stronghold, the desire of obtaining which led to the unfortunate expedition of the allied sovereigns, Ahab and Jehoshaphat (1 K. xxii.).

The "toparchies" seem to have been of the nature of *agaliks*, and the passages in which the word τοπάρχης occurs, all harmonize with the view of that functionary as the *agá*, whose duty would be to collect the taxes and administer justice in all cases affecting the revenue, and who, for the purpose of enforcing payment, would have the command of a small military force. He would thus be the lowest in the hierarchy of a despotic administration to whom troops would be entrusted; and hence the taunt in 2 K. xviii. 24, and Is. xxxvi. 9: πῶς ἀποστρέψεις τὸ πρόσωπον τοπάρχου ἑνὸς, τῶν δούλων τοῦ κυρίου μου τῶν ἐλαχίστων: "How wilt thou resist a single toparch, one of the very least of my lord's slaves?" But the essential character of the toparch is that of a fiscal officer, and his military character is altogether subordinate to his civil. Hence the word is employed in Gen. xli. 34, for the "officers over the land," who were instructed to buy up the fifth part of the produce of the soil during the seven years of abundance. In Dan. iii. 3, Theodotion uses the word in a much more extensive sense, making it equivalent to "satraps," and the Eng. Version renders the original by "princes;" but the original word here is not the same as in Dan. iii. 2, 27, and vi. 7, in every one of which cases a subordinate functionary is contemplated.

J. W. B.

**TOPAZ** (פִּטְדָה, *pitdâh*: τοπάζιον: *topazius*). The topaz of the ancient Greeks and Romans is generally allowed to be our chrysolite, while their chrysolite is our topaz. [CHRYSOLITE.] Bellermann, however, (*Die Urim und Thummim*, p. 39), contends that the topaz and the chrysolite of the ancients are identical with the stones denoted by these terms at the present day. The account which Pliny (*H. N.* xxxvii. 8) gives of the *topazos* evidently leads to the conclusion that that stone is our chrysolite; "the topazos," he says, "is still held in high estimation for its *green tints*." According to the authority of Juba, cited by Pliny, the topaz is derived from an island in the Red Sea called

[a] It can hardly be doubted that the interpolated word "unknown," in the A. V. of 1 Cor xiv., was the starting-point of the peculiarly unintelligible utterances of most of the Irvingite utterances.

Digitized by Google

"Topazos;" it is said that this island, where these precious stones were procured, was surrounded by fogs and was, in consequence, often sought for by navigators, and that hence it received its name, the term "topaxin" signifying, in the Troglodyte tongue, "to seek" (?). The *pitdâh*, which, as has already been stated, probably denotes the modern chrysolite, was the second stone in the first row of the high-priest's breast-plate (Ex. xxviii. 17, xxxix. 10); it was one of the jewels that adorned the apparel of the king of Tyre (Ez. xxviii. 13); it was the bright stone that garnished the ninth foundation of the heavenly Jerusalem (Rev. xxi. 20); in Job xxviii. 19, where wisdom is contrasted with precious articles, it is said that "the *pitdâh* of Ethiopia shall not equal it." Chrysolite, which is also known by the name of olivine and peridot, is a silicate of magnesia and iron; it is so soft as to lose its polish unless worn with care (*Mineralogy and Crystallography*, by Mitchell and Tennant, p. 512). The identity of the τοπάζιον with the פִּטְדָה of the Heb. Bible is sufficiently established by the combined authorities of the LXX., the Vulg., and Josephus, while that of the τοπάζιον with our chrysolite is, it appears to us, proved beyond a doubt by those writers who have paid most attention to this question. See Braun, *De Vest. Sac. Heb.* p. 641, ed. 1680. W. H.

**TOPHEL** (תֹּפֶל [*lime*]: Τοφόλ: *Thophel*). A place mentioned Deut. i. 1, which has been probably identified with *Tûfileh* on a wady of the same name running north of Bozra towards the N. W. into the Ghôr and S. E. corner of the Dead Sea (Robinson, ii. 570). This latter is a most fertile region, having many springs and rivulets flowing into the Ghôr, and large plantations of fruit-trees, whence figs are exported. The bird *katta*, a kind of partridge, is found there in great numbers, and the steinbock pastures in herds of forty or fifty together (Burckhardt, *Holy Land*, 405, 406). H. H.

**TOPHETH**, and once **TOPHET** (תֹּפֶת [perh. *abomination, a place abhorred*, Distr.]). Generally with the article (2 K. xxiii. 10; Jer. vii. 31, 32, xix. 6, 13, 14). Three times without it (Jer. vii. 32, xix. 11, 12). Once not only without it, but with an affix, תָּפְתָּהּ, *Taphtheh* (Is. xxx. 33). In Greek, [Rom. and Vat. 2 K. and Jer. vii.] Ταφέθ, [Comp. in Jer. xix. 11] Ταφέθ, and [Alex. in 2 K.] Θαφέθ (Steph. *Lex. Voc. Peregrin.*; Bird, *Thes.*); [for the LXX. in Is. xxx. 33 and Jer. xix. see below.] In the Vulgate, [*Tophet,*] *Topheth*. In Jerome, *Tophet*. It is not mentioned by Josephus.

It lay somewhere east or southeast of Jerusalem, for Jeremiah went out by the Sun Gate, or East Gate, to go to it (Jer. xix. 2). It was in "the Valley of the Son of Hinnom" (vii. 31), which is "by the entry of the east gate" (xix. 2). Thus it was not identical with Hinnom, as some have written, except in the sense in which Paradise is identical with Eden, the one being part of the other. It was in Hinnom, and was perhaps one of its chief groves or gardens. It seems also to have been part of the king's gardens, and watered by Siloam, perhaps a little to the south of the present *Birket el-Hamra*. The name Tophet occurs only in the Old Testament (2 K. xxiii. 10; Is. xxx. 33; Jer. vii. 31, 32, xix. 6, 11, 12, 13, 14). The New does not refer to it, nor the Apocrypha. Jerome is the first who notices it; but we can see that by his time the name had disappeared, for he discusses it very much as a modern commentator would do, only mentioning a green and fruitful spot in Hinnom, watered by Siloam, where he assumes it was: "Delubrum Baal, nemus ac lucus, Siloe fontibus irrigatus" (*In Jer.* vii.). If this be the case, we must conclude that the valley or gorge south of Jerusalem, which usually goes by the name of Hinnom, is not the *Ge Ben-Hinnom* of the Bible. Indeed, until comparatively modern times, that southern ravine was never so named. Hinnom by old writers, western and eastern, is always placed *east* of the city, and corresponds to what we call the "Mouth of the Tyropœon," along the southern bed and banks of the Kedron (Jerome, *De Locis Hebr.* and *Comm. in Matt.* x. 28; Ibn Batutah, *Travels*; Jalal Addin's *History of the Temple*; Felix Fabri), and was reckoned to be somewhere between the Potter's Field and the Fuller's Pool.

Tophet has been variously translated. Jerome says *latitudo*; others *garden*; others *drum*; others *place of burning* or *burying*; others *abomination* (Jerome, Noldius, Gesenius, Bochart, Simonis, *Onom.*). The most natural seems that suggested by the occurrence of the word in two consecutive verses, in the one of which it is a *tabret*, and in the other *Tophet* (Is. xxx. 32, 33). The Hebrew words are nearly identical; and Tophet was probably the king's "music-grove" or garden, denoting originally nothing evil or hateful. Certainly there is no proof that it took its name from the drums beaten to drown the cries of the burning victims that passed through the fire to Moloch. As Chinneroth is the *harp-sea*, so Tophet is the *tabret-grove* or valley. This might be at first part of the royal garden, a spot of special beauty, with a royal villa in the midst, like the Pasha's palace at Shûbra, near Cairo. Afterwards it was defiled by idols, and polluted by the sacrifices of Baal and the fires of Moloch. Then it became the place of abomination, the very gate or pit of hell. The pious kings defiled it, and threw down its altars and high places, pouring into it all the filth of the city, till it became the "abhorrence" of Jerusalem; for to it primarily, though not exhaustively, the prophet refers: —

> They shall go forth and gaze
> On the carcases of the transgressors against me:
> For their worm shall not die,
> And their fire shall not be quenched,
> And they shall be an abhorrence to all flesh.
> (Is. lxvi. 24.)

In Kings and Jeremiah the name is "the Tophet," but in Isaiah (xxx. 33) it is *Tophteh*; yet the places are probably the same so far, only in Isaiah's time the grove might be changing its name somewhat, and with that change taking on the symbolic meaning which it manifestly possesses in the prophet's prediction: —

> Set in order in days past has been Tophteh;
> Surely for the king it has been made ready.
> He hath deepened, he hath widened it;[a]
> The pile thereof, fire and wood, he hath multiplied.

[a] Of the literal Tophet it is said, "They shall bury in Tophet, *till there be no place*" (Jer. vii. 32). Of the symbolical Tophet it is said above, "He hath *deepened and widened it.*"

* **TOW.** [LINEN; FLAX.]

**TOWER.**[a] For towers as parts of city-walls, or as strongholds of refuge for villages, see FENCED CITIES, JERUSALEM, ii. 1315–1322, and HANANEEL. Watch-towers or fortified posts in frontier or exposed situations are mentioned in Scripture, as the tower of EDAR, etc. (Gen. xxxv. 21; Mic. iv. 8; Is. xxi. 5, 8, 11; Hab. ii. 1; Jer. vi. 27; Cant. viii. 4); the tower of Lebanon, perhaps one of David's "garrisons," *nêtsîb* (2 Sam. viii 6; Rawner, *Pal.* p. 29). Such towers or outposts for the defense of wells, and the protection of flocks and of commerce, were built by Uzziah in the pasture-grounds (*Midbar*) [DESERT], and by his son Jotham in the forests (*Choreshîm*) of Judah (2 Chr. xxvi. 10, xxvii. 4). Remains of such fortifications may still be seen, which, though not perhaps themselves of remote antiquity, yet very probably have succeeded to more ancient structures built in the same places for like purposes (Robinson, ii. 81, 85, 180; Roberts, *Sketches*, pl. 93). Besides these military structures, we read in Scripture of towers built in vineyards as an almost necessary appendage to them (Is. v. 2; Matt. xxi. 33; Mark xii. 1). Such towers are still in use in Palestine in vineyards, especially near Hebron, and are used as lodges for the keepers of the vineyards.[b] During the vintage they are filled with the persons employed in the work of gathering the grapes (Robinson, i. 213, ii. 81; Martineau, *East. Life*, p. 434; De Saulcy, *Trav.* i. 546). H. W. P.

* **TOWER OF BABEL.** [TONGUES, CONFUSION OF.]

**TOWN-CLERK** (γραμματεύς: *scriba*). The title ascribed in our Version to the magistrate at Ephesus who appeased the mob in the theatre at the time of the tumult excited by Demetrius and his fellow-craftsmen (Acts xix. 35). The other primary English versions translate in the same way, except those from the Vulgate (Wycliffe, the Rhemish), which render "scribe." A digest of Boeckh's views, in his *Staatshaushaltung*, respecting the functions of this officer at Athens (there were three grades of the order there), will be found in *Dict. of Ant.* p. 459 ff. The γραμματεύς or "town-clerk" at Ephesus was no doubt a more important person in that city than any of the public officers designated by that term in Greece (see Greswell's *Dissertations*, iv. 152). The title is preserved on various ancient coins (Wetstein, *Nov. Test.* ii. 586; Akermann's *Numismatic Illustrations*, p. 53), which illustrate fully the rank and dignity of the office. It would appear that what may have been the original service of this class of men, namely, to record the laws and decrees of the state, and to read them in public, embraced at length, especially under the ascendency of the Romans in Asia Minor, a much wider sphere of duty, so as to make them, in some instances, in effect the heads or chiefs of the municipal government (Winer, *Realw.* i. 649). They were authorized to preside over the popular assemblies and submit votes to them, and are mentioned on marbles as acting in that capacity. In cases where they were associated with a superior magistrate, they succeeded to his place and discharged his functions when the latter was absent or had died. "On the subjugation of Asia by the Romans," says Baumstark (Pauly's *Encyclopädie*, iii. 949), "γραμματεῖς were appointed there in the character of governors of single cities and districts, who even placed their names on the coins of their cities, caused the year to be named from them, and sometimes were allowed to assume the dignity, or at least the name, of Ἀρχιερεύς." This writer refers as his authorities to Schwartz, *Dissertatio de γραμματεῦσι, Magistratu Civitatum Asiæ Proconsularis* (Altorf, 1735); Van Dale, *Dissertat.* v. 425; Spanheim, *De Usu et Præst. Numm.* i. 704. A good note on this topic will be found in the *New Englander* (U. S. A.), x. 144.

It is evident, therefore, from Luke's account, as illustrated by ancient records, that the Ephesian town-clerk acted a part entirely appropriate to the character in which he appears. The speech delivered by him, it may be remarked, is the model of a popular harangue. He argues that such excitement as the Ephesians evinced was undignified, inasmuch as they stood above all suspicion in religious matters (Acts xix. 35, 36); that it was unjustifiable, since they could establish nothing against the men whom they accused (ver. 37); that it was unnecessary, since other means of redress were open to them (vv. 38, 39); and, finally, if neither pride nor a sense of justice availed anything, fear of the Roman power should restrain them from such illegal proceedings (ver. 40).

H. B. H.

**TRACHONITIS** (Τραχωνῖτις: *Trachonitis*). This place is mentioned only once in the Bible. In Luke iii. 1 we read that Philip "was tetrarch of Ituræa, καὶ Τραχωνίτιδος χώρας;" and it appears that this "Trachonite region," in addition to the little province of Trachonitis, included parts of Auranitis, Gaulanitis, and Batanæa (Joseph. *Ant.* xvii. 8, § 1, and 11, § 4).

*Trachonitis* is, in all probability, the Greek equivalent for the Aramaic *Argob*. The Targumists render the word אַרְגֹּב, in Deut. iii. 14, by מִרכוֹנָא. According to Gesenius, ארגב signifies "a heap of stones," from the root רגב, "to pile up stones." So Τραχωνῖτις or Τραχών is a "rugged or stony

---

[a] 1. נָצַר, נְצוֹר, and מִצְפֶּה: ἔπαλξις: from נָצַר, "search," "explore," a searcher or watcher; and hence the notion of a watch-tower. In Is. xxxii. 14, the tower of Ophel is probably meant (Neh. iii. 26; Gen. 198).

2. מִגְדָּל, and מִגְדּוֹל or מַגְדּוֹל: πύργος: *turris*; from גָּדַל, "become great" (Gen. 245), used sometimes as a proper name [MIGDOL.]

3. מְצוּר: πέτρα. *munitio*; only once "tower" Hab. ii. 1.

4. עֹפֶל: οἶκος: *domus*; only in 2 K. v. 24 [OPHEL.]

5. פִּנָּה, usually "corner," twice only "tower," Zeph. i. 16, iii. 6: γωνία: *angulus*.

6. מְצָפָה: σκοπιά: *specula*; "watch-tower." [MIZPAH.]

7. מִשְׂגָּב: ὀχύρωμα: *robur*; only in poetry [MISGAB.]

[b] "Such towers are numerous also at Bethlehem, and form a striking feature of the landscape (Hackett's *Illustrations of Scripture*, p. 171 f.). H

tract." William of Tyre gives a curious etymology of the word Trachonitis: "Videtur autem nobis a *traconibus* dicta. Tracones enim dicuntur occulti et subterranei meatus, quibus ista regio abundat" (*Gest. Dei per Francos*, p. 895). Be this as it may, there can be no doubt that the whole region abounds in caverns, some of which are of vast extent. Strabo refers to the caves in the mountains beyond Trachon (*Geog.* xvi.), and he affirms that one of them is so large that it would contain 4000 men. The writer has visited some spacious caves in *Jebel Hauran*, and in the interior of the *Lejah*.

The situation and boundaries of Trachonitis can be defined with tolerable accuracy from the notices in Josephus, Strabo, and other writers. From Josephus we gather that it lay south of Damascus, and east of Gaulanitis, and that it bordered on Auranitis and Batanea (*B. J.* iv. 1, § 1, i. 20, § 4, iii. 10, § 7). Strabo says there were δύο Τραχῶνες (*Geog.* xvi.). From Ptolemy we learn that it bordered on Batanea, near the town of Saccea (*Geog.* xv.). In the Jerusalem Gemara it is made to extend as far south as Bostra (Lightfoot, *Opp.* ii. 473). Eusebius and Jerome, though they err in confounding it with Iturea, yet the latter rightly defines its position, as lying between Bostra and Damascus (*Onom.* s. v.). Jerome also states that Kenath was one of its chief towns (*Onom.* s. v. "Canath").

From these data we have no difficulty in fixing the position of Trachonitis. It included the whole of the modern province called *el-Lejâh* (اللجاة), with a section of the plain southward, and also a part of the western declivities of *Jebel Hauran*. This may explain Strabo's two Trachons. The identity of the Lejah and Trachonitis does not rest merely on presumptive evidence. On the northern border of the province are the extensive ruins of *Musmeih*, where, on the door of a beautiful temple, Burckhardt discovered an inscription, from which it appears that this is the old city of *Phocus*, and he capital of Trachonitis (μητροκωμία Τραχῶνος, *Trav. in Syr.* 117). The *Lejah* is bounded on the east by the mountains of Batanea (now *Jebel Hauran*), on whose slopes are the ruins of Saccea and Kenath; on the south by Auranitis (now *Hauran*), in which are the extensive ruins of Bostra; on the west by Gaulanitis (now *Jaulân*); and on the north by Iturea (now *Jedûr*) and Damascus. If all other proofs were wanting, a comparison of the features of the *Lejah* with the graphic description Josephus gives of Trachonitis would be sufficient to establish the identity. The inhabitants, he says, "had neither towns nor fields, but dwelt in caves that served as a refuge both for themselves and their flocks. They had, besides, cisterns of water and well-stored granaries, and were thus able to remain long in obscurity and to defy their enemies. The doors of their caves are so narrow that but one man can enter at a time, while within they are incredibly large. The ground above is almost a plain, but it is covered with rugged rocks, and is difficult of access, except where a guide points out the paths. These paths do not run in a straight course, but have many windings and turns" (*Ant.* xv. 10, § 1). A description of the *Lejah* has been given above [ARGOB], with which this may be compared.

The notices of Trachonitis in history are few and brief. Josephus affirms that it was colonized by Uz the son of Aram (*Ant.* i. 6, § 4). His next reference to it is when it was held by Zenodorus the bandit-chief. Then its inhabitants made frequent raids, as their successors do still, upon the territories of Damascus (*Ant.* xv. 10, § 1). Augustus took it from Zenodorus, and gave it to Herod the Great, on condition that he should repress the robbers (*Ant.* xvi. 9, § 1). Herod bequeathed it to his son Philip, and his will was confirmed by Cæsar (*B. J.* ii. 6, § 3). This is the Philip referred to in Luke iii. 1. At a later period it passed into the hands of Herod Agrippa (*B. J.* iii. 3, § 5). After the conquest of this part of Syria by Cornelius Palma, in the beginning of the second century, we hear no more of Trachonitis (Burckhardt, *Trav. in Syr.* 110 ff.; Porter, *Damascus*, ii. 240–275; *Journ. Geog. Soc.* xxviii. 250–252). [Also, Porter, *Giant Cities of Bashan*, pp. 15, 93; and J. G. Wetzstein, *Reisebericht üb. Hauran u. die Trachonen*, p. 36 ff. — H.] J. L. P.

* **TRADITION** (παράδοσις, rendered once, in 1 Cor. xi. 2, "ordinances"). Primarily it denotes the act of delivering or transmitting, then the thing delivered; in the N. T. it has only the latter sense. It refers generally, if not always, to preceptive rather than to historical matters. Traditions may be either written or oral (2 Thess. ii. 15); and the term is perhaps used in Gal. i. 14, so as to include even precepts of the canonical Scriptures. But the traditions alluded to by Christ in Matt. xv. and Mark vii. were probably for the most part oral; Josephus (*Ant.* xiii. 10, § 6) seems to imply this, and he furthermore distinguishes them from the Scriptures as being additions to, or explanations of them, handed down from the fathers. These were afterwards written in the Talmud. On the character of them, cf. Wetstein, Lightfoot and Schöttgen on Matt. vi. 2, 5, xv. 2. [WASHING THE HANDS AND FEET; PHARISEES; SCRIBES.]

The authoritativeness of traditions, according to the N. T., depends on their source. If they originated strictly with uninspired men, they were not authoritative, and might even be directly opposed to Divine commandments (Matt. xv. 6, Col. ii. 8). On the other hand παραδόσεις which were derived from Christ or his apostles, were authoritative (1 Cor. xi. 2; 2 Thess. ii. 15). Here we may note also the frequent use of παραδίδωμι, said of injunctions or important communications *delivered* to the Christians (1 Cor. xi. 23, xv. 3; Acts xvi. 4; Rom. vi. 17; 2 Pet. ii. 21). In some of these cases the whole substance of the Gospel is spoken of as thus delivered. And oral transmission is probably meant in most cases.

This suggests the inquiry, what traditional elements there are in the Bible itself. As regards the O. T., since the names of the authors of the historical books are not given and many of the histories cover a long period of time, there is room for unbounded license in conjecturing how far the narratives are traditions reduced to writing a greater or less time after the occurrence of the events recorded. But the mention of histories now lost, made as early as Num. xxi. 14 ("the book of the wars of the Lord"); and especially in the books of Kings and Chronicles [KINGS] of annals of the several reigns, diminishes very much the probability of extensive resort to *old* traditions in the compilation of the histories. Where reference is made in one part of the O. T. to former events in the history of the people, we can generally find the events recorded in the earlier books. Cf. *e. g.* Jephthah's message to the Ammonites (Judg. xi.) with the

Digitized by Google

narrative in Num. xx. and xxi., or Ps. lxxviii. with the history of the Exodus. It is more than doubtful whether we are to understand Mic. vi. 5–8 as containing a dialogue between Balak and Balaam, preserved by tradition. This view, though advanced by Bishop Butler (*Sermon* on Balaam), and adopted in the article on MOAB and by Stanley (*Jewish Church*, i. 212), is not generally accepted, and hardly seems to be suggested by the passage in Micah.

The time embraced in the N. T. histories does not allow much scope to tradition in the ordinary sense of the term. But if we take παράδοσις in the narrower sense in which the N. T. uses it, then it may be said that a considerable part of the historical books of the N. T. may be composed of traditions. The Gospel was at first preached, not written. What the apostles thus handed down was afterwards recorded by them or others. See GOSPELS; Westcott, *Introduction*, p. 212; and especially Luke i. 1 ff. Accordingly, the familiar passage Acts xx. 35, where Paul quotes a saying of Christ not elsewhere recorded, is strictly speaking no more a tradition than the other sayings of Christ which are found in the Gospels; for at the time when Paul used this language perhaps none, or not more than one, of the Gospels was written. See Hackett, *Acts*, p. 343, and Introduction to Acts, p. 29. The same may be said of John viii. 1–11. This narrative, though belonging originally to none of the Gospels, was probably preserved in the recollection of the disciples and early incorporated into the text of John. See Meyer on this passage. Somewhat different is the case with the interpolation in John v. 3 *b*, 4, which seems to be a tradition reflecting a popular belief, but for which John cannot be regarded as vouching. Still different is the tradition (John xxi. 23) respecting John's death, which is mentioned, only to be pronounced false.

There are however a few instances of what seem to be traditions of longer standing. On 2 Tim. iii. 8 see JANNES AND JAMBRES, and Wetstein *in loc.* The phrase "sawn asunder" in Heb. xi. 37 is doubtless founded on the tradition that Isaiah was thus put to death. On the dispute between Michael and the Devil, Jude 9, see MICHAEL; also De Wette and Huther *in loc.* Of a similar character is the quotation, in Jude 14, 15, from "Enoch, the seventh from Adam." On this see ENOCH, BOOK OF. The allusion in Jude 6 to the angels who kept not their first estate may also have been derived from the book of Enoch (xii. 4), though this again is probably derived from Gen. vi. 1–4 (on which see, besides the commentaries, especially Kurtz, *Die Ehen der Söhne Gottes*, etc., in his *Geschichte des Alten Bundes*). 2 Pet. ii. 4 probably refers to the same thing. According to some, the expression in 1 Cor. x. 4 is derived from a Jewish tradition that the rock from which water sprang forth did actually follow the Israelites in their wanderings. But this, though a real Jewish tradition, cannot be proved to have existed before the time of Paul; and if it did, Paul does not indorse it, — at the most he only alludes to it. Cf. Neander and Meyer *in loc.* A more important instance of tradition is that respecting the mediation of angels in the giving of the Law. This is mentioned as something generally understood, in Acts vii. 53, Gal. iii. 19, and Heb. ii. 2. The representation cannot be derived directly from the O. T.; but the LXX. in its translation of Deut. xxxiii. 2 suggests it, and Josephus indorses it (*Ant.* xv. 5, § 3).

On the subject of tradition in the ecclesiastical sense, see especially Holtzmann, *Kanon und Tradition*, and Jacobi, *Kirchliche Lehre von der Tradition*.

C. M. M.

• **TRAFFICKERS.** [COMMERCE; MARKET.]

**TRANCE** (ἔκστασις: *excessus*). (1.) In the only passage (Num. xxiv. 4, 16) in which this word occurs in the English of the O. T. there is, as the italics show, no corresponding word in Hebrew, simply נֹפֵל, "falling," for which the LXX. gives ἐν ὕπνῳ, and the Vulg. more literally *qui cadit*. The Greek ἔκστασις is, however, used as the equivalent for many Hebrew words, signifying dread, fear, astonishment (Trommii *Concordant.*). In the N. T. we meet with the word three times (Acts x. 10, xi. 5, xxii. 17), the Vulgate giving "excessus" in the two former, "stupor mentis" in the latter. Luther uses "entzückt" in all three cases. The meaning of the Greek and Latin words is obvious enough. The ἔκστασις is the state in which a man has passed out of the usual order of his life, beyond the usual limits of consciousness and volition. "Excessus," in like manner, though in classical Latin chiefly used as an euphemism for death, became, in ecclesiastical writers, a synonym for the condition of seeming death to the outer world, which we speak of as a trance. "Hanc vim ecstasin dicimus, excessum sensus, et amentiæ instar" (Tertull. *de An.* c. 45). The history of the English word presents an interesting parallel. The Latin "transitus" took its place also among the euphemisms for death. In early Italian "essere in transito," was to be as at the point of death, the passage to another world. Passing into French, it also, abbreviated into "transe," was applied, not to death itself, but to that which more or less resembled it (Diez, *Roman. Wörterbuch*, s. v. "transito").

(2.) Used as the word is by Luke,[a] "the physician," and, in this special sense, by him only, in the N. T., it would be interesting to inquire what precise meaning it had in the medical terminology of the time. From the time of Hippocrates, who uses it to describe the loss of conscious perception,[b] it had probably borne the connotation which it has had, with shades of meaning for good or evil, ever since. Thus, Hesychius gives as the account of a man in an ecstasy, that he is ὁ εἰς ἑαυτὸν μὴ ὤν. Apuleius (*Apologia*) speaks of it as "a change from the earthly mind (ἀπὸ τοῦ γηΐνου φρονήματος) to a divine and spiritual condition both of character and life." Tertullian (*l. c.*) compares it to the dream-state in which the soul acts, but not through its usual instruments. Augustine (*Confess.* ix. 11) describes his mother in this state as "abstracta a præsentibus," and gives a description of like phenomena in the case of a certain Restitutus (*de Civ Dei*, xiv. 24).

(3.) We may compare with these statements the

[a] In Mark v. 42 and xvi. 8 it is used simply for astonishment mingled with awe, not for the trance state.

[b] The distinction drawn by Hippocrates and Galen between ἐκστάσεις συνιόντα and ἐκστ. μελαγχολικαὶ answers obviously to that of later writers between pure and ecstatic catalepsy (comp. Foesius, *Œconom. Hippocrat.* s. v. ἐκστασις).

Digitized by Google

more precise definitions of modern medical science. There the ecstatic state appears as one form of catalepsy. In catalepsy pure and simple, there is "a sudden suspension of thought, of sensibility, of voluntary motion." "The body continues in any attitude in which it may be placed;" there are no signs of any process of thought; the patient continues silent. In the ecstatic form of catalepsy, on the other hand, "the patient is lost to all external impressions, but wrapped and absorbed in some object of the imagination." The man is "as if out of the body." "Nervous and susceptible persons are apt to be thrown into these trances under the influence of what is called mesmerism. There is, for the most part, a high degree of mental excitement. The patient utters the most enthusiastic and fervid expressions or the most earnest warnings. The character of the whole frame is that of intense contemplative excitement. He believes that he has seen wonderful visions and heard singular revelations" (Watson, *Principles and Practice*, Lect. xxxix.; Copland, *Dict. of Medicine*, s. v. "Catalepsy"). The causes of this state are to be traced commonly to strong religious impressions; but some, though, for the most part, not the ecstatic, phenomena of catalepsy are producible by the concentration of thought on one object, or of the vision upon one fixed point (*Quart. Rev.* xciii. pp. 510–522, by Dr. W. B. Carpenter; comp. URIM AND THUMMIM), and, in some more exceptional cases, like that mentioned by Augustine (there, however, under the influence of sound, "ad imitatas quasi lamentantis cujuslibet hominis voces"), and that of Jerome Cardan (*Var. Rer.* viii. 43), men have been able to throw themselves into a cataleptic state at will. [See Dr. W. A. Hammond on the *Physics and Physiology of Spiritualism*, in the *N. A. Rev.* for April 1870; cx. 233–260. — A.]

(4.) Whatever explanation may be given of it, it is true of many, if not of most, of those who have left the stamp of their own character on the religious history of mankind, that they have been liable to pass at times into this abnormal state. The union of intense feeling, strong volition, long-continued thought (the conditions of all wide and lasting influence), aided in many cases by the withdrawal from the lower life of the support which is needed to maintain a healthy equilibrium, appears to have been more than the "earthen vessel" will bear. The words which speak of "an ecstasy of adoration" are often literally true. The many visions, the journey through the heavens, the so-called epilepsy of Mohammed, were phenomena of this nature. Of three great mediæval teachers, St. Francis of Assisi, St. Thomas Aquinas, and Joannes Scotus, it is recorded that they would fall into the ecstatic state, remain motionless, seem as if dead, sometimes for a whole day, and then, returning to consciousness, speak as if they had drunk deep of divine mysteries (Gualtperius, *Crit. Sac.* on Acts x. 10). The old traditions of Aristeas and Epimenides, the conflicts of Dunstan and Luther with the powers of darkness, the visions of Savonarola, and George Fox, and Swedenborg, and Böhmen, are generically analogous. Where there has been no extraordinary power to influence others, other conditions remaining the same, the phenomena have appeared among whole classes of men and women in proportion as the circumstances of their lives tended to produce an excessive susceptibility to religious or imaginative emotion. The history of monastic orders, of American and Irish revivals, gives countless examples. Still more noticeable is the fact that many of the *improvisatori* of Italy are "only able to exercise their gift when they are in a state of ecstatic trance, and speak of the gift itself as something morbid" [a] (Copland, *l. c.*); while in strange contrast with their earlier history, and pointing perhaps to a national character that has become harder and less emotional, there is the testimony of a German physician (Frank), who had made catalepsy a special study, that he had never met with a single case of it among the Jews (Copland, *l. c.*).[b]

(5.) We are now able to take a true estimate of the trances of Biblical history. As in other things, so also here, the phenomena are common to higher and lower, to true and false systems. The nature of man continuing the same, it could hardly be that the awfulness of the Divine presence, the terrors of Divine judgment, should leave it in the calm equilibrium of its normal state. Whatever made the impress of a truth more indelible, whatever gave him to whom it was revealed more power over the hearts of others, might well take its place in the Divine education of nations and individual men. We may not point to trances and ecstasies as proofs of a true Revelation, but still less may we think of them as at all inconsistent with it. Thus, though we have not the word, we have the thing in the "deep sleep" (ἔκστασις, LXX.), the "horror of great darkness," that fell on Abraham (Gen. xv. 12). Balaam, as if overcome by the constraining power of a Spirit mightier than his own, "sees the vision of God, *falling*, but with opened eyes" (Num. xxiv. 4). Saul, in like manner, when the wild chant of the prophets stirred the old depths of feeling, himself also "prophesied" and "fell down" (most, if not all, of his kingly clothing being thrown off in the ecstasy of the moment), "all that day and all that night" (1 Sam. xix. 24). Something there was in Jeremiah that made men say of him that he was as one that "is mad and maketh himself a prophet" (Jer. xxix. 26). In Ezekiel the phenomena appear in more wonderful and awful forms. He sits motionless for seven days in the stupor of astonishment, till the word of the Lord comes to him (Ez. iii. 15). The "hand of the Lord" falls on him, and he too sees the "visions of God," and hears the voice of the Almighty, is "lifted up between the earth and heaven," and passes from the river of Chebar to the Lord's house in Jerusalem (Ez. viii. 3).

(6.) As other elements and forms of the prophetic work were revived in "the Apostles and Prophets" of the N. T., so also was this. More distinctly even than in the O. T. it becomes the medium through which men rise to see clearly what before was dim and doubtful, in which the mingled hopes and fears and perplexities of the waking state are dissipated at once. Though different in form, it belongs to the same class of phenomena as the GIFT OF TONGUES, and is connected

[a] Analogous to this is the statement of Aristotle (*Frol.* c. 30) that the μελαγχολικοί speak often in wild bursts of poetry, and as the Sibyls and others who are inspired (ἔνθεοι)

[b] A fuller treatment of the whole subject than can be entered on here may be found in the chapter on *Les Mystiques* in Maury, *La Magie et l'Astrologie*

Digitized by Google

with "visions and revelations of the Lord." In some cases, indeed, it is the chosen channel for such revelations. To the "trance" of Peter in the city, where all outward circumstances tended to bring the thought of an expansion of the Divine kingdom more distinctly before him than it had ever been brought before, we owe the indelible truth stamped upon the heart of Christendom, that God "is no respecter of persons," that we may not call any man "common or unclean" (Acts x., xi.). To the "trance" of Paul, when his work for his own people seemed utterly fruitless, we owe the mission which was the starting-point of the history of the Universal Church, the command which bade him "depart . . . . far hence unto the Gentiles" (Acts xxii. 17–21). Wisely for the most part did that Apostle draw a veil over these more mysterious experiences. He would not sacrifice to them, as others have often sacrificed, the higher life of activity, love, prudence. He could not explain them to himself. "In the body or out of the body" he could not tell, but the outer world of perception had passed away, and he had passed in spirit into "paradise," into "the third heaven," and had heard "unspeakable words" (2 Cor. xii. 1–4). Those trances too, we may believe, were not without their share in fashioning his character and life, though no special truth came distinctly out of them. United as they then were, but as they have seldom been since, with clear perceptions of the truth of God, with love wonderful in its depth and tenderness, with energy unresting, and subtle tact almost passing into "guile," they made him what he was, the leader of the Apostolic band, emphatically the "master builder" of the Church of God (comp. Jowett, *Fragment on the Character of St. Paul*). E. H. P.

* **TRANSFIGURATION.** The event in the earthly life of Christ which marks the culminating point in his public ministry, and stands midway between the temptation in the wilderness and the agony in Gethsemane. It is recorded, with very slight variations, by the Synoptists (Matt. xvii. 1–13; Mark ix. 2–13; Luke ix. 28–36), but is omitted by John, like many other events and miracles, as being already known from the gospel tradition.

1. The *place* mentioned by the Evangelists is an high mountain," probably in Galilee, where the synoptical Gospels mainly move, and where the events immediately preceding and succeeding occurred. The Lord was wont to withdraw to a mountain for prayer (Matt. xiv. 23; Luke xxi. 37; John vi. 15), and several of the greatest events in the history of revelation, from the legislation on Mount Sinai to the ascension from Mount Olivet, took place on mountains. An ancient tradition, first mentioned by Cyril of Jerusalem (*Catech.* xii. 16) about the middle of the fourth century, locates the Transfiguration on Mount Tabor, the highest in Galilee, which rises, like a truncated cone, 1310 Paris feet from the plain of Esdraelon, two hours and a quarter south of Nazareth, with an unbroken view to the surrounding country, and is often mentioned in the Old Testament (Judges iv. 6, 14, viii. 18; Ps. lxxxix. 12; Jer. xlvi. 18), though nowhere in the New. This tradition gained soon almost universal acceptance, while an earlier tradition, which places the event on the Mount of Olives near Jerusalem, stands isolated. It gave rise to the building of churches and monasteries on the summit of Tabor ("to correspond to the three tabernacles which Peter was *not* permitted to build"), and to the designation of the festival of the Transfiguration in the Greek Church, as Τὸ Θαβώριον. There is no evidence in favor of this tradition, but strong and decisive evidence against it; for the summit of Tabor was employed without intermission between the times of Antiochus the Great, 218 B. C., to the destruction of Jerusalem, A. D. 70, as a fortification, and hence unfit for quiet seclusion and meditation (Polybius v. 70, 6; Josephus, *Ant.* xiv. 6, 3; *B. J.* i. 8, 7, ii. 20, 6, iv. 18; comp. Ritter, *Comparative Geography of Palestine*, ii. 313, Eng. trans.; Robinson, *Bibl. Res.* iii. 220–225; Herzog, *Encykl.* art. *Thabor*; Trench, *Studies in the Gospels*, p. 192). Modern commentators and critics favor Mount Hermon, the highest mountain-top in Gaulonitis, or one of the spurs of the Anti-Libanus. Hermon is the highest of all the Lebanon mountains, and is called *Jebel es-Sheikh*, or the Sheikh's mountain.

2. As to the *time*, the Transfiguration probably took place in the night, because it could be seen to better advantage than in daylight, and Jesus usually went to mountains to spend there the night in prayer (Luke vi. 12, xxi. 37, xxii. 39; Matt. xiv. 23, 24). The apostles were asleep, and are described as *having kept themselves awake through the act of Transfiguration* (διαγρηγορήσαντες, Luke ix. 32), and they did not descend till the next day (Luke ix. 37).

3. The *actors* and *witnesses*. Christ was the central figure, the subject of the Transfiguration Moses and Elijah appeared from the heavenly world, as the representatives of the Old Testament, the one of the Law, the other of Prophecy, to do homage to Him who was the fulfillment of both. They were the fittest persons to witness this anticipation of the heavenly glory, not only on account of their representative character, but also on account of their mysterious departure from this world; Moses having died on the mountain, as the rabbinical tradition has it, "of the kisses of Jehovah," in sight of the Holy Land, and out of sight of the world; Elijah having been translated alive from earth to heaven on chariots of fire. Both had endured, like Christ, a forty days' fast, both had been on the holy mount in the visions of God, and now they reappeared on earth with glorified bodies "solemnly to consign into his hands, once and for all, in a symbolical and glorious representation, their delegated and expiring power" (Alford). The recognition of the heavenly visitors by the disciples was probably by immediate intuition, and not by subsequent information.

Among the apostles, the three favorite disciples, Peter, James, and John were the sole witnesses of the scene, as they were also of the raising of Jairus' daughter and of the agony in Gethsemane. Peter alludes to the event, in his second epistle (i. 16–18), where he speaks of having been an eye-witness of the majesty of the Lord Jesus when he was with Him on the holy mount and heard the heavenly voice of the Father declaring Him to be his beloved Son. John, the bosom friend of Jesus, probably had in view this among other manifestations of his glory when he testified: "We beheld his glory, the glory as of the only begotten of the Father full of grace and truth" (John i. 14). And his brother James, as the protomartyr among the apostles, was the first to follow Him into that glory, of which the Transfiguration was a foretaste and a sure pledge.

4. The *event* itself. The *Transfiguration* or

Digitized by Google

*transformation*, or, as the German divines call it, the *glorification* (*Verklärung*) consisted in a visible manifestation and effulgence of the inner glory of Christ's person, accompanied by an audible voice from heaven declaring Him to be the Son of God in whom the Father is well pleased. The expression used by Matthew and Mark, is that the Lord was *metamorphosed* (μετεμορφώθη). Luke, who wrote for Gentile readers, avoids this expression, perhaps (as Trench suggests), on account of the possible associations of the heathen mythology which would so easily attach themselves to it in the imagination of the Greeks, and he simply tells us "that the fashion of his countenance was altered as He prayed" (ἐγένετο τὸ εἶδος τοῦ προσώπου αὐτοῦ ἕτερον). But it was not only his countenance which shone in supernatural splendor, even "his raiment was white and glistering," or as Mark, with his characteristic fondness for picturesque details, and borrowing one image from nature, and another from man's art, says, it "became shining, exceeding white as snow, such as no fuller on earth can whiten them." We have analogies in Scripture which may be used as illustrations. When Moses returned from the presence of Jehovah on Mount Sinai, the skin of his face shone (Ex. xxxiv. 29–35), which circumstance Hilary calls a figure of the Transfiguration. Stephen's face in view of his martyrdom shone like the face of an angel (Acts vi. 15). The human countenance is often lit up by joy, and the peace and blessedness of the soul, in moments of festive elevation, shine through it as through a mirror. In the case of Christ, the Transfiguration was the revelation and anticipation of his future state of glory which was concealed under the veil of his humanity in the state of humiliation. The cloud which overshadowed them was bright, or light-like, luminous (φωτεινή), of the same kind as the cloud at the ascension, or the clouds of heaven at the second advent of Christ (Matt. xxiv. 30; Mark xiii. 26; Luke xxi. 27), and symbolized the presence of God (Ex. xiv. 19, xix. 16; Is. xix. 1; Dan. vii. 13).

5. *Different Explanations.* — The event is described as a vision (ὅραμα, Matt. xvii. 9). But this does not exclude its objective reality. It only places it above the sphere of sense and ordinary consciousness. It was partly an objective appearance, partly a spiritual vision. The apostles saw the scene "in spirit" (comp. Acts x. 10; 1 Cor. xiv. 15; Rev. i. 10). They were in an ecstatic "state of supernatural clairvoyance," so to speak, "heavy with sleep," yet "keeping themselves awake throughout;" and Peter did "not know what he said," being only half-conscious, overawed with fear and wonder, delighted so as to desire to hold fast this goodly state, yet "sore afraid." (*a.*) The older orthodox writers describe it as a visible manifestation; some suppose that Moses and Elijah appeared in their own bodies; others that Moses, not yet having risen, assumed a foreign body resembling his former body (so Thomas Aquinas). (*b.*) The rationalists resolve the transfiguration into a dream, or a meeting of Jesus with two secret disciples. (*c.*) Strauss represents it as a pure myth, a poetic imitation of the transfiguration of Moses, Ex. xxiv. 1, xxxiv. 29 ff. (Renan, in his *Vie de Jésus*, ignores the Transfiguration.) (*d.*) Ewald regards it as a rare occurrence, but with mythical embellishments. But the circumstantial agreement of the three Evangelists who narrate the event, its definite chronological date, its connection with what follows, and the reference to it by Peter, one of its witnesses (2 Pet. i. 16–18), as well as the many peculiar traits to which no parallel can be found in the transfiguration of Moses, refute the mythical hypothesis, and confirm the historical character of the scene.

6. The *significance* of the Transfiguration. It was, as already remarked, a visible revelation of the hidden glory of the person of Christ in anticipation of his future state of exaltation, and at the same time a prophecy of the future glory of his people after the resurrection, when our mortal bodies shall be conformed to his glorious body (Phil. iii. 21).[2] It served as a solemn inauguration of the history of the passion and final consummation of his work on earth. For, according to Luke's account, the ἔξοδος, the *excessus* of Christ, *i. e.* especially his death, the great mystery of the atonement for the sins of the world, and the following resurrection and return to the Father, was the topic of conversation between the two visitors from the other world and Jesus. The event bears a relation to the history of Christ's suffering, like that of his baptism in the river Jordan to his active ministry. On both occasions he was brought into contact with representatives of the Old Testament, and strengthened for his course by the solemn approval of the voice from heaven declaring him to be the well-beloved Son of the Father. The Transfiguration no doubt confirmed the faith of the three favorite disciples, and prepared them for the great trial which was approaching. It took away from them, as Leo the Great says (*Serm.* xciv.), the scandal of the cross. It furnishes also, to us all, a striking proof for the unity of the Old and New Testaments, for personal immortality, and the mysterious intercommunion of the visible and invisible worlds. Both meet in Jesus Christ; he is the connecting link between the O. and N T., between heaven and earth, between the kingdom of grace and the kingdom of glory. It is very significant that, at the end of the scene, the disciples saw no man save Jesus alone. Moses and Elijah, the law and the promise, types and shadows pass away; the gospel, the fulfillment, the substance, Christ remains, the only one who can relieve the misery of earth and glorify our nature, Christ all in all.

The Transfiguration has given rise to one of the greatest works of art ever conceived by the genius of man, which is the best comment on this supernatural event. The picture under that name was the last work of Raphael, and was carried to his grave at his burial. He died of the Transfiguration in his early manhood. The original is in St. Peter's at Rome, and has been multiplied in innumerable copies. It represents Christ soaring above the earth and swimming in glory, Moses with the tables of the Law on one hand, Elijah on the other, the three disciples with their characteristic features at their feet, gazing in a half-dreamy state at the dazzling light; and beneath this scene of celestial peace, the painter represents in startling contrast the scene of the lunatic whose healing follows in the gospel narrative. So in our Christian experience we must ever descend from the heights of festive joy, and the foretaste of heaven which is granted us from time to time, to the hard work and misery of daily life, until we attain to final rest and to that

[2] Gregory I. (*Moral.* xxxii. 6): "In transfiguratione quid aliud quam resurrectionis ultima gloria nunciatur"

glory of the resurrection of which the Transfiguration is a sure pledge.

*Literature.*—Comp the Commentaries on Matt. xvii. 1–13, and the parallel passages, especially Lange, and an article on the Transfiguration in Archbishop Trench's *Studies in the Gospels*, 1867. The Transfiguration is the subject of three of Bishop Hall's *Contemplations*, bk. iv. 12, 13, 14. P. S.

* TRAP. [HUNTING.]

* TREASURE-CITIES. [STORE-CITIES, Amer. ed.]

* TREASURY. In Mark xii. 41 (comp. Luke xxi. 1) it is related that, as Jesus "sat over against the *treasury*" (κατέναντι τοῦ γαζοφυλακίου) he saw a certain poor widow who came and threw in two mites; and in John viii. 20 we read, "These words spake Jesus in the *treasury* (ἐν τῷ γαζοφυλακίῳ) as he taught in the Temple." According to the Mishna (*Shekalim*, vi. 1 § 5) there were in the Temple 13 treasure-chests for the reception of gifts of money to be devoted to so many special purposes, designated by the inscriptions upon them. These were called "trumpets" (שׁוֹפָרוֹת) either from their shape or from the shape of the opening into which the contributions were dropped. They are generally identified with the γαζοφυλάκια mentioned by Josephus (*B. J.* v. 5, § 2), who speaks of the cloisters which surrounded the Court of the Women [TEMPLE, p. 3205 *b*], on the inside of its wall, as placed before them (*αἱ στοαὶ δὲ μεταξὺ τῶν πυλῶν ἀπὸ τοῦ τείχους ἔνδον ἐστραμμέναι πρὸ τῶν γαζοφυλακίων*), and they may perhaps have been collectively called "the treasury" in the passages of Mark and Luke above referred to. In John viii. 20 it would seem probable that the Court of the Women is itself called "the treasury" because it contained these repositories. Some, however (as Meyer, Ewald, Holtzmann, Grimm, *Lex.*), understand ἐν in this passage to mean simply *at, near*. Josephus uses γαζοφυλάκιον in the singular, in reference to a treasury in the Temple, *Ant.* xix. 6, § 1. The whole subject presents various questions which we cannot here discuss. See especially Lightfoot, *Prospect of the Temple*, ch. xix., and *Chorog. Decad*, ch. iii. §§ 1–4 (*Works*, Pitman's ed., ix. 313 ff., x. 208 ff.); Reland, *Antiq.* i. 8, §§ 14–16; Winer, *Realwörterb.* art. *Tempel*, ii. 583; Ebrard, *Wiss. Krit. d. ev. Gesch.* p. 600 f. (3te Aufl., 1868); with the notes of De Wette on Luke xxi. 1, and Lücke and Godet on John viii. 20. A.

* TREE, like *treow* in Anglo-Saxon, was often used in early English in the sense of "wood" in general, as "vessels of *tre*" (Chaucer), "cuppe of *tre*;" and also specifically to denote something made of wood, particularly a bar or beam, a meaning still preserved in the compounds *axle-tree*, *cross-tree*, *whipple-tree*. It has the latter meaning, with a special application, in several passages of the A. V., *e. g.* Acts v. 30, "whom ye slew and hanged on a *tree*," rather, "whom ye slew by hanging him on a cross," literally, "on a beam of wood" (ἐπὶ ξύλου); so Acts x. 39, xiii. 29; Gal. iii. 13. (See Dr. Noyes's note on Acts v. 30 in his *Translation of the N. T.*) In like manner the Genevan version reads, in reference to the proposed hanging of Mordecai, "Let them make a *tree* of fifty cubits high" (Esth. v. 14, comp. vi. 4, vii. 9, 10); and the cross in early English poetry is often called "Cristes tre" (Chaucer), "Godys tre," "the holy rode tre," or simply "the tree," as in the A. V., 1 Pet. ii. 24. Noah's ark is called in Wycliffe's version of Wisd. x. 4, "a dispisable *tree*," where the A. V. reads "a *piece of wood* of small value" (LXX. σταλὲς ξύλον). A.

TRESPASS-OFFERING. [SIN-OFFERING.]

TRIAL. Information on the subject of trials under the Jewish law will be found in the articles on JUDGES and SANHEDRIM, and also in JESUS CHRIST. A few remarks, however, may here be added on judicial proceedings mentioned in Scripture, especially such as were conducted before foreigners.

1. The trial of our Lord before Pilate was, in a legal sense, a trial for the offense *laesæ majestatis;* one which, under the Julian Law, following out that of the Twelve Tables, would be punishable with death (Luke xxiii. 2, 38; John xix. 12, 15; Dig. iv. 1, 3).

2. The trials of the Apostles, of St. Stephen, and of St. Paul before the high-priest, were conducted according to Jewish rules (Acts iv., v. 27, vi. 12, xxii. 30, xxiii. 1).

3. The trial, if it may be so called, of St. Paul and Silas at Philippi, was held before the duumviri, or, as they are called, στρατηγοί, prætors, on the charge of innovation in religion — a crime punishable with banishment or death (Acts xvi. 19, 22; *Dict. of Antiq.* "Colonia," p. 318; Conybeare and Howson, i. 345, 355, 356).

4. The interrupted trial of St. Paul before the proconsul Gallio, was an attempt made by the Jews to establish a charge of the same kind (Acts xviii. 12–17; Conybeare and Howson, i. 492–496).

5. The trials of St. Paul at Cæsarea (Acts xxiv., xxv., xxvi.) were conducted according to Roman rules of judicature, of which the procurators Felix and Festus were the recognized administrators. (*a.*) In the first of these, before Felix, we observe the employment, by the plaintiffs, of a Roman advocate to plead in Latin. [ORATOR.] (*b.*) The postponement (*amplius*) of the trial after St Paul's reply (*Dict. of Antiq.* "Judex," p. 647, (*c.*) The free custody in which the accused was kept, pending the decision of the judge (Acts xxiv. 23–26). The second formal trial, before Festus, was, probably, conducted in the same manner as the former one before Felix (Acts xxv. 7, 8), but it presents two new features: (*a.*) the appeal, *appellatio* or *provocatio*, to Cæsar, by St. Paul as a Roman citizen. The right of appeal *ad populum*, or to the tribunes, became, under the Empire, transferred to the emperor, and, as a citizen, St. Paul availed himself of the right to which he was entitled, even in the case of a provincial governor. The effect of the appeal was to remove the case at once to the jurisdiction of the emperor (Conybeare and Howson, ii. 360; *Dict. of Antiq.* "Appellatio," p. 107; Dig. xlix. 1, 4). (*b.*) The conference of the procurator with "the council" (Acts xxv. 12). This council is usually explained to have consisted of the assessors, who sat on the bench with the prætor as consiliarii (Suet. *Tib.* 33; *Dict. of Antiq.* "Assessor," p. 143; Grotius, *On Acts* xxv.; Conybeare and Howson, ii. 358, 361). But besides the absence of any previous mention of any assessors (see below), the mode of expression *συλλαλήσας μετὰ τοῦ συμβουλίου* seems to admit the explanation of conference with the deputies from the Sanhedrim (*τὸ συμβ.* St. Paul's appeal would probably be

Digitized by Google

in the Latin language, and would require explanation on the part of the judge to the deputation of accusers, before he carried into effect the inevitable result of the appeal, namely, the dismissal of the case so far as they were concerned. [APPEAL, Amer. ed.]

6. We have, lastly, the mention (Acts xix. 38) of a judicial assembly which held its session at Ephesus, in which occur the terms ἀγοραῖοι (*i. e.* ἡμέραι) ἄγονται, and ἀνθύπατοι. The former denotes the assembly, then sitting, of provincial citizens forming the conventus, out of which the proconsul, ἀνθύπατος, selected "judices" to sit as his assessors. The ἀνθύπατοι would thus be the judicial tribunal composed of the proconsul and his assessors. In the former case, at Cæsarea, it is difficult to imagine that there could be any conventus and any provincial assessors. There the only class of men qualified for such a function would be the Roman officials attached to the procurator; but in Proconsular Asia such assemblies are well known to have existed (*Dict. of Antiq.* "Provincia," pp. 965, 966, 967).

Early Christian practice discouraged resort to heathen tribunals in civil matters (1 Cor. vi. 1).

H. W. P.

**TRIBUTE** (τὰ δίδραχμα: *didrachma*, Matt. xvii. 24; κῆνσος: *census*, ibid. 25).

1. The chief Biblical facts connected with the payment of tribute have been already given under TAXES. A few remain to be added in connection with the word which in the above passage is thus rendered, inaccurately enough, in the A. V. The payment of the half-shekel (= half-*stater* = two drachmæ) was (as has been said) [TAXES], though resting on an ancient precedent (Ex. xxx. 13), yet, in its character as a fixed annual rate, of late origin. It was proclaimed according to Rabbinic rules on the first of Adar, began to be collected on the 15th, and was due, at latest, on the first of Nisan (Mishna, *Shekalim*, i. f. 7; Surenhusius, pp. 260, 261). It was applied to defray the general expenses of the Temple, the morning and evening sacrifice, the incense, wood, shew-bread, the red heifers, the scape-goat, etc. (*Shekal. l. c.* in Lightfoot, *Hor. Heb.* on Matt. xvii. 24). After the destruction of the Temple it was sequestrated by Vespasian and his successors, and transferred to the Temple of the Capitoline Jupiter (Joseph. *B. J.* vii. 6, § 6).

2. The explanation thus given of the "tribute" of Matt. xvii. 24, is beyond all doubt the true one. To suppose with Chrysostom, Augustine, Maldonatus, and others, that it was the same as the tribute (κῆνσος) paid to the Roman emperor (Matt. xxii. 17), is at variance with the distinct statements of Josephus and the Mishna, and takes away the whole significance of our Lord's words. It may be questioned, however, whether the full significance of those words is adequately brought out in the popular interpretation of them. As explained by most commentators, they are simply an assertion by our Lord of his Divine Sonship, an implied rebuke of Peter for forgetting the truth which he had so recently confessed (comp. Wordsworth, Alford, and others): "Then are the children (υἱοί) free;" Thou hast owned me as the Son of the Living God, the Son of the Great King, of the Lord of the Temple, in whose honor men pay the Temple-tribute; why, forgetting this, dost thou so hastily make answer as if I were an alien and a stranger? True as this exegesis is in part, it fails to account for some striking facts. (1.) The plural not the singular is used — "then are the *children* free." The words imply a class of "sons" as contrasted with a class of aliens. (2.) The words of our Lord here must be interpreted by his language elsewhere. The "sons of the kingdom" are, as in the Hebrew speech of the O. T., those who belong to it, in the apostolic language "heirs of the kingdom" (Matt. viii. 12, xiii. 38; Jam. ii. 5; Rom. viii. 17), "sons of God," "children of their Father in heaven." (3.) The words that follow, "Give unto them for me *and thee*," place the disciple as standing, at least in some degree, on the same ground as his Master. The principle involved in the words "then are the children free" extends to him also. Payment is made for both, not on different, but on the same grounds.

3. A fuller knowledge of the facts of the case may help us to escape out of the trite routine of commentators, and to rise to the higher and broader truth implied in our Lord's teaching. The Temple-rate, as above stated, was of comparatively late origin. The question whether the costs of the morning and evening sacrifice ought to be defrayed by such a fixed compulsory payment, or left to the free-will offerings of the people, had been a contested point between the Pharisees and Sadducees, and the former had carried the day after a long struggle and debate, lasting from the 1st to the 8th day of Nisan. So great was the triumph in the eyes of the whole party, that they kept the anniversary as a kind of half festival. The Temple-rate question was to them what the Church-rate question has been to later Conservatives (Jost, *Geschichte des Judenthums*, i. 218). We have to remember this when we come to the narrative of St. Matthew. In a hundred different ways, on the questions of the Sabbath, of fasting, of unwashed hands and the like, the teaching of our Lord had been in direct antagonism to that of the Pharisees. The collectors of the rate, probably, from the nature of their functions, adherents of the Pharisee party, now come, half-expecting opposition on this point also. Their words imply that he had not as yet paid the rate for the current year. His life of constant wandering, without a home, might seem like an evasion of it. They ask tauntingly, "Will he side, on this point, with their Sadducee opponents and refuse to pay it altogether?" The answer of Peter is that of a man who looks on the payment as most other Jews looked on it. With no thought of any higher principle, of any deeper truth, he answers at once, "His Master will of course pay what no other religious Israelite would refuse." The words of his Lord led him to the truth of which the Pharisees were losing sight. The offerings of the children of the kingdom should be free, and not compulsory. The Sanhedrim, by making the Temple-offering a fixed annual tax, collecting it as men collected tribute to Cæsar, were lowering, not raising the religious condition and character of the people. They were placing every Israelite on the footing of a "stranger," not on that of a "son." The true principle for all such offerings was that which St. Paul afterwards asserted, following in his Master's footsteps, "not grudgingly or of necessity, for God loveth a cheerful giver." In proportion to the degree in which any man could claim the title of a Son of God, in that proportion was he "free" from this forced exaction. Peter, therefore, ought to have remembered that here at least, was one who, by his own con-

Digitized by Google

cession as the Son of the Living God, was *ipso facto* exempted.

4. The interpretation which has now been given leads us to see, in these words, a precept as wide and far-reaching as the yet more memorable one, "Render unto Cæsar the things that be Cæsar's, and unto God the things that be God's." They condemn, instead of sanctioning, the compulsory payments which human policy has so often substituted for the "cheerful gifts" which alone God loves. But the words which follow condemn also the perversity which leads men to a spurious martyrdom in resisting such payments. "Lest we should offend them . . . . give unto them for me and thee." It is better to comply with the payment than to startle the weak brethren, or run counter to feelings that deserve respect, or lay an undue stress on a matter of little moment. In such quarrels, paradoxical as it may seem, both parties are equally in the wrong. If the quarrel is to find a solution, it must be by a mutual acknowledgment that both have been mistaken.

5. It is satisfactory to find that some interpreters at least, have drawn near to the true meaning of one of the most characteristic and pregnant sayings in the whole cycle of our Lord's teaching. Augustine (*Quæstiones Evangel.* lxxv.), though missing the main point, saw that what was true of the Lord and of Peter was true of all ("Salvator autem, cum pro se et Petro dari jubet, pro omnibus exsolvisse videtur"). Jerome (*ad loc.*) sees in the words a principle extending in some form or other to all believers ("Nos pro illius honore tributa non reddimus, et *quasi filii Regis* a vectigalibus immunes sumus"), though his words claim an exemption which, if true at times of the Christian clergy, has never been extended to the body of Christian laity. Calvin, though adhering to the common explanation, is apparently determined chiefly by his dislike of the inferences drawn from the other explanation by Papists on the one side, and Anabaptists on the other, as claiming an exemption from obedience in matters of taxation to the civil magistrate. Luther (*Annot. in Matt.* xvii.) more boldly, while dwelling chiefly on the friendly pleasantry which the story represents as passing between the Master and the disciple,[a] seizes, with his usual acuteness, the true point. "Qui fit (this is his paraphrase of the words of Christ) mi Petre, ut a te petant, cum sis Regis filius. . . . . Vade et scito *nos esse in alio regno reges et filios regis.* Sinito illis suum regnum, in quo sumus hospites. . . . . *Filii regni sumus*, sed non hujus regni mundani." Tindal (*Marg. Note* on Matt. xvii. 26) in like manner, extends the principle, "So is a Christian man free in all things . . . . yet payeth he tribute, and submitteth himself to all men for his brother's sake." E. H. P.

**TRIBUTE-MONEY.** [TAXES; TRIBUTE.]

**TRIP'OLIS** (ἡ Τρίπολις). The Greek name of a city of great commercial importance, which served at one time as a point of federal union for Aradus, Sidon, and Tyre. What its Phœnician name was is unknown; but it seems not impossible that it was Kadytis, and that this was really the place captured by Neco of which Herodotus speaks (ii. 159, iii. 5). Kadytis is the Greek form of the Syrian *Kedutha*, "the holy," a name of which a relic still seems to survive in the *Nahr-Kadish*, a river which runs through *Tarablous*, the modern representative of Tripolis. All ancient federations had for their place of meeting some spot consecrated to a common deity, and just to the south of Tripolis was a promontory which went by the name of Θεοῦ πρόσωπον. [PENIEL, iii. 2407 *b.*]

It was at Tripolis that, in the year 351 B. C., the plan was concocted for the simultaneous revolt of the Phœnician cities and the Persian dependencies in Cyprus against the Persian king Ochus. Although aided by a league with Nectanebus king of Egypt, this attempt failed, and in the sequel great part of Sidon was burnt and the chief citizens destroyed. Perhaps the importance of Tripolis was increased by this misfortune of its neighbor, for soon after, when Alexander invaded Asia, it appears as a port of the first order. After the battle of Issus some of the Greek officers in Darius's service retreated thither, and not only found ships enough to carry themselves and 8,000 soldiers away, but a number over and above, which they burnt in order to preclude the victor from an immediate pursuit of them (Arrian, ii. 13). The destruction of Tyre by Alexander, like that of Sidon by Ochus, would naturally tend rather to increase than diminish the importance of Tripolis as a commercial port. When Demetrius Soter, the son of Seleucus, succeeded in wresting Syria from the young son of Antiochus (B. C. 161), he landed there, and made the place the base of his operations. It is this circumstance to which allusion is made in the only passage in which Tripolis is mentioned in the Bible (2 Macc. xiv. 1). The prosperity of the city, so far as appears, continued down to the middle of the 6th century of the Christian era. Dionysius Periegetes applies to it the epithet λιπαρήν in the 3d century. In the Peutinger Table (which probably was compiled in the reign of the Emperor Theodosius) it appears on the great road along the coast of Phœnicia; and at Orthosia (the next station to it northwards) the roads which led respectively into Mesopotamia and Cilicia branched off from one another. The possession of a good harbor in so important a point for land-traffic, doubtless combined with the richness of the neighboring mountains in determining the original choice of the site, which seems to have been a factory for the purposes of trade established by the three great Phœnician cities. Each of these held a portion of Tripolis surrounded by a fortified wall, like the western nations at the Chinese ports But in A. D. 543 it was laid in ruins by the terrible earthquake which happened in the month of July of that year, and overthrew Tyre, Sidon, Berytus, and Byblus as well. On this occasion the appearance of the coast was much altered. A large portion of the promontory Theuprosopon (which in the Christian times had its name, from motives of piety, changed to Ithoprosopon) fell into the sea, and, by the natural breakwater it constituted, created a new port, able to contain a considerable number of large vessels. The ancient Tripolis was finally destroyed by the Sultan El Mansour in the year 1289 A. D.; and the modern *Tarablous* is situated a couple of miles distant to the east, and is no longer a port. *El-Myna*, which is perhaps on the site of the ancient Tripolis, is a small fishing village. Tarablous contains a population of 15,000 or 16,000 inhabitants, and is the centre of one of the four pashalics of Syria. It exports silk.

[a] "Es muss ja ein fein, freundlich lieblich Gesellschaft sein gewest *inter Christum et discipulos suos.*"

tobacco, galls, and oil, grown in the lower parts of the mountain at the foot of which it stands; and performs, on a smaller scale, the part which was formerly taken by Tripolis as the entrepôt for the productions of a most fertile region (Diod. Sic. xvi. 41; Strabo, xvi. c. 2; Vossius ad Melam, i. 12; Theophanes, *Chronographia, sub anno* 6043).

J. W. B.

**TRO'AS** (Τρωάς). The city from which St. Paul first sailed, in consequence of a Divine intimation, to carry the Gospel from Asia to Europe (Acts xvi. 8, 11) — where he rested for a short time on the northward road from Ephesus (during the next missionary journey), in the expectation of meeting Titus (2 Cor. ii. 12, 13) — where on the return southwards (during the same missionary journey) he met those who had preceded him from Philippi (Acts xx. 5, 6), and remained a week, the close of which (before the journey to Assos) was marked by the raising of Eutychus from the dead during the protracted midnight discourse — and where, after an interval of many years, the Apostle left (during a journey the details of which are unknown) a cloak and some books and parchments in the house of Carpus (2 Tim. iv. 13) — deserves the careful attention of the student of the New Testament.

The full name of the city was Alexandreia Troas (Liv. xxxv. 42), and sometimes it was called simply Alexandreia, as by Pliny (*H. N.* v. 33) and Strabo (xiii. p. 593), sometimes simply Troas (as in the N. T. and the *Ant. Itin.* See Wesseling, p. 334). The former part of the name indicates the period at which it was founded. It was first built by Antigonus, under the name of Antigoneia Troas, and peopled with the inhabitants of some neighboring cities. Afterwards it was embellished by Lysimachus, and named Alexandreia Troas. Its situation was on the coast of MYSIA, opposite the S. E. extremity of the island of Tenedos.

Under the Romans it was one of the most important towns of the province of ASIA. It was the chief point of arrival and departure for those who went by sea between Macedonia and the western Asiatic districts; and it was connected by good roads with other places on the coast and in the interior. For the latter see the map in Leake's *Asia Minor*. The former cannot be better illustrated than by St. Paul's two voyages between Troas and Philippi (Acts xvi. 11, 12, xx. 6), one of which was accomplished in two days, the other in five. At this time Alexandreia Troas was a *colonia* with the *Jus Italicum*. This strong Roman connection can be read on its coins. The Romans had a peculiar feeling connected with the place, in consequence of the legend of their origin from Troy. Suetonius tells us that Julius Cæsar had a plan of making Troas the seat of empire (*Cæs.* 79). It may perhaps be inferred from the words of Horace (*Carm.* iii. 3, 57) that Augustus had some such dreams. And even the modern name *Eski-Stamboul* (or "Old Constantinople") seems to commemorate the thought which was once in Constantine's mind (Zosim. ii. 30; Zonar. xiii. 3), who, to use Gibbon's words, "before he gave a just preference to the situation of Byzantium, had conceived the design of erecting the seat of empire on this celebrated spot, from which the Romans derived their fabulous origin."

The ruins at *Eski-Stamboul* are considerable. The most conspicuous, however, especially the remains of the aqueduct of Herodes Atticus, did not exist when St. Paul was there. The walls, which may represent the extent of the city in the Apostle's time, inclose a rectangular space, extending above a mile from east to west, and nearly a mile from north to south. That which possesses most interest for us is the harbor, which is still distinctly traceable in a basin about 400 feet long and 200 broad. Descriptions in greater or less detail are given by Pococke, Chandler, Hunt (in Walpole's *Memoirs*), Clarke, Prokesch, and Fellows.

J. S. H.

**TROGYLLIUM.** Samos [which see] is exactly opposite the rocky extremity of the ridge of Mycale, which is called Τραγύλλιον in the N. T. (Acts xx. 15) and by Ptolemy (v. 2), and Τραγύλιον by Strabo (xiv. p. 636). The channel is extremely narrow. Strabo (*l. c.*) makes it about a mile broad, and this is confirmed by our Admiralty Charts (1530 and 1555). St. Paul sailed through this channel on his way to Jerusalem at the close of his third missionary journey (Acts, *l. c.*). The navigation of this coast is intricate; and it can be gathered from Acts xx. 6, with subsequent notices of the days spent on the voyage, that it was the time of dark moon. Thus the night was spent at Trogyllium.[a] It is interesting to observe that a little to the east of the extreme point there is an anchorage, which is still called *St. Paul's Port.*

J. S. H.

**TROOP, BAND.** These words have a peculiar signification in many passages of the O. T., which is apt to be overlooked, and the knowledge of which throws a brighter light upon them. They are employed to represent the Hebrew word גְּדוּד, *gĕdûd*, which has invariably the force of an irregular body of people, large or small, united not for the purpose of defense or regular aggression, like an army, but with the object of marauding and plunder. (See MOAB, vol. iii. p. 1983, note, where the term *gĕdûd* is examined.) In addition to the instances of its use there named, it may be observed that our translators have in a few cases tried to bring out its meaning more strongly; as in 1 Chr. xii. 21, "band-of-the-rovers;" Hos. vi. 9, and vii. 1, "troop-of-robbers."

G.

**TROPHIMUS** (Τρόφιμος [*foster-child*]). Of the three passages where this companion of St. Paul is mentioned, the first associates him very closely with TYCHICUS (Acts xx. 4), and the last seems in some degree to renew the association, and in reference to the same geographical district (2 Tim. iv. 20; see ver. 12), while the intermediate one separates him entirely from this connection (Acts xxi. 29).

From the first of these passages we learn that Tychicus, like Trophimus, was a native of ASIA ('Ασιανοί), and that the two were among those companions who travelled with the Apostle in the course of the third missionary journey, and during part of the route which he took in returning from

[a] "An island called Trogyllium lay off the coast of the promontory of that name (Strabo, xiv. p. 636), and some think this to be meant in Acts xx. 6. (See Forbiger's *Handb. der alten Geographie*, ii. 170.) The Apostle would have been nearer to Ephesus at Trogyllium on the mainland than he was at Miletus. A better harbor, however, or greater facility of intercourse may have led him to prefer the more distant place for his interview with the Ephesian elders.

E

Macedonia toward Syria. From what we know concerning the collection which was going on at this time for the poor Christians in Judæa, we are disposed to connect these two men with the business of that contribution. This, as we shall see, suggests a probable connection of Trophimus with another circumstance.

Both he and Tychicus accompanied St. Paul from Macedonia as far as Asia (ἄχρι τῆς Ἀσίας *l. c.*), but Tychicus seems to have remained there while Trophimus proceeded with the Apostle to Jerusalem. There he was the innocent cause of the tumult in which St. Paul was apprehended, and from which the voyage to Rome ultimately resulted. Certain Jews from the district of Asia saw the two Christian missionaries together, and *supposed* that Paul had taken Trophimus into the Temple (Acts xxi. 27–29). From this passage we learn two new facts, namely, that Trophimus was a Gentile, and that he was a native, not simply of Asia, but of EPHESUS.

A considerable interval now elapses, during which we have no trace of either Tychicus or Trophimus; but in the last letter written by St. Paul, shortly before his martyrdom, from Rome, he mentions them both (Τυχικὸν ἀπέστειλα εἰς Ἔφεσον, 2 Tim. iv. 12; Τρόφιμον ἀπέλιπον ἐν Μιλήτῳ ἀσθενοῦντα, *ibid.* 20). From the last of the phrases we gather simply that the Apostle had no long time before been in the Levant, that Trophimus had been with him, and that he had been left in infirm health at Miletus. Of the further details we are ignorant; but this we may say here, that while there would be considerable difficulty in accommodating this passage to any part of the recorded narrative previous to the voyage to Rome,[a] all difficulty vanishes on the supposition of two imprisonments, and a journey in the Levant between them.

What was alluded to above as probable, is that Trophimus was one of the two brethren who, with TITUS, conveyed the second epistle to the Corinthians (2 Cor. viii. 16–24). The argument is so well stated by Professor Stanley, that we give it in his words: "Trophimus was, like Titus, one of the few Gentiles who accompanied the Apostle; an Ephesian, and therefore likely to have been sent by the Apostle from Ephesus with the first epistle, or to have accompanied him from Ephesus now; he was, as is implied of 'this brother,' 'whose praise was in all the churches,' well known; so well known that the Jews of Asia Minor at Jerusalem immediately recognized him; he was also especially connected with the Apostle on this very mission of the collection for the poor in Judæa. Thus far would appear from the description of him in Acts xxi. 29. From Acts xx. 4 it also appears that he was with St. Paul on his return from this very visit to Corinth" (Stanley's *Corinthians*, 2d edit. p. 492).

The story in the Greek Menology that Trophimus was one of the seventy disciples is evidently wrong: the legend that he was beheaded by Nero's orders is possibly true. J. S. H.

*TROUGHS. [FOUNTAIN; WELL.]

*TROW (Luke xvii. 9) belongs to the period of our English version, as synonymous with "think," "believe." It is from the A.-S. *tredwian*, to trust, altered of course to *trauen* in German. H.

*TRUCE-BREAKERS. The Greek so rendered (ἄσπονδοι) both in 2 Tim. iii. 3 and Rom. i. 31, means literally "without libations," and as libations accompanied truces or treaties, "without truces," *i. e.* making no truces, and hence *implacable*. R. D. C. R

TRUMPET. [CORNET.]

TRUMPETS, FEAST OF (יוֹם תְּרוּעָה, Num. xxix. 1: ἡμέρα σημασίας: *dies clangoris et tubarum*; זִכְרוֹן תְּרוּעָה, Lev. xxiii. 24: μνημόσυνον σαλπίγγων: *sabbatum memoriale clangentibus tubis*; in the Mishna רֹאשׁ הַשָּׁנָה, "the beginning of the year"), the feast of the new moon, which fell on the first of Tisri. It differed from the ordinary festivals of the new moon in several important particulars. It was one of the seven days of Holy Convocation. [FEASTS.] Instead of the mere blowing of the trumpets of the Temple at the time of the offering of the sacrifices, it was "a day of blowing of trumpets." In addition to the daily sacrifices and the eleven victims offered on the first of every month [NEW MOON], there were offered a young bullock, a ram, and seven lambs of the first year, with the accustomed meat-offerings, and a kid for a sin-offering (Num. xxix. 1–6). The regular monthly offering was thus repeated, with the exception of one young bullock.

It is said that both kinds of trumpet were blown in the Temple on this day, the straight trumpet (חֲצֹצְרָה) and the cornet (שׁוֹפָר and קֶרֶן), and that elsewhere any one, even a child, might blow a cornet (Reland, iv. 7, 2; Carpzov, p. 425; *Rosh Hash.* i. 2; JUBILEE, vol. ii. p. 1483, note *c*; CORNET). When the festival fell upon a Sabbath, the trumpets were blown in the Temple, but not out of it (*Rosh Hash.* iv. 1).

It has been conjectured that Ps. lxxxi., one of the songs of Asaph, was composed expressly for the Feast of Trumpets. The Psalm is used in the service for the day by the modern Jews. As the third verse is rendered in the LXX., the Vulgate, and the A. V., this would seem highly probable, "Blow up the trumpet in the new moon, the time appointed, on our solemn feast day." But the best authorities understand the word translated *new moon* (כֶּסֶא) to mean *full moon*. Hence the psalm would more properly belong to the service for one of the festivals which take place at the full moon, the Passover, or the Feast of Tabernacles (Gesen. *Thes.* s. v.; Rosenmüller and Hengstenberg on Ps. lxxxi.).

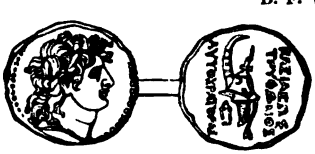
Various meanings have been assigned to the Feast of Trumpets. Maimonides considered that its purpose was to awaken the people from their spiritual slumber to prepare for the solemn humiliation of the Day of Atonement, which followed it within ten days. This may receive some countenance from Joel ii. 15, "Blow the trumpet (שׁוֹפָר) in Zion, sanctify a fast, call a solemn assembly."

[a] Trophimus was no doubt at Miletus on the occasion recorded in Acts xx. 15–38, but it is most certain that he was not left there. The theory also that he was left there on the voyage to Rome is preposterous; for the wind forced St. Paul's vessel to run direct from the S. W. corner of Asia Minor to the E. end of Crete (Acts xxvii. 7). We may add that when Trophimus was left in sickness at Miletus, whenever that might be, he was within easy reach of his home-friends a Ephesus, as we see from Acts xx. 17.

Digitized by Google

Some have supposed that it was intended to introduce the seventh or Sabbatical month of the year, which was especially holy because it was the seventh, and because it contained the Day of Atonement and the Feast of Tabernacles (Fagius *in Lev.* xxiii. 24; Buxt. *Syn. Jud.* c. xxiv.). Philo and some early Christian writers regarded it as a memorial of the giving of the Law on Sinai (Philo, vol. v. p. 46, ed. Tauch.; Basil, *in Ps.* lxxi.; Theod. *Quæst. xxxii. in Lev.*). But there seems to be no sufficient reason to call in question the common opinion of Jews and Christians, that it was the festival of the New Year's Day of the civil year, the First of Tisri, the month which commenced the Sabbatical year and the year of Jubilee. [JUBILEE, ii. 1485 *b.*] If the New Moon Festival was taken as the consecration of a natural division of time, the month in which the earth yielded the last ripe produce of the season, and began again to foster seed for the supply of the future, might well be regarded as the first month of the year. The fact that Tisri was the great month for sowing might thus easily have suggested the thought of commemorating on this day the finished work of Creation, when the sons of God shouted for joy (Job xxxviii. 7). The Feast of Trumpets thus came to be regarded as the anniversary of the birthday of the world (Mishna, *Rosh Hash.* i. 1; Hupfeld, *De Fest. Heb.* ii. 13; Buxt. *Syn. Jud.* c. xxiv.).

It was an odd fancy of the Rabbis that on this day, every year, God judges all men, and that they pass before Him as a flock of sheep pass before a shepherd (*Rosh Hash.* i. 2). S. C.



**TRYPHE'NA and TRYPHO'SA** (Τρύφαινα καὶ Τρυφῶσα [*luxurious*: Vulg. *Tryphæna* and *Tryphosa*]). Two Christian women at Rome, who, among those that are enumerated in the conclusion of St. Paul's letter to that city, receive a special salutation, and on the special ground that they are engaged there in "laboring in the Lord" (Rom. xvi. 12). They may have been sisters, but it is more likely that they were fellow-deaconesses, and among the predecessors of that large number of official women who ministered in the Church of Rome at a later period (Euseb. *Hist. Eccl.* vi. 43); for it is to be observed that they are spoken of as at that time occupied in Christian service (τὰς κοπιώσας), while the salutation to Persis, in the same verse, is connected with past service (ἥτις ἐκοπίασεν).

We know nothing more of these two sister-workers of the apostolic time; but the name of one of them occurs curiously, with other names familiar to us in St. Paul's Epistles, in the apocryphal *Acts of Paul and Thecla*. There Tryphena appears as a rich Christian widow of Antioch, who gives Thecla a refuge in her house, and sends money to Paul for the relief of the poor. (See Jones, *On the Canon*, ii. 371, 380.) It is impossible to discern any trace of probability in this part of the legend.

It is an interesting fact that the columbaria of "Cæsar's household" in the *Vigna Codini*, near *Porta S. Sebastiano*, contain the name Tryphena, as well as other names mentioned in this chapter, Philologus and Julia (ver. 15), and also Amplias (ver. 8). Wordsworth's *Tour in Italy* (1862), ii. 173. J. S. H.

**TRYPHON** (Τρύφων [*luxurious*]). A usurper of the Syrian throne. His proper name was Diodotus (Strab. xvi. 2, 10; App. *Syr.* c. 68), and the surname Tryphon was given to him, or, according to Appian, adopted by him, after his accession to power. He was a native of Cariana, a fortified place in the district of Apamea, where he was brought up (Strab. *l. c.*). In the time of Alexander Balas he was attached to the court (App. *l. c.* δοῦλος τῶν βασιλέων: Diod. *fr.* xxi. ap. Müll. *Hist. Gr. fragm.* ii. 17, στρατηγός; 1 Macc. xi. 39, τῶν παρὰ Ἀλεξ.); but towards the close of his reign he seems to have joined in the conspiracy which was set on foot to transfer the crown of Syria to Ptol. Philometor (1 Macc. xi. 13; Diod. *l. c.*). After the death of Alexander Balas he took advantage of the unpopularity of Demetrius II. to put forward the claims of Antiochus VI., the young son of Alexander (1 Macc. xi. 39; B. C. 145). After a time he obtained the support of Jonathan, who had been alienated from Demetrius by his ingratitude, and the young king was crowned (B. C. 144). Tryphon, however, soon revealed his real designs on the kingdom, and, fearing the opposition of Jonathan, he gained possession of his person by treachery (1 Macc. xii. 39–50), and after a short time put him to death (1 Macc. xiii. 23). As the way seemed now clear, he murdered Antiochus and seized the supreme power (1 Macc. xiii. 31, 32), which he exercised, as far as he was able, with violence and rapacity (1 Macc. xiii. 34). His tyranny again encouraged the hopes of Demetrius, who was engaged in preparing an expedition against him (B. C. 141), when he was taken prisoner (1 Macc. xiv. 1–3), and Tryphon retained the throne (Just. xxxvi. 1; Diod. *Leg.* xxxi.) till Antiochus VII., the brother of Demetrius, drove him to Dora, from which he escaped to Orthosia in Phœnicia (1 Macc. xv. 10–14, 37–39; B. C. 139). Not long afterwards, being hard pressed by Antiochus, he committed suicide, or, according to other accounts, was put to death by Antiochus (Strab. xiv. 5, 2; App. *Syr.* c. 68, Ἀντίοχος — κτείνει . . . . σὺν πόνῳ πολλῷ). Josephus (*Ant.* xiii. 7, § 2) adds that he was killed at Apamea, the place which he made his headquarters (Strab. xvi. 2, 10). The authority of Tryphon was evidently very partial, as appears from the growth of Jewish independence under Simon Maccabæus; and Strabo describes him as one of the chief authors of Cilician piracy (xiv. 3, 2). His name occurs on the coins of ANTIOCHUS VI. [vol. i. p. 118], and he also struck coins in his own name. [ANTIOCHUS; DEMETRIUS.]

B. F. W.

Coin of Tryphon.

**TRYPHO'SA.** [TRYPHENA and TRYPHOSA.]

**TSEBA'OTH, LORD OF,** is a more exact orthography than SABAOTH, adopted in Rom. ix. 29 and Jas. v. 4 from the Greek (σαβαώθ), the form under which this title of Jehovah has been already noticed in this *Dictionary*. We recall the subject here for the purpose of qualifying the explanation given under the other head. It is said there to be applied to Jehovah simply as "the leader and commander of the armies of the nation who 'went forth with them' (Ps. xliv. 9), and led them to certain victory over the worshippers" of

the gods. It is undeniable that *tsebaoth* often denotes the national armies of Israel, and may sometimes in connection with Jehovah (Lord of hosts) designate this army as God's host, which He leads forth to victory against the enemies of his people (see 1 Sam. xvii. 45). But such an application by no means exhausts the meaning of the term. It is used also of the sun, and moon, and stars, which are called Jehovah's "host," because they, too, execute his will, and represent so impressively his majesty and power. Thus in Gen. ii. 1 it is said: "The heavens and the earth were finished, and all the *host* of them." In Deut. iv. 19 the Israelites are warned against idolatry: "Lest thou lift up thine eyes unto heaven, and when thou seest the sun, and the moon, and the stars, all the host of heaven," thou "shouldest be driven to serve them," etc. (see also xvii. 3). In various other passages (2 K. xvii. 16, xxi. 3; 2 Chr. xxxiii. 3, 5; Jer. xix. 13) the Chaldæan worship of the stars is described as that of bowing down or offering incense to "the *host* of heaven." It is not surprising, therefore, that we should find the same term applied to the heavenly inhabitants, angels, seraphim, and other superhuman orders that surround the throne of God, and are sent forth to do his pleasure in heaven and on earth. Thus in 1 K. xxii. 19 the prophet Micaiah says: "Hear thou therefore the word of the Lord: I saw the Lord (Jehovah) sitting on his throne, and all the host of heaven standing by him;" and ver. 21: "And there came forth a spirit (one of the host), and stood before the Lord and said," etc. That Jehovah is styled "the Lord of hosts" with reference to his supremacy as the sovereign of myriads of angels as well as of men, is evident from the parallelism of various passages. Thus in Ps. ciii. 20, 21: "Bless Jehovah, ye his *angels*, that excel in strength. Bless Jehovah, all ye his hosts; ye ministers of his, that do his pleasure." Assuredly the armies of Israel cannot be intended here, or the stars which appear on the face of the heavens. So in Ps. cxlviii. 2: "Praise ye him, all his *angels*; praise ye him, all his *hosts*." As to the existence of such orders of superhuman beings, the angelology of the O. T. agrees precisely with that of the N. T. (see Luke ii. 13; Matt. xxvi. 53; Rev. xix. 14). [ANGELS.]

It is said under SABAOTH that the name is found in the English Bible only in Rom. ix. 29 and James v. 4. It is found in those passages because the Greek is Κύριος Σαβαώθ. It may be added that in the Sept. translation of 1 Samuel and Isaiah the expression is generally, "The Lord of Sabaoth;" while always in 2 Samuel, frequently in Jeremiah and throughout the Minor Prophets, it is *Pantokrator*, "the Almighty" or "all-ruling." In the Latin Vulgate "Sabaoth" appears in the O. T. only in Jer. xi. 20, while in the prophets the usual equivalent is *Dominus exercituum* and *Dominus* or *Deus virtutum* in the Psalms. In Rom. ix. 29 and James v. 4, the Vulgate follows the Greek text. (On this topic see Prof. Plumptre in *Sunday Magazine*, Dec. 1868; and Œhler in Herzog's *Real-Encykl.* viii. 400–404.) H.

**TUBAL** (תּוּבַל [see below]; תֻּבַל in Gen. x. 2; Ez. xxxii. 26, xxxix. 1: Θοβέλ, except in Is. xxxix. 1, where Alex. Θοβερ [and xxvii. 13, where Rom. ἡ σύμτασα, Alex. τα συμταγα]: *Thubal*, but in Is. lxvi. 19, *Itelici*). In the ancient ethnological tables of Genesis and 1 Chr. Tubal is reckoned with Javan and Meshech among the sons of Japheth (Gen. x. 2; 1 Chr. i. 5). The three are again associated in the enumeration of the sources of the wealth of Tyre; Javan, Tubal, and Meshech, brought slaves and copper vessels to the Phœnician markets (Ez. xxvii. 13). Tubal and Javan (Is. lxvi. 19), Meshech and Tubal (Ez. xxxii. 26, xxxviii. 2, 3, xxxix. 1), are nations of the north (Ez. xxxviii. 15, xxxix. 2) Josephus (*Ant.* i. 6, § 1) identifies the descendants of Tubal with the Iberians, that is — not, as Jerome would understand it, Spaniards, but — the inhabitants of a tract of country, between the Caspian and Euxine Seas, which nearly corresponded to the modern Georgia.[a] This approximates to the view of Bochart (*Phaleg*, iii. 12), who makes the Moschi and Tibareni represent Meshech and Tubal. These two Colchian tribes are mentioned together in Herodotus on two occasions; first, as forming part of the 19th satrapy of the Persian empire (iii. 94), and again as being in the army of Xerxes under the command of Ariomardus the son of Darius (vii. 78). The Moschi and Tibareni, moreover, are "constantly associated, under the names of *Muskai* and *Tupkai*, in the Assyrian inscriptions" (Sir H. Rawlinson in Rawlinson's *Her.* i. 535). The Tibareni are said by the Scholiast on Apollonius Rhodius (ii. 1010) to have been a Scythian tribe, and they as well as the Moschi are probably to be referred to that Turanian people, who in very early times spread themselves over the entire region between the Mediterranean and India, the Persian Gulf and the Caucasus (Rawlinson, *Her.* i. 535). In the time of Sargon, according to the inscriptions, Ambris, the son of Khuliya, was hereditary chief of Tubal (the southern slopes of Taurus). He "had cultivated relations with the kings of Musak and Vararat (Meshech and Ararat, or the Moschi and Armenia) who were in revolt against Assyria, and thus drew upon himself the hostility of the great king" (*ibid.* i. 169, note 3). In former times the Tibareni were probably more important, and the Moschi and Tibareni, Meshech and Tubal, may have been names by which powerful hordes of Scythians were known to the Hebrews. But in history we only hear of them as pushed to the furthest limits of their ancient settlements, and occupying merely a strip of coast along the Euxine. Their neighbors the Chaldeans were in the same condition. In the time of Herodotus the Moschi and Tibareni were even more closely connected than at a later period, for in Xenophon we find them separated by the Macrones and Mossynœci (*Anab.* v. 5, § 1; Plin. vi. 4, &c.). The limits of the territory of the Tibareni are extremely difficult to determine with any degree of accuracy. After a part of the 10,000 Greeks on their retreat with Xenophon had embarked at Cerasus (perhaps near the modern *Keraswun Dere Sú*), the rest marched along the coast, and soon came to the boundaries of the Mossynœci (*Anab.* v. 4, § 2). They traversed the country occupied by this people in eight days, and then came to the Chalybes, and after them to the Tibareni. The eastern limit of the Tibareni was therefore about 80 or 90 miles along the coast W. of Cerasus.

[a] Knobel connects these Iberians of the east and west, and considers the Tibareni to have been a branch of this widely-spread Turanian family, known to the Hebrews as Tubal (*Völker-Tafel d. Gen.* § 13).

Digitized by Google

Two days' march through Tibarene brought the Greeks to Cotyora (*Anab.* v. 5, § 3), and they were altogether three days in passing through the country (Diod. Sic. xiv. 30). Now from C. Jasonium to Boon, according to Arrian (*Peripl.* 16), the distance was 90 stadia, 90 more to Cotyora, and 60 from Cotyora to the river Melanthius, making in all a coast line of 240 stadia, or three days' march. Professor Rawlinson (*Her.* iv. 181) conjectures that the Tibareni occupied the coast between Cape *Yasoun* (Jasonium) and the River Melanthius (*Melet Irmak*), but if we follow Xenophon, we must place Boon as their western boundary, one day's march from Cotyora, and their eastern limit must be sought some 10 miles east of the *Melet Irmak*, perhaps not far from the modern *Aptar*, which is 3½ hours from that river. The anonymous author of the Periplus of the Euxine says (33) that the Tibareni formerly dwelt west of Cotyora as far as Polemonium, at the mouth of the *Pouleman chai*, 1½ miles east of *Fatsdh*.

In the time of Xenophon the Tibareni were an independent tribe (*Anab.* vii. 8, § 25). Long before this they were subject to a number of petty chiefs which was a principal element of their weakness, and rendered their subjugation by Assyria more easy. Dr. Hincks (quoted by Rawlinson, *Herod.* i. 380, note 1) has found as many as twenty-four kings of the *Tuplai* mentioned in the inscriptions. They are said by Apollonius Rhodius to have been rich in flocks (*Arg.* ii. 377). The traffic in slaves and vessels of copper with which the people of Tubal supplied the markets of Tyre (Ez. xxvii. 13) still further connects them with the Tibareni. It is well known that the regions bordering on the Pontus Euxinus furnished the most beautiful slaves, and that the slave traffic was an extensive branch of trade among the Cappadocians (Polyb. iv. 38, § 4; Hor. *Ep.* i. 6, 39; Pers. *Sat.* vi. 77; Mart. *Ep.* vi. 77, x. 76, &c.). The copper of the Mossynœci, the neighbors of the Tibareni, was celebrated as being extremely bright, and without any admixture of tin (Arist. *De Mir. Auscult.* p. 62); and the Chalybes, who lived between these tribes, were long famous for their craft as metal-smiths. We must not forget, too, the copper-mines of Chalvar in Armenia (Hamilton, *As. Min.* i. 173).

The Arabic Version of Gen. x. 2 gives Chorasan and China for Meshech and Tubal; in Eusebius (see Bochart) they are Illyria and Thessaly. The Talmudists (*Yoma*, fol. 10, 2), according to Bochart, define Tubal as "the home of the *Uniaci* (אוניייקי)," whom he is inclined to identify with the Huns (*Phaleg*, iii. 12). They may perhaps take their name from Oenoe, the modern *Unieh*, a town on the south coast of the Black Sea, not far from Cape Yasoun (Jasonium), and so in the immediate neighborhood of the Tibareni. In the Targum of R. Joseph on 1 Chr. (ed. Wilkins) תיתיניא is given as the equivalent of Tubal, and Wilkins renders it by Bithynia. But the reading in this passage, as well as in the Targums of Jerusalem and of Jonathan on Gen. x., is too doubtful to be followed as even a traditional authority.

W. A. W.

**TUBAL-CAIN** (תּוּבַל קַיִן [see below]: Θόβελ: *Tubal-cain*). The son of Lamech the Cainite by his wife Zillah (Gen. iv. 22). He is called "a furbisher of every cutting instrument of copper and iron." The Jewish legend of later times associates him with his father's song. "Lamech was blind," says the story as told by Rashi, "and Tubal-Cain was leading him; and he saw Cain, and he appeared to him like a wild beast, so he told his father to draw his bow, and he slew him. And when he knew that it was Cain his ancestor he smote his hands together and struck his son between them. So he slew him, and his wives withdraw from him, and he conciliates them." In this story Tubal-Cain is the "young man" of the song. Rashi apparently considers the name of Tubal-Cain as an appellative, for he makes him director of the works of Cain for making weapons of war, and connects "Tubal" with יָתַבֵּל, *tabbél*, to season, and so to prepare skillfully. He appears moreover to have pointed it יְתֻבַּל, *tubél*, which seems to have been the reading of the LXX. and Josephus. According to the writer last mentioned (*Ant.* i. 2, § 2), Tubal-Cain was distinguished for his prodigious strength and his success in war.

The derivation of the name is extremely obscure. Hasse (*Entdeckungen*, ii. 37, quoted by Knobel on Gen. iv. 22) identifies Tubal-Cain with Vulcan; and Buttmann (*Mythol.* i. 164) not only compares these names, but adds to the comparison the Τελχῖνες of Rhodes, the first workers in copper and iron (Strabo, xiv. 654), and Dwalinn, the demon smith of the Scandinavian mythology. Gesenius proposed to consider it a hybrid word, compounded of the Pers. تُوبَل, *túpal*, iron slag, or scoria, and the Arab. قَيْن, *kain*, a smith; but this etymology is more than doubtful. The Scythian race TUBAL, who were coppersmiths (Ez. xxvii. 13), naturally suggest themselves in connection with Tubal-Cain.

W. A. W.

**TUBIE'NI** (Τουβιῆνοι; Alex. Τουβεινοι: *Tubianæi*). The "Jews called Tubieni" lived about Charax, 750 stadia from a strongly-fortified city called Caspis (2 Macc. xii. 17). They were doubtless the same who are elsewhere mentioned as living in the towns of Toubion (A. V. TOBIE), which again is probably the same with the TOB of the Old Testament.

G.

* **TUMULT**, Mark v. 38. [MOURNING.]

* **TURBANS.** [BONNETS.]

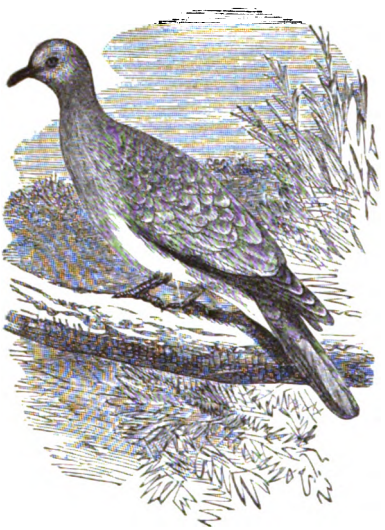
**TURPENTINE-TREE** (τερέμινθος, τερέβινθος: *terebinthus*) occurs only once, namely, in the Apocrypha (Ecclus. xxiv. 16), where wisdom is compared with the "turpentine-tree that stretcheth forth her branches." The τερέβινθος or τέρμινθος of the Greeks is the *Pistacia terebinthus*, terebinth-tree, common in Palestine and the East, supposed by some writers to represent the *élâh* (אֵלָה) of the Hebrew Bible. [OAK.] The terebinth, though not generally so conspicuous a tree in Palestine as some of the oaks, occasionally grows to a large size. See Robinson (*B. R.* ii. 292, 293), who thus speaks of it. "The Butm" (the Arabic name of the terebinth) "is not an evergreen, as often represented, but its small lance-shaped leaves fall in the autumn, and are renewed in the spring. The flowers are small, and followed by small oval berries hanging in clusters from two to five inches long resembling much those of the vine when the grapes are just set. From incisions in the trunk there is said to flow a sort of transparent balsam, constituting a very pure and fine species of turpentine

Digitized by Google

with an agreeable odor like citron or jessamine, and a mild taste, and hardening gradually into a transparent gum. In Palestine nothing seems to be known of this product of the butm!" The terebinth belongs to the Nat. Order *Anacardiaceæ*, the plants of which order generally contain resinous secretions. W. H.

*Pistacia terebinthus.*

**TURTLE, TURTLE-DOVE** (תּוֹר, *tôr*: τρυγών: *turtur*: generally in connection with יוֹנָה, *yônâh*, "dove"). [DOVE.] The name is phonetic, evidently derived from the plaintive cooing of the bird. The turtle-dove occurs first in Scripture in Gen. xv. 9, where Abram is commanded to offer it along with other sacrifices, and with a young pigeon (גּוֹזָל, *gôzâl*). In the Levitical law a pair of turtle-doves, or of young pigeons, are constantly prescribed as a substitute for those who were too poor to provide a lamb or a kid, and these birds were admissible either as trespass, sin, or burnt-offering. In one instance, the case of a Nazarite having been accidentally defiled by a dead body, a pair of turtle-doves or young pigeons were specially enjoined (Num. vi. 10). It was in accordance with the provision in Lev. xii. 6 that the mother of our Lord made the offering for her purification (Luke ii. 24). During the early period of Jewish history, there is no evidence of any other bird except the pigeon having been domesticated, and up to the time of Solomon, who may, with the peacock, have introduced other gallinaceous birds from India, it was probably the only poultry known to the Israelites. To this day enormous quantities of pigeons are kept in dove cots in all the towns and villages of Palestine, and several of the fancy races so familiar in this country have been traced to be of Syrian origin. The offering of two young pigeons must have been one easily within the reach of the poorest, and the offerer was accepted according to that he had, and not according to that he had not. The admission of a pair of turtle-doves was perhaps a yet further concession to extreme poverty for, unlike the pigeon, the turtle, from its migratory nature and timid disposition, has never yet been kept in a state of free domestication; but being extremely numerous, and resorting especially to gardens for nidification, its young might easily be found and captured by those who did not even possess pigeons.



It is not improbable that the palm-dove (*Turtur Ægyptiacus*, Temm.) may in some measure have supplied the sacrifices in the wilderness, for it is found in amazing numbers wherever the palm-tree occurs, whether wild or cultivated. In most of the oases of North Africa and Arabia every tree is the home of two or three pairs of these tame and elegant birds. In the crown of many of the date-trees five or six nests are placed together; and the writer has frequently, in a palm-grove, brought down ten brace or more without moving from his post. In such camps as Elim a considerable supply of these doves may have been obtained.

From its habit of pairing for life, and its fidelity for its mate, it was a symbol of purity and an appropriate offering (comp. Plin. *Nat. Hist.* x. 52) The regular migration of the turtle-dove and its return in spring are alluded to in Jer. viii. 7, "The turtle and the crane and the swallow observe the time of their coming;" and Cant. ii. 11, 12, "The winter is past . . . and the voice of the turtle is heard in our land." So Pliny, "Hyeme mutis, a vere vocalibus;" and Arist. *Hist. An.* ix. 8, "Turtle-doves spend the summer in cold countries, the winter in warm ones." Although elsewhere (viii. 5) he makes it hibernate (φωλεῖ). There is, indeed, no more grateful proof of the return of spring in Mediterranean countries than the voice of the turtle. One of the first birds to migrate northwards, the turtle, while other songsters are heard chiefly in the morning, or only at intervals, immediately on its arrival pours forth from every garden, grove, and wooded hill its melancholy yet soothing ditty, unceasingly from early dawn till sunset. It is from its plaintive note doubtless that David in Ps. lxxiv. 19, pouring forth his lament to God, compares himself to a turtle-dove.

From the abundance of the dove tribe and their importance as an article of food, the ancients discriminated the species of *Columbidæ* more accurately than of many others. Aristotle enumerates five species, which are not all easy of identification, as but four species are now known *commonly* to inhabit Greece. In Palestine the number of species is probably greater. Besides the rock-dove (*Columba livia*, L.), very common on all the rocky parts of the coast and in the inland ravines, where it remains throughout the year, and from which all the varieties of the domestic pigeon are derived, the ring-dove (*Columba palumbus*, L.) frequents all the wooded districts of the country. The stock-dove (*Columba œnas*, L.) is as generally, but more sparingly distributed. Another species, allied either to this or to *Columba livia*, has been observed in the valley of the Jordan, perhaps *Col. leuconota*, Vig. See *Ibis*, vol. i. p. 35. The turtle-dove (*Turtur auritus*, L.) is, as has been stated, most abundant, and in the valley of the Jordan an allied species, the palm-dove, or Egyptian turtle (*Turtur Ægyptiacus*, Temm.), is by no means uncommon. This bird, most abundant among the palm-trees in Egypt and North Africa, is distinguished from the common turtle-dove by its ruddy chestnut color, its long tail, smaller size, and the absence of the collar on the neck. It does not migrate, but from the similarity of its note and habits, it is not probable that it was distinguished by the ancients. The large

Digitized by Google

Indian turtle (*Turtur gelastes*, Temm.) has also been stated, though without authority, to occur in Palestine. Other species, as the well known collared dove (*Turtur risoria*, L.) have been incorrectly included as natives of Syria. H. B. T.

*Turtur Ægyptiacus.*

• **TUTORS**, only in Gal. iv. 2, the translation of ἐπίτροπους, more properly rendered "guardians." It denotes those to whom a charge is committed, in this instance that of guardian or overseer of children who are the heirs of property, while the associated term οἰκονόμοι singles out those among the overseers who regulate the pecuniary affairs of the estate. The better sense of the latter term is "stewards" and not "governors" (A. V.). See especially Wieseler, *Ueber den Br. an die Galater*, p. 326. The A. V. follows the antecedent English versions, except Wycliffe's. See *Remarks on Renderings, etc.*, *Bibl. Sacra*, xxii. 139. H.

**TYCH'ICUS** (Τύχικος [*fortuitous*]). A companion of St. Paul on some of his journeys, and one of his fellow-laborers in the work of the Gospel. He is mentioned in five separate books of the New Testament, and in four cases explicitly, in the fifth very probably, he is connected with the district of Asia. (1.) In Acts xx. 4, he appears as one of those who accompanied the Apostle through a longer or shorter portion of his return-journey from the third missionary circuit. Here he is expressly called (with Trophimus) Ἀσιανός; but while Trophimus went with St Paul to Jerusalem (Acts xxi. 29), Tychicus was left behind in Asia, probably at Miletus (Acts xx. 15, 38). (2.) How Tychicus was employed in the interval before St. Paul's first imprisonment we cannot tell: but in that imprisonment he was with the Apostle again, as we see from Col. iv. 7, 8. Here he is spoken of, not only as "a beloved brother," but as "a faithful minister and fellow servant in the Lord;" and he is to make known to the Colossians the present circumstances of the Apostle (τὰ κατ' ἐμὲ πάντα γνωρίσει), and to bring comfort to the Colossians themselves (ἵνα παρακαλέσῃ τὰς καρδίας ὑμῶν). From this we gather that diligent service and warm Christian sympathy were two features of the life and character of Tychicus. Colossæ was in Asia; but from the fact that of Onesimus, who is mentioned immediately afterwards, it is said, ὃς ἐστιν ἐξ ὑμῶν, whereas Tychicus is not so styled, we naturally infer that the latter was not a native of that city. These two men were doubtless the bearers both of this letter and the following, as well as that to Philemon. (3.) The language concerning Tychicus in Eph. v. 21, 22, is very similar, though not exactly in the same words. And it is the more important to notice this passage carefully, because it is the only personal allusion in the epistle, and is of some considerable value as a subsidiary argument for its authenticity. If this was a circular letter, Tychicus, who bore a commission to Colossæ, and who was probably well known in various parts of the province of Asia, would be a very proper person to see the letter duly delivered and read. (4.) The next references are in the Pastoral Epistles, the first in chronological order being Tit. iii. 12. Here St. Paul (writing possibly from Ephesus) says that it is probable he may send Tychicus to Crete, about the time when he himself goes to Nicopolis. (5.) In 2 Tim. iv. 12 (written at Rome during the second imprisonment) he says, "I am herewith sending Tychicus to Ephesus." At least it seems natural, with Dr. Wordsworth, so to render ἀπέστειλα, though Bp. Ellicott's suggestion is also worth considering, that this mission may have been connected with the carrying of the *first* epistle. (See their notes on the passage.) However this may be, we see this disciple at the end, as we saw him at the beginning, connected locally with Asia, while also cooperating with St. Paul. We have no authentic information concerning Tychicus in any period previous to or subsequent to these five Scriptural notices. The tradition which places him afterwards as bishop of Chalcedon in Bithynia is apparently of no value. But there is much probability in the conjecture (Stanley's *Corinthians*, 2d ed. p. 493) that Tychicus was one of the two "brethren" (Trophimus being the other) who were associated with Titus (2 Cor. viii. 16–24) in conducting the business of the collection for the poor Christians in Judæa. As arguments for this view we may mention the association with Trophimus, the probability that both were Ephesians, the occurrence of both names in the Second Epistle to Timothy (see 2 Tim. iv. 20), the chronological and geographical agreement with the circumstances of the third missionary journey, and the general language used concerning Tychicus in Colossians and Ephesians. [ASIA; EPHESUS; TROPHIMUS.] J. S. H.

**TYRAN'NUS** (Τύραννος [*despot, tyrant*]). The name of a man in whose school or place of audience Paul taught the Gospel for two years, during his sojourn at Ephesus (see Acts xix. 9). The halls or rooms of the philosophers were called σχολαί among the later Greeks (Liddell and Scott, *s. v.*); and as Luke applies that term to the *auditorium* in this instance, the presumption is that Tyrannus himself was a Greek, and a public teacher of philosophy or rhetoric. He and Paul must have occupied the room at different hours; but whether he hired it out to the Christians or gave to them the use of it (in either case he must have been friendly to them) is left uncertain. Meyer is disposed to consider that Tyrannus was a Jewish rabbi, and the owner of a private synagogue or house for teaching (בֵּית מִדְרָשׁ). But, in the first place

Digitized by Google

sis Greek name, and the fact that he *is* not mentioned as a Jew or proselyte, disagree with that supposition; and, in the second place, as Paul repaired to this man's school after having been compelled to leave the Jewish synagogue (Acts xix. 9), it is evident that he took this course as a means of gaining access to the heathen; an object which he would naturally seek through the coöperation of one of their own number, and not by associating himself with a Jew or a Gentile adherent of the Jewish faith. In speaking of him merely as a certain Tyrannus (Τυράννου τινός), Luke indicates certainly that he was not a believer at first; though it is natural enough to think that he may have become such as the result of his acquaintance with the Apostle. Hemsen (*Der Apostel Paulus*, p. 218) throws out the idea that the hall may have belonged to the authorities of the city, and have derived its name from the original proprietor.

H. B. H.

**TYRE** (צֹר, i. e. *Tzôr*: *Τόρος*: *Tyrus*: Josh. xix. 29 [*οἱ Τύριοι*]; 2 Sam. xxiv 7; Is. xxiii. 1; Ez. xxvi. 15, xxvii. 2, &c.). A celebrated commercial city of antiquity, situated in Phœnicia, on the eastern coast of the Mediterranean Sea, in latitude 33° 17′ N. (Admiral Smythe's *Mediterranean*, p. 469). Its Hebrew name "Tzôr" signifies a rock; which well agrees with the site of *Sûr*, the modern town, on a rocky peninsula, formerly an island. From the word "Tzôr" were derived two names of the city, in which the first letters differed from each other, though both had a feature of their common parent: 1st, the Aramaic word Tura, whence the Greek word Turos, probably pronounced Tyros, which finally prevailed in Latin, and with slight changes, in the modern languages of the West; and, 2dly, Sara, or Sarra, which occurs in Plautus (*Truc.* ii. 6, 58, "purpuram ex Sarâ tibi attuli"), and which is familiar to scholars through the well-known line of Virgil, "Ut gemmâ bibat, et Sarrano dormiat ostro" (*Georg.* ii. 506; comp. Aul. Gell. xiv. 6; Silius Italicus, xv. 203; Juvenal, x. 30). According to a passage of Probus (ad Virg. *Georg.* ii. 115), as quoted by Mr. Grote (*History of Greece*, 353), the form "Sara" would seem to have occurred in one of the Greek epics now lost, which passed under the name of Homer. Certainly, this form accords best with the modern Arabic name of *Sûr*.

PALÆTYRUS, or Old Tyre. There is no doubt that, previous to the siege of the city by Alexander the Great, Tyre was situated on an island; but, according to the tradition of the inhabitants, if we may believe Justin (xi. 10), there was a city on the mainland before there was a city on the island; and the tradition receives some color from the name of Palætyrus, or Old Tyre, which was borne in Greek times by a city on the continent, 30 stadia to the south (Strabo, xii. 11, 24). But a difficulty arises in supposing that Palætyrus was built before Tyre, as the word Tyre evidently means "a rock," and few persons who have visited the site of Palætyrus can seriously suppose that any rock on the surface there can have given rise to the name. To escape this difficulty, Hengstenberg makes the suggestion that Palætyrus meant Tyre that formerly existed; "quæ quondam fuit;" and that the name was introduced after the destruction of the greater part of it by Nebuchadnezzar, to distinguish it from that part of Tyre which continued to be in existence (*De rebus Tyriorum*, p. 26). Movers, justly deeming this explanation unlikely, suggests that the original inhabitants of the city on the mainland possessed the island as part of their territory, and named their city from the characteristic features of the island, though the island itself was not then inhabited (*Das Phönizische Alterthum*, vol. ii. pt. i. p. 173). This explanation is possible; but other explanations are equally possible. For example, the Phœnician name of it may have been the Old City; and this may have been translated "Palætyrus" in Greek. Or, if the inhabitants of the mainland migrated to the island, they may afterwards, at some time or other, have given to the city which they left the name of Old Tyre, without its being necessarily implied that the city had ever borne simply the name of Tyre. Or some accidental circumstance, now beyond the reach of conjecture, may have led to the name; just as for some unaccountable reason Roma Vecchia, or Old Rome, is the name given in the Roman Campagna (as is stated on the high authority of Mr. H. E. Bunbury) to ruins of the age of Caracalla situated between the roads leading to Frascati and Albano, although there are no traces there of any Old Town, and there is not the slightest reason to suppose that there is any historical foundation whatever for the name. And this again would tally with Mr. Grote's remark, who observes (*l. c.*) that perhaps the Phœnician name which the city on the mainland bore may have been something resembling Palæ-Tyrus in sound but not coincident in meaning. It is important, however, to bear in mind that this question regarding Palætyrus is merely archæological, and that nothing in Biblical history is affected by it. Nebuchadnezzar necessarily besieged the portion of the city on the mainland, as he had no vessels with which to attack the island; but it is reasonably certain that, in the time of Isaiah and Ezekiel, the heart or core of the city was on the island. The city of Tyre was consecrated to Hercules (Melkarth) who was the principal object of worship to the inhabitants (Quintus Curtius, iv. 2; Strabo, xvi. p. 757); and Arrian in his History says that the temple on the island was the most ancient of all temples within the memory of mankind (ii. 16). It cannot be doubted, therefore, that the island had long been inhabited. And with this agree the expressions as to Tyre being "in the midst of the seas" (Ez. xxvii. 25, 26); and even the threat against it that it should be made like the top of a rock to spread nets upon (see Des Vignoles' *Chronologie de l'Histoire Sainte*, Berlin, 1738, vol. ii. p. 25). As, however, the space on the island was limited, it is very possible that the population on the mainland may have exceeded the population on the island (see Movers, *l. c.* p. 81).

Whether built before or later than Palætyrus, the renowned city of Tyre, though it laid claims to a very high antiquity[a] (Is. xxiii. 7; Herodot. ii. 14; Quintus Curtius, iv. 4), is not mentioned either

[a] According to Herodotus, the priests at Tyre told him that their city had been founded 2,300 years before his visit. Supposing he was at Tyre in 450 B. C., this would make the date of its foundation 2,750 B. C. Josephus makes the more sober statement, probably founded on Menander's history, that it was founded 230 years before the commencement of the building of Solomon's temple. Under any circumstances, Josephus could not, with his ideas and chronology, have accepted the date of the Tyrian priests; for then Tyre

in the Iliad or in the Odyssey; but no inference can be legitimately drawn from this fact as to the existence or non-existence of the city at the time when those poems were composed. The tribe of Canaanites which inhabited the small tract of country which may be called Phœnicia Proper [PHŒNICIA] was known by the generic name of Sidonians (Judg. xviii. 7; Is. xxiii. 2, 4, 12; Josh. xiii. 6; Ez. xxxii. 30); and this name undoubtedly included Tyrians, the inhabitants being of the same race, and the two cities being less than 20 English miles distant from each other. Hence when Solomon sent to Hiram king of Tyre for cedar-trees out of Lebanon to be hewn by Hiram's subjects, he reminds Hiram that "there is not among us any that can skill to hew timber like the Sidonians" (1 K. v. 6). Hence Virgil, who, in his very first mention of Carthage, expressly states that it was founded by colonists from Tyre (*Æn.* i. 12), afterwards, with perfect propriety and consistency, calls it the Sidonian city (*Æn.* i. 677, 678, iv. 545. See Des Vignoles, *l. c.* p. 25). And in like manner, when Sidonians are spoken of in the Homeric Poems (*Il.* vi. 290, xxiii. 743; *Od.* iv. 84, xvii. 424), this might comprehend Tyrians; and the mention of the city Sidon, while there is no similar mention of Tyre, would be fully accounted for — if it were necessary to account for such a circumstance at all in a poem — by Sidon's having been in early times more flourishing than Tyre. It is worthy, likewise, of being noted, that Tyre is not mentioned in the Pentateuch; but here, again, though an inference may be drawn against the importance, no inference can be legitimately drawn against the existence, of Tyre in the times to which the Pentateuch refers.

In the Bible, Tyre is named for the first time in the book of Joshua (xix. 29), where it is adverted to as a fortified city (in the A. V. "the strong city"), in reference to the boundaries of the tribe of Asher. Nothing historical, however, turns upon this mention of Tyre; for it is indisputable that the tribe of Asher never possessed the Tyrian territory. According to the injunctions of the Pentateuch, indeed, all the Canaanitish nations ought to have been exterminated; but, instead of this, the Israelites dwelt among the Sidonians or Phœnicians, who were inhabitants of the land (Judg. i. 31, 32), and never seem to have had any war with that intelligent race. Subsequently, in a passage of Samuel (2 Sam. xxiv. 7), it is stated that the enumerators of the census in the reign of David went in pursuance of their mission to Tyre, amongst other cities, which must be understood as implying, not that Tyre was subject to David's authority, but merely that a census was thus taken of the Jews resident there. But the first passages in the Hebrew historical writings, or in ancient history generally, which afford glimpses of the actual condition of Tyre, are in the book of Samuel (2 Sam. v. 11), in connection with Hiram king of Tyre sending cedar-wood and workmen to David, for building him a palace; and subsequently in the book of Kings, in connection with the building of Solomon's temple. One point at this period is particularly worthy of attention. In contradistinction from all the other most celebrated independent commercial cities out of Phœnicia in the ancient and modern world, Tyre was a monarchy and not a republic, and, notwithstanding its merchant princes, who might have been deemed likely to favor the establishment of an aristocratical commonwealth, it continued to preserve the monarchical form of government until its final loss of independence. Another point is the skill in the mechanical arts which seems to have been already attained by the Tyrians. Under this head, allusion is not specially made to the excellence of the Tyrians in felling trees; for, through vicinity to the forests of Lebanon, they would as naturally have become skilled in that art as the backwoodsmen of America. But what is peculiarly noteworthy is that Tyrians had become workers in brass or copper to an extent which implies considerable advancement in art. In the enumeration of the various works in brass executed by the Tyrian artists whom Solomon sent for, there are lilies, palm-trees, oxen, lions, and cherubim (1 K. vii. 13–45). The manner in which the cedar-wood and fir-wood was conveyed to Jerusalem is likewise interesting, partly from the similarity of the sea voyage to what may commonly be seen on the Rhine at the present day, and partly as giving a vivid idea of the really short distance between Tyre and Jerusalem. The wood was taken in floats to Joppa (2 Chr. ii. 16; 1 K. v. 9), a distance of less than 74 geographical miles. In the Mediterranean during summer there are times when this voyage along the coast would have been perfectly safe, and when the Tyrians might have reckoned confidently, especially at night, on light winds to fill the sails which were probably used on such occasions. From Joppa to Jerusalem the distance was about 32 miles; and it is certain that by this route the whole distance between the two celebrated cities of Jerusalem and Tyre was not more than 106[a] geographical, or about 122 English miles. Within such a comparatively short distance (which by land, in a straight line, was about 20 miles shorter) it would be easy for two sovereigns to establish personal relations with each other; more especially as the northern boundary of Solomon's kingdom, in one direction, was the southern boundary of Phœnicia. Solomon and Hiram may frequently have met, and thus laid the foundations of a political alliance in personal friendship. If by messengers they sent riddles and problems for each other to solve (Joseph. *Ant.* viii. 5, § 3; *c. Apion.* i. 17), they may previously have had, on several occasions, a keen encounter of wits in convivial intercourse. In this way, likewise, Solomon may have become acquainted with the Sidonian women who, with those of other nations, seduced him to Polytheism and the worship of Astarte in his old age. Similar remarks apply to the circumstances which may have occasioned previously the strong affection of Hiram for David (1 K. v. 1).

However this may be, it is evident that under Solomon there was a close alliance between the Hebrews and the Tyrians. Hiram supplied Solomon

---

would have been founded before the era of the Deluge. See an instructive passage as to the chronology of Josephus in *Ant.* viii. 3, § 1.

[a] It may be interesting to compare the distance from which the limestone was brought with which St. Paul's Cathedral was built. It was hewn from quarries in the Isle of Portland, and was sent to London round the North Foreland up the river Thames. The distance to London in a straight line from the North Foreland alone is of itself about twelve miles greater than from Tyre to Joppa; while the distance from the Isle of Portland to the North Foreland is actually three times as great.

with cedar wood, precious metals, and workmen, and gave him sailors for the voyage to Ophir and India, while on the other hand Solomon gave Hiram supplies of corn and oil, ceded to him some cities, and permitted him to make use of some havens on the Red Sea (1 K. ix. 11–14, 26–28, x. 22). These friendly relations survived for a time the disastrous secession of the Ten Tribes, and a century later Ahab married a daughter of Ethbaal, king of the Sidonians (1 K. xvi. 31), who, according to Menander (Josephus, *Ant.* viii. 13, § 2), was daughter of Ithobal, king of Tyre. As she was zealous for her national religion, she seems to have been regarded as an abomination by the pious worshippers of Jehovah; but this led to no special prophetical denunciations against Tyre. The case became different, however, when mercantile cupidity induced the Tyrians and the neighboring Phœnicians to buy Hebrew captives from their enemies and to sell them as slaves to the Greeks [PHŒNICIANS, iii. 2518 *b*] and Edomites. From this time commenced denunciations, and, at first, threats of retaliation (Joel iii. 4–8; Amos i. 9, 10); and indeed, though there might be peace, there could not be sincere friendship between the two nations. But the likelihood of the denunciations being fulfilled first arose from the progressive conquests of the Assyrian monarchs. It was not probable that a powerful, victorious, and ambitious neighbor could resist the temptation of endeavoring to subjugate the small strip of land between the Lebanon and the sea, so insignificant in extent, but overflowing with so much wealth, which by the Greeks was called Phœnicia. [PHŒNICIA.] Accordingly, when Shalmaneser, king of Assyria, had taken the city of Samaria, had conquered the kingdom of Israel and carried its inhabitants into captivity, he turned his arms against the Phœnician cities. At this time, Tyre had reached a high point of prosperity. Since the reign of Hiram, it had planted the splendid colony of Carthage (143 years and eight months, Josephus says, after the building of Solomon's Temple, *c. Apion.* i. 18); it possessed the island of Cyprus, with the valuable mines of the metal "copper" (so named from the island); and, apparently, the city of Sidon was subject to its sway. But Shalmaneser seems to have taken advantage of a revolt of the Cyprians; and what ensued is thus related by Menander, who translated the archives of Tyre into the Greek language (see Josephus, *Ant.* ix. 14, § 2): "Elulæus reigned 36 years (over Tyre). This king, upon the revolt of the Kittæans (Cyprians), sailed with a fleet against them, and reduced them to submission. On the other hand, the king of the Assyrians attacked in war the whole of Phœnicia, but soon made peace with all, and turned back. On this, Sidon and Ace (*i. e.* Akkô or Acre) and Palætyrus revolted from the Tyrians, with many other cities which delivered themselves up to the king of Assyria. Accordingly, when the Tyrians would not submit to him, the king returned and fell upon them again, the Phœnicians having furnished him with 60 ships and 800 rowers. Against these the Tyrians sailed with 12 ships, and, dispersing the fleet opposed to them, they took five hundred men prisoners. The reputation of all the citizens in Tyre was hence increased. Upon this the king of the Assyrians, moving off his army, placed guards at their river and aqueducts to prevent the Tyrians from drawing water. This continued for five years, and still the Tyrians held out, supplying themselves with water from wells." It is in reference to this siege that the prophecy against Tyre in the writings entitled Isaiah, chap. xxiii. was uttered, if it proceeded from the Prophet Isaiah himself: but this point will be again noticed.

After the siege of Tyre by Shalmaneser (which must have taken place not long after 721 B. C.), Tyre remained a powerful state with its own kings (Jer. xxv. 22, xxvii. 3; Ez. xxviii. 2–12), remarkable for its wealth, with territory on the mainland, and protected by strong fortifications (Ez. xxviii. 5, xxvi. 4, 6, 8, 10, 12, xxvii. 11; Zech. ix. 3). Our knowledge of its condition thenceforward until the siege by Nebuchadnezzar depends entirely on various notices of it by the Hebrew prophets; but some of those notices are singularly full, and, especially, the twenty-seventh chapter of Ezekiel furnishes us, on some points, with details such as have scarcely come down to us respecting any one city of antiquity, excepting Rome and Athens. One point especially arrests the attention, that Tyre, like its splendid daughter Carthage, employed mercenary soldiers (Ez. xxvii. 10, 11). This has been the general tendency in commercial cities on account of the high wages which may be obtained by artisans in a thriving community, compared with the ordinary pay of a soldier; and Tyre had been unable to resist the demoralizing temptation. In its service there were Phœnicians from Arvad, Æthiopians obtained through the commerce of Egypt, and hardy mountaineers from Persia. This is the first time that the name of Persia occurs in the remains of ancient literature, before its sons founded a great monarchy on the ruins of the Chaldæan empire. We may conceive them like the Swiss, who, poor, faithful, and brave, have during many centuries, until the last few years, deemed enlistment in foreign service a legitimate source of gain. Independently, however, of this fact respecting Tyrian mercenary soldiers, Ezekiel gives interesting details respecting the trade of Tyre. On this head, without attempting to exhaust the subject, a few leading points may be noticed. The first question is as to the countries from which Tyre obtained the precious metals; and it appears that its gold came from Arabia by the Persian Gulf (v. 22), just as in the time of Solomon it came from Arabia by the Red Sea [OPHIR]. Whether the Arabian merchants, whose wealth was proverbial in Roman classical times (Horace, *Od.* i. 29, 1), obtained their gold by traffic with Africa or India, or whether it was the product of their own country, is uncertain; but as far as the latter alternative is concerned, the point will probably be cleared up in the progress of geological knowledge. On the other hand, the silver, iron, lead, and tin of Tyre came from a very different quarter of the world, namely, from the south of Spain, where the Phœnicians had established their settlement of Tarshish, or Tartessus. As to copper, we should have presumed that it was obtained from the valuable mines in Cyprus; but it is mentioned here in conjunction with Javan, Tubal, and Meshech, which points to the districts on the south of the Black Sea, in the neighborhood of Armenia, in the southern line of the Caucasus, between the Black Sea and the Caspian. The country whence Tyre was supplied with wheat was Palestine. This point has been already noticed elsewhere [PHŒNICIANS, iii. 2519] as helping to explain why there is no instance on record of war between Tyre and the Israelites. It may be added that the value of Palestine as a wheat-country to Tyre was greatly enhanced by its prox-

Digitized by Google

inity, as there was scarcely a part of the kingdom of Israel on the west of the river Jordan which was distant more than a hundred miles from that great commercial city. The extreme points in the kingdom of Judah would be somewhat more distant; but the wheat probably came from the northern part of Palestine. Tyre likewise obtained from Palestine oil, honey, and balm, but not wine apparently, notwithstanding the abundance of grapes and wine in Judah (Gen. xlix. 11). The wine was imported from Damascus, and was called wine of Helbon, which was probably not the product of the country adjoining the celebrated city of that name, but came from the neighborhood of Damascus itself (see Porter's *Handbook for Syria*, vol. ii. p. 495; compare Athenæus, i. 51). The Bedawin Arabs supplied Tyre with lambs and rams and goats, for the rearing of which their mode of life was so well adapted. Egypt furnished linen for sails, and doubtless for other purposes, and the dyes from shell-fish, which afterwards became such a source of profit to the Tyrians, were imported from the Peloponnesus (compare the "Laconicas purpuras" of Horace, *Od.* ii. 18, 7, and Pliny, ix. 40). Lastly from Dedan in the Persian Gulf, an island occupied possibly by a Phœnician colony, horns of ivory and ebony were imported, which must originally have been obtained from India (Ez. xxvii. 10, 11, 22, 12, 13, 17, 18, 21, 7, 15).

In the midst of great prosperity and wealth, which was the natural result of such an extensive trade (Ez. xxviii. 4), Nebuchadnezzar, at the head of an army of the Chaldees, invaded Judæa, and captured Jerusalem. As Tyre was so near to Jerusalem, and as the conquerors were a fierce and formidable race (Hab. i. 6), led by a general of undoubted capacity, who had not long before humbled the power of the Egyptians, it would naturally be supposed that this event would have excited alarm and terror amongst the Tyrians. Instead of this we may infer from Ezekiel's statement (xxvi. 2) that their predominant feeling was one of exultation. At first sight this appears strange and almost inconceivable; but it is rendered intelligible by some previous events in Jewish history. Only 34 years before the destruction of Jerusalem, commenced the celebrated Reformation of Josiah, B. C. 622. This momentous religious revolution, of which a detailed account is given in two chapters of the book of Kings (2 K. xxii., xxiii.), and which cannot be too closely studied by any one who wishes to understand the Jewish Annals, fully explains the exultation and malevolence of the Tyrians. In that Reformation, Josiah had heaped insults on the gods who were the objects of Tyrian veneration and love, he had consumed with fire the sacred vessels used in their worship, he had burnt their images and defiled their high places — not excepting even the high place near Jerusalem, which Solomon the friend of Hiram had built to Ashtoreth the Queen of Heaven, and which for more than 350 years had been a striking memorial of the reciprocal good-will which once united the two monarchs and the two nations. Indeed, he seemed to have endeavored to exterminate their religion, for in Samaria (2 K. xxiii. 20) he had slain upon the altars of the high places all their priests. These acts, although in their ultimate results they may have contributed powerfully to the [a] diffusion of the Jewish religion, must have been regarded by the Tyrians as a series of sacrilegious and abominable outrages; and we can scarcely doubt that the death in battle of Josiah at Megiddo, and the subsequent destruction of the city and Temple of Jerusalem were hailed by them with triumphant joy, as instances of Divine retribution in human affairs.

This joy, however, must soon have given way to other feelings, when Nebuchadnezzar invaded Phœnicia, and laid siege to Tyre. That siege lasted thirteen years (Joseph. c. *Apion.* i. 21), and it is still a disputed point, which will be noticed separately in this article, whether Tyre was actually taken by Nebuchadnezzar on this occasion. However this may be, it is probable that, on some terms or other, Tyre submitted to the Chaldees. This would explain, amongst other points, an expedition of Apries, the Pharaoh-Hophra of Scripture, against Tyre, which probably happened not long after, and which may have been dictated by obvious motives of self-defense in order to prevent the naval power of Tyre becoming a powerful instrument of attacking Egypt in the hands of the Chaldees. In this expedition Apries besieged Sidon, fought a naval battle with Tyre, and reduced the whole of the coast of Phœnicia, though this could not have had lasting effects (Herod. ii. 161; Diod. i. 68; Movers, *Das Phönizische Alterthum*, vol. ii. p. 451). The rule of Nebuchadnezzar over Tyre, though real, may have been light, and in the nature of an alliance; and it may have been in this sense that Merbal, a subsequent Tyrian king, was sent for to Babylon (Joseph. c. *Apion.* i. 21). During the Persian domination the Tyrians were subject in name to the Persian king, and may have given him tribute. With the rest of Phœnicia, they had submitted to the Persians, without striking a blow; perhaps, through hatred of the Chaldees; perhaps, solely from prudential motives. But their connection with the Persian king was not slavish. Thus, when Cambyses ordered them to join in an expedition against Carthage, they refused compliance, on account of their solemn engagements and parental relation to that colony: and Cambyses did not deem it right to use force toward them (Herod. iii. 19). Afterwards they fought with Persia against Greece, and furnished vessels of war in the expedition of Xerxes against Greece (Herod. vii. 98); and Mapên, the son of Sirom the Tyrian, is mentioned amongst those who, next to the commanders, were the most renowned in the fleet. It is worthy of notice that at this time Tyre seems to have been inferior in power to Sidon. These two cities were less than twenty English miles distant from each other; and it is easy to conceive that in the course of centuries their relative importance might fluctuate, as would be very possible in our own country with two neighboring cities, such for example, as Liverpool and Manchester. It is possible also that Tyre may have been seriously weakened by its long struggle against Nebuchadnezzar. Under the Persian dominion, Tyre and Sidon supplied cedar wood again to the Jews for the building of the second Temple; and this wood was sent by sea to Joppa, and thence to Jerusalem, as had been the case with the materials for the first Temple in the time of Solomon (Ezra iii. 7). Un-

[a] It was owing to this Reformation of Josiah that when the Jews were carried into captivity by Nebuchadnezzar a generation had arisen untainted by idolatry, and yet many of them probably free from the intense scrupulousness in ceremonial observances which prevailed subsequently.

Digitized by Google

der the Persians likewise Tyre was visited by an historian, from whom we might have derived valuable information respecting its condition (Herod. ii. 44). But the information actually supplied by him is scanty, as the motive of his voyage seems to have been solely to visit the celebrated temple of Melkarth (the Phœnician Hercules), which was situated in the island, and was highly venerated. He gives no details as to the city, and merely specifies two columns which he observed in the temple, one of gold, and the other of emerald; or rather, as is reasonably conjectured by Sir Gardiner Wilkinson, of green glass (Rawlinson's *Herodotus*, ii. 81, 82). Towards the close of the following century, B. C. 332, Tyre was assailed for the third time by a great conqueror: and if some uncertainty hangs over the siege by Nebuchadnezzar, the results of the siege by Alexander were clear and undeniable. It was essential to the success of his military plans that the Phœnician fleet should be at his command, and that he should not be liable through their hostility to have his communications by sea with Greece and Macedonia suddenly cut off; and he accordingly summoned all the Phœnician cities to submit to his rule. All the rest of them, including Aradus, Byblus, and Sidon, complied with his demands, and the seamen of those cities in the Persian fleet brought away their ships to join him. Tyre alone, calculating probably at first on the support of those seamen, refused to admit him within its walls — and then ensued a memorable siege which lasted seven months, and the success of which was the greatest of all the achievements which Alexander up to that time had attempted. It is not necessary to give here the details of that siege, which may be found in Arrian and Quintus Curtius, and in all good Grecian histories, such as those of Bishop Thirlwall and Mr. Grote. It may be sufficient to say, that at that time Tyre was situated on an island nearly half a mile from the mainland — that "it was completely surrounded by prodigious walls, the loftiest portion of which on the side fronting the mainland reached a height not less than 150 feet;" and that notwithstanding his persevering efforts, he could not have succeeded in his attempt, if the harbor of Tyre to the north had not been blockaded by the Cyprians, and that to the south by the Phœnicians, thus affording an opportunity to Alexander for uniting the island to the mainland by an enormous artificial [a] mole. Moreover, owing to internal disturbances, Carthage was unable to afford any assistance to its parent state.

The immediate results of the capture by Alexander were most disastrous to it, as its brave defenders were put to death; and, in accordance with the barbarous policy of ancient times, 30,000 of its inhabitants, including slaves, free females and free children were sold as slaves (Arrian, iv. 24. § 9; Diodorus, xvii. 46). It gradually, however, recovered its prosperity through the immigration of fresh settlers, though its trade is said to have suffered by the vicinity and rivalry of Alexandria. Under the Macedonian successors of Alexander, it shared the fortunes of the Seleucidæ, who bestowed on it many privileges; and there are still in existence coins of that epoch with a Phœnician and Greek inscription (Eckhel, *Doctr. Nummorum Vet.* vol. iii. p. 379, &c.; Gesenius, *Monumenta Phœnicia*, pp. 282–284, and Tab. 34). Under the Romans, at first it continued to enjoy a kind of freedom; for Josephus mentions that when Cleopatra pressed Antony to include Tyre and Sidon in a gift of Phœnician and Jewish territory which he made to her, he steadily refused, knowing them to have been "free cities from their ancestors" (*Ant.* xv. 4, § 1). Subsequently, however, on the arrival of Augustus in the East, he is said to have deprived the two cities of their liberties for seditious conduct (ἀβουλήσατο, Dion Cassius, lxiv. 7). Still the prosperity of Tyre in the time of Augustus was undeniably great. Strabo gives an account of it at that period (xvi. 2, 23), and speaks of the great wealth which it derived from the dyes of the celebrated Tyrian purple, which, as is well known, were extracted from shell-fish found on the coast, belonging to a species of the genus Murex. In the days of Ezekiel, the Tyrians had imported purple from the Peloponnesus; but they had since learned to extract the dye for themselves; and they had the advantage of having shell-fish on their coast better adapted for this purpose even than those on the Lacedæmonian coast (Pausanias, iii. 21, § 6). Strabo adds, that the great number of dyeing works rendered the city unpleasant as a place of residence [b] He further speaks of the houses as consisting of many stories, even of more than in the houses at Rome — which is precisely what might be expected in a prosperous fortified city of limited area, in which ground-rent would be high. Pliny the Elder gives additional information respecting the city, for in describing it he says that the circumference of the city proper (*i. e.* the city on the peninsula) was 22 stadia, while that of the whole city, including Palætyrus, was 19 Roman miles (*Nat. Hist.* v. 17). The accounts of Strabo and Pliny have a peculiar interest in this respect, that they tend to convey an idea of what the city must have been, when visited by Christ (Matt. xv. 21; Mark vii. 24). It was perhaps more populous than Jerusalem [JERUSALEM, ii. 1320], and if so, it was undoubtedly the largest city which he is known to have visited. It was not much more than thirty miles distant from Nazareth, where Christ mainly lived as a carpenter's son during the greater part of his life (Matt. ii. 23, iv. 12, 13, 18; Mark vi. 3). We may readily conceive that He may often have gone to Tyre, while yet unknown to the world; and whatever uncertainty there may be as to the extent to which the Greek language was likely to be spoken at Nazareth, at Tyre, and in its neighbor-

[a] That Tyre was on an island, previous to its siege by Alexander, is one of the most certain facts of history; but on examining the locality at the present day few persons would suspect from existing appearances that there was anything artificial in the formation of the present peninsula.

[b] Pliny the elder gives an account of the Phœnician shell-fish (ix. 60, 61), and states that from the larger ones the dye was extracted after taking off the shell: but that the small fish were crushed alive together with the shells. Mr. Wilde, an intelligent modern traveller observed at Tyre numerous round holes cut in the solid sandstone rock, in which shells seem to have been crushed. They were perfectly smooth on the inside; and many of them were shaped exactly like a modern iron pot, broad and flat at the bottom, and narrowing toward the top. Many of these were filled with a breccia of shells; in other places this breccia lay in heaps in the neighborhood. All the shells were of one species, and were undoubtedly the *Murex Trunculus*. See *Narrative of a Voyage to Madeira, Teneriffe, and along the Shores of the Mediterranean*. Dublin, 1844.

hood, there must have been excellent opportunities for conversation in that language, with which He seems to have been acquainted (Mark vii. 26). From the time of Christ to the beginning of the 5th century, there is no reason to doubt that, as far as was compatible with the irreparable loss of independence, Tyre continued in uninterrupted prosperity; and about that period Jerome has on record very striking testimony on the subject, which has been often quoted, and is a landmark in Tyrian history (see Gesenius's *Jesaia*, vol. i. p. 714). Jerome, in his Commentaries on Ezekiel, comes to the passage in which the prophet threatens Tyre with the approach of Nebuchadnezzar, king of Babylon (Ez. xxvi. 7); and he then, amongst other points, refers to the verse in which the prophet predicts of Tyre, "Thou shalt be built no more," saying that this raises a question as to how a city can be said not to be built any more, which we see at the present day the most noble and the most beautiful city of Phœnicia. "Quodque sequitur: nec ædificaberis ultra, videtur facere quæstionem quomodo non sit ædificata, *quam hodie cernimus Phœnices nobilissimam et pulcherrimam civitatem.*" He afterwards, in his remarks on the 3d verse of the 27th chapter, in which Tyre is called "a merchant of the people for many isles," says that this continues down to his time, so that commercial dealings of almost all nations are carried on in that city — "*quod quidem usque hodie perseverat, ut omnium propemodo gentium in illâ exerceantur commercia.*" Jerome's Commentaries on Ezekiel are supposed to have been written about the years 411–414 A. D. (see Smith's *Dictionary of Greek and Roman Biography*, vol. ii. p. 465), so that his testimony respecting the prosperity of Tyre bears date almost precisely a thousand years after the capture of Jerusalem by Nebuchadnezzar, B. C. 588. As to the passage in which Ezekiel states that Tyre shall be built no more, Jerome says the meaning is, that "Tyre will be no more the Queen of Nations, having its own king, as was the case under Hiram and other kings, but that it was destined to be always subject, either to the Chaldeans, or to the Macedonians, or to the Ptolemies, or at last to the Romans." At the same time Jerome notices a meaning given to the passage by some interpreters, that Tyre would not be built *in the last days;* but he asks of such interpreters, "How they will be able to preserve the part attributed to Nebuchadnezzar, especially as we read in what follows, that Nebuchadnezzar besieged Tyre, but had no reward of his labor (xxix. 18), and that Egypt was given over to him because in besieging Tyre he had served the purpose of God."

When Jerome spoke of Tyre's subjection to the Romans, which had then lasted more than four hundred years, he could scarcely have anticipated that another subjugation of the country was reserved for it from a new conquering power, coming not from the north, but from the south. In the 7th century A. D. took place the extraordinary Arabian revolution under Mohammed, which has given a new religion to so many millions of mankind. In the years 633–638 A. D. all Syria and Palestine from the Dead Sea to Antioch, was conquered by the Khalif Omar. This conquest was so complete, that in both those countries the language of Mohammed has almost totally supplanted the language of Christ. In Syria, there are only three villages where Syriac (or Aramaic) is the vernacular language. In Palestine, it is not the language of a single native; and in Jerusalem, to a stranger who understands what is involved in this momentous revolution, it is one of the most suggestive of all sounds to hear the Muezzin daily call Mohammedans to prayers in the Arabic language of Mohammed, within the sacred precincts where once stood the Temple, in which Christ worshipped in Hebrew, or in Aramaic. (As to the Syriac language, see Porter's *Handbook for Syria and Palestine*, vol. ii. p. 551.) But even this conquest did not cause the overthrow of Tyre. The most essential conditions on which peace was granted to Tyre, as to other Syrian cities, were the payment of a poll-tax, the obligation to give board and lodging for three days to every Muslem traveller, the wearing a peculiar dress, the admission of Muslems into the churches, the doing away with all crosses and all sounds of bells, the avoiding of all insulting expressions towards the Mohammedan religion, and the prohibition to ride on horseback or to build new churches. (See Weil's *Geschichte der Chalifen*, bd. i. 81, 82.) Some of these conditions were humiliating, and nearly heart-breaking; but if submitted to, the lives and private property of the inhabitants remained untouched. Accordingly, at the time of the Crusades Tyre was still a flourishing city, when it surrendered to the Christians on the 27th of June, 1124. It had early been the seat of a Christian bishopric, and Cassius, bishop of Tyre, is named as having been present at the Council of Cæsarea towards the close of the 2d century (Reland, *Palestine*, 1054); and now, in the year after its capture by the Crusaders, William, a Frenchman, was made its archbishop. This archbishop has left on record an account of the city, which gives a high idea of its wealth and great military strength. (See *Wilhelmi Tyrensis Historia*, lib. xiii. cap. 5.) And his statements are confirmed by Benjamin of Tudela, who visited it in the same century. (See Purchas's *Pilgrims*, ii. 1443.) The latter writer, who died in 1173, says: "Nor do I think any haven in the world to be like unto this. The city itself, as I have said, is goodly, and in it there are about four hundred Jews, among whom some are very skillful in disciplinary readings, and especially Ephraim the Egyptian judge, and Mair, and Carchesona, and Abraham, the head of the university. Some of the Jews there have ships at sea for the cause of gain. There are artificial workmen in glass there, who make glass, called Tyrian glass, the most excellent, and of the greatest estimation in all countries. The best and most approved sugar is also found there." In fact, at this period, and down to the close of the 13th century, there was perhaps no city in the known world which had stronger claims than Tyre to the title of the "Eternal City," if experience had not shown that cities as well as individuals were subject to decay and dissolution. Tyre had been the parent of colonies, which at a distant period had enjoyed a long life and had died; and it had survived more than fifteen hundred years its greatest colony, Carthage. It had outlived Ægyptian Thebes, and Babylon, and ancient Jerusalem. It had seen Grecian cities rise and fall; and although older than them all, it was in a state of great prosperity when an illustrious Roman, who had been sailing from Ægina to Megara, told Cicero, in imperishable words, of the corpses or carcases of cities, the *oppidorum cadavera*, by which in that voyage he had been in every direction encompassed (*Ep. ad Familiar.* iv

8.) Rome, it is true, was still in existence in the 13th century; but, in comparison with Tyre, Rome itself was of recent date, its now twice consecrated soil having been merely the haunt of shepherds or robbers for some hundred years after Tyre was wealthy and strong. At length, however, the evil day of Tyre undoubtedly arrived. It had been more than a century and a half in the hands of Christians, when in March, A. D. 1291, the Sultan of Egypt and Damascus invested Acre, then known to Europe by the name of Ptolemais, and took it by storm after a siege of two months. The result was told in the beginning of the next century by Marinus Sanutus, a Venetian, in the following words: "On the same day on which Ptolemais was taken, the Tyrians, at vespers, leaving the city empty, without the stroke of a sword, without the tumult of war, embarked on board their vessels, and abandoned the city to be occupied freely by their conquerors. On the morrow the Saracens entered, no one attempting to prevent them, and they did what they pleased." (*Liber Secretorum fidelium Crucis*, lib. iii. cap. 22.[a])

This was the turning point in the history of Tyre, 1879 years after the capture of Jerusalem by Nebuchadnezzar; and Tyre has not yet recovered from the blow. In the first half of the 14th century it was visited by Sir John Maundeville, who says, speaking of "Tyre, which is now called Sûr, here was once a great and goodly city of the Christians: but the Saracens have destroyed it in great part; and they guard that haven carefully for fear of the Christians" (Wright's *Early Travels in Palestine*, p. 141). About A. D. 1610–11 it was visited by Sandys, who said of it: "But this once famous Tyre is now no other than a heap of ruins; yet have they a reverent aspect, and do instruct the pensive beholder with their exemplary frailty. It hath two harbors, that on the north side the fairest and best throughout all the Levant (which the cursours enter at their pleasure); the other choked with the decayes of the city." (Purchas's *Pilgrims*, ii

Ruins of Tyre.

1393.) Towards the close of the same century, in 1697 A. D., Maundrell says of it, "On the north side it has an old Turkish castle, besides which there is nothing here but a mere Babel of broken walls, pillars, vaults, etc., there being not so much as an entire house left. Its present inhabitants are only a few poor wretches that harbor in vaults and subsist upon fishing." (See Harris, *Voyages and Travels*, ii. 846.) Lastly, without quoting at length Dr. Richard Pococke, who in 1737–40 A. D. stated (see vol. x. of Pinkerton's *Voyages and Travels*, p. 470) that, except some janizaries, there were few other inhabitants in the city than two or three Christian families, the words of Hasselquist, the Swedish naturalist, may be recorded, as they mark the lowest point of depression which Tyre seems to have reached. He was there in May, 1751 A. D., and he thus speaks of his visit: "We followed the sea-shore . . . . and came to Tyre, now called *Zur*, where we lay all night. None of these cities, which formerly were famous, are so totally ruined as this, except Troy. *Zur* now scarcely can be called a miserable village, though it was formerly Tyre, the queen of the sea. *Here are about ten inhabitants, Turks and Christians, who live by fishing.*" (See Hasselquist, *Voyages and Travels in the Levant*, London, 1766.) A slight change for the better began soon after. Volney states that in 1766 A. D. the Metâwileh took possession of the place, and built a wall round it twenty feet high, which existed when he visited Tyre nearly twenty years afterward. At that time Volney estimated the population at fifty or sixty poor families. Since the beginning of the present century there has been a partial revival of prosperity. But it has been visited at different times during the last thirty years by Biblical scholars, such as Professor Robinson (*Bibl. Res.* ii. 463–471), Canon Stanley (*Sinai and Palestine*, p. 270), and M. Ernest Renan[b] (*Letter in the Moniteur*, July

[a] A copy of this work is in *Gesta Dei per Francos*, Hanovia, 1611.

[b] M. Ernest Renan says there has been *no subsidence* of the land, owing to earthquakes or other causes; and that the west of the island has the same level as in ancient times. Mr. Wilde had spoken with great caution on this point, pp. 383–385. It is still very desirable that the peninsula and the adjoining coast should be minutely examined by an experienced practical geologist. There seems to be no doubt that the city has suffered from earthquakes. See Porter, *l. c.*; and

11, 1861), who all concur in the account of its general aspect of desolation. Mr. Porter, who resided several years at Damascus, and had means of obtaining correct information, states in 1858 that "the modern town, or rather village, contains from 3,000 to 4,000 inhabitants, about one half being Metâwileh, and the other Christians" (*Handbook for Travellers in Syria and Palestine*, p. 391). Its great inferiority to Beyrout for receiving vessels suited to the requirements of modern navigation will always prevent Tyre from becoming again the most important commercial city on the Syrian coast. It is reserved to the future to determine whether with a good government, and with peace in the Lebanon, it may not increase in population, and become again comparatively wealthy.

In conclusion, it is proper to consider two questions of much interest to the Biblical student, which have been already noticed in this article, but which could not then be conveniently discussed fully. (1) The date and authorship of the prophecy against Tyre in Isaiah, chap. xxiii.; and (2), the question of whether Nebuchadnezzar, after his long siege of Tyre, may be supposed to have actually taken it.

On the first point it is to be observed, that, as there were two sieges of Tyre contemporaneous with events mentioned in the Old Testament, namely, that by Shalmaneser, king of Assyria, in the reign of Hezekiah, and the siege by Nebuchadnezzar, king of the Chaldees, after the capture of Jerusalem in 588 B. C., and as Isaiah was living during the former siege, but must have been dead considerably more than a hundred years at the time of the latter siege, it is probable, without denying predictive prophecy, that the prophecy relates to the first siege, if it was written by Isaiah. As the prophecy is in the collection of writings entitled "Isaiah," there would formerly not have been any doubt that it was written by that prophet. But it has been maintained by eminent Biblical critics that many of the writings under the title of his name were written at the time of the Babylonian Captivity. This seems to be the least open to dispute in reference to the prophecies commencing with "Comfort ye, comfort ye my people," in the 1st verse of the 40th chapter, concerning which the following facts seem to the writer of the present article to be well established.[a] (1.) These prophecies are different in style from the undisputed writings of Isaiah. (2.) They do not *predict* that the Jews will be carried away into captivity at Babylon, but they *presuppose* that the Jews are already in captivity there at the time when the prophecies are uttered; that Jerusalem is desolate, and that the Temple is burnt (Is. lxiv. 10, 11, xliv. 26, 28, xlv. 13, xlvii. 5, 6, lii. 2, 9, li. 3, 11, 17–23). (3.) The name of Cyrus, who conquered Babylon probably at least a hundred and fifty years after the death of Isaiah is mentioned in them twice (xliv. 28, xlv. 1): and (4), there is no external contemporary evidence between the time of Isaiah and the time of Cyrus to prove that these prophecies were then in existence. But, although in this way the evidence of a later date is peculiarly cogent in reference to the 40th and following chapters, there is also reasonable evidence of the later date of several other chapters, such, for example, as the 13th and 14th (on which observe particularly the first four verses of the 14th chapter) and chapters xxiv.–xxvii. Hence there is no *à priori* difficulty in admitting that the 23d chapter, respecting Tyre, may likewise have been written at the time of the Chaldæan invasion. Yet this is not to be assumed without something in the nature of probable proof, and the real point is whether any such proof can be adduced on this subject. Now although Hitzig (*Der Prophet Jesaja*, Heidelberg, 1833, p. 272) undertakes to show that there is a difference of language between Isaiah's genuine prophecies and the 23d chapter, and although Ewald (*Die Propheten des Alten Bundes*, vol. i. p. 238), who refers it to the siege of Tyre by Shalmaneser, believes the 23d chapter, on the grounds of style and language, to have been written by a younger contemporary and scholar of Isaiah, not by Isaiah himself, it is probable that the majority of scholars will be mainly influenced in their opinions as to the date of that chapter by their view of the meaning of the 13th verse. In the A. V. the beginning of the verse is translated thus: "Behold the land of the Chaldæans, this people was not till the Assyrian founded it for them that dwell in the wilderness" — and this has been supposed by some able commentators, such as Rosenmüller and Hitzig (*ad loc.*), to imply that the enemies with which the Tyrians were threatened were the Chaldees under Nebuchadnezzar, and not the Assyrians under Shalmaneser. If this is the meaning, very few critics would now doubt that the prophecy was composed in the time of Nebuchadnezzar; and there is certainly something remarkable in a supposed mention of the Chaldees by such an early writer as Isaiah, inasmuch as, with the possible exceptions in the mention of Abraham and Abraham's family as having belonged to "Ur of the Chaldees" (Gen. xi. 28, 31, xv. 7), the mention of the Chaldees by Isaiah would be the earliest in the Bible. The only other passage respecting which a doubt might be raised is in the book of Job (i. 17) — a work, however, which seems to the author of this article to have been probably written later than Isaiah.[b] But the 13th verse of the chapter attributed to Isaiah by no means necessarily implies that the Chaldees under Nebuchadnezzar were attacking Tyre, or were about to attack it. Accepting the ordinary version, it would be amply sufficient that Chaldees should be formidable mercenaries in the Assyrian army. This is the in-

compare Seneca, *Nat. Quæst.* vi. 1–11, Strabo, xv. p. 757, and Justin, xl. 2, 1.

[a] Doubts as to the authorship of these chapters were first suggested by Döderlein in 1781, in a review of Koppe's translation of Lowth's Isaiah. Since 1781 their later date has been accepted by Eichhorn, Rosenmüller, De Wette, Gesenius, Winer, Ewald, Hitzig, Knobel, Hersfeld, Bleek, Geiger, and Davidson, and by numerous other Hebrew scholars. The evidence has been nowhere stated more clearly than by Gesenius in his *Jesaia* (part ii. pp. 18–35, Leipzig, 1821). On the other hand, the writer of the article ISAIAH in the present work maintains the unity of the book. — ED.]

[b] In the total absence of external evidence nothing in favor of an earlier date can be adduced to outweigh one circumstance long since noticed among numerous others by Gesenius (*Geschichte der Hebräischen Sprache und Schrift*), that the Aramaic plural מְלִין occurs twelve times in the book (iv. 2; xii. 11; xv. 13 xviii. 2; xxvi. 4; xxxii. 11, 14; xxxiii. 8, 33; xxxiv 3; xxxv. 16; xxxviii. 2). [But there are strong reasons for assigning an earlier date to the book: see Job, ii. p. 1408 ff. — ED.]

terpretation of Gesenius (*Commentar über den Jesaia*, ad loc.), who goes still farther. Founding his reasoning on the frequent mention by Xenophon of Chaldees, as a bold, warlike, and predatory tribe in the neighborhood of Armenia, and collecting scattered notices round this fundamental fact, he conjectures that bands of them, having served either as mercenaries or as volunteers in the Assyrian army, had received lands for their permanent settlement on the banks of the Euphrates not long before the invasion of Shalmaneser (see Xenophon, *Cyropæd.* iii. 2, §§ 7, 12; *Anab.* iv 3, § 4, v. 5, § 9, vii. 8, § 14). So great is our ignorance of the Chaldees previous to their mention in the Bible, that this conjecture of Gesenius cannot be disproved. There is not indeed sufficient positive evidence for it to justify its adoption by an historian of the Chaldees; but the possibility of its being true should make us hesitate to assume that the 13th verse is incompatible with the date ordinarily assigned to the prophecy in which it occurs. But, independently of these considerations, the beginning of the 13th verse is capable of a totally different translation from that in the A. V. It may be translated thus: "Behold the land of the Chaldees, the people is no more, Assyria has given it [the land] to the dwellers in the wilderness." This is partly in accordance with Ewald's translation, not following him in the substitution of "Canaanites" (which he deems the correct reading) for "Chaldees" — and then the passage might refer to an unsuccessful rebellion of the Chaldees against Assyria, and to a consequent desolation of the land of the Chaldees by their victorious rulers. One point may be mentioned in favor of this view, that the Tyrians are not warned to look at the Chaldees in the way that Habakkuk threatens his contemporaries with the hostility of that "terrible and dreadful nation," but the Tyrians are warned to look at the *land* of the Chaldees. Here, again, we know so little of the history of the Chaldees, that this interpretation, likewise, cannot be disproved. And, on the whole, as the burden of proof rests with any one who denies Isaiah to have been the author of the 23d chapter, as the 13th verse is a very obscure passage, and as it cannot be proved incompatible with Isaiah's authorship, it is permissible to acquiesce in the Jewish tradition on the subject.

2dly. The question of whether Tyre was actually taken by Nebuchadnezzar after his thirteen years' siege, has been keenly discussed. Gesenius, Winer, and Hitzig decide it in the negative, while Hengstenberg has argued most fully on the other side. Without attempting to exhaust the subject, and assuming, in accordance with Movers, that Tyre, as well as the rest of Phœnicia, submitted at last to Nebuchadnezzar, the following points may be observed respecting the supposed capture: (1.) The evidence of Ezekiel, a contemporary, seems to be against it. He says (xxix. 18) that "Nebuchadnezzar king of Babylon caused his army to serve a great service against Tyre;" that "every head was made bald, and every shoulder was peeled, yet had he no wages, nor his army for Tyrus, for the service that he served against it;" and the obvious inference is that, however great the exertions of the army may have been in digging intrenchments or in casting up earthworks, the seige was unsuccessful. This is confirmed by the following verses (19, 20), in which it is stated that the land of Egypt will be given to Nebuchadnezzar as a compensation, or wages, to him and his army for their having served against Tyre. Movers, indeed, asserts that the only meaning of the expression that Nebuchadnezzar and his army had no wages for their service against Tyre is, that they did not plunder the city. But to a virtuous commander the best reward of besieging a city is to capture it; and it is a strange sentiment to attribute to the Supreme Being, or to a prophet, that a general and his army received no wages for capturing a city, because they did not plunder it. (2.) Josephus, who had access to historical writings on this subject which have not reached our times, although he quotes Phœnician writers who show that Nebuchadnezzar besieged Tyre (*Ant.* x. 11, § 1; *c. Apion.* 23), neither states on his own authority, nor quotes any one else as stating that Nebuchadnezzar took it. (3.) The capture of Tyre on this occasion is not mentioned by any Greek or Roman author whose writings are now in existence. (4.) In the time of Jerome it was distinctly stated by some of his contemporaries that they had read, amongst other histories on this point, histories of Greeks and Phœnicians, and especially of Nicolaus Damascenus, in which nothing was said of the siege of Tyre by the Chaldees;[a] and Jerome, in noticing this fact, does not quote any authority of any kind for a counter-statement, but contents himself with a general allegation that many facts are related in the Scriptures which are not found in Greek works, and that "we ought not to acquiesce in the authority of those whose perfidy and falsehood we detest" (see *Comment. ad Ezechielem*, xxvi. 7). On this view of the question there would seem to be small reason for believing that the city was actually captured, were it not for another passage of Jerome in his Commentaries on the passage of Ezekiel already quoted (xxix. 18), in which he explains that the meaning of Nebuchadnezzar's having received no wages for his warfare against Tyre is, not that he failed to take the city, but that the Tyrians had previously removed everything precious from it in ships, so that when Nebuchadnezzar entered the city he found nothing there. This interpretation has been admitted by one of the most distinguished critics of our own day (Ewald, *Die Propheten des Alten Bundes*, ad loc.), who, deeming it probable that Jerome had obtained the information from some historian whose name is not given, accepts as historical this account of the termination of the siege. This account, therefore, as far as inquirers of the present day are concerned, rests solely on the authority of Jerome; and it thus becomes important to ascertain the principles and method which Jerome adopted in writing his Commentaries. It is peculiarly fortunate that Jerome himself has left on record some valuable information on this point in a letter to Augustine, for the understanding of which the following brief preliminary explanation will be sufficient: In Jerome's Commentaries on the second chapter of the Epistle to the Galatians, when adverting to the passage (vv. 11–14) in which St. Paul states that he had withstood Peter to the face, "because he was to be

[a] Hengstenberg (*De Rebus Tyriorum*, p. 75) says that this silence of the Greek and Phœnician historians proves too much, as there is no doubt that the city was besieged by Nebuchadnezzar. To this Hitzig replies, that the historians could only have omitted to mention the siege, because the siege had not been followed by the capture of the city (*Der Prop. net Jesaia* p. 278).

Digitized by Google

blamed" for requiring Christians to comply with the observances of the Jewish ritual law, Jerome denies that there was any real difference of opinion between the two Apostles, asserts that they had merely made a preconcerted arrangement of *apparent* difference, in order that those who approved of circumcision might plead the example of Peter, and that those who were unwilling to be circumcised might extol the religious liberty of Paul. Jerome then goes on to say that "the fact of simulation being useful, and occasionally permissible, is taught by the example of Jehu king of Israel, who never would have been able to put the priests of Baal to death unless he had feigned willingness to worship an idol, saying, 'Ahab served Baal a little, but Jehu shall serve him much.'" On this Augustine strongly remonstrated with Jerome in two letters which are marked 56 and 67 in Jerome's Correspondence. To these Jerome returned an answer in a letter marked 112, in which he repudiates the idea that he is to be held responsible for all that is contained in his Commentaries, and then frankly confesses how he composed them. Beginning with Origen, he enumerates several writers whose Commentaries he had read, specifying amongst others, Laodicenus, who had lately left the Church, and Alexander, an old heretic. He then avows that having read them all he sent for an amanuensis, to whom he dictated sometimes his own remarks, sometimes those of others, without paying strict attention either to the order or the words, and sometimes not even to the meaning. "Itaque ut simpliciter fatear, legi hæc omnia, et in mente meâ plurima congervans, accito notario, vel mea, vel aliena dictavi, nec ordinis, nec verborum, interdum nec sensuum memor" (see Migne's Edition of Jerome, vol. i. p. 918). Now if the bearing of the remarks concerning simulation for a pious purpose, and of the method which Jerome followed in the composition of his Commentaries is seriously considered, it cannot but throw doubt on his uncorroborated statements in any case wherein a religious or theological interest may have appeared to him to be at stake.

Jerome was a very learned man, perhaps the most learned of all the Fathers. He was also one of the very few among them who made themselves acquainted with the Hebrew language, and in this, as well as in other points, he deserves gratitude for the services which he has rendered to Biblical literature. He is, moreover, a valuable witness to facts, when he can be suspected of no bias concerning them, and especially when they seem contrary to his religious prepossessions. But it is evident, from the passages in his writings above quoted, that he had not a critical mind, and that he can scarcely be regarded as one of those noble spirits who prefer truth to supposed pious ends which may be attained by its violation. Hence, contrary to the most natural meaning of the prophet Ezekiel's words (xxix. 18), it would be unsafe to rely on Jerome's sole authority for the statement that Nebuchadnezzar and his army eventually captured Tyre.

*Literature.* — For information on this head, see PHŒNICIANS, vol. iii. p. 2522. In addition to the works there mentioned, see Robinson's *Bibl. Res.* ii. 461–471; Stanley's *Sinai and Palestine*, 264–268; Porter's *Handbook for Syria and Palestine*, pp. 390–396; Hengstenberg, *De Rebus Tyriorum*, Berlin, 1832; and Ritter's *Erdkunde*, vol. xvii. 1st part, 3d book, pp. 320–379. Professor Robinson, in addition to his instructive history of Tyre, has published, in the Appendix to his third volume, detailed list, which is useful for the knowledge of Tyre, of works by authors who had themselves travelled or resided in Palestine. See likewise an excellent account of Tyre by Gesenius in his *Jesaia*, i. 707–719, and by Winer, *s. v.*, in his *Bibl. Realwört.* [TYRIANS; TYRUS.] E. T.

Coin of Tyre.

* In 2 Sam. v. 11, and 1 Chr. xiv. 1, we are told that Hiram king of Tyre sent cedar wood, and carpenters, and masons to David, to build him a palace; and, subsequently, that he sent materials and workmen to Solomon to build the Temple (1 K. v. 10; 2 Chr. ii. 14, 16). A striking confirmation of this amity between Hiram and the Hebrew kings has lately been brought to light. Certain writings or marks have been found on the bottom rows of the wall at the southeast angle of the Haram area, near where the ancient Temple must have stood, at the depth of about 90 feet, where the foundations lie on the limerock itself. Mr. E. Deutsch, of the British Museum, who has examined these stones on the ground, decides (1) that these signs were cut or painted on the stones when they were laid in their present places; (2) that they do not represent any inscription; and (3) that that they are certainly Phœnician. That they are Phœnician marks is beyond question, because they agree with those found on primitive substructions in the harbor of Sidon. It is certainly remarkable that Phœnician letters or etchings should be found on these stones at Jerusalem, thus suddenly brought to light; and the best explanation of the fact is that they were placed there by the Tyrian architects whom Hiram sent to Jerusalem to assist in the erection of the Temple.[a] The precise value of the characters is not yet determined, but no doubt they were designed to guide the workmen in placing the stones in their proper position, or in cutting and shaping them so as to have them properly adjusted to each other (See *Quart. Statem. of Pal. Explor. Fund*, No. ii. 1869).

The N. T. references to Tyre are few, but interesting. The Saviour performed some of his miracles in the vicinity (Matt. xv. 21; Mark vii. 24). The Saviour's apostrophe to Chorazin and Bethsaida represents the inhabitants of these cities as more wicked than those of Tyre and Sidon, on account of the misuse of opportunities which the latter did not enjoy (Matt. xi. 20; Luke x. 13). The disciples who went to Phœnice after the death of Stephen undoubtedly made known the Gospel there (Acts xi. 19). Paul, on his last journey to

[a] * We state the point in this manner because there is room for the question, whether the Hebrews had a distinct written character thus early and may not have used at that period one common to them selves and the Phœnicians and other kindred tribes E.

Jerusalem, went on shore at Tyre and sought out (ἀνεύροντες) the disciples in that city. The prophets there attempted, in vain, to dissuade him from going up to Jerusalem. The touching scene of the farewell on the beach (Acts xxi. 5) forms a memorable passage in Paul's history. Luke describes the occurrence with autoptic precision. His word αἰγιαλός (a smooth shore, — cf. Acts xxvii. 39 as distinguished from one rocky, precipitous, — on which they kneeled down), is the proper one for the level, sandy beach on both the northern and southern sides of Tyre. Paul's company reëmbarked at this point, and sailed thence to Ptolemais where they finished the voyage (Acts xxi. 7). H.

• **TYRIANS** (Τύριοι: *Tyrii*), inhabitants of Tyre, Ezek. xlvi. 18. The Heb. צֹרִים, צֹרְיִים, LXX. Τύριος, Τύριοι, variously rendered "of Tyre," "men of Tyre," and "they of Tyre" or "Tyrus," also occur 1 K. vii. 14; 1 Chr. xxii. 4; 2 Chr. ii. 14; Ezr. iii. 7; Neh. xiii. 16; 1 Esdr. v. 55; 2 Macc. iv. 49. [TYRE.] A.

• **TYROPŒ'ON, THE** (ἡ τῶν Τυροποιῶν φάραγξ = *the Valley of the Cheesemongers*). This valley was an important feature in the ancient topography of Jerusalem, running from the plateau on the north to the fountain of Siloam, dividing the southern part of the city into two high and steep ridges, making it a double promontory. Although immense quantities of rubbish had accumulated in it, almost filling its upper part, Professor Robinson was able to point out its general course. His theory, demanded by the specifications of Josephus, that it curved around the northern brow of the southwest hill, was warmly disputed by some writers; but subsequent investigations have established its correctness. It has long been known that the most interesting part of Jerusalem was subterranean, and some of Capt. Warren's most valuable recent explorations have been in this valley He has sunk shafts in it to depths of between 50 and 80 feet, going down to its rocky bed, in which he found drains and reservoirs cut, and tracing the foundations of the west Haram wall for several hundred feet. Opposite Robinson's Arch, on the other side of the valley, he found the other pier of the massive bridge which once spanned it, leading from the Temple to the upper city; and sixty feet below the present surface he found some of the ruins of the bridge itself. Further north he discovered the ruins of another similar bridge, built later, as he thinks, and, also, an ancient gateway in the western Haram wall — all now covered with the *débris* of thousands of years." S. W.

**TYRUS** [צוֹר: Τύρος, exc. Ez. xxvi., xxvii., Ζόρ, 2 Macc. iv. 49, Τύριοι: *Tyrus, Tyrii*]. This form is employed in the A. V. of the books of Jeremiah, Ezekiel, Hosea (Joel has "Tyre"), Amos, Zechariah, 2 Esdras, Judith, and the Maccabees, as follows: Jer. xxv. 22, xxvii. 3, xlvii. 4; Ez. xxvi. 2, 3, 4, 7, 15, xxvii. 2, 3, 8, 32, xxviii. 2, 12, xxix. 18; Hos. ix. 13; Am. i. 9, 10; Zech. ix. 2, 3; 2 Esdr. i. 11; Jud. ii. 28; 1 Macc. v. 15; 2 Macc. iv. 18, 32, 44, 49.

• **TYRUS, THE LADDER OF** (ἡ κλίμαξ Τύρου; Joseph. κλίμαξ Τυρίων: *termini Tyri*), 1 Macc. xi. 59, is described by Josephus (*B. J.* ii. 10, § 2) as a high mountain on the coast of Palestine, 100 stadia north of Ptolemais (Accho, Acre, *Akka*). It is the modern *Rås en-Nâkûrah*, a bluff promontory, about half-way between Ptolemais and Tyre, forming the northern limit of the Plain of Acre, as Carmel is the southern, but, as Dean Stanley remarks (*S. & P.* p. 264, 3d ed.), it "differs from Carmel in that it leaves no beach between itself and the sea, and thus, by cutting off all communication round its base, acts as the natural barrier between the bay of Acre and the maritime plain to the north — in other words, between Palestine and Phœnicia." [a] See also Ritter, *Erdk.* xvi. 809, 813, 815; Rob. *Phys. Geog.* p. 21; Neubauer, *Géog. du Talmud*, p. 89. A.

• **TZADDI**, one of the Hebrew letters. [WRITING.] H.

# U.

**U'CAL** (אֻכָל, and in some copies אֶכָל [see below]). According to the received text of Prov. xxx. 1, Ithiel and Ucal must be regarded as proper names, and if so, they must be the names of disciples or sons of Agur the son of Jakeh, an unknown sage among the Hebrews. But there is great obscurity about the passage. The LXX. translate τοῖς πιστεύουσι θεῷ καὶ πάνομαι: the Vulgate, *cum quo est Deus, et qui Deo secum morante confortatus*. The Arabic follows the LXX. to some extent; the Targum reproduces Ithiel and Ucal as proper names, and the Syriac is corrupt, Ucal being omitted altogether. Luther represents the names as *Leithiel* and *Uchal*. De Wette regards them as proper names, as do most translators and commentators. Junius explains both as referring to Christ. The LXX. probably read לְאֵמוֹנִי. אֵל וָאֵכָל. The Veneto-Greek has καὶ συνήσομαι = וְאָבִין. Cocceius must have pointed the words thus, לְאִיתִי אֵל וָאֻכָל, "I have labored for God and have obtained," and this, with regard to the first two words must have been the reading of J. D. Michaelis, who renders, "I have wearied myself for God, and have given up the investigation," applying the words to a man who had bewildered himself with philosophical speculations about the Deity, and had been compelled to give up the search. Bertheau also (*Die Sprüche Sal.* Einl. xvii.) sees in the words, "I have wearied myself for God, I have wearied myself for God, and have fainted" (וָאֻכָל), an appropriate commencement to the series of proverbs which follow. Hitzig's view is substantially the same, except that he points the last word וָאֻכָל and renders, "and I became dull;" applying it to the dimness which the investigation produced upon the eye of the mind (*Die Spr. Sal.* p. 316). Bunsen (*Bibelwerk*, i. p. clxxx.) follows Bertheau's punctuation, but regards לְאִיתִי אֵל on its first occurrence as a symbolical name of the speaker. "The saying of the man 'I-have-wearied-myself-for-God;' I have wearied myself for God, and have fainted away." There is, however, one fatal objection to this view, if there were no others, and that is, that the verb לאה, "to be wearied," nowhere takes after it the

[a] • Stanley suggests (*S. & P.* p. 266 note) that both this promontory and the *Rås el-Abyad*, or White Cape, are comprised under the name of "Scala Tyriorum. A

Digitized by Google

accusative of the object of weariness. On this account alone, therefore, we must reject all the above explanations. If Bertheau's pointing be adopted, the only legitimate translation of the words is that given by Dr. Davidson (*Introd.* ii. 338), "I am weary, O God, I am weary, O God, and am become weak." Ewald considers both Ithiel and Ucal as symbolical names, employed by the poet to designate two classes of thinkers to whom he addresses himself, or rather he combines both names in one, "God-with-me-and-I-am-strong," and bestows it upon an imaginary character, whom he introduces to take part in the dialogue. The name 'God-with-me,' says Keil (Hävernick, *Einl.* iii. 412), "denotes such as gloried in a more intimate communion with God, and a higher insight and wisdom obtained thereby," while "I-am-strong" indicates "the so-called strong spirits who boast of their wisdom and might, and deny the holy God, so that both names most probably represent a class of freethinkers, who thought themselves superior to the revealed law, and in practical atheism indulged the lusts of the flesh." It is to be wished that in this case, as in many others, commentators had observed the precept of the Talmud, "Teach thy tongue to say, 'I do not know.'" W. A. W.

**U'EL** (אוּאֵל [*will of God*, Ges.]: Οὐήλ; [Vat. Θυηλ, and so FA., joined with preceding word:] *Uel*). One of the family of Bani, who during the Captivity had married a foreign wife (Ezr. x. 34). Called JUEL in 1 Esdr. ix. 34.

**U'KNAZ** (יְקוּנָז [prob. *chase, hunting*]: Κενέζ: *Cenez*). In the margin of 1 Chr. iv. 15 the words "even Kenaz" in the text are rendered "Uknaz," as a proper name. Apparently some name has been omitted before Kenaz, for the clause begins "and the *sons* of Elah," and then only KENAZ is given. Both the LXX. and Vulg. omit the conjunction. In the Peshito-Syriac, which is evidently corrupt, Kenaz is the third son of Caleb the son of Jephunneh. [He may have been at least a descendant of Caleb's, according to 1 Chr. iv. 15.]

**U'LAI** [2 syl.] (אוּלָי [Pehlvi, *pure water*, Fürst]: [Theodot.] Οὐβδάλ; [LXX. Οὐλαΐ:] *Ulai*) is mentioned by Daniel (viii. 2, 16) as a river near to Susa, where he saw his vision of the ram and the he-goat. It has been generally identified with the Eulæus of the Greek and Roman geographers (Marc. Heracl. p. 18; Arr. *Exp. Al.* vii. 7; Strab. xv. 3, § 22; Ptol. vi. 3; Pliny, *H. N.* vi. 31), a large stream in the immediate neighborhood of that city. This identification may be safely allowed, resting as it does on the double ground of close verbal resemblance in the two names, and complete agreement as to the situation.

Can we, then, identify the Eulæus with any existing stream? Not without opening a controversy, since there is no point more disputed among comparative geographers. The Eulæus has been by many identified with the Choaspes, which is undoubtedly the modern *Kerkhah*, an affluent of the Tigris, flowing into it a little below *Kurnah*. By others it has been regarded as the *Kuran*, a large river, considerably further to the eastward, which enters the *Khor Bamishir* near *Mohammerah*. Some have even suggested that it may have been the *Shapur* or *Sha'ur*, a small stream which rises a few miles N. W. of Susa, and flows by the ruins into the *Disful* stream, an affluent of the *Kuran*.

The general grounds on which the Eulæus has been identified with the Choaspes, and so with the *Kerkhah* (Salmasius, Rosenmüller, Wahl, Kitto etc.) are, the mention of each separately by ancient writers as "the river of Susa," and (more especially) the statements made by some (Strabo, Plin.) that the water of the Eulæus, by others (Herod., Athen., Plut., Q. Curtius) that that of the Choaspes was the only water tasted by the Persian kings. Against the identification it must be noticed that Strabo, Pliny, Solinus, and Polyclitus (ap. Strab. xv. 3, § 4) regard the rivers as distinct, and that the lower course of the Eulæus, as described by Arrian (*Exp. Al.* vii. 7) and Pliny (*H. N.* vi. 26), is such as cannot possibly be reconciled with that of the *Kerkhah* river.

The grounds for regarding the Eulæus as the *Kuran* are decidedly stronger than those for identifying it with the *Kerkhah* or Choaspes. No one can compare the voyage of Nearchus in Arrian's *Indica* with Arrian's own account of Alexander's descent of the Eulæus (vii. 7) without seeing that the Eulæus of the one narrative is the Pasitigris of the other; and that the Pasitigris is the *Kuran* is almost universally admitted. Indeed, it may be said that all accounts of the *lower* Eulæus — those of Arrian, Pliny, Polyclitus, and Ptolemy — identify it, beyond the possibility of mistake, with the *lower* Kuran, and that so far there ought to be no controversy. The difficulty is with respect to the *upper* Eulæus. The Eulæus, according to Pliny, surrounded the citadel of Susa (vi. 27), whereas even the *Disful* branch of the *Kuran* does not come within six miles of the ruins. It lay to the west, not only of the Pasitigris (*Kuran*), but also of the Coprates (river of *Disful*), according to Diodorus (xix. 18, 19). So far, it might be the *Shapur*, but for two objections. The *Shapur* is too small a stream to have attracted the general notice of geographers, and its water is of so bad a character that it can never have been chosen for the royal table (*Geograph. Journ.* ix. 70). There is also an important notice in Pliny entirely incompatible with the notion that the short stream of the *Shapur*, which rises in the plain about five miles to the N. N. W. of Susa, can be the true Eulæus. Pliny says (vi. 31) the Eulæus rose in *Media*, and flowed through Mesobatene. Now this is exactly true of the upper *Kerkhah*, which rises near *Hamadan* (Ecbatana), and flows down the district of *Mahsabadan* (Mesobatene).

The result is that the various notices of ancient writers appear to identify the upper Eulæus with the upper *Kerkhah*, and the lower Eulæus (quite unmistakably) with the lower *Kuran*. Does this apparent confusion and contradiction admit of explanation and reconcilement?

A recent survey of the ground has suggested a satisfactory explanation. It appears that the *Kerkhah* once bifurcated at *Pai Pul*, about 20 miles N. W. of Susa, sending out a branch which passed east of the ruins, absorbing into it the *Shapur*, and flowing on across the plain in a S. S. E. direction till it fell into the *Kuran* at *Ahwaz* (Loftus, *Chaldæa and Susiana*, pp. 424, 425). Thus, the upper *Kerkhah* and the lower *Kuran* were in old times united, and might be viewed as forming a single stream. The name Eulæus (*Ulai*) seems to have applied most properly to the eastern branch stream from *Pai Pul* to *Ahwaz*; the stream above *Pai Pul* was sometimes called the Eulæus, but was more properly the Choaspes, which was also the

Digitized by Google

sole name of the western branch (or present course) of the *Kerkhah* from *Pai Pul* to the Tigris. The name Pasitigris was proper to the upper *Karun* from its source to its junction with the Eulæus, after which the two names were equally applied to the lower river. The *Disful* stream, which was not very generally known, was called the Coprates. It is believed that this view of the river names will reconcile and make intelligible all the notices of them contained in the ancient writers.

It follows from this that the water which the Persian kings drank, both at the court, and when they travelled abroad, was that of the *Kerkhah*, taken probably from the eastern branch, or proper Eulæus, which washed the walls of Susa, and (according to Pliny) was used to strengthen its defenses. This water was, and still is, believed to possess peculiar *lightness* (Strab. xv. 3, § 22; *Geograph. Journ.* ix. 70), and is thought to be at once more wholesome and more pleasant to the taste than almost any other. (On the controversy concerning this stream the reader may consult Kinneir, *Persian Empire*, pp. 100–106; Sir H. Rawlinson, in *Geograph. Journ.* ix. 84–93; Layard, in the same, xvi. 91–94; and Loftus, *Chaldæa and Susiana*, pp. 424–431.) G. R.

**ULAM** (אוּלָם [*porch, vestibule*]: Οὐλάμ: *Ulam*). 1. A descendant of Gilead the grandson of Manasseh, and father of Bedan (1 Chr. vii. 17).

2. (Αἰλάμ; [Vat. in ver. 40, Αιλειμ;] Alex. Ουλαμ.) The first-born of Eshek, the brother of Azel, a descendant of the house of Saul. His sons were among the famous archers of Benjamin, and with their sons and grandsons made up the goodly family of 150 (1 Chr. viii. 39, 40).

**ULLA** (עֻלָּא [*yoke*]: Ὀλά; Alex. Ωλα: *Ulla*). An Asherite, head of a family in his tribe, a mighty man of valor, but how descended does not appear (1 Chr. vii. 39). Perhaps, as Junius suggests, he may be a son of Ithran or Jether; and we may further conjecture that his name may be a corruption of Ara.

**UM'MAH** (עַמָּה [*gathering*]: [Rom. Ἀρχόβ; Vat.] Αρχαβ;[a] [Alex.] Αμμα: *Amma*). One of the cities of the allotment of Asher (Josh. xix. 30 only). It occurs in company with Aphek and Rehob; but as neither of these have been identified, no clew to the situation of Ummah is gained thereby. Dr. Thomson (*Bibl. Sacra*, 1855, p. 822, quoted by Van de Velde) was shown a place called *'Alma* in the highlands on the coast, about five miles N. N. E. of *Ras en-Nakhûra*, which is not dissimilar in name, and which he conjectures may be identical with Ummah. But it is quite uncertain. *'Alma* is described in *Land and Book*, chap. xx. G.

**UNCIRCUMCISION.** [CONCISION; CIRCUMCISION.]

**UNCLEAN MEATS.** These were things strangled, or dead of themselves, or through beasts or birds of prey; whatever beast did not both part the hoof and chew the cud; and certain other smaller animals rated as "creeping things"[b] (שֶׁרֶץ); certain classes of birds[c] mentioned in Lev. xi. and Deut. xiv. twenty or twenty-one in all; whatever in the waters had not both fins and scales; whatever winged insect had not besides four legs the two hind-legs for leaping;[d] besides things offered in sacrifice to idols; and all blood or whatever contained it (save perhaps the blood of fish, as would appear from that only of beast and bird being forbidden, Lev. vii. 26), and therefore flesh cut from the live animal; as also all fat, at any rate that disposed in masses among the intestines, and probably wherever discernible and separable among the flesh (Lev. iii. 14–17, vii. 23). The eating of blood was prohibited even to "the stranger that sojourneth among you" (Lev. xvii. 10, 12, 13, 14), an extension which we do not trace in other dietary precepts; *e. g.* the thing which died of itself was

---

[a] This looks at first sight like a misplacement of the name Rechob from its proper position further on in the verse. Rechob, however, is usually Ῥαάβ.

[b] Lev. xi. 29–30 forbids eating the weasel, the mouse, the tortoise, the ferret, the chameleon, the lizard, the snail, and the mole. The LXX. has, in place of the tortoise, the κροκόδειλος ὁ χερσαῖος, and instead of the snail (put before the lizard, σαῦρα), the χαλαβώτης.

[c] In the LXX. of Lev. xi. 14, two birds only are mentioned, τὸν γύπα καὶ τὸν ἰκτῖνον, and in the parallel passage of Deut. xiv. 13 the same two; but in the Heb. of the latter passage only our present text has *three* birds' names. It is therefore probable that one of these, רָאָה, rendered "glede" by the A. V., is a mere corruption of דָּאָה, found both in Deut. and in Lev., for which the LXX. gives γύψ, and the Vulgate *Milvius*. So Maimon. took it (Bochart, *Hieroz.* ii. 33, 353). Thus we have twenty birds named as unclean, alike in the Heb. and in the LXX. of Lev. xi. 13–19, and of many of these the identification is very doubtful. Bochart says (p. 354), "nomina avium immundarum recensens Maimon., interpretari ne conatus quidem est. In the Heb. of Deut. xiv. we have, allowing for the probable corruption of one name, the same twenty, but in the LXX. only nineteen; "every raven after his kind" (πάντα κόρακα κατὰ τὰ ὅμοια αὐτῷ), of Lev. being omitted, and the other names, although the same as those of Lev., yet having a different order and grouping after the first eight. Thus Lev. xi. 17, consists of the three, καὶ νυκτικόρακα, καὶ καταράκτην, καὶ ἶβιν; whereas Deut. xiv. 16, which should correspond, contains καὶ ἀρωδιόν, καὶ κύκνον, καὶ ἶβιν. Also the ἔποψ, "hoopoe," and the πορφυρίων, "coot," figure in both the LXX. lists.

[d] In Lev. xi. 21 the *Keri* has לְמַעְלָה, against the לְמִמַּעַל of the *Cethib*. It is best to adopt the former and view the last part of the verse as constituting a class that may be eaten from among a larger doubtful class of "flying creeping-things," the *differentia* consisting in their having four feet, and a pair of hind-legs to spring with. The A. V. is here obscure. "All fowls that creep," and "every flying creeping thing," standing in Lev xi. 20, 21 for precisely the same Heb. phrase, rendered by the LXX τὰ ἑρπετὰ τῶν πετεινῶν; and "legs *above* their feet to leap," not showing that the *distinct* larger springing legs of the locust or *cicada* are meant; where the Heb. מִמַּעַל, and LXX. ἀνώτερον seem to express the upward projection of these legs above the creature's back. So Bochart takes it (p. 452), who also prefers לִר in the reading above given; "ita enim Hebræi omnes;" and so, he adds, the Samar. Pent. He states that locusts are salted for food in Egypt (iv. 7, 491, 492; comp. Hasselquist, 231–233). The edible class is enumerated in four species No precept is found in Deut. relating to these.

Digitized by Google

to be given "unto the stranger that is in thy gates" (Deut. xix. 21). As regards blood, the prohibition indeed dates from the declaration to Noah against "flesh with the life thereof which is the blood thereof," in Gen. ix. 4, which was perhaps regarded by Moses as still binding upon all Noah's descendants. The grounds, however, on which the similar precept of the Apostolic Council, in Acts xv. 20, 21, appears based, relate not to any obligation resting still unbroken on the Gentile world, but to the risk of promiscuous offense to the Jews and Jewish Christians, "*for* Moses of old time hath in every city them that preach him." Hence this abstinence is reckoned amongst "necessary things" (τὰ ἐπάναγκες), and "things offered to idols," although not solely, it may be presumed, on the same grounds, are placed in the same class with "blood and things strangled" (ἀπέχεσθαι εἰδωλοθύτων καὶ αἵματος καὶ πνικτοῦ, vv. 28, 29). Besides these, we find the prohibition twice recurring against "seething a kid in its mother's milk." It is added, as a final injunction to the code of dietary precepts in Deut. xiv., after the crowning declaration of ver. 21, "*for* thou art an holy people unto the Lord thy God;" but in Ex. xxiii. 19, xxxiv. 26, the context relates to the bringing first-fruits to the altar, and to the "Angel" who was to "go before" the people. To this precept we shall have occasion further to return.

The general distinction of clean and unclean is rightly observed by Michaelis (*Smith's Translation*, Art. ccii. etc.) to have its parallel amongst all nations, there being universally certain creatures regarded as clean, i. e. fit for food, and the rest as the opposite (comp. Lev. xi. 47). With the greater number of nations, however, this is only a traditional usage based merely perhaps either on an instinct relating to health, or on a repugnance which is to be regarded as an ultimate fact in itself, and of which no further account is to be given. Thus Michaelis (as above) remarks that in a certain part of Germany rabbits are viewed as unclean, i. e. are advisedly excluded from diet. Our feelings as regards the frog and the snail, contrasted with those of continentals, supply another close parallel. Now, it is not unlikely that nothing more than this is intended in the distinction between "clean" and "unclean" in the directions given to Noah. The intention seems to have been that creatures recognized, on whatever ground, as unfit for human food, should not be preserved in so large a proportion as those whose number might be diminished by that consumption. The dietary code of the Egyptians, and the traditions which have descended amongst the Arabs, unfortified, certainly down to the time of Mohammed, and in some cases later, by any legislation whatever, so far as we know, may illustrate the probable state of the Israelites. If the Law seized upon such habits as were current among the people, perhaps enlarging their scope and range, the whole scheme of tradition, instinct, and usage so enlarged might become a ceremonial barrier, having relation at once to the theocratic idea, to the general health of the people, and to their separateness as a nation.

The same personal interest taken by Jehovah in his subjects, which is expressed by the demand for a ceremonially pure state on the part of every Israelite as in covenant with Him, regarded also this particular detail of that purity, namely, diet. Thus the prophet (Is. lxvi. 17), speaking in His name, denounces those that "sanctify themselves (consecrate themselves to idolatry), eating swine's flesh, and the abomination, and the mouse," and those "which remain among the graves and lodge in the monuments, which eat swine's flesh, and broth of abominable things is in their vessels" (lxv. 4). It remained for a higher Lawgiver to announce that "there is nothing from without a man that entering into him can defile him" (Mark vii. 15). The fat was claimed as a burnt-offering and the blood enjoyed the highest sacrificial esteem. In the two combined the entire victim was by representation offered, and to transfer either to human use was to deal presumptuously with the most holy things. But, besides this, the blood was esteemed as "the life" of the creature, and a mysterious sanctity beyond the sacrificial relation thereby attached to it. Hence we read, "whatsoever soul it be that eateth any manner of blood, even that soul shall be cut off from his people" (Lev. vii. 27, comp. xvii. 10, 14). Whereas the offender in other dietary respects was merely "unclean until even" (xi. 40, xvii. 15).

Blood was certainly drunk in certain heathen rituals, especially those which related to the solemnization of a covenant, but also as a pledge of idolatrous worship (Ps. xvi. 4; Ex. xxxiii. 25). Still there is no reason to think that blood has ever been a common article of food, and any lawgiver might probably reckon on a natural aversion effectually fortifying his prohibition in this respect, unless under some bewildering influence of superstition. Whether animal qualities, grosser appetites, and inhuman tendencies might be supposed by the Hebrews transmitted into the partaker of the blood of animals, we have nothing to show: see, however, Josephus, *Ant.* iii. 11, § 2.

It is noteworthy that the practical effect of the rule laid down is to exclude all the *carnivora* among quadrupeds, and, so far as we can interpret the nomenclature, the *raptores* among birds. This suggests the question whether they were excluded as being not averse to human carcases, and in most eastern countries acting as the servitors of the battle-field and the gibbet. Even swine have been known so to feed; and, further, by their constant runcation among whatever lies on the ground, suggest impurity, even if they were not generally foul feeders. Amongst fish those which were allowed contain unquestionably the most wholesome varieties, save that they exclude the oyster. Probably, however, sea-fishing was little practiced by the Israelites; and the Levitical rules must be understood as referring backwards to their experience of the produce of the Nile, and forwards to their enjoyment of the Jordan and its upper lakes. The exclusion of the camel and the hare from allowable meats is less easy to account for, save that the former never was in common use, and is generally spoken of in reference to the semi-barbarous desert tribes on the eastern or southern border land, some of whom certainly had no insuperable repugnance to his flesh;[a] although it is so impossible to substitute any other creature for the camel as the "ship of the desert," that to eat him, especially where so many other creatures give meat so much preferable, would be the worst econ

[a] The camel, it may be observed, is the creature also near the line of separation, for the foot is partially cloven but incompletely so, and he is also ruminant.

Digitized by Google

any possible in an eastern commissariat — that of destroying the best, or rather the only conveyance, in order to obtain the most indifferent food. The hare[a] was long supposed, even by eminent naturalists,[b] to ruminate, and certainly was eaten by the Egyptians. The horse and ass would be generally spared, from similar reasons to those which exempted the camel. As regards other cattle, the young males would be those universally preferred for food, no more of that sex reaching maturity than were needful for breeding, whilst the supply of milk suggested the copious preservation of the female. The duties of draught would require another rule in rearing neat-cattle. The laboring steer, man's fellow in the field, had a life somewhat ennobled and sanctified by that comradeship. Thus it seems to have been quite unusual to slay for sacrifice or food, as in 1 K. xix. 21, the ox accustomed to the yoke. And perhaps in this case, as being tougher, the flesh was not roasted but boiled. The case of Araunah's oxen is not similar, as cattle of all ages were useful in the threshing-floor (2 Sam. xxiv. 22). Many of these restrictions must be esteemed as merely based on usage, or arbitrary. Practically the law left among the allowed meats an ample variety, and no inconvenience was likely to arise from a prohibition to eat camels, horses, and asses. Swine, hares, etc., would probably as nearly as possible be exterminated in proportion as the law was observed, and their economic room filled by other creatures. Wunderbar (*Biblisch-Talm. Medicin*, part ii. p. 50) refers to a notion that "the animal element might only with great circumspection and discretion be taken up into the life of man, in order to avoid debasing that human life by assimilation to a brutal level, so that thereby the soul might become degraded, profaned, filled with animal affections, and disqualified for drawing near to God." He thinks also that we may notice a meaning in "the distinction between creatures of a higher, nobler, and less intensely animal organization as clean, and those of a lower and incomplete organization as unclean," and that the insects provided with four legs and two others for leaping are of a higher or more complete type than others, and relatively nearer to man. This seems fanciful, but may nevertheless have been a view current among Rabbinical authorities. As regards birds, the *raptores* have commonly tough and indigestible flesh, and some of them are in all warm countries the natural scavengers of all sorts of carrion and offal. This alone begets an instinctive repugnance towards them, and associates them with what was beforehand a defilement. Thus to kill them for food would tend to multiply various sources of uncleanness.[c] Porphyry (*Abstin.* iv. 7, quoted by Winer) says that the Egyptian priests abstained from all fish, from all quadrupeds with solid hoofs, or having claws, or which were not horned, and from all carnivorous birds. Other curious parallels have been found amongst more distant nations.[d]

But as Orientals have minds sensitive to teaching by types, there can be little doubt that such ceremonial distinctions not only tended to keep Jew and Gentile apart, but were a perpetual reminder to the former that he and the latter were not on one level before God. Hence, when that economy was changed, we find that this was the very symbol selected to instruct St. Peter in the truth that God was not a "respecter of persons." The vessel filled with "fourfooted beasts of the earth, and wild beasts, and creeping things, and fowls of the air," was expressive of the Gentile world, to be put now on a level with the Israelite, through God's "purifying their hearts by faith." A sense of this their prerogative, however dimly held, may have fortified the members of the privileged nation in their struggle with the persecutions of the Gentiles on this very point. It was no mere question of which among several means of supporting life a man chose to adopt, when the persecutor dictated the alternative of swine's flesh or the loss of life itself, but whether he should surrender the badge and type of that privilege by which Israel stood as the favored nation before God (1 Macc. i. 63, 64; 2 Macc. vi. 18, vii. 1). The same feeling led to the exaggeration of the Mosaic regulations, until it was "unlawful for a man that was a Jew to keep company with or come unto one of another nation" (Acts x. 28); and with such intensity were badges of distinction cherished, that the wine, bread, oil, cheese, or anything cooked by a heathen,[e] were declared unlawful for a Jew to eat. Nor was this strictness, however it might at times be pushed to an absurdity, without foundation in the nature of the case. The Jews, as, during and after the return from Captivity, they found the avenues of the world opening around them, would find their intercourse with Gentiles unavoidably increased, and their only way to avoid an utter relaxation of their code would lie in somewhat overstraining the precepts of prohibition. Nor should we omit the tendency of those who have no scruples to "despise" those who have, and to parade their liberty at the expense of these latter, and give piquancy to the contrast by wanton tricks, designed to beguile the Jew from his strictness of observance, and make him unguardedly partake of what he abhorred, in order to heighten his confusion by derision. One or two instances of such amusement at the Jew's expense would

---

[a] The שָׁפָן, "coney," A. V., Lev. xi. 5; Deut. xiv. 7; Ps. civ. 18; Prov. xxx. 26, is probably the jerboa.

[b] See a correspondence on the question in *The Standard* and most other London newspapers, April 2d, 1868.

[c] Bochart (*Hieroz.* ii. 33, 355, i. 43) mentions various symbolical meanings as conveyed by the precepts regarding birds: "Aves rapaces prohibuit ut a rapinâ averteret, nocturnas, ut abjecerent opera tenebrarum et se proderent lucis filios, lacustres et riparias, quarum victus est impurissimus, ut ab omni immunditiâ eos arceret. Struthionem denique, qui a terrâ non attollitur, ut terrenis relictis ad ea tenderent quæ sursum sunt. Quæ interpretatio non nostra est sed veterum." He refers to Barnabas, *Epist.* x.; Clemens Alex. *Strom.* v.; Origen, *Homil. in Levit*; Novatian *De Cibis Judaic.* cap. iii.; Cyril. *contra Julian.* lib. ix.

[d] Winer refers to Von Bohlen (*Genesis*, p. 88) as finding the origin of the clean and unclean animals in the Zendavesta, in that the latter are the creation of Ahriman, whereas man is ascribed to that of Ormusd. He rejects, however, and quite rightly, the notion that Persian institutions exercised any influence over Hebrew ones at the earliest period of the latter, and connects it with the efforts of some "den Pentateuch recht jung und die Ideen des Zendavesta recht' alt zu machen." See UNCLEANNESS for other resemblances between Persian and Hebrew ritual.

[e] Winer also refers to *Aboda Zara*, ii. 2-6, v. 2 Ittinger, *Leg. Aeth.*, pp. 117, 141.

Digitized by Google

drive the latter within the entrenchments of an universal repugnance and avoidance, and make him seek the safe side at the cost of being counted a churl and a bigot. Thus we may account for the refusal of the "king's meat" by the religious captives (Dan. i. 8), and for the similar conduct recorded of Judith (xii. 2) and Tobit (Tob. i. 11); and in a similar spirit Shakespeare makes Shylock say, "I will not eat with you, drink with you, nor pray with you" (*Merchant of Venice*, Act i. Sc. iii.). As regards things offered to idols, all who own one God meet on common ground; but the Jew viewed the precept as demanding a literal objective obedience, and had a holy horror of even an unconscious infraction of the Law: hence, as he could never know what had received idolatrous consecration, his only safety lay in total abstinence; whereas St. Paul admonishes the Christian to abstain, "for his sake that showed it and for conscience' sake," from a thing said to have been consecrated to a false god, but not to parade his conscientious scruples by interrogating the butcher at his stall or the host in his guest-chamber (1 Cor. x. 25–29), and to give opposite injunctions would doubtless in his view have been "compelling the Gentiles to live as did the Jews" (*Ἰουδαΐζειν*, Gal. ii. 14).

The prohibition to "seethe a kid in his mother's milk" has caused considerable difference of opinion amongst commentators. Michaelis (Art. ccx.) thought it was meant merely to encourage the use of olive oil instead of the milk or butter of an animal, which we commonly use in cookery, where the Orientals use the former. This will not satisfy any mind by which the clew of symbolism, so blindly held by the eastern devotee, and so deeply interwoven in Jewish ritual, has been once duly seized. Mercy to the beasts is one of the undercurrents which permeate that Law. To soften the feelings and humanize the character was the higher and more general aim. When St. Paul, commenting on a somewhat similar precept, says, "Doth God care for oxen, or saith He it altogether for *our* sakes?" he does not mean to deny God's care for oxen, but to insist the rather on the more elevated and more human lesson. The milk was the destined support of the young creature: viewed in reference to it, the milk was its "life," and had a relative sanctity resembling that of the forbidden blood (comp. Juv. xi. 68, "qui plus lactis habet quam sanguinis," speaking of a kid destined for the knife). No doubt the abstinence from the forbidden action, in the case of a young creature already dead, and a dam unconscious probably of its loss, or whose consciousness such an use of her milk could in nowise quicken, was based on a sentiment merely. But the practical consequence, that milk must be foregone or elsewhere obtained, would prevent the sympathy from being an empty one. It would not be the passive emotion which becomes weaker by repetition, for want of an active habit with which to ally itself. And thus its operation would lie in indirectly quickening sympathies for the brute creation at all other times. The Talmudists took an extreme view of the precept, as forbidding generally the cooking of flesh in milk (Mishna, *Chollin*, viii.; Hottinger, *Leg. Hebr.* pp. 117, 141, quoted by Winer).

It remains to mention the sanitary aspect of the case. Swine are said to be peculiarly liable to disease in their own bodies. This probably means that they are more easily fed than other creatures to the foul feeding which produces it; and when the average heat is great, decomposition rapid, and malaria easily excited, this tendency in the animal is more mischievous than elsewhere. A *meezel* or *mezel*, from whence we have "measled pork," is the old English word for a "leper," and it is asserted that eating swine's flesh in Syria and Egypt tends to produce that disorder (Bartholini, *De Morbis Bibl.* viii.; Wunderbar, p. 51). But there is an indefiniteness about these assertions which prevents our dealing with them scientifically. *Meezel* or *mezel* may well indeed represent "leper," but which of all the morbid symptoms classed under that head it is to stand for, and whether it means the same, or at least a parallel disorder, in man and in pig, are indeterminate questions. [LEPER.] The prohibition on eating fat was salubrious in a region where skin diseases are frequent and virulent, and that on blood had, no doubt, a similar tendency. The case of animals dying of themselves needs no remark: the mere wish to insure avoiding disease, in case they had died in such a state, would dictate the rule. Yet the beneficial tendency is veiled under a ceremonial difference, for the "stranger" dwelling by the Israelite was allowed it, although the latter was forbidden. Thus is their distinctness before God, as a nation, ever put prominently forward, even where more common motives appear to have their turn. As regards the animals allowed for food, comparing them with those forbidden, there can be no doubt on which side the balance of wholesomeness lies. Nor would any dietetic economist fail to pronounce in favor of the Levitical dietary code as a whole, as insuring the maximum of public health, and yet of national distinctness, procured, however, by a minimum of the inconvenience arising from restriction.

Bochart's *Hierozoicon*; Forskål's *Descriptiones Animalium, etc., quæ in Itinere Orientali observavit*, with his *Icones Rerum Naturalium*, and Rosenmüller's *Handbuch der Bibl. Alterthumskunde*, vol. iv., *Natural History*, may be consulted on some of the questions connected with this subject; also more generally, Moses Maimonides, *De Cibis Vetitis*: Reinhard, *De Cibis Hebræorum Prohibitis*.

H. H.

* The distinction between clean and unclean animals was divinely recognised, apparently as already familiar among men, before the Flood (Gen. vii. 2). Animal food, on the other hand, was first permitted to man after the Flood (Gen. ix. 3, cf. i. 29 and vi. 21); and that permission was couched in the most general terms without reference to clean or unclean. It is plain, therefore, that the basis of the distinction must be sought elsewhere than in the fitness or unfitness of the various animals to be used for food. Indeed some more satisfactory way of accounting for human customs in regard to this use itself seems desirable than merely tradition, or sanitary instinct, or sentiment. Such a basis both for the original distinction, and also for the difference in regard to the use of animals for food seems to be furnished by the fact that immediately after the Flood Noah offered in sacrifice "of every clean beast and of every clean fowl" (Gen. viii. 20) There must then have already existed a recognised distinction among animals of clean and unclean according to their fitness or unfitness to be offered in sacrifice, — a point probably determined by Divine direction in the earliest ages. This seems also to

Digitized by Google

be the fundamental idea in the word טָהוֹר used to designate the clean animal. The distinction having once been established for purposes of sacrifice, would naturally have passed on to food, since the eating of animal food was everywhere so closely connected with the previous offering of a part of the animal in sacrifice. When it became necessary or expedient to extend the classes allowable for food beyond the very small number used for sacrifice, it was readily done by following the principle of similarity, and recognizing as suitable for food those animals possessing the same general characteristics as were required in victims for sacrifice.

When by the Great Sacrifice on Calvary animal sacrifices were done away, the basis for the distinction in animals for food at once ceased, and man recurred again to the broad permission of Gen. ix. 3, "Every moving thing that liveth shall be meat for you; even as the green herb have I given you all things." F. G.

UNCLEANNESS. The distinctive idea attached to ceremonial uncleanness among the Hebrews was, that it cut a person off for the time from social privileges, and left his citizenship among God's people for the while in abeyance. It did not merely require by law a certain ritual of purification, in order to enhance the importance of the priesthood, but it placed him who had contracted an uncleanness in a position of disadvantage, from which certain ritualistic acts alone could free him. These ritualistic acts were primarily the means of recalling the people to a sense of the personality of God, and of the reality of the bond in which the Covenant had placed them with Him. As regards the nature of the acts themselves, they were in part purely ceremonial, and in part had a sanitary tendency; as also had the personal isolation in which the unclean were placed, acting to some extent as a quarantine, under circumstances where infection was possible or supposable. It is remarkable that, although many acts having no connection specially with cleansing entered into the ritual, the most frequently enjoined method of removing ceremonial pollution was that same washing which produces physical cleanliness. Nor can we adequately comprehend the purport and spirit of the lawgiver, unless we recognize on either side of the merely ceremonial acts, often apparently enjoined for the sake of solemnity alone, the spiritual and moral benefits on the one side, of which they spake in shadow only, and the physical correctives or preventives on the other, which they often in substance conveyed. Maimonides and some other expositors, whilst they apparently forbid, in reality practice the rationalizing of many ceremonial precepts (Wunderbar, *Biblisch-Talmudische Medicin*, 2ᵉᵉ Heft, 4).

There is an intense reality in the fact of the Divine Law taking hold of a man by the ordinary infirmities of flesh, and setting its stamp, as it were, in the lowest clay of which he is moulded. And indeed, things which would be unsuited to the spiritual dispensation of the New Testament, and which might even sink into the ridiculous by too close a contact with its sublimity, have their proper place in a law of temporal sanctions, directly affecting man's life in this world chiefly or solely. The sacredness attached to the human body is parallel to that which invested the Ark of the Covenant itself. It is as though Jehovah thereby would teach them that the "very hairs of their head were all numbered" before Him, and that "in his book were all their members written." Thus was inculcated, so to speak, a bodily holiness.[a] And it is remarkable indeed, that the solemn precept, "Ye shall be holy; for I am holy," is used not only where moral duties are enjoined, as in Lev. xix. 2, but equally so where purely ceremonial precepts are delivered, as in xi. 44, 45. So the emphatic and recurring period, "I am the Lord your God," is found added to the clauses of positive observance as well as to those relating to the grandest ethical barriers of duty. The same weight of veto or injunction seems laid on all alike: *e. g.* "Ye shall not make any cuttings in your flesh for the dead, nor print any marks upon you: I am the Lord," and "Thou shalt rise up before the hoary head, and honor the face of the old man, and fear thy God: I am the Lord" (xix. 28, 32). They had his mark set in their flesh, and all flesh on which that had passed had received, as it were, the broad arrow of the king, and was really owned by him. They were preoccupied by that mark of ownership in all the leading relations of life, so as to exclude the admission of any rival badge.

Nor were they to be only "separated from other people," but they were to be "holy *unto God*" (xx. 24, 26), "a kingdom of priests, and a holy nation." Hence a number of such ordinances regarding outward purity, which in Egypt they had seen used only by the priests, were made publicly obligatory on the Hebrew nation.

The importance to physical well-being of the injunctions which required frequent ablution, under whatever special pretexts, can be but feebly appreciated in our cooler and damper climate, where there seems to be a less rapid action of the atmosphere, as well as a state of the frame less disposed towards the generation of contagion, and towards morbid action generally. Hence the obvious utility of reinforcing, by the sanction of religion, observances tending in the main to that healthy state which is the only solid basis of comfort, even though in certain points of detail they were burdensome. The custom of using the bath also on occasions of ceremonious introduction to persons of rank or importance (Ruth iii. 3; Judith x. 3), well explains the special use of it on occasions of religious ministration, viewed as a personal appearing before God; whence we understand the office of the lavers among the arrangements of the sanctuary (Ex. xxx. 18 21; 1 K. vii. 38, 39; comp. Ex. xix. 10, 14; 1 Sam. xvi. 5; Josh. iii. 5; 2 Chr. xxx. 17). The examples of parallel observances among the nations of antiquity, will suggest themselves easily to the classical student without special references. The closest approximation, however, to the Mosaic ritual in this respect, is said to be found in the code of Menu (Winer, "Reinigkeit," 313, note).

To the priests was ordinarily referred the exposition of the law of uncleanness, as may be gathered from Hag. ii. 11. Uncleanness, as referred to man, may be arranged in three degrees; (1) that which defiled merely "until even," and was removed by bathing and washing the clothes at the end of it — such were all contacts with dead animals; (2) that

[a] Compare the view of the modern Persians in this respect. Chardin's *Voyages*, vol. ii. p. 249, chap iv. "Le corps se présente devant Dieu comme l'âme; il faut donc qu'il soit pur, tant pour parler à Dieu, que pour entrer dans le lieu consacré à son culte."

Digitized by Google

graver sort which defiled for seven days, and was removed by the use of the "water of separation" — such were all defilements connected with the human corpse; (3) uncleanness from the morbid, puerperal, or menstrual state, lasting as long as that morbid state lasted — but see further below; and in the case of leprosy lasting often for life.

It suffices barely to notice the spiritual significance which the law of carnal ordinances veiled. This seems sometimes apparent, as in Deut. xxi. 6–8 (comp. Ps. xxvi 6, lxxiii. 13), yet calling for a spiritual discernment in the student; and this is the point of relation between these "divers washings" and Christian Baptism (1 Pet. iii. 21). Those who lacked that gift were likely to confound the inward with the outward purification, or to fix their regards exclusively on the latter.

As the human person was itself the seat of a covenant-token, so male and female had each their ceremonial obligations in proportion to their sexual differences. Further than this the increase of the nation was a special point of the promise to Abraham and Jacob, and therefore their fecundity as parents was under the Divine tutelage, beyond the general notion of a curse, or at least of God's disfavor, as implied in barrenness. The "blessings of the breasts and of the womb" were his (Gen. xlix. 25), and the Law takes accordingly grave and as it were paternal cognizance of the organic functions connected with propagation. Thus David could feel "Thou has possessed my reins: thou hast covered me in my mother's womb" (Ps. cxxxix. 13); and St. Paul found a spiritual analogy in the fact that "God had tempered the body together, having given more abundant honor to that part which lacked" (1 Cor. xii. 24). The changes of habit incident to the female, and certain abnormal states of either sex in regard to such functions, are touched on reverently, and with none of the Æsculapian coldness of science — for the point of view is throughout from the sanctuary (Lev. xv. 31); and the purity of the individual, both moral and physical, as well as the preservation of the race, seems included in it. There is an emphatic reminder of human weakness in the fact of birth and death — man's passage alike into and out of his mortal state — being marked with a stated pollution. Thus the birth of the infant brought defilement on its mother, which she, except so far as necessarily isolated by the nature of the circumstances, propagated around her. Nay, the conjugal act itself[a] or any act resembling it, though done involuntarily (vv. 16–18), entailed uncleanness for a day. The corpse, on the other hand, bequeathed a defilement of seven days to all who handled it, to the "tent" or chamber of death, and to sundry things within it. Nay contact with one slain in the field of battle, or with even a human bone or grave, was no less effectual to pollute, than that with a corpse dead by the course of nature (Num. xix. 11–18). This shows that the source of pollution lay in the mere fact of death, and seems to mark an anxiety to fix a sense of the connection of death, even as of birth, with sin, deep in the heart of the nation, by a wide pathology, if we may so call it, of defilement. It is as though the pool of human corruption was stirred anew by whatever passed into or out of it. For the special cases of male, female, and intersexual defilement, see Lev. xii., xv. Wunderbar, *Biblisch-Talmudische Medicin*, pt. iii. 19–20, refers to Miahna, *Zabim*, ii. 2, *Nasir*. ix. 4, as understanding by the symptoms mentioned in Lev. xv. 2–8 *the gonorrhœa benigna*. The same authority thinks that the plague "for Peor's sake" (Num. xxv. 1, 3, 9; Deut. iv. 3; Josh. xxii. 17) was possibly a syphilitic affection derived from the Moabites. [ISSUE; MEDICINE.]

The duration of defilement caused by the birth of a female infant, being double that due to a male, extending respectively to eighty[b] and forty days in all (Lev. xii. 2–5), may perhaps represent the woman's heavier share in the first sin and first curse (Gen. iii. 16; 1 Tim. ii. 14). For a man's "issue," besides the uncleanness while it lasted, a probation of seven days, including a washing on the third day, is prescribed. Similar was the period in the case of the woman, and in that of intercourse with a woman so affected (Lev. xv. 13, 24, 28). Such an act during her menstrual separation[c] was regarded as incurring, beyond uncleanness, the penalty of both the persons being cut off from among their people (xx. 18). We may gather from Gen. xxxi. 35, that such injunctions were agreeable to established traditional notions. The propagation of uncleanness from the person to the bed, saddle, clothes, etc., and through them to other persons, is apt to impress the imagination with an idea of the loathsomeness of such a state or the heinousness of such acts, more forcibly by far than if the defilement clove to the first person merely (Lev. xv. 5, 6, 9, 12, 17, 20, 22–24, 26, 27). It threw a broad margin around them, and warned all off by amply defined boundaries. One expression in ver. 8, seems to have misled Winer into supposing that an issue of rheum (*Schleimfluss*) was perhaps intended. That "spitting," in some cases where there was no disease in question, conveyed defilement, seems implied in Num. xii. 14, and much more might such an act so operate, from

---

[a] Comp. Herod. ii. 64, where it appears that after such intercourse an Egyptian could not enter a sanctuary without first bathing.

[b] Ancient Greek physicians assert that, in southern countries, the symptoms of the puerperal state continue longer when a woman has borne a daughter than when a son. Michaelis (*Smith's Translation*), Art. 214.

[c] Winer quotes a remarkable passage from Pliny, *N. H.* vii. 13, specifying the mysteriously mischievous properties ascribed in popular superstition to the menstrual flux; *e. g.* buds and fruits being blighted, steel blunted, dogs driven mad by it, and the like. But Pliny has evidently raked together all sorts of "old wives' fables," without any attempt at testing their truth, and is therefore utterly untrustworthy. More to the purpose is his quotation of Haller, *Elem. Physiol.* vii. 148, to the effect that this opinion of the virulent and baneful effects of this secretion proceeded from Asia, and was imported into Europe by the Arabians; which, however, lacks due foundation, and which Pliny's language so far contradicts. The laws of Menu are said to be more stringent on this head than the Mosaic. The menstrual affection begins at an earlier age, and has periods of longer duration with Oriental women than with those of our own climate. That Greek religion recognised some of the Levitical pollutions is plain from Eurip. *Iphig. Taur.* 380 foll., where we read of a goddess, — ἥτις, βροτῶν μὲν ἢν τις ἅψηται φόνου, ἢ καὶ λοχείας, ἢ νεκροῦ θίγῃ χεροῖν, βωμῶν ἀπείργει, μυσαρὸν ὡς ἠγουμένη. A fragment of the same poet, adduced by Mr. Paley *ad. loc. cit* is even more closely in point. It is, πάλλευκα δ' ἔχων εἵματα φεύγω γένεσίν τε βροτῶν καὶ νεκρῶν ἅψ σ' ὁ χρωτόμενος, τὴν τ' ἐμψύχων βρῶσιν ἀθεσπέσιον παρὰ δαίμοσι. Comp. also Theophr. *Char.* 17.

Digitized by Google

one whose malady made him a source of pollution even to the touch.

As regards the propagation of uncleanness the Law of Moses is not quite clear. We read (Num. xix. 22), "Whatsoever the unclean person toucheth shall be unclean;" but there uncleanness from contact with the corpse, grave, etc., is the subject of the chapter which the injunction closes; and this is confirmed by Hag. ii. 13, where "one that is unclean *by a dead body*" is similarly expressly mentioned. Also from the command (Num. v. 2–4) to "put the unclean out of the camp;" where the "leper," the one "that hath an issue," and the one "defiled by the dead," are particularized, we may assume that the minor pollution for one day only was not communicable, and so needed not to be "put forth." It is observable also that the *major* pollution of the "issue" communicated by contact the *minor* pollution only (Lev. xv. 5–11). Hence may perhaps be deduced a tendency in the contagiousness to exhaust itself; the minor pollution, whether engendered by the major or arising directly, being non-communicable. Thus the major itself would expire after one remove from its original subject. To this pertains the distinction mentioned by Lightfoot (*Hor. Hebr.* on Matt. xv. 2), namely, that between טְמֵא, "unclean," and פָּסוּל, "profane" or "polluted," in that the latter does not pollute another beside itself nor propagate pollution. In the ancient commentary on Num. known as "Siphri"[a] (*ap.* Ugol. *Thes.* xv. 346), a greater transmissibility of polluting power seems assumed, the defilement being there traced through *three* removes from the original subject of it; but this is no doubt a Rabbinical extension of the original Levitical view.

Michaelis notices a medical tendency in the restriction laid on coition, whereby both parties were unclean until even; he thinks, and with some reason, that the law would operate to discourage polygamy, and, in monogamy, would tend to preserve the health of the parents and to provide for the healthiness of the offspring. The uncleanness similarly imposed upon self-pollution (Lev. xv. 16; Deut. xxiii. 10), even if involuntary, would equally exercise a restraint both moral and salutary to health, and suggest to parents the duty of vigilance over their male children (Michaelis, Art. cxxiv.–cxxvii.).

With regard to uncleanness arising from the lower animals, Lightfoot (*Hor. Hebr.* on Lev. xi.–xv.) remarks, that all which were unclean to touch when dead were unclean to eat, but not conversely; and that all which were unclean to eat were unclean to sacrifice, but not conversely; since "multa a lere licet quæ non sacrificari, et multa tangere licet quæ non edere." For uncleanness in matters of food, see UNCLEAN MEATS. All animals, however, if dying of themselves, or eaten with the blood, were unclean to eat. [BLOOD.] The carcase also of any animal unclean as regards diet, however dying, defiled whatever person it, or any part of it touched. By the same touch any garment, sack, skin, or vessel, together with its contents, became unclean, and was to be purified by washing or scouring; or if an earthen vessel, was to be broken, just as the Brahmins break a vessel out of which a Christian has drunk. Further, the water in which such things had been purified communicated their uncleanness; and even seed for sowing, if wetted with water, became unclean by touch of any carrion or unclean animal when dead. All these defilements were "until even" only, save the eating "with the blood," the offender in which respect was to "be cut off" (Lev. xi., xvii. 14).

It should further be added, that the same sentence "of cutting off," was denounced against all who should "do presumptuously" in respect even of minor defilements; by which we may understand all contempt of the legal provisions regarding them. The comprehensive term "defilement" also includes the contraction of the unlawful marriages and the indulgence of unlawful lusts, as denounced in Lev. xviii. Even the sowing heterogeneous seeds in the same plot, the mixture of materials in one garment, the sexual admixture of cattle with a diverse kind, the ploughing with diverse animals in one team, although not formally so classed, yet seem to fall under the same general notion, save in so far as no specified term of defilement or mode of purification is prescribed (Lev. xix. 19; Deut. xxii. 9–11; comp. Michaelis, as above, cxxx.). In the first of these cases the fruit is pronounced "defiled," which Michaelis interpets as a consecration, *i. e.* confiscation of the crop for the uses of the priests.

The fruit of trees was to be counted "as uncircumcised," *i. e.* unclean for the first three years; in the fourth it was to be set apart as "holy to praise the Lord withal," and eaten commonly not till the fifth. Michaelis traces an economic effect in this regulation, it being best to pluck off the blossom in the early years, and not allow the tree to bear fruit till it had attained to some maturity (*ibid.* ccxxii.).

The directions in Deut. xxiii. 10–13, relate to the avoidance of impurities in the case of a host encamped,[b] as shown in ver. 9, and from the mention of "enemies" in ver. 14. The health of the army would of course suffer from the neglect of such rules; but they are based on no such ground of expediency, but on the scrupulous ceremonial purity demanded by the God whose presence was in the midst of them. We must suppose that the rule which expelled soldiers under certain circumstances of pollution from the camp for a whole day, was relaxed in the presence of an enemy, as otherwise it would have placed them beyond the protection of their comrades, and at the mercy of the hostile host. As regards the other regulation, it is part of the teaching of nature herself that an assembled community should reject whatever the human body itself expels. And on this ground the Levitical Law seems content to let such a matter rest, for it annexes no stated defilement, nor prescribes any purification.

Amongst causes of defilement should be noticed the fact that the ashes of the red heifer, burnt whole, which were mixed with water and became the standing resource for purifying uncleanness in the second degree, themselves became a source of defilement to all who were *clean*, even as of purification to the unclean, and so the water. Thus the priest and Levite, who administered this purifica-

[a] The passage in the Latin version is, "Si vasa quæ tangunt hominem qui tangit vasa, quæ tangant mortuum, sunt immunda," etc.

[b] Bishop Colenso appears to have misapplied this, as though it were required of the host of Israel, *i. e.* the whole body of the people, throughout the whole of their wandering in the wilderness. *The Pentateuch*, etc., ch. vi. 39.

Digitized by Google

tion in their respective degrees, were themselves made unclean thereby, but in the first or lightest degree only (Num. xix. 7, foll.). Somewhat similarly the scape-goat, who bore away the sins of the people, defiled him who led him into the wilderness, and the bringing forth and burning the sacrifice on the Great Day of Atonement had a similar power. This lightest form of uncleanness was expiated by bathing the body and washing the clothes. Besides the water of purification made as aforesaid, men and women in their "issues," were, after seven days, reckoned from the cessation of the disorder, to bring two turtle-doves or young pigeons to be killed by the priests. The purification after childbed is well known from the N. T.; the Law, however, primarily required a lamb and a bird, and allowed the poor to commute for a pair of birds as before. That for the leper declared clean consisted of two stages: the first, not properly sacrificial, though involving the shedding of blood, consisted in bringing two such birds, the one of which the priest killed over spring-water with which its blood was mingled, and the mixture sprinkled seven times on the late leper, with an instrument made of cedar-wood, scarlet wool, and hyssop; the living bird was then dipped in it, and let fly away, symbolizing [a] probably the liberty to which the leper would be entitled when his probation and sacrifice were complete, even as the slaughtered bird signified the discharge of the impurities which his blood had contained during the diseased state. The leper might now bathe, shave himself, and wash his clothes, and come within the town or camp, nor was every place which he entered any longer polluted by him (Mishna, *Negaim*, xiii. 11; *Celim*, i. 4), he was, however, relegated to his own house or tent for seven days. At the end of that time he was scrupulously to shave his whole body, even to his eyebrows, and wash and bathe as before. The final sacrifice consisted of two lambs, and an ewe sheep of the first year with flour and oil, the poor being allowed to bring one lamb and two birds as before, with smaller quantities of flour and oil. For the detail of the ceremonial, some of the features of which are rather singular, see Lev. xiv. Lepers were allowed to attend the synagogue worship, where separate seats were assigned them (*Negaim*, xiii. 12).

All these kind of uncleanness disqualified for holy functions: as the layman so affected might not approach the congregation and the sanctuary, so any priest who incurred defilement must abstain from the holy things (Lev. xxii. 2–8). The high-priest was forbidden the customary signs of mourning for father or mother, "for the crown of the anointing oil of his God is upon him" (Lev. xxi. 10–12), and beside his case the same prohibition seems to have been extended to the ordinary priests. At least we have an example of it in the charge given to Eleazar and Ithamar on their brethren's death (Lev. x. 6). From the specification of "father or mother," we may infer that he was permitted to mourn for his wife, and so Maimonides (*de Luctu*, esp. ii., iv., v.) explains the text. Further, from the special prohibition of Ezekiel, who was a priest to mourn for his wife (Ez. xxiv. 15, foll.), we know that to mourn for a wife was generally permitted to the priests. Among ordinary Israelites, the man or woman who had an issue, or the latter while in the menstrual or puerperal state, might not, according to the Rabbins, enter even the mount on which the Temple stood; nor might the intra-mural space be entered by any Israelite in mourning. In Jerusalem itself, according to the same authorities, a dead body might not be allowed to pass the night, nor even the bones of one be carried through its streets; neither was any cultivation allowed there, for fear of the dung, etc., to which it might give rise (Maimonides *Constit. de Temp.* cap. vii. xiv.–xvi.). No bodies were to be interred within towns, unless seven chief men, or the public voice, bade the interment there; and every tomb within a town was to be carefully walled in (*ibid.* xiii.). If a man in a state of pollution presumed to enter the sanctuary, he was obliged to offer a sacrifice as well as suffer punishment. The sacrifice was due under the notion that the pollution of the sanctuary needed expiation, and the punishment was either whipping, the "rebel's beating," which meant leaving the offender to the mercies of the mob, "cutting off from the congregation," or death "by the hand of heaven" (Lightfoot, *Hor. Hebr.* on Lev. xv.; Ugolini, *Thes.* xvi. 126).

As regards the special case of the leper, see LEPROSY. To the remarks there made, it may be added that the priests, in their contact with the leper to be adjudged, were exempted from the law of defilement; that the garb and treatment of the leper seems to be that of one dead in the eye of the Law, or rather a perpetual mourner for his own estate of death with "clothes rent and head bare," the latter being a token of profound affliction and prostration of spirit among an oriental people, which no conventional token among ourselves can adequately parallel. The fatal cry טָמֵא, טָמֵא, "Unclean, unclean!" was uttered not only by the leper, but by all for whose uncleanness no remedy could be found (*Pesichtha*, § 2; Ugol. *Thes.* xvi. 40). When we consider the aversion to leprous contact which prevailed in Jewish society, and that whatever the leper touched was, as if touched by a corpse, defiled seven days, we see the happy significance of our Lord's selecting the touch as his means of healing the leper (Lightfoot, *Hor. Hebr.* on Matt. viii. 2); as we also appreciate better the bold faith of the woman, and how daringly she overstepped conventional usage based on the letter of the Law, who having the "issue of blood," hitherto incurable, "came behind him and *touched* the hem of his garment," confident that not pollution to Him but cleansing to herself would be the result of that touch (Luke viii. 43, foll.).

As regards the analogies which the ceremonial of other oriental nations offers, it may be mentioned that amongst the Arabs the touching a corpse still defiles (Burckhardt, p. 80). Beyond this, M. Chardin in his account of the religion of the Persians (*Voyages en Perse*, vol. ii. 348, foll.) enters

[a] *I. e.* conveying in symbol only a release from the state to which the leper, whilst such, was sentenced. It is probable, however, that the duality of the symbol arose from the natural impossibility of representing life and death in the same creature, and that both the birds involve a complete representation of the Death, Resurrection, and Ascension which procure the Christian Atonement. This would of course, however, escape the notice of the worshipper. Christ, with his own blood, "entered the holy places not made with hands," as the living bird soared up to the visible firmament with the blood of its fellow. We may compare the two goats completing apparently one similar joint-symbol on the day of Atonement.

nto particulars which show a singularly close correspondence with the Levitical code. This will be seen by quoting merely the headings of some of his chapters and sections. Thus we find under "chap. iv. 1ere partie, Des purifications qui se font avec d'eau; 2de partie, De l'immondicité; 1ere section, De l'impureté qui se contracte *semine coitus;* 2de section, De l'impureté qui arrive aux femmes par les pertes de sang, De l'impureté des pertes de sang ordinaires, De l'impureté des pertes de sang extraordinaires, De l'impureté des pertes de sang des couches. 3eme partie, De la purification des corps morts." We may compare also with certain Levitical precepts the following: "Si un chien boit dans un vase ou léche quelque plat, il faut écurer le vase avec de la terre uette, et puis le laver deux fois d'eau nette, et il sera net." It is remarkable also that these precepts apply to the people not *qua* they are Mohammedans, but *qua* they are Persians, as they are said to shun even Mohammedans who are not of the same ritual in regard to these observances.

For certain branches of this subject the reader may be referred to the treatises in the Mishna named *Niddah* (*menstruata*), *Parah* (*vacca rufa*), *Tehoroth* (*Puritates*), *Zabbim* (*fluxu laborantes*), *Celim* (*vasa*), *Miscath Arlah* (*arborum præputia*); also to Maimon. lib. v. *Issure Biah* (*prohibita coitiones*), *Niddah* (*ut sup.*), *Maccaloth Assuroth* (*cibi prohibiti*). **UNICORN** (רְאֵם, *rêm;* רְאִים, *rêêm;* or רִים, *rêym:* *μονοκέρως, ἄδρός: rhinoceros, unicornis*), the unhappy rendering by the A. V., following the LXX., of the Hebrew *Rêêm*, a word which occurs seven times in the O. T. as the name of some large wild animal. More, perhaps, has been written on the subject of the unicorn of the ancients than on any other animal, and various are the opinions which have been given as to the creature intended. The *rêêm* of the Hebrew Bible, however, has nothing at all to do with the one-horned animal mentioned by Ctesias (*Indica*, iv. 25–27), Ælian (*Nat. Anim.* xvi. 20), Aristotle (*Hist. Anim.* ii. 2, § 8), Pliny (*H. N.* viii. 21), and other Greek and Roman writers, as is evident from Deut. xxxiii. 17, where, in the blessing of Joseph, it is said, "His glory is like the firstling of his bullock, and his horns are like the horns of *a unicorn*" (קַרְנֵי רְאֵם), not, as the text of the A. V. renders it, "the horns of *unicorns*." The two horns of the *Rêêm* are "the ten thousands of Ephraim and the thousands of Manasseh" — the two tribes which sprang from *one*, *i. e.* Joseph, as two horns from one head. This text, most appropriately referred to by Schultens (*Comment. in Job.* xxxix. 9), puts a one-horned animal entirely out of the question, and in consequence disposes of the opinion held by Bruce (*Trav.* v. 89), and others, that some species of rhinoceros is denoted, or that maintained by some writers, that the *rêêm* is identical with some one-horned animal *said* to have been seen by travellers in South Africa and in Thibet (see Barrow's *Travels in S. Africa*, i. 312–318, and *Asiatic Journal*, xi. 154), and identical with the veritable unicorn of Greek and Latin writers! Bochart (*Hieros.* ii. 335) contends that the Hebrew *rêêm* is identical with the Arabic *rim* (رِيم), which is usually referred to the *Oryx leucoryx*, the white antelope of North Africa, and at one time perhaps an inhabitant of Palestine. Bochart has been followed by Rosenmüller, Winer, and others. Arnold Boot (*Animad. Sacr.* iii. 8, Lond. 1644), with much better reason, conjectures that some species of *urus* or wild ox is the *Rêêm* of the Hebrew Scriptures. He has been followed by Schultens (*Comment. in Jobum* xxxix. 9, who translates the term by *Bos sylvestris:* this learned writer has a long and most valuable note on this question), by Parkhurst (*Heb. Lex.* s. v. רְאֵם), Maurer (*Comment. in Job.* l. c.), Dr. Harris (*Nat. Hist. of the Bible*), and by Cary (*Notes on Job*, l. c.). Robinson (*Bibl. Res.* ii. 412) and Gesenius (*Thes.* s. v.) have little doubt that the buffalo (*Bubalus buffalus*) is the *rêêm* of the Bible. Before we proceed to discuss these several claimants to represent the *rêêm*, it will be well to note the Scriptural allusions in the passages where the term occurs. The great strength of the *rêêm* is mentioned in Num. xxiii. 22, Job xxxix. 11; his having two horns in Deut. xxxiii. 17; his fierce nature in Ps. xxii. 21; his indomitable disposition in Job xxxix. 9–11; the active and playful habits of the young animal are alluded to in Ps. xxix. 6; while in Is. xxxiv. 6, 7, where Jehovah is said to be preparing "a sacrifice in Bozrah," it is added, "the *rêêmim* shall come down, and the bullocks with the bulls."

The claim of any animal possessed of a single horn to be the *rêêm* has already been settled, for it is manifestly too much to assume, as some writers have done, that the Hebrew term does not always denote the same animal. Little can be urged in favor of the rhinoceros, for even allowing that the two-horned species of Abyssinia (*R. bicornis*) may have been an inhabitant of the woody districts near the Jordan in Biblical times, this *pachyderm* must be out of the question, as one which would have been forbidden to be sacrificed by the Law of Moses, whereas the *rêêm* is mentioned by Isaiah as coming down with bullocks and rams to the Lord's sacrifice. "Omnia animalia," says Rosenmüller (*Schol. in Is.* l. c.), "ad sacrificia idonea in unum congregantur." Again, the skipping of the young *rêêm* (Ps. xxix. 6) is scarcely compatible with the habits of a rhinoceros. Moreover this animal, when unmolested, is not generally an object of much dread, nor can we believe that it ever existed so plentifully in the Bible lands, or even would have allowed itself to have been sufficiently often seen so as to be the subject of frequent attention, the rhinoceros being an animal of retired habits.

With regard to the claims of the *Oryx leucoryx*, it must be observed that this antelope, like the rest of the family, is harmless unless wounded or hard pressed by the hunter, nor is it remarkable for the possession of any extraordinary strength. Figures of the oryx occur frequently on the Egyptian sculptures, "being among the animals tamed by the Egyptians and kept in great numbers in their preserves" (Wilkinson's *Anc. Egypt.* i. 227, ed

Digitized by Google

1854). Certainly this antelope can never be the fierce indomitable *rêêm* mentioned in the book of Job.

Considering, therefore, that the *rêêm* is spoken of as a two-horned animal of great strength and ferocity, that it was evidently well known and often seen by the Jews, that it is mentioned as an animal fit for sacrificial purposes, and that it is frequently associated with bulls and oxen, we think there can be no doubt that some species of wild ox is intended. The allusion in Ps. xcii. 10, "But thou shalt lift up, as a *rêêym*, my horn," seems to point to the mode in which the *Bovidæ* use their horns, lowering the head and then tossing it up. But it is impossible to determine what particular species of wild ox is signified. At present there is no existing example of any wild bovine animal found in Palestine; but negative evidence in this respect must not be interpreted as affording testimony against the supposition that wild cattle formerly existed in the Bible lands. The lion, for instance, was once not unfrequently met with in Palestine, as is evident from Biblical allusions, but no traces of living specimens exist now. Dr. Roth found lions' bones in a gravel bed of the Jordan some few years ago, and it is not improbable that some future explorer may succeed in discovering bones and skulls of some huge extinct *Urus*, allied perhaps to that gigantic ox of the Hercynian forests which Cæsar (*Bell. Gall.* vi. 20) describes as being of a stature scarcely below that of an elephant, and so fierce as to spare neither man nor beast should it meet with either. "Notwithstanding assertions to the contrary," says Col. Hamilton Smith (Kitto's *Cycl.* art. "Reem"), "the urus and the bison were spread anciently from the Rhine to China, and existed in Thrace and Asia Minor; while they, or allied species, are still found in Siberia and the forests both of Northern and Southern Persia. Finally, though the buffalo was not found anciently further west than Aracoria, the gigantic *Gaur* (*Bibos gaurus*) and several congeners are spread over all the mountain wildernesses of India and the *Sheriff-al-Wady*; and a further colossal species roams with other wild bulls in the valleys of Atlas."

Some have conjectured that the *rêêm* denotes the wild buffalo. Although the *chainsa*, or tame buffalo, was not introduced into Western Asia until the Arabian conquest of Persia, it is possible that some wild species, *Bubalus arnee*, or *B. brachycerus*, may have existed formerly in Palestine. We are, however, more in favor of some gigantic *Urus*.[a]

Numerous references as to the *μονοκέρως* of the ancients will be found in Bochart (*Hieroz.* iii. cap. 27), Winer (*Bibl. Realw.* "Einhorn"); but no further notice of this point is taken here except to observe that the more we study it the more convinced we are that the animal is fabulous. The supposed unicorns of which some modern travellers speak have never been seen by trustworthy witnesses.[b] W. H.

* **UNKNOWN GOD.** [ALTAR, Amer. ed.; MARS' HILL.]

* **UNLEAVENED.** [BREAD; LEAVEN; PASSOVER.]

**UNNI.** 1. (עַנִּי [*depressed*]: Ἐλιωήλ, Ὠδ; [Vat. FA. in ver. 20, with part of preceding word, Ηλωνει; FA. in ver. 18, Ιεηλ; Alex. Ανι, Ανανι: *Ani.*) One of the Levite doorkeepers (A. V. "porters") appointed to play the psaltery "on alamoth" in the service of the sacred Tent, as settled by David (1 Chr. xv. 18, 20).

2. (עַנִּי, but in *Keri* עֲנִי: [Rom.] Vat. and Alex. omit; FA.[3] Ιανι: *Hanni.*) A second Levite (unless the family of the foregoing be intended) concerned in the sacred office after the Return from Babylon (Neh. xii. 9).

* **UNTOWARD,** Acts ii. 40, in the sense of "perverse," "intractable." "Toward" in parts of England at present is applied to animals as meaning "tame," "tractable." Bacon (*Essay* xix.) uses "towardness" for docility. (Eastwood and Wright's *Bible Word Book*, p. 503.) H.

* **UPHARSIN.** [MENE, etc.]

**UPHAZ** (אוּפָז: Μωφάζ, Ὠφάζ: *Ophaz, obryzum*), Jer. x. 9; Dan. x. 5. [OPHIR, iii. 2258 *b*.]

* **UPPER-CHAMBER.** [HOUSE, ii. 1105.]

* **UPPER COASTS** or properly PARTS (ἀνωτερικὰ μέρη), Acts xix. 1, are the intermediate regions through which Paul passed (διελθόν), on his way from Antioch to Ephesus, at the beginning of his third missionary tour. The lands more especially meant are Galatia and Phrygia (see xix. 23). The term ἀνωτερικά, as illustrated by Kypke (*Observat. Sacræ*, ii. 95), implies a twofold geographical relation; first, elevated, as compared with the sea-coast where Ephesus was; and, secondly, inland or eastern, with reference to the relative position of the places. Xenophon's familiar use of ἀναβαίνω and ἀνάβασις is another example of a similar application of kindred words. H.

**UR** (אוּר [see below]: Χώρα: *Ur*) occurs in Genesis only, and is there mentioned as the land of Haran's nativity (Gen. xi. 28), the place from which Terah and Abraham started "to go into the land of Canaan" (xi. 31). It is called in Genesis "Ur *of the Chaldæans*" (אוּר כַּשְׂדִּים), while in the Acts St. Stephen places it, by implication, in Mesopotamia (vii. 2, 4). These are all the indications which Scripture furnishes as to its locality. As they are clearly insufficient to fix its site, the chief traditions and opinions on the subject will be first considered, and then an attempt will be made to decide, by the help of the Scriptural notices, between them.

One tradition identifies Ur with the modern *Orfah*. There is some ground for believing that this city, called by the Greeks Edessa, had also the name of Orrha as early as the time of Isidore (ab. B. C. 150); and the tradition connecting it with Abraham is perhaps not later than St. Ephraem (A. D. 330–370), who makes Nimrod king of Edessa, among other places (*Comment. in Gen.* Op. vol. i. p. 58, B.). According to Poocok (*Descrip-*

[a] There appears to be no doubt that the ancient lake-inhabitants of Switzerland towards the close of the stone period succeeded in taming the urus. "In a tame state," says Sir C. Lyell (*Antiquity of Man*, p. 36), "its bones were somewhat less massive and heavy, and its horns were somewhat smaller than in wild individuals."

[b] The reader will find a full discussion of the "Unicorn of the Ancients" in the writer's article in the *Ann. and Mag. of Nat. Hist.* November, 1862

*tion of the East*, vol. i. p. 159), that Ur is Edessa or Orfah is "the *universal* opinion of the Jews;" and it is also the local belief, as is indicated by the title, "Mosque of Abraham," borne by the chief religious edifice of the place, and the designation, 'Lake of Abraham the Beloved," attached to the pond in which are kept the sacred fish (Ainsworth, *Travels in the Track*, etc., p. 64; comp. Pocock, i. 159, and Niebuhr, *Voyage en Arabie*, p. 330).

A second tradition, which appears in the Talmud, and in some of the early Arabian writers, finds Ur in *Warka*, the Ὀρχόη of the Greeks, and probably the Erech of Holy Scripture (called Ὀρέχ by the LXX.). This place bears the name of *Huruk* in the native inscriptions, and was in the country known to the Jews as "the land of the Chaldæans."

A third tradition, less distinct than either of these, but entitled to at least equal attention, distinguishes Ur from Warka, while still placing it in the same region (see *Journal of Asiatic Society*, vol. xii. p. 481, note 2). There can be little doubt that the city whereto this tradition points is that which appears by its bricks to have been called *Hur* by the natives, and which is now represented by the ruins at *Mugheir*, or *Umgheir*, on the right bank of the Euphrates, nearly opposite to its junction with the *Shat-el-Hie*. The oldest Jewish tradition which we possess, that quoted by Eusebius from Eupolemus[a] (*Præp. Ev.* ix. 17), who lived about B. C. 150, may be fairly said to intend this place; for by identifying Ur (Uria) with the Babylonian city, known also as Camarina and Chaldæopolis, it points to a city of the Moon, which *Hur* was — *Kamar* being "the Moon" in Arabic, and *Khaldi* the same luminary in the Old Armenian.

An opinion, unsupported by any tradition, remains to be noticed. Bochart, Calmet, Bunsen, and others, identify "Ur of the Chaldees" with a place of the name, mentioned by a single late writer — Ammianus Marcellinus — as "a castle" existing in his day in Eastern Mesopotamia, between Hatra (*el-Hadhr*) and Nisibis (Amm. Marc. xxv. 8). The chief arguments in favor of this site seem to be the identity of name and the position of the place between Arrapachitis, which is thought to have been the dwelling-place of Abraham's ancestors in the time of Arphaxad, and Haran (*Harran*), whither he went from Ur.

It will be seen, that of the four localities thought to have a claim to be regarded as Abraham's city, two are situated in Upper Mesopotamia, between the Mons Masius and the Sinjar range, while the other two are in the alluvial tract near the sea, at least 400 miles further south. Let us endeavor first to decide in which of these two regions Ur is more probably to be sought.

That Chaldæa was, properly speaking, the southern part of Babylonia, the region bordering upon the gulf, will be admitted by all. Those who maintain the northern emplacement of Ur argue, that with the extension of Chaldæan power the name travelled northward, and became coextensive with Mesopotamia; but, in the first place, there is no proof that the name Chaldæa was ever extended to the region above the Sinjar; and secondly, if it was, the Jews at any rate mean by Chaldæa exclusively the lower country, and call the upper Mesopotamia or Padan-Aram (see Job i. 17; Is. xiii. 19, xliii. 14, &c.). Again, there is no reason to believe that Babylonian power was established beyond the Sinjar in these early times. On the contrary, it seems to have been confined to Babylonia proper, or the alluvial tract below Hit and Tekrit, until the expedition of Chedorlaomer, which was later than the migration of Abraham. The conjectures of Ephraem Syrus and Jerome, who identify the cities of Nimrod with places in the upper Mesopotamian country, deserve no credit. The names all really belong to Chaldæa proper. Moreover, the best and earliest Jewish authorities place Ur in the low region. Eupolemus has been already quoted to this effect. Josephus, though less distinct upon the point, seems to have held the same view (*Ant.* i. 6). The Talmudists also are on this side of the question; and local traditions, which may be traced back nearly to the Hegira, make the lower country the place of Abraham's birth and early life. If *Orfah* has a Mosque and a Lake of Abraham, Cutha near Babylon goes by Abraham's name, as the traditional scene of all his legendary miracles.

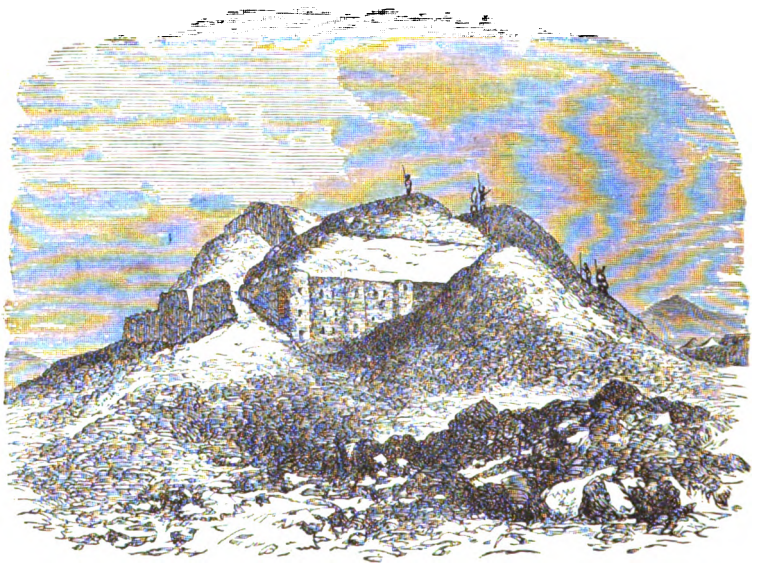
Again, it is really in the lower country only that a name closely corresponding to the Hebrew אוּר is found. The cuneiform *Hur* represents אוּר letter for letter, and only differs from it in the greater strength of the aspirate. Isidore's Orrha (Ὄρρα) differs from 'Ur considerably, and the supposed Ur of Ammianus is probably not Ur, but Adur.[a]

The argument that Ur should be sought in the neighborhood of Arrapachitis and Seruj, because the names Arphaxad and Serug occur in the genealogy of Abraham (Bunsen, *Egypt's Place*, etc., iii. 366, 367), has no weight till it is shown that the human names in question are really connected with the places, which is at present assumed somewhat boldly. Arrapachitis comes probably from *Arapkha*, an old Assyrian town of no great consequence on the left bank of the Tigris, above Nineveh, which has only three letters in common with Arphaxad (אַרְפַּכְשַׁד); and Seruj is a name which does not appear in Mesopotamia till long after the Christian era. It is rarely, if ever, that we can extract geographical information from the names in a historical genealogy; and certainly in the present case nothing seems to have been gained by the attempt to do so.

On the whole, therefore, we may regard it as tolerably certain that "Ur of the Chaldees" was a place situated in the real Chaldæa — the low country near the Persian Gulf. The only question that remains in any degree doubtful is, whether *Warka* or *Mugheir* is the true locality. These places are not far apart; and either of them is sufficiently suitable. Both are ancient cities, probably long anterior to Abraham. Traditions attach to both, but perhaps more distinctly to *Warka*. On the

[a] The words of Eusebius are: Δεκάτῃ γενεᾷ φησιν [Εὐπόλεμος], ἐν πόλει τῆς Βαβυλωνίας Καμαρίνῃ, ἣν τινες λέγειν πόλιν Οὐρίην, εἶναι δὲ μεθερμηνευομένην Χαλδαίων κώμην, ἐν ταύτην δεκάτῃ γενεᾷ γενέσθαι Ἀβραάμ.

[a] The MS. reading is "Adur venere;" "ad Ur" is an emendation of the commentators. The former is to be preferred, since Ammianus does not use "ad" after "venio."



Digitized by Google

other hand, it seems certain that *Warka*, the native name of which was *Huruk*, represents the Erech of Genesis, which cannot possibly be the Ur of the same book. *Mugheir*, therefore, which bore the exact name of *'Ur* or *Hur*, remains with the best claim, and is entitled to be (at least provisionally) regarded as the city of Abraham.

If it be objected to this theory that Abraham, having to go from *Mugheir* to Palestine, would not be likely to take Haran (*Harran*) on his way, more particularly as he must then have crossed the Euphrates twice, the answer would seem to be, that the movement was not that of an individual but of a tribe, travelling with large flocks and herds, whose line of migration would have to be determined by necessities of pasturage, and by the friendly or hostile disposition, the weakness or strength of the tribes already in possession of the regions which had to be traversed. Fear of Arab plunderers (Job i. 15) may very probably have caused the emigrants to cross the Euphrates before quitting Babylonia, and having done so, they might naturally follow the left bank of the stream to the Belik, up which they might then proceed, attracted by its excellent pastures, till they reached Harran. As a pastoral tribe proceeding from Lower Babylonia to Palestine *must* ascend the Euphrates as high as the latitude of Aleppo, and perhaps would find it best to ascend nearly to *Bir*, Harran was but a little out of the proper route. Besides, the whole tribe which accompanied Abraham was not going to Palestine. Half the tribe were bent on a less distant journey; and with them the question must have been, where could they, on or near the line of route, obtain an unoccupied territory.

If upon the grounds above indicated *Mugheir* may be regarded as the true "Ur of the Chaldees," from which Abraham and his family set out, some

Ruins of Temple at Mugheir (Loftus).

account of its situation and history would seem to be appropriate in this place. Its remains have been very carefully examined, both by Mr. Loftus and Mr. Taylor, while its inscriptions have been deciphered and translated by Sir Henry Rawlinson.

'Ur or Hur, now *Mugheir*, or *Um-Mugheir*, "the bitumened," or "the mother of bitumen," is one of the most ancient, if not *the* most ancient, of the Chaldæan sites hitherto discovered. It lies on the right bank of the Euphrates, at the distance of about six miles from the present course of the stream, nearly opposite the point where the Euphrates receives the *Shat-el-Hie* from the Tigris. It is now not less than 125 miles from the sea; but there are grounds for believing that it was anciently a maritime town, and that its present inland position has been caused by the rapid growth of the alluvium. The remains of buildings are generally of the most archaic character. They cover an oval space, 1,000 yards long by 800 broad, and consist principally of a number of low mounds inclosed within an *enceinte*, which on most sides is nearly perfect. The most remarkable building is near the northern end of the ruins. It is a temple of the true Chaldæan type, built in stages, of which two remain, and composed of brick, partly sun-burnt and partly baked, laid chiefly in a cement of bitumen. The bricks of this building bear the name of a certain *Urukh*, who is regarded as the earliest of the Chaldæan monumental kings, and the name may possibly be the same as that of Orchamus of Ovid (*Metaph.* iv. 212). His supposed date is B. C. 2000, or a little earlier. 'Ur was the capital of this monarch, who had a dominion extending at least as far north as Niffer, and who, by the grandeur of his constructions, is proved to have been a wealthy and powerful prince. The great temple appears to have been founded by this king, who dedicated it to the Moon-god, *Hurki*, from whom the town itself seems to have derived its name. *Ilgi*, son of *Urukh*, completed the temple, as well as certain other of his father's buildings, and the kings who followed upon these continued for several generations to adorn and beautify the city. 'Ur retained its metropolitan character for above two centuries, and even after it became

Digitized by Google

second to Babylon, was a great city, with an especially sacred character. The notions entertained of its superior sanctity led to its being used as a cemetery city, not only during the time of the early Chaldæan supremacy, but throughout the Assyrian and even the later Babylonian period. It is in the main a city of tombs. By far the greater portion of the space within the *enceinte* is occupied by graves of one kind or another, while outside the inclosure, the whole space for a distance of several hundred yards is a thickly-occupied burial-ground. It is believed that 'Ur was for 1,800 years a site to which the dead were brought from vast distances, thus resembling such places as *Kerbela* and *Nedjif*, or *Meshed Ali*, at the present day. The latest mention that we find of 'Ur as an existing place is in the passage of Eupolemus already quoted, where we learn that it had changed its name, and was called Camarina. It probably fell into decay under the Persians, and was a mere ruin at the time of Alexander's conquests. Perhaps it was the place to which Alexander's informants alluded when they told him that the tombs of the old Assyrian kings were chiefly in the great marshes of the lower country (Arrian, *Exp. Alex.* vii. 22). G. R.

* **UR** (אוּר, *light:* Rom., with next word, Θυρεοφάρ; Vat. Χθυροφαρ; Alex. Ωρα; FA. Σουρ: *Ur*), father of Eliphal or Eliphelet, one of David's valiant men (1 Chr. xi. 35). A.

**URBANE** [2 syl.] (Οὐρβανός [Lat. *urbanus*, i. e. "urbane," "refined"]: *Urbanus*). It would have been better if the word had been written URBAN in the Authorized Version. For unlearned readers sometimes mistake the sex of this Christian disciple, who is in the long list of those whom St. Paul salutes in writing to Rome (Rom. xvi. 9). We have no means, however, of knowing more about Urbanus, except, indeed, that we may reasonably conjecture from the words that follow (τὸν συνεργὸν ἡμῶν ἐν Χριστῷ) that he had been at some time in active religious coöperation with the Apostle. Each of those who are saluted just before and just after is simply called τὸν ἀγαπητόν μου. The name is Latin. J. S. H.

**URI** (אוּרִי [*fiery, burning*]: Οὐρείας, Ex. xxxi. 2, [xxxviii. 22;] Οὐρίας [Vat. -ρει-], Ex. xxxv. 30; 2 Chr. i. 5; Οὐρί [Vat. -ρει], 1 Chr. ii. 20; Alex. Ουρι, except in 2 Chr.: *Uri*). 1. The father of Bezaleel one of the architects of the Tabernacle (Ex. xxxi. 2, xxxv. 30, xxxviii. 22; 1 Chr. ii. 20; 2 Chr. i. 5). He was of the tribe of Judah, and grandson of Caleb ben-Hezron, his father being Hur, who, according to tradition, was the husband of Miriam.

2. ('Αδαΐ.) The father of Geber, Solomon's commissariat officer in Gilead (1 K. iv. 19).

3. (Ωδούθ; Alex. Ωδουε.) One of the gatekeepers of the Temple, who had married a foreign wife in the time of Ezra (Ezr. x. 24).

**URI'AH** (אוּרִיָּה, *light of Jehovah:* Οὐρίας [Vat. -ρει; in 1 Chr. xi. 41, Ουρία, Alex. Ουριας, Vat. FA. Ουρει:] *Urias*). 1. One of the thirty commanders of the thirty bands into which the Israelite army of David was divided (1 Chr. xi. 41; 2 Sam. xxiii. 39). Like others of David's officers Ittai of Gath; Ishbosheth the Canaanite, 2 Sam. xxiii. 8, LXX.; Zelek the Ammonite, 2 Sam. xxiii. 37) he was a foreigner — a Hittite. His name, however, and his manner of speech (2 Sam. xi. 11) indicate that he had adopted the Jewish religion. He married Bathsheba, a woman of extraordinary beauty, the daughter of Eliam — possibly the same as the son of Ahithophel, and one of his brother officers (2 Sam. xxiii. 34); and hence, perhaps, as Professor Blunt conjectures (*Coincidences*, II. x.), Uriah's first acquaintance with Bathsheba. It may be inferred from Nathan's parable (2 Sam. xii. 3) that he was passionately devoted to his wife, and that their union was celebrated in Jerusalem as one of peculiar tenderness. He had a house at Jerusalem underneath the palace (2 Sam. xi. 2). In the first war with Ammon he followed Joab to the siege, and with him remained encamped in the open field (*ibid.* 11). He returned to Jerusalem, at an order from the king, on the pretext of asking news of the war, — really in the hope that his return to his wife might cover the shame of his own crime. The king met with an unexpected obstacle in the austere, soldier-like spirit which guided all Uriah's conduct, and which gives us a high notion of the character and discipline of David's officers. He steadily refused to go home, or partake of any of the indulgences of domestic life, whilst the Ark and the host were in booths and his comrades lying in the open air. He partook of the royal hospitality, but slept always at the gate of the palace till the last night, when the king at a feast vainly endeavored to entrap him by intoxication. The soldier was overcome by the debauch, but still retained his sense of duty sufficiently to insist on sleeping at the palace. On the morning of the third day, David sent him back to the camp with a letter (as in the story of Bellerophon), containing the command to Joab to cause his destruction in the battle. Josephus (*Ant.* vii. 7, § 1) adds, that he gave as a reason an imaginary offense of Uriah. None such appears in the actual letter. Probably to an unscrupulous soldier like Joab the absolute will of the king was sufficient.

The device of Joab was, to observe the part of the wall of Rabbath-Ammon, where the greatest force of the besieged was congregated, and thither, as a kind of forlorn hope, to send Uriah. A sally took place. Uriah and the officers with him advanced as far as the gate of the city, and were there shot down by the archers on the wall. It seems as if it had been an established maxim of Israelitish warfare not to approach the wall of a besieged city; and one instance of the fatal result was always quoted, as if proverbially, against it — the sudden and ignominious death of Abimelech at Thebez, which cut short the hopes of the then rising monarchy. This appears from the fact (as given in the LXX.) that Joab exactly anticipates what the king will say when he hears of the disaster.

Just as Joab had forewarned the messenger, the king broke into a furious passion on hearing of the loss, and cited, almost in the very words which Joab had predicted, the case of Abimelech. (The only variation is the omission of the name of the grandfather of Abimelech, which, in the LXX., is Ner instead of Joash.) The messenger, as instructed by Joab, calmly continued, and ended the story with the words: "Thy servant also, Uriah the Hittite, is dead." In a moment David's anger is appeased. He sends an encouraging message to Joab on the unavoidable chances of war, and urges him to continue the siege. It is one of the touching parts of the story that Uriah falls unconscious of his wife's dishonor. She hears of her husband's death. The narrative gives no hint as to her shame or remorse.

Digitized by Google

She "mourned" with the usual signs of grief as a widow; and then became the wife of David (2 Sam. xi. 27).

Uriah remains to us, preserved by this tragical incident, an example of the chivalrous and devoted characters that were to be found amongst the Canaanites serving in the Hebrew army. A. P. S.

2. [Οὐρίας; Vat. Ουρειας.] High-priest in the reign of Ahaz (Is. viii. 2; 2 K. xvi. 10–16). We first hear of him as a witness to Isaiah's prophecy concerning Maher-shalal-hash-baz, with Zechariah, the son of Jeberechiah. He is probably the same as Urijah the priest, who built the altar for Ahaz (2 K. xvi. 10). If this be so, the prophet summoned him as a witness probably on account of his position as high-priest, not on account of his personal qualities; though, as the incident occurred at the beginning of the reign of Ahaz, Uriah's irreligious subserviency may not yet have manifested itself. When Ahaz, after his deliverance from Rezin and Pekah by Tiglath-Pileser, went to wait upon his new master at Damascus, he saw there an altar which pleased him, and sent the pattern of it to Uriah at Jerusalem, with orders to have one made like it against the king's return. Uriah zealously executed the idolatrous command, and when Ahaz returned, not only allowed him to offer sacrifices upon it, but basely complied with all his impious directions. The new altar was accordingly set in the court of the Temple, to the east of where the brazen altar used to stand; and the daily sacrifices, and the burnt-offerings of the king and people, were offered upon it; while the brazen altar, having been removed from its place, and set to the north of the Syrian altar, was reserved as a private altar for the king to inquire by. It is likely, too, that Uriah's compliances did not end here, but that he was a consenting party to the other idolatrous and sacrilegious acts of Ahaz (2 K. xvi. 17, 18, xxiii. 5, 11, 12; 2 Chr. xxviii. 23–25).

Of the parentage of Uriah we know nothing. He probably succeeded Azariah, who was high-priest in the reign of Uzziah, and was succeeded by that Azariah who was high-priest in the reign of Hezekiah. Hence it is probable that he was son of the former and father of the latter, it being by no means uncommon among the Hebrews, as among the Greeks, for the grandchild to have the grandfather's name. Probably, too, he may have been descended from that Azariah who must have been high-priest in the reign of Asa. But he has no place in the sacerdotal genealogy (1 Chr. vi. 4–15), in which there is a great gap between Amariah in ver. 11, and Shallum the father of Hilkiah in ver. 13. [HIGH-PRIEST, ii. 1071 *b*.] It is perhaps a legitimate inference that Uriah's line terminated in his successor, Azariah, and that Hilkiah was descended through another branch from Amariah, who was priest in Jehoshaphat's reign.

3. [Οὐρία, *gen.*] A priest of the family of Hakkoz (in A. V. wrongly Koz), the head of the seventh course of priests. (See 1 Chr. xxiv. 10.) It does not appear when this Urijah lived, as he is only named as the father or ancestor of Meremoth in the days of Ezra and Nehemiah (Ezr. viii. 33; Neh. iii. 4, 21). In Neh. his name is URIJAH. A. C. H.

**URI'AS** (Οὐρίας: *Urias*). 1. URIAH, the husband of Bathsheba (Matt. i. 6).

2. [Vat. Ουρειας.] URIJAH, 3 (1 Esdr. ix. 43; comp. Neh. vii. 4).

**U'RIEL**, *fire of God*, an angel named only in 2 Esdr. iv. 1, 36, v. 20, x. 28. In the second of these passages he is called "the archangel."

* In the book of Enoch, Uriel is described as "the angel of thunder and trembling" (c. 20), and the angel "placed over all the lights of heaven" (c. 75, § 3). Milton makes him "regent of the sun." A.

**U'RIEL** (אוּרִיאֵל [*fire of God*]: Οὐριήλ; [Vat. Οριηλ:] *Uriel*). 1. A Kohathite Levite, son of Tahath (1 Chr. vi. 24 [9]). If the genealogies were reckoned in this chapter from father to son, Uriel would be the same as Zephaniah in ver. 36; but there is no reason to suppose that this is the case.

2. [In ver. 11, Vat. FA. Αριηλ.] Chief of the Kohathites in the reign of David (1 Chr. xv. 5, 11). In this capacity he assisted, together with 120 of his brethren, in bringing up the ark from the house of Obed-edom.

3. Uriel of Gibeah was the father of Maachah, or Michaiah, the favorite wife of Reboboam, and mother of Abijah (2 Chr. xiii. 2). In 2 Chr. xi. 20 she is called "Maachah the daughter of Absalom;" and Josephus (*Ant.* viii. 10, § 1) explains this by saying that her mother was Tamar, Absalom's daughter. Rashi gives a long note to the effect that Michaiah was called Maachah after the name of her daughter-in-law the mother of Asa, who was a woman of renown, and that her father's name was Uriel Abishalom. There is no indication, however, that Absalom, like Solomon, had another name, although in the Targum of R. Joseph on Chronicles it is said that the father of Maachah was called Uriel that the name of Absalom might not be mentioned.

**URI'JAH** (אוּרִיָּה [*flame of Jehovah*]: Οὐρίας [Vat. -ρει-]: *Urias*). 1. Urijah the priest in the reign of Ahaz (2 K. xvi. 10), probably the same as URIAH, 2.

2. (Οὐρία.) A priest of the family of Koz, or hak-Koz [Neh. iii. 4, 21], the same as URIAH, 3.

3. (Οὐρίας; [Vat. Ουρεια:] *Uria*.) One of the priests who stood at Ezra's right-hand when he read the Law to the people (Neh. viii. 4).

4. (אוּרִיָּהוּ: [Οὐρίας; Vat. -ρει-:] *Urias*.) The son of Shemaiah of Kirjath-jearim. He prophesied in the days of Jehoiakim concerning the land and the city, just as Jeremiah had done, and the king sought to put him to death; but he escaped, and fled into Egypt. His retreat was soon discovered: Elnathan and his men brought him up out of Egypt, and Jehoiakim slew him with the sword, and cast his body forth among the graves of the common people (Jer. xxvi. 20–23). The story of Shemaiah appears to be quoted by the enemies of Jeremiah as a reason for putting him to death; and, as a reply to the instance of Micah the Morasthite, which Jeremiah's friend gave as a reason why his words should be listened to and his life spared. Such, at least, is the view adopted by Rashi. W. A. W.

**U'RIM AND THUM'MIM** (אוּרִים וְתֻמִּים: δήλωσις καὶ ἀλήθεια: *doctrina et veritas*).

I. (1.) When the Jewish exiles were met on their return from Babylon by a question which they had no *data* for answering, they agreed to postpone the settlement of the difficulty till there should rise

Digitized by Google

ap "a priest with Urim and Thummim" (Ezr. ii. 63; Neh. vii. 65). The inquiry, what those Urim and Thummim themselves were, seems likely to wait as long for a final and satisfying answer. On every side we meet with confessions of ignorance — "Non constat" (Kimchi), "Nescimus" (Aben-Ezra), "Difficile est invenire" (Augustine) — varied only by wild and conflicting conjectures. It would be comparatively an easy task to give a catalogue of these hypotheses, and transcribe to any extent the learning which has gathered round them. To attempt to follow a true historical method, and so to construct a theory which shall, at least, include all the phenomena, is a more arduous, but may be a more profitable task.

(2.) The starting-point of such an inquiry must be from the words which the A. V. has left untranslated. It will be well to deal with each separately.

(A.) In *Urim*, Hebrew scholars, with hardly an exception, have seen the plural of אוֹר (= light, or fire). The LXX. translators, however, appear to have had reasons which led them to another rendering than that of *φῶς*, or its cognates. They give *ἡ δήλωσις* (Ex. xxviii. 30; Ecclus. xlv. 10), and *δῆλοι* (Num. xxvii. 21; Deut. xxxiii. 8; 1 Sam. xxviii. 6), while in Ezr. ii. 63, and Neh. vii. 65, we have respectively plural and singular participles of *φανερίζω*. In Aquila and Theodotion we find the more literal *φωτισμοί*. The Vulg., following the lead of the LXX., but going further astray, gives *doctrina* in Ex. xxviii. 30 and Deut. xxxiii. 8, omits the word in Num. xxvii. 21, paraphrases it by "*per sacerdotes*" in 1 Sam. xxviii. 6, and gives "*judicium*" in Ecclus. xlv. 10, as the rendering of *δήλωσις*. Luther gives *Licht*. The literal English equivalent would of course be "lights;" but the renderings in the LXX. and Vulg. indicate, at least, a traditional belief among the Jews that the plural form, as in Elohim and other like words, did not involve numerical plurality.

(B.) *Thummim*. Here also there is almost a *consensus*[a] as to the derivation from תֹּם (= perfection, completeness); but the LXX., as before, uses the closer Greek equivalent *τέλειος* but once (Ezr. ii. 63), and adheres elsewhere to *ἀλήθεια*; and the Vulg., giving "*perfectus*" there, in like manner gives "*veritas*" in all other passages. Aquila more accurately chooses *τελειώσεις*. Luther, in his first edition, gave *Völligkeit*, but afterwards rested in *Recht*. What has been said as to the plural of Urim applies here also. "Light and Perfection" would probably be the best English equivalent. The assumption of a *hendiadys*, so that the two words = "perfect illumination" (Carpzov, *App. Crit.* i. 5; Bähr, *Symbolik*, ii. 135), is unnecessary and, it is believed, unsound. The mere phrase, as such, leaves it therefore uncertain whether each word by itself denoted many things of a given kind, or whether the two taken together might be referred to two distinct objects, or to one and the same object. The presence of the article הָ, and yet more of the demonstrative אֲשֶׁר before each, is rather in favor of distinctness. In Deut. xxxiii. 8, we have separately, "Thy Thummim and thy Urim," the first order being inverted. Urim is found alone in Num. xxvii. 21; 1 Sam. xxviii. 6; Thummim never by itself, unless with Züllig we find it in Ps. xvi. 5.

II. (1.) *Scriptural Statements.* — The mysterious words meet us for the first time, as if they needed no explanation, in the description of the high-priest's apparel. Over the EPHOD there is to be a "breastplate of judgment" (חֹשֶׁן הַמִּשְׁפָּט, *λογεῖον κρίσεως*:[b] *rationale judicii*), of gold, scarlet, purple, and fine linen, folded square and doubled, a "span" in length and width. In it are to be set four rows of precious stones, each stone with the name of a tribe of Israel engraved on it, that Aaron may "bear them upon his heart." Then comes a further order. Inside the breastplate, as the tables of the Covenant were placed inside the Ark (the preposition אֶל is used in both cases, Ex. xxv. 16, xxviii. 30), are to be placed "the Urim and the Thummim," the Light and the Perfection; and they, too, are to be on Aaron's heart, when he goes in before the Lord (Ex. xxviii. 15–30). Not a word describes them. They are mentioned as things already familiar both to Moses and the people, connected naturally with the functions of the high-priest, as mediating between Jehovah and his people. The command is fulfilled (Lev. viii. 8). They pass from Aaron to Eleazar with the sacred ephod, and other *pontificalia* (Num. xx. 28). When Joshua is solemnly appointed to succeed the great hero lawgiver, he is bidden to stand before Eleazar the priest, "who shall ask counsel for him after the judgment of Urim," and this counsel is to determine the movements of the host of Israel (Num. xxvii. 21). In the blessings of Moses, they appear as the crowning glory of the tribe of Levi ("Thy Thummim and thy Urim are with thy Holy One"), the reward of the zeal which led them to close their eyes to everything but "the Law and the Covenant" (Deut. xxxiii. 8, 9). Once, and once only, are they mentioned by name in the history of the Judges and the monarchy. Saul, left to his self-chosen darkness, is answered "neither by dreams, nor by Urim, nor by prophet" (1 Sam. xxviii. 6). There is no longer a priest with Urim and Thummim (*τοῖς φανερίζουσι καὶ τοῖς τελείοις*, Ezr. ii. 63; *ὁ φανερίσων*, Neh. vii. 65) to answer hard questions. When will one appear again? The Son of Sirach copies the Greek names (*δῆλοι, ἀλήθεια*) in his description of Aaron's garments, but throws no light upon their meaning or their use (Ecclus. xlv. 10).[c]

[a] The exceptions to the *consensus* are just worth noticing. (1.) Bellarmine wishing to defend the Vulg. translation, suggested the derivation of Urim from יָרָה = "to teach;" and Thummim from אָמַן, "to be true." (Buxtorf, *Diss. de Ur. et Th.*) (2.) Thummim has been derived from תָּאַם contr. תֹּם = "a twin," on the theory that the two groups of gems, six on each side the breast-plate, were what constituted the Urim and Thummim. (R. Asarias, in Buxtorf, *l. c.*)

[b] The LXX. rendering, so different from the literal meaning, must have originated either (1) from a false etymology, as if the word was derived from דָּרַשׁ = "to divine" (Gen. xliv. 15); or (2) from the oracular use made of the breastplate; or (3) from other associations connected with the former (*infra*). The Vulg. simply follows the LXX. Seb. Schmidt gives the more literal "*pectorale*." "Breast-plate" is, perhaps, somewhat misleading.

The A. V., singularly enough, retranslates the

Digitized by Google

(2.) Besides these direct statements, there are others in which we may, without violence, trace a reference, if not to both, at least to the Urim. When questions precisely of the nature of those described in Num. xxvii. 21 are asked by the leader of the people, and answered by Jehovah (Judg. i. 1, xx. 18) — when like questions are asked by Saul of the high-priest Ahiah, "wearing an ephod" (1 Sam. xiv. 3, 18) — by David, as soon as he has with him the presence of a high-priest with his ephod (1 Sam. xxiii. 2, 12, xxx. 7, 8) — we may legitimately infer that the treasures which the ephod contained were the conditions and *media* of his answer. The questions are in almost all cases strategical,[a] "Who shall go up for us against the Canaanites first?" (Judg. i. 1, so xx. 18), "Will the men of Keilah deliver me and my men into the hand of Saul?" (1 Sam. xxiii. 12), or, at least, national (2 Sam. xxi. 1). The answer is, in all cases, very brief, but more in form than a simple Yes or No. One question only is answered at a time.

(3.) It deserves notice before we pass beyond the range of Scriptural *data*, that in some cases of defection from the established religious order, we find the ephod connected not with the Urim but with the TERAPHIM, which, in the days of Laban, if not earlier, had been conspicuous in Aramaic worship. Micah, first consecrating one of his own sons, and then getting a Levite as his priest, makes for him "an ephod and teraphim" (Judg. xvii. 5, xviii. 14, 20). Throughout the history of the northern kingdom their presence at Dan made it a sacred place (Judg. xviii. 30), and apparently determined Jeroboam's choice of it as a sanctuary. When the prophet Hosea foretells the entire sweeping away of the system which the Ten Tribes had cherished, the point of extremest destitution is, that "they shall be many days . . . . without an ephod, and without teraphim" (Hos. iii. 4), deprived of all counterfeit oracles, in order that they may in the end "return and seek the Lord."[b] It seems natural to infer that the teraphim were, in these instances, the unauthorized substitutes for the Urim. The inference is strengthened by the fact that the LXX. uses here, instead of teraphim, the same word (δήλωσιν) which it usually gives for Urim. That the teraphim were thus used through the whole history of Israel may be inferred from their frequent occurrence in conjunction with other forms of divination. Thus we have in 1 Sam. xv. 23, "witchcraft" and "teraphim" (A. V. "idolatry"), in 2 K. xxiii. 24, "familiar spirits," "wizards, and teraphim" (A. V. "images"). The king of Babylon, when he uses divination, consults them (Ez. xxi. 21). They speak vanity (Zech. x. 2).

III. *Theories.* — (1.) For the most part we have to deal with independent conjectures rather than with inferences from these *data*. Among the latter, however, may be noticed the notion that, as Moses is not directed to *make* the Urim and Thummim, they must have had a supernatural origin, specially created, unlike anything upon earth (R. ben Nachman and Hottinger in Buxtorf, *Diss. de U. et T.* in Ugolini, xii.). It would be profitless to discuss so arbitrary an hypothesis.

(2.) A favorite view of Jewish and of some Christian writers has been, that the Urim and Thummim were identical with the twelve stones on which the names of the tribes of Israel were engraved, and the mode in which an oracle was given was by the illumination, simultaneous or successive, of the letters which were to make up the answer (Jalkut Sifre, Zohar *in Exod.* f. 105; Maimonides, R. ben Nachman, in Buxtorf, *l. c.*; Drusius, in *Crit. Sac.* on Ex. xxviii.; Chrysostom, Grotius, *et al.*). Josephus (*Ant.* iii. 7, § 5) adopts another form of the same story, and, apparently identifying the Urim and Thummim with the sardonyxes on the shoulders of the ephod, says that they were bright before a victory, or when the sacrifice was acceptable, dark when any disaster was impending. Epiphanius (*de xii. gemm.*), and the writer quoted by Suidas (*s. v.* Ἐφούδ), present the same thought in yet another form. A single diamond (ἀδάμας) placed in the centre of the breastplate prognosticated peace when it was bright, war when it was red, death when it was dusky. It is conclusive against such views (1) that, without any evidence, without even an analogy, they make unauthorized additions to the miracles of Scripture; (2) that the former identify two things which, in Ex. xxviii., are clearly distinguished; (3) that the latter makes no distinction between the Urim and the Thummim, such as the repeated article leads us to infer.

(3.) A theory, involving fewer gratuitous assumptions, is that in the middle of the ephod, or within its folds, there was a stone or plate of gold on which was engraved the sacred name of Jehovah, the *Shem-hammephorash* of Jewish cabbalists,[c] and that by virtue of this, fixing his gaze on it, or reading an invocation which was also engraved with the name, or standing in his ephod before the mercy-seat, or at least before the veil of the sanctuary, he became capable of prophesying, hearing the Divine voice within, or listening to it as it proceeded, in articulate sounds, from the glory of the Shechinah (Buxtorf, *l. c.* 7; Lightfoot, vi. 278; Braunius, *de Vestitu Hebr.* ii.; Saalschütz, *Archäolog.* ii. 363). Another form of the same thought is found in the statement of Jewish writers, that the Holy Spirit spake sometimes by Urim, sometimes by prophecy, sometimes by the Bath-Kol (Seder Olam, c. xiv. in Braunius, *l. c.*), or that the whole purpose of the unknown symbols was "ad excitandam prophetiam" (R. Levi ben Gershon, in Buxtorf, *l. c.*; Kimchi, in Spencer, *l. c.*). A more eccentric form of the "writing" theory was propounded by the elder Carpzov, who maintained that the Urim and Thummim were two confessions of faith in the Messiah and the Holy Spirit (Carpzov, *App. Crit.* i. 5).

(4.) Spencer (*de Ur. et Th.*) presents a singular

---

Greek words back into the Hebrew, and gives "Urim and Thummim" as if they were proper names.

[a] On this account, probably, the high-priest was to go out to battle (Num. xxxi. 6), as, in his absence, there was to be a *Sacerdos Castrensis*. [PRIEST.]

[b] The writer cannot bring himself, with Pusey (*Comm.* in loc.), to refer the things named by the prophet, partly to the true, partly to the false ritual; still less, with Spencer (*Diss. de Ur. et Th.*), to see in all of them things which the prophet recognises as right and good. It is simpler to take them as describing the *actual* polity and ritual in which the northern kingdom had gloried, and of which it was to be deprived.

[c] A wilder form of this belief is found in the cabbalistic book Zohar. There the Urim is said to have had the Divine name in 42, the Thummim in 72 letters. The notion was probably derived from the Jewish invocations of books like the *Clavicula Salomonis* [SOLOMON.]

Digitized by Google

mion of acuteness and extravagance. He rightly recognizes the distinctness of the two things which others had confounded. Whatever the Urim and Thummim were, they were not the twelve stones, and they were distinguishable one from the other. They were placed inside the folds of the doubled *Choshen*. Resting on the facts referred to, he inferred the identity of the Urim and the Teraphim.[a] This was an instance in which the Divine wisdom accommodated itself to man's weakness, and allowed the debased superstitious Israelites to retain a fragment of the idolatrous system of their fathers, in order to wean them gradually from the system as a whole. The obnoxious name of Teraphim was dropped. The thing itself was retained. The very name Urim was, he argued, identical in meaning with Teraphim.[b] It was, therefore, a small image probably in human form. So far the hypothesis has, at least, the merit of being inductive and historical; but when he comes to the question how it was instrumental oracularly, he passes into the most extravagant of all assumptions. The image, when the high-priest questioned it, spoke by the mediation of an angel, with an articulate human voice, just as the Teraphim spoke, in like manner, by the intervention of a demon! In dealing with the Thummim, which he excludes altogether from the oracular functions of the Urim, Spencer adopts the notion of an Egyptian archetype, which will be noticed further on.

(5.) Michaelis (*Laws of Moses*, v. § 52) gives his own opinion that the Urim and Thummim were three stones, on one of which was written Yes, on another No, while the third was left blank or neutral. The three were used as lots, and the high-priest decided according as the one or the other was drawn out. He does not think it worth while to give one iota of evidence; and the notion does not appear to have been more than a passing caprice. It obviously fails to meet the phenomena. Lots were familiar enough among the Israelites (Num. xxvi. 55; Josh. xiii. 6, *et al.*; 1 Sam. xiv. 41; Prov. xvi. 33), but the Urim was something solemn and peculiar. In the cases where the Urim was consulted, the answers were always more than a mere negative or affirmative.

(6.) The conjecture of Züllig (*Comm. in Apoc. Exc.* ii.), though adopted by Winer (*Realwb.*), can hardly be looked on as more satisfying. With him the Urim are bright, *i. e.* cut and polished, diamonds, in form like dice; the Thummim perfect, *i. e.* whole, rough, uncut ones, each class with inscriptions of some kind engraved on it. He supposes a handful of these to have been carried in the pouch of the high-priest's *Choshen*, and when he wished for an oracle, to have been taken out by him and thrown on a table, or, more probably, on the Ark of the Covenant. As they fell their position, according to traditional rules known only to the high-priestly families, indicated the answer. He compares it with fortune-telling by cards or coffee-grounds. The whole scheme, it need hardly be said, is one of pure invention, at once arbitrary and offensive. It is at least questionable whether the Egyptians had access to diamonds, or knew the art of polishing or engraving them. [DIAMOND.] A handful of diamond cubes, large enough to have words or monograms engraved on them, is a thing which has no parallel in Egyptian archæology, nor, indeed, anywhere else.

(7.) The latest Jewish interpreter of eminence (Kalisch, on Ex. xxviii. 31), combining parts of the views (2) and (3), identifies the Urim and Thummim with the twelve tribal gems, looks on the name as one to be explained by a hendiadys (Light and Perfection = Perfect illumination), and believes the high-priest, by concentrating his thoughts on the attributes they represented, to have divested himself of all selfishness and prejudice, and so to have passed into a true prophetic state. In what he says on this point there is much that is both beautiful and true. Lightfoot, it may be added, had taken the same view (ii. 407, vi. 278), and that given above in (3) converges to the same result.

IV. *One more Theory.* — (1.) It may seem venturesome, after so many wild and conflicting conjectures, to add yet another. If it is believed that the risk of falling into one as wild and baseless need not deter us, it is because there are materials within our reach, drawn from our larger knowledge of antiquity, and not less from our fuller insight into the less common phenomena of consciousness, which were not, to the same extent, within the reach of our fathers.

(2.) The starting point of our inquiry may be found in adhering to the conclusions to which the Scriptural statements lead us. The Urim were not identical with the Thummim, neither of them identical with the tribal gems. The notion of a *hendiadys* (almost always the weak prop of a weak theory) may be discarded. And, seeing that they are mentioned with no description, we must infer that they and their meaning were already known, if not to the other Israelites, at least to Moses. If we are to look for their origin anywhere, it must be in the customs and the symbolism of Egypt.

(3.) We may start with the Thummim, as presenting the easier problem of the two. Here there is at once a patent and striking analogy. The priestly judges of Egypt, with whose presence and garb Moses must have been familiar, wore, each of them, hanging on his neck, suspended on a golden chain, a figure which Greek writers describe as an image of Truth (Ἀλήθεια, as in the LXX.) often with closed eyes, made sometimes of a sapphire or other precious stones, and, therefore necessarily small. They were to see in this a symbol of the purity of motive, without which they would be unworthy of their office. With it they touched the lips of the litigant as they bade him speak the truth, the whole, the perfect truth (Diod. Sic. i. 48, 75; Ælian, *Var. Hist.* xiv. 34). That this parallelism commended itself to the most learned of the Alexandrian Jews we may infer (1) from the deliberate but not obvious use by the LXX. of the word ἀλήθεια as the translation of Thummim; (2) from a remarkable passage in Philo (*de Vit. Mos.* iii. 11), in which he says that the breastplate (λόγιον) of the high-priest was made strong that he might wear as an image (ἵνα ἀγαλματοφορῇ) the two virtues which were so needful for his office.

[a] He had been preceded in this view by Joseph Mede (*Disc.* I. c. 35), who pointed out the strong resemblance, if not the identity of the two.

[b] The process of proof is ingenious, but hardly convincing. Urim = "lights, fires;" Teraphim = "the burning, or fiery ones;" and Teraphim is but the same word, with an Aramaic substitution of ר for ד.

Digitized by Google

The connection between the Hebrew and the Egyptian symbol was first noticed, it is believed, by Spencer (*l. c.*). It was met with cries of alarm. No single custom, rite, or symbol, could possibly have been transferred from an idolatrous system into that of Israel. There was no evidence of the antiquity of the Egyptian practice. It was probably copied from the Hebrew (Witsius, *Ægyptiaca*, ii. 10, 11, 12, in Ugolini, i.; Riboudealdus, *de Urim et Th.* in Ugolini, xii.; Patrick, *Comm. in Ex.* xxviii.). The discussion of the principle involved need not be entered on here. Spencer's way of putting the case, assuming that a debased form of religion was given in condescension to the superstitions of a debased people, made it, indeed, needlessly offensive, but it remains true, that a revelation of any kind must, to be intelligible, use preëxistent words, and that those words, whether spoken or symbolic, may therefore be taken from any language with which the recipients of the revelation are familiar.[a] In this instance the prejudice has worn away. The most orthodox of German theologians accept the once startling theory, and find in it a proof of the veracity of the Pentateuch (Hengstenberg, *Egypt and the Five Books of Moses*, c. vi.). It is admitted, partially at least, by a devout Jew (Kalisch, on Ex. xxviii. 31).[b] And the missing link of evidence has been found. The custom was not, as had been said, of late origin, but is found on the older monuments of Egypt. There, round the neck of the judge, are seen the two figures of Thmei, the representative of Themis, Truth, Justice (Wilkinson, *Ancient Egyptians*, v. 28). The coincidence of sound may, it is true, be accidental, but it is at least striking. In the words which tell of the tribe of Levi, in close connection with the Thummim as its chief glory, that it did the stern task of duty, blind to all that could turn it aside to evil, "saying to his father and his mother, I have not seen him" (Deut. xxxiii. 9), we may perhaps trace a reference to the closed eyes of the Egyptian Thmei.

(4.) The way is now open for a further inquiry. We may legitimately ask whether there was any symbol of Light standing to the Urim in the same relation as the symbolic figure of Truth stood to the Thummim. And the answer to that question is as follows. On the breast of well-nigh every member of the priestly caste of Egypt there hung a pectoral plate, corresponding in position and in size to the *Chosben* of the high-priest of Israel. And in many of these we find, in the centre of the *pectorale*, right over the heart of the priestly mummy, as the Urim was to be "on the heart" of Aaron, what was a known symbol of Light (see British Museum, *First Egyptian Room, Cases* 67, 69, 70, 88, 89. *Second ditto, Cases* 68, 69, 74). In that symbol were united and embodied the highest religious thoughts to which man had then risen. It represented the Sun and the Universe, Light and Life, Creation and Resurrection. The material of the symbol varied according to the rank of the wearer It might be of blue porcelain, or jasper, or cornelian, or lapis lazuli, or amethyst. Prior to our knowing what the symbol was, we should probably think it natural and fitting that this, like the other should have been transferred from the lower worship to the higher, from contact with falsehood to fellowship with truth. Position, size, material, meaning, everything answers the conditions of the problem.

(5.) But the symbol in this case was the mystic Scarabæus; and it may seem to some startling and incredible to suggest that such an emblem could have been borrowed for such a purpose. It is perhaps quite as difficult for us to understand how it could *ever* have come to be associated with such ideas. We have to throw ourselves back into a stage of human progress, a phase of human thought the most utterly unlike any that comes within our experience. Out of the mud which the Nile left in its flooding, men saw myriad forms of life issue That of the Scarabæus was the most conspicuous It seemed to them self-generated, called into being by the light, the child only of the sun. Its glossy wing-cases reflecting the bright rays made it seem like the sun in miniature. It became at once the emblem of Ra, the sun, and its creative power (Clem. Alex. *Strom.* v. 4, § 21; Euseb. *Præp. Evang.* iii. 4; Brugsch, *Liber Metempsychoseos*, p 33; Wilkinson, *Ancient Egyptians*, iv. 295, v. 26, 476). But it came also out of the dark earth, after the flood of waters, and was therefore the symbol of life rising out of death in new forms; of a resurrection and a metempsychosis (Brugsch, *l. c.* and *Ægypt. Alterth.* p. 32). So it was that not in Egypt only, but in Etruria and Assyria and other countries, the same strange emblems reappeared (Dennis, *Cities and Sepulchres of Etruria*, Introd. lxxiii.; Layard, *Nineveh*, ii. 214). So it was that men, forgetting the actual in the ideal, invested it with the title of *Monogenhs* (Horapollo, *Hierogl.* i. c. 10), that the more mystic, dreamy, Gnostic sects adopted it into their symbolic language, and that semi-Christian Scarabei are found with the sacred words Jao, Sabaoth, or the names of angels engraved on them (Bellermann, *Ueber die Scarabäen-Gemmen*, i. 10), just as the mystic *Tau*, or *Crux ansata*, appears, in spite of its original meaning, on the monuments of Christian Egypt (Wilkinson, *Anc. Egypt.* v. 283). In older Egypt it was, at any rate, connected with the thought of Divine illumination, found in frequent union with the symbolic eye, the emblem of the providence of God, and with the hieroglyphic invocation, "Tu radians das vitam puris hominibus" (Brugsch's translation, *Liber Metemps.* p. 33). It is obvious that in such a case, as with the *Crux ansata*, the Scarabæus is neither an idol, nor identified with idolatry.[c] It is simply a *word*, as much the mere exponent of a thought as if it were spoken with

[a] It may be reasonably urged indeed that in such cases the previous connection with a false system is a reason *for*, and not *against* the use of a symbol in itself expressive. The priests of Israel were taught that they were not to have lower thoughts of the light and perfection which they needed than the priests of Ra.

[b] It is right to add that the Egyptian origin is rejected both by Bähr (*Symbolik*, ii. 164) and Ewald (*Alterthüm.* pp. 307–309), but without sufficient grounds. Ewald's treatment of the whole subject is, indeed, at once superficial and inconsistent. In the *Alterthümer* l. c.) he speaks of the Urim and Thummim *lots*, adopting Michaelis's view. In his *Propheten* (i. 15) he speaks of the high-priest fixing his gaze on them to bring himself into the prophetic state.

[c] The symbolic language of one nation or age will, of course, often be unintelligible, and even seem ludicrous to another. They will take for granted that men have worshipped what they manifestly respected Would it be easy to make a Mohammedan understand clearly the meaning of the symbols of the four Evangelists as used in the ornamentations of English churches? Would an English congregation, and archæologists, bear to be told that they were to en

J s lips, or written in phonetic characters. There s nothing in its Egyptian origin or its animal form which need startle us any more than the like origin of the Ark or the Thummim, or the like form in the BRAZEN SERPENT, or the fourfold symbolic figures of the Cherubim. It is to be added, that Joseph by his marriage with the daughter of the priest of On, the priest of the sun-god Ra, and Moses, as having been trained in the learning of the Egyptians, and probably among the priests of the same ritual, and in the same city, were certain to be acquainted with the sculptured *word*, and with its meaning. For the latter, at any rate, it would need no description, no interpretation. Deep set in the *Choshen*, between the gems that represented Israel, it would set forth that Light and Truth were the centre of the nation's life. Belonging to the breastplate of judgment, it would bear witness that the high-priest, in his oracular acts, needed above all things spotless integrity and Divine illumination. It fulfilled all the conditions and taught all the lessons which Jewish or Christian writers have connected with the Urim.

(6.) (A.) Have we any *data* for determining the material of the symbol? The following tend at least to a definite conclusion: (1.) If the stone was to represent light, it would probably be one in which light was, as it were, embodied in its purest form, colorless and clear, diamond or rock crystal. (2.) The traditions quoted above from Suidas and Epiphanius confirm this inference.[a] (3.) It is accepted as part of Züllig's theory, by Dean Trench (*Epistles to Seven Churches*, p. 125).[b] The "white stone" of Rev. ii. 17, like the other rewards of him that overcometh, declared the truth of the Universal Priesthood. What had been the peculiar treasure of the house of Aaron should be bestowed freely on all believers.

(B.) Another fact connected with the symbol enables us to include one of the best supported of the Jewish conjectures. As seen on the bodies of Egyptian priests and others it almost always bore an inscription, the name of the god whom the priest served, or, more commonly, an invocation, from the Book of the Dead, or some other Egyptian liturgy (Hru-ṛch, *Lib. Metemps.* l. c.). There would here, also, be an analogy. Upon the old emblem, ceasing, it may be, to bear its old distinctive form,[c] there might be the "new name written," the Tetragrammaton, the *Shem-hammephorash* of later Judaism, directing the thoughts of the priest to the true Lord of Life and Light, of whom, unlike the Lord of Life in the temples of Egypt, there was no form or similitude, a Spirit, to be worshipped there are in spirit and in truth.

(7.) We are now able to approach the question, In what way was the Urim instrumental in enabling the high-priest to give a true oracular response?" We may dismiss, with the more thoughtful writers already mentioned (Kimchi, on 2 Sam. xxv., may be added), the gratuitous prodigies which have no existence but in the fancies of Jewish or Christian dreamers, the articulate voice and the illumined letters. There remains the conclusion that, in some way, they helped him to rise out of all selfishness and hypocrisy, out of all ceremonial routine, and to pass into a state analogous to that of the later prophets, and so to become capable of a new spiritual illumination. The *modus operandi* in this case may, it is believed, be at least illustrated by some lower analogies in the less common phenomena of consciousness. Among the most remarkable of such phenomena is the change produced by concentrating the thoughts on a single idea, by gazing steadfastly on a single fixed point. The brighter and more dazzling the point upon which the eyes are turned the more rapidly is the change produced. The life of perception is interrupted. Sight and hearing fail to fulfill their usual functions. The mind passes into a state of profound abstraction, and loses all distinct personal consciousness. Though not asleep it may see visions and dream dreams. Under the suggestions of a will for the time stronger than itself, it may be played on like "a thinking automaton."[d] When not so played on, its mental state is determined by the "dominant ideas" which were impressed upon it at the moment when, by its own act, it brought about the abnormal change (Dr. W. B. Carpenter in *Quarterly Rev.* xciii. 510, 523).

(8.) We are familiar with these phenomena chiefly as they connect themselves with the lower forms of mysticism, with the tricks of electro-biologists, and other charlatans. Even as such they present points of contact with many facts of interest in Scriptural or Ecclesiastical History. Independent of many facts in monastic legends of which this is the most natural explanation, we may see in the last great controversy of the Greek Church a startling proof how terrible may be the influence of these morbid states when there is no healthy moral or intellectual activity to counteract them. For three hundred years or more the rule of the Abbot Simeon of Xerocercos, prescribing a process precisely analogous to that described above, was adopted by myriads of monks in Mount Athos and elsewhere. The Christianity of the East seemed in danger of giving its sanction to a spiritual suicide like that of a Buddhist seeking, as his highest blessedness, the annihilation of the *Nirwana*. Plunged in profound abstraction, their eyes fixed on the centre of their own bodies, the Quietists of the 14th century (ἡσυχασταί, ὁμφαλόψυχοι) enjoyed an unspeakable tranquillity, believed themselves to be radiant with a Divine glory, and saw visions of the uncreated light which had shone on Tabor. Degrading as the whole matter seems to us, it was a serious danger then. The mania spread like an epidemic, even among the laity. Husbands, fathers, men of letters, and artisans gave themselves up to it. It was im-

---

grave on their seals a pelican or a fish, as a type of Christ? (Clem. Alex. *Paedag.* iii. 11, § 59.)

[a] The words of Epiphanius are remarkable. ὁ δὲ λίθος, ὃς ἦν ὁ ἀδάμας.

[b] For the reasons stated above, in discussing Züllig's theory, the writer finds himself unable to agree with Dean Trench as to the diamond being certainly the stone in question. So far as he knows, no diamonds have as yet been found among the jewels of Egypt. Rock crystal seems therefore the more probable of the two.

[c] Changes in the form of an emblem till it ceases to bear any actual resemblance to its original prototype are familiar to all students of symbolism. The *Crux ansata*, the *Tau*, which was the sign of life, is, perhaps, the most striking instance (Wilkinson, *Anc. Egypt.* v. 283). Gesenius, in like manner, in his *Monumenta Phaenicia*, ii. 68, 69, 70), gives engravings of Scarabei in which nothing but the oval form is left.

[d] The word is used, of course, in its popular sense, as a toy moving by machinery. Strictly speaking, automatic force is just the element which has, for the time disappeared.

Digitized by Google

portant enough to be the occasion of repeated Synods, in which emperors, patriarchs, bishops were eager to take part, and mostly in favor of the practice, and the corollaries deduced from it (Fleury, *Hist. Eccles.* xcv. 9; Gieseler, *Ch. Hist.* § 129; Maury, *La Magie et l'Astrologie*, pp. 429, 430).

(9.) It is at least conceivable, however, that, within given limits, and in a given stage of human progress, the state which seems so abnormal might have a use as well as an abuse. In the opinion of one of the foremost among modern physiologists, the processes of hypnotism would have their place in a perfect system of therapeutics (*Quart. Review*, l. c.). It is open to us to believe that they may, in the less perfect stages of the spiritual history of mankind, have helped instead of hindering. In this way only, it may be, the sense-bound spirit could abstract itself from the outer world, and take up the attitude of an expectant tranquillity. The entire suppression of human consciousness, as in the analogous phenomena of an ecstatic state [comp. TRANCE], the surrender of the entire man to be played upon, as the hand plays upon the harp, may, at one time, have been an actual condition of the inspired state, just as even now it is the only conception which some minds are capable of forming of the fact of inspiration in any form or at any time. Bearing this in mind, we may represent to ourselves the process of seeking counsel "by Urim." The question brought was one affecting the well-being of the nation, or its army, or its king. The inquirer spoke in a low whisper, asking one question only at a time (Gem. Bab. *Joma*, in Medo, l. c.). The high-priest, fixing his gaze on the "gems oracular" that lay "on his heart," fixed his thoughts on the Light and the Perfection which they symbolized, on the Holy Name inscribed on them. The act was itself a prayer, and, like other prayers, it might be answered.[a] After a time, he passed into the new, mysterious half-ecstatic state.[b] All disturbing elements — selfishness, prejudice, the fear of man — were eliminated. He received the insight which he craved. Men trusted in his decisions as with us men trust the judgment which has been purified by prayer for the help of the Eternal Spirit, more than that which grows only out of debate, and policy, and calculation.

(10.) It is at least interesting to think that a like method of passing into this state of insight was practiced unblamed in the country to which we have traced the Urim, and among the people for whose education this process was adapted. We need not think of Joseph, the pure, the heaven-taught, the blameless one, as adopting, still less as falsely pretending to adopt, the dark arts of a system of imposture (Gen. xliv. 5, 15). For one into whose character the dream-element of prevision entered so largely, there would be nothing strange in the use of *media* by which he might superinduce at will the dream-state which had come to him in his youth unbidden, with no outward stimulus; and the use of the cup by which Joseph "divined" was precisely analogous to that which has been now described. To fill the cup with water, to fix the eye on a gold or silver coin in it, or, more frequently, on the dazzling reflection of the sun's rays from it, was an essential part of the κυλικομαντεία, the λεκανομαντεία of ancient systems of divination (Maury, *La Magie et l'Astrologie*, pp. 426–428; Kalisch, *Genesis*, in loc.). In the most modern form of it, among the magicians of Cairo, the boy's fixed gaze upon the few drops of ink in the palm of his hand answers the same purpose and produces the same result (Lane, *Mod. Egypt.* i. c. xii.). The difference between the true and the false in these cases is, however, far greater than the superficial resemblance. To enter upon that exceptional state with vague, stupid curiosity, may lead to an imbecility which is the sport of every casual suggestion. To pass into it with feelings of hatred, passion, lust, may add to their power a fearful intensity for evil, till the state of the soul is demoniac rather than human. To enter upon it as the high-priest entered, with the prayer of faith, might in like manner intensify what was noblest and truest in him, and fit him to be for the time a vessel of the Truth.

(11.) It may startle us at first to think that any physical media should be used in a divine order to bring about a spiritual result, still more that those media should be the same as are found elsewhere in systems in which evil is at least preponderant; yet here too Scripture and History present us with very striking analogies. In other forms of worship, in the mysteries of Isis, in Orphic and Corybantian revels, music was used to work the worshippers into a state of orgiastic frenzy. In the mystic fraternity of Pythagoras it was employed before sleep, that their visions might be serene and pure (Plutarch, *De Is. et Osir.* ad fin.). Yet the same instrumentality bringing about a result analogous at least to the latter, probably embracing elements of both, was used from the first in the gatherings of the prophets (1 Sam. x. 5). It soothed the vexed spirit of Saul (1 Sam. xvi. 23); it wrought on him, when it came in its choral power, till he too burst into the ecstatic song (1 Sam. xix. 20–24). With one at least of the greatest of the prophets it was as much the preparation for his receiving light and guidance from above as the gaze at the Urim had been to the high-priest. "Elisha said . . . 'Now bring me a minstrel.' And it came to pass, when the minstrel played, that the hand of the Lord came upon him" (2 K. iii. 15).[c]

(12.) The facts just noticed point to the right answer to the question which yet remains, as to the duration of the Urim and the Thummim, and the reasons of their withdrawal. The statement of Josephus (*Ant.* iii. 7, §§ 5–7) that they had continued to shine with supernatural lustre till within two hundred years of his own time is simply a Jewish fable, at variance with the direct confession of their absence on the return from the Captivity (Ezr. ii. 63), and in the time of the Maccabees (1 Macc. iv. 46, xiv. 41). As little reliance is to

[a] The prayer of Ps. xliii. 3, "Send out thy light and thy truth," though it does not contain the words Urim and Thummim, speaks obviously of that which they symbolized, and may be looked upon as an echo of the high-priest's prayer in a form in which it might be used by any devout worshipper.

[b] The striking exclamation of Saul, "Withdraw thy hand!" when it seemed to him that the Urim was no longer needed, was clearly an interruption of this process (1 Sam. xiv. 19).

[c] That "the hand of the Lord" was the recognised expression for this awful consciousness of the Divine presence we find from the visions of Ezekiel (i. 3, iii. 14, *et al.*), and 1 K. xviii. 46. It helps us obviously to determine the sense of the corresponding phrase "with the finger of God," in Ex. xxxi. 18. Comp. too, the equivalence, in our Lord's teaching, of the two forms. "If I with the finger of God (Luke xi. 20 = 'by the Spirit of God,' Matt. xii. 28) cast out devils

be placed on the assertion of other Jewish writers, that they continued in activity till the time of the Babylonian Exile (*Sota*, p. 43; Midrash on *Song of Sol.* in Buxtorf, *l. c.*). It is quite inconceivable, had it been so, that there should have been no single instance of an oracle thus obtained during the whole history of the monarchy of Judah. The facts of the case are few, but they are decisive. Never, after the days of David, is the ephod, with its appendages, connected with counsel from Jehovah (so Carpzov, *App. Crit.* i. 5). Abiathar is the last priest who habitually uses it for that purpose (1 Sam. xxiii. 6, 9, xxviii. 6; probably also 2 Sam. xxi. 1). His name is identified in a strange tradition embodied in the Talmud (*Sanhedr. f.* 19, 1, in Lightfoot, xi. 386) with the departed glory of the Urim and the Thummim. And the explanation of these facts is not far to seek. Men had been taught by this time another process by which the spiritual might at once assert its independence of the sensuous life, and yet retain its distinct personal consciousness — a process less liable to perversion, leading to higher and more continuous illumination. Through the sense of hearing, not through that of sight, was to be wrought the subtle and mysterious change. Music — in its marvelous variety, its subtle sweetness, its spirit-stirring power — was to be, for all time to come, the lawful help to the ecstasy of praise and prayer, opening heart and soul to new and higher thoughts. The utterances of the prophets, speaking by the word of the Lord, were to supersede the oracles of the Urim. The change which about this period passed over the speech of Israel was a witness of the moral elevation which that other change involved. "He that is now called a prophet was beforetime called a seer" (1 Sam. ix. 9). To be the mouth-piece, the spokesman of Jehovah was higher than to see visions of the future, however clear, whether of the armies of Israel or the lost asses of Kish.

(13.) The transition was probably not made without a struggle. It was accompanied by, even if it did not in part cause the transfer of the Pontificate from one branch of the priestly family to another. The strange opposition of Abiathar to the will of David, at the close of his reign, is intelligible on the hypothesis that he, long accustomed, as holding the Ephod and the Urim, to guide the king's councils by his oracular answers, viewed, with some approach to jealousy, the growing influence of the prophets, and the accession of a prince who had grown up under their training. With him at any rate, so far as we have any knowledge, the Urim and the Thummim passed out of sight. It was well, we may believe, that they did so. To have the voices of the prophets in their stead was to gain and not to lose. So the old order changed, giving place to the new. If the fond yearning of the Israelites of the Captivity had been fulfilled, and a priest had once again risen with Urim and with Thummim, they would but have taken their place among the "weak and beggarly elements" which were to pass away. All attempts, from the *Rule* of Simeon to the *Spiritual Exercises* of Loyola, to invert the Divine order, to purchase spiritual ecstasies by the sacrifice of intellect and of conscience, have been steps backward into darkness, not forward into light. So it was that God, in many different measures and many different fashions (πολυμερῶς καὶ πολυτρόπως), spake in time past unto the Fathers (Heb. i. 1). So it is, in words that embody the same thought, and draw from it a needful lesson, that

"God fulfills himself in many ways,
Lest one good custom should corrupt the world."*

E. H. P.

* USDUM (أسدم: *Usdum*). This is the name of the remarkable mountain of rock-salt near the southern end of the Dead Sea, called by the natives *Hajr Usdum*, *Khashm Usdum*, and *Jebel Usdum*. The name is generally accepted as a tradition of Sodom. It has been fully described by Robinson and Tristram, and its probable connection with the saltness and volume of the sea, and with the site of Sodom, has been discussed in preceding articles. Travellers refer particularly to the fantastic shapes into which some of its pinnacles and angles are worn by the action of the elements. The latest visitor, Captain Warren, collected "most beautiful specimens of salt crystals, like icicles, only pointing towards the sky, which melted away at Jerusalem." Captain W. has been the first, in modern times, to accomplish the ascent of the cliff *Sebbeh* (Masada) on the east (*Quart. Statem. Pal. Ex. Fund*, No. iv. pp. 141–150). [MASADA; SIDDIM, VALE OF; SODOM.] S. W.

USURY. Information on the subject of lending and borrowing will be found under LOAN. It need only be remarked here that the practice of mortgaging land, sometimes at exorbitant interest, grew up among the Jews during the Captivity, in direct violation of the Law (Lev. xxv. 36, 37; Ex. xviii. 8, 13, 17). We find the rate reaching 1 in 100 per month, corresponding to the Roman *centesimæ usuræ*, or 12 per cent. per annum — a rate which Niebuhr considers to have been borrowed from abroad, and which is, or has been till quite lately, a very usual or even a minimum rate in the East (Nieb. *Hist. of Rome*, iii. 57, Engl. Tr.; Volney, *Trvv.* ii. 254, note; Chardin, *Voy.* vi. 122). Yet the law of the Kurán, like the Jewish, forbids all usury (Lane, *M. E.* i. 132; Sale, *Kurán*, c. 30). The laws of Menu allow 18 and even 24 per cent. as an interest rate; but, as was the law in Egypt, accumulated interest was not to exceed twice the original sum lent (*Laws of Menu*, c. viii. 140, 141, 151; Sir W. Jones, *Works*, vol. iii. p. 295; Diod. i. 9, 79). This Jewish practice was annulled by Nehemiah, and an oath exacted to insure its discontinuance (Neh. v. 3–13; Selden, *De Jur. Nat.* vi. 10; Hofmann, *Lex.* "Usura").

H. W. P.

* The word *usury* has come in modern English to mean excessive interest upon money loaned, either formally illegal, or at least oppressive. At the time of the Anglican version, however, the word did not bear this sense, but meant simply interest of any kind upon money, thus strictly corresponding to the Hebrew נֶשֶׁךְ (and also מַשָּׂא which is used in Neh. v. 7). It is to be remem-

* In addition to the authorities cited in the text, one has to be named to which the writer has not been able to get access, and which he knows only through the *Thesaurus* of Gesenius. Bellermann, whose treatise on the Scarabæi are quoted above, has also written, *Die Urim und Thummim, die ältesten Gemmen*. He apparently identifies the Urim and Thummim with the gems of the breastplate.

bered that the Jewish law prohibiting usury, forbade the taking of any interest whatever for money lent, without regard to the rate of interest; but this prohibition related only to the Jews, their brethren, and there was no command regulating either the taking of interest, or its amount, from foreigners. F. G.

U'TA (Οὐτά: *Utha*), 1 Esdr. v. 30. It appears to be a corruption of AKKUB (Ezr. ii. 45).

U'THAI [2 syl.] (עוּתַי [*Jehovah succors*]: Γωθί: [Vat. Γωθει:] Alex. Γωθι: *Othei*). 1. The son of Ammihud, of the children of Pharez, the son of Judah (1 Chr. ix. 4). He appears to have been one of those who dwelt in Jerusalem after the Captivity. In Neh. xi. 4 he is called "ATHAIAH the son of Uzziah."

2. (Οὐθαί; [Vat. Ουθι:] *Uthai*.) One of the sons of Bigvai, who returned in the second caravan with Ezra (Ezr. viii. 14).

U'THI (Οὐθί), 1 Esdr. viii. 40. [UTHAI, 2.]

* UTTER, Lev. v. 1, where he who does not "utter" iniquity is said to commit iniquity, *i. e.* if he does not make it known or disclose it. This sense of the word now seldom occurs except in speaking of the "utterance" or circulation of money and stocks. H.

UZ (עוּץ [*fruitful in trees*, Dietr.]: Οὐζ; [Rom. Vat. om. in 1 Chr.; Alex.] Ωυ: *Us, Hus*). This name is applied to — 1. A son of Aram (Gen. x. 23), and consequently a grandson of Shem, to whom he is immediately referred in the more concise genealogy of the Chronicles, the name of Aram being omitted[a] (1 Chr. i. 17). 2. A son of Nahor by Milcah (Gen. xxii. 21; A. V. HUZ). 3. [Ὦυς, Ὦυ: *Hus*.] A son of Dishan, and grandson of Seir (Gen. xxxvi. 28; [1 Chr. i. 42]). 4. [ἡ Αὐσῖτις; Sin. η Αυσευτις: *Hus*.] The country in which Job lived (Job i. 1). As the genealogical statements of the book of Genesis are undoubtedly ethnological, and in many instances also geographical, it may be fairly surmised that the coincidence of names in the above cases is not accidental, but points to a fusion of various branches of the Shemitic race in a certain locality. This surmise is confirmed by the circumstance that other connecting links may be discovered between the same branches. For instance, Nos. 1 and 2 have in common the names Aram (comp. Gen. x. 23, xxii. 21) and Maachah as a geographical designation in connection with the former (1 Chr. xix. 6), and a personal one in connection with the latter (Gen. xxii. 24). Nos. 2 and 4 have in common the names Buz and Buzite (Gen. xxii. 21; Job xxxii. 2), Chesed and Chasdim (Gen. xxii. 22; Job i. 17, A. V. "Chaldæans"). Shuah, a nephew of Nahor, and Shuhite (Gen. xxv. 2; Job ii. 11), and Kedem, as the country whither Abraham sent Shuah, together with his other children by Keturah, and also as the country where Job lived (Gen. xxv. 6; Job i. 3). Nos. 3 and 4, again, have in common Eliphaz (Gen. xxxvi. 10; Job ii 11), and Teman and Temanite (Gen. xxxvi. 11; Job. ii. 11). The ethnological fact embodied in the above coincidences of names appears to be as follows. Certain branches of the Aramaic family being both more ancient and occupying a more northerly position than the others, coalesced with branches of the later Abrahamids, holding a somewhat central position in Mesopotamia and Palestine, and again with branches of the still later Edomites of the south, after they had become a distinct race from the Abrahamids. This conclusion would receive confirmation if the geographical position of Uz, as described in the book of Job, harmonized with the probability of such an amalgamation. As far as we can gather, it lay either east or southeast of Palestine (Job i. 3; see BENE-KEDEM); adjacent to the Sabæans and the Chaldæans (Job i. 15, 17), consequently northward of the southern Arabians, and westward of the Euphrates; and, lastly, adjacent to the Edomites of Mount Seir, who at one period occupied Uz, probably as conquerors (Lam. iv. 21), and whose troglodyte habits are probably described in Job xxx. 6, 7. The position of the country may further be deduced from the native lands of Job's friends, Eliphaz the Temanite being an Idumæan, Elihu the Buzite being probably a neighbor of the Chaldæans, for Buz and Chesed were brothers (Gen. xxii. 21, 22), and Bildad the Shuhite being one of the Bene-Kedem. Whether Zophar the Naamathite is to be connected with Naamah in the tribe of Judah (Josh. xv. 41) may be regarded as problematical: if he were, the conclusion would be further established. From the above data we infer that the land of Uz corresponds to the *Arabia Deserta* of classical geography, at all events to so much of it as lies north of the 30th parallel of latitude. This district has in all ages been occupied by nomadic tribes, who roam from the borders of Palestine to the Euphrates, and northward to the confines of Syria. Whether the name Uz survived to classical times is uncertain: a tribe named Æsitæ (Αἰσῖται) is mentioned by Ptolemy (v. 19, § 2); this Bochart identifies with the Uz of Scripture by altering the reading into Αὐσῖται (*Phaleg* ii. 8); but, with the exception of the rendering in the LXX. (ἐν χώρᾳ τῇ Αὐσίτιδι, Job i. 1; comp. xxxii. 2), there is nothing to justify such a change. Gesenius (*Thes.* p. 1003) is satisfied with the form Æsitæ as sufficiently corresponding to Uz.

W. L. B.

U'ZAI [2 syl.] (עֻזַּי [*robust*]: Ἐζαΐ; [Vat.] FA. Ευει: *Ozi*). The father of Palal, who assisted Nehemiah in rebuilding the city wall (Neh. iii. 25).

U'ZAL (אֻזָל [see *note*]; Samar. אזל: [Rom. in Gen. Αἰβηλ; in 1 Chr. omits; Alex.] Αιζηλ, Αιζην: *Uzal, Huzal*). The sixth son of Joktan (Gen. x. 27; 1 Chr. i. 21), whose settlements are clearly traced in the ancient name of San'à, the capital city of the Yemen, which was originally Awzál, أوزال (Ibn-Khaldoon, ap. Caussin, *Essai*, i. 40, foot-note; *Marásid*, s. v. Gesen. *Lex.* s. v.; Bunsen's *Bibelwerk*, etc.).[b] It has disputed the right to be the chief city of the kingdom of Sheba from the earliest ages of which

[a] The LXX. inserts the words καὶ υἱοὶ Ἀράμ before the notice of Uz and his brothers: but for this there is no authority in the Hebrew. For a parallel instance of conciseness, see ver. 4.

[b] The printed edition of the *Marásid* writes the name Ozál, and says, "It is said that its name was Ozál; and when the Abyssinians arrived at it, and saw it to be beautiful, they said 'San'á,' which means beautiful: therefore it was called San'á."

Digitized by Google

any traditions have come down to us: the rival cities being SHEBA (the Arabic Sebà), and SEPHAR (or Zafár). Unlike one or both of these cities which passed occasionally into the hands of the people of HAZARMAVETH (Hadramäwt), it seems to have always belonged to the people of Sheba; and from its position in the centre of the best portion of that kingdom, it must always have been an important city, though probably of less importance than Seba itself. Niebuhr (*Descr.* p. 201 ff.) says that it is a walled town, situate in an elevated country, in lat. 15° 2′, and with a stream (after heavy rains) running through it (from the mountain of Sawáfee, El-Idreesee, i. 50), and another larger stream a little to the west, and country-houses and villages on its banks. It has a citadel on the site of a famous temple, called Beyt-Ghumdán, said to have been founded by Shoorabeel; which was razed by order of Othman. The houses and palaces of San'à, Niebuhr says, are finer than those of any other town of Arabia; and it possesses many mosques, public baths, and caravanserais. El-Idreesee's account of its situation and flourishing state (i. 50, quoted also by Bochart, *Phaleg*, xxi.) agrees with that of Niebuhr. Yákoot says, "San'à is the greatest city in the Yemen, and the most beautiful of them. It resembles Damascus, on account of the abundance of its trees (or gardens), and the rippling of its waters" (*Mushtaruk*, s. v., comp. Ibn-El-Wardee MS.); and the author of the *Mardsid* (said to be Yákoot) says, "It is the capital of the Yemen and the best of its cities; it resembles Damascus, on account of the abundance of its fruits" (*s. v.* San'à).

Uzal, or Awzál, is most probably the same as the Auzara (Αὐζαρα), or Ausara (Αὔσαρα) of the classics, by the common permutation of *l* and *r*. Pliny (*H. N.* xii. 16) speaks of this as belonging to the Gebanitæ; and it is curious that the ancient division (or "mikhláf") of the Yemen in which it is situate, and which is called Sinhán, belonged to a very old confederacy of tribes named Jenb, or Genb, whence the Gebanitæ of the classics; another division being also called Mikhlaf Jenb (*Mardsid*, s. vv. mikhláf and jenb, and *Mushtarak*, s. v. jenb). Bochart accepts Ausara as the classical form of Uzal (*Phaleg*, l. c.), but his derivation of the name of the Gebanitæ is purely fanciful.

Uzal is perhaps referred to by Ez. (xxvii. 19), translated in the A. V. "Javan," *going to and fro*, Heb. מְאוּזָל. A city named Yäwan, or Yäwán, in the Yemen, is mentioned in the *Kámoos* (see Gesenius, *Lex.* and Bochart, *l. c.*). Commentators are divided in opinion respecting the correct reading of this passage; but the most part are in favor of the reference to Uzal. See also JAVAN.

E. S. P.

**UZ'ZA** (עֻזָּא [*strength*]: Ἀζά; [Vat. Ναασα:] *Oza*). 1. A Benjamite of the sons of Ehud (1 Chr. viii. 7). The Targum on Esther makes him one of the ancestors of Mordecai.

2. (Ὀζά.) Elsewhere called UZZAH (1 Chr. vi. 7, 9, 10, 11).

3. (Ἀζά [Vat. Ουσα], Ὀζί [Vat. FA. Ὀζει]; [Alex.] Ἀζα, Ὀζι: *Aza*.) The children of Uzza were a family of Nethinim who returned with Zerubbabel (Ezr. ii. 49; Neh. vii. 51).

4. (עֻזָּה: Ὀζά; Alex. Ἀζα: *Oza*). Properly Uzzah." As the text now stands, Uzzah is a descendant of Merari (1 Chr. vi 29 [14]); but there appears to be a gap in the verse by which the sons of Gershom are omitted, for Libni and Shimei are elsewhere descendants of Gershom, and not of Merari. Perhaps he is the same as Zina (זִינָא), or Zizah (זִיזָה), the son of Shimei (1 Chr. xxiii. 10, 11); for these names evidently denote the same person, and, in Hebrew character, are not unlike Uzzah.

**UZ'ZA, THE GARDEN OF** (גַּן עֻזָּא: κῆπος Ὀζά: *hortus Aza*). The spot in which Manasseh king of Judah, and his son Amon, were both buried (2 K. xxi. 18, 26). It was the garden attached to Manasseh's palace (ver. 18, and 2 Chr. xxxiii. 20), and therefore presumably was in Jerusalem. The fact of its mention shows that it was not where the usual sepulchres of the kings were. No clew, however, is afforded to its position. Josephus (*Ant.* x. 3, § 2) simply reiterates the statement of the Bible. It is ingeniously suggested by Cornelius a Lapide, that the garden was so called from being on the spot at which Uzza died during the removal of the Ark from Kirjath-jearim to Jerusalem, and which is known to have retained his name for long after the event (2 Sam. vi. 8). There are some grounds for placing this in Jerusalem, and possibly at or near the threshing-floor of Araunah. [NACHON, vol. iii. p. 2051, and note.]

The scene of Uzza's death was itself a threshing-floor (2 Sam. vi. 6), and the change of the word from this, *goren*, גֹּרֶן, into *gan*, גַּן garden, would not be difficult or improbable. But nothing certain can be said on the point.

Bunsen (*Bibelwerk*, note on 2 K. xxi. 18) on the strength of the mention of "palaces" in the same paragraph with Ophel (A. V. "forts") in a denunciation of Isaiah (xxxii. 14), asserts that a palace was situated in the Tyropœon valley at the foot of the Temple mount, and that this was in all probability the palace of Manasseh and the site of the Garden of Uzza. Surely a slender foundation for such a superstructure! G

**UZ'ZAH** (עֻזָּה in 2 Sam. vi. 3, elsewhere עֻזָּא [*strength*]: Ὀζά; Alex. Ἀζα, Ἀζζα: *Oza*). One of the sons of Abinadab, in whose house at Kirjath-jearim the Ark rested for 20 years. The eldest son of Abinadab (1 Sam. vii. 1) seems to have been Eleazar, who was consecrated to look after the Ark. Uzzah probably was the second, and Ahio[a] the third. They both accompanied its removal, when David first undertook to carry it to Jerusalem. Ahio apparently went before the cart — the new cart (1 Chr. xiii. 7) — on which it was placed, and Uzzah walked by the side of the cart. The procession, with all manner of music, advanced as far as a spot variously called "the threshing-floor" (1 Chr. xiii. 9), "the threshing-floor of Chidon" (*ibid.* Heb. LXX.; Jos. *Ant.* vii. 4, § 2), "the threshing-floor of Nachor" (2 Sam. vi. 6, LXX.), "the threshing-floor of Nachon" (*ibid.* Heb.). At this point — perhaps slipping over the smooth rock — the oxen (or, LXX., "the calf") stumbled (Heb.) or "overturned the Ark" (LXX.). Uzzah caught it to prevent its falling.

He died immediately, by the side of the Ark. His death, by whatever means it was accomplished, was so sudden and awful that, in the sacred lan-

[a] The LXX for "Ahio," read "his brethren."

Digitized by Google

guage of the Old Testament, it is ascribed directly to the Divine anger. "The anger of the Lord was kindled against Uzzah, and God smote him there." "For his error," עַל־הַשָּׁל, adds the present Hebrew text, not the LXX.; "because he put his hand to the Ark" (1 Chr. xiii. 10). The error or sin is not explained. Josephus (*Ant.* vii. 4, § 2) makes it to be because he touched the Ark not being a priest. Some have supposed that it was because the Ark was in a cart, and not (Ex. xxv. 14) carried on the shoulders of the Levites. But the narrative seems to imply that it was simply the rough, hasty handling of the sacred coffer. The event produced a deep sensation. David, with a mixture of awe and resentment, was afraid to carry the Ark further; and the place, apparently changing its ancient name,[a] was henceforth called "Perez-Uzzah," the "breaking," or "disaster" of Uzzah (2 Sam. vi. 8; 1 Chr. xiii. 11; Jos. *Ant.* vii. 4, § 2).

There is no proof for the assertion that Uzzah was a Levite. A. P. S.

**UZ'ZEN-SHE'RAH** (אֻזְּנֵי שְׁאֵרָה [perh. *ear* or *corner of Sherah*]: *kai vioi* 'Οζάν, Σεηρά: *Osensara*). A town founded or rebuilt by Sherah, an Ephraimite woman, the daughter either of Ephraim himself or of Beriah. It is named only in 1 Chr. vii. 24, in connection with the two Beth-horons. These latter still remain probably in precisely their ancient position, and called by almost exactly their ancient names; but no trace of Uzzen-Sherah appears to have been yet discovered, unless it be in *Beit Sira*, which is shown in the maps of Van de Velde and Tobler as on the N. side of the *Wady Suleiman*, about three miles S. W. of *Beitûr et-tahta*. It is mentioned by Robinson (in the lists in Appendix to vol. iii. of *Bibl. Res.*, 1st ed., p. 120); and also by Tobler (*3te Wanderung*, p. 188). [SHERAH.]

The word *ozen* in Hebrew signifies an "ear;" and assuming that *uzzen* is not merely a modification of some unintelligible Canaanite word, it may point to an earlike projection or other natural feature of the ground. The same may be said of Aznoth-Tabor, in which *aznoth* is perhaps related to the same root.

It has been proposed to identify Uzzen-Sherah with Timnath-Serah; but the resemblance between the two names exists only in English (שֵׁרָח and סֵרַח), and the identification, tempting as it is from the fact of Sherah being an ancestress of Joshua, cannot be entertained.

It will be observed that the LXX. (in both MSS.) give a different turn to the passage, by the addition of the word ובני before Uzzen. Sherah, in the former part of the verse, is altogether omitted in the Vat. MS. (Mai), and in the Alex. given as Σααρα. G.

**UZ'ZI** (עֻזִּי, short for עֻזִּיָּהוּ, *Jehovah is my strength*. Compare Uzziah, Uzziel). 1. ('Οζί: [Vat. Οζει: in Ezr., 'Οζίου, *gen.*; Vat. Σαουλ: Alex. Οζιυ:] *Ozi*.) Son of Bukki, and father of Zerahiah, in the line of the high-priests (1 Chr. vi. 5, 6, 51; Ezr. vii. 4). Though Uzzi was the lineal ancestor of Zadok, it does not appear that he was ever high-priest. Indeed, he is included in those descendants of Phinehas between the high-priest Abishua ('Ιέσσηνος) and Zadok, who, according to Josephus (*Ant.* viii. 1), were private persons. He must have been contemporary with, but rather earlier than Eli. In Josephus's list Uzzi is unaccountably transformed into JONATHAN.

2. [Vat. corrupt.] Son of Tola the son of Issachar, and father of five sons, who were all chief men (1 Chr. vii. 2, 3).

3. ['Οζί: Vat. Οζει.] Son of Bela, of the tribe of Benjamin (1 Chr. vii. 7).

4. Another, or the same, from whom descended some Benjamite houses, which were settled at Jerusalem after the return from Captivity (1 Chr ix. 8).

5. [Vat. FA. Οζει: *Azzi*.] A Levite, son of Bani, and overseer of the Levites dwelling at Jerusalem, in the time of Nehemiah (Neh. xi. 22).

6. [Vat. FA.[1] Alex. omit; Rom. FA.[3] 'Οζί: *Azzi*.] A priest, chief of the father's-house of Jedaiah, in the time of Joiakim the high-priest (Neh. xii. 19).

7. [Rom. Vat. FA.[1] Alex. omit; FA.[3] 'Οζί: *Azzi*.] One of the priests who assisted Ezra in the dedication of the wall of Jerusalem (Neh. xii 42). Perhaps the same as the preceding. A. C. H.

**UZZI'A** (עֻזִּיָּא [*strength of Jehovah*]: 'Οζία, [Vat. FA.] Alex. Οζεια: *Ozia*). One of David's guard, and apparently, from his appellation "the Ashterathite," a native of Ashtaroth beyond Jordan (1 Chr. xi. 44).

**UZZI'AH** (עֻזִּיָּה [see above]: 'Αζαρίας in Kings [Vat. in 2 K. xv. 30, Αχας, 34, Οζειας], 'Οζίας [Vat. Οζειας, exc. 2 Chr. xxvi. 1, Οχοζειας, Rom. 'Οζείας, Is. i. 1, vi. 1, and so Sin. i. 1 and vii. 1] elsewhere; Alex. Οχοζίας in 2 K. xv. 13: *Oziae*, but *Azarias* in 2 K. xv. 13).

1. Uzziah king of Judah. In some passages his name appears in the lengthened form עֻזִּיָּהוּ (2 K. xv. 32, 34; 2 Chr. xxvi., xxvii. 2; Is. i. 1, vi. 1, vii. 1), which Gesenius attributes to an error of the copyists, עזיהו and עזיהו being nearly identical, or "to an exchange of the names as spoken by the common people, *as* being pronounced for *sr*." This is possible, but there are other instances of the princes of Judah (not of Israel) changing their names on succeeding to the throne, undoubtedly in the latter history, and perhaps in the earlier, as Jehoahaz to Ahaziah (2 Chr. xxi. 17), though this example is not quite certain. [AHAZIAH, 2.] After the murder of Amaziah, his son Uzziah was chosen by the people to occupy the vacant throne, at the age of 16; and for the greater part of his long reign of 52 years he lived in the fear of God, and showed himself a wise, active, and pious ruler. He began his reign by a successful expedition against his father's enemies, the Edomites, who had revolted from Judah in Jehoram's time, 80 years before, and penetrated as far as the head of the Gulf of 'Akaba, where he took the important place of Elath, fortified it, and probably established it as a mart for foreign commerce, which Jehoshaphat had failed to do. This success is recorded in the Second Book of Kings (xiv. 22), but from the Second Book of Chronicles (xxvi. 1, &c.) we learn much more. Uzziah waged other victorious wars in the south, especially against

[a] For the conjecture that this was the GADDER or UMMA mentioned in the later history, see the preceding article.

Digitized by Google

the Mehunim, or people of Maân, and the Arabs of Gurbaal. A fortified town named *Maân* still exists in Arabia Petræa, south of the Dead Sea. The situation of Gurbaal is unknown. (For conjectures, more or less probable, see Ewald, *Gesch.* i. 321; MEHUNIM; GURBAAL.) Such enemies would hardly maintain a long resistance after the defeat of so formidable a tribe as the Edomites. Towards the west, Uzziah fought with equal success against the Philistines, leveled to the ground the walls of Gath, Jabneh, and Ashdod, and founded new fortified cities in the Philistine territory. Nor was he less vigorous in defensive than offensive operations. He strengthened the walls of Jerusalem at their weakest points, furnished them with formidable engines of war, and equipped an army of 307,500 men with the best inventions of military art. He was also a great patron of agriculture, dug wells, built towers in the wilderness for the protection of the flocks, and cultivated rich vineyards and arable land on his own account. He never deserted the worship of the true God, and was much influenced by Zechariah, a prophet who is only mentioned in connection with him (2 Chr. xxvi. 5); for, as he must have died before Uzziah, he cannot be the same as the Zechariah of Is. viii. 2. So the southern kingdom was raised to a condition of prosperity which it had not known since the death of Solomon; and as the power of Israel was gradually falling away in the latter period of Jehu's dynasty, that of Judah extended itself over the Ammonites and Moabites, and other tribes beyond Jordan, from whom Uzziah exacted tribute. See 2 Chr. xxvi. 8, and Is. xvi. 1–5, from which it would appear that the annual tribute of sheep (2 K. iii. 4) was revived either during this reign or soon after. The end of Uzziah was less prosperous than his beginning. Elated with his splendid career, he determined to burn incense on the altar of God, but was opposed by the high-priest Azariah and eighty others. (See Ex. xxx. 7, 8; Num. xvi. 40, xviii. 7.) The king was enraged at their resistance, and, as he pressed forward with his censer, was suddenly smitten with leprosy, a disease which, according to Gerlach (*in loco*), is often brought out by violent excitement. In 2 K. xv. 5 we are merely told that "the Lord smote the king, so that he was a leper unto the day of his death, and dwelt in a several house;" but his invasion of the priestly office is not specified. This catastrophe compelled Uzziah to reside outside the city, so that the kingdom was administered till his death by his son Jotham as regent. Uzziah was buried "with his fathers," yet apparently not actually in the royal sepulchres (2 Chr. xxvi. 23). During his reign an earthquake occurred, which, though not mentioned in the historical books, was apparently very serious in its consequences, for it is alluded to as a chronological epoch by Amos (i. 1), and mentioned in Zech. xiv. 5, as a convulsion from which the people "fled." [EARTHQUAKE.] Josephus (*Ant.* ix. 10, § 4) connects it with Uzziah's sacrilegious attempt to offer incense, but this is very unlikely, as it cannot have occurred later than the 17th year of his reign [AMOS]. The first six chapters of Isaiah's prophecies belong to this reign, and we are told (2 Chr. xxvi. 22) that a full account of it was written by that prophet. Some notices of the state of Judah at this time may also be obtained from the contemporary prophets Hosea and Amos, though both of these labored more particularly in Israel. We gather from their writings (Hos. iv. 15, vi. 11; Am. vi. 1), as well as from the early chapters of Isaiah, that though the condition of the southern kingdom was far superior, morally and religiously, to that of the northern, yet that it was by no means free from the vices which are apt to accompany wealth and prosperity. At the same time Hosea conceives bright hopes of the blessings which were to arise from it; and though doubtless these hopes pointed to something far higher than the brilliancy of Uzziah's administration, and though the return of the Israelites to "David their king" can only be adequately explained of Christ's kingdom, yet the prophet, in contemplating the condition of Judah at this time, was plainly cheered by the thought that there God was really honored, and his worship visibly maintained, and that therefore with it was bound up every hope that his promises to his people would be at last fulfilled (Hos. i. 7, iii. 3). It is to be observed, with reference to the general character of Uzziah's reign, that the writer of the Second Book of Chronicles distinctly states that his lawless attempt to burn incense was the only exception to the excellence of his administration (2 Chr. xxvii. 2). His reign lasted from B. C. 808–9 to 756–7. G. E. L. C.

2. ('Οζία; [Vat. Οζεια:] *Oziæ.*) A Kohathite Levite, and ancestor of Samuel (1 Chr. vi. 24 [9]).

3. [Vat. FA. Οζεια.] A priest of the sons of Harim, who had taken a foreign wife in the days of Ezra (Ezr. x. 21).

4. ('Αζία; [Vat. Αζεδ; FA. Αζεδια; Alex. Οζια:] *Asiam.*) Father of Athaiah, or Uthai (Neh. xi. 4).

5. (עֻזִּיָּה: 'Οζίας [Vat. -ζει-]: *Oziæ.*) Father of Jehonathan, one of David's overseers (1 Chr. xxvii. 25).

**UZ'ZIEL** (עֻזִּיאֵל: 'Οζιήλ; [Vat. Οζειηλ, exc. Num. iii. 19, 1 Chr. xxiii. 20, Οζιηλ, Lev. x. 4, Αζιηλ; Alex. Οζειηλ in Ex. vi. 18:] *Oziel:* "God is my strength"). 1. Fourth son of Kohath, father of Mishael, Elzaphan or Elizaphan, and Zithri, and uncle to Aaron (Ex. vi. 18, 22; Lev. x. 4). The family descended from him were called Uzzielites, and Elizaphan, the chief of this family, was also the chief father of the Kohathites, by Divine direction, in the time of Moses (Num. iii. 19, 27, 30), although he seems to have been the youngest of Kohath's sons (1 Chr. vi. 2, 18). The house of Uzziel numbered 112 adults, under Amminadab their chief, at the time of the bringing up of the Ark to Jerusalem by King David (1 Chr. xv. 10).

2. [Vat. Οζειηλ.] A Simeonite captain, son of Ishi, who, after the successful expedition of his tribe to the valley of Gedor, went with his three brethren, at the head of five hundred men, in the days of Hezekiah, to Mount Seir, and smote the remnant of the Amalekites, who had survived the previous slaughter of Saul and David, and took possession of their country, and dwelt there "unto this day" (1 Chr. iv. 42; see Bertheau).

3. Head of a Benjamite house, of the sons of Bela (1 Chr. vii. 7).

4. [Vat. Αζαρηλ.] A musician, of the sons of Heman, in David's reign (1 Chr. xxv. 4), elsewhere called Azarel (ver. 18). Compare Uzziah and Azariah.

5. [Vat. Οζειηλ.] A Levite, of the sons of Jeduthun, who in the days of King Hezekiah took

Digitized by Google

an active part in cleansing and sanctifying the Temple, after all the pollutions introduced by Ahaz (2 Chr. xxix. 14, 19).

6. [Vat. Alex. FA. omit.] Son of Harhaiah, probably a priest in the days of Nehemiah, who took part in repairing the wall (Neh. iii. 8). He is described as "of the goldsmiths," *i. e.* of those priests whose hereditary office it was to repair or make the sacred vessels, as may be gathered from the analogy of the apothecaries, mentioned in the same verse, who are defined (1 Chr. ix. 30). The goldsmiths are also mentioned (Neh. iii. 31, 32). That this Uzziel was a priest is also probable from his name (No. 1), and from the circumstance that Malchiah, the goldsmith's son, was so.

A. C. H.

**UZZIELITES, THE** (הָעֻזִּיאֵלִי) [patr.]: Ὁ Ὀζιήλ, Ὀζιήλ; [Vat. Ὀζειηλ:] *Oziclitæ, Oziheliles*). The descendants of Uzziel, and one of the four great families into which the Kohathites were divided (Num. iii. 27; 1 Chr. xxvi. 23).

# V.

**VAGABOND** at first meant only "wanderer," "fugitive." It is applied thus to Cain (Gen. iv. 12), and to the sons of persecutors (Ps. cix. 10), as being doomed to rove from place to place. The exorcists at Ephesus (Acts xix. 13) are so called, not opprobriously *per se*, but as going about (περιερχόμενοι) from one city to another in the practice of their arts. H.

**VAJEZA'THA** (וַיְזָתָא) [see below]: Ζαβουθαῖος; [Alex. Ζαβουγαθα;] FA. Ζαβουδεβαν: *Jezatha*). One of the ten sons of Haman whom the Jews slew in Shushan (Esth. ix. 9). Gesenius derives his name from the Pers. سپید, "white," Germ. *weiss;* but Fürst suggests as more probable that it is a compound of the Zend *vahja*, "better," an epithet of the Ized haoma, and *zata*, "born," and so "born of the Ized haoma." But such etymologies are little to be trusted.

**VALE, VALLEY.** It is hardly necessary to state that these words signify a hollow swell of ground between two more or less parallel ridges of high land. Vale is the poetical or provincial form. It is in the nature of the case that the centre of a valley should usually be occupied by the stream which forms the drain of the high land on either side, and from this it commonly receives its name; as, the Valley of the Thames, of the Colne, of the Nile. It is also, though comparatively seldom, called after some town or remarkable object which it contains; as, the Vale of Evesham, the Vale of White-horse.

Valley is distinguished from other terms more or less closely related; on the one hand, from "glen," "ravine," "gorge," or "dell," which all express a depression at once more abrupt and smaller than a valley; on the other hand, from "plain," which, though it may be used of a wide valley, is not ordinarily or necessarily so.

It is to be regretted that with this quasi-precision of meaning the term should not have been employed with more restriction in the Authorised Version of the Bible.

The structure of the greater part of the Holy Land does not lend itself to the formation of valleys in our sense of the word. The abrupt transitions of its crowded rocky hills preclude the existence of any extended sweep of valley; and where one such does occur, as at Hebron, or on the southeast of Gerizim, the irregular and unsymmetrical positions of the inclosing hills rob it of the character of a valley. The nearest approach is found in the space between the mountains of Gerizim and Ebal, which contains the town of *Nablús*, the ancient Shechem. This, however, by a singular chance, is not mentioned in the Bible. Another is the "Valley of Jezreel" — the undulating hollow which intervenes between Gilboa (*Jebel Fuḳua*), and the so-called Little Hermon (*Jebel Duhy*).

Valley is employed in the Authorized Version to render five distinct Hebrew words.

1. *'Emek* (עֵמֶק: φάραγξ, κοιλάς, also very rarely πεδίον, αὐλών, and Εμεκ or Αμεκ). This appears to approach more nearly to the general sense of the English word than any other, and it is satisfactory to find that our translators have invariably, without a single exception, rendered it by "valley." Its root is said to have the force of deepness or seclusion, which Professor Stanley has ingeniously urged may be accepted in the sense of lateral rather than of vertical extension, as in the modern expression, — a deep house, a deep recess. It is connected with several places; but the only one which can be identified with any certainty is the *Emek* of Jezreel, already mentioned as one of the nearest approaches to an English valley. The other *Emeks* are: Achor, Ajalon, Baca, Berachah, Bethrehob, Elah, Gibeon, Hebron, Jehoshaphat, Keziz, Rephaim, Shaveh, Siddim, Succoth, and of ha-Charuts or "the decision" (Joel iii. 14).

2. *Gai* or *Gê* (גַּיְא or גֵּי: φάραγξ). Of this natural feature there is fortunately one example remaining which can be identified with certainty — the deep hollow which encompasses the S. W. and S. of Jerusalem, and which is without doubt identical with the Ge-hinnom or Ge-ben-hinnom of the O. T. This identification appears to establish the *Ge* as a deep and abrupt ravine, with steep sides and narrow bottom. The term is derived by the lexicographers from a root signifying to flow together; but Professor Stanley, influenced probably by the aspect of the ravine of Hinnom, proposes to connect it with a somewhat similar root (גָּיַח), which has the force of rending or bursting, and which perhaps gave rise to the name Gihon, the famous spring at Jerusalem.

Other *Ges* mentioned in the Bible are those of Gedor, Jiphthah-el, Zeboim, Zephathah, that of salt, that of the craftsmen, that on the north side of Ai, and that opposite Beth Peor in Moab.

3. *Nachal* (נַחַל: φάραγξ, χειμάρρους). This is the word which exactly answers to the Arabic *wady*, and has been already alluded to in that connection. [PALESTINE, iii. 2300 *a;* RIVER, p. 2735.] It expresses, as no single English word can, the bed of a stream (often wide and shelving, and like a "valley" in character, which in the rainy season may be nearly filled by a foaming torrent, though for the greater part of the year dry), and the stream itself, which after the subsidence of the rains has shrunk to insignificant dimensions. To autumn travellers in the south of France such appearances are familiar; the wide shallow bed strewed with water-worn stones of all sizes, amongst which shrubs are

Digitized by Google

growing promiscuously, perhaps crossed by a bridge of four or five arches, under the centre one of which brawls along a tiny stream, the sole remnant of the broad and rapid river which a few months before might have carried away the structure of the bridge. Such is the nearest likeness to the wadies of Syria, excepting that — owing to the demolition of the wood which formerly shaded the country, and prevented too rapid evaporation after rain — many of the latter are now entirely and constantly dry. To these last it is obvious that the word "valley" is not inapplicable. It is employed in the A. V. to translate *nachal*, alternating with "brook," "river," and "stream." For a list of the occurrences of each see *Sinai and Pal.* App. § 88.

4. *Bik'âh* (בִּקְעָה: πεδίον). This term appears to mean rather a plain than a valley, wider than the latter, though so far resembling it as to be inclosed by mountains, like the wide district between Lebanon and Anti-Lebanon, which is still called the *Bekâ'a*, as it was in the days of Amos. [PLAIN, iii. 2546 *b*.] It is rendered by "valley" in Deut. xxxiv. 3; Josh. xi. 8, 17, xii. 7; 2 Chr. xxxv. 22; Zech. xii. 11.

5. *Has-Shĕfēlâh* (הַשְּׁפֵלָה: τὸ πεδίον, ἡ πεδινή). This is the only case in which the employment of the term "valley" is really unfortunate. The district to which alone the name *has-Shĕfēlâh* is applied in the Bible has no resemblance whatever to a valley, but is a broad swelling tract of many hundred miles in area, which sweeps gently down from the mountains of Judah

"To mingle with the bounding main"

of the Mediterranean. [See PALESTINE, iii. 2296; PLAINS, iii. 2547 *b*; SEPHELA, p. 2911, &c.] It is rendered "the vale" in Deut. i. 7; Josh. x. 40; 1 K. x. 27; 2 Chr. i. 15; Jer. xxxiii. 13; and "the valley" or "valleys" in Josh. ix. 1, xi. 2, 16, xii. 8, xv. 33; Judg. i. 9; Jer. xxxii. 44. G.

* VALLEY OF BACA. [BACA, Amer. ed.]

* VALLEY OF DECISION. [JEHOSHAPHAT, VALLEY OF.]

* VALLEY OF SOREK. [SOREK, VALLEY OF.]

* VALLEY-GATE, 2 Chr. xxvii. 9; Neh. iii. 13. [JERUSALEM, ii. 1322.]

VANI'AH (וַנְיָה: Οὐουνία; [Vat. Ουεχεα;] Alex. Οὐουνια; FA. Ουηρ: *Vania*). One of the sons of Bani, who put away his foreign wife at Ezra's command (Ezr. x. 36).

* VANITIES, a frequent designation, in the Bible, of the false gods of the heathen, characterized as having no actual existence. The usual Hebrew terms so rendered are הַבְלִים, and אֱלִילִים, in which the non-reality of the objects naturally sets forth at the same time the folly and wickedness of such worship (cf. 1 Cor. viii. 4 ff.).

In Acts xiv. 15, Paul places Jupiter and Mercury in this class of nonentities (τούτων τῶν ματαίων). Some, indeed, explain the term there of the vain practices of heathenism; but that destroys the evident opposition between the word and τὸν θεὸν τὸν ζῶντα in the context. [IDOLS; IDOLATRY.] H.

VASH'NI (וַשְׁנִי [*Jah is praise*, Fürst]: Ἰωήλ; [Vat. Σαυλ; Σαρει:] *Vasseni*). The first-born of Samuel as the text now stands (1 Chr. vi. 28 [13]). But in 1 Sam. viii. 2 the name of his first-born is Joel. Most probably in the Chronicles the name of Joel has dropped out, and "Vashni" is a corruption of וְהַשֵּׁנִי, "and (the) second." The Peshito Syriac has amended the text, and rendered "The sons of Samuel, his first-born Joel, and the name of his second son Abiah." In this it is followed by the Arabic of the London Polyglott.

VASH'TI (וַשְׁתִּי: Ἀστίν; Ὀδύνη, Joseph.: *Vasthi*: "a beautiful woman," Pers.). The "queen" (הַמַּלְכָּה) of Ahasuerus, who, for refusing to show herself to the king's guests at the royal banquet, when sent for by the king, incurred his wrath, and was repudiated and deposed (Esth. i.); when Esther was substituted in her place. Many attempts have been made to identify her with historical personages: as by Ussher with Atossa, the wife of Darius Hystaspis, and by J. Capellus with Parysatis, the mother of Ochus; but, as was said of Esther (like the "threescore queens" in Cant. vi. 8, 9 [a]), it is far more probable that she was only one of the inferior wives, dignified with the title of queen, whose name has utterly disappeared from history. [ESTHER.] This view of Vashti's position seems further to tally exactly with the narrative of Ahasuerus' order, and Vashti's refusal, considered with reference to the national manners of the Persians. For Plutarch (*Conjug. præcept.* c. 16) tells us, in agreement with Herod. v. 18, that the kings of Persia have their legitimate wives to sit at table with them at their banquets, but that, when they choose to riot and drink, they send their wives away and call in the concubines and singing-girls. Hence, when the heart of Ahasuerus "was merry with wine," he sent for Vashti, looking upon her only as a concubine; she, on the other hand, considering herself as one of the κουριδίαι γυναῖκες, or legitimate wives, refused to come. See Winer, *Realwb.* Josephus's statement (*Ant.* xi. 6, § 1), that it is contrary to the customs of the Persians for their wives to be seen by any men but their own husbands, is evidently inaccurate, being equally contradicted by Herodotus, v. 18,[b] and by the book of Esther itself (v. 4, 8, 12, &c.). A. C. H.

* VAT. [FAT; OIL, 2; OLIVE; WINEPRESS.]

VEIL. Under the head of DRESS we have already disposed of various terms improperly rendered "veil" in the A. V., such as *mitpachath* (Ruth iii. 15), *tsaiph* (Gen. xxiv. 65, xxxviii. 14, 19), and *rādīd* (Cant. v. 7; Is. iii. 23). These have been explained to be rather shawls, or mantles, which might at pleasure be drawn over the face, but which were not designed for the special purpose of veils. It remains for us to notice the following terms which describe the veil proper: (1.) *Masveh*,[c]

[a] Παιδίσκαι δ' ἄπειροι αἱτῶν πολλαὶ μὲν κουριδίαι γυναῖκες, πολλῷ δ' ἔτι πλείονες παλλακαὶ σπόρου ἕνεκεν (Xenoph. i. 135).

[b] "It is the custom of us Persians, when we make a great feast, to invite both our concubines and our wives to sit down with us."

[c] מַסְוֶה

Digitized by Google

used of the veil, which Moses assumed when he came down from the mount (Ex. xxxiv. 33–35). A cognate word *sâth*[a] occurs in Gen. xlix. 11 as a general term for a man's raiment, leading to the inference that the *maveh* also was an ample outer robe which might be drawn over the face when required. The context, however, in Ex. xxxiv. is conclusive as to the object for which the robe was assumed, and, whatever may have been its size or form, it must have been used as a veil. (2.) *Mispâchôth*,[b] used of the veils which the false prophets placed upon their heads (Ez. xiii. 18, 21; A. V. "kerchiefs"). The word is understood by Gesenius (*Thes.* p. 965) of cushions or mattresses, but the etymology (*sâphach*, to pour) is equally, if not more favorable, to the sense of a *flowing* veil, and this accords better with the notice that they were to be placed "upon the head of every stature," implying that the length of the veil was proportioned to the height of the wearer (Fürst, *Lex.* s. v.; Hitzig in *Ez.* l. c.). (3.) *Rĕ'âlôth*,[c] used of the light veils worn by females (Is. iii. 19; A. V. "mufflers"), which were so called from their rustling motion. The same term is applied in the Mishna (*Sab.* 6, § 6) to the veils worn by Arabian women. (4.) *Tsammâh*,[d] understood by the A. V. of "locks" of hair (Cant. iv. 1, 3, vi. 7; Is. xlvii. 2), and so by Winer (*Realwb.* "Schleier"); but the contents of the passages in which it is used favor the sense of veil, the wearers of the article being in each case highly born and handsomely dressed. A cognate word is used in the Targum (Gen. xxiv. 65) of the robe in which Rebecca enveloped herself.

With regard to the use of the veil, it is important to observe that it was by no means so general in ancient as in modern times. At present, females are rarely seen without it in oriental countries, so much so that in Egypt it is deemed more requisite to conceal the face, including the top and back of the head, than other parts of the person (Lane, i. 72). Women are even delicate about exposing their heads to a physician for medical treatment (Russell's *Aleppo*, i. 246). In remote districts, and among the lower classes, the practice is not so rigidly enforced (Lane, i. 72). Much of the scrupulousness in respect to the use of the veil dates from the promulgation of the Koran, which forbade women appearing unveiled except in the presence of their nearest relatives (*Kor.* xxxiii. 55, 59). In ancient times, the veil was adopted only in exceptional cases, either as an article of ornamental dress (Cant. iv. 1, 3, vi. 7), or by betrothed maidens in the presence of their future husbands, especially at the time of the wedding (Gen. xxiv. 65, xxix. 25 [MARRIAGE]), or lastly, by women of loose character for purposes of concealment (Gen. xxxviii. 14). But, generally speaking, women both married and unmarried appeared in public with their faces exposed, both among the Jews (Gen. xii. 14, xxiv. 16, xxix. 10; 1 Sam. i. 12), and among the Egyptians and Assyrians, as proved by the invariable absence of the veil in the sculptures and paintings of these peoples.

Among the Jews of the New Testament age it appears to have been customary for the women to cover their heads (not necessarily their faces) when engaged in public worship. For, St. Paul reprobates the disuse of the veil by the Corinthian women as implying an assumption of equality with the other sex, and enforces the covering of the head as a sign[e] of subordination to the authority of the men (1 Cor. xi. 5–15). The same passage leads to the conclusion that the use of the *tallith*, with which the Jewish males cover their heads in prayer, is a comparatively modern practice; inasmuch as the Apostle, putting a hypothetical case, states that every man having anything on his head dishonors his head, *i. e.* Christ, inasmuch as the use of the veil would imply subjection to his fellow-men rather than to the Lord (1 Cor. xi. 4). * VERMILION. [COLORS, 4.]

VERSIONS, ANCIENT, OF THE OLD AND NEW TESTAMENTS. On the ancient versions in general, see Walton's *Prolegomena*: Simon, *Histoire Critique*; Marsh's Michaelis; Eichhorn's *Einleitung*; Hug's *Einleitung*; De Wette's *Einleitung*; Hävernick's *Einleitung*: Davidson's *Introduction* [*Biblical Criticism*]; Reuss, *Geschichte des Neuen Testaments*; Horne's *Introduction* by Ayre (vol. ii.), [or by Davidson (vol. ii., ed. 1856)], and Tregelles (vol. iv.); Scrivener's *Plain Introduction*; Bleek's *Einleitung*; [Keil's *Einleitung*. Of Hug, De Wette, Hävernick, Bleek, and Keil there are English translations. On the versions of the N. T. Hug is particularly full. — A.]

There were two things which, in the early centuries after the coming of our Lord Jesus Christ, were closely connected: the preaching of the Gospel, leading to the diffused profession of the Christian faith amongst nations of varied languages; and the formation of versions of the Holy Scriptures for the use of the Churches thus gathered in varied countries. In fact, for many ages the spread of Christianity and the appearance of vernacular translations seem to have gone almost continually hand in hand. The only exceptions, perhaps, were those regions in which the Christian profession did not extend beyond what might be called the civilised portion of the community, and in which also the Greek language, diffused through the conquests of Alexander, or the Latin, the concomitant of the dominion of Rome, had taken a deeply-rooted and widely-extended hold. Before the Christian era, the Greek version of the Old Testament, commonly termed the Septuagint, and the earlier Targums (if, indeed, any were *written* so early) supplied every want of the Jews, so far as we can at all discover. And it cannot be doubted that the Greek translation of the Old Testament had produced some considerable effect beyond the mere Jewish pale: for thus the comparatively large class of proselytes which we find existing in the time of our Lord and his Apostles must apparently have been led to embrace a religion, not then commended by the holiness of its professors or by external advantages, but only accredited by its doctrines, which professed to be given by the revelation of God (as, indeed, they were); and which, in setting forth the unity of

God, and in the condemnation of all idolatry, supplied a need, not furnished by anything which professed to be a system of positive religion as held by the Greek, Latin, or Egyptian priests.

In making inquiry as to the versions formed after the spread of Christianity, we rarely find any indication as to the translators, or the particular circumstances under which they were executed. All we can say is, that those who had learned that the doctrines of the Apostles, — namely, that in the name of Jesus Christ the Son of God there is forgiveness of sins and eternal life through faith in his propitiatory sacrifice, — are indeed the truth of God; and who knew that the New Testament contains the records of this religion, and the Old the preparation of God for its introduction through promises, types, and prophecies, did not long remain without possessing these Scriptures in languages which they understood. The appearance of vernacular translations was a kind of natural consequence of the formation of Churches.

We have also some indications that parts of the New Testament were translated, not by those who received the doctrines, but by those who opposed them; this was probably done in order the more successfully to guard Jews and proselytes to Judaism against the doctrines of the Cross of Christ, "to the Jews a stumbling-block."

Translations of St. John's Gospel and of the Acts of the Apostles into the Hebrew dialect are mentioned in the very curious narration given by Epiphanius (l. xxx. 3, 12) respecting Joseph of Tiberias; he speaks of their being secretly preserved by the Jewish teachers of that city. But these or any similar versions do not appear to have been examined, much less used by any Christians. They deserve a mention here, however, as being translations of parts of the New Testament, the former existence of which is recorded.

In treating of the ancient versions that have come down to us, in whole or in part, they will be described in the alphabetical order of the languages. It may be premised that in most of them the Old Test. is not a version from the Hebrew, but merely a secondary translation from the Septuagint in some one of its early forms. The value of these secondary versions is but little, except as bearing on the criticism of the text of the LXX., a department of Biblical learning in which they will be found of much use, whenever a competent scholar shall earnestly engage in the revision of that Greek version of the Old Test., pointing out the corrections introduced through the labors of Origen.

S. P. T.

ÆTHIOPIC VERSION. — Christianity was introduced into Æthiopia in the 4th century, through the labors of Frumentius and Ædesius of Tyre, who had been made slaves and sent to the king (Theodoret, *Hist. Eccl.* i. 23; Socr. i. 19; Sozomen, ii. 24). Hence arose the episcopal see of Axum, to which Frumentius was appointed by Athanasius. The Æthiopic version which we possess is in the ancient dialect of Axum; hence some have ascribed it to the age of the earliest missionaries; but from the general character of the version itself, this is improbable; and the Abyssinians themselves attribute it to a later period; though their testimony is of but little value by itself; for their accounts are very contradictory, and some of them even speak of its having been translated from the Arabic; which is certainly incorrect.

The Old Testament, as well as the New, was executed from the Greek.

In 1513 Potken published the Æthiopic Psalter at Rome: he received this portion of the Scriptures from some Abyssinians with whom he had met; whom, however, he called Chaldæans, and their language Chaldee.

In 1548–49, the Æthiopic New Test. was also printed at Rome, edited by three Abyssinians: they sadly complained of the difficulties under which they labored, from the printers having been occupied on what they were unable to read. They speak of having had to fill up a considerable portion of the book of Acts by translating from the Latin and Greek: in this, however, there seems to be some overstatement. The Roman edition was reprinted in Walton's Polyglott; but (according to Ludolf) all the former errors were retained, and new ones introduced. When Bode in 1753 published a careful Latin translation of the Æthiopic text of Walton, he supplied Biblical scholars in general with the means of forming a judgment as to this version, which had been previously impossible, except to the few who were acquainted with the language.

In 1826–30, a new edition, formed by a collation of MSS., was published under the care of Mr. Thomas Pell Platt (formerly Fellow of Trinity College, Cambridge), whose object was not strictly *critical*, but rather to give to the Abyssinians their Scriptures for ecclesiastical use in as good a form as he conveniently could, consistently with MS. authority. From the notes made by Mr. Platt in the course of his collations, it is evident that the translation had been variously revised. The differences of MSS. had appeared so marked to Ludolf that he supposed that there must have been two ancient versions. But Mr. Platt found, in the course of his examination, that where certain MSS. differ widely in their readings, some other copy would introduce both readings, either in a conflate form, or simply in the way of repetition. The probability appears to be that there was originally one version of the Gospels; but that this was afterward revised with Greek MSS. of a different complexion of text; and that succeeding copyists either adopted one or the other form in passages; or else, by omitting nothing from text or margin, they formed a confused combination of readings. It appears probable that all the portion of the New Test. after the Gospels originated from some of the later revisers of the former part; its paraphrastic tone accords with this opinion. We can only form a judgment from the *printed* texts of this version, until a collation of the MSS. now known shall be so executed as to be available for critical use.

As it is, we find in the copies of the version, readings which show an affinity with the older class of Greek MSS., intermingled with others decidedly Byzantine. Some of the copies known show a stronger leaning to the one side or the other; and this gives a considerable degree of certainty to the conclusion on the subject of revision.

An examination of the version proves both that it was executed from the Greek, and also that the translator made such mistakes that he could hardly have been a person to whom Greek was the native tongue. The following instances (mostly taken from C. B. Michaelis) prove this: ὄρια is confounded with ὄρεα (or ὄρη); Matt. iv. 13, "in

Digitized by Google

*monte* Zabulon;" xix. 1, "in *montes* Judææ trans Jordanem." Acts iii. 20, προκεχειρισμένον is rendered as "quem præunxit" (προκεχρισμένον); ii. 37, κατενύγησαν "*aperti sunt* quoad cor eorum" (κατηνύγησαν); xvi. 25, ἐλύοντο αὐτῶν οἱ δεσμοί, "percussæ sunt vincula eorum" (ἐτυπτόοντο αὐτῶν οἱ δεσμοί). Matt. v. 25, ἐνόχων is rendered as *intelligens* (ἐννοῶν); Luke viii. 29, καὶ πέδαις φυλασσόμενος, "a *parvulis* custodiens," as if παιδίοις. Rom. vii. 11, ἐξηπάτησεν, "conculcavit," as if ἐξεπάτησεν. Rev. iv. 3, Ἶρις, "sacerdotes," as if ἱερεῖς. The meaning of words alike in spelling is confounded: thus, 1 Cor. xii. 28, "Posuit Dominus *aurem* ecclesiæ," from the differing meanings of אזן. Also wrong renderings sometimes seem to have originated with false etymology: thus, Matt. v. 22, "Qui autem dixerit fratrem suum *pannosum*," ῥακὰ having been connected with ῥάκος.

Bode's Latin version, to which reference has already been made, enabled critical scholars to use the Roman text with much confidence. The late Mr. L. A. Prevost, of the British Museum, executed for Dr. Tregelles a comparison of the text of Mr. Platt with the Roman, as reprinted in Walton, together with a literal rendering of the variations; this gave him the critical use of both texts. The present Bishop of Gloucester, Dr. Ellicott, speaking with the personal advantage possessed by a scholar himself able to use both Æthiopic texts of the New Test., draws attention to the superiority of that edited by Mr. Platt: after speaking (*Aids to Faith*, p. 381) of the non-paraphrastic character of the ancient versions of the New Test. in general, Dr. Ellicott adds in a note: "It may be noticed that we have specified the Æthiopic version as that edited by Mr. Pell Platt. The Æthiopic version found in Walton's Polyglott often degenerates into a paraphrase, especially in difficult passages."

The Old Test. of this version, made from the LXX. (as has been already specified), has been subjected apparently (with the exception of the Psalms) to very little critical examination. A complete edition of the Æthiopic Old Test. has been commenced by Dillmann; the first portion of which appeared in 1853. [Tom. i. Octateuch, 1853–55; om. ii., 1 Sam.–Esther, 1861 ff. For editions of some other parts of the O. T. see De Wette, *Einl.* § 61, 8ᵉ Ausg. — A.]

ARABIC VERSIONS. — To give a detailed account of the Arabic versions would be impossible, without devoting a much larger space to the subject than would be altogether in its place in a Dictionary of the Bible: for the versions themselves do not, owing to their comparatively late date, possess any *primary* importance, even for critical studies; and thus many points connected with these translations are rather of literary than strictly Biblical interest. The versions of the Old Test. must be considered separately from those of the New; and those from the Hebrew text must be treated apart from those formed from the LXX.

I. *Arabic versions of the Old Test.*

A. Made from the Hebrew text.

Rabbi Saadiah Haggaon, the Hebrew commentator of the 10th century, translated portions (some think the whole) of the O. T. into Arabic. His version of the Pentateuch was printed at Constantinople, in 1546. The Paris Polyglott contains the same version from a MS differing in many of its readings: this was reprinted by Walton. It seems as if copyists had in parts altered the version considerably. The version of Isaiah by Saadiah was printed by Paulus, at Jena, in 1791, from a Bodleian MS.; the same library contains a MS. of his version of Job and of the Psalms. Kimchi quotes his version of Hosea.

The book of Joshua in the Paris and Walton's Polyglotts is also from the Hebrew; and this Rödiger states to be the fact in the case of the Polyglott text of 1 K. xii.; 2 K. xii. 16; and of Neh. i.–ix. 27.

Other portions, translated from Hebrew in later times, do not require to be even specified here.

But it was not the Jews only who translated into Arabic from the original. There is also a version of the Pentateuch of the Samaritans, made by Abu Said. He is stated to have clearly had the translation of Saadiah before him, the phraseology of which he often follows, and at times he must have used the Samaritan *version*. It is considered that this work of Abu Said (of which a portion has been printed) is of considerable use in connection with the history of the text of the Samaritan Pentateuch. [See SAMARITAN PENTATEUCH, ii. 3.]

B. Made from the Peshito Syriac.

This is the base of the Arabic text contained in the Polyglotts of the books of Judges, Ruth, Samuel, Kings, and Nehemiah (with the exception mentioned above in these last-named books).

In some MSS. there is contained a translation from the *Hexaplar*-Syriac text, which (though a recent version) is of some importance for the criticism of that translation.

C. Made from the LXX.

The version in the Polyglotts of the books not specified above.[a]

Another text of the Psalter in Justiniani Psalterium Octuplum, Genoa, 1516.

The Arabic versions existing in MS. exhibit very various forms: it appears as if alterations had been made in the different countries in which they had been used; hence it is almost an endless task to discriminate amongst them precisely.

II. *Arabic versions of the New Test.*

The printed editions of the Arabic New Test. must first be specified before their text can be described.

1. The Roman edition princeps of the four Gospels, 1590–91 (issued both with and without as

[a] Cardinal Wiseman (*On the Miracles of the New Test.*, Essays i. 172–176, 240–244) gives a curious investigation of the origin and translation of this Arabic Psalter, and of the occasional use of the Hebrew text and sometimes of the Syriac version.

Digitized by Google

interlinear Latin version. Reissued, with a new title, 1619; and again, with a bibliographical preface, 1774).

2. The Erpenian Arabic. The whole New Test. edited by Erpenius, 1616, at Leyden, from a MS. of the 13th or 14th century.

3. The Arabic of the Paris Polyglott, 1645. In the Gospels this follows mostly the Roman text; in the Epistles a MS. from Aleppo was used. The Arabic in Walton's Polyglott appears to be simply taken from the Paris text.

4. The *Carshuni* Arabic text (i. e. in Syriac letters), the Syriac and Arabic New Test., published at Rome, in 1703. For this a MS. brought from Cyprus was used.

Storr proved, that in all these editions the Gospels are really the same translation, however it may have been modified by copyists; especially when the Syriac, or Memphitic, stand by the side.

Juynboll, in his description of an Arabic Codex at Franeker (1838), threw new light on the origin of the Arabic Gospels. He proves that the Franeker Codex coincides in its general text with the Roman editio princeps, and that both follow the Latin Vulgate, so that Raymundi, the Roman editor, must not be accused of having Latinized the text. The greater agreement of the Polyglott text with the Greek he ascribes to the influence of an Aleppo MS., which the Paris editor used. Juynboll then identifies the text of the Franeker MS. (and of the Roman edition) with the version made in the 8th century by John, Bishop of Seville. The question to be considered thus becomes, Was the Latin the basis of the version of the Gospels? and did some afterwards revise it with the Greek? or, was it taken from the Greek? and was the alteration to suit the Latin a later work? If the former supposition be correct, then the version of John of Seville may have been the *first*; if the latter, then all that was done by the Spanish bishop must have been to adapt an existing Arabic version to the Latin.

Gildemeister, in his communications to Tischendorf (*Gr. Test.* 1859, Prolegg. p. ccxxxix.), endeavors to prove, that all the supposed connection of this (or apparently of any) version with John of Seville is a mistake. The words, however, of Mariana, the Spanish historian, are express. He says, under the year 737, "His aequalis Joannes Hispalensis Praesul divinos libros linguae Arabicae donabat utriusque nationis saluti consulens; quoniam Arabica lingua multus usus erat Christianis atque Mauris; Latina passim ignorabatur. Ejus interpretationis exempla ad nostram aetatem (i. e. A. D. 1600) conservata sunt, extantque non uno in loco in Hispania." [a] Gildemeister says, indeed, that this was entirely caused from a misunderstanding of what had been stated by Roderic of Toledo, the first who says anything on the subject. He adds that John of Seville lived really in the 10th century, and not in the 8th: if so, he must be a different person, apparently, from the Bishop, of the same name, about whom Mariana could hardly have been misinformed. It does not appear as if Juynboll's details and arguments were likely to be set aside through the brief fragments of Gildemeister's letters to Tischendorf, which the latter has published.

In the Erpenian Arabic the latter part is a translation from the Peshito-Syriac; the Epistles not found in that version and the Apocalypse are said to be from the Memphitic.

The latter part of the text in the Polyglotts is from the Greek. Various Arabic translations of portions of the New Test. exist in MS.: they do not require any especial enumeration here.[b]

S. P. T.

ARMENIAN VERSION. — Before the 5th century the Armenians are said to have used the Syriac alphabet; but at that time Mesrob is stated to have invented the Armenian letters. Soon after this it is said that translations into the Armenian language commenced, at first from the Syriac. Mesrob, with his companions, Joseph and Esnak, began a version of the Scriptures with the book of Proverbs, and completed all the Old Test.; and in the New, they used the Syriac as their basis, from their inability to obtain any Greek books. But when, in the year 431, Joseph and Esnak returned from the council of Ephesus, bringing with them a Greek copy of the Scriptures, Isaac, the Armenian Patriarch, and Mesrob, threw aside what they had already done, in order that they might execute a version from the Greek. But now arose the difficulty of their want of a competent acquaintance with that language: to remedy this, Esnak and Joseph were sent with Moses Chorenensis (who is himself the narrator of these details) to study that language at Alexandria. There they made what Moses calls their *third* translation; the first being that from the Syriac, and the second that which had been attempted without sufficient acquaintance with the Greek tongue. The fact seems to be that the former attempts were used as far as they could be, and that the whole was remodeled so as to suit the Greek.

The first printed edition of the Old and New Testaments in Armenian appeared at Amsterdam in 1666, under the care of a person commonly

---

[a] Adler (*Reise nach Rom*, p. 134) gives a citation from D. Vincenslo Juan de Lastanosa, who says in his *Museo de las Medallas desconocidas*, Huesca, 1645, p. 115, "El santo Arçobispo Don Juan traduxo la sagrada escritura en Arabigo, por cuya intercessiva hizo Dios muchos milagros i los Moros le llamavan *Caxi almatarun*." Adler conjectures this designation to be المطارنه or قايد المطران.

[b] * Some notice should perhaps be taken of an Arabic version of the whole N. T. (except the Apocalypse) found in a MS. in the Vatican Library (Cod. Vat. Arab. 13), and described by Scholz in his *Biblisch-Kritische Reise* (1823), pp. 117-126; comp. Hug, § 107. It appears by the Greek subscription to have been made at Emesa (*Hums*) in Syria by one Daniel Philentoles. Though our knowledge of it is very imperfect, the agreement of many of its readings with the oldest Greek MSS. in the specimens given by Scholz is remarkable. It wants, for example, the last twelve verses of the Gospel of Mark, and supports the reading ὃς in 1 Tim. iii. 16. A.

Digitized by Google

termed Oscan, or Uscan, and described as being an Armenian bishop (Hug, however, denies that Uscan was his name, and Eichhorn denies that he was a bishop). From this *editio princeps* others were printed, in which no attempt was made to do more than to follow its text; although it was more than suspected that Uscan had by no means faithfully adhered to MS. authority. Zohrab, in 1789, published at Venice an improved text of the Armenian New Test.; and in 1805 he and his coadjutors completed an edition of the entire Armenian Scriptures, for which not only MS. authority was used throughout, but also the results of collations of MSS. were subjoined at the foot of the pages. The basis was a MS. written in the 14th century, in Cilicia; the whole number employed is said to have been eight of the entire Bible, twenty of the New Test., with several more of particular portions, such as the Psalms. Tischendorf states that Aucher, of the monastery of St. Lazarus at Venice, informed him that he and some of his fellow-monks had undertaken a new critical edition: this probably would contain a repetition of the various collations of Zohrab, together with those of other MSS.

The critical editors of the New Test. appear all of them to have been unacquainted with the Armenian language: the want of a Latin translation of this version has made it thus impossible for them to use it as a critical authority, except by the aid of others. Some readings were thus communicated to Mill by Louis Piques; Wetstein received still more from La Croze; Griesbach was aided by a collation of the New Test. of 1789, made by Bredenkamp of Hamburg. Scholz speaks of having been furnished with a collation of the text of 1805; but either this was done very partially and incorrectly, or else Scholz made but little use (and that without real accuracy) of the collation. These partial collations, however, were by no means such as to supply what was needed for the real critical use of the version; and as it was known that Uscan's text was thoroughly untrustworthy for critical purposes, an exact collation of the Venice text of 1805 became a desideratum; Dr. Charles Rieu of the British Museum undertook the task for Tregelles, thus supplying him with a valuable portion of the materials for his critical edition of the Greek Testament. By marking the words, and noting the import of the various readings, *and the discrepancies of Uscan's text*, Rieu did all that was practicable to make the whole of the labor of Zohrab available for those not like himself Armenian scholars.

It had been long noticed that in the Armenian New Test. as printed by Uscan 1 John v. 7 is found: those who are only moderately acquainted with criticism would feel assured that this must be an addition, and that it *could* not be part of the original translation. Did Uscan then introduce it from the Vulgate? he seems to have admitted that in some things he supplied defects in his MS. by translations from the Latin. It was, however, said that Haitho king of Armenia (1224–70), had inserted this verse: that he revised the Armenian version by means of the Latin Vulgate, and that he translated the *prefaces* of Jerome (and also those which are spurious) into Armenian. Hence a kind of *suspicion* attached itself to the Armenian version, and its use was accompanied by a kind of doubt whether or not it was a critical authority which could be safely used. The known fact that Zohrab had omitted 1 John v. 7, was felt to be so far satisfactory that it showed that he had not found it in his MSS., which were thus seen to be earlier than the introduction of this corruption. But the collation of Dr. Rieu, and his statement of the Armenian authorities, set forth the character of the version distinctly in this place as well as in the text in general. Dr. Rieu says of 1 John v. 7, that out of eighteen MSS. used by Zohrab, one only, and that written A. D. 1656, has the passage as in the Stephanic Greek text. In one ancient MS. the reading is found from a recent correction. Thus there is no ground for supposing that it was inserted by Haitho, or by any one till the time when Uscan lived. The wording, however, of Uscan in this place, is not in accordance with the MS. of 1656: so that each seems to have been independently borrowed from the Latin. That Uscan did this, there can be no reasonable doubt; for in the immediate context Uscan accords with the Latin in opposition to all collated Armenian MSS.: thus in ver. 6, he follows the Latin "*Christus* est veritas;" in ver. 20 he has, instead of ἐσμεν, the subjunctive answering to *simus*: even in this minute point the Armenian MSS. definitely vary from Uscan. In iii. 11, for ἀγαπῶμεν, Uscan stands alone in agreeing with the Vulgate *diligatis*. These are proofs of the employment of the Vulgate either by Uscan, or by some one else who prepared the MS. from which he printed. There are many other passages in which alterations or considerable additions (see for instance Matt. xvi. 2, 3, xxiii. 14; John viii. 1–11; Acts xv. 34, xxiii. 24, xxviii. 25) are proofs that Uscan agrees with the Vulgate against all known MSS. (These variations in the two texts of Uscan and Zohrab, as well as the material readings of Armenian MSS. are inserted in Tregelles' Greek Test. on Dr. Rieu's authority.)

But *systematic* revision with the Vulgate is not to be found even in Uscan's text: they differ greatly in characteristic readings; though here and there throughout there is some mark of an influence drawn from the Vulgate. And as to accordances with the Latin, we have no reason to believe that there is any proof of alterations having been made in the days of King Haitho.

Some have spoken of this version as though it had been made from the Peshito Syriac, and not from the Greek; the only grounds for such a notion can be the facts connected with part of the history of its execution. There are, no doubt, a few readings which show that the translators had made some use of the Syriac; but these are only exceptions to the general texture of the version; an addition from John xx. 21, brought into Matt. xxviii 18, in both the Armenian and the Peshito, is probably the most marked.

The collations of MSS. show that some amongst them differ greatly from the rest: it seems as if the variations did not in such cases originate in Armenian, but they must have sprung from some recasting of the text and its revision by Greek copies. There may *perhaps* be proofs of the difference between the MS. brought from Ephesus, and the copies afterwards used at Alexandria; but thus much at least is a certain conclusion, that comparison with Greek copies of different kinds must at some period have taken place. The omission of the last twelve verses of St. Mark's Gospel in the older Armenian copies, and their insertion in the later, may be taken as a proof of *some* effective revision.

The Armenian version in its general texture is a valuable aid to the criticism of the text of the New Test.: it was a worthy service to rehabilitate it as a critical witness as to the general reading of certain Greek copies existing in the former half of the 5th century.

CHALDEE VERSIONS. [TARGUMS, below.]

EGYPTIAN VERSIONS. — I. THE MEMPHITIC VERSION. — The version thus designated was for a considerable time the only Egyptian translation known to scholars; *Coptic* was then regarded as a sufficiently accurate and definite appellation. But when the fact was established that there were at least two Egyptian versions, the name Coptic was found to be indefinite, and even unsuitable for the translation then so termed: for in the dialect of Upper Egypt there was another; and it is from the ancient *Coptos* in *Upper* Egypt that the term Coptic is taken. Thus Copto-Memphitic, or more simply Memphitic, is the better name for the version in the dialect of Lower Egypt.

When Egyptian translations were made we do not know: we find, however, that in the middle of the 4th century the Egyptian language was in great use amongst the Christian inhabitants of that country; for the rule of Pachomius for the monks is stated to have been drawn up in Egyptian, and to have been afterwards translated into Greek. It was prescribed that every one of the monks (estimated at seven thousand) for whom this rule in Egyptian was drawn up, was to learn to read (whether so disposed or not), so as to be able at least to read the New Test. and the Psalms. The whole narration presupposes that there was in Upper Egypt a translation.

So, too, also in Lower Egypt in the same century. For Palladius found at Nitria the abbot John of Lycopolis, who was well acquainted with the New Test., but who was ignorant of Greek; so that he could only converse with him through an interpreter. There seems to be proof of the ecclesiastical use of the Egyptian language even before this time. Those who know what the early Christian worship was, will feel how cogent is the proof that the Scriptures had then been translated.

When the attention of European scholars was directed to the language and races of modern Egypt, it was found that while the native Christians use only Arabic vernacularly, yet in their services and in the public reading of the Scriptures they employ a dialect of the Coptic. This is the version now termed Memphitic. When MSS. had been brought from Egypt, Thomas Marshall, an Englishman, prepared in the latter part of the 16th century an edition of the Gospels; the publication of which was prevented by his death. From some of the readings having been noted by him Mill was able to use them for insertion in his Greek Test.; they often differ (sometimes for the better) from the text published by Wilkins. Wilkins was a Prussian by birth; in 1716 he published at Oxford the first Memphitic New Test., founded on MSS. in the Bodleian, and compared with some at Rome and Paris. That he did not execute the work in a very satisfactory manner would probably now be owned by every one; but it must be remembered that no one else did it at all. Wilkins gave no proper account of the MSS. which he used, nor of the variations which he found in them: his text seems to be in many places a confused combination of what he took from various MSS.; so that the sentences do not properly connect themselves, even (it is said) in grammatical construction. And yet for 130 years this was the *only* Memphitic edition.

In 1846–48, Schwartze published at Berlin an edition of the Memphitic Gospels, in which he employed MSS. in the Royal Library there. These were almost entirely modern transcripts; but with these limited materials he produced a far more satisfactory work than that of Wilkins. At the foot of the page he gave the variations which he found in his copies; and subjoined there was a collation of the Memphitic and Thebaic versions with Lachmann's Greek Test. (1842), and the first of Tischendorf (1841). There are also such references to the Latin version of Wilkins, that it almost seems as if he supposed that all who used his edition would also have that of Wilkins before them.

The death of Schwartze prevented the continuation of his labors. Since then Boettticher's editions, first of the Acts and then of the Epistles, have appeared; these are not in a form which is available for the use of those who are themselves unacquainted with Egyptian: the editor gives as his reason for issuing a bare text, that he intended soon to publish a work of his own in which he would fully employ the authority of the ancient versions. Several years have since passed, and Boetticher does not seem to give any further prospect of the issue of such volume on the ancient versions.*

In 1848–52 a magnificent edition of the Memphitic New Test. was published by the Society for promoting Christian Knowledge, under the editorial care of the Rev. R. T. Lieder of Cairo. In its preparation he followed MSS. without depending on the text of Wilkins. There is no statement of the variations of the authorities, which would have hardly been a suitable accompaniment of an edition intended solely for the use of the Coptic churches, and in which, while the Egyptian text which is read aloud is printed in large characters, there is at the side a small column in Arabic in order that the readers may themselves be able to understand something of what they read aloud.

It is thus impossible to give a *history* of this version: we find proof that such a translation existed in early times, we find this now (and from time immemorial) in church use in Egypt; when speaking of its internal character and its value as to textual criticism (after the other Egyptian versions have been described), it will be found that there are many considerations which go far to prove the identity of what we now have, with that which must have existed at an early period.

The Old Testament of this version was made from the LXX. Of this, Wilkins edited the Pentateuch in 1731; the Psalter was published at Rome in 1744. The Rev. Dr. Tattam edited the Minor Prophets in 1836, Job in 1846, and the Major Prophets in 1852. Bardelli published Daniel in

* It may be noted here that the later writings of Boetticher have been published under the name of Paul or Paul Anton de Lagarde. Among these is an essay *De Novo Testamento ad Versionum Orientalium fidem edendo*, Berl. 1857, 4to. A

1849. [A. Fallet, *La version cophte du Pent.*, livr. 1, 2, Par. 1854. P. de Lagarde, *Der Pent., koptisch*, Leipz. 1867. — J. L. Ideler, *Psalterium Coptice*, Berol. 1837. M. G. Schwartze, *Psalterium in Dial. Copt. Ling. Memphit. transl. edidit, Notisque crit. et gram. instruxit*, Lips. 1843, 4to. — A.]

II. THE THEBAIC VERSION. — The examination of Egyptian MSS. in the last century showed that besides the Memphitic there is also another version in a cognate Egyptian dialect. To this the name *Sahidic* was applied by some, from an Arabic designation for Upper Egypt and its ancient language. It is, however, far better to assign to this version a name not derived from the language of the Arabian occupants of that land: thus Copto-Thebaic (as styled by Giorgi), or simply Thebaic, is far preferable. The first who attended much to the subject of this version was Woide, who collected readings from MSS. which he communicated to Cramer in 1779. In 1785 Mingarelli published a few portions of this version of the New Test. from the Nanian MSS. In 1789 Giorgi edited very valuable Greek and Thebaic fragments of St. John's Gospel, which appear to belong to the *fifth* century. Münter, in 1787, had published a fragment of Daniel in this version; and in 1789 he brought out portions of the Epistles to Timothy, together with readings which he had collected from MSS. in other parts of the New Test. In the following year Mingarelli *printed* Mark xi. 29–xv. 22, from MSS. which had recently been obtained by Nani; but owing to the editor's death the unfinished sheets were never, properly speaking, *published*. A few copies only seem to have been circulated; they are the more valuable from the fact of the MSS. having been destroyed by the persons into whose hands they fell, and from their containing a portion of the New Test. not found, it appears, in any known MS. Woide was now busily engaged in the collection of portions of the Thebaic Scriptures: he had even issued a Prospectus of such an edition in 1778. Woide's death took place before his edition was completed. In 1799, however, it appeared under the editorial care of Ford. In this work all the portions found by Woide himself were given, as well as those published by Mingarelli in his lifetime; but not only were Mingarelli's posthumous sheets passed by, but also all that had been published by Münter and Giorgi, as well as the transcript of Münter from the Borgian MSS., which Ford might have used for his edition. This collection of fragments contains the greater part of the Thebaic New Test. They might, however, be greatly amplified out of what are mentioned by Zoega, as found in the Borgian MSS. (now in the Propaganda), in his catalogue published in 1810 after his death. It could hardly have been thought that this definite account of existing Thebaic fragments would have remained more than half a century without some Egyptian scholar having rescued the inedited portions of this version from their obscurity; and surely this would not have been the case if Biblical critics had been found who possess Egyptian learning.

In the Memphitic Gospels of Schwartze there is not only, as has been already mentioned, a collation subjoined of the Thebaic text, but also the criticisms of that learned editor on both Ford and Woide, neither of whom, in his judgment, possessed sufficient editorial competency. In this opinion he was perhaps correct; but still let it be observed, that if it had not been for the labors of Woide (of which Ford was simply the continuer), there is no reason to suppose but that the Thebaic New Test. would remain unprinted still. Had this been the case the loss to textual criticism would have been great.

III. A THIRD EGYPTIAN VERSION. — Some Egyptian fragments were noticed by both Münter and Giorgi amongst the Borgian MSS., which in dialect differ both from the Memphitic and Thebaic. These fragments, of a third Egyptian translation, were edited by both these scholars independently in the same year (1789). In what part of Egypt this third dialect was used, and what should be its distinctive name, has been a good deal discussed. Arabian writers mention a third Egyptian dialect under the name of *Bashmuric*, and this has by some been *assumed* as the appellation for this version. Giorgi supposed that this was the dialect of the Ammonian Oasis; in this Münter agreed with him; and thus they called the version the *Ammonian*. There is in fact no certainty on the subject: but as the affinities of the dialect are closely allied to the Thebaic, and as it has been shown that *Bashmur* is the district of *Lower* Egypt to the east of the Delta, it seems by no means likely that it can belong to a region so far from the Thebaid. Indeed it has been reasonably doubted whether the slight differences (mostly those of orthography) entitle this to be considered to be a really different dialect from the Thebaic itself.

After the first portions of this version, others were transcribed independently by Zoega and Engelbreth, and their transcripts appeared respectively in 1810 and 1811. The latter of these scholars accompanied his edition with critical remarks, and the text of the other Egyptian versions on the same page for purposes of comparison.

*The Character and Critical Use of the Egyptian Versions.* — It appears that the Thebaic version may reasonably claim a higher antiquity than the Memphitic. The two translations are independent of each other, and both spring from Greek copies. The Thebaic has been considered to be the older of the two, partly from it having been thought that a book in the Thebaic dialect quotes this version, and from what was judged to be the antiquity of the book so referred to. There are other grounds less precarious. If the Memphitic version exhibits a general agreement with the text current at Alexandria in the third century, it is not unreasonable to suppose that it either belongs to that age, or at least to one not very remote. Now while this is the case it is also to be noticed that the Thebaic seems to have been framed from a text in which there was a much greater admixture, and that not arising from the later revisions which moulded it into the transition text of the fourth century (commencing probably at Antioch), but exactly in the opposite direction: so that the contents of the two versions would seem to show that the antiquity of the Thebaic is most to be regarded, but that the Memphitic is often preferable as to the goodness of its readings, as well as in respect to dialect.

It is probable that the more Hellenized region of Lower Egypt would not require a vernacular version at so early a period as would the more thoroughly Egyptian region of the Thebaid. There are some marks of want of polish in the Thebaic; the Greek words which are introduced are changed into a barbarous form; the habitual introduction of an *aspirate* shows either an ignorance of the true Greek sounds, or else it seems like a want of polish

Digitized by Google

n the dialect itself. That such a mode of expressing Greek words in Egyptian is not needed, we can see from its non-existence in the Memphitic.

The probable conclusions seem to be these: that the Thebaic version was made in the early part of the third century, for the use of the common people among the Christians in Upper Egypt; that it was formed from MSS. such as were then current in the regions of Egypt which were distant from Alexandria; that afterwards the Memphitic version was executed in what was the more polished dialect, from the Greek copies of Alexandria; and that thus in process of time the Memphitic remained alone in ecclesiastical use. Possibly the disuse of the Thebaic in the Egyptian churches did not take place until Arabic was fast becoming the vernacular tongue of that land. It will be well for those whose studies enable them personally to enter on the domain of Egyptian literature, to communicate to Biblical scholars the results of new researches.

The value of these versions in textual criticism, even though they are known only through defective channels, is very high. In some respects they afford the same kind of evidence relative to the text current in Egypt in the early centuries, as do the Old Latin and the version of Jerome for that in use in the West. [VULGATE.]

A few remarks only need be made respecting the *third* Egyptian version. The fragments of this follow the Thebaic so closely as to have no independent character. This version does however possess critical value, as furnishing evidence in a small portion not known in the Thebaic. The existence of the *third* version is a further argument as to the early existence and use of the Thebaic, for this seems to be formed from it by moulding it into the colloquial dialect of some locality.

GOTHIC VERSION. — In the year 318 the Gothic bishop and translator of Scripture, Ulphilas, was born. He succeeded Theophilus as bishop of the Goths in 348, when he subscribed a confession rejecting the orthodox creed of Nicæa; through him it is said that the Goths in general adopted Arianism; it may be, however, more correct to consider that Arianism (or Semi-Arianism) had already spread amongst the Goths inhabiting within the Roman Empire, as well as amongst the Greeks and Latins. Theophilus, the predecessor of Ulphilas, had been present at the council of Nicæa, and had subscribed the Homoousian confession. The great work of Ulphilas was his version of the Scriptures, a translation in which few traces, if any (except in Phil. ii. 6), can be found of his peculiar and erroneous dogmas. In 388 Ulphilas visited Constantinople to defend his heterodox creed, and while there he died.

In the 5th century the Eastern Goths occupied and governed Italy, while the Western Goths took possession of Spain, where they ruled till the beginning of the 8th century. Amongst the Goths in both these countries can the use of this version be traced. It must in fact have at one time been the vernacular translation of a large portion of Europe.

In the latter part of the 16th century the existence of a MS. of this version was known, through Morillon having mentioned that he had observed one in the library of the monastery of Werden on the Ruhr in Westphalia. He transcribed the Lord's Prayer and some other parts, which were afterwards published, as were other verses copied soon after by Arnold Mercator.

In 1648, almost at the conclusion of the Thirty Years' War, the Swedes took that part of Prague on the left of the Moldau (Kleine Seite), and amongst the spoils was sent to Stockholm a copy of the Gothic Gospels, known as the *Codex Argenteus*. This MS. is generally supposed to be the same that Morillon had seen at Werden; but whether the same or not, it had been long at Prague when found there by the Swedes, for Strenius, who died in 1601, mentions it as being there. The *Codex Argenteus* was taken by the Swedes to Stockholm; but on the abdication of Queen Christina of Sweden, a few years later, it disappeared. In 1655 it was in the possession of Isaac Vossius in Holland, who had been the queen's librarian; to him therefore it is probable that it had been given, and not to the queen herself, by the general who brought it from Prague. In 1662 it was repurchased for Sweden by Count Magnus Gabriel de la Gardie, who caused it to be splendidly bound, and placed it in the library of the University of Upsal, where it now remains.

While the book was in the hands of Vossius a transcript was made of its text, from which Junius, his uncle, edited the first edition of the Gothic Gospels at Dort in 1665: the Anglo-Saxon Gospels, edited by Marshall, accompanied the Gothic text. The labors of other editors succeeded: Stiernhielm, 1671; Benzel and Lye, 1750; and others comparatively recent. The MS. is written on vellum that was once purple, in silver letters, except those at the beginning of sections, which are golden. The Gospels have many *lacunæ*: it is calculated that when entire it consisted of 320 folios: there are now but 188. The uniformity of the writing is wonderful: so that it has been thought whether each letter was not formed by a hot iron impressing the gold or silver, used just as bookbinders put on the lettering to the back of a book. It is pretty certain that this beautiful and elaborate MS. must have been written in the 6th century, probably in Upper Italy when under the Gothic sovereignty. Some in the last century supposed that the language of this document is not Gothic, but Frankish — an opinion which was set at rest by the discovery in Italy of Ostro-Gothic writings, about which there could be no question raised. Some Visi-Gothic monuments in Spain were evidence on the same side.

Knittel, in 1762, edited from a Wolfenbüttel palimpsest some portions of the Epistle to the Romans in Gothic, in which the Latin stood by the side of the version of Ulphilas. This discovery first made known the existence of any part of a version of the Epistles. The portions brought to light were soon afterwards used by Ihre in the collection of remarks on Ulphilas edited in 1773 by Büsching.

But as it was certain that in obscure places the

Digitized by Google

*Codex Argenteus* had been not very correctly read, Ihre labored to copy it with exactitude, and to form a Latin version: what he had thus prepared was edited by Zahn in 1805.

New light dawned on Ulphilas and his version in 1817. While the late Cardinal Mai was engaged in the examination of palimpsests in the Ambrosian Library at Milan, of which he was at that time a librarian, he noticed traces of some *Gothic* writing under that of one of the codices. This was found to be part of the books of Ezra and Nehemiah. In making further examination, four other palimpsests were found which contained portions of the Gothic Version. Mai deciphered these MSS. in conjunction with Count Carlo Ottavio Castiglione, and their labors resulted in the recovery, besides a few portions of the Old Test., of almost the whole of the thirteen Epistles of St. Paul and some parts of the Gospels.

The edition of Gabelentz and Loebe (1836–46) contains all that has been discovered of the Gothic Version, with a Latin translation, notes, and a Gothic Dictionary and Grammar. These editors were at the pains to reëxamine, at Upsal and Milan, the MSS. themselves. They have thus, it appears, succeeded in avoiding the repetition of errors made by their predecessors. The Milan palimpsests were chemically restored when the mode of doing this was not as well known as it is at present; the whole texture of the vellum seems stained and spoiled, and thus it is not an easy task to read the ancient writing correctly. Those who have themselves looked at the Wolfenbüttel palimpsest from which Knittel edited the portions of Romans, and who have also examined the Gothic palimpsests at Milan, will probably agree that it is less difficult to read the unrestored MS. at Wolfenbüttel than the restored MSS. at Milan.[a] This must be borne in mind if we would appreciate the labors of Gabelentz and Loebe.

In 1854 Uppström published an excellent edition of the text of the *Codex Argenteus*, with a beautiful fac-simile. Ten leaves of the MS. were then missing, and Uppström tells a rather ungratifying story that they had been stolen by some English traveller. It is a satisfaction, however, that a few years afterwards the real thief on his death-bed restored the missing leaves; and, though stolen, it was not by any one out of Sweden. Uppström edited them as a supplement in 1857.

In 1855–56 Massmann issued an excellent small edition of all the Gothic portions of the Scriptures known to be extant. He accompanies the Gothic text with the Greek and the Latin, and there are a Grammar and Vocabulary subjoined. This edition is said to be more correct than that of Gabelentz and Loebe. Another edition of Ulphilas ["Text, Gram., u. Wörterbuch"] by F. L. Stamm appeared at Paderborn in 1858 [4e Ausg., von M. Heyne, 1869].

As an ancient monument of the Gothic language the version of Ulphilas possesses great interest; as a version the use of which was once extended widely through Europe, it is a monument of the Christianization of the Goths; and as a version known to have been made in the 4th century, and transmitted to us in ancient MSS., it has its value in textual criticism, being thus a witness to readings which were current in that age. In certain passages it has been thought that there is some proof of the influence of the Latin; and this has been regarded as confirmed by the order of the Gospels in the *Codex Argenteus*, being that of some of the Old Latin MSS., Matthew, John, Luke, Mark. But if the peculiarities pointed out were borrowed in the Gothic from the Latin, they must be considered rather as exceptional points, and not such as affect the general texture of the version, for its Greek origin is not to be mistaken. This is certain from the manner in which the Greek constructions and the forms of compound words are imitated. The very mistakes of rendering are proofs of Greek and not Latin origin. The marks of conformity to the Latin may have been introduced into the version in the case of MSS. copied in Italy during the rule in that land of the Gothic sovereigns. The Wolfenbüttel palimpsest has Latin by the side of the Gothic.

The Greek from which the version was made must in many respects have been what has been termed the transition text of the 4th century; another witness to which is the revised form of the Old Latin, such as is found in the Codex Brixianus (this revision being in fact the *Itala*). [VULGATE.]

In all cases in which the readings of the Gothic confirm those of the most ancient authorities, the united testimony must be allowed to possess especial weight.

*Literature.*— Waitz, *Ueber das Leben und die Lehre des Ulphila*, 1840; Gabelentz and Loebe, *Ulfilas* (*Prolegomena*), 1836–43; Uppström, *Codex Argenteus*, 1854 (*Decem Codicis Argentei rediviva folia*, 1857); Massmann, *Ulfilas*, 1857. [W. Bessell, *Ueber das Leben des Ulfilas*, etc., Gött. 1860; W. Krafft, art. "Ulfila" in Herzog's *Real-Encykl.* xvi. 616–624 (1862), comp. his *Die Anfänge d. christl. Kirche bei d. germ. Völkern*, Bd. i. Abth. i. (1854); E. Bernhardt, *Krit. Unters. über die goth. Bibelübersetzung*, 2 Hefte, Meiningen, Elberf., 1864–69. — A.] S. P. T.

GREEK VERSIONS OF THE OLD TESTAMENT. — 1. SEPTUAGINT. — In addition to the special article on this version [SEPTUAGINT] a few points may be noted here.

I. *Name.* — In all discussions relative to the name of *Septuagint*, so universally appropriated to the Greek version of Alexandria, the scholion discovered by Osann and published by Ritschl ought to be considered. The origin of this Latin scholion is curious. The substance of it is stated to have been extracted from Callimachus and Eratosthenes, the Alexandrian librarians, by Tzetzes, and from his *Greek* note an Italian of the 15th century has formed the Latin scholion in question. The writer has been speaking of the collecting of ancient Greek poems carried on at Alexandria under Ptolemy Philadelphus, and then he thus continues: "Nam rex ille philosophis affertissimus (corr. 'differtissimus,' Ritschl, 'affectissimus,' Thiersch) et ceteris omnibus auctoribus claris, disquisitis impensa regia munificentiæ ubique terrarum quantum valuit voluminibus opera Demetrii Phalerei p h x x a sensum duas bibliothecas fecit, alteram extra regiam alteram autem in regia." The scholion then goes on to speak of books in many languages: "quæ summa

[a] Such is the writer's judgment from his own examination of the palimpsest at Wolfenbüttel, and of those at Milan; but of course he never saw the state prior to their restoration.

Digitized by Google

diligentia rex ille in suam linguam fecit ab optimis interpretibus converti." [a] Bernhardy reads instead of "p b z x a senum," "et lxx senum," and this correction is agreed to by Thiersch, as it well may be: some correction is manifestly needed, and *this* appears to be right. This gives us *seventy elders* associated in the formation of the library. The testimony comes to us from Alexandrian authority; and this, if true (or even if believed to be true), would connect the *Septuagint* with the library; a designation which might most easily be applied to a version of the Scriptures there deposited; and, let the translation be once known by such a name, then nothing would be more probable than that the designation should be applied to the *translators*. This may be regarded as the first step in the formation of the fables. Let the *Septuagint* be first known as applying to the associates in the collection of the library, then to the library itself, and then to that particular book in the library which to so many had a far greater value than all its other contents. Whether more than the Pentateuch was thus translated and then deposited in the Royal Library is a separate question.

II. *The Connection of the Pentateuch in the LXX. with the Samaritan Text.* — It was long ago remarked that in the Pentateuch the Samaritan copy and the LXX. agree in readings which differ from the Hebrew text of the Jews. This has been pointed out as occurring in perhaps two thousand places. The conclusion to which some thus came was that the LXX. must have been translated from a Samaritan copy.

But, on many grounds, it would be difficult to admit this, even if it were found impossible to explain the coincidences. For (i.) it must be taken into account that if the discrepancies of the Samaritan and Jewish copies be estimated numerically, the LXX. will be found to agree *far more frequently* with the latter than the former. (ii.) In the cases of considerable and marked passages occurring in the Samaritan which are not in the Jewish, the LXX. does not contain them. (iii.) In the passages in which slight variations are found, both in the Samaritan and LXX., from the Jewish text, they often differ amongst themselves, and the amplification of the LXX. is less than that of the Samaritan. (iv.) Some of the small amplifications in which the Samaritan seems to accord with the LXX. are in such incorrect and non-idiomatic Hebrew that it is suggested that these must be *translations*, and, if so, probably from the LXX. (v.) The amplifications of the LXX. and Samaritan often resemble each other greatly in character, as if similar false criticism had been applied to the text in each case. But as, in spite of all similarities such as these, the Pentateuch of the LXX. is more Jewish than Samaritan, we need not adopt the notion of translation from a Samaritan Codex, which would involve the subject in greater difficulties, and leave more points to be explained. (On some of the supposed agreements of the LXX. with the Samaritan, see Bishop Fitzgerald in Kitto's *Journal of Sacred Literature*, Oct. 1848, pp. 324–332.)

III. *The Liturgical Origin of Portions of the LXX.* — This is a subject for inquiry which has received but little attention, not so much, probably, as its importance deserves. It was noticed by Tregelles many years ago that the headings of certain psalms in the LXX. coincide with the liturgical directions in the Jewish Prayer-book: the results were at a later period communicated in Kitto's *Journal of Sacred Literature*, April, 1852, pp. 207–209. The results may be briefly stated: The 23d Psalm, LXX. (24th, Hebrew), is headed in the LXX., *τῇ μιᾷ σαββάτου*; so too in Hebrew, in De Sola's *Prayers of the Sephardim*, ביום הראשון: Ps. xlvii., LXX. (Heb. xlviii.) *δευτέρᾳ σαββάτου*, ליום שני: Ps. xciii., LXX. (Heb. xciv.), *τετράδι σαββάτου*, ליום רביעי: Ps. xcii., LXX. (Heb. xciii.), *εἰς τὴν ἡμέραν τοῦ προσαββάτου*, ליום ששי. There appear to be no Greek copies extant which contain similar headings for Psalms lxxxi. and lxxx. (Heb. lxxxii. and lxxxi.), which the Jewish Prayer-book appropriates to the *third* and *fifth* days; but that such once existed in the case of the latter psalm seems to be shown from the Latin *Psalterium Vetus* having the prefixed *quinta sabbati*, ליום חמישי. Prof. Delitzsch, in his *Commentary on the Psalms*, has recently pointed out that the notation of these psalms in the LXX. is in accordance with certain passages in the Talmud.

It is worthy of inquiry whether variations in other passages of the LXX. from the Hebrew text cannot at times be connected with liturgical use, and whether they do not originate in part from rubrical directions. It seems to be at least plain that the psalms were translated from a copy prepared for synagogue worship.

2. AQUILA. — It is a remarkable fact that in the second century there were three versions executed of the Old Testament Scriptures into Greek. The first of these was made by Aquila, a native of Sinope in Pontus, who had become a proselyte to Judaism. The Jerusalem Talmud (see Bartolocci, *Bibliotheca Rabb.* iv. 281) [b] describes him as a disciple of Rabbi Akiba; and this would place him in some part of the reign of the Emperor Hadrian (A. D. 117–138). It is supposed that the object of his version was to aid the Jews in their controversies with the Christians: and that as the latter were in the habit of employing the LXX., they wished to have a version of their own on which they could rely. It is very probable that the Jews in many Greek-speaking countries were not sufficiently acquainted with Hebrew to refer for themselves to the original, and thus they wished to have such a Greek translation as they might use with confidence in their discussions. Such controversies were (it must be remembered) a new thing. Prior to the preaching of the gospel, there were none besides the Jews who used the Jewish Scriptures as a means of learning God's revealed truth, except those who either partially or wholly became proselytes to Judaism. But now the Jews saw to their grief, that their Scriptures were made the instruments for teaching the principles of a religion which they regarded as nothing less than an apostasy from Moses.

This, then, is a probable account of the origin of this version. Extreme literality and an occasional polemical bias appear to be its chief characteristics.

[a] See Thiersch, *De Pentateuchi versione Alexandrina*, pp. 8, 9. Erlangen, 1841.

[b] Hichhorn and those who have followed him state this on the authority of Irenæus, instead of that of the Jerusalem Talmud, a confusion which needs to be explicitly, and not merely tacitly corrected

Digitized by Google

The idiom of the Greek language is very often violated in order to produce what was intended should be a very literal version; and thus, not only sense but grammar even was disregarded: a sufficient instance of this is found in his rendering the Hebrew particle אֵת by *σύν*, as in Gen. i. 1, *σὺν τὸν οὐρανὸν καὶ σὺν τὴν γῆν*, "quod Græca et Latina lingua omnino non recipit," as Jerome says. Another instance is furnished by Gen. v. 5, *καὶ ἔζησεν Ἀδὰμ τριάκοντα ἔτος καὶ ἐννακόσια ἔτος*.

It is sufficiently attested that this version was formed for controversial purposes: a proof of which may be found in the rendering of particular passages, such as Is. vii. 14, where עַלְמָה, in the LXX. *παρθένος*, is by Aquila translated *νεᾶνις*; such renderings might be regarded perhaps rather as modes of avoiding an argument than as direct falsification. There certainly was room for a version which should express the Hebrew more accurately than was done by the LXX.; but if this had been thoroughly carried out it would have been found that in many important points of doctrine — such, for instance, as in the divinity of the Messiah and the rejection of Israel, the true rendering of the Hebrew text would have been in far closer conformity with the teaching of the New Testament than was the LXX. itself. It is probable, therefore, that one polemical object was to make the citations in the New Testament from the Old appear to be inconclusive, by producing other renderings (often probably more *literally* exact) differing from the LXX., or even contradicting it. Thus Christianity might seem to the Jewish mind to rest on a false basis. But in many cases a really critical examiner would have found that in points of important doctrine the New Testament definitely rejects the reading of the LXX. (when utterly unsuited to the matter in hand), and adopts the reading of the Hebrew.

It is mentioned that Aquila put forth a second edition (*i. e.* revision) of his version, in which the Hebrew was yet more servilely followed, but it is not known if this extended to the whole, or only to three books, namely, Jeremiah, Ezekiel, and Daniel, of which there are fragments.

Aquila often appears to have so closely sought to follow the etymology of the Hebrew words, that not only does his version produce no definite idea, but it does not even suggest any meaning at all. If we possessed it perfect it would have been of great value as to the criticism of the Hebrew text, though often it would be of no service as to its real understanding.

That this version was employed for centuries by the Jews themselves is proved indirectly by the 146th Novella of Justinian: *πλὴν οἱ διὰ τῆς Ἑλληνίδος ἀναγινώσκοντες τῇ τῶν ἑβδομήκοντα χρήσονται παραδόσει . . . πλὴν ἀλλ' ὡς ἂν μὴ τὰς λοιπὰς αὐτοῖς ἀποκλείειν νομισθείημεν ἑρμηνείας, ἄδειαν δίδομεν καὶ τῇ Ἀκύλου κεχρῆσθαι, κἂν εἰ ἀλλόφυλος ἐκεῖνος καὶ οὐ μετρίαν ἐπί τισιν λέξεων ἔχῃ πρὸς τοὺς ἑβδομήκοντα τὴν διαφωνίαν*.

3. THEODOTION. — The second version, of which we have information as executed in the second century, is that of Theodotion. He is stated to have been an Ephesian, and he seems to be most generally described as an Ebionite: if this is correct, his work was probably intended for those semi-Christians who may have desired to use a version of their own instead of employing the LXX. with the Christians, or that of Aquila with the Jews.

But it may be doubted if the name of *translation* can be rightly applied to the work of Theodotion: it is rather a revision of the LXX. with the Hebrew text, so as to bring some of the copies then in use into more conformity with the original. This he was able to do (with the aid probably of some instructors) so as to eliminate portions which had been introduced into the LXX., without really being an integral part of the version; and also so as to bring much into accordance with the Hebrew in other respects. But his own knowledge of Hebrew was evidently very limited; and thus words and parts of sentences were left untranslated; the Hebrew being merely written with Greek letters.

Theodotion as well as Aquila was quoted by Irenæus; and against both there is the common charge laid of corrupting texts which relate to the Messiah: some polemical intention in such passages can hardly be doubted. The statement of Epiphanius that he made his translation in the reign of Commodus accords well with its having been quoted by Irenæus; but it cannot be correct if it is one of the translations referred to by Justin Martyr as giving interpretations contrary to the Christian doctrine of the New Test.

There can be no doubt that this version was much used by Christians: probably many changes in the text of the LXX. were adopted from Theodotion: this may have begun before the Biblical labors of Origen brought the various versions into one conspectus. The translation of the book of Daniel by Theodotion was substituted for that of the LXX. in ecclesiastical use as early at least as part of the third century. Hence Daniel, as rendered or revised by Theodotion, has so long taken the place of the true LXX., that their version of this book was supposed not to be extant; and it has only been found in one MS. In most editions of the LXX. Theodotion's version of Daniel is still substituted for that which really belongs to that translation.

4. SYMMACHUS is stated by Eusebius and Jerome to have been an Ebionite: so too in the Syrian accounts given by Assemani; Epiphanius, however, and others style him a Samaritan. There may have been Ebionites from amongst the Samaritans, who constituted a kind of separate sect; and these may have desired a version of their own; or it may be that as a Samaritan he made this version for some of that people who employed Greek, and who had learned to receive more than the Pentateuch. But perhaps to such motives was added (if indeed this were not the only cause of the version) a desire for a Greek translation not so unintelligibly bald as that of Aquila, and not displaying such a want of Hebrew learning as that of Theodotion. It is probable that if this translation of Symmachus had appeared prior to the time of Irenæus, it would have been mentioned by him; and this agrees with what Epiphanius says, namely, that he lived under the Emperor Severus.

The translation which he produced was probably better than the others as to sense and general phraseology. When Jerome speaks of a *second edition* he may probably mean some revision, more or less complete, which he executed after his translation was first made: it could hardly be a retranslation, or anything at all tantamount thereto

5. THE FIFTH, SIXTH, AND SEVENTH VERSIONS. — Besides the translations of Aquila, Sym-

Digitized by Google

machus, and Theodotion, the great critical work of Origen comprised as to portions of the Old Test. three other versions, placed for comparison with the LXX.; which, from their being anonymous, are only known as the fifth, sixth, and seventh; designations taken from the places which they respectively occupied in Origen's columnar arrangement. Ancient writers seem not to have been uniform in the notation which they applied to these versions; and thus what is cited from one by its number of reference is quoted by others under a different numeral.

These three partial translations were discovered by Origen in the course of his travels in connection with his great work of Biblical criticism. Eusebius says that two of these versions (but without designating precisely which) were found, the one at Jericho, and the other at Nicopolis on the Gulf of Actium. Epiphanius says, that what he terms the fifth, was found at Jericho, and the sixth at Nicopolis; while Jerome speaks of the fifth as having been found at the latter place.

The contents of the *fifth version* appear to have been the Pentateuch, Psalms, Canticles, and the minor prophets: it seems also to be referred to in the Syro-Hexaplar text of the Second Book of Kings: it may be doubted if in all these books it was complete, or at least if so much were adopted by Origen. The existing fragments prove that the translator used the Hebrew original; but it is also certain that he was aided by the work of former translators.

The *sixth version* seems to have been just the same in its contents as the fifth (except 2 Kings): and thus the two may have been confused: this translator also seems to have had the other versions before him. Jerome calls the authors of the fifth and sixth "*Judaicos* translatores"; but the translator of this must have been a Christian when he executed his work, or else the hand of a Christian reviser must have meddled with it before it was employed by Origen; which seems from the small interval of time to be hardly probable. For in Hab. iii. 15 the translation runs, ἐξῆλθες τοῦ σῶσαι τὸν λαόν σου διὰ Ἰησοῦ τοῦ χριστοῦ σου.

Of the *seventh version* very few fragments remain. It seems to have contained the Psalms and minor prophets; and the translator was probably a Jew.

From the references given by Origen, or by those who copied from his columnar arrangement and its results (or who *added* to such extracts), it has been thought that other Greek versions were spoken of. Of these ὁ Ἑβραῖος probably refers to the Hebrew text or to something drawn from it: ὁ Σύρος to the Old Syriac version: τὸ Σαμαρειτικόν probably a reference to the Samaritan text, or some Samaritan gloss: ὁ Ἑλληνικός, ὁ Ἄλλος, ὁ ἑρμηνευτής some unspecified version or versions.

The existing fragments of these varied versions are mostly to be found in the editions of the relics of Origen's Hexapla, by Montfaucon and by Bahrdt, and later, by F. Field, Oxford, 1867–70. See also below, SYRIAC VERSIONS, I. (B.), on the editions of the Syriac from the Hexaplar Greek text. — A.]

(For an account of the use made of these versions by Origen, and its results, see SEPTUAGINT.)

6. THE VENETO-GREEK VERSION. — A MS. of the fourteenth century, in the library of St. Mark at Venice, contains a peculiar version of the Pentateuch, Proverbs, Ecclesiastes, Canticles, Ruth Lamentations, and Daniel. All of these books, except the Pentateuch, were published by Villoison at Strasbourg in 1784; the Pentateuch was edited by Ammon at Erlangen in 1790–91. The version itself is thought to be four or five hundred years older than the one MS. in which it has been transmitted; this, however, is so thoroughly a matter of opinion, that there seems no absolute reason for determining that this one MS. may not be the original as well as the only one in existence. It is written in one very narrow column on each page; the leaves follow each other in the Hebrew order, so that the book begins at what we should call the end. An examination of the MS. suggested the opinion that it may have been written on the broad inner margin of a Hebrew MS.: and that for some reason the Hebrew portion had been cut away, leaving thus a Greek MS. probably unique as to its form and arrangement. As to the translation itself, it is on any supposition too recent to be of consequence in criticism. It may be said briefly that the translation was made from the Hebrew, although the present punctuation and accentuation is often not followed, and the translator was no doubt acquainted with some other Greek versions. The language of the translation is a most strange mixture of astonishing and cacophonous barbarism with attempts at Attic elegance and refinement. The Doric, which is employed to answer to the Chaldæan portions of Daniel, seems to be an indication of remarkable affectation.

THE GREEK OF ST. MATTHEW'S GOSPEL. — Any account of the Greek versions of Holy Scripture would be incomplete without some allusion to the fact, that if early testimonies and ancient opinion unitedly are to have some weight when wholly uncontradicted, then it must be admitted that the original language of the Gospel of St. Matthew was *Hebrew*, and that the text which has been transmitted to us is really a Greek translation.

It may be briefly stated that every early writer who mentions that St. Matthew wrote a Gospel *at all* says that he wrote in Hebrew (that is, in the Syro-Chaldaic), and in Palestine in the first century; so that if it be assumed that he did not write in Hebrew but in Greek, then it may well be asked, what ground is there to believe that he wrote any narrative of our Lord's life on earth?

Every early writer that has come down to us uses the *Greek* of St. Matthew, and this with the definite recognition that it is a translation; hence we may be sure that the Greek copy belongs to the Apostolic age, having been thus authoritatively used from and up to that time. Thus the question is not the *authority* of the Greek translation, which comes from the time when the churches enjoyed Apostolic guidance, but whether there was a Hebrew original from which it had been translated.

The witnesses to the Hebrew original were men sufficiently competent to attest so simple a fact, especially seeing that they are relied on in what is far more important, — that St. Matthew wrote a Gospel at all. Papias, in the beginning of the second century, repeats apparently the words of John the Presbyter, an immediate disciple of our Lord, that "Matthew wrote the oracles in the Hebrew dialect." Irenæus, in the latter part of the same century, is equally explicit; in connection with the Indian mission of Pantænus in the same age, we learn that he found the Gospel of Matthew in the

Digitized by Google

very Hebrew letters. In the next century Origen, the laborious investigator and diligent inquirer, says, that the received account was that St. Matthew had written the first Gospel, and that it was in Hebrew. So too in the next century, Epiphanius and Jerome, both of whom, like Origen, were acquainted with Hebrew. Jerome also mentions the very copies of this Hebrew original which were extant in his time, and which he transcribed. He shows indeed that the copies then circulated amongst the Nazarenes had been variously interpolated: but this would not affect the antecedent fact. So too Epiphanius shows that the document had been variously depraved: but this does not set aside what it originally was.

To follow the unanimous agreement of later writers is needless; but what can be said on the other side? What *evidence* is adduced that St. Matthew wrote in Greek? None whatever: but simply some *à priori* notions that he ought to have done so are advanced: then it is truly stated that the Greek Gospel does not read as though it had about it the constraint of a translation; and then it is said that *perhaps* the witnesses for the Hebrew original were mistaken.[a] "But (says Principal Campbell) is the positive testimony of witnesses, delivered as of a well-known fact, to be overturned by a mere supposition, *a perhaps*? for that the case is really as they suppose no shadow of evidence is pretended" (*Works*, ii. 171).

For another theory, that St. Matthew wrote both in Hebrew and also in Greek, there is no evidence: the notion is even contradicted by the avowed ignorance of the early Christian writers as to whose hand formed the Greek version which they accepted as authoritative. To them there was nothing self-contradictory (as some have said) in the notion of an authoritative translation. As it can be shown that the public use of the *four* Gospels in Greek was universal in the churches from the Apostolic age, it proves to us that Apostolic sanction must have been the ground of this usage; this surely is sufficient to authorise the Greek Gospel that we have.

Erasmus seems to have been the first to suggest that the Greek is the original of the Apostle: at least no writer earlier than Erasmus has been brought forward as holding the opinion: in this many have followed him on what may be called very subjective grounds. Erasmus also advanced the opinion that Irenæus *Against Heresies* was written by him in Latin. For this he had just as good grounds as for the Greek original of St. Matthew. As to Irenæus, no one appears to follow Erasmus; why should so many adhere to his bold opinion (opposed by so much evidence and supported by none) relative to St. Matthew? On the revival of letters there was much curiosity expressed for the recovery of a copy of St. Matthew's Hebrew original. Pope Nicholas V. is said to have offered five thousand ducats for a copy: this probably suggested the retranslations into Hebrew of this Gospel published in the following century by Sebastian Münster and others. S. P. T.

LATIN VERSIONS. [VULGATE.]

SAMARITAN VERSIONS. [SAMARITAN PENTATEUCH, p. 2812 a.]

SLAVONIC VERSION. In the year 862 there was a desire expressed, or an inquiry made, for Christian teachers in Moravia, and in the following year the labors of missionaries began amongst them. We need not consider the Moravia in which these services were commenced to be precisely restricted to or identified with the region which now bears that name, for in the ninth century *Great* Moravia was of far wider extent; and it was amongst the Slavonic people then occupying this whole region, that the effort for Christianization was put forth But while this further extent of Moravia is admitted, it is also to be recollected that the province of Moravia, of which Brünn is the metropolis, is not only the nucleus of Moravia, but that also the inhabitants of that country, still retaining as they do their Slavonian tongue, rightly consider themselves as the descendants and successors of those who were then Christianized. Thus, in 1862 they commemorated the thousandth anniversary of their having taken this step, and in 1863 they celebrated the thousandth from the actual arrival of missionaries amongst them. These missionaries were Cyrillus and Methodius, two brothers from Thessalonica: to Cyrillus is ascribed the invention of the Slavonian alphabet, and the commencement of the translation of the Scriptures. Neander truly says that he was honorably distinguished from all other missionaries of that period in not having yielded to the prejudice which represented the languages of rude nations as too profane for sacred uses; and by not having shrunk from any toil which was necessary in order to become accurately acquainted with the language of the people amongst whom he labored. Cyrillus appears to have died at Rome in 868, while Metho-

[a] The manner in which the testimony of competent witnesses has been not only called in question, but set aside, is such as would cast doubt on any historical fact competently attested; and the terms applied to the witnesses themselves are such as seem to show that argument being vain, it is needful to have recourse to something else; not mere *assertion* as opposed to the definite evidence, but a mode of speaking of the witnesses themselves and of misrepresenting their words, which would not be ventured on in common matters. Thus a writer who is well and justly esteemed on other subjects, the Rev. Dr. Wm. Alexander, sets aside the evidence and the statements of Jerome in this manner: "The one who says he had seen the [Hebrew] gospel is Jerome; but his evidence about it is so conflicting that it is not worth a rush. First he says he has seen it, and is sure that it is the original of the Greek gospel; then he softens down with 'it is *called* by most people Matthew's authentic,' as most believe,' and so on Now he says, 'Who translated it into Greek is unknown;' and presently, with amusing self-complacency and obliviousness, he tells us, 'I myself translated it into Greek and Latin!' Why there is not a small-debt court in the country where such a witness would not be hooted to the door." Would such modes of reasoning be adopted if it were not desired to mystify the subject? Who cannot see that Jerome says that it is unknown who had made the Greek translation then current for centuries? And who imagines that he identified with that version the one which he had recently made from the document found at Berea? But thus it is that *this* is substituted for argument on this subject. Dr Land, in the *Journal of Sacred Literature*, October 1858, boldly asserts, "We may safely say that there is, in probability as well as in direct testimony, a weight as heavy in the scale of the Greek text as in that of the Hebrew, not to go further." But, in fact, there is no testimony, direct or indirect, for a Greek original of St. Matthew.

Digitized by Google

thus continued for many years to be bishop of the Slavonians. He is stated to have continued his brother's translation, although *how much* they themselves actually executed is quite uncertain; perhaps much of the Old Testament was not translated at all in that age, possibly not for many centuries after.

The Old Testament is, as might be supposed, a version from the LXX., but what measure of revision it may since have received seems to be by no means certain. As the oldest known MS. of the whole Bible is of the year 1499, it may reasonably be questioned whether this version may not in large portions be comparatively modern. This could only be set at rest by a more full and accurate knowledge being obtained of Slavonic Biblical MSS. Dobrowsky, however, mentions (Griesbach's *Gr. Test.* ii., xxxiii.) that this MS. (his 1), and two others copied from it, are the only Slavonic MSS. of the entire Bible existing in Russia. If it be correct that the MSS. which he terms 2 and 3 are copied from this, there are strong reasons for believing that it was not *completed* for some years subsequently to 1499. The oldest MSS. of any part of this version is an Evangeliarium, in Cyrillic characters, of the year 1056; that at Rheims (containing the Gospels) on which the kings of France used to take their coronation oath, is nearly as old. One, containing the Gospels, at Moscow, is of the year 1144.

The first printed portion was an edition of the Gospels in Wallachia, in 1512; in 1575 the same portion was printed at Wilna; and in 1581 the whole Bible was printed at Ostrog in Volhynia; from this was taken the Moscow edition of 1663, in which, however, there was some revision, at least so far as the insertion of 1 John v. 7 is concerned.

Wetstein cited a few readings from this version; Alter made more extracts, which were used by Griesbach, together with the collations sent to him by Dobrowsky, both from MSS. and printed editions. We thus can say, with some confidence, that the general text is such as would have been expected in the ninth century: some readings from the Latin have, it appears, been introduced in places: this arises probably from the early Slavonian custom of reading the Gospel in Latin before they did it in their own tongue.

Dobrowsky paid particular attention in his collations to the copies of the Apocalypse: it has been, however, long suspected that that book formed no portion of this version as originally made. We can now go further and say definitely that the Apocalypse, as found in some at least of the Slavonic copies, *could* not be anterior to the appearance of the first edition of the Gr. Test. of Erasmus in 1516. For there are readings in the Apocalypse of Erasmus which are entirely devoid of *any* support from Greek MSS. This can be said confidently, since the one Greek copy used by Erasmus has been identified and described by Prof. Delitzsch.[a] It is now therefore known that peculiarities as to error in Erasmus's text of the Apocalypse, as it first appeared, are in several places due not to the MS. from which he drew, but to the want of care in his edition. And thus, whatever agrees with such peculiarities must depend on, and thus be subsequent to the Erasmian text. In Rev. ii. 13, the Erasmian text has the peculiar reading, ἐν ταῖς ἡμέραις ἡμῶν; for this no MS. was cited by Griesbach, and all his authority, besides the Erasmian edition, was in fact "Slav. 3, 4," i. e. two MSS. collated by Dobrowsky; one of these is said by him to be copied from the oldest Slavonic MS. of the whole Bible: if, therefore, it agrees with it in this place, it shows that the Slavonic MS. must, in that part at least, be later than the year 1516. The only Greek authority for this reading, ἡμῶν, is the *margin* of 92, the Dublin MS., famous as containing 1 John v. 7: in which the Gospels belong to the end of the fifteenth century; the Acts and Epistles are somewhat later, and the Apocalypse was added about the year 1580.[b] There seems to be another Slavonic text of the Apocalypse contained in Dobrowsky's 10, but whether it is older than the one already mentioned is doubtful.

S. P. T.

SYRIAC VERSIONS. I. OF THE OLD TESTAMENT.

A. *From the Hebrew.* — In the early times of Syrian Christianity there was executed a version of the Old Testament from the original Hebrew, the use of which must have been as widely extended as was the Christian profession amongst that people. Ephraem the Syrian, in the latter half of the 4th century, gives abundant proof of its use in general by his countrymen. When he calls it OUR VERSION, ܦܫܝܛܬܐ, it does not appear to be in opposition to any other Syriac translation (for no other can be proved to have then existed), but in contrast to the original Hebrew text, or to those in other languages.[c] At a later period this Syriac translation was designated *Peshito*, ܦܫܝܛܬܐ (*Simple*); or, as in the preface of Bar-Hebraeus to his *Thesaurus Arcanorum*, ܦܫܝܛܬܐ ܕܥܬܝܩܐ (*Simple* version). It is probable that this name was applied to the version after another had been formed from the Hexaplar Greek text. In the translation made from Origen's revision of the LXX., the critical marks introduced by him were retained, and thus every page and every part

Handschriftliche Funde von Franz Delitzsch, mit Beiträgen von S. P. Tregelles. Zweites Heft, neue Studien über den Codex Reuchlini, etc., 1862. [Also with the English title, "Manuscript Discoveries by Francis Delitzsch, with additions by S. P. Tregelles. Part II., New Studies on the Codex Reuchlini, and new results in the textual history of the Apocalypse, drawn from the libraries of Munich, Vienna, Rome, etc., 1862."]

[b] See further an article by Dr. T. J. Conant on the Greek Text of the Apocalypse, in the *Baptist Quarterly* for April, 1870.

[b] This Greek authority *is* the one denoted by 92. Tischendorf (following a misprint in Tregelles' *Greek and English Revelation*, 1844) gives it 91ᵉᵛ. That would signify a correction in a later hand in 91; which is the modern supplement to the Vatican MS., in which such a correction has been sought in vain.

[c] Ephraemi Opera Syr. i. 330 (on 1 Sam. xxiv. 4). He is simply comparing the Hebrew phrase and the Syriac version: ܟܠ ܙܒܢ ܐܝܟ ܕܝܘܡ ܝܘܡ (לְכָל עֵת כַּיּוֹם בְּיוֹמוֹ) ܐܝܟ ܕܟܬܝܒ ܒܦܫܝܛܬܐ ܕܐܝܟ ܕܟܬܝܒ ܒܦܫܝܛܬܐ ܕܐܝܟ ܕܟܬܝܒ ܒܦܫܝܛܬܐ

was marked with *asterisks* and *obeli*, from which the translation from the Hebrew was free. It might, therefore, be but natural for a bare text to be thus designated, in contrast to the marks and the citations of the different Greek translators found in the version from the Hexaplar Greek. This translation from the Hebrew has always been the ecclesiastical version of the Syrians; and when it is remembered how in the 5th century dissensions and divisions were introduced into the Syrian churches, and how from that time the Monophysites and those termed Nestorians have been in a state of unhealed opposition, it shows not only the antiquity of this version, but also the deep and abiding hold which it must have taken on the mind of the people, that this version was firmly held fast by both of these opposed parties, as well as by those who adhere to the Greek Church, and by the Maronites. Its existence and use prior to their divisions is sufficiently proved by Ephraem alone. But how much older it is than that deacon of Edessa we have no evidence. From Bar-Hebræus (in the 13th century) we learn that there were three opinions as to its age; some saying that the version was made in the reigns of Solomon and Hiram, some that it was translated by Asa, the priest who was sent by the king of Assyria to Samaria, and some that the version was made in the days of Adai the apostle and of Abgarus, king of Osrhoene (at which time, he adds, the *Simple* version of the New Test. was also made).[a] The first of these opinions of course implies that the books written before that time were then translated; indeed, a limitation of somewhat the same kind would apply to the second. The ground of the first opinion seems to have been the belief that the Tyrian king was a convert to the profession of the true and revealed faith held by the Israelites; and that the possession of Holy Scripture in the Syriac tongue (which they identified with his own) was a necessary consequence of this adoption of the true belief: this opinion is mentioned as having been held by some of the Syrians in the 9th century. The second opinion (which does not appear to have been cited from any Syriac writer prior to Bar-Hebræus) seems to have some connection with the formation of the Samaritan *version* of the Pentateuch. As that version is in an Aramæan dialect, any one who supposed that it was made immediately after the mission of the priest from Assyria might say that it was then first that *an* Aramæan translation was executed; and this might afterwards, in a sort of indefinite manner, have been connected with what the Syrians themselves used. James of Edessa (in the latter half of the 7th century) had held the *third* of the opinions mentioned by Bar-Hebræus, who cites him in support of it, and accords with it.

It is highly improbable that any part of the Syriac version is older than the advent of our Lord; those who placed it under Abgarus, king of Edessa, seem to have argued on the account that the Syrian people then received Christianity; and thus they supposed that a version of the Scriptures was a necessary accompaniment of such conversion. All that the account shows clearly is, then, that it was believed to belong to the earliest period of the Christian faith among them: an opinion with which all that we know on the subject accords well. Thus Ephraem, in the 4th century, not only shows that it was then current, but also gives the impression that this had even then been *long* the case. For in his commentaries he gives explanations of terms which were even then obscure. This might have been from age: if so, the version was made comparatively long before his days: or it might be from its having been in a dialect different from that to which he was accustomed at Edessa. In this case, then, the translation was made in some other part of Syria; which would hardly have been done, unless Christianity had at such a time been more diffused there than it was at Edessa. The dialect of that city is stated to have been the purest Syriac; if, then, the version was made for that place, it would no doubt have been a monument of such purer dialect. Probably the origin of the Old Syriac version is to be compared with that of the Old Latin [see VULGATE]; and that it differed as much from the polished language of Edessa as did the Old Latin, made in the African Province, from the contemporary writers of Rome, such as Tacitus.

Even though the traces of the origin of this version of the Old Test. be but few, yet it is of importance that they should be marked; for the Old Syriac has the peculiar value of being the first version from the Hebrew original made for Christian use; and, indeed, the only translation of the kind before that of Jerome, which was made subsequently to the time when Ephraem wrote. This Syriac commentator *may* have termed it "OUR version," in contrast to all others then current (for the Targums were hardly versions), which were merely reflections of the Greek and not of the Hebrew original.

The proof that this version was made from the Hebrew is twofold: we have the direct statements of Ephraem, who compares it in places with the Hebrew, and speaks of this origin as a fact; and and who is confirmed (if that had been needful) by later Syrian writers; we find the same thing as evident from the internal examination of the version itself. Whatever internal change or revision it may have received, the Hebrew groundwork of the translation is unmistakable. Such indications of revision must be afterwards briefly specified.

The first printed edition of this version was that which appeared in the Paris Polyglott of Le Jay in 1645; it is said that the editor, Gabriel Sionita, a Maronite, had only an imperfect MS., and that, besides errors, it was defective as to whole passages, and even as to entire books. This last charge *seem* to be so made as if it were to imply that books were omitted besides those of the Apocrypha, a part which Sionita confessedly had not. He is stated to have supplied the deficiencies by translating into Syriac from the Vulgate. It can hardly be supposed but that there is some exaggeration in these statements. Sionita may have filled up an occasional hiatus in his MS.; but it requires very definite examination before we can fully credit that he thus supplied whole books. It seems needful to believe that the defective books were simply those in the Apocrypha, which he did not supply. The result, however, is, that the Paris edition is but an infirm groundwork for our speaking with confidence of the text of this version.

In Walton's Polyglott, 1657, the Paris text is reprinted, but with the addition of the Apocrypha books which had been wanting. It was generally said that Walton had done much to amend the texts upon MS. authority; but the late Prof. Lee

[a] Wiseman, *Horæ Syriacæ*, p. 90.

Digitized by Google

denies this, stating that "the only addition made by Walton was some Apocryphal books." From Walton's Polyglott, Kirsch, in 1787, published a separate edition of the Pentateuch. Of the Syriac Psalter there have been many editions. The first of these, as mentioned by Eichhorn, appeared in 1610; it has by the side an Arabic version. In 1625 there were two editions; the one at Paris edited by Gabriel Sionita, and one at Leyden by Erpenius from two MSS.[a] These have since been repeated; but anterior to them all, it is mentioned that the seven penitential psalms appeared at Rome in 1584.

In the punctuation given in the Polyglotts, a system was introduced which was in part a peculiarity of Gabriel Sionita himself. This has to be borne in mind by those who use either the Paris Polyglott or that of Walton; for in many words there is a redundancy of vowels, and the form of some is thus exceedingly changed.

When the British and Foreign Bible Society proposed more than forty years ago to issue the Syriac Old Testament for the first time in a separate volume, the late Prof. Lee was employed to make such editorial preparations as could be connected with a mere revision of the text, without any specification of the authorities. Dr. Lee collated for the purpose six Syriac MSS. of the Old Test. in general, and a very ancient copy of the Pentateuch: he also used in part the commentaries of Ephraem and of Bar-Hebræus. From these various sources he constructed his text, with the aid of that found already in the Polyglotts. Of course the corrections depended on the editor's own judgment; and the want of a specification of the results of collations leaves the reader in doubt as to what the evidence may be in those places in which there is a departure from the Polyglott text. But though more information might be desired, we have in the edition of Lee a veritable Syriac text, from Syriac authorities, and free from the suspicion of having been formed in modern times, by Gabriel Sionita's translating portions from the Latin. [Prof. Lee's edition was published at London in 1823. — A.]

But we have now in this country, in the MS. treasures brought from the Nitrian valleys, the means of far more accurately editing this version. Even if the results should not appear to be striking, a thorough use of these MSS. would place this version on such a basis of diplomatic evidence as would show positively how this earliest Christian translation from the Hebrew was read in the 6th or 7th century, or possibly still earlier:[b] we thus could use the Syriac with a fuller degree of confidence in the criticism of the Hebrew text, just as we can the more ancient versions of the New for the criticism of the Greek.

In the beginning of 1849, the late excellent Biblical scholar, the Rev. John Rogers, Canon of Exeter, published *Reasons why a New Edition of the Peschito, or Ancient Syriac Version of the Old Testament, should be published.* In this interesting pamphlet, addressed to the late Archbishop of Canterbury, Canon Rogers speaks of the value of the version itself, its importance in criticism, the existing editions, their defects, the sources of emendation now possessed by this country, in the Nitrian MSS. especially, "now [1849] under the care of the Rev. Wm. Cureton, who is making known to the public the treasures of the library of the Monastery of St. Mary Deipara, in the Nitrian desert in Egypt, thus happily obtained." He adverts to the facility which would be afforded for the proper publication of the proposed edition, from type having been of late prepared representing the proper Estrangelo Syriac character, of which Dr. Cureton was even then making use in printing his text of the Syriac Gospels, etc. If it had been an honor to this country to issue the collations of Kennicott for the Hebrew Old Test., and of Holmes for the LXX., might not this proposed Syriac edition be a worthy successor to such works? The *plan* proposed by Canon Rogers for its execution was this: to take the Syriac MS. which appeared to be the best in each portion of the Old Test., both on the ground of goodness and antiquity: let this be printed, and then let collations be made by various scholars in interleaved copies; the whole of the results might then be published in the same form as De Rossi's *Variæ Lectiones* to the Hebrew Bible. Canon Rogers gives a few hints as to what he thought would be probable results from such a collation. He did not expect that the differences from the printed Syriac would be very great; but still there would be a far greater satisfaction as to the confidence with which this version might be quoted, especially in connection with the criticism of the Hebrew original. By way of illustration he pointed out a good many passages, in which it can hardly be doubted that the defects in the printed Syriac arise from the defectiveness of the copy or copies on which it was based. He also showed it to be a point of important inquiry, whether in places in which the printed Syriac agrees with the LXX., the Syriac has been altered; or whether both may preserve the more ancient reading of Hebrew copies once extant. The reasons why such a Syriac text should be prepared and published, and why such collations should be made, are thus summed up by Canon Rogers: "1st. Because we have no printed text from ancient and approved MSS. 2d. Because the Latin version in Walton's Polyglott often fails to convey the sense of the Syriac. 3d. Because there are many omissions in the printed text which may perhaps be supplied in a collation of early MSS. 4th. Because the facilities now given to the study of Hebrew make it desirable that new facilities should also be given to the study of the cognate languages. 5th. Because it is useless to accumulate ancient and valuable Biblical MSS. at the British Museum, if those MSS. are not applied to the purposes of sacred criticism. 6th. Because in comparing the Syriac with the Hebrew original, many points of important and interesting investigation will arise. Finally, Because it is neither creditable to the literary character of the age, nor to the theological position of the Church of England, that one of our most ancient versions of the Bible should continue in its present neglected state." These considerations of the late Canon Rogers are worthy of being thus repeated, not only as being the deliberate judgment of a good Biblical scholar, but as also pointing out practically the objects to be sought in making proper use of

[a] "Dathe also published an edition of the text of Erpenius at Halle in 1768, adding the vowel-points, and notes. There is an English *Translation of the Syriac Peshito Version of the Psalms of David with Notes Critical and Explanatory, by the Rev. Andrews Oliver*, Boston, 1861. A.

[b] "The Pentateuch could probably be given on a basis of the *fifth* century

the Biblical materials which are at our hands, and of which the scholars of former ages had not the benefit.

There was a strong hope expressed soon after the issue of Canon Rogers's appeal, that the work would have been formally placed in a proper manner in the hands of the Rev. Wm. Cureton, and that thus it would have been accomplished under his superintendence, at the Oxford University Press. Canon Rogers announced this in an appendix to his pamphlet. But this has not been effected. It may still be hoped that Dr. Cureton will edit at least the Pentateuch from a very ancient copy: but there is not now in this country the *practical encouragement* to such Biblical studies as require the devotion of time, labor, and attention (as well as pecuniary expense), which in the last century Kennicott and Holmes received.

But if the printed Syriac text rests on by no means a really satisfactory basis, it may be asked, How can it be said positively that what we have *is* the same version substantially that was used by Ephraem in the 4th century? Happily, we have the same means of identifying the Syriac with that anciently used, as we have of showing that the modern Latin Vulgate is substantially the version executed by Jerome. We admit that the common printed Latin has suffered in various ways, and yet at the bottom and in its general texture it is undoubtedly the work of Jerome: so with the Peshito of the Old Test., whatever errors of judgment were committed by Gabriel Sionita, the first editor, and however little has been done by those who should have corrected these things on MS. authority, the identity of the version is too certain for it to be thus destroyed, or even (it may be said) materially obscured.

From the citations of Ephraem, and the single words on which he makes remarks, we have sufficient proof of the identity of the version: even though at times he also furnishes proof that the copies as printed are not exactly as he read. The following may be taken as instances of accordance: they are mostly from the places (see Wiseman, *H. Syr.* p. 122, &c.) in which Ephraem thinks it needful to explain a Syrian word in this version, or to discuss its meaning, either from its having become antiquated in his time, or from its being unused in the same sense by the Syrians of Edessa. Thus, Gen. i. 1, ܐܬ is used in Syriac as answering to the Hebrew אֵת. The occurrence of this word Ephraem mentions, giving his own explanation: i. 2, ܬܗܘ ܘܒܗܘ; x. 9, for גִּבּוֹר צַיִד, the Syriac has ܢܡܪܘܕ, which Ephraem mentions as being a term which the Persians also use. Gen. xxx. 14, for דּוּדָאִים there is ܒܝܕܐ, a word which Ephraem mentions as being there, and the possible meaning of which he discusses. Ex. xxviii. 4, ܚܫܘܢ stands for the Hebrew חֹשֶׁן; Ephraem reads it ܟܪܣܘܢ, and explains the meaning: xxxviii. 4, ܡܟܒܪ (מִכְבָּר); xxxviii. 16, ܣܒܝܒ (וְעָרוּתָיו); xxviii. 40, ܡܓܒܥܝܬ (מִגְבָּעוֹת); Num. xi. 7, for בְּדֹ there is ܚܡܣܢܐ, a word equally, it seems, meaning *coriander*; which was, however, unknown to Ephraem, who expounds it as though it meant food of all kinds, as if ܡܚܢܐ. 1 Sam. xxiii. 28, ܣܠܥ for סֶלַע; 2 Sam. viii. 7 ܫܠܡ, merely retaining the Hebrew word שְׁלָטֵי in a Syriac form. 1 K. x. 11, ܩܨܡ (אַלְמֻגִּים); xii. 11, ܟܪܒܐ (עַקְרַבִּים). 2 K. iii. 4, ܢܥܙ (טלה); Job xxxix 22 ܡܝܬ (אַשְׁפָּה); xli. 13, ܠܒܘܫ the Heb. תִּלְחֹם. Is. iii. 22, ܚܡܛܢܐ (מְטַפָּרוֹת); Jer. li. 41, ܒܫܫ (יְשֵׁשַׁךְ). Zech. v. 7, ܟܢܦ (אַשָּׁה). In these passages, and in several others, the words of the Peshito are cited by Ephraem because of their obscurity, and of the need that they had of explanation.

The proof that the version which has come down to us is substantially that used by the Syrians in the 4th century, is perhaps more definite from the comparison of words than it would have been from the comparison of passages of greater length; because in longer citations there always might be some ground for thinking that perhaps the MS. of Ephraem might have been conformed to later Syriac copies of the Sacred Text; while, with regard to peculiar words, no such suspicion can have any place, since it is on such words still found in the Peshito that the remarks of Ephraem are based. The fact that he sometimes cites it differently from what we now read, only shows a variation of copies, perhaps ancient, or perhaps such as is found merely in the printed text that we have.

From Ephraem having mentioned *translators* of this version, it has been concluded that it was the work of several: a thing probable enough in itself, but which could hardly be proved from the occurrence of a casual phrase, nor yet from variations in the rendering of the same Hebrew word; such variations being found in almost all translations, even when made by one person — that of Jerome, for instance; and which it would be almost impossible to avoid, especially before the time when concordances and lexicons were at hand. Variations in phraseology give a far surer ground for supposing several translators.

It has been much discussed whether this translation were a Jewish or a Christian work. Some, who have maintained that the translator was a Jew, have argued from his knowledge of Hebrew and his mode of rendering. But these considerations *prove* nothing. Indeed, it might well be doubted if in that age a Jew would have formed anything except a Chaldee Targum; and thus diffuseness of paraphrase might be expected instead of closeness of translation. There need be no reasonable objection made to the opinion that it is a Christian work. Indeed it is difficult to suppose, that before the diffusion of Christianity in Syria, the version could have been needed.

It may be said that the Syriac *in general* supports the Hebrew text that we have: how far arguments may be raised upon minute coincidences o

Digitized by Google

variations cannot be certainly known until the ancient text of the version is better established. Occasionally, however, it is clear that the Syriac translator read one consonant for another in the Hebrew, and translated accordingly; at times another vocalization of the Hebrew was followed.

A resemblance has been pointed out between the Syriac and the reading of some of the Chaldee Targums: if the Targum is the older, it is not unlikely that the Syriac translator, using every aid in his power to obtain an accurate knowledge of what he was rendering, examined the Targums in difficult passages. This is not the place for formally discussing the date and origin of the Targums [see below, TARGUMS]; but if (as seems almost certain) the Targums which have come down to us are almost without exception more recent than the Syriac version, still they are probably the successors of earlier Targums, which by amplification have reached their present shape. Thus, if existing Targums are more recent than the Syriac, it may happen that their coincidences arise from the use of a common source — an earlier Targum.

But there is another point of inquiry of more importance: it is, how far has this version been affected by the LXX.? and to what are we to attribute this influence? It is possible that the influence of the LXX. is partly to be ascribed to copyists and revisers: while in part this belonged to the version as originally made. For, if a translator had access to another version while occupied in making his own, he might consult it in cases of difficulty; and thus he might unconsciously follow it in other parts. Even knowing the words of a particular translation may affect the mode of rendering in another translation or revision. And thus a tinge from the LXX. may have easily existed in this version from the first, even though in whole books it may not be found at all. But when the extensive use of the LXX. is remembered, and how soon it was superstitiously imagined to have been made by direct inspiration, so that it was deemed canonically authoritative, we cannot feel wonder that readings from the LXX. should have been from time to time introduced; this may have commenced probably before a Syriac version had been made from the Hexaplar Greek text; because in such revised text of the LXX. the additions, etc., in which that version differed from the Hebrew, would be so marked that they would hardly seem to be the authoritative and genuine text.

Some comparison with the Greek is probable even before the time of Ephraem; for, as to the Apocryphal books, while he cites some of them (though not as Scripture), the Apocryphal additions to Daniel and the books of Maccabees were not yet found in Syriac. Whoever translated any of these books from the Greek, may easily have also compared with it in some places the books previously translated from the Hebrew.

In the book of Psalms this version exhibits many peculiarities. Either the translation of the Psalter must be a work independent of the Peshito in general, or else it has been strangely revised and altered, not only from the Greek,[a] but also from liturgical use. Perhaps, indeed, the Psalms are a different version; and that in this aspect the practice of the Syrian churches is like that of the Roman Catholic Church and the Church of England in using liturgically a different version of the book so much read ecclesiastically.

It is stated that, after the divisions of the Syrian Church, there were revisions of this one version by the Monophysites and by the Nestorians: probably it would be found, if the subject could be fully investigated, that there were in the hands of different parties copies in which the ordinary accidents of transcription had introduced variations.

The *Karkaphensian* recension mentioned by Bar-Hebræus was only known by name prior to the investigations of Wiseman; it is found in two MSS. in the Vatican; it was formed for the use of Monophysites; there is peculiarity in the punctuation introduced, by a leaning towards the Greek; but it is, as to its substance, the Peshito version.

B. *The Syriac version from the Hexaplar Greek Text.* — The only Syriac version of the Old Test. up to the 6th century was apparently the Peshito. The first definite intimation of a portion of the Old Testament translated from the Greek is through Moses Aghelæus. This Syriac writer lived in the middle of the 6th century. He made a translation of the *Glaphyra* of Cyril of Alexandria from Greek into Syriac; and, in the prefixed Epistle, he speaks of the versions of the New Test. and the *Psalter*, "which Polycarp (rest his soul!), the Chorepiscopus, made in Syriac for the faithful Xenaias, the teacher of Mabug, worthy of the memory of the good."[b] We thus see that a Syriac version of the Psalms had a similar origin to the Philoxenian Syriac New Test. We know that the date of the latter was A. D. 508; the Psalter was probably a contemporaneous work. It is said that the Nestorian patriarch, Marabbe, A. D. 552, made a version from the Greek; it does not appear to be in existence, so that, if ever it was completely executed, it was probably superseded by the Hexaplar version of Paul of Tela; indeed Paul may have used it as the basis of his work, adding marks of reference, etc.

The version by Paul of Tela, a Monophysite, was made in the beginning of the 7th century; for its basis he used the Hexaplar Greek text — that is, the LXX., with the corrections of Origen, the asterisks, obeli, etc., and with the references to the other Greek versions.

The Syro-Hexaplar version was made on the principle of following the Greek, word for word, as exactly as possible. It contains the marks introduced by Origen; and the references to the versions of Aquila, Symmachus, Theodotion, etc. In fact, it is from this Syriac version that we obtain our most accurate acquaintance with the results of the critical labors of Origen.

Andreas Masius, in his edition of the book of Joshua,[c] first used the results of this Syro-Hexaplar text; for, on the authority of a MS. in his possession, he revised the Greek, introducing asterisks and obeli, thus showing what Origen had done,

---

[a] Perhaps as to this the version of the Psalms from the Greek made by Polycarp (to be mentioned presently) has not been sufficiently taken into account. Indeed, remarkably little attention appears to have been paid to the evidence that such a version existed

[b] Assemani, *Bibliotheca Orientalis*, ii. 83; where, however, the obscure Syriac is turned into still more obscure Latin.

how much he had inserted in the text, and what he had marked as not found in the Hebrew. The Syriac MS. used by Masius has been long lost; though in this day, after the recovery of the Codex Reuchlini of the Apocalypse (from which Erasmus first edited that book) by Prof. Delitzsch, it could hardly be a cause for surprise if this Syriac Codex were again found.

It is from a MS. in the Ambrosian Library at Milan that we possess accurate means of knowing this Syriac version. The MS. in question contains the Psalms, Job, Proverbs, Ecclesiastes, Canticles, Wisdom, Ecclesiasticus, Minor Prophets, Jeremiah, Baruch, Daniel, Ezekiel, and Isaiah. Norberg published, at Lund in 1787, the books of Jeremiah and Ezekiel, from a transcript which he had made of the MS. at Milan. In 1788, Bugati published at Milan the book of Daniel; he also edited the Psalms, the printing of which had been completed before his death in 1816; it was published in 1820. The rest of the contents of the Milan Codex (with the exception of the Apocryphal books) was published at Berlin in 1835, by Middeldorpf, from the transcript made by Norberg; Middeldorpf also added the 4th (2d) book of Kings from a MS. at Paris.

Besides these portions of this Syriac version, the MSS. from the Nitrian monasteries now in the British Museum would add a good deal more: amongst these there are six, from which much might be drawn, so that part of the Pentateuch and other books may be recovered.[a] These MSS. are like that at Milan, in having the marks of Origen in the text; the references to readings in the margin; and occasionally the Greek word itself is thus cited in Greek.

Dr. Antonio Ceriani, of the Ambrosian Library at Milan, after having for a considerable time proposed to edit the portions of the Syro-Hexaplar Codex of Milan which had hitherto remained in MS., commenced such a work in 1861 (*Monumenta Sacra et Profana, Opera Collegii Bibliothecæ Ambrosianæ*), the first part of the Syriac text being Baruch, Lamentations, and the Epistle of Jeremiah. To this work Ceriani subjoined a collation of some of the more important texts, and critical notes. A second part has since appeared. It is to be hoped that he may thus edit the whole MS., and that the other portions of this version known to be extant may soon appear in print.

The value of this version for the criticism of the LXX. is very great. It supplies, as far as a version can, the lost work of Origen.

The list of versions of the Old Test. into Syriac often appears to be very numerous; but on examination it is found that many translations, the names of which appear in a catalogue are really either such as never had an actual existence, or else that they are either the version from the Hebrew, or else that from the Hexaplar text of the LXX., under different names, or with some slight revision. To enumerate the supposed versions is needless. It is only requisite to mention that Thomas of Harkel, whose work in the revision of a translation of the New Test. will have to be mentioned, seems also to have made a translation from the Greek into Syriac of some of the Apocryphal books — at least, the subscriptions in certain MSS. state this.

II. THE SYRIAC NEW TESTAMENT VERSIONS.

A. *The Peshito-Syriac N. T.* (Text of Widmanstadt, and Cureton's Gospels.)

In whatever forms the Syriac New Test. may have existed prior to the time of Philoxenus (the beginning of the *sixth* century), who caused a new translation to be made, it will be more convenient to consider all such most ancient translations or revisions together; even though there may be reasons afterwards assigned for not regarding the version of the earlier ages of Christianity as absolutely one.

It may stand as an admitted fact that a version of the New Test. in Syriac existed in the 2d century; and to this we may refer the statement of Eusebius respecting Hegesippus, that he "made quotations from the Gospel according to the Hebrews and the Syriac," ἔκ τε τοῦ καθ' Ἑβραίους εὐαγγελίου καὶ τοῦ Συριακοῦ (*Hist. Eccl.* iv. 22). It seems equally certain that in the 4th century such a version was as well known of the New Test. as of the Old. It was the companion of the Old Test. translation made from the Hebrew, and as such was in habitual use in the Syriac churches. To the translation in common use amongst the Syrians, orthodox, Monophysite, or Nestorian, from the 5th century and onward, the name of Peshito has been as commonly applied in the New Test. as the Old. In the 7th century at least the version so current acquired the name of ܦܫܝܛܐ, *old*, in contrast to that which was then formed and revised by the Monophysites.

Though we have no certain data as to the origin of this version, it is probable on every ground that a Syriac translation of the New Test. was an accompaniment of that of the Old; whatever therefore bears on the one, bears on the other also.

There seem to be but few notices of the old Syriac version in early writers. Cosmas Indicopleustes, in the former half of the 6th century incidentally informs us that the Syriac translation

---

[a] The following is the notation of these MSS., and their contents and dates: —

12,133 (besides the Peshito Exodus); *Joshua* (defective), cent. vii. "Translated from a Greek MS. of the Hexapla, collated with one of the Tetrapla."

12,134, *Exodus*. A. D. 697.

14,434, *Psalms* formed from *two* MSS. cent. viii. (with the Song of the Three Children subjoined to the second). Both MSS. are defective. Subscription, "According to the LXX."

14,437, *Numbers* and 1 *Kings*, defective (cent. vii. or viii.) The subscription to 1 Kings says that it was translated into Syriac at Alexandria in the year 927 (A. D. 616).

6,442, *Genesis*, defective (with 1 Sam. Peshito). "According to the LXX." (cent. vi.).

17,103, *Judges* and *Ruth*, defective (cent. vii. or viii.). Subscription to Judges, "According to the LXX.;" to Ruth, "From the Tetrapla of the LXX."

The notes on these MSS. made by the present writer in 1857, have been kindly compared and amplified by Mr. William Wright of the British Museum.

Rördam issued at Copenhagen in 1859 the first portion of an edition of the MS. 17,103: another part has since been published. [Title: *Libri Judicum et Ruth secundum Versionem Syriaco-Hexaplarem*, etc 2 fasc. Havniæ, 1859-61.] Some of these MSS. were written in the same century in which the version was made. They may probably be depended on as giving the text with general accuracy.

Digitized by Google

does not contain the Second Epistle of Peter, 2 and 3 John, and Jude. This was found to be correct when a thousand years afterwards this ancient translation became again known to Western scholars. In 1552, Moses of Mardin came to Rome to Pope Julius III., commissioned by Ignatius the Jacobite (Monophysite) patriarch, to state his religious opinions, to effect (it is said) a union with the Romish Church, and *to get the Syriac New Test. printed*. In this last object Moses failed both at Rome and Venice. At Vienna he was, however, successful. Widmanstadt, the chancellor of the Emperor Ferdinand I., had himself learned Syriac from Theseus Ambrosius many years previously; and through his influence the emperor undertook the charge of an edition, which appeared in 1555, through the joint labors of Widmanstadt, Moses, and Postell. Some copies were afterwards issued with the date of 1562 on the back of the title.[a]

In having only *three* Catholic epistles, this Syriac New Test. agreed with the description of Cosmas; the Apocalypse was also wanting, as well as the section John viii. 1–11; this last omission, and some other points, were noticed in the list of errata. The editors appear to have followed their MSS. with great fidelity, so that the edition is justly valued. In subsequent editions endeavors were made conjecturally to amend the text by introducing 1 John v. 7 and other portions which do not belong to this translation. One of the principal editions is that of Leusden and Schaaf; in this the text is made as *full* as possible by supplying every lacuna from *any* source; in the punctuation there is a strange peculiarity, that in the former part Leusden chose to follow a sort of Chaldee analogy, while on his death Schaaf introduced a regular system of Syriac vocalization through all the rest of the volume. The Lexicon which accompanies this edition is of great value. This edition was first issued in 1708: more copies, however, have the date 1709; while some have the false and dishonest statement on the title page, "Secunda editio a mendis purgata," and the date 1717. The late Professor Lee published an edition in 1816, in which he corrected or altered the text on the authority of a few MSS. This is so far independent of that of Widmanstadt. It is, however, very far short of being really a *critical* edition. In 1828, the edition of Mr. William Greenfield (often reprinted from the stereotype plates) was published by Messrs. Bagster: in this the text of Widmanstadt was followed (with the vowels fully expressed), and with certain supplements within brackets from Lee's edition. For the *collation* with Lee's text Greenfield was not responsible. There are now in this country excellent materials for the formation of a critical edition of this version; it may, however, be said, that as in its first publication the MSS. employed were honestly used, it is in the text of Widmanstadt in a far better condition than is the Peshito Old Testament.

This Syriac Version has been variously estimated: some have thought that in it they had a genuine and unaltered monument of the second, or perhaps even of the *first* century. They thus naturally upheld it as almost coördinate in authority with the Greek text, and as being of a period anterior to any Greek copy extant. Others finding in it indubitable marks of a later age, were inclined to deny that it had any claim to a very remote antiquity; thus La Croze thought that the commonly printed Syriac New Test. is not the Peshito at all, but the Philoxenian executed in the beginning of the 6th century. The fact is, that this version as transmitted to us contains marks of antiquity, and also traces of a later age. The two things are so blended, that if either class of phenomena alone were regarded, the most opposite opinions might be formed. The opinion of Wetstein was one of the most perverse that could be devised: he found in this version readings which accord with the Latin; and then, acting on the strange system of criticism which he adopted in his later years, he asserted that any such accordance with the Latin was a proof of corruption from that version: so that with him the proofs of antiquity became the tokens of later origin, and he thus assigned the translation to the *seventh* century. With him the real indications of later readings were only the marks of the very reverse. Michaelis took very opposite ground to that of Wetstein; he upheld its antiquity and authority very strenuously. The former point could be easily *proved*, if one class of readings alone were considered; and this is confirmed by the *contents* of the version itself. But on the other hand there are difficulties, for very often readings of a much more recent kind appear; it was thus thought that it might be compared with the Latin as found in the Codex Brixianus, in which there is an ancient groundwork, but also the work of a reviser is manifest. Thus the judgment formed by Griesbach seems to be certainly the correct one as to the peculiarity of the text of this version; he says (using the terms proper to his system of *recensions*): "Nulli harum recensionum Syriaca versio, prout quidem typis excusa est, similis, verum nec ulli prorsus dissimilis est. In multis concinit cum Alexandrina recensione, in pluribus cum Occidentali, in nonnullis etiam cum Constantinopolitana, ita tamen ut quæ in hanc posterioribus demum seculis invecta sunt, pleraque repudiet. *Diversis ergo temporibus ad Græcos codices plane diversos iterum iterumque recognita esse videtur*" (*Nov. Test. Proleg* lxxv.). In a note Griesbach introduced the comparison of the Codex Brixianus, "Illustrari hoc potest codicum nonnullorum Latinorum exemplo, qui priscam quidem versionem ad Occidentalem recensionem accommodatam representant, sed passim ad juniores libros Græcos reflectam. *Ex hoc genere est Brixianus Codex Latinus*, qui non raro a Græco-Latinis et vetustioribus Latinis omnibus solus discedit, et in Græcorum partes transit."[b]

[a] The date of 1555 appears repeatedly in the body of the volume; at the end of the Gospels, May 18, 1555; St. Paul's Epp., July 18, 1555; Acts, Aug. 14, 1555; Cath. Epp. and the conclusion, Sept. 27, 1555. The volume is dedicated to the Emperor Ferdinand, and the *contents* mention *three* other dedications to other members of the imperial house. All of these three are often wanting, and two of them, addressed to the Archdukes Ferdinand and Charles, are not only generally wanting, but it is even said that no copy is known in which they are found.

[b] Griesbach's most matured judgment on this subject was thus given: "Interpolationes autem e locis Evangeliorum parallelis, quales apud Syrum, Matt. xxviii. 18, Luc. ix. 39, item Matt. xxii. 22, 28, Mar. vi. 11, xiii. 14, Luc. iv. 18, deprehenduntur, non magis quam additamenta e lectionariis libris in sacrum contextum traducta, velut Luc. xv. 11, aut liturgicum illud assumentum Matt. vi. 13, vitia sunt τῆς κοινῆς propria. . . . . Quin plerasque interpolationes modo enumeratas, cum aliis ejusmodi generis multis, quæ nunc in versione Syriaca extant, primitus ab ea ab

Some proof that the text of the common printed Peshito has been *reworought*, will appear when it is compared with the Curetonian Syriac Gospels.

Let it be distinctly remembered that this is no *new* opinion; that it is not the *peculiar* notion of Tregelles. or of any one individual; for as the question has been reopened, it has been treated as if this were some theory newly invented to serve a purpose. The Rev. F. H. Scrivener, whose labors in the collation of Greek MSS., and whose care in editing Codex Augiensis of St. Paul's Epistles, deserve very high commendation, avowed himself many years ago an ardent admirer of the Peshito-Syriac. But even then he set aside its authority very often when it happened to adhere to the *ancient* Greek text, to the other ancient versions, and to the early Fathers, in opposition to the later copies. But when the judgment of Griesbach respecting the common printed Syriac had been repeated and enforced by Tregelles (Horne's *Introd.* vol. iv. p. 265), Scrivener came forward as its champion. In his Introduction to Codex Augiensis, Mr. Scrivener says, "How is this divergency of the Peshito version from the text of Codex B explained by Tregelles? He feels of course the pressure of the argument against him, and meets it, if not successfully, with even more than his wonted boldness. The translation degenerates in his hands into '*the version commonly printed as the Peshito.*' Now let us mark the precise nature of the demand here made on our faith by Dr. Tregelles. He would persuade us that the whole Eastern Church, distracted as it has been, and split into hostile sections for the space of 1,400 years, orthodox and Jacobite, Nestorian and Maronite alike, those who could agree in nothing else, have laid aside their bitter jealousies in order to substitute in their monastic libraries and liturgical services, another and a spurious version in the room of the Peshito, that sole surviving monument of the first ages of the Gospel in Syria! Nay, more, that this wretched forgery has deceived Orientalists profound as Michaelis [a] and Lowth, has passed without suspicion through the ordeal of searching criticism to which every branch of sacred literature has been subjected during the last half century! We will require solid reasons, indeed, before we surrender ourselves to an hypothesis as novel as it appears violently improbable" (pp. xiv., xv.). Mr. Scrivener's warmth of declamation might have been spared: no one calls the Peshito "a spurious version," "wretched forgery," etc., it is not suggested that the Syrian churches agreed in some strange substitution: all that is suggested is, that at the time of the transition Greek text, before the disruption of the Syrian churches, the then existing Syriac version was revised and modernized in a way analogous to that in which the Latin was treated in Cod. Brixianus. On part of Mr. Scrivener's statements the Rev. F. J. A. Hort has well remarked: "The text may have been altered and corrupted between the first or second, and fifth centuries. This is all that Dr Tregelles has supposed, though Mr. Scrivener assails him with unseemly violence, as if he had represented the vulgar text as 'a wretched forgery.' Mr. Scrivener's rashness is no less remarkable in calling this a '*novel* hypothesis,' when in fact it is at least as old as Griesbach. . . . There is neither evidence nor internal probability against the supposition that the Old Syriac version was revised into its present form . . . . in the 4th or even 3d century, to make it accord with Greek MSS. then current at Antioch, Edessa, or Nisibis: *and without some such supposition the Syriac text must remain an inexplicable phenomenon*, unless we bring the Greek and Latin texts into confirmity with it by contradicting the full and clear evidence which we do possess respecting them. All that we have now said might have been alleged before the Curetonian Syriac was discovered: the case is surely strengthened in a high degree by the appearance (in a MS. assigned to the 5th century) of a Syriac version of the Gospels, bearing clear marks of the highest antiquity in its manifest errors as well as in its choicest readings. The appropriation of the *name* 'Peshito,' appears to us wholly unimportant, except for rhetorical purposes." [b]

These remarks of Mr. Hort will suffice in rescuing the opinion stated by Tregelles from the charge of *novelty* or rashness: indeed, the supposition as stated by Griesbach, is a simple solution of various difficulties; for if this be not the fact, then *every* other most ancient document or monument of the New Test. must have been strangely altered in its text. The number of difficulties (otherwise inexplicable), thus solved, is about a demonstration of its truth. Mr. Scrivener, however, seems incapable of apprehending that the *revision* of the Peshito is an opinion long ago held: he says since, "I know no other cause for suspecting the Peshito, than that its readings do not suit Dr. Tregelles, and if this fact be enough to convict it of corruption, I am quite unable to vindicate it." [c] Why, then, do not the readings "suit" Dr. Tregelles? Because, if they were considered genuine, we should have (to use Mr. Hort's words) to "bring the Greek and Latin texts into conformity with it, by contradicting the full and clear evidence which we do possess respecting them."

Whether the whole of this version proceeded from the same translator has been questioned. It appears to the present writer probable that the New Test. of the Peshito is not from the same hand as the Old. Not only may Michaelis be right in supposing a peculiar translator of the Epistle to the Hebrews, but also other parts may be from different hands; this opinion will become more general the more the version is studied. The *revisions* to which the version was subjected may have succeeded in part, but not wholly, in effacing the in-

---

fuisse et seriori demum tempore in eam irrepsisse, plane mihi persuasum est. Verissime enim clar. Hugius (. . . . coll. prolegomenis in majorem meam N. T. editionem, Hal. 1796, vol. i. p. lxxv.) animadvertit, versionem hanc a Diorthote quodam videri recognitam fuisse ac castigatam. Id quod quinto seculo ineunte, antequam ecclesiæ orientales Nestorianis et Monophysitis ritis discinderentur, evenisse suspicor, et in epistolis magis adhuc quam in Evangeliis locum habuisse autumo." *Commentarius Criticus*, ii. *Meletemata*, ii., 14. 1811

[a] Even Michaelis did not think it needful to assume that the Peshito had been transmitted without any change. "In using the Syriac version, we must never forget that our present editions are very imperfect, and not conclude that every reading of the Syriac printed text was the reading of the Greek MS. of the first century." Marsh's *Michaelis*, ii. 46.

[b] *Journal of Classical and Sacred Philology* (Cambridge), Feb. 1860, pp. 378, 379.

fications of a plurality of translators. The Acts and Epistles seem to be either more recent than the Gospels, though far less revised; or else, if coeval, far more corrected by later Greek MSS.

There is no sufficient reason for supposing that this version ever contained the four Catholic Epistles and the Apocalypse, now absent from it, not only in the printed editions but also in the MSS.

Some variations in copies of the Peshito have been regarded as if they might be styled Monophysite and Nestorian recensions: but the designation would be far too definite; for the differences are not sufficient to warrant the classification.

The MSS. of the *Karkaphensian* recension (as it has been termed) of the Peshito Old Test. contain also the New with a similar character of text.

* The Peshito version of the N. T. has been translated into English by Dr. J. W. Etheridge, 2 vols. Lond. 1846–49, and by Dr. James Murdock, N. Y. 1851. A.

*The Curetonian Syriac Gospels.* — "Comparative criticism" shows the true character of every document, whether previously known or newly brought to light, which professes to contain the early text of the New Test. By comparative criticism is not meant such a mode of examining authorities as that to which Mr. Scrivener has applied this term, but such a use of combined evidence as was intended and defined by the critic by whom the expression was (for convenience' sake) introduced: that is, the ascertainment that readings are in ancient documents, or rest on ancient evidence (whether early citations, versions, or MSS.), and then the examination of what documents contain such readings, and thus within what limits the inquiry for the ancient text may be bounded. Thus a document, in itself modern, may be proved to be ancient in testimony: a version, previously unknown, may be shown to uphold a very early text. For purposes of comparative criticism early readings, known to be false, have often as definite a value in the chain of proof as those which are true. In the process of comparative criticism nothing is assumed, but point after point is established by independent testimony: and thus the character of the text of MSS., of ancient versions, and of patristic citations, is upheld by their accordance with facts attested by other witnesses, of known age and certain transmission.

It was reasonable to suppose with Griesbach that the Syriac version must at one time have existed in a form different from that in the common printed text: it was felt by Biblical scholars to be a mere assumption that the name *Peshito* carried with it some hallowed prestige; it was established that was a groundless imagination that this version, as edited, had been known from the earliest ages as the original monument of Syrian Christianity. Hence if it could be shown that an earlier version (or earlier basis of the same version) had existed, there was not only no *à priori* objection, but even a demonstrated probability (almost certainty) that this had been the case. When it is remembered how little we know historically of the Syriac versions, it must be felt as an assumption that the form of text common from the fifth century and onward was the original version. In 1848 Tregelles (see Davidson's *Introduction to the New Test.* vol. i. p. 429) suggested that "the Nitrian MSS. when collated may exhibit perhaps an earlier text." This was written without any notion that it was an ascertained fact that such a MS. of the Gospels existed, and that the full attention of a thorough Syriac scholar had been devoted to its illustration and publication.

Among the MSS. brought from the Nitrian monasteries in 1842, Dr. Cureton noticed a copy of the Gospels, differing greatly from the common text: and this is the form of text to which the name of Curetonian Syriac has been rightly applied. Every criterion which proves the common Peshito not to exhibit a text of extreme antiquity, equally proves the early origin of this. The discovery is in fact that of the object which was wanted, the want of which had been previously ascertained. Dr. Cureton considers that the MS. of the Gospels is of the fifth century, a point in which all competent judges are probably agreed. Some persons indeed have sought to depreciate the text, to point out its differences from the Peshito, to regard all such variations as corruptions, and thus to stigmatize the Curetonian Syriac as a corrupt revision of the Peshito, barbarous in language and false in readings.[a] This peremptory judgment is as reasonable as if the old Latin in the Codex Vercellensis were called an ignorant revision of the version of Jerome. The judgment that the Curetonian Syriac is older than the Peshito is not the peculiar opinion of Cureton, Alford,[b] Tregelles, or Biblical scholars of the school of ancient evidence in this country, but it is also that of continental scholars, such as Ewald, and apparently of the late Prof. Bleek.[c]

The MS. contains Matt. i.–viii. 22, x. 31–xxiii. 25. Mark, the four last verses only. John i. 1–42 iii. 6–vii. 37, xiv. 11–29; Luke ii. 48–iii. 16, vii 33–xv. 21, xvii. 24–xxiv. 41. It would have been a thing of much value if a perfect copy of this version had come down to us; but as it is, we have reason greatly to value the discovery of Dr. Cureton, which shows how truly those critics have argued who concluded that such a version must have existed; and who regarded this as "*proved fact*, even when not only no portion of the version was known

[a] It is very certain that many who profess a peculiar admiration for the Peshito do this rather from some traditional notion than from minute personal acquaintance. They suppose that it has some prescriptive right to the first rank amongst versions, "they praise its excellences, which they have not personally investigated, and they do not care to know wherein it is defective. Every error in translation, every doubtful reading, every supposed defect in the one known MS. of the Curetonian Gospels, has been enumerated by those who wish to depreciate that version, and to detract from the critical merits of its discoverer and editor. But many of the supposed defects are really the very opposite; and if they similarly examined the Peshito, they might find more fault with it and with its translator. The last fourteen chapters of the book of Acts, as they have come down to us in the Peshito, present far more grounds for comment than an equal portion of the Curetonian. The Peshito is a very valuable version, although overpraised by some injudicious admirers, who (even if they have *read* it) have never closely and verbally examined it. Many have evidently never looked further than the Gospels, even though aided by Schaaf's Latin interpretation.

[b] "Perhaps the earliest and most important of all the versions." Alford's *Gr. Test.* Proleg. vol i. p. 114. ed. 4.

Digitized by Google

to be extant, but also when even the record of its existence was unnoticed. For there is a record showing an acquaintance with this version, to which, as well as to the version itself, attention has been directed by Dr. Cureton. Bar Salibi, bishop of Amida in the 12th century, in a passage translated by Dr. C. (in discussing the omission of three kings in the genealogy in St. Matthew) says: "There is found occasionally a Syriac copy, made out of the Hebrew, which inserts these three kings in the genealogy; but that afterwards it speaks of *fourteen* and not of *seventeen* generations, because fourteen generations has been substituted for seventeen by the Hebrews on account of their holding to the septenary number," etc.[a]

It shows then that Bar Salibi knew of a Syriac text of the Gospels in which Ahaziah, Joash, and Amaziah were inserted in Matt. i. 8; there is the same reading in the Curetonian Syriac: but this might have been a coincidence. But in ver. 17 the Curetonian text has, in contradiction to ver. 8, *fourteen* generations and not *seventeen*: and so had the copy mentioned by Bar Salibi: the former point might be a mere coincidence; the latter, however, shows such a kind of union in contradiction as proves the identity very convincingly. Thus, though this version was unknown *in Europe* prior to its discovery by Dr. Cureton, it must in the 12th century have been known as a text sometimes found, and as mentioned by the Monophysite bishop, it might be more in use amongst his co-religionists than amongst others. Perhaps, as its existence and use is thus recorded in the 12th century, some further discovery of Syriac MSS. may furnish us with another copy so as to supply the defects of the one happily recovered.

In examining the Curetonian text with the common printed Peshito, we often find such identity of phrase and rendering as to show that they are not wholly independent translations: then, again, we meet with such variety in the forms of words, etc., as seems to indicate that in the Peshito the phraseology had been revised and refined.[b] But the great (it might be said characteristic) difference between the Curetonian and the Peshito Gospels is in their readings; for while the latter cannot in its present state be deemed an unchanged production of the second century, the former bears all the marks of extreme antiquity, even though in places it may have suffered from the introduction of readings current in very early times.

The following are a few of the very many cases in which the ancient reading is found in the Curetonian, and the later or transition reading in the Peshito. For the *general authorities* on the subject of each passage, reference must be made to the notes in critical editions of the Greek New Test.

Matt. xix. 17, τί με ἐρωτᾷς περὶ τοῦ ἀγαθοῦ; the *ancient* reading, as we find in the best authorities, and as we know from Origen; so the Curetonian: τί με λέγεις ἀγαθόν; the common text with the Peshito. Matt. xx. 22, the clause of the common text, καὶ τὸ βάπτισμα ὃ ἐγὼ βαπτίζομαι (and the corresponding part of the following verse) are in the Peshito; while we know from Origen that they were in his day a peculiarity of St. Mark omitted in the Curetonian with the other best authorities. In fact, except the Peshito and some revised Latin copies, there is no evidence at all extant for these words prior to the fifth century. Matt. v. 4, 5: here the ancient order of the beatitudes, as supported by Origen, Tertullian, the canons of Eusebius, and Hilary, is that of placing μακάριοι οἱ πραεῖς, κ. τ. λ. *before* μακάριοι οἱ πενθοῦντες, κ. τ. λ.; here the Curetonian agrees with the distinct testimonies for this order against the Peshito. In Matt. i. 18, we know from Irenæus that the name "Jesus" was not read; and this is confirmed by the Curetonian: in fact, the common reading, however widely supported, could not have originated until Ἰησοῦς χριστὸς was treated as a combined proper name, otherwise the meaning of τοῦ δὲ Ἰησοῦ χριστοῦ ἡ γένεσις would not be "the birth of Jesus Christ," but "the birth of Jesus as the Christ." Here the Curetonian reading is in full accordance with what we know of the *second* century in opposition to the Peshito. In Matt. vi. 4 the Curetonian omits αὐτός; in the same ver. and in ver. 6 it omits ἐν τῷ φανερῷ: in each case with the best authorities, but against the Peshito. Matt. v. 44, has been amplified by copyists in any extraordinary manner: the words in brackets show the amplifications, and the place from which each was taken: ἐγὼ δὲ λέγω ὑμῖν, Ἀγαπᾶτε τοὺς ἐχθροὺς ὑμῶν [εὐλογεῖτε τοὺς καταρωμένους ὑμᾶς, Luke vi. 28, καλῶς ποιεῖτε τοὺς μισοῦντας ὑμᾶς, *ibid.* 27], καὶ προσεύχεσθε ὑπὲρ τῶν [ἐπηρεαζόντων ὑμᾶς καὶ, *ibid.* 35] διωκόντων ὑμᾶς. The briefer form is attested by Irenæus, Clement, Origen, Cyprian, Eusebius, etc.; and though the inserted words and clauses are found in almost all Greek MSS. (except Codices Vaticanus and Sinaiticus), and in many versions including the Peshito, *they are not in the Curetonian Syriac.* Of a similar kind are Matt. xviii. 35, τὰ παραπτώματα αὐτῶν; Luke viii. 54, ἐκβαλὼν ἔξω πάντας καὶ; Luke ix. 7, ὑπ' αὐτοῦ; ix. 54, ὡς καὶ Ἠλίας ἐποίησεν; xi. 2, γενηθήτω τὸ θέλημά σου ὡς ἐν οὐρανῷ καὶ ἐπὶ τῆς γῆς; xi. 29, τοῦ προφήτου; xi. 44, γραμματεῖς καὶ φαρισαῖοι ὑποκριταί; John iv. 43, καὶ ἀπῆλθεν; v. 16, καὶ ἐζήτουν αὐτὸν ἀποκτεῖναι; vi. 51, ἣν ἐγὼ δώσω; vi. 69, τοῦ ζῶντος.

These are but a few samples of the variations which exist between the Curetonian Syriac and the Peshito as to the kind of text: the instances of this might be increased almost indefinitely. Those acquainted with critical results will know that some of those here specified are crucial texts in points of comparative criticism. Such a comparison not only shows the antiquity of the text of the Curetonian Syriac, but it also affords abundant proof that the Peshito must have been modernized and revised.

The antiquity of the Curetonian text is also shown by the occurrence of readings which were, as we know, early current, even though rightly repudiated as erroneous: several of these are in the Curetonian Syriac; it may suffice to refer to the long addition after Matt. xx. 28.

The Curetonian Syriac presents such a text as we might have concluded would be current in the

[a] For the Syriac of this part of the passage from Bar Salibi, see Assemani, *Bibliotheca Orientalis*, ii. 160.

[b] A collation of an ancient Syriac MS. of the Gospels Rich, 7,157 in the British Museum) showed that the Syrians were in the habit of reforming their copies in some respects. The grammatical forms, etc., of this MS. are much more ancient than those of the text of Widmanstadt, who has been followed by successive editors.

Digitized by Google

second century. the Peshito has many features which *could not* belong to that age: unless, indeed, we are ready to reject established facts, and those of a very numerous kind: probably, *at least*, two thousand.

It is not needful for very great attention to be paid to the phraseology of the Curetonian Syriac in order to see that the Gospel of St. Matthew differs in mode of expression and various other particulars from what we find in the rest. This may lead us again to look at the testimony of Bar Salibi; he tells us, when speaking of this version of St. Matthew, "there is found occasionally a Syriac copy *made out of the Hebrew:*" we thus *know* that the opinion of the Syrians themselves in the 12th century was that this translation of St. Matthew was not made from the Greek, but from the Hebrew original of the Evangelist: such, too, is the judgment of Dr. Cureton: "this Gospel of St. Matthew appears at least to be built upon the original Aramaic text, which was the work of the Apostle himself." (*Preface to Syriac Gospels*, p. vi.)

Dr. Cureton rightly draws attention to the peculiar title prefixed to the Gospel by St. Matthew, ܣܦܪ ܕܡܦܪܫܢܐ ܕܡܬܝ. Now whatever be the meaning of the word *dampharsho* here brought in — whether it signifies "the *distinct* Gospel of Matthew," as rendered by Cureton, or "the Gospel of Matthew *set forth*" [i. e. for lessons throughout the ecclesiastical year], as Berustein advances, supporting his opinion by a passage in Assemani (which can hardly here apply, as this copy is not so "set forth"), or, if it means (as some have objected), "the Gospel of Matthew *explained*" — still there must be some reason why the *first* Gospel should be thus designated, and not the others. But the use of the cognate Hebrew verb in the Old Testament may afford us some aid as to *what* kind of *explanation* is meant, if indeed that is the meaning of the term here used. In the description of the reading of the law in Neh. viii. 8, we are told, "So they read in the book of the law *distinctly* (מְפֹרָשׁ), and gave the sense, and caused the people to understand the reading." The word here used has been regarded by able scholars as implying an interpretation from the ancient Hebrew into the form of Aramæan then current. Such *Mephorash*, when written, would be the germ of the Targum of after ages. (See below, p. 3396 *a*.) The same word may be used in the heading of St. Matthew's Gospel in the same sense — as being an explanation from one Shemitic tongue or dialect into another, just as St. Matthew's Gospel turned from one form of Hebrew into pure Syriac would be.

But it may be asked, if St. Matthew's Hebrew (or Chaldaic) Gospel was before the translator, why should he have done more than copy into Syriac letters? Why *translate* at all? It is sufficient, in reply, to refer to the Chaldaic portions of Daniel and Ezra, and to the Syriac version made from them. In varying dialects it sometimes happens that the vocabulary in use differs more than the grammatical forms. The verbal identity may often be striking even though accompanied with frequent variation of terms.

We know from Jerome that the Hebrew St Matthew had מָחָר where the Greek has ἐπιούσιον. We do *not* find that word here, but we read for both ἐπιούσιον and σήμερον at the end of the verse, ܕܡܨܕ ܝܘܡܢ, "*constant* of the day." This might have sprung from the interpretation, "morrow by morrow," given to מָחָר; and it may be illustrated by Old Test. passages, *e. g.* Num. iv. 7, where לֶחֶם הַתָּמִיד is rendered by ܠܚܡܐ ܕܨܒܝܐ ܕܬܡܝܕ. Those who think that if this Syriac version had been made from St. Matthew's Hebrew, we ought to find מָחָר here, forget that a translation is not a verbal transfusion.

We know from Eusebius that Hegesippus cited from the Gospel according to the Hebrews, and from the Syriac. Now in a fragment of Hegesippus (Routh, i. 219), there is the quotation, μακάριοι οἱ ὀφθαλμοὶ ὑμῶν οἱ βλέποντες καὶ τὰ ὦτα ὑμῶν τὰ ἀκούοντα, words which might be a Greek rendering from Matt. xiii. 16, as it stands in this Syriac Gospel as we have it, or probably also in the Hebrew work of the Apostle himself. Every notice of the kind is important; and Dr. Cureton, in pointing it out, has furnished students with one of the varied data through which a right conclusion may be reached.

Every successive investigation, on the part of competent scholars, aids in the proof that the Curetonian Gospels are an older form than those in the Peshito; that the Peshito is a revision replete with readings unknown in the 2d century (and often long after); and that the Curetonian text possesses the highest critical as well as historical value.

The more the evidence, direct and indirect, is weighed, the more established it appears will be the judgment that the Curetonian Syriac of St. Matthew's Gospel was translated from the Apostle's Hebrew (Syro-Chaldaic) original, although injured since by copyists or revisers.

B. *The Philoxenian Syriac Version, and its Revision by Thomas of Harkel.* — Philoxenus, or Xenaias, Bp. of Hierapolis or Mabug at the beginning of the 6th century (who was one of those Monophysites who subscribed the *Henoticon* of the Emperor Zeno), caused Polycarp, his *Chorepiscopus*, to make a new translation of the New Test. into Syriac. This was executed in A. D. 508, and it is generally termed Philoxenian from its promoter.[a]

This version has not been transmitted to us in the form in which it was first made; we only possess a revision of it, executed by Thomas of Harkel in the following century (The Gospels, A. D. 616). Pococke, in 1630,[b] gives an extract from Bar Salibi, in which the version of Thomas of Harkel is mentioned; and though Pococke did not know what version Thomas had made, he speaks of a Syriac translation of the Gospels communicated to him by some learned man whom he does not name, which from its servile adherence to the Greek was no doubt the Harklean text. In the *Bibliotheca Orientalis* of Assemani there were further notices of the work of Thomas; and in 1730 Samuel Palmer sent from the ancient Amida (now *Diarbekr*) Syriac MSS. to Dr. Gloucester Ridley, in which the version is contained. Thus he had two copies of the Gospels, and one of all the rest of the New Test. except the end of the Epistle to the Hebrews, and

[a] See Moses Aghelæus in Assemani, *Biblioth. Orient.* ii. 38.

[b] Preface to the Syriac edition of 2 Pet. etc.

Digitized by Google

the Apocalypse. No other MSS. appear to have yet come to light which contain any of this version beyond the Gospels. From the subscriptions we learn that the text was revised by Thomas with *three* (some copies say *two*) Greek MSS. *One* Greek copy is similarly mentioned at the close of the catholic epistles.

Ridley published, in 1761, an account of the MSS. in his possession, and a notice of this version. He had intended to have edited the text: this was however done by White, at different times from 1778 to 1803. After the publication of the Gospels, the researches of Adler brought more copies into notice of that part of the Harklean text. From one of the MSS. in the Vatican, St. John's Gospel was edited by Bernstein in 1851. It will be noticed that this version differs from the Peshito, in containing all the seven catholic epistles.

In describing this version as it has come down to us, the *text* is the first thing to be considered. This is characterized by extreme literality: the Syriac idiom is constantly bent to suit the Greek, and everything is in some manner expressed in the Greek phrase and order. It is difficult to imagine that it could have been intended for ecclesiastical reading. It is not independent of the Peshito, the words, etc., of which are often employed. As to the kind of Greek text that it represents, it is just what might have been expected in the 6th century. The work of Thomas in the text itself is seen in the introduction of *obeli*, by which passages which he rejected were condemned; and of *asterisks*, with which his insertions were distinguished. His model in all this was the Hexaplar Greek text. The MSS. which were used by Thomas were of a different kind from those employed in making the version; they represented in general a much older and purer text. The margin of the Harklean recension contains (like the Hexaplar text of the LXX.) readings, mostly apparently from the Greek MSS. used. It has been questioned whether these readings are not a comparison with the Peshito; if any of them are so, they have probably been introduced since the time of Thomas. It is probable that the Philoxenian version was very literal, but that the slavish adaptation to the Greek is the work of Thomas; and that his *text* thus bore about the same relation to that of Philoxenus as the Latin Bible of Arias Montanus does to that of his predecessor Pagninus. For textual criticism this version is a good authority as to the text *of* its own time, at least where it does not merely follow the Peshito. The amplifications in the margin of the book of Acts bring a MS. used by Thomas into close comparison with the Codex Bezae. One of the MSS. of the Gospels sent to Ridley contains the Harklean text, with some revision by Bar Salibi.

C. *Syriac Versions of Portions wanting in the Peshito.* — I. The second Epistle of Peter, the second and third of John, and that of Jude. The fact has been already noticed, that the Old Syriac Version did not contain these epistles. They were published by Pococke in 1630, from a MS. in the Bodleian. The version of these epistles so often agrees with what we have in the Harklean recension, that the one is at least dependent on the other. The suggestion of Dr. Davidson (*Biblical Criticism*, ii. 196), that the text of Pococke is that of Philoxenus before it was revised by Thomas, seems most probable. But if it is objected, that the translation does not show as great a knowledge of Greek as might have been expected in the translation of the rest of the Philoxenian, it must be remembered that here he had not the Peshito to aid him. In the Paris Polyglott these epistles were added to the Peshito, with which they have since been commonly printed, although they have not the slightest relation to that version.

II. *The Apocalypse.* — In 1627 De Dieu edited a Syriac version of the Apocalypse, from a MS. in the Leyden Library, written by one "Caspar from the land of the Indians," who lived in the latter part of the 16th century. A MS. at Florence, also written by this Caspar, has a subscription stating that it was copied in 1582 from a MS. in the writing of Thomas of Harkel, in A. D. 622. If this is correct it shows that Thomas by himself would have been but a poor translator of the N. T. But the subscription seems to be of doubtful authority; and until the Rev. B. Harris Cowper drew attention to a more ancient copy of the version, we might well be somewhat uncertain if this were really an ancient work.[a] It is of small critical value, and the MS. from which it was edited is incorrectly written. It was in the MS. which Archbishop Ussher sent as a present to De Dieu in 1631, in which the *whole* of the Syriac N. T. is said to have been contained (of what version is unknown), that having been the only complete MS. of the kind described;[b] and of this MS., in comparison with the text of the Apocalypse printed by De Dieu, Ussher says, "the Syriac lately set out at Leyden may be amended by my MS. copy" (Todd's *Walton*, i. 196, *note*). This book from the Paris Polyglott and onward, has been added to the Peshito in this translation. Some have erroneously called this Syriac Apocalyse the *Philoxenian*, a name to which it has no title: the error seems to have originated from a verbal mistake in an old advertisement of Greenfield's edition (for which he was not responsible), which said "the *Apocalypse* and the *Epistles* not found in the Peshito, are given from the Philoxenian version."

III. *The Syriac Version of John* viii. 1–11. — From the MS. sent by Archbishop Ussher to De Dieu, the latter published this section in 1631

[a] The Rev. B. Harris Cowper has courteously communicated the following notice relative to the Syriac Apocalypse in MSS. in the British Museum: "The MS No. 7,185 of the 14th century does not contain the actual text of the Apocalypse, but a brief commentary upon it — upon paper, and not quite perfect; the text appearing to be that of our printed books. The *text* of the Apocalypse is apparently all found in No. 17,127, a commentary upon the book of the 11th century. This also seems to be of the same text as the printed edition."

[b] De Dieu says that this Syriac MS. contained "omnia N. T. Syriaci, quae in prioribus decrant editionibus" Does this mean that it merely contained what was previously wanting, or the *whole*, including such parts? It seems strange if this section of St. John stood in it *alone*. This makes it seem as if the interpretation given above were the true one. Ussher's own description is this: "I have received the parcels of the N. Test. [in Syriac] which hitherto we have wanted in that language, namely, the history of the adulterous woman, the 2d Epistle of Peter, the 2d and 3d Epistles of St. John, the Epistle of Jude, and the Revelation; as also a small tractate of Ephrem Syrus in his own language." Archbishop Ussher to Dr Samuel Ward, June 22, 1626 (Todd's *Life of Walton* i. 194).

Digitized by Google

From De Dieu it was inserted in the London Polyglott, with a reference to Usher's MS., and hence it has passed with the other editions of the Peshito, where it is a mere interpolation.

A copy of the same version (essentially) is found in Ridley's *Codex Barsalibæi*, where it is attributed to Maras, A. D. 622: Adler found it also in a Paris MS. ascribed to Abbas Mar Paul.

Bar Salibi cites a different version, out of Maras, Bishop of Amida, through the chronicle of Zacharias of Melitina. See Assemani (*Biblioth. Orient.* ii. 53, 170), who gives the introductory words. Probably the version edited is that of Paul (as stated in the Paris MS.) and that of Maras the one cited by Bar Salibi; while in Ridley's MS. the two are confounded. The Paul mentioned is apparently Paul of Tela, the translator of the Hexaplar Greek text into Syriac.

D. THE JERUSALEM SYRIAC LECTIONARY. — The MS. in the Vatican containing this version was pretty fully described by S. E. Assemani in 1756, in the Catalogue of the MSS. belonging to that Library; but so few copies of that work escaped destruction by fire, that it was virtually unpublished, and its contents almost unknown. Adler, who at Copenhagen had the advantage of studying one of the few copies of this Catalogue, drew public attention to this peculiar document in his *Kurze Uebersicht seiner biblischkritischen Reise nach Rom*, pp. 118–127 (Altona, 1783), and still further, in 1789, in his valuable examination of the Syriac versions. The MS. was written in A. D. 1030, in peculiar Syriac writing; the portions are of course those for the different festivals, some parts of the Gospels not being there at all. The dialect is not common Syriac; it was termed the *Jerusalem* Syriac, from its being supposed to resemble the Jerusalem Talmud in language and other points. The grammar is peculiar; the forms almost Chaldee rather than Syriac; two characters are used for expressing F and P.

For critical purposes this Lectionary has a far higher value than it has for any other: its readings often coincide with the oldest and best authorities. It is not yet known as to its entire text; for except a small specimen, no part has been printed; Adler, however, selected large numbers of readings, which have been commonly used by critics from that time and onward. In Adler's opinion its date as a version would be from the 4th to the 6th century; at it can hardly be supposed that it is of so early age, or that any Syrians then could have used so corrupt a dialect. It may rather be supposed to be a translation made from a Greek Lectionary, never having existed as a substantive translation: to what age its execution should be assigned seems wholly uncertain. (A further account of the MS. this version, drawn up from a comparison of Assemani's description in the Vatican Catalogue, and that of Adler, with the MS. itself in the Vatican Library, made by the present writer, is given in Horne's *Introd.* iv. 284–287, where, however, "Jerusalem *Targum*" twice stands for *Talmud*.)

It appears, from the statement of Dr. Ceriani of Milan, that Count Marescalchi [Miniscalchi] has met with a MS. of this Lectionary, and that he has long had the intention of publishing it. [It was published at Verona in 1861–64 by Count Miniscalchi-Erizzo, in 2 vols. 4to, the first containing the text, with a Latin translation; the second prolegomena and glossary. According to Davidson (art. *Syriac Versions* in Kitto's *Cycl. of Bibl. Lit.*, 3d ed.) the prolegomena are disappointing. — A.]

TARGUM (תַּרְגֵּם, from תְּרְגֵם; Arab. ترجم, to translate, explain); a Chaldee word of uncertain origin, variously derived from the roots רקם, רגם (comp. Arab. رقم, رقن, etc.), and even identified with the Greek τράγημα, dessert (Fr. *dragées*), (trop. τραγήματα τῶν λόγων, Dion. Hal. *Rhet.* 10, 18), which occurs often in the Talmud as מיני מרגימא, or תרגימא ("such as dates, almonds, nuts," etc. Pes. 119 *b*): the general term for the CHALDEE, or, more accurately ARAMAIC VERSIONS of the Old Testament.

The injunction to "read the Book of the Law before all Israel . . . . the men, and women, and children, and the strangers," on the Feast of Tabernacles of every Sabbatical year, as a means of solemn instruction and edification, is first found in Deut. xxxi. 10–13. How far the ordinance was observed in early times we have no means of judging. It would appear, however, that such readings did take place in the days of Jeremiah. Certain it is that among the first acts undertaken by Ezra towards the restoration of the primitive religion and public worship is reported his reading "before the congregation, both of men and women" of the returned exiles, "in the Book in the Law of God" (Neh. viii. 2, 8). Aided by those men of learning and eminence with whom, according to tradition, he founded that most important religious and political body called the Great Synagogue, or Men of the Great Assembly (אנשי כנסת הגדולה, 536–167), he appears to have succeeded in so firmly establishing regular and frequent public readings in the Sacred Records, that later authorities almost unanimously trace this hallowed custom to times immemorial — nay to the time of Moses himself. Such is the statement of Josephus (*c. Ap.* ii. 17); and we read in the Acts, xv. 21, "For Moses of old time hath in every city them that preach him, being read in the synagogue every sabbath-day." So also Jer. Meg. i. 1: "Ezra has instituted for Israel that the maledictions in the Pentateuch should also be read in public," etc. Further, Meg. 31 *b*, "Ezra instituted ten things, namely, that there should be readings in the Law also in the afternoon service of Sabbath on the Monday, and on the Thursday, etc. . . . . But was not this instituted before in the desert, as we find 'they went for three days and found no water' (water meaning the Law, as Is. lv. 1 is fancifully explained by the Haggada), until the 'prophets among them' arranged the three weekly readings? But Ezra

Digitized by Google

only reinstituted them," comp. also B. Kama, 82 *a*, etc. To these ancient readings in the Pentateuch were added, in the course of time, readings in the prophets (in some Babylonian cities even in the Hagiographa), which were called חפטרות, *Haftaroth*; but when and how these were introduced is still matter of speculation. Former investigators (Abudraham, Elias Levita, Vitringa, etc.) almost unanimously trace their origin to the Syrian persecutions, during which all attention to the Law was strictly prohibited, and even all the copies of it that were found were ruthlessly destroyed; so that, as a substitute for the Pentateuchical Parasha, a somewhat corresponding portion of the Prophets was read in the synagogue, and the custom, once introduced, remained fixed. Recent scholars on the other hand, without much show of reason, as it would appear, variously hold the *Haftarah* to have sprung from the sermon or homiletic exercise which accompanied the reading in the Pentateuch, and took its *exordium* (as Haftarah, by an extraordinary linguistic stretch, is explained by Frankel) from a prophetic passage, adapted in a manner to the Mosaic text under consideration; or, again, they imagine the *Haftarah* to have taken its rise spontaneously during the exile itself, and that Ezra retained and enforced it in Palestine.

If, however, the primitive religion was reëstablished, together with the second Temple, in more than its former vigor, thus enabling the small number of the returned exiles — and these, according to tradition, the lowest of the low, the poor in wealth, in knowledge, and in ancestry,[a] the very outcasts and refuse of the nation as it were[b] — to found upon the ruins of Zion one of the most important and lasting spiritual commonwealths that has ever been known, there was yet one thing which neither authority nor piety, neither academy nor synagogue, could restore to its original power and glory — the Hebrew language. Ere long it was found necessary to translate the national books, in order that the nation from whose midst they had sprung might be able to understand them. And if for the Alexandrine, or rather the whole body of Hellenistic Jews, Greek translations had to be composed, those who dwelt on the hallowed soil of their forefathers had to receive the Sacred Word through an Aramaic medium. The word מפורש, *Mephorash*, "explanatory," "clearly," or, as the A. V. has it, "distinctly," used in the above-quoted passage of Neh. viii. 8, is in the Talmud explained by "Targum."[c] Thus to Ezra himself is traced the custom of adding translations in the then popular idiom — the Aramaic — to the periodical readings (Jer. Meg. 23 *b*; J. Ned. iv., Bab. Ned. i.; Maim. Hilch. Teph. xii. § 10, etc.), for which he is also reported to have fixed the Sabbaths, the Mondays and Thursdays — the two latter the market and law-days, when the villagers came to town — of every week (Jer. Meg. i. 1 Baba Kama, 82 *a*). The gradual decay of the pure Hebrew vernacular, among the multitude at least, may be accounted for in many ways. The Midrash very strikingly points out, among the characteristics of the long sojourn of Israel in Egypt, that they neither changed their language, nor their names, nor the shape of their garments, during all that time. The bulk of their community — shut up, as it were, in the small province of Goshen, almost exclusively reduced to intercourse with their own race and tribes, devoted only to the pasture of their flocks, and perhaps to the tilling of their soil — were in a condition infinitely more favorable for the retention of all the signs and tokens of their nationality than were the Babylonian captives. The latter, scattered up and down the vast empire, seem to have enjoyed everywhere full liberty of intercommunication with the natives — very similar in many respects to themselves — to have been utterly unrestrained in the exercise of every profession and trade, and even to have risen to the highest offices of state; and thus, during the comparatively short space, they struck root so firmly in the land of their exile, that when opportunity served, they were, on the whole, loth to return to the Land of Promise. What more natural than that the immigrants under Zerubbabel, and still more those who came with Ezra — several generations of whose ancestors had been settled in Babel — should have brought back with them the Aramaic, if not as their vernacular, at all events as an idiom with which they were perfectly familiar, and which they may partly have continued to use as their colloquial language in Palestine, as, in fact, they had had to use it in Babylon? Continuous later immigrations from the "Captivity" did not fail to reinforce and further to spread the use of the same tongue. All the decrees and official communications addressed to the Jews by their Persian masters were in Aramaic (Ezr. Neh. *passim*), Judæa being considered only as part of the Syrian satrapy. Nor must it be forgotten that the old colonists in Palestine (2 K. xvii. 24) were Samaritans, who had come from "Aram and Babel," and who spoke Chaldee; that intermarriages with women from Ashdod, Ammon, and Moab had been common (Neh. xiii. 23); that Phœnikia, whose merchants (Tyrians, Neh. xiii. 16) appear to have settled in Palestine, and to have established commercial relations with Judæa and Galilee, contains large elements of Chaldee in its own idiom. Thus it came to pass that we find in the book of Daniel, for instance, a somewhat forced Hebrew, from which, as it would seem, the author

a "Ten kinds of families went up from Babylon: Priests, Levites, Israelites, profaned (חללי, those whose fathers are priests, but whose mothers are not fit for priestly marriage); proselytes, freedmen, bastards (or rather those born in illegal wedlock); Nethinim (lowest menials of the Temple); שתוקי ('about whose lineage there is silence,' — of unknown fathers); and אסופי, 'foundlings, of unknown father and mother'" (Kidd. 4, 1)

b "Ezra, on leaving Babylon, made it like unto pure flour" כסולת נקיה (*ib.*).

c "'And they read in the book of the Law of God clearly (מפורש), and gave the understanding,' — that they understood the reading:' — 'in the book of the Law' — this is Mikra, the original reading in the Pentateuch; 'מפורש, clearly' — this is Targum" (Meg. 3 *a*; Ned. 37 *b*). To this tradition also might be referred the otherwise rather enigmatical passage (Sanh. 21 *b*): "Originally," says Mar Sutra, "the Law was given to Israel in Ibri writing and the holy (Hebrew) language. It was again given to them in the days of Ezra in the Ashurith writing and the Aramaic language," etc.

Digitized by Google

gradually lapses into the more familiar Aramaic (comp. ii. 4, etc.); that oracles were received by the high-priests Johanan [a] and Simon the Just [b] in the Holy of Holies (during the Syrian wars) in Aramaic (Sotah, 33, *a*); and that, in short, some time before the Hasmonean period, this was the language in which were couched not only popular sayings, proverbs, and the like (משל הדיוט, Bereshi. R. 107 *d*; Taneh. 17 *a*; Midr. Tehill. 23 *d*; 51 *f*, etc., etc.), but official and legal documents (Mishna Ketub. 4, 8; Tosefta Sabb. c. 8; Eduioth, 8, 4, — c. 130 B. C.), even certain prayers [c] — of Babylonian origin probably — and in which books destined for the great mass of the people were written.[d] That, indeed, the Hebrew Language — the "language of Kenaan" (Is. xix. 18), or "Jehudith" (2 K. xviii. 26, 28; Is. xxxvi. 11) of the Bible — became more and more the language of the few, the learned, the *Holy Language*, לשון הקדש, or, still more exactly, לישן בית קודשא, "Language of the Temple," set aside almost exclusively for the holy service of religion: be it the Divine Law and the works in which this was contained (like the Mishna, the Boraithot, Mechilta, Sifri, Sifra, the older Midrashim, and very many portions of the Talmud), or the correspondence between the different academies (witness the Hebrew letter sent from Jerusalem to Alexandria about 100 B. C., Chag. Jer. ii. 2), or be it the sacred worship itself in Temple and synagogue, which was almost entirely carried on in pure Hebrew.

If the common people thus gradually had lost all knowledge of the tongue in which were written the books to be read to them, it naturally followed (in order "that they might understand them") that recourse must be had to a translation into the idiom with which they were familiar — the Aramaic. That further, since a bare translation could not in all cases suffice, it was necessary to add to the translation an explanation, more particularly of the more difficult and obscure passages. Both translation and explanation were designated by the term *Targum*. In the course of time there sprang up a guild, whose special office it was to act as *interpreters* in both senses (*Meturgeman* [e]), while formerly the learned alone volunteered their services. These interpreters were subjected to certain bonds and regulations as to the form and substance of their renderings. Thus (comp. Mishna Meg. *passim*; Mass. Sofer. xi. 1; Maimon. Hileh. Tephill. 12, § 11 ff.; Orach Chaj. 145, 1, 2), "neither the reader nor the interpreter are to raise their voices one above the other;" "they have to wait for each other until each have finished his verse;" "the Meturgeman is not to lean against a pillar or a beam, but to stand with fear and with reverence;" "*he is not to use a written Targum*, but he is to deliver his translation *viva voce*" — lest it might appear that he was reading out of the Torah itself, and thus the Scriptures be held responsible for what are *his own* dicta; "no more than one verse in the Pentateuch, and three in the Prophets [a greater license is given for the book of Esther] shall be read and translated at a time;" "that there should be not more than one reader and one interpreter for the Law, while for the Prophets one reader and one interpreter, or two interpreters, are allowed," etc. (comp. 1 Cor. xiv. 21 ff.; xii. 30; 27, 28). Again (Mishna Meg. and Tosiftah, *ad loca*), certain passages liable to give offense to the multitude are specified, which may be read in the synagogue and translated; others, which may be read but not translated; others, again, which may neither be read nor translated. To the first class belong *the account of the Creation* — a subject not to be discussed publicly, on account of its most vital bearing upon the relation between the Creator and the Kosmos, and the nature of both: the deed of Lot and his two daughters (Gen. xix. 31); of Judah and Tamar (Gen. xxxviii.); the first account of the making of the golden calf (Ex. xxxii.): all the curses in the Law; the deed of Amnon and Tamar (2 Sam. xiii.); of Absalom with his father's concubines (2 Sam. xvi. 22); the story of the woman of Gibeah (Judg. xix.). These are to be read and translated — being mostly deeds which carried their own punishments with them. To be read but not translated are [f] the deed of Reuben with his father's concubine (Gen. xxxv. 22); the latter portion of the story of the golden calf (Ex. xxxii.); the benediction of the priests (on account of its awful nature). And neither to be read nor translated are the deed of David and Bathsheba (2 Sam. xi. and xii.), and according to one the story of Ammon and Tamar (2 Sam. xiii.). (Both the latter stories, however, are, in Mishna Meg. iv. 10, enumerated among those of the second class, which are to be read but not translated.)

Altogether these *Meturgemanim* do not seem to have been held generally in very high respect; one of the reasons being probably that they were paid (two *Selaim* at one time, according to Midr. R. Gen. 98), and thus made (what P. Aboth especially inveighs against) the Torah "a spade to dig with it." "No sign of blessing," it was said, moreover, "could rest upon the profit they made by their calling, since it was money earned on the Sabbath" (Pes. 4 *b*). Persons unfit to be readers, as those

whose clothes were so torn and ragged that their limbs became visible through the rents (פורזת), their appearance thus not corresponding to the reverence due to the Sacred Word itself, or blind men, were admitted to the office of a Meturgeman; and, apart from there not being the slightest authority attached to their interpretations, they were liable to be stopped and silenced, publicly and ignominiously, whenever they seemed to overstep the bounds of discretion. At what time the regulation that they should not be under fifty years of age (in odd reference to the "men of fifty," Is. iii. 2, mentioned in Juchas. 44, 2) came into use, we are not able to decide. The Mishna certainly speaks even of a minor (under thirteen years) as being allowed both to read and to act as a Meturgeman (comp. Mishna Meg. *passim*). Altogether they appear to have borne the character of empty-headed, bombastic fools. Thus Midr. Koh. has to Eccl. vii. 5: "'It is better to hear the rebuke of the wise:' — these are the preachers (Darshanim) — 'than for a man to hear the song of fools:' — these are the Meturgemanim, who raise their voices in sing-song, (בשיר, or with empty fancies): — 'that the people may hear.'" And to ix. 17: "'The words of wise men are heard in quiet' — these are the preachers (Darshanim) — 'more than the cry of him that ruleth among fools' — these are the Meturgemanim who stand above the congregation." And though both passages may refer more especially to those Meturgemanim (Emoras, speakers, expounders) who at a later period stood by the side of the *Chacham*, or president of the Academy, the preacher κατ' ἐξοχήν (himself seated on a raised dais), and repeated with a loud voice, and enlarged upon what the latter had whispered into their ear in Hebrew (חכם לוחש לו לשון עברית, comp. Matt. x. 27, "What ye hear in the ear, that preach ye upon the housetops"), yet there is an abundance of instances to show that the Meturgeman at the side of the reader was exposed to rebukes of a nature, and is spoken of in a manner, not likely to be employed towards any but men low in the social scale.

A fair notion of what was considered a proper Targum may be gathered from the maxim preserved in the Talmud (Kidd. 49 *a*): "Whosoever translates [as Meturgeman] a verse in its closely exact form [without proper regard to its real meaning] is a *liar*, and whosoever adds to it is *impious and a blasphemer*, e. g., the literal rendering into Chaldee of the verse, 'They saw the God of Israel' (Ex. xxiv. 10), is as wrong a translation as 'They saw *the angel of* God;' the proper rendering being, 'They saw the glory of the God of Israel.'" [Comp. Samar. Pent. p. 2812 *b*.] Other instances are found in the Mishna (Meg. iv. 8); "Whosoever renders the text (Lev. xviii. 21) 'And thou shalt not let any of thy seed pass through the fire to Molech,' by 'Thou shalt not give thy seed to be carried over to heathenism (or to an Aramite woman)' [*i. e.* as the Gemara, *ad loc.*; Jer. Sanh. ז, and Sifri on Deut. xviii. 10, explain it, one who marries an Aramaic woman; for although she may become a proselyte, she is yet sure to bear enemies to him and to God, since the mother will in the end carry his children over to idolatrous worship] as also he who enlarges upon (or figuratively explains) the sections relative to incest (Lev. xviii.) — he shall forthwith be silenced and publicly rebuked." Again (comp. Jer. Ber. v. 1; Meg. iv. 10), "Those who translate 'O my people, children of Israel, as I am merciful in heaven, so shall ye be merciful on earth:' — 'Cow or ewe, it and her young ye shall not kill in one day' (Lev. xxii. 28) — they do not well, for they represent the Laws of God [whose reasons no man dare try to fathom] as mere axioms of mercy;" and, it is added, "the short-sighted and the frivolous will say, 'Lo! to a bird's-nest He extends his mercy, but not to yonder miserable man . . .'"

The same causes which, in the course of time, led to the writing down — after many centuries of oral transmission — of the whole body of the Traditional Law, the very name of which (תורה שבעל פה, "oral law," in contradistinction to תורה שבכתב, or "written law") seemed to imply that it should never become a fixed, immutable code, engendered also, and about the same period, as it would appear, written Targums: for certain portions of the Bible, at least.[a]

The fear of the adulterations and mutilations which the Divine Word — amid the troubles within and without the commonwealth — must undergo at the hands of incompetent or impious exponents, broke through the rule, that the Targum should only be *oral*, lest it might acquire undue authority (comp. Mishna Meg. iv. 5, 10; Tosifta, *ibid.* 3; Jer. Meg. 4, 1; Bab. Meg. 24 *a*; Sota, 39 *b*). Thus, if a Targum of Job is mentioned (Sab. 115 *a*; Tr. Soferim, 5, 15; Tosifta Sab. c. 14; Jer. Sabb. 16, 1) as having been highly disapproved by Gamaliel the Elder (middle of first century, A. D.), who caused it to be hidden and buried out of sight: we find, on the other hand, at the end of the second century, the practice of reading the Targum generally commended, and somewhat later Jehoshua ben Levi enjoins it as a special duty upon his sons. The Mishna even contains regulations about the manner (Jad. iv. 5) in which the Targum is to be written. But even in their written, and, as we may presume, authoritatively approved form, the Targums were of comparatively small weight, and of no canonical value whatsoever. The Sabbath was not to be broken for their sake as it was lawful to do for the Scripture in the original Hebrew (Sab. 115 *a*). The Targum does not defile the hands (for the purpose of touching consecrated food) as do the Chaldee portions of Ezra and Nehemiah (Yad. iv. 5).

The gradual growth of the Code of the written Targum, such as now embraces almost the whole of the O. T., and contains, we may presume, but few snatches of the primitive Targums, is shrouded in deep obscurity. We shall not fail to indicate the opinions arrived at as to the date and authorship of the individual versions in their due places, but we must warn the reader beforehand, that no positive results have been attained as yet, save that nearly *all the names and dates hitherto commonly*

---

[a] As, according to Frankel, the LXX. was only a partial translation at first. Witness the confusion in the last chapters of Exodus, which, as mere repetitions (of chaps. xxv. and xxix.), were originally left untranslated. Saadia in a similar manner uses the formulæ مثل ذلك or كذلك in repetitions.

*attached to them must be rejected.* And we fear that, as long at least as the Targum shares the fate of the LXX., the Samaritan Pentateuch, the Midrash, the Talmud, *etc.*: namely, that a really critical edition remains a thing occasionally dreamt of, but never attempted, — so long must we abandon the hope of getting any nearer a final solution of this and many other still more important questions. The utter corruption, moreover, of the Targum, bitterly complained of already by Elias Levita (an author, be it observed, of very moderate attainments, but absurdly overrated by certain of his contemporaries, and by those who copied his usually shallow dicta without previous examination), debars us from more than half its use. And yet how fertile its study could be made; what light it might be made capable of throwing upon the Bible itself, upon the history of the earliest development of Biblical studies, versions, and upon the Midrash — both the Halachah and Haggadah — snatches of which, in their, as it were, liquid stages, lie embedded in the Targums: all this we need not urge here at length.

Before, however, entering into a more detailed account, we must first dwell for a short time on the *Midrash*[a] itself, of which the Targum forms part.

The centre of all mental activity and religious action among the Jewish community, after the return from Babylon, was the Scriptural Canon collected by the Soferim, or men of the Great Synagogue. These formed the chief authority on the civil and religious law, and their authority was the Pentateuch. Their office as expounders and commentators of the Sacred Records was twofold. They had, firstly, to explain the exact meaning of such prohibitions and ordinances contained in the Mosaic Books as seemed not explicit enough for the multitude, and the precise application of which in former days had been forgotten during the Captivity. Thus, *e. g.*, general terms, like the "work" forbidden on the Sabbath, were by them specified and particularised; not indeed according to their own arbitrary and individual views, but according to tradition traced back to Sinai itself. Secondly, laws neither specially contained nor even indicated in the Pentateuch were inaugurated by them according to the new wants of the times and the ever-shifting necessities of the growing commonwealth (*Geserath*, *Tekanoth*). Nor were the latter in all cases given on the sole authority of the Synod; but they were in most cases traditional, and certain special letters or signs in the Scriptures, seemingly superfluous or out of place where they stood, were, according to fixed hermeneutical rules, understood to indicate the inhibitions and prohibitions (*Gedarim*, "Fences"), newly issued and fixed. But Scripture, which had for this purpose to be studied most minutely and unremittingly — the most careful and scrutinising attention being paid even to its outward form and semblance — was also used, and more especially in its non-legal, prophetical parts, for homiletic purposes, as a wide field of themes for lectures, sermons, and religious discourses, both in and out of the synagogue: at every solemnity in public and private life. This juridical and homiletical expounding and interpreting of Scripture — the germs of both of which are found still closely intertwined and bound up with each other in the Targum — is called *darash*, and the avalanche of Jewish literature which began silently to gather from the time of the return from the exile and went on rolling uninterruptedly — however dread the events which befell the nation — until about a thousand years after the destruction of the second Temple, may be comprised under the general name *Midrash* — "expounding." The two chief branches indicated are, *Halachah* (הלך, "to go"), the rule by which to go, = binding, authoritative law; and *Haggadah* (נגד, "to say") = saying, legend, — flights of fancy, darting up from the Divine Word. The *Halachah*, treating more especially the Pentateuch as the legal part of the O. T., bears towards this book the relation of an amplified and annotated code; these amplifications and annotations, be it well understood, not being new laws, formerly unheard of, deduced in an arbitrary and fanciful manner from Scripture, but supposed to be simultaneous oral revelations *hinted at* in the Scripture: in any case representing not the human but the Divine interpretation, *handed down through a sacred authority* (*Kabbala Shemata* — "something received, heard"). The *Haggadah*, on the other hand, held especial sway over the wide field of ethical, poetical, prophetical, and historical elements of the O. T., but was free even to interpret its legal and historical passages fancifully and allegorically. The whole Bible, with all its tones and colors, belonged to the *Haggadah*, and this whole Bible she transformed into an endless series of themes for her most wonderful and capricious variations. "Prophetess of the exile," she took up the hallowed verse, word, or letter, and, as the *Halachah* pointed out in it a special ordinance, she, by a most ingenious exegetical process of her own, showed to the wonder-struck multitude how the woful events under which they then groaned were hinted at in it, and how in a manner it predicted even their future issue. The aim of the *Haggadah* being the purely momentary one of elevating, comforting, edifying its audience for the time being, *it did not pretend to possess the slightest authority.* As its method was capricious and arbitrary, so its cultivation was open to every one whose heart prompted him. It is saga, tale, gnome, parable, allegory, — poetry, in short, of its own most strange kind, springing up from the sacred soil of Scripture, wild, luxuriant, and tangled, like a primeval tropical forest. If the *Halachah* used the Scriptural word as a last and most awful resort, against which there was no further appeal, the *Haggadah* used it as the golden nail on which to hang its gorgeous tapestry: as introduction, refrain, text, or fundamental stanza for a gloss; and if the former was the iron bulwark around the nationality of Israel, which every one was ready at every moment to defend to his last breath, the latter was a maze of flowery walks within those fortress-walls. That gradually the *Haggadah* preponderated and became *the Midrash κατ' ἐξοχήν* *the people*, is not surprising. We shall notice

---

[a] מדרש (Arab. مدرس), first used in 2 Chr. xiii. 22, xxiv. 27; "Commentary," in the sense of Cæsar's "Commentaries," enlargement, embellishment, complement, etc. (A. V. *story*). The compilers of Chronicles seem to have used such promiscuous works treating of Biblical personages and events, provided they contained aught that served the tendency of the book.

Digitized by Google

now each successive Targum became more and more impregnated with its essence, and from a version became a succession of short homiletics. This difference between the two branches of Midrash is strikingly pointed in the following Talmudical story: "R. Chia b. Abba, a Halachist, and R. Abbahu, a Haggadist, once came together into a city and preached. The people flocked to the latter, while the former's discourses remained without a hearer. Thereupon the Haggadist comforted the Halachist with a parable. Two merchants come into a city and spread their wares, — the one rare pearls and precious stones; the other a ribbon, a ring, glittering trinkets: around whom will the multitude throng? . . . Formerly, when life was not yet bitter labor, the people had leisure for the deep word of the Law; now it stands in need of comfortings and blessings."

The first collections of the *Halachah* — embracing the whole field of juridico-political, religious, and practical life, both of the individual and of the nation: the human and Divine law to its most minute and insignificant details — were instituted by Hillel, Akiba, and Simon B. Gamaliel; but the final redaction of the general code, *Mishna*,[a] to which the later Toseftahs and Boraithas form supplements, is due to Jehudah Hannassi in 220 A. D. Of an earlier date with respect to the contents, but committed to writing in later times, are the three books: *Sifra*, or *Torath Kohanim* (an amplification of Leviticus), *Sifri* (of Numbers and Deuteronomy), and *Mechiltha* (of a portion of Exodus). The masters of the Mishnaic period, after the Soferim, are the Tannaim, who were followed by the Amoraim. The discussions and further amplifications of the Mishna by the latter, form the *Gemara* (Complement), a work extant in two redactions, namely, that of Palestine or Jerusalem (middle of 4th century), and of Babylon (5th century A. D.), which, together with the Mishna, are comprised under the name Talmud. Here, however, though the work is ostensibly devoted to *Halachah*, an almost equal share is allowed to *Haggadah*. The Haggadistic mode of treatment was threefold: either the simple understanding of words and things (*Peshat*) or the homiletic application, holding up the mirror of Scripture to the present (*Derush*), or a mystic interpretation (*Sod*), the second of which chiefly found its way into the Targum. On its minute division into special and general, ethical, historical, esoteric, etc., Haggadah, we cannot enter here. Suffice it to add that the most extensive collections of it which have survived are Midrash Rabbah (commenced about 700, concluded about 1100 A. D.), comprising the Pentateuch and the five Megilloth, and the Pesikta (about 700 A. D.), which contains the most complete cycle of Pericopes, but the very existence of which had until lately been forgotten, surprisingly enough, through the very extracts made from it (Jalkut, Pesikta Rabbathi, Sutarta, etc.).

From this indispensable digression we return to the subject of Targum. The Targums now extant are as follows:—

I. Targum on the Pentateuch, known as that of Onkelos.

II. Targum on the first and last prophets, known as that of Jonathan Ben-Uzziel.

III. Targum on the Pentateuch, likewise known as that of Jonathan Ben-Uzziel.

IV. Targum on portions of the Pentateuch, known as Targum Jerushalmi.

V. Targums on the Hagiographa, ascribed to Joseph the Blind, namely: —

1. Targum on Psalms, Job, Proverbs.

2 Targum on the five Megilloth (Song of Songs Ruth, Lamentations, Esther, Ecclesiastes).

3. Two (not three, as commonly stated) other Targums to Esther: a smaller and a larger, the latter known as Targum Sheni, or Second Targum.

VI. Targum to Chronicles.

VII. Targum to Daniel, known from an unpublished Persian extract, and hitherto not received among the number.

VIII. Targum on the Apocryphal pieces of Esther.

We have hinted before that neither any of the names under which the Targums hitherto went, nor any of the dates handed down with them, have stood the test of recent scrutiny. Let it, however, not for a moment be supposed that a skeptic Wolfian school has been at work, and with hypercritical and wanton malice has tried to annihilate the hallowed names of Onkelos, Jonathan, and Joseph the Blind. It will be seen from what follows that most of these names have or may have a true historical foundation and meaning; but uncritical ages and ignorant scribes have perverted this meaning, and a succession of most extraordinary misreadings and strangest δοτερα πρότερα — some even of a very modern date — have produced rare confusion, and a chain of assertions which dissolve before the first steady gaze. That, notwithstanding all this, the implicit belief in the old names and dates still reigns supreme will surprise no one who has been accustomed to see the most striking and undeniable results of investigation and criticism quietly ignored by contemporaries, and forgotten by generations which followed, so that the same work had to be done very many times over again before a certain fact was allowed to be such.

We shall follow the order indicated above: —

## I. The Targum of Onkelos.

It will be necessary, before we discuss this work itself, to speak of the person of its reputed author as far as it concerns us here. There are few more contested questions in the whole province of Biblical, nay general literature, than those raised on this head. Did an Onkelos ever exist? Was there more than one Onkelos? Was Onkelos the real form of his name? Did he translate the Bible at all, or part of it? And is this Targum the translation he made? Do the dates of his life and this Targum tally? etc., etc. The ancient accounts of Onkelos are avowedly of the most corrupted and confused kind: so much so that both ancient and modern investigators have failed to reconcile and amend them so as to gain general satisfaction, and opinions remain widely divergent. This being the case, we think it our duty to lay the whole — not very voluminous — evidence, collected both from the body of Talmudical and post-Talmudical (so-called Rabbinical) and patristic

[a] Mishna, from *shena*, "to learn," "learning," not, as erroneously translated of old, and repeated ever since, Δευτέρωσις, "repetition;" but corresponding exactly with Talmud (from *lamad*, "to learn"), and Torah (from *horah*, "to teach"): all three terms meaning "*the study*," by way of eminence.

Digitized by Google

writings before the reader, in order that he may judge for himself how far the conclusions to which we shall point may be right.

The first mention of "Onkelos" — a name variously derived from Nicolaus (Geiger), Ὄνομα καλόν [sic] (Renan), Homunculus, Avunculus, etc. — more fully "Onkelos the Proselyte," is found in the Tosiftah, a work drawn up shortly after the Mishna. Here we learn (1) that "Onkelos the Proselyte" was so serious in his adherence to the newly-adopted (Jewish) faith, that he threw his share in his paternal inheritance into the Dead Sea (Tos. Demai, vi. 9). (2.) At the funeral of Gamaliel the elder (1st century A. D.) he burnt more than 70 minæ worth of spices in his honor (Tos. Shabb. 8). (3.) This same story is repeated, with variations (Tos. Semach. 8). (4.) He is finally mentioned, by way of corroboration to different Halachas, in connection with Gamaliel, in three more places, which complete our references from the Tosiftah (Tos. Mikv. 6, 1; Kelim, iii. 2, 2; Chag. 3, 1). The Babylonian Talmud, the source to which we turn our attention next, mentions the name Onkelos four times: (1.) As "Onkelos the Proselyte, the son of Kalonikos" (Callinicus? Cleonicus?), the son of Titus' sister, who, intending to become a convert, conjured up the ghosts of Titus, Balaam, and Christ [the latter name is doubtful], in order to ask them what nation was considered the first in the other world. Their answer that Israel was the favored one decided him (Gitt. 56). (2.) As "Onkelos the son of Kalonymus" (Cleonymus?) (Aboda Sar. 11 *a*). It is there related of him that *the* emperor (*Kaisar*) sent three Roman cohorts to capture him, and that he converted them all. (3.) In Baba Bathra 99 *a* (Boraitha), "Onkelos the Proselyte" is quoted as an authority on the question of the form of the Cherubim. And (4.) The most important passage — because on it and it alone, in the wide realm of ancient literature, has been founded the general belief that Onkelos is the author of the Targum now current under this name — is found in Meg. 3 *a*. It reads as follows: "R. Jeremiah, and, according to others, R. Chia bar Abba, said: The Targum to the Pentateuch was made by the 'Proselyte Onkelos,' from the mouth of R. Eliezer and R. Jehoshua; the Targum to the Prophets was made by Jonathan ben Uzziel from the mouth of Haggai, Zechariah, and Malachi. . . . . But have we not been taught that the Targum existed from the time of Ezra? . . . . Only that it was forgotten, and Onkelos restored it." No mention whatever is to be found of Onkelos either in the Jerusalem Talmud, redacted about a hundred years before the Babylonian, nor in the Church fathers — an item of negative evidence to which we shall presently draw further attention. In a Midrash collection, compiled about the middle of the 12th century, we find again "Onkelos the Proselyte" asking an old man, "Whether that was all the love God bore towards a proselyte, that He promised to give him bread and a garment?" Whereupon the old man replied that this was all for which the Patriarch Jacob prayed" (Gen. xxviii. 20). The book Zohar, of late and very uncertain date, makes "Onkelos" a disciple of Hillel and Shammai. Finally, a MS., also of a very late and uncertain date, in the library of the Leipsig Senate (B. H. 17), relates of "Onkelos, the nephew of Titus" that he asked the emperor's advice as to what merchandise he thought it was profitable to trade in. The emperor told him that that should be bought which was cheap in the market, since it was sure to rise in price. Whereupon Onkelos went on his way. He repaired to Jerusalem, and studied the Law under R. Eleazar and R. Jehoshua, and his face became wan. When he returned to the court, one of the courtiers observed the pallor of his countenance, and said to Titus, "Onkelos appears to have studied the Law." Interrogated by Titus, he admitted the fact, adding that he had done it by his advice. No nation had ever been so exalted, and none was now held cheaper among the nations than Israel: "therefore," he said, "I concluded that in the end none would be of higher price."

This is all the information to be found in ancient authorities about Onkelos and the Targum which bears his name. Surprisingly enough, the latter is well known to the Babylonian Talmud (whether to the Jerusalem Talmud is questionable) and the Midrashim, and is often quoted, but *never once as Targum Onkelos*. The quotations from it are invariably introduced with כדמתרגמינן, "As we [Babylonians] translate;" and the version itself is called (*e. g.* Kiddush. 49 *a*) תרגום דדן, "Our Targum," exactly as Ephraim Syrus (*Opp.* i. 330) speaks of the Peshito as "Our translation."

Yet we find on the other hand another current version invariably quoted in the Talmud by the name of its known author, namely, תרגם עקילס, "the [Greek] Version of Akilas:" a circumstance which, by showing that it was customary to quote the author by name, excites suspicion as to the relation of Onkelos to the Targum Onkelos. Still more surprising, however, is, as far as the person of Onkelos is concerned (whatever be the discrepancies in the above accounts), the similarity between the incidents related of him and those related of Akilas. The latter (אקילס, עקילס) is said, both in Sifra (Lev. xxv. 7) and the Jerusalem Talmud (Demai, xxvii. *d*), to have been born in Pontus, to have been a proselyte, to have thrown his paternal inheritance into an asphalt lake (T. Jer. Demai, 25 *d*), to have translated the Torah before R. Eliezer and R. Joshua, who praised him (קלסו, in allusion perhaps to his name, עקילס); or, according to other accounts, before R. Akiba (comp. Jer. Kidd. 1, 1, 2, etc.; Jer. Meg. 1, 11; Babli Meg. 3 *a*). We learn further that he lived in the time of Hadrian (Chag. 2, 1), that he was the son of the Emperor's sister (Tanch. 28, 1), that he became a convert against the Emperor's will (*ib.* and Shem. Rabba, 146 *c*), and that he consulted Eliezer and Jehoshua about his conversion (Ber. R. 78 *d*; comp. Midr. Koh. 102 *b*). First he is said to have gone to the former, and to have asked him whether that was all the love God bore a proselyte, that He promised him bread and a garment (Gen xxviii. 20). "See," he said, "what exquisite birds and other delicacies I now have: even my slaves do not care for them any longer." Whereupon R. Eliezer became wroth, and said, "Is that for which Jacob prayed, 'And give me bread to eat and a garment to wear,' so small in thine eyes? — Comes he, the proselyte, and receives these things without any trouble!" — And Akilas, dissatisfied, left the irate Master and went to R. Joshua. He pacified him, and explained to him that "Bread" meant the Divine Law, and "Garment," the Talith, or sacred garment to be worn during prayer. "And

Digitized by Google

not this alone, he continued, but the Proselyte may marry his daughter to a priest, and his offspring may become a high-priest, and offer burnt-offerings in the Sanctuary." More striking still is a Greek quotation from *Onkelos*, the Chaldee translator (Midr. Echa, 58 *c*), which in reality is found in and quoted (Midr. Shir hashir. 27 *d*) from Akilas, the Greek translator.

That Akilas is no other than Aquila ('Ακύλας), the well-known Greek translator of the Old Testament, we need hardly add. He is a native of Pontus (Iren. *adv. Hær.* 3, 24; Jer. *De Vir. Ill.* c. 54; Philastr. *De Hær.* § 90). He lived under Hadrian (Epiph. *De Pond. et Mens.* § 12). He is called the πενθερίδης (Chron. Alex. πενθερός) of the Emperor (*ib.* § 14), becomes a convert to Judaism (§ 15), whence he is called the Proselyte (Iren. *ib.*; Jerome to Is. viii. 14, etc.), and receives instructions from Akiba (Jer. *ib.*). He translated the O. T., and his Version was considered of the highest import and authority among the Jews, especially those unacquainted with the Hebrew language (Euseb. *Præp. Ev.* l. c.; Augustin, *Civ. D.* xv. 23; Philastr. *Hær.* 90; Justin, *Novell.* 146). Thirteen *distinct* quotations[a] from this Version are preserved in Talmud and Midrash, and they tally, for the most part, with the corresponding passages preserved in the Hexapla; and for those even which do not agree, there is no need to have recourse to corruptions. We know from Jerome (on Ezek. iii. 15) that Aquila prepared a further edition of his Version, called by the Jews κατ' ἀκρίβειαν, and there is no reason why we should not assume, *ceteris paribus*, that the different passages belong to the different editions.

If then there can be no reasonable doubt as to the identity of Aquila and Akilas, we may well now go a step further, and from the threefold accounts adduced, — so strikingly parallel even in their unachronisms and contortions — safely argue the identity, as of Akilas and Aquila, so of Onkelos "*the translator*," with Akilas or Aquila. Whether in reality a proselyte of that name had been in existence at an earlier date — a circumstance which might explain part of the contradictory statements; and whether the difference of the forms is produced through the ע (ng, nk), with which we find the name sometimes spelt, or the Babylonian manner, occasionally to insert an *n*, like in Adrianus, which we always find spelt Andrianus in the Babylonian Talmud; or whether we are to read Gamaliel II. for Gamaliel the Elder, we cannot here examine; anything connected with the person of an Onkelos no longer concerns us, since he is not the author of the Targum; indeed, as we saw, only *once* ascribed to him in the passage of the Babylonian Talmud (Meg. 3 *a*), palpably corrupted from the Jerusalem Talmud (Meg. i. 9). And not before the 9th century (Pirke der. Eliezer to Gen. xlv. 27) does this mischievous mistake seem to have struck root, and even from that time three centuries elapsed, during which the Version was quoted often enough, but without its authorship being ascribed to Onkelos.

From all this it follows that those who, in the face of this overwhelming mass of evidence, would fain retain Onkelos in the false position of translator of our Targum, must be ready to admit that there were two men living simultaneously of most astoundingly similar names; both proselytes to Judaism, both translators of the Bible, both disciples of R. Eliezer and R. Jehoshua; it being of both reported by the same authorities that they translated the Bible, and that they were disciples of the two last-mentioned Doctors; both supposed to be nephews of the reigning emperor, who disapproved of their conversion (for this account comp. Dion Cass. lxvii. 14, and Deb. Rab. 2, where Domitian is related to have had a near relative executed for his inclining towards Judaism); and very many more palpable improbabilities of the same description.

The question now remains, why was this Targum called that of Onkelos or Akilas? It is neither a translation of it, nor is it at all done in the same spirit. All that we learn about the Greek Version shows us that its chief aim and purpose was, to counteract the LXX. The latter had at that time become a mass of arbitrary corruptions — especially with respect to the Messianic passages — as well on the Christian as on the Jewish side. It was requisite that a translation, scrupulously literal, should be given into the hands of those who were unable to read the original. Aquila, the disciple, according to one account, of Akiba — the same Akiba who expounded (*darash*) for halachistic purposes the seemingly most insignificant particles in the Scripture (*e. g.* the את, sign of accusative; Gen. R. 1; Tos. Sheb. 1; Talm. Sheb. 26 *a*) — fulfilled his task according to his master's method. "Non solum verba sed et etymologias verborum transferre conatus est. . . . . Quod Hebræi non solum habent ἄρθρα sed et πρόαρθρα, ille κακοζήλως et syllabas interpretetur et litteras, dictatque σὺ ν τὸν αὐρανὸν καὶ σὺ ν τὴν γῆν quod græca et latina lingua non recipit" (Jer. *de Opt. Gen. interpret.*). Targum Onkelos, on the other hand, is, if not quite a paraphrase, yet one of the very freest versions. Nor do the two translations, with rare exceptions, agree even as to the renderings of proper nouns, which each occasionally likes to transform into something else. But there *is* a reason. The Jews in possession of this most slavishly accurate Greek Bible-text, could now on the one hand successfully combat arguments, brought against them from interpolated LXX. passages, and on the other follow the expoundings of the School and the Halachah, based upon the letter of the Law, as closely as if they had understood the original itself. That a version of this description often marred the sense, mattered less in times anything but favorable to the literal meaning of the Bible. It thus gradually became such a favorite with the people, that its renderings were household words. If the day when the LXX. was made was considered a day of distress like the one on which the golden calf was cast and was actually entered among the fast days (8th Tebeth; Meg. Taanith), — this new version, which was to dispel the mischievous influences of the older

earned for its author one of the most delicate compliments in the manner of the time. The verse of the Scripture (Ps. xlv. 2), "Thou art more beautiful (*joffefita*) than the sons of men," was applied to him — in allusion to Gen. ix. 27, where it is said that Japhet (i. e. the Greek language) should one day dwell in the tents of Shem (i. e. Israel), Meg. 1, 11, 71 *b* and *c*; 9 *b*, Ber. Rab. 40 *b*. — Οὕτω γὰρ Ἀκύλας δουλεύων τῇ ἑβραϊκῇ λέξει ἐκδέδωκεν εἰπών . . . . φιλοτιμότερον πεπιστευμένος παρὰ Ἰουδαίοις, ἡρμηνευκέναι τὴν γραφήν, etc. (Orig. *ad Afric.* 2).

What, under these circumstances, is more natural than to suppose that the new Chaldee Version — at least as excellent in its way as the Greek — was started under the name which had become expressive of the type and ideal of a Bible-translation; that, in fact, it should be called a Targum done in the manner of Aquila — *Aquila-Targum*. Whether the title of recommendation was, in consideration of the merits of the work upon which it was bestowed, gladly indorsed and retained — or for aught we know, was not bestowed upon it until it was generally found to be of such surpassing merit, we need not stop to argue.

Being thus deprived of the dates which a close examination into the accounts of a translator's life might have furnished us, we must needs try to fix the time of our Targum as approximately as we can by the circumstances under which it took its rise, and by the quotations from it which we meet in early works. Without unnecessarily going into detail, we shall briefly record, what we said in the introduction, that the Targum was begun to be committed to writing about the end of the 2d century, A. D. So far, however, from its superseding the oral Targum at once, it was on the contrary strictly forbidden to read it in public (Jer. Meg. 4, 1). Nor was there any uniformity in the version. Down to the middle of the 2d century we find the masters most materially differing from each other with respect to the Targum of certain passages, (Seb. 54 *a*) and translations quoted not to be found in any of our Targums. The necessity must thus have pressed itself upon the attention of the spiritual leaders of the people to put a stop to the fluctuating state of a version, which in the course of time must needs have become naturally surrounded with a halo of authority little short of that of the original itself. We shall thus not be far wrong in placing the work of collecting the different fragments with their variants, and reducing them into one — finally authorized Version — about the end of the 3d, or the beginning of the 4th century, and in assigning Babylon to it as the birthplace. It was at Babylon that about this time the light of learning, extinguished in the blood-stained fields of Palestine, shone with threefold vigor. The Academy at Nahardea, founded according to legend during the Babylonian exile itself, had gathered strength in the same degree as the numerous Palestinian schools began to decline, and when in 259 A. D. that most ancient school was destroyed, there were three others simultaneously flourishing in its stead, — Tiberias, whither the college of Palestinian Jabneh had been transferred in the time of Gamaliel III. (200); Sora, founded by Chasda of Kafri (293); and Pumbadita, founded by R. Jehudah b Jeshekeel (297). And in Babylon for well-nigh a thousand years "the crown of the Law" remained, and to Babylon, the seat of the "Head of the Golah" (Dispersion), all Israel, scattered to the ends of the earth, looked for its spiritual guidance. That one of the first deeds of these Schools must have been the fixing of the Targum, as soon as the fixing of it became indispensable, we may well presume; and as we see the text fluctuating down to the middle of the 2d century, we must needs assume that the redaction took place as soon afterwards as may reasonably be supposed. Further corroborative arguments are found for Babylon as the place of its final redaction, although Palestine was the country where it grew and developed itself. Many grammatical and idiomatical signs — the substance itself, *i. e.* the words, being Palestinian — point, as far as the scanty materials in our hands permit us to draw conclusions as to the true state of language in Babylon, to that country. The Targum further exhibits a greater linguistic similarity with the Babylonian, than with the Palestinian Gemara. Again, terms are found in it which the Talmud distinctly mentions as peculiar to Babylon,[a] not to mention Persian words, which on Babylonian soil easily found their way into our work. One of the most striking hints is the unvarying translation of the Targum of the word נָהָר, "River," by Euphrates, *the* River of Babylon. Need we further point to the terms above mentioned, under which the Targum is exclusively quoted in the Talmud and the Midrashim of Babylon, namely, "*Our* Targum," "*As we* translate," or its later designation (Aruch, Rashi, Tosafoth, etc.) as the "Targum of Babel"? Were a further proof needed, it might be found in the fact that the two Babylonian Schools, which, holding different readings in various places of the Scripture, as individual traditions of their own, consequently held different readings in the Targum ever since the time of its redaction.

The opinions developed here are shared more or less by some of the most competent scholars of our day: for instance, Zunz (who now repudiates the dictum laid down in his *Gottesdienstl. Vortr.*, that the translation of Onkelos dates from about the middle of the first century, A. D.; comp. Geiger, *Zeitschr.* 1843, p. 179, note 3), Grätz, Levy, Hersfeld, Geiger, Frankel, etc. The history of the investigation of the Targums, more especially that of Onkelos, presents the usual spectacle of vague speculations and widely contradictory notions, held by different investigators at different times. Suffice it to mention that of old authorities, Reuchlin puts the date of the Targum as far back as the time of Isaiah — notwithstanding that the people, as we are distinctly told, did not understand even a few Aramaic words in the time of Jeremiah. Following Asaria de Rossi and Elias Levita (who, for reasons now completely disposed of, assumed the Targum to have first taken its rise in Babylon during the Captivity), Bellarmin, Sixtus Senensis, Aldret, Bartolocci, Rich. Simon, Hottinger, Walton, Thos Smith, Pearson, Allix, Wharton, Prideaux, Schickard, take the same view with individual modifications. Pfeiffer, B. Meyer, Steph. Morinus, on the other hand, place its date at an extremely late period, and assign it to Palestine. Another school held that the Targum was not written until after the time of the Talmud — so Wolf, Havermann, partly Rich. Simon, Hornbeck, Joh. Morinus, etc.: and

[a] נַעֲרָה, "a girl," is rendered by רְבִיָא; "for thus they call in Babylon a young girl," שכן קרין בבבל לינוקא רביא (Chag 13 *a*).

their reasons are both the occurrence of "Talmudical Fables" in the Targum and the silence of the Fathers. The former is an argument to which no reply is needed, since we do not see what it can be meant to prove, unless the "Rabbinus Talmud" has floated before their eyes, who, according to "Henricus Seynensis Capucinus" (*Ann. Eccl.* tom. i. 261), must have written all this gigantic literature, ranging over a thousand years, out of his own head, in which case, indeed, every dictum on record, dating before or after the compilation of the Talmud, and in the least resembling a passage or story contained therein, must be a plagiarism from its sole venerable author. The latter argument, namely, the silence of the Fathers, more especially of Origen, Jerome, and Epiphanius, has been answered by Walton; and what we have said will further corroborate his arguments to the effect, that they did not mention it, not because it did not exist in their days, but because they either knew nothing of it, or did not understand it. In the person of an Onkelos, a Chaldee translator, the belief has been general, and will remain so, as long as the ordinary handbooks — with rare exceptions — do not care to notice the uncontested results of contemporary investigation. How scholars within the last century have endeavored to reconcile the contradictory accounts about Onkelos, more particularly how they have striven to smooth over the difficulty of their tallying with those of Akilas — as far as either had come under their notice — for this and other minor points we must refer the reader to Eichhorn, Jahn, Bertholdt, Hävernick, etc.

We now turn to the Targum itself.

Its language is Chaldee, closely approaching in purity of idiom to that of Ezra and Daniel. It follows a sober and clear, though not a slavish exegesis, and keeps as closely and minutely to the text as is at all consistent with its purpose, namely, to be chiefly, and above all, a version for the people. Its explanations of difficult and obscure passages bear ample witness to the competence of those who gave it its final shape, and infused into it a rare unity. Even where foreign matter is introduced, or, as Berkowitz in his Hebrew work *Oteh Or* keenly observes, where it most artistically blends two translations: one literal, and one figurative, into one; it steadily keeps in view the real sense of the passage in hand. It is always concise and clear and dignified, worthy of the grandeur of its subject. It avoids the legendary character with which all the later Targums entwine the Biblical word, as far as ever circumstances would allow. Only in the poetical passages it was compelled to yield — though reluctantly — to the popular craving for Haggadah; but even here it chooses and selects with rare taste and tact.

Generally and broadly it may be stated that alterations are never attempted, save for the sake of clearness; tropical terms are dissolved by judicious circumlocutions, for the correctness of which the authors and editors — in possession of the living tradition of a language still written, if not spoken in their day — certainly seem better judges than some modern critics, who, through their own incomplete acquaintance with the idiom, injudiciously blame Onkelos. Highly characteristic is the aversion of the Targum to anthropopathies and anthropomorphisms; in fact, to any term which could in the eyes of the multitude lower the idea of the Highest Being. Yet there are many passages retained in which human affections and qualities are attributed to Him. He speaks, He sees, He hears, He smells the odor of sacrifice, is angry, repents, etc: — the Targum thus showing itself entirely opposed to the allegorizing and symbolizing tendencies, which in those, and still more in later days, were prone to transform Biblical history itself into the most extraordinary legends and fairy tales with or without a moral. The Targum, however, while retaining terms like "the arm of God," "the right hand of God," "the finger of God" — for Power, Providence, etc. — replaces terms like "foot," "front," "back of God," by the fitting figurative meaning. We must notice further its repugnance to bring the Divine Being into too close contact, as it were, with man. It erects a kind of reverential barrier, a sort of invisible medium of awful reverence between the Creator and the creature. Thus terms like "the Word" (*Logos* = Sansk. *Ôm*), "the Shechinah" (Holy Presence of God's Majesty, "the Glory"), further, human beings talking not *to*, but "before" God, are frequent. The same care, in a minor degree, is taken of the dignity of the persons of the patriarchs, who, though the Scripture may expose their weaknesses, were not to be held up in their iniquities before the multitude whose ancestors and ideals they were. That the most curious ὕστερα πρότερα and anachronisms occur, such as Jacob studying the Torah in the Academy of Shem, etc., is due to the then current typifying tendencies of the Haggadah. Some extremely cautious, withal poetical alterations also occur when the patriarchs speak of having acquired something by violent means: as Jacob (Gen. xlviii. 22), by his "sword and bow," which two words become in the Targum "prayers and supplications." But the points which will have to be considered chiefly when the Targum becomes a serious study — as throwing the clearest light upon its time, and the ideas then in vogue about matters connected with religious belief and exercises — are those which treat of prayer, study of the Law, prophecy, angelology, and the Messiah.

The only competent investigator who, after Winer (*De Onkelosо*, 1820), but with infinitely more minuteness and thorough knowledge of the subject, has gone fully into this matter, is Luzzatto. Considering the vast importance of this, the oldest Targum, for Biblical as well as for linguistic studies in general, — not to mention the advantages that might accrue from it to other branches of learning, such as geography, history, etc.: we think it advisable to give, for the first time, a brief sketch of the results of this eminent scholar. His classical, though not rigorously methodical, *Oheb Ger* (1830) is, it is true, quoted by every one, but is reality known to but an infinitely small number, although it is written in the most lucid modern Hebrew.

He divides the discrepancies between Text and Targum into four principal classes.

A. Where the language of the Text has been changed in the Targum, but the meaning of the former retained.

B. Where both language and meaning were changed.

C. Where the meaning was retained, but additions were introduced.

D. Where the meaning was changed, and additions were introduced.

He further subdivides these four into thirty-two classes, to all of which he adds, in a most thorough and accurate manner, some telling specimens. Not

Digitized by Google

withstanding the apparent pedantry of his method, and the undeniable identity which necessarily must exist between some of his classes, a glance over their whole body, aided by one or two examples in each case, will enable us to gain as clear an insight into the manner and "genius" of the Onkelos-Targum as is possible without the study of the work itself.

(A.) Discrepancies where the language of the text has been changed in the Targum, but the meaning of the former has been retained.

1. Alterations owing to the idiom: *e. g.* the singular,[a] "Let there be [*sit*] lights" (Gen. i. 14), is transformed into the plural[b] [*sint*] in the Targum; "man and woman," [c] as applied to the animals (Gen. vii. 2), becomes, as unsuitable in the Aramaic, "male and female." [d]

2. Alterations out of reverence towards God, more especially for the purpose of doing away with all ideas of a plurality of the Godhead: *e. g.* the terms Adonai, Elohim, are replaced by Jehovah, lest these might appear to imply more than one God. Where Elohim is applied to idolatry it is rendered "Error." [e]

3. Anthropomorphisms, where they could be misunderstood and construed into a disparagement or a lowering of the dignity of the Godhead among the common people, are expunged: *e. g.* for "And God smelled a sweet smell" (Gen. viii. 21), Onkelos has, "And Jehovah received the sacrifice with grace;" for "And Jehovah went[f] down to see the city" (Gen. xi. 5), "And Jehovah *revealed*[g] Himself," a term of frequent use in the Targum for verbs of motion, such as "to go down," "to go through," etc., applied to God. "I shall pass over[h] you" (Ex. xii. 13), the Targum renders, "I shall protect you." [i] Yet only anthropomorphisms which clearly stand figuratively and might give offense, are expunged, not as Maimonides, followed by nearly all commentators, holds, *all* anthropomorphisms, for words like "hand, finger, to speak, see," etc. (see above), are retained. But where the words remember, think of,[k] etc., are used of God, they always, whatever their tense in the text, stand in the Targum in the present; since a past or future would imply a temporary forgetting on the part of the Omniscient. [l] A keen distinction is here also established by Luzzatto between חזי and גלי, the former used of a real, external seeing, the latter of a seeing "into the heart."

4. Expressions used of and to God by men are brought more into harmony with the idea of his dignity. Thus Abraham's question, "The Judge of the whole earth, should he not (לא) do justice?" (Gen. xviii. 25) is altered into the affirmative: "The Judge . . . . verily He will do justice." Laban, who speaks of his gods [m] in the text, is made to speak of his religion [n] only in the Targum.

5. Alterations in honor of Israel and their ancestors. Rachel "stole" [o] the teraphim (xxxi. 19) is softened into Rachel "took"; [p] Jacob "fled" from Laban (*ibid.* 22), into "went"; [r] "The sons of Jacob answered Shechem with craftiness" (xxxiv. 13), into "with wisdom." [s]

6. Short glosses introduced for the better understanding of the text: "for it is my mouth that speaks to you" (xlv. 12), Joseph said to his brethren: Targum, "in your tongue," [t] *i. e.* without an interpreter. "The people who had made the calf" (Ex. xxxii. 35); Targum, "worshipped," [u] since not they, but Aaron made it.

7. Explanation of tropical and allegorical expressions: "Be fruitful (lit. 'creep,' from שרץ) and multiply" (Gen. i. 28), is altered into "bear children;" [w] "thy brother Aaron shall be thy *prophet*" [x] (Ex. vii. 1), into "thy interpreter" [y] (Meturgeman); "I made thee a god (Elohim) to Pharaoh" (Ex. vii. 1), into "a master;" [z] "to a head and not to a tail" (Deut. xxviii. 13), into "to a strong man and not to a weak;" [a'] and finally, "Whoever says of his father and his mother, I saw them not" (Deut. xxxiii. 9), into "Whoever is not merciful [b'] towards his father and his mother."

8. Tending to ennoble the language: the "washing" of Aaron and his sons is altered into "sanctifying [c'];" the "carcasses" [d'] of the animals of Abraham (Gen. xv. 11) become "pieces;" [e'] "anointing" [f'] becomes "elevating, raising;" [g'] "the wife of the bosom," [h'] "wife of the covenant." [i']

9. The last of the classes where the terms are altered, but the sense is retained, is that in which a change of language takes place in order to introduce the explanations of the oral Law and the traditions: *e. g.* Lev. xxiii. 11, "On the morrow after the Sabbath [k'] (*i. e.* the feast of the unleavened bread) the priest shall wave it (the sheaf)," Onkelos for Sabbath, *feast-day*. [l'] For frontlets [m'] (Deut. vi. 8), Tefillin (phylacteries). [n']

(B.) Change of both the terms and the meaning.

10. To avoid phrases apparently derogatory to the dignity of the Divine Being: "Am I in God's stead?" [o'] becomes in Onkelos, "Dost thou ask [children] from me?" [p'] from before God thou shouldst ask them" (Gen. xxx. 2).

11. In order to avoid anthropomorphisms of an objectionable kind. "With the breath of thy nose" [q'] ("blast of thy nostrils," A. V., Ex. xv. 8), becomes "With the word of thy mouth." [r'] "And

---

[a] יהי [b] יהון [c] איש ואשתו
[d] דכר ונוקבא [e] טעוות עממיא
[f] פסחתי [g] ואתגלי [h] ויחד
[i] אחוס [k] פקד, זכר

[l] Comp. Prayer for Rosh hashana, ואין שכחה לפני כסא כבודך, וכו', "And there is no forgetting before the throne of Thy glory."

[m] אלהים [n] דחלתי [o] יתנוב
[p] ונסיבת [q] בורח [r] אזיל
[s] במרמה [t] בחוכמא [u] בלשניכון

[v] נביאך [w] אחילידו [x] דאשתעבדו
[y] מתורגמנך [z] רב
[a'] לתקוף ולא לחלש
[b'] רחים [c'] כלגיא (בחרים)
[d'] פגרים [e'] ויקדשון
[f'] משח [g'] תרבי
[h'] אשת חיקיך [i'] אשת קיימך
[k'] יומא טבא [l'] טוטפות
[m'] תפילין [n'] דשחת אל אנכי
המני את בעיא וכו'
[o'] ובמימר פומך [p'] וברוח אפיך

I shall spread my hand over thee" [a] (Ex. xxxiii. 22), is transformed into "I shall with my word protect thee." [b] "And thou shalt see my back parts," [c] but my face [d] shall not be seen" (Ex. xxxiii. 23): "And thou shalt see what is behind me," [e] but that which is before me [f] shall not be seen" (Deut. xxxiii. 12).

12. For the sake of religious euphemisms: *e. g.* "And ye shall be like God" [g] (Gen. iii. 5), is altered into "like princes." [h] "A laughter [i] has God made me" (Gen. xxi. 6), into "A joy [k] he gives me" — "God" being entirely omitted.

13. In honor of the nation and its ancestors: *e. g.* "Jacob was an upright man, a dweller in tents" [l] (Gen. xxv. 27), becomes "an upright man, frequenting the house of learning." [m] "One of the people [n] might have lain with thy wife" (Gen. xxvi. 10) — "One singled out among the people," [o] *i. e.* the king. "Thy brother came and took my blessing with deceit" [p] (Gen. xxvii. 35), becomes "with wisdom." [q]

14. In order to avoid similes objectionable on æsthetical grounds. "And he will bathe his foot in oil" [r] — "And he will have many delicacies [s] of a king" (Deut. xxxiii. 24).

15. In order to ennoble the language. "And man became a living being" [t] (Gen. ii. 7) — "And *it* became in man a speaking spirit." [u] "How good are thy *tents*, [v] O Jacob" — "How good are thy *lands*," [w] O Jacob" (Num. xxiv. 5).

16. In favor of the oral Law and the Rabbinical explanations. "And go into the land of Moriah" [x] (Gen. xxii. 2), becomes "into the land of worship" (the future place of the Temple). "Isaac went to walk [y] in the field" (Gen. xxiv. 63), is rendered "to *pray*." [z] [Comp. SAM. PENT., p. 2812 *b*] "Thou shalt not boil a kid [a] in the milk of its mother" (Ex. xxxiv. 26) — as meat and milk, [b] according to the Halachah.

(C.) Alterations of words (circumlocutions, additions, etc.) without change of meaning.

17. On account of the difference of idiom: *e. g.* "Her father's brother" [c] (= relation, Gen. xxix. 12), is rendered "The son of her father's sister." [d] "What God does [e] (future) he has told Pharaoh" (Gen. xli. 28) — "What God will do," [f] etc.

18. Additions for the sake of avoiding expressions apparently derogatory to the dignity of the Divine Being, by implying polytheism and the like: "Who is like unto Thee [g] among the gods?" is rendered, "There is none like unto Thee," [h] Thou art God" (Ex. xv. 11). "And they sacrifice to demons who are no gods" [i] — "of no use" [k] (Deut. xxxii. 17).

19. In order to avoid erroneous notions implied in certain verbs and epithets used of the Divine Being: *e. g.* "And the Spirit of God [l] moved" (Gen. i. 2) — "A wind from before the Lord." [m] "And Noah built God an altar" [n] (Gen. viii. 20) — "an altar before [o] the Lord." "And God [p] was with the boy" (Gen. xxi. 20) — "And the word of God [q] was in the aid of the boy." "The mountain of God" (Ex. iii. 1) — "The mountain upon which was revealed the glory [r] of God." "The staff of God" (Ex. iv. 20) — "The staff with which thou hast done the miracles before [s] God." "And I shall see [t] what will be their end" — "it is open (revealed) before me," [u] etc. The Divine Being is in fact very rarely spoken of without that spiritual medium mentioned before; it being considered, as it were, a want of proper reverence to speak to or of Him directly. The terms "Before" (קדם), "Word" (*Λόγος*, מימרא), "Glory" (יקרא), "Majesty" (שכנתיה), are also constantly used instead of the Divine name: *e. g.* "The voice of the Lord God was heard" (Gen. iii. 8) — "The voice of the Word." "And he will dwell in the tents of Shem" (ix. 27) — "And the Shechinah [Divine Presence] will dwell." "And the Lord went up from Abraham" (Gen. xvii. 22) — "And the glory of God went up." "And God came to Abimelech" (Gen. xx. 3) — "And the word from [before] God came to Abimelech."

20. For the sake of improving seemingly irreverential phrases in Scripture. "Who is God that I should listen unto his voice?" (Ex. v. 2) — "The name of God has not been revealed to me, that I should receive his word." [v]

21. In honor of the nation and its ancestors. "And Israel said to Joseph, Now I shall gladly die" [w] (Gen. xlvi. 30), which might appear frivolous in the mouth of the patriarch, becomes "I shall be comforted [x] now." "And he led his flock towards [y] the desert" (Ex. iii. 1) — "towards a good spot of pasture [z] in the desert."

22. In honor of the Law and the explanation of its obscurities. "To days and years" (Gen. i. 14) — "that days and years should be counted by them." [a] "A tree of knowledge of good and evil" — "A tree, and those who eat its fruits [b] will distinguish between good and evil." "I shall not further curse for the sake of [c] man" (viii. 21) —

"through the sin [a] of man." "To the ground shall not be forgiven the blood [b] shed upon it" (Num. xxxv. 33) — "the *innocent* [c] blood."

23. For the sake of avoiding similes, metonymical and allegorical passages, too difficult for the comprehension of the multitude: *e. g.* "Thy seed like the dust of the earth" (Gen. xiii. 16) — "mighty [d] as the dust of the earth." "I am too small for all the benefits" (Gen. xxxii. 10) — "My good deeds [e] are small." "And the Lord thy God will circumcise thy heart" — "the folly of thy heart." [f]

24. For the sake of elucidating apparent obscurities, etc., in the written Law. "Therefore shall a man leave his father and his mother" (Gen. ii. 24) — "the home" [g] (not really his parents). "The will of Him who dwelleth in the bush" — "of Him that dwelleth in heaven [h] [whose Shechinah is in heaven], and who revealed Himself in the bush to Moses."

25. In favor of the oral Law and the traditional explanations generally. "He punishes the sins of the parents on their children" (Ex. xx. 5), has the addition, "when the children follow the sins of their parents" (comp. Ex. xviii. 19). "The righteous and the just ye shall not kill" (Ex. xxiii. 7) — "He who has left the tribunal as innocent, thou shalt not kill him," *i. e.*, according to the Halacha, he is not to be arraigned again for the same crime. "Doorposts" (*mesusoth*) (Deut. vi. 9) — "And thou shalt write them . . . *and affix them* upon the posts," etc.

(D.) Alteration of language and meaning.

26. In honor of the Divine Being, to avoid apparent multiplicity or a likeness. "Behold man will be like one of us, knowing good and evil" (Gen. iii. 22) — "He will be the only one in the world [i] to know good and evil." "For who is a God in heaven and on earth who could do like thy deeds and powers?" (Deut. iii. 24) — "Thou art God, thy Divine Presence (Shechinah) is in heaven [k] above, and reigns on earth below, and there is none who does like unto thy deeds," etc.

27. Alteration of epithets employed of God. "And before thee shall I hide myself" [l] (Gen. iv. 14) — "And before thee it is not possible to hide." [m] "This is my God and I will praise [n] Him, the God of my father and I will extol [o] Him" (Ex. xv. 2) — "This is my God, and I will build Him a sanctuary; [p] the God of my fathers, and I will pray before Him." [q] "In one moment I shall go up in thy midst and annihilate thee" — "For one hour will I take away my majesty [r] from among thee" (since no evil can come from above).

28. For the ennobling of the sense. "Great is Jehovah above all gods" — "Great is God, and there is no other god beside Him." "Send through him whom thou wilt send" (Ex. iv. 13) — "through him who is worthy to be sent."

29. In honor of the nation and its ancestors. "And the souls they made [s] in Haran" (Gen. xii. 5) — "the souls they made subject to the Divine Law [t] in Haran." "And Isaac brought her into the tent of his mother Sarah" (Gen. xxiv. 67) — "And lo righteous were her works, [u] like the work of his mother Sarah." "And he bent his shoulder to bear, and he became a tributary servant" (Gen. xlix. 15) — "And he will conquer the cities of the nations and destroy their dwelling places, and those that will remain there will serve him and pay tribute to him." "People, foolish and not wise" (Deut. xxxii. 6) — "People who has received the Law and has not become wise." [v]

30. Explanatory of tropical and metonymical phrases. "And besides thee no man shall raise his hand and his foot in the whole land of Egypt" (Gen. xli. 44) — "There shall not a man raise his hand to seize a weapon, and his foot to ride on a horse."

31. To ennoble or improve the language. "Coats of skin" (Gen. iii. 21) — "Garments of honor [w] on the skin of their flesh." "Thy two daughters who are found with thee" (Gen. xix. 15) — "who were found faithful with thee." "May Reuben live and not die" (Deut. xxxiii. 6) — "May Reuben live in the everlasting life."

The foregoing examples will, we trust, be found to bear out sufficiently the judgment given above on this Targum. In spite of its many and important discrepancies, it never for one moment forgets its aim of being a clear, though free, translation *for the people*, and nothing more. Wherever it deviates from the literalness of the text, such a course, in its case, is fully justified — nay, necessitated — either by the obscurity of the passage, or the wrong construction that naturally would be put upon its wording by the multitude. The explanations given agree either with the real sense, or develop the current tradition supposed to underlie it. The specimens adduced by other investigators, however differently classified or explained, are easily brought under the foregoing heads. They one and all tend to prove that Onkelos, whatever the objections against single instances, is one of the most excellent and thoroughly competent interpreters. A few instances only — and they are very few indeed — may be adduced, where even Onkelos, as it would appear, "dormitat." Far be it from us for one moment to depreciate, as has been done, the infinitely superior knowledge both of the Hebrew and Chaldee idioms on the part of the writers and editors of our document, or to attribute their discrepancies from modern translations to ignorance. They drank from the fullness of a highly valuable traditional exegesis, as fresh and vigorous in their days as the Hebrew language itself still was in the circles of the wise, the academies and schools. But we have this advantage, that words which then were obsolete, and whose meaning was known no longer — only guessed at — are to us familiar by the numerous progeny they have produced as cognate idioms, known to us through the mighty spread of linguistic science in our days; and if we

are not aided by a traditional exegesis handed down within and without the schools, perhaps ever since the days of the framing of the document itself, neither are we prejudiced and fettered by it. Whatever may be implied and hidden in a verse or word, we have no reason to translate it accordingly, and, for the attaining of this purpose, to overstrain the powers of the roots. Among such small shortcomings of our translator may be mentioned that he appears to have erroneously derived שׁאת (Gen. iv. 7) from נשׂא; that נוכחת (xx. 6) is by him rendered אוכחת; אבירך (Gen. xli. 43) by אבא למלכא; אֶגֶד (Deut. xxiv. 5) אַגָּד; and the like. Comp. however the Commentators on these passages.

The bulk of the passages generally adduced as proofs of want of knowledge on the part of Onkelos have to a great part been shown in the course of the foregoing specimens to be intentional deviations; many other passages not mentioned merely instance the want of knowledge on the part of his critics.

Some places, again, exhibit that blending of two distinct translations, of which we have spoken; the catchword being apparently taken in two different senses. Thus Gen. xxii. 13, where he translates: "And Abraham lifted up his eyes after these, and behold there was a ram;" he has not "in his perplexity" mistranslated אחד for אחר, but he has only placed for the sake of clearness the אחר after the verb (he saw), instead of the noun (ram); and the חדא, which is moreover wanting in some texts, has been added, not as a translation of אחר or אחד, but in order to make the passage more lucid still. A similar instance of a double translation is found in Gen. ix. 6: "Whosoever sheds a man's blood, by man shall his blood be shed" — rendered "Whosoever sheds the blood of man, by witnesses through the sentence of the judges shall his blood be shed;" באדם, by man, being taken first as "witness," and then as "judges."

We may further notice the occurrence of two *Messianic* passages in this Targum: the one, Gen. xlix. 10, Shiloh; the other, Num. xxiv. 17, "sceptre:" both rendered "Messiah."

A fuller idea of the "genius" of Onkelos as translator and as paraphrast, may be arrived at from the specimens subjoined in pp. 3418–3420.

We cannot here enter into anything like a minute account of the dialect of Onkelos or of any other Targum. Regarding the linguistic shades of the different Targums, we must confine ourselves to the general remark, that the later the version, the more corrupt and adulterated its language. Three dialects, however, are chiefly to be distinguished: as in the Aramaic idiom in general, which in contradistinction to the Syriac, or Christian Aramaic, may be called Judæo-Aramaic, so also in the different Targums; and their recognition is a material aid towards fixing the place of their origin; although we must warn the reader that this guidance is not always to be relied upon.

1. The Galilean dialect, known and spoken of already in the Talmud as the one which most carelessly confounds its sounds, vowels as well as consonants. "The Galileans are negligent with respect to their language,[a] and care not for grammatical forms"[b] is a common saying in the Gemara. We learn that they did not distinguish properly between B and P (ב, פ), saying Tapula instead of Tabula, between Ch and K (כ and ק), saying χειριος for κύριος. Far less could they distinguish between the various gutturals, as is cleverly exemplified in the story where a Judæan asked a Galilean, when the latter wanted to buy an אמר, whether he meant עֲמֶר (wool), or אִמֵּר (a lamb), or חֲמַר (wine), or חֲמוֹר (an ass). The next consequence of this their disregard of the gutturals was, that they often threw them off entirely at the beginning of a word *per aphæresin*. Again they contracted, or rather wedged together, words of the most dissimilar terminations and beginnings. By confounding the vowels like the consonants, they often created entirely new words and forms. The Mappik H (ה) became Ch (somewhat similar to the Scotch pronunciation of the initial H). As the chief reason for this Galilean confusion of tongues (for which comp. Matt. xxvi. 73; Mark xiv. 70) may be assigned the increased facility of intercourse with the neighboring nations owing to their northern situation.

2. The Samaritan dialect, a mixture of vulgar Hebrew and Aramæan, in accordance with the origin of the people itself. Its chief characteristics are the frequent use of the *Ain* (which not only stands for other gutturals, but is even used as *mater lectionis*), the commutation of the gutturals in general, and the indiscriminate use of the mute consonants ב for ו, ק for כ, ת for ק, etc.

3. The Judæan or Jerusalem dialect (comp. Ned. 66 *b*) scarcely ever pronounces the gutturals at the end properly, often throws them off entirely. Jeshuâ, becomes Jeshu; Sheba — Shib. Many words are peculiar to this dialect alone. The appellations of "door,"[c] "light,"[d] "reward,"[e] etc., are totally different from those used in the other dialects. Altogether all the peculiarities of provincialism, shortening and lengthening of vowels, idiomatic phrases and words, also an orthography of its own, generally with a fuller and broader vocalization, are noticeable throughout both the Targums and the Talmud of Jerusalem, which, for the further elucidation of this point, as of many others, have as yet not found an investigator.

The following recognized Greek words, the greater part of which also occur in the Talmud and Midrash, are found in Onkelos; Ex. xxviii. 25, βῆμα λος;[f] Ex. xxviii. 11, γλυφή;[g] Gen. xxviii. 17 ἰδιώτης;[h] Lev. xi. 30, κωλώτης;[i] Ex. xxviii. 18 θράκιας[k] (Plin. xxxvii. 68); Ex. xxix. 11, Καχηδόνιοι,[l] comp. Pes. der. Kah. xxxii. (Carbun culi); Deut. xx. 20, χαράκωμα[m] (Ber. R. xcviii.)

Ex. xxviii. 20, χρῶμα;[a] Num. xv. 38, Deut. xxii. 12, κράσπεδον;[b] Ex. xxx. 34, κίστος;[c] Gen. xxxvii. 28, λῆδον;[d] Ex. xxiv. 16, φάρσος;[e] Ex. xxvi. 6, πόρπη;[f] Gen. vi. 14, κέδρος;[g] Ex. xxviii. 19, κέγχρος[h] (Plin. xxxvii. 4). To these may be added the unrecognized περαμίς[i] (Ex. xxi. 18), λιβρούχης,[k] or λεβρόχη (Gen. xxx. 14), &c.

The following short rules on the general mode of transcribing the Greek letters in Aramaic and Syriac (Targum, Talmud, Midrash, etc.), may not be out of place: —

Γ before palatals, pronounced like ν, becomes נ.

Z is rendered by ז.

H appears to have occasionally assumed the pronunciation of a consonant (Digamma); and a ו is inserted.

Θ is ת, T ט. But this rule, even making allowances for corruptions, does not always seem to have been strictly observed.

K is ק, sometimes כ.

M, which before labials stands in lieu of a ν, becomes נ: occasionally a נ is inserted before labials where it is not found in the Greek word.

Ξ, generally כס, sometimes, however, נז or נצ.

Π is פ, sometimes, however, it is softened into ב.

P is sometimes altered into ל or ב.

Ῥ becomes either רה or הר at the beginning of a word.

Σ either ס or ז.

The *spiritus asper*, which in Greek is dropped in the middle of a word, reappears again sometimes (*συνέδριον* — Sanhedrin). Even the *lenis* is represented sometimes by a ה at the beginning of a word; sometimes, however, even the *asper* is dropped.

As to the vowels no distinct rule is to be laid down, owing principally to the original want of vowel-points in our texts.

Before double consonants at the beginning of a word an א *prostheticum* is placed, so as to render the pronunciation easier. The terminations are frequently Hebraised: thus οι is sometimes rendered by the termination of the Masc. Pl. ים, etc.

A curious and instructive comparison may be instituted, between this mode of transcription of the Greek letters into Hebrew, and that of the Hebrew letters into Greek, as found chiefly in the LXX.

א sometimes inaudible (*spirit. len.*), Ἀαρών, Ἐλισαιέ; sometimes audible (as *spirit. asper*), Ἀβραάμ, Ἠλίας.

ב = β: Ῥεβέκκα; sometimes φ: Ἰακεβζήφ, sometimes υ: Ῥαούβ, sometimes μβ: Ζοροῦμβαβέλ, sometimes it is completely changed into μ: Ἰαμεῖν (2 Chr. xxvi. 6).

ג = γ: Γόμερ, sometimes κ: Δωήκ, sometimes χ: Ἱερούχ.

ד = δ: once = τ Μαιραίθ (Gen. xxxvi. 39).

ה = א, either *spirit. asp.* like Ὀδοδδά, or *spir. len.* like Ἀβέλ.

ו = υ, not the vowel, but our υ: Ἔυα, Λευί: thus also ου (as the Greek writers often express the Latin *v* by ου): Ἰεσσουέ: sometimes = β: Ἀαβώ (Gen. xiv. 5); sometimes it is entirely left out, Ἀστί for Vashti.

ז = ζ, sometimes σ: Ζαβουλών, Χασβί; rarely ξ: Βαύξ (Gen. xxii. 21).

ח, often entirely omitted, or represented by a *spir. len.* in the beginning, or the reduplication of the vowel in the middle or at the end of the word, sometimes = χ: Χάμ; sometimes = κ: Τάβεκ (Gen. xxii. 24).

ט = τ: Σαφάτ: sometimes = δ: Φούδ (Gen. x. 6); or θ: Ἐλιφαλάθ (2 Sam. v. 16).

י = ι: Ἰακώβ, or ι before ρ (ר): Ἰερεμίας. Between several vowels it is sometimes entirely omitted: Ἰωαδά.

כ = χ: Χαναάν; sometimes κ: Ζαβαθακά (Gen. x. 7); rarely = γ: Γαφθωρείμ.

ל, ב, ר = λ, ν, ρ; but they are often found interchanged, owing perhaps to the similarity of the Greek letters. נ is sometimes also rendered μ (see above).

מ = μ, sometimes β: Νεβρώθ, Ζεβλά (1 Chr. i. 47).

ש and ס = σ: Συμεών, Ζηείρ, Σίν.

ע = *spir. len.*: Ἔφραίν: sometimes = γ (ע) Γομόρρα; sometimes κ: Ἀρβώκ (Gen. xxiii. 2)

פ = φ: Φαλέγ, or π: Ζαλπαάδ.

צ = σ: Σιδών; sometimes ζ: Οὐζ (Gen. x. 23 · Cod. Alex. Ὦς; xxii. 21, Ὦξ).

ק = κ: Βαλάκ; sometimes χ: Χεττουρά; also λ: Χελέλ.

ת = θ: Ἰαφέθ; sometimes τ: Τοχός.

As to the Bible Text from which the Targum was prepared, we can only reiterate that we have no certainty whatever on this head, owing to the extraordinarily corrupt state of our Targum texts. Pages upon pages of Variants have been gathered by Cappellus, Kennicott, Buxtorf, De Rossi, Clericus, Luzzatto, and others, by a superficial comparison of a few copies only, and those chiefly printed ones. Whenever the very numerous MSS. shall be collated, then the learned world may possibly come to certain probable conclusions on it. It would appear, however, that broadly speaking, our present Masoretic text has been the one from which the Onk. Version was, if not made, yet edited, at all events; unless we assume that late hands have been intentionally busy in mutually assimilating text and translation. Many of the

---

[a] כרום (יכא) (Mich. *Lex. Syr.* 435, makes it *Persian.*)

[b] לבוש [c] כשת [d] כרוספדא

[e] פרסא [f] פורפא [g] קדרוס

[h] קנכרי [i] כורמיזא [k] יבדוזין

inferences drawn by De Rossi and others from the discrepancies of the version to discrepancies of the original from the Masor. text, must needs be rejected if Onkelos' method and phraseology, as we have exhibited it, are taken into consideration. Thus, when (Ex. xxiv. 7) "before the people" is found in Onkelos, while our Hebrew text reads "in the ears," it by no means follows that Onkelos read באזני: it is simply his way of explaining the unusual phrase, to which he remains faithful throughout. Or, "Lead the people *unto the place* (A. V.) of which I have spoken (Ex. xxxii. 34), is solely Onkelos' translation of אל אשר, *scil.* the place, and no מקום need be conjectured as having stood in Onkelos' copy; as also (Ex. ix. 7) his addition "From the cattle of '*the children of*' Israel" does not prove a בני to have stood in his Codex.

And this also settles (or rather leaves unsettled), the question as to the authenticity of the targumic texts, such as we have them. Considering that no MS. has as yet been found older than at most 600 years, even the careful comparison of all those that do exist would not much further our knowledge. As far as those existing are concerned, they teem with the most palpable blunders, — not to speak of variants, owing to sheer carelessness on the part of the copyists; — but few are of a nature damaging the sense materially. The circumstance that text and Targum were often placed side by side, column by column, must have had no little share in the incorrectness, since it was but natural to make the Targum resemble the text as closely as possible, while the nature of its material differences was often unknown to the scribe. In fact, the accent itself was made to fit both the Hebrew and the Chaldee wherever a larger addition did not render it utterly impossible. Thus letters are inserted, omitted, thrust in, blotted out, erased, in an infinite number of places. But the difference goes still further. In some Codices synonymous terms are used most arbitrarily as it would appear: ארעה and אדמתא earth, אדם and אנשא man, אורח and מהלך path, יהוה and אלהים, Jehovah and Elohim, are found to replace each other indiscriminately. In some instances, the Hebrew Codex itself has, to add to the confusion, been emendated from the Targum.

A Masorah has been written on Onkelos, without, however, any authority being inherent in it, and without, we should say, much value. It has never been printed, nor, as far as we have been able to ascertain, is there any MS. now to be found in this country, or in any of the public libraries abroad. What has become of Buxtorf's copy, which he intended to add to his never printed "Babylonia" — a book devoted to this same subject — we do not know. Luzzatto has lately found such a "Masorah" in a Pentateuch MS., but he only mentions some variants contained in it. Its title must not mislead the reader; it has nothing whatever to do with *the* Masorah of the Bible, but is a recent work, like the *Masorah of the Talmud*, which has nothing whatever to do with the Talmud text.

The MSS. of Onkelos are extant in great numbers — a circumstance easily explained by the injunction that it should be read every Sabbath at home, if not in the synagogue. The Bodleian has 5, the British Museum 2, Vienna 6, Augsburg 1, Nuremberg 2, Altdorf 1, Carlsruhe 3, Stuttgart 2, Erfurt 3, Dresden 1, Leipsic 1, Jena 1, Dessau 1, Helmstadt 2, Berlin 4, Breslau 1, Brieg 1, Regenesburg 1, Hamburg 7, Copenhagen 2, Upsala 1, Amsterdam 1, Paris 8, Molsheim 1, Venice 6, Turin 2, Milan 4, Legborn 1, Sienna 1, Genoa 1, Florence 5, Bologna 2, Padua 1, Trieste 2, Parma about 40, Rome 18 more or less complete Codd. containing Onkelos.

*Editio Princeps*, Bologna 1482, fol. (Abr. b. Chajjim) with Hebr. Text and Rashi. Later Edd. Soria 1490, Lisbon 1491, Constantinople 1505: from these were taken the texts in the Complutensian (1517) and the Venice (Bomberg) Polyglotts (1518, 1528, 1547–49), and Buxtorf's Rabbinical Bible (1619). This was followed by the Paris Polyglott (1645), and Walton's (1657). A recent and much emendated edition dates Wilna 1852.

Of the extraordinary similarity between Onkelos and the Samaritan version we have spoken under SAMARITAN PENTATEUCH [p. 2813]. There also will be found a specimen of both, taken from the Barberini Codex. Many more points connected with Onkelos and his influence upon later hermeneutics and exegesis, as well as his relation to earlier or later versions, we have no space to enlarge upon, desirable as an investigation of these points might be. We have, indeed, only been induced to dwell so long upon this single Targum, because in the first instance a great deal that has been said here will, *mutatis mutandis*, hold good also for the other Targums; and further, because Onkelos is THE CHALDEE VERSION *κατ' ἐξοχήν*, while, from Jonathan downwards, we more and more leave the province of Version and gradually arrive from Paraphrase to Midrash-Haggadah. We shall therefore not enter at any length into these, but confine ourselves chiefly to main results.

## II. TARGUM ON THE PROPHETS,

Namely, Joshua, Judges, Samuel, Kings, Isaiah, Jeremiah, Ezekiel, and the twelve Minor Prophets — called TARGUM OF JONATHAN BEN UZZIEL.

Next in time and importance to Onkelos on the Pentateuch stands the Targum on the Prophets, which in our printed Edd. and MSS. — none older, we repeat it, than about 600 years — is ascribed to Jonathan ben Uzziel, of whom the Talmud contains the following statements: (1.) "Eighty disciples had Hillel the Elder, thirty of whom were worthy that the Shechinah (Divine Majesty) should rest upon them, as it did upon Moses our Lord; peace be upon him. Thirty of them were worthy that the sun should stand still at their bidding as it did at that of Joshua ben Nun. Twenty were of intermediate worth. The greatest of them all was Jonathan ben Uzziel, the least R. Johanan ben Saccai; and it was said of R. Johanan b. Saccai, that he left not (uninvestigated) the Bible, the Mishna, the Gemara, the Halachahs, the Haggadahs, the subtleties of the Law, and the subtleties of the Soferim . . . . ; the easy things and the difficult things [from the most awful Divine mysteries to the common popular proverbs] . . . . If this is said of the least of them, what is to be said of the greatest, *i. e.* Jonathan b. Uzziel?" (Bab. Bath. 134 *a*; comp. Succ. 28 *a*.) (2.) A second passage (see Onkelos) referring more especially to our present subject, reads as follows: "The Targum of Onkelos was made by Onkelos the Proselyte from the mouth of R. Eliezer and R. Jehoshua

Digitized by Google

and that of the Prophets by Jonathan b. Uzziel from the mouth of Haggai, Zechariah, and Malachi. And in that hour was the land of Israel shaken three hundred parasangs. . . . . And a voice was heard, saying, 'Who is this who has revealed my secrets unto the sons of man?' Up rose Jonathan ben Uzziel and said: 'It is I who have revealed thy secrets to the sons of man. . . . But it is known and revealed before Thee, that not for my honor have I done it, nor for the honor of my father's house, but for thine honor; that the disputes may cease in Israel.' . . . . And he further desired to reveal the Targum to the Hagiographa, when a voice was heard: 'Enough.' And why? — because the day of the Messiah is revealed therein (Meg. 3 *a*)." Wonderful to relate, the sole and exclusive authority for the general belief in the authorship of Jonathan b. Uzziel, is this second Haggadistic passage exclusively; which, if it does mean anything, does at all events not mean our Targum, which is found mourning over the "Temple in ruins," full of invectives against Rome (Sam. xi. 5; Is. xxxiv. 9, &c., &c.), mentioning Armillus (Is. x. 4) (the Antichrist), Germania (Ps. xxxviii. 6): not to dwell upon the thousand and one other internal and external evidences against a date anterior to the Christian era. If interpolations must be assumed, — and indeed Rashi speaks already of corruptions in his MSS. — such solitary additions are at all events a very different thing from a wholesale system of intentional and minute interpolation throughout the bulky work. But what is still more extraordinary, this belief — long and partly still upheld most reverentially against all difficulties — is completely modern: that is, not older than at most 600 years (the date of our oldest Targum MSS.), and is utterly at variance with the real and genuine sources: the Talmud, the Midrash, the Babylonian Schools, and every authority down to Hai Gaon (12th cent.). Frequently quoted as this Targum is in the ancient works, it is never once quoted as the Targum of Jonathan. But it is invariably introduced with the formula: "R. Joseph [a] (bar Chama, the Blind, euphemistically called the clear-sighted, the well-known President of Pumbaditha in Babylonia, who succeeded Rabba in 319 A. D) says," etc. (Moed Katon 26 *a*, Pesach. 68 *a*, Sanh. 94 *b*). Twice even it is quoted in Joseph's name, and with the addition, "Without the Targum to this verse (due to him) we could not understand it." This is the simple state of the case: and for more than two hundred years critics have lavished all their acumen to defend what never had any real existence, or at best owed its apparent existence to a reading added by a superficial scribe.

The date which the Talmud thus in reality assigns to our Targum fully coincides with our former conclusions as to the date of written Targums in general. And if we may gather thus much from the legend that to write down the Targum to the Prophets was considered a much bolder undertaking — and one to which still more reluctantly leave was given — than a Targum on the Pentateuch, we shall not be far wrong in placing *this* Targum some time, although not long, after Onkelos, or about the middle of the fourth century; — the latter years of R. Joseph, who it is said, occupied himself chiefly with the Targum when he had become blind. The reason given for that reluctance is, although hyperbolically expressed, perfectly clear: "The Targum on the Prophets revealed the secrets" — that is, it allowed free scope to the wildest fantasy to run riot upon the prophetic passages — tempting through their very obscurity, — and to utter explanations and interpretations relative to present events, and oracles of its own for future times, which might be fraught with grave dangers in more than one respect. The Targum on the Pentateuch (permitted to be committed to writing, Meg. 3 *a*; Kidd. 69 *a*) could not but be, even in its written form, more sober, more dignified, more within the bounds of fixed and well-known traditions, than any other Targum; since it had originally been read publicly, and been checked by the congregation as well as the authorities present; — as we have endeavored to explain in the Introduction. There is no proof, on the other hand, of more than fragments from the Prophets having ever been read and translated in the synagogue. Whether, however, R. Joseph was more than the redactor of this the second part of the Bible-Targum, which was originated in Palestine, and was reduced to its final shape in Babylon, we cannot determine. He may perhaps have made considerable additions of his own, by filling up gaps or rejecting wrong versions of some parts. So much seems certain, that the schoolmen of his Academy were the collectors and revisers, and he gave it that stamp of unity which it now possesses, spite of the occasional difference of style: adapted simply to the variegated hues and dictions of its manifold Biblical originals.

But we do not mean to reject in the main either of the Talmudical passages quoted. We believe that there was such a man as Jonathan b. Uzziel, that he was one of the foremost pupils of Hillel, and also that he did translate, either privately or publicly, parts of the prophetical books; chiefly, we should say, in a mystical manner. And so startling were his interpretations — borne aloft by his high fame — that who but prophets themselves could have revealed them to him? And, going a step further, who could reveal prophetic allegories and mysteries of *all* the prophetic books, but those who, themselves the last in the list, had the whole body of sacred oracles before them? This appears to us the only rational conclusion to be drawn from the facts: as they stand, not as they are imagined. That nothing save a few snatches of this *original* paraphrase or Midrash could be embodied in our Targum, we need not urge. Yet for these even we have no proof. Zunz, the *facile princeps* of Targumic as well as Midrashic investigation, who, as late as 1830 (*Gottesd. Vortr.*), still believed himself in the modern notion of Jonathan's authorship ("first half of first century, A. D."), now utterly rejects the notion of "our possessing *anything* of Jonathan ben Uzziel" (Geiger's *Zeitschr.* 1837, p. 250).

Less conservative than our view, however, are the views of the modern school (Rappoport, Luzzatto, Frankel, Geiger, Levy, Bauer, Jahn, Bertholdt, Levysohn, etc.), who not only reject the authorship of Jonathan, but also utterly deny that there was any ground whatsoever for assigning a Targum to him, as is done in the Talmud. The passage, they say is not older, but younger than our Targum, and in fact does apply, erroneously of course, to this, and to no other work of a similar kind. The popular cry for a great "name, upon

[a] "Sinai," "Possessor of Wheat," in allusion to his vast mastery over the traditions.

Digitized by Google

which to hang" — in Talmudical phraseology — all that is cherished and venerated, and the wish of those eager to impart to this Version a lasting authority, found in Jonathan the most fitting person to father it upon. Was he not the greatest of the great, "who had been dusted with the dust of Hillel's feet?" He was the wisest of the wise, the one most imbued with knowledge human and divine, of all those eighty, the least of whom was worthy that the sun should stay its course at his bidding. Nay, such were the flames [a] that arose from his glowing spirit, says the hyperbolic Haggadah, that "when he studied in the Law, the very birds that flew over him in the air, were consumed by fire" (*nisrephu* [b] — not, as Landau, in the preface to his Aruch, apologetically translates, *became Seraphs*). At the same time we readily grant that we see no reason why the great Hillel himself, or any other much earlier and equally eminent Master of the Law, one of the Soferim perhaps, should not have been fixed upon.

Another suggestion, first broached by Drusius, and long exploded, has recently been revived under a somewhat modified form. Jonathan (Godgiven), Drusius said, was none else but Theodotion (Godgiven), the second Greek translator of the Bible after the LXX., who had become a Jewish proselyte. Considering that the latter lived under Commodus II., and the former at the time of Christ; that the latter is said to have translated the Prophets only (neither the Pentateuch, nor the Hagiographa), while the former translated the *whole* Bible; that Jonathan translated into Aramaic and Theodotion into Greek, — not to mention the fact that Theodotion was, to say the least, a not very competent translator, since "ignorance or negligence" (Montfaucon, *Pref. to Hexapla*), or both, must needs be laid at the door of a translator, who, when in difficulties, simply transcribes the hard Hebrew words into Greek characters, without troubling himself any further; [c] while the mastery over both the Hebrew and the Aramaic displayed in the Jonathanic Version are astounding: — considering all this, we need not like Walton ask caustically, why Jonathan ben Uzziel should not rather be identified with the Emperor Theodosius, whose name also is "Godgiven;" — but dismiss the suggestion as Carpzov long since dismissed it. We are, however, told now (Luzzatto, Geiger, etc.), that as the Babylonian Targum on the Pentateuch was called a Targum "in the manner of Aquila or Onkelos," *i. e.* of sterling value, so also the continuation of the Babylonian Targum, which embraced the Prophets, was called a Targum "in the manner of Theodotion" = Jonathan; and by a further stretch, Jonathan-Theodotion became the Jonathan b. Uzziel. We cannot but disagree with this hypothesis also — based on next to nothing, and carried to more than the usual length of speculation. While Akyla is quoted continually in the Talmud, and is deservedly one of the best known and best beloved characters, every trait and incident of whose personal history is told even twice over, not the slightest trace of such a person as Theodotion is to be found anywhere in the Talmudical literature. What, again, was it that could have acquired so transcendent a fame for his translation and himself that a Version put into the mouths of the very prophets should be called after him, "in order that the people should like it"? — a translation which was, in fact, deservedly unknown, and, properly speaking, no translation at all. It was, as we learn, a kind of private emendation of some LXX. passages, objectionable to the pious proselyte in their then corrupted state. It was only the book of Daniel which was retained from Theodotion's pen, because in this book the LXX. had become past correction. If, moreover, the intention was "to give the people a Hebrew for a Greek name, because the latter might sound too foreign," it was an entirely gratuitous one. Greek names abound in the Talmud, and even names beginning with Theo like Theodorus are to be found there.

On the other hand, the opinion has been broached that this Targum was a post-Talmudical production, belonging to the 7th or 8th cent. A. D. For this point we need only refer to the Talmudical quotations from it. And when we further add, that Jo. Morinus, a man as conspicuous by his want of knowledge as by his most ludicrous attacks upon all that was "Jewish" or "Protestant" (it was he, *e. g.* who wished to see the "forged" Masoretic Code corrected from the Samaritan Pentateuch, *q. v.*), is the chief, and almost only, defender of this theory, we have said enough. On the other theory of there being more than one author to our Targum (Eichhorn, Bertholdt, De Wette), combated fiercely by Gesenius, Hävernick, and others, we need not further enlarge, after what we have already said. It certainly is the work, not of one, or of two, but of twenty, of fifty and more Meturgemanim, Haggadists, and Halachists. The edition, however, we repeat it advisedly, has the undeniable stamp of one master-mind; and its individual workings, its manner and peculiarity are indelibly impressed upon the whole labor from the first page to the last. Such, we hold, must be the impression upon every attentive reader; more especially, if he judiciously distinguishes between the first and the last prophets. That in the historical relations of the former, the Version must be, on the whole, more accurate and close (although here too, as we shall show, Haggadah often takes the reins out of the Meturgeman's or editor's hands), while in the obscurer Oracles of the latter the Midrash reigns supreme — is exactly what the history of Targumic development leads us to expect.

And with this we have pointed out the general character of the Targum under consideration. Gradually, perceptibly almost, the translation becomes the *τράγημα*, a frame, so to speak, of allegory, parable, myth, tale, and oddly masked history — such as we are wont to see in Talmud and Midrash, written under the bloody censorship of Esau-Rome; interspersed with some lyrical pieces of rare poetical value. It becomes, in short, like the Haggadah, a whole system of eastern phantasmagorias whirling round the sun of the Holy Word

of the Seer. Yet, it is always aware of being a translation. It returns to its verse after long excursus, often in next to no perceptible connection with it. Even in the midst of the full swing of fancy, swayed to and fro by the many currents of thought that arise out of a single word, snatches of the verse from which the flight was taken will suddenly appear on the surface like a refrain or a keynote, showing that in reality there is a connection, though hidden to the uninitiated. For long periods again, it adheres most strictly to its text and to its verse, and translates most conscientiously and closely. It may thus fairly be described as holding in point of interpretation and enlargement of the text, the middle place between Onkelos, who only in extreme cases deviates into paraphrase, and the subsequent Targums, whose connection with their texts is frequently of the most flighty character. Sometimes indeed our Targum coincides so entirely with Onkelos, — being, in fact, of one and the same origin and growth, and a mere continuation and completion as it were of the former work, that this similarity has misled critics into speculations of the priority in date of either the one or the other. Hävernick, *e. g.* holds — against Zunz — that Onkelos copied, plagiarised in fact, Jonathan. We do not see, quite apart from our placing Onkelos first, why either should have used the other. The three passages (Judg. v. 26 and Deut. xxii. 5; 2 K. xiv. 6 and Deut. xxiv. 16; Jer. xlviii. 45, 46 and Num. xxi. 28, 29) generally adduced, do not in the first place exhibit that literal closeness which we are led to expect, and which alone could be called "copying;" and in the second place, the two last passages are not, as we also thought we could infer from the words of the writers on either side, extraneous paraphrastic additions, but simply the similar translations of similar texts: while in the first passage Jonathan only refers to an injunction contained in the Pentateuch-verse quoted. But even had we found such paraphrastic additions, apparently not belonging to the subject, we should have accounted for them by certain traditions — the common property of the whole generation — being recalled by a certain word or phrase in the Pentateuch to the memory of the *one* translator; and by another word or phrase in the Prophets to the memory of the *other* translator. The interpretation of Jonathan, where it adheres to the text, is mostly very correct in a philosophical and exegetical sense, closely literal even, provided the meaning of the original is easily to be understood by the people. When, however, similes are used, unfamiliar or obscure to the people, it unhesitatingly dissolves them and makes them easy in their mouths like household words, by adding as much of explanation as seems fit; sometimes, it cannot be denied, less sagaciously, even incorrectly, comprehending the original meaning. Yet we must be very cautious in attributing to a version which altogether bears the stamp of thorough competence and carefulness that which may be single corruptions or interpolations, as we find them sometimes indicated by an introductory "Says the Prophet:" [a] although, as stated above, we do not hesitate to attribute the passages displaying an acquaintance with works written down to the 4th century, and exhibiting popular notions current at that time, to the Targum in its original shape. Generally speaking, and holding the difference between the nature of the Pentateuch (supposed to contain in its very letters and signs Halachistic references, and therefore only to be handled by the Meturgeman with the greatest care) and that of the Prophets (freest Homiletes themselves) steadily in view — the rules laid down above with respect to the discrepancies between original and Targum, in Onkelos, hold good also with Jonathan. Anthropomorphisms it avoids carefully. Geographical names are, in most cases, retained as in the original, and where translated, they are generally correct. Its partiality for Israel never goes so far that anything derogatory to the character of the people should be willingly suppressed, although a certain reluctance against dwelling upon its iniquities and punishments longer than necessary, is visible. Where, however, that which redounds to the praise of the individual — more especially of heroes, kings, prophets — and of the community, is contained in the text, there the paraphrase lovingly tarries. Future bliss, in this world and the world to come, liberation from the oppressor, restoration of the Sanctuary on Mount Zion, of the Kingdom of Jehovah and the House of David, the reëstablishment of the nation and of its full and entire independence, as well as of the national worship, with all the primitive splendor of Priest and Levite, singer and musician and prophet — these are the favorite dreams of the people and of Jonathan, and no link is overlooked by which those strains may be drawn in as variations to the Biblical theme. Of Messianic passages, Jonathan has pointed out those mentioned below; [b] a number not too large, if we consider how, with the increased misery of the people, their ardent desire to see their Deliverer appear speedily must have tried to find as many places in the Bible as possible, warranting his arrival. So far from their being suppressed (as, by one of those unfortunate accidents that befall sometimes a long string of *investigators*, who are copying their information at third and fourth hand, has been unblushingly asserted by almost everybody up to Gesenius, who found its source in a *misunderstood sentence of Carpzov*), they are most prominently, often almost pointedly brought forward. And there is a decided polemical animus inherent in them — temperate as far as appearance goes, but containing many an unspoken word: such as a fervent human mind pressed down by all the woes and terrors, written and unwritten, would whisper to itself in the depths of its despair. These passages extol most rapturously the pomp and glory of the Messiah to come — by way of contrast to the humble appearance of Christ: and in all the places where suffering and misery appear to be the lot forecast to the Anointed, it is Israel, to whom the passage is referred by the Targum.

Of further dogmatical and theological peculiarities (and this Targum will one day prove a mine of instruction chiefly in that direction, besides the other vast advantages inherent in it, as in the older Targums, for linguistic, patristic, geographical, historical, and other studies) we may mention briefly the "Stars of God" (Is. xiv. 13; comp. Dan. viii

[a] אמר נביאָא.

[b] 1 Sam. ii. 10; 2 Sam. xxiii. 3; 1 K. iv. 33; Is. v 2. ix. 6, x. 27, xi. 1, 6, xv. 2, xvi. 1, 5, xxviii. 5, xlii. 1, xliii. 10, xlv. 1, lii. 13, liii. 10; Jer. xxiii. 5, xxx. 21, xxxiii. 13, 15; Hos. iii. 5, xiv. 8; Mic. iv 8, v. 2, 13; Zech. iii 8, iv. 7, vi. 12, x. 4.

Digitized by Google

10; 2 Macc. ix. 10, being referred — in a similar manner — to "the people of Israel"); the doctrine of the second death (Is. xxii. 14, lxv. 15), etc. As to the general nature of its idiom, what we have said above holds good here. Likewise our remarks on the relation between the text of the original of Onkelos, and its own text, may stand for Jonathan, who never appears to differ from the Masoretic text without a very cogent reason. Yet, since Jonathan's MSS., though very much smaller in number, are in a still worse plight than those of Onkelos, we cannot speak with great certainty on this point. Respecting, however, the individual language and phraseology of the translation, it looks to a certain, though small degree, the clearness and transparency of Onkelos; and is somewhat alloyed with foreign words. Not to such a degree, however, that we cannot fully indorse Carpzov's dictum: "Cujus nitor sermonis Chaldaei et dictionis laudatur puritas, ad Onkelosum proxime accedens et parum deflectens a puro tersoque Chaldaismo biblico" (*Crit. Sacr.* p. 461), and incline to the belief of Wolf (*Bibl. Hebr.* ii. 1165): "Quæ vero, vel quod ad voces novas et barbaras, vel ad res aetate ejus inferiores, aut futilia nonnulla, quamvis pauca triplicis hujus generis exstent, ibi occurrunt, ex merito falsarii cujusdam ingenio adscribuntur." Of the manner and style of this Targum, the few subjoined specimens will we hope give an approximate idea.

In conclusion, we may notice a feature of our Targum, not the least interesting perhaps, in relation to general or "human" literature: namely, that the Shemitic fairy and legendary lore, which for the last two thousand years — as far as we can trace it — has grown up in East and West to vast glittering mountain-ranges, is to a very great extent to be found, in an embryo state, so to say, in this our Targum. When the literary history of those most wonderful circles of mediæval sagas — the sole apparent fruit brought home by the crusaders from the eastern battle-fields — shall come to be written by a competent and thorough investigator, he will have to extend his study of the sources to this despised "fabulosus" Targum Jonathan ben Uzziel. And the entire world of pious Biblical legend, which Islam has said and sung in the Arabic, Persian, Turkish, and all its other tongues, to the delight of the wise and the simple for twelve centuries now, is contained almost fully developed, from beginning to end, but clearer, purer, and incomparably more poetically conceived, in our Targum-Haggadah.

The *Editio Princeps* dates Leiria, 1494. The later editions are embodied in the Antwerp, Paris, and London Polyglotts. Several single books have likewise been repeatedly edited (comp. Wolf, Le Long, Rosenmüller, etc.).

JUDGES V.

| Authorised Version. | Targum [Jonathan-ben-Uzziel] To the Prophets. |
|---|---|
| 1 Then sang Deborah and Barak the son of Abinoam on that day, saying, | 1 And Deborah and Barak the son of Abinoam gave praise for the miracle and the salvation which were wrought for Israel on that day, and spake: |
| 2 Praise ye the Lord for the avenging of Israel, when the people willingly offered themselves. | 2 When the children of Israel rebel against the Law, then the nations come over them and drive them out of their cities; but when they return to do the Law, then they are mighty over their enemies and drive them out from the whole territory of the land of Israel. Thus has been broken Sisera and all his armies to his punishment, and to a miracle and a salvation for Israel. Then the wise returned to sit in the houses of the synagogue . . . . and to teach unto the people the doctrine of the Law. Therefore praise ye and bless the Lord. |
| 3 Hear, O ye kings; give ear, O ye princes; I, *even* I, will sing unto the Lord; I will sing *praise* to the Lord God of Israel. | 3 Hear, ye kings (ye who came with Sisera to the battle-array), listen, ye rulers [ye who were with Jabin the king of Kenaan: not with your armies nor with your power have ye conquered and become mighty over the house of Israel] — said Deborah in prophecy before God: I praise, give thanks and blessings before the Lord, the God of Israel. |
| 4 Lord, when thou wentest out of Seir, when thou marchedst out of the field of Edom, the earth trembled, and the heavens dropped, the clouds also dropped water. | 4 [O Lord, Thy Law which Thou gavest to Israel, when they transgress it, then the nations rule over them: but when they return to it, then they become powerful over their enemies.] O Lord, on the day when Thou didst reveal Thyself to give it unto them from Seir, Thou becamest manifest unto them in the splendor of Thy glory over the territories of Idom: the earth trembled, the heavens showered down, the clouds dropped rain. |
| 5 The mountains melted from before the Lord, *even* that Sinai from before the Lord God of Israel. | 5 The mountains trembled before the Lord, the mountains of Tabor, the mountains of Hermon, and the mountain of Carmel, spake with each other, and said one to the other: Upon me the Shechinah will rest, and to me will It come. But the Shechinah rested upon Mount Sinai, which is the weakest and smallest of all the mountains. . . . . This Sinai trembled and shook, and its smoke went up as goes up the smoke of an oven: because of the glory of the God of Israel which had manifested itself upon it. |
| 6 In the days of Shamgar the son of Anath, in the days of Jael, the highways were unoccupied, and the travellers walked through byways. | 6 When they transgressed in the days of Shamgar the son of Anath in the days of Jael, ceased the wayfarers: they who had walked in well-prepared ways had again to walk in furtive paths. |
| 7 *The inhabitants of* the villages ceased, they ceased in Israel, until that I Deborah arose, that I arose a mother in Israel. | 7 Destroyed were the open cities of the land of Israel: their inhabitants were shaken off and driven about, until I, Deborah, was sent to prophesy over the house of Israel. |
| 8 They chose new gods; then *was* war in the | 8 When the children of Israel went to pray unto new idols [errors which recently had come to be |

|---|---|
| 39 And it came to pass, at the end of two months, that she returned unto her father, who did with her *according* to his vow which he had vowed: and she knew no man. And it was a custom in Israel. | 39 And it was at the end of two months, and she returned to her father, and he did unto her according to the vow which he had vowed: and she had known no man. And it became a statute in Israel. |
| | *Addition* (הוספת), that no man should offer up his son or his daughter as a burnt-offering, as Jephta the Gileadite did, who asked not Phinehas the priest. If he had asked Phinehas the priest, then he would have dissolved his vow with money [for animal sacrifices]. |

### 1 SAM. II.

| | |
|---|---|
| 1 And Hannah prayed, and said, My heart rejoiceth in the LORD; mine horn is exalted in the LORD; my mouth is enlarged over mine enemies; because I rejoice in thy salvation | 1 And Hannah prayed in the spirit of prophecy, and said: [Lo, my son Samuel will become a prophet over Israel; in his days they will be freed from the hand of the Philistines; and through his hands shall be done unto them wondrous and mighty deeds: therefore] be strong, my heart, in the portion which God gave me. [And also Heman the son of Joel, the son of my son Samuel, shall arise, he and his fourteen sons, to say praise with nablia (harps?) and cythers, with their brethren the Levites, to sing in the house of the sanctuary: therefore] Let my horn be exalted in the gift which God granted unto me. [And also on the miraculous punishment that would befall the Philistines who would bring back the ark of the Lord in a new chariot, together with a sin-offering: therefore let the congregation of Israel say] I will open my mouth to speak great things over my enemies; because I rejoice in thy salvation. |
| 2 *There is* none holy as the LORD: for *there is* none beside thee, neither *is there* any rock like our God. | 2 [Over Sanherib the king of Ashur did she prophesy, and she said: He will arise with all his armies over Jerusalem, and a great sign will be done with him. There shall fall the corpses of his troops: Therefore praise ye all the peoples, and nations and tongues, and cry]: There is none holy but God; there is not beside Thee; and Thy people shall say, There is none mighty but our God. |
| 3 Talk no more so exceeding proudly; let *not* arrogancy come out of your mouth: for the LORD *is* a God of knowledge, and by him actions are weighed. | 3 [Over Nebuchadnezzar the king of Babel did she prophesy and say: Ye Chaldeans, and all nations who will once rule over Israel] Do not speak grandly; let no blasphemy go out from your mouth: for God knows all, and over all his servants he extends his judgment; also from you he will take punishment of your guilt. |
| 4 The bows of the mighty *are* broken, and they that stumbled are girded with strength. | 4 [Over the kingdom Javan she prophesied and said] The bows of the mighty ones [of the Javanites] will be broken; [and those of the house of the Asmoneans] who are weak, to them will be done miracles and mighty deeds. |

| | done for you that you made him king over you? If he is a valiant man, let him come out and do battle with me; but if he is a weak man], then choose for yourselves a man, and let him come out against me, etc. |
| **1 KINGS XIX.** | |
| 11, 12 And he said, Go forth, and stand upon the mount before the Lord. And, behold, the Lord passed by, and a great and strong wind rent the mountains, and brake in pieces the rocks, before the Lord; *but* the Lord *was* not in the wind: and after the wind an earthquake; *but* the Lord *was* not in the earthquake: And after the earthquake a fire; *but* the Lord *was* not in the fire: and after the fire a still small voice. | 11, 12 And he said [to Elijah], Arise and stand on the mountain before the Lord. And God revealed himself: and before him a host of angels of the wind, cleaving the mountain and breaking the rocks before the Lord; but not in the host of angels was the Shechinah. And after the host of the angels of the wind came a host of angels of commotion; but not in the host of the angels of commotion was the Shechinah of the Lord. And after the host of the angels of commotion came a host of angels of fire; but not in the host of the angels of fire was the Shechinah of the Lord. But after the host of the angels of the fire came voices singing in silence. |
| 13 And it was *so*, when Elijah heard *it*, that he wrapped his face in his mantle, and went out, and stood in the entering in of the cave: and, behold, *there came* a voice unto him, and said, What doest thou here, Elijah? | 13 And it was when Elijah heard this, he hid his face in his mantle, and he went out and he stood at the door of the cave; and, lo! with him was a voice, saying, What doest thou here, O Elijah! etc. |
| **ISAIAH XXXIII.** | |
| 22 For the Lord *is* our judge, the Lord *is* our lawgiver, the Lord *is* our king; he will save us. | 22 For the Lord is our judge, who delivered us with his power from Mizraim; the Lord is our teacher, for He has given us the doctrine of the Torah from Sinai; the Lord is our king: He will deliver us, and give us righteous restitution from the army of Gog. |
| **JEREM. X.** | |
| 11 Thus shall ye say unto them, The gods that have not made the heavens and the earth, even they shall perish from the earth, and from under these heavens. | 11 This is the copy of the letter which Jeremiah the prophet sent to the remaining ancient ones of the captivity in Babel: "And if the nations among whom you are will say unto you, Pray to our Errors — O house of Israel, then you shall answer thus, and speak in this wise: The Errors unto which you pray are Errors which are of no use: they cannot rain from heaven; they cannot cause fruit to grow from the earth. They and their worshippers will perish from the earth, and will be destroyed from under these heavens. |
| **MICAH VI.** | |
| 4 For I brought thee up out of the land of Egypt, and redeemed thee out of the house of servants; and I sent before thee Moses, Aaron, and Miriam. | 4 For I have taken thee out from the land of Mizraim, and have released thee from the house of thy bondage: and have sent before thee three prophets: Moses, to teach thee the tradition of the ordinances; Aaron, to atone for the people; and Miriam, to teach the women. |

III. and IV. Targum of Jonathan Ben-Uziel and Jerushalmi-Targum on the Pentateuch.

Onkelos and Jonathan on the Pentateuch and Prophets, whatever be their exact date, place, authorship and editorship, are, as we have endeavored to show, the oldest of existing Targums, and belong, in their present shape, to Babylon and the Babylonian academies flourishing between the 3d and 4th centuries A. D. But precisely as two parallel and independent developments of the oral Law (תשבפ) have sprung up in the Palestinian and Babylonian Talmuds respectively, so also recent investigation has proved to demonstration the existence of two distinct cycles of Targums on the written Law (תשבכתב) — *i. e.* the entire body of the Old Testament. Both are the offspring of the old, primitive institution of the public "reading and translating of the Torah," which for many hundred years had its place in the Palestinian synagogues. The one first collected, revised, and edited in Babylon, called — more especially that part of it which embraced the Pentateuch (Onkelos) — the Babylonian, *Ours*, by way of eminence, on account of the superior authority inherent in all the works of the Madinchae (Babylonians, in contradistinction to the Maarbae or Palestinians). The other, continuing its oral life, so to say, down to a much later period, was written and edited — less carefully, or rather with a much more faithful retention of the oldest and youngest fancies of Meturgemanim and Darshanim — on the soil of Judea itself. Of this entire cycle, however, the Pentateuch and a few other books and fragmentary pieces only have survived entire, while of most of the other books of the Bible a few detached fragments are all that is known, and this chiefly from quotations. The injunction above mentioned respecting the sabbatical reading of the Targum on the Pentateuch — nothing is said of the Prophets — explains the fact, to a certain extent, how the Pentateuch Targum

Digitized by Google

has been religiously preserved, while the others have perished. This circumstance, also, is to be taken into consideration, that Palestine was in later centuries well-nigh cut off from communication with the Diaspora, while Babylon, and the gigantic literature it produced, reigned paramount over all Judaism, as, indeed, down to the 10th century, the latter continued to have a spiritual leader in the person of the Resh Gelutha (Head of the Golah), residing in Babylon. As not the least cause of the loss of the great bulk of the Palestinian Targum may also be considered the almost uninterrupted martyrdom to which those were subjected who preferred, under all circumstances, to live and die in the Land of Promise.

However this may be, the Targum on the Pentateuch has come down to us: and not in one, but in two recensions. More surprising still, the one hitherto considered a fragment, because of its embracing portions only of the individual books, has in reality never been intended to embrace any further portion, and we are thus in the possession of two Palestinian Targums, preserved in their original forms. The one, which extends from the first verse of Genesis to the last of Deuteronomy, is known under the name of Targum Jonathan (ben Uzziel) or Pseudo-Jonathan on the Pentateuch. The other, interpreting single verses, often single words only, is extant in the following proportions: a third on Genesis, a fourth on Deuteronomy, a fifth on Numbers, three twentieths on Exodus, and about one fourteenth on Leviticus. The latter is generally called Targum *Jerushalmi*, or, down to the 11th century (Hai Gaon, Chananel), *Targum Erets Israel*, Targum of Jerusalem or of the land of Israel. That Jonathan ben Uzziel, the same to whom the prophetical Targum is ascribed, and who is reported to have lived either in the 5th-4th century B. C., or about the time of Christ himself (see above), could have little to do with a Targum which speaks of Constantinople (Num. xxiv. 19, 24), describes very plainly the breaking-up of the West-Roman Empire (Num. xxiv. 19–24), mentions the Turks (Gen. x. 2), and even Mohammed's two wives, Chadidja and Fatime (Gen. xxi. 21), and which exhibits not only the fullest acquaintance with the edited body of the Babylonian Talmud, by quoting entire passages from it, but adopts its peculiar phraseology — not to mention the complete disparity between the style, language, and general manner of the Jonathanic Targum on the Prophets, and those of this one on the Pentateuch, strikingly palpable at first sight, — was recognized by early investigators (Morinus, Pfeiffer, Walton, etc.), who soon overthrew the old belief in Jonathan b. Uzziel's authorship, as upheld by Menahem Recanati, Azariah de Rossi, Gedaljah, Galatin, Fagius, etc. But the relation in which the two Targums, so similar and yet so dissimilar, stood to each other, how they arose, and where and when — all these questions have for a long time, in the terse words of Zunz, caused many of the learned such dire misery, that whenever the "Targum Hierosolymitanum" comes up, they, instead of information on it and its twin-brother, prefer to treat the reader to a round volley of abuse of them. Not before the first half of this century did the fact become fully and incontestably established (by the simple process of an investigation of the sources), that both Targums were in reality one — that both were known down to the 14th century under no other name than Targum Jerushalmi — and that some forgetful scribe about that time must have taken the abbreviation "ת"י – '*T. J.*' over one of the two documents, and, instead of dissolving it into Targum-Jerushalmi, dissolved it erroneously into what he must till then have been engaged in copying — namely, Targum-Jonathan, sc. ben Uzziel (on the Prophets). This error, fostered by the natural tendency of giving a well-known and far-famed name — without inquiring too closely into its accuracy — to a hitherto anonymous and comparatively little known version, has been copied again and again, until it found its way, a hundred years later, into print. Of the intermediate stage, when only a few MSS. had received the new designation, a curious fact, which Azariah de Rossi (Cod. 37 *b*) mentions, gives evidence. "I saw," he says, "two complete Targums on the whole Pentateuch, word for word alike; one in Reggio, which was described in the margin, 'Targum of Jonathan b. Uzziel;' the other in Mantua, described at the margin as 'Targum Jerushalmi.'" In a similar manner quotations from either in the Aruch confound the designation. Benjamin Mussaphia (d. 1674), the author of additions and corrections to the Aruch, has indeed pronounced it as his personal conjecture that both may be one and the same, and Drusius, Mendelssohn, Rappoport, and others shared his opinion. Yet the difficulty of their obvious dissimilarity, if they were identical, remained to be accounted for. Zunz tries to solve it by assuming that Pseudo-Jonathan is the original Targum, and that the fragmentary Jerushalmi is a collection of variants to it. The circumstance of its also containing portions identical with the codex, to which it is supposed to be a collection of readings, he explains by the negligence of the transcriber. Frankel, however, followed by Traub and Levysohn, has gone a step further. From the very identity of a proportionately large number of places, amounting to about thirty in each book, and from certain palpable and consistent differences which run through both recensions, they have arrived at a different conclusion, which seems to carry conviction on the face of it, namely, that Jerushalmi is a collection of emendations and additions to single portions, phrases, and words of Onkelos, and Pseudo-Jonathan a further emendated and completed edition to the whole Pentateuch of Jerushalmi-Onkelos. The chief incentive to a new Targum on the Pentateuch (that of Onkelos being well known in Palestine), was, on the one hand, the wish to explain such of the passages as seemed either obscure in themselves or capable of greater adaptation to the times; and on the other hand the great and paramount desire for legendary lore, and ethical and homiletical motives, intertwined with the very letter of Scripture, did not and could not feel satisfied with the (generally) strictly literal version of Onkelos, as soon as the time of eccentric, prolix, oral Targums had finally ceased in Palestine too, and written Targums of Babylon were introduced as a substitute, once for all. Hence variants, exactly as found in Jerushalmi, not to the whole of Onkelos, but to such portions as seemed most to require "improvement" in the direction indicated. And how much this thoroughly paraphrastic version was preferred to the literal is, among other signs, plainly visible from the circumstance that it is still joined, for instance, to the reading of the Decalogue on the Feast of Weeks in the synagogue. At a later period the gaps were filled up, and the whole of the exist-

Digitized by Google

ing Jerushalmi was recast, as far again as seemed fitting and requisite. This is the Jonathan, so called for the last four hundred years only. And thus the identity in some, and the divergence in other places finds its most natural solution.

The Jerushalmi, in both its recensions, is written in the Palestinensian dialect, the peculiarities of which we have briefly characterized above. It is older than the Masora and the conquest of Western Asia by the Arabs. Syria or Palestine must be its birthplace, the second half of the 7th century its date, since the instances above given will not allow of any earlier time. Its chief aim and purpose is, especially in its second edition, to form an entertaining compendium of all the Halachah and Haggadah, which refers to the Pentateuch, and takes its stand upon it. And in this lies its chief use to us. There is hardly a single allegory, parable, mystic digression, or tale in it which is not found in the other Haggadistic writings — Mishna, Talmud, Mechilta, Sifra, Sifri, etc.; and both Winer and Petermann, not to mention the older authorities, have wrongly charged it with inventing its interpretations. Even where no source can be indicated, the author has surely only given utterance to the leading notions and ideas of his times, extravagant and abstruse as they may oftentimes appear to our modern western minds. Little value is inherent in its critical emendations on the exegesis of Onkelos. It sometimes endeavors either to find an entirely new signification for a word, and then it often falls into grave errors, or it restores interpretations rejected by Onkelos, only it must never be forgotten that translation is quite a secondary object with Jerushalmi. It adheres, however, to the general method followed by Onkelos and Jonathan. It dissolves similes and widens too concise diction. Geographical names it alters into those current in its own day. It avoids anthropomorphisms as well as anthropopathisms. The strict distinction between the Divine Being and man is kept up, and the word קֳדָם "before" is put as a kind of medium between the former and the latter, no less than the other — "Shechinah," "Word," "Glory," etc. It never uses Elohim where the Scripture applies it to man or idols. The same care is taken to extol the good deeds of the people and its ancestors, and to slur over and excuse the evil ones, etc.: — all this, however, in a much more decided and exaggerated form than either in Onkelos or Jonathan. Its language and grammar are very corrupt; it abounds — chiefly in its larger edition the Pseudo-Jonathan — in Greek, Latin, Persian and Arabic words; and even making allowances for the many blunders of ignorant scribes, enough will remain to pronounce the diction ungrammatical in very many places.

Thus much briefly of the Jerushalmi as one and the same work. We shall now endeavor to point out a few characteristics belonging to its two recensions respectively. The first, Jerushalmi κατ' ἐξοχήν, knows very little of angels; Michael is the only one ever occurring: in Jonathan, on the other hand, angelology flourishes in great vigor: to the Biblical Michael, Gabriel, Uriel, are added the Angel of Death, Samael, Sagnugael, Shachassai, Usiel; seventy angels descend with God to see the building of the Babylonian tower; nine hundred millions of punishing angels go through Egypt during the night of the Exodus, etc. Jerushalmi makes use but rarely of Halachah and Haggadah, while Jonathan sees the text as it were only through the medium of Haggadah: to him the chief end. Hence Jonathan has many Midrashim not found in Jerushalmi, while he does not omit a single one contained in the latter. There are no direct historical dates in Jerushalmi, but many are found in Jonathan, and since all other signs indicate that but a short space of time intervenes between the two, the late origin of either is to a great extent made manifest by these dates. The most striking difference between them, however, and the one which is most characteristic of either, is this, that while Jerushalmi adheres more closely to the language of the Mishna, Jonathan has greater affinity to that of the Talmud. Of either we subjoin short specimens, which, for the purpose of easier comparison, and reference, we have placed side by side with Onkelos. The Targum Jerushalmi was first printed in Bomberg's Bible, Venice, 1518 ff., and was reprinted in Bomberg's edd., and in Walton, vol. iv. Jonathan to the Pentateuch, a MS. of which was first discovered by Ashur Purins in the Library of the family of the Puahs in Venice, was printed for the first time in 1590, as "Targum Jonathan ben Uzziel," at Venice, reprinted at Hanau, 1618, Amsterdam, 1640, Prague, 1646, Walton, vol. iv., etc.

GENESIS III. 17-24.

|---|---|---|---|
| | | began Adam and said, I pray, through the Mercy that is before Thee, Jehovah, let us not be accounted before Thee as the beasts that eat the grass on the face of the field: may we be permitted to arise and toil with the toil of our hands, and eat food from the fruits of the earth; and thus may there be a difference before Thee between the sons of man and the offspring of cattle. | Adam answered and said, I pray, by the Mercy that is before Thee, Jehovah, that we may not be deemed like unto the beasts, that we should eat grass that is on the face of the field; may we be allowed to arise and toil with the tolling of our hands, and eat food from the food of the earth, and thus may there be a distinction now before Thee, between the sons of men and the offspring of cattle. |
| 19 In the sweat of thy face shalt thou eat bread, till thou return unto the ground; for out of it wast thou taken: for dust thou *art*, and unto dust shalt thou return. | 19 In the sweat of thy face shalt thou eat bread, until thou returnest unto the earth from which thou art created: for dust art thou, and to dust shalt thou return. | | 19 . . . . In the toil of the palm of thy hand shalt thou eat food, until thou returnest unto the dust from which thou wert created: for dust art thou, and to dust shalt thou return: for from the dust thou wilt once rise to give judgment and account for all that thou hast done, on the day of the great Judgment. |
| 20 And Adam called his wife's name Eve; because she was the mother of all living. | 20 And Adam called the name of his wife Chavah; for that she was the mother of all sons of man. | | 20 And Adam called the name of his wife Chavah; for she is the mother of all the sons of man. |
| 21 Unto Adam also and to his wife did the LORD God make coats of skins, and clothed them. | 21 And Jehovah Elohim made unto Adam and his wife garments of glory, on the skin of their flesh, and clothed them. | | 21 And Jehovah Elohim made unto Adam and his wife garments of honor, from the skin of the serpent which he had cast out of it, on the skin of their flesh, instead of their beauty which they had cast off; and he clothed them. |
| 22 And the LORD God said, Behold, the man is become as one of us, to know good and evil: and now, lest he put forth his hand, and take also of the tree of life, and eat, and live for ever: | 22 And Jehovah Elohim said, Behold Adam is the only one in the world knowing good and evil: perchance now he might stretch forth his hand and take also from the tree of life, and eat, and live for evermore. | 22 And the Word of Jehovah Elohim said, Lo! man, whom I created, is alone in this world, as I am alone in the highest Heavens; mighty nations will spring from him; from him also will arise a people that will know to distinguish between good and evil: now it is better to expel him from the garden of Eden, before he stretch out his hand and take also from the fruits of the tree of life, and eat, and live for ever. | 22 And Jehovah Elohim said to the angels that were ministering before him, Lo! there is Adam alone on the earth, as I am alone in the highest Heavens, and there will spring from him those who know to distinguish between good and evil: if he had kept the commandment I commanded, he would have been living and lasting, like the tree of life, for evermore. Now since he has not kept what I commanded, We decree against him and expel him from the garden of Eden, before he may stretch out his hand and take from the fruits of the tree of life; for if he ate therefrom he would live and remain for ever. |
| 23 Therefore the LORD God sent him forth from the garden of Eden, to till the ground from whence he was taken. | 23 And Jehovah Elohim sent him from the garden of Eden, to till the earth whence he was created. | | 23 And Jehovah Elohim expelled him from the garden of Eden, and he went and he settled on the Mount of Moriah, to till the earth of which he was created. |
| 24 So he drove out the man; and he placed at the east of the garden of Eden | 24 And he drove out Adam; and he placed before the garden of Eden the | 24 And He expelled Adam, and caused to reside the splendor of his She- | 24 And He drove out Adam from where His had made to reside the glory of |

| Cherubims, [1] and a flaming sword which turned every way, to keep the way of the tree of life. | Cherubim and the sharp sword, which turns to guard the way to the tree of life. | chinah from the beginning at the east of the garden of Eden, above the two Cherubim. Two thousand years before the world was created, he created the Law, and prepared Gehinnom [Hell] and Gan Eden [Paradise]: He prepared Gan Eden for the righteous, that they may eat and delight in the fruits of the tree, because they kept the commandments of the Law in this world, and prepared Gehinnom for the wicked, for it is like unto a sharp sword that eats from both sides; He has prepared within it sparks of light and coals which consume the wicked, to punish them in the future world for their not having kept the commandments of the Law. For the tree of life that is the Law; whosoever keeps it in this world, he will live and last like the tree of life: good is the Law to whomsoever keeps it in this world, like the fruit of the tree of life in the world to come. | his Shechinah from the beginning between the two Cherubim. Before He created the world He has created the Law: He has prepared the garden of Eden for the righteous, that they shall eat and delight in the fruits of the tree, because they have acted during their life according to the doctrine of the Law in this world, and have kept its commandments: He has prepared the Gehinnom for the wicked, which is likened unto a sharp sword that eats from two sides: He prepared within it sparks of light and coals of fire to judge with them the wicked who rebelled in their lives against the doctrine of the Law. Better is this Law to him who acts according to it than the fruits of the tree of life, for the Word of Jehovah has prepared for him who keeps it, that he shall live and walk in the paths of the way of the life of the future world. |

THE LAST CHAPTER OF DEUTERONOMY, Verses 1-3.

| Authorised Version. | Onkelos. | Targum Jerushalmi. *First Recension.* | Targum [Jonathan-ben-Uzziel] Jerushalmi. *Second Recension.* |
|---|---|---|---|
| 1 And Moses went up from the plains of Moab unto the mountain of Nebo, to the top of Pisgah, that *is* over against Jericho. And the Lord shewed him all the land of Gilead, unto Dan, | 1 And Moses ascended from the encampment of Moab to the mountain of Nebo: the head of the height that is opposite Jericho. And Jehovah showed him all the land of Gilead unto Dan. | 1 And Moses ascended from the plain of Moab to the mountain of Nebo, the summit of the hill which is opposite Jericho. And God showed him the whole land: Gilead unto Dan of Cæsarea. | 1 And Moses ascended from the plains of Moab to the mountain of Nebo, the summit of the height which is over against Jericho, and the word of Jehovah showed him all the mighty ones of the land: the powerful deeds which Jephthe from Gilead would do, and the victories of Samson the son of Manoah, from the tribe of Dan. |
| 2 And all Naphtali, and the land of Ephraim, and Manasseh, and all the land of Judah, unto the uttermost sea, | 2 And all Naphtali and the land of Ephraim and Manasseh, and all the land of Judah to the hindmost sea, | 2 And all the land of Naphtali, and the land of Ephraim and Manasseh, and the whole land of Judah, to the hindmost sea, | 2 And the thousand princes from the house of Naphtali who joined issue with Balak, and the kings whom Joshua the son of Nun from the tribe of Ephraim, would kill, and the power of Gideon the son of Joash from the tribe of Manasseh, and all the kings of Israel, and the kingdom of the house of Judah who would rule in the land until the second Sanctuary would be laid low. |
| 3 And the south, and the plain of the valley of Jericho, the city of palm trees, unto Zoar. | 3 And the west and the plain of the valley of Jericho the city of the palms, unto Zoar. | 3 And west, and the plain of the valley of Jericho the city which produces the palms, that is Zoar. | 3 And the king of the south who would join the king of the north to destroy the inhabitants of the land, and the Ammonites, and the Moabites, the inhabitants of the valleys who would oppress Israel, and the exile of the disciples of Elijah who would be driven out from the plain of Jericho, and the exile of the disciples of Elisha who would be driven out from the city of palms by their brethren, the house of Israel: two hundred thousand men. And the woes of such generation and the punishment of *Armalgus* [Armilius] the evil one and the battle-array of Gog. And in this great misery Michael will strike with the sword: to save, etc. |

### V Targums of "Joseph the Blind" on the Hagiographa.

"When Jonathan ben Uzziel began to paraphrase the Cethubim" (Hagiographa), we read in the Talmudical passage before quoted, "a mysterious voice was heard saying: It is enough. Thou hast revealed the secrets of the Prophets — why wouldst thou also reveal those of the Holy Ghost?" — It would thus appear, that a Targum to these books (Job excepted) was entirely unknown up to a very late period. Those Targums on the Hagiographa which we now possess have been attributed vaguely to different authors, it being assumed in the first instance that they were the work of one man. Now it was Akylas the Greek translator, mentioned in Bereshith Rabba (see above); now Onkelos, the Chaldee translator of the Pentateuch, his mythical double; now Jonathan b. Uzziel, or Joseph (Jose) the Blind (see above). But the diversity in the different parts of the work warring too palpably against the unity of authorship, the blindness of the last-named authority seemed to show the easiest way out of the difficulty. Joseph was supposed to have dictated it to different disciples at different periods, and somehow every one of the amanuenses infused part of his own individuality into his share of the work. Popular belief thus fastened upon this Joseph the Blind, since a name the work must needs have, and to him in most of the editions, the Targum is affiliated. Yet, if ever he did translate the Hagiographa, certain it is that those which we possess are not by his or his disciples' hands — that is, of the time of the 4th century. Writers of the 13th century already refuted this notion of Joseph's authorship, for the assumption of which there never was any other ground than that he was mentioned in the Talmud, like Onkelos-Akylas and Jonathan, in connection with Targum; and, as we saw, there is indeed reason to believe that he had a share in the redaction of "Jonathan" to the Prophets, which falls in his time. Between him and our hagiographical Targums, however, many centuries must have elapsed. Yet we do not even venture to assign to them more than an approximate round date, about 1000 A. D. Besides the Targums to the Pentateuch and the Prophets, those now extant range over Psalms, Proverbs, Job, the five Megilloth, *i. e.* Song of Songs, Ruth, Lamentations, Esther, Ecclesiastes; the Chronicles, and Daniel. Ezra and Nehemiah alone are left without a Targum at present; yet we can hardly help believing that ere long one will also be found to the latter, as the despaired-of Chronicles was found in the 17th century, and Daniel — a sure trace of it at least — so recently, that as yet nobody has considered it worth his while to take any notice of it. We shall divide these Targums into four groups: Proverbs, Job, Psalms; — Megilloth; — Chronicles; — and Daniel.

#### 1. Targum on Psalms, Job, Proverbs.

Certain linguistic and other characteristics[a] exhibited by these three Targums, lead to the conclusion that they are nearly contemporaneous productions, and that their birthplace is, most likely, Syria. While the two former, however, are mere paraphrases, the Targum on Proverbs comes nearer to our idea of a version than almost any Targum, except perhaps that of Onkelos. It adheres as closely to the original text as possible. The most remarkable feature about it however, and one which has given rise to endless speculations and discussions, is its extraordinary similarity to the Syriac Version. It would indeed sometimes seem as if they had copied each other — an opinion warmly advocated by Dathe, who endeavored to prove that the Chaldee had copied or adapted the Syrian, there being passages in the Targum which could, he assumed, only be accounted for by a misunderstanding of the Syriac translation.[b] It has, on the other hand, been argued that there are a greater number of important passages which distinctly show that the Targumist had used an original Hebrew text, varying from that of the Syriac, and had also made use of the LXX. against the latter.[c] The Syriasms would easily be accounted for by the Aramaic idiom itself, the forms of which vary but little from, and easily merge into, the sister dialect of Syria. Indeed nearly all of them are found in the Talmud, a strictly Aramaic work. It has been supposed by others that neither of these versions, as they are now in our hands, exhibit their original form. A late editor, as it were, of the (mutilated) Targum, might have derived his emendations from that version which came nearest to it, both in language and in close adherence to the Hebrew text — namely, the Syriac; and there is certainly every reason to conclude from the wofully faulty state in which this Targum is found (Luzzatto counts several hundred corrupt readings in it), that many and clumsy hands must have been at work upon the later Codd. The most likely solution of the difficulty, however, seems to be that indicated by Frankel — namely, that the LXX. is the common source of both versions, but in such a manner that the Aramaic has also made use of the Hebrew and the Greek — of the latter, however, through the Syriac medium. As a specimen of the curious similarity of both versions, the following two verses from the beginning of the book may find a place here: —

---

[a] E. g., the use of the word אגגלי for angel in Targ Ps. and Job, the ג, affixed to the 3d p. plur. pret. Peal, the infin. with pref. מ, besides several more or less unusual Greek and Syriac words common to all three.

[b] E. g., ch. xxix. 5, the Heb. word קְרִיּוֹת, "city," is rendered כוכא, "city," in Syr. Targum translates כדבא, "a lie," which is only to be accounted for by a mis-understanding or misreading of the Syriac כוכא, where for the second ב the Chaldee translator read a ר. כוכא.

[c] Prov. xxvi. 10, the Masoretic text reads: רַב מְחוֹלֵל כֹּל וְשֹׂכֵר כְּסִיל; LXX. πολλὰ χειμάζεται σὰρξ ἀφρόνων (= בשר כסיל); Targ. תגי רחיש בשרא דסיכלא; thus adopting exactly the reading of the LXX. against the received text xxix. 21, מְפַנֵּק מִנְּעֻר עַבְדִּי, quoted in the same manner in Talm. Succah. 52 b; LXX. ὃς παιδεύσει ἐκ παιδὸς οἰκέτην δοῦλον; evidently reading עֶבֶד יַחְזִיק = Targ. לעבדא נחזי. Comp. also xxvii 16, xxx 20, &c.

Ver. 3.

ܠܡܩܒܠ ܡܘܣܪܐ ܕܫܟܠ
ܘܙܕܩܐ ܘܕܝܢܐ ܘܡܝܫܪܐ.

Compare also vers. 5, 6, 8, 10, 12, 13; ch. ii. vers. 9, 10, 13–15; iii. 2–9, etc.

We must not omit to observe that no early Jewish commentator — Rashi, Ibn Ezra, etc. — mentions the Targum either to Proverbs, or to Job and Psalms. Nathan ben Jechiel (12th century) is the first who quotes it.

Respecting the two latter Targums of this group, Psalms and Job, it is to be observed that they are, more or less, mere collections of fragments. That there must have existed paraphrases to Job at a very early period follows from the Talmudical passages which we quoted in the introduction — nay, we almost feel inclined to assume that this book, considered by the learned as a mere allegory ("Job never was, and never was created," is the dictum found in the Talmud, Baba Bathra, 15 *a*: *i. e.* he never had any real existence, but is a poetical, though sacred, invention), opened the list of written paraphrases. How much of the primitive version is embodied in the one which we possess it is of course next to impossible to determine, more especially in the state of infancy in which the investigation of the Targums as yet remains. So much, however, is palpable, that the Targums of both Psalms and Job in their present shape contain relics of different authors in different times: some paraphrasts, some strictly translators. Very frequently a second version of the same passage is introduced by the formula תרגום אחר, "another Targum," and varies most widely from its predecessor; while, more especially in the Psalms, a long series of chapters translated literally, is followed by another series translated in the wildest and most fanciful character. The Cod. Erpen. still exhibits these various readings, as such, side by side, on its margin; thence, however, they have in our printed editions found their way into the text. How much of these variants, or of the entire text, belongs to the Palestinian Cycles, which may well have embraced the whole Torah, — or whether they are to be considered exclusively the growth of later times, and have thus but a very slender connection with either the original Babylonian or the Palestinian Targum-works, future investigation must determine.

The most useful in this group is naturally the Targum on Proverbs, it being the one which translates most closely, or rather the only one which *does translate* at all. Besides the explanation it gives of difficult passages in the text, its peculiar affinity to the Syriac Version naturally throws some light upon both, and allows of emendations in and through either. As to Job and Psalms, their chief use lies in their showing the gradual dying stages of the idiom in which they are written, and also in their being in a manner guides to the determination of the date of certain stages of Haggadah.

2, 3. TARGUMS ON THE FIVE MEGILLOTH.

These Targums are likewise not mentioned before the 12th century, when the Aruch quotes them severally, — although Esther must have been translated at a very early period, since the Talmud already mentions a Targum on it. Of this, we need hardly add, no trace is found in our present Targum. The freedom of a "version" can go no further than it does in these Targums on the Megilloth. They are, in fact, mere Haggadah, and bear the most striking resemblance to the Midrash on the respective books. Curiously enough, the gradual preponderance of the Paraphrase over the text is noticeable in the following order: Ruth, Lamentations, Ecclesiastes, Esther, Song of Songs. The latter is fullest to overflowing of those "*nugæ atque frivolitates*," which have so sorely tried the temper of the wise and grave. Starting from the almost comical notion that all they found in the books of Mohammedanism and of Judaism, of Rome and of Greece, if it seemed to have any reference to "Religio," however unsupported, and however plainly bearing the stamp of poetry — good or bad — on its face, must needs be a religious creed, and the creed forced upon every single believer: — they could not but get angry with mere 'day-dreams' being interspersed with the sacred literature of the Bible. Delitzsch, a scholar of our generation, says of the Targums in general that "history becomes in them most charming, most instructive poetry; but this poetry is not the invention, the phantasma of the writer, but the old and popular venerable tradition or legend . . . . the Targums are poetical, both as to their contents and form" (*Gesch. d. Jüd. Poesie*, p. 27): and further, "The wealth of legend in its gushing fullness did not suffer any formal bounds; legend bursts upon legend, like wave upon wave, not to be dammed in even by any poetical forms. Thus the Jerusalem Targum in its double Recensions [to the Pentateuch], and the Targums on the five Megilloth are the most beautiful national works of art, through which there runs the golden thread of Scripture, and which are held together only by the unity of the idea" (p. 135). Although we do not share Delitzsch's enthusiasm to the full extent, yet we cannot but agree with him that there are, together with stones and dust, many pearls of precious price to be gathered from these much despised, because hardly known, books.

The dialect of these books occupies the mean between the East and West Aramæan, and there is a certain unity of style and design about all the five books, which fully justifies the supposition that they are, one and all, the work of one author. It may be that, taken in an inverted series, they mark the successive stages of a poet's life; glowing, rapturous, overflowing in the first; stately, sober, prosy in the last. As to the time of its writing as

Digitized by Google

sciting, we have again to repeat, that it is most uncertain, but unquestionably belongs to a period much later than the Talmud. The book of Esther, enjoying both through its story-like form and the early injunction of its being read or heard by every one on the Feast of Purim, a great circulation and popularity, has been targumised many times, and besides the one embodied in the five Megilloth, there are two more extant (*not three*, as generally stated: the so-called third being only an abbreviation of the first), which are called respectively the first: a short one without digressions, and the second — (*Targum sheni*): a larger one, belonging to the Palestinian Cycle. The latter Targum is a collection of eastern romances, broken up and arranged to the single verses: of gorgeous hues and extravagant imagination, such as are to be met with in the Adshaib or Chamis, or any eastern collection of legends and tales.

VI. Targum on the Book of Chronicles.

This Targum was unknown, as we said before, up to a very recent period. In 1680, it was edited for the first time from an Erfurt MS. by M. F. Beck, and in 1715 from a more complete as well as correct MS. at Cambridge, by D. Wilkins. The name of Hungary occurring in it, and its frequent use of the Jerusalem-Targum to the Pentateuch, amounting sometimes to simple copying (comp. the Genealogical Table in chap. i., etc) show sufficiently that its author is neither "Jonathan b. Uzziel" nor "Joseph the Blind," as has been suggested. But the language, style, and the Haggadah, with which it abounds, point to a late period and point out Palestine as the place where it was written. Its use must be limited to philological, historical, and geographical studies; the science of exegesis will profit little by it. The first edition appeared under the title *Paraphrasis Chaldaica libr. Chronicorum*, cura M. F. Beckii, 2 tom. Aug. Vind. 1680–83, 4to; the second by D. Wilkins, *Paraphrasis . . . . auctore R. Josepho*, etc. Amst., 1715, 4to. The first edition has the advantage of a large number of very learned notes, the second that of a comparatively more correct and complete text.

VII. The Targum to Daniel.

It is for the first time that this Targum, for the non-existence of which many and weighty reasons were given (that the date of the Messiah's arrival was hidden in it, among others), is here formally introduced into the regular rank and file of Targums, although it has been known for now more than five and twenty years. Munk found it not indeed in the Original Aramaic, but in what appears to him to be an extract of it written in Persian. The MS. (Anc. Fond, No. 45, Imp. Library) is inscribed "History of Daniel," and has retained only the first words of the Original, which it translates likewise into Persian. This language is then retained throughout.

After several legends known from other Targums, follows a long prophecy of Daniel, from which the book is shown to have been written after the first Crusade. Mohammad and his successors are mentioned, also a king who coming from Europe (אז רומיאן) will go to Damascus, and kill the Ishmaelitic (Mohammedan) kings and princes; he will break down the minarets (מנארה), destroy the mosques (מסגדהא), and no one will after that dare to pronounce the name of the Profane (פטול = Mohammad). The Jews will also have to suffer great misfortunes (as indeed the knightly Crusaders won their spurs by dastardly murdering the helpless masses, men, women, and children, in the Ghettos along the Rhine and elsewhere, before they started to deliver the Holy Tomb). By a sudden transition the Prophet then passes on to the "Messiah, son of Joseph," to Gog and Magog, and to the "true Messiah, the son of David." Munk rightly concludes that the book must have been composed in the 12th century, when Christian kings reigned for a brief period over Jerusalem (*Notice sur Saadia*, Par. 1838).

VIII. There is also a Chaldee translation extant of the apocryphal pieces of Esther, which, entirely lying apart from our task, we confine ourselves to mention without further entering into the subject. De Rossi has published them with Notes and Dissertations. Tübingen, 1783, 8vo.

Further fragments of the Palestinian Targum.

Besides the complete books belonging to the Palestinian Cycle of Targum which we have mentioned, and the portions of it interested as "Another Reading," "Another Targum," into the Babylonian Versions, there are extant several independent fragments of it. Nor need we as yet despair of finding still further portions, perhaps one day to see it restored entirely. There is all the more hope for this, as the Targum has not been lost very long yet. Abudraham quotes the Targum Jerushalmi to *Samuel* (i. 9, 13). Kimchi has preserved several passages from it to *Judges* (xi. 1, consisting of 47 words); to *Samuel* (i. 17, 18: 106 words); and *Kings* (i. 22, 21: 68 words; ii. 4, 1: 174 words; iv. 6: 55 words; iv. 7: 72 words; xiii. 21: 9 words), under the simple name of Toseftah, *i. e.* Addition, or Additional Targum. Luzzatto has also lately found fragments of the same, under the names "Targum of Palestine," "Targum of Jerushalmi," "Another Reading," etc., in an African Codex written 5247 A. M. = 1487 A. D., namely, to 1 Sam. xviii. 19; 2 Sam. xii. 12; 1 Kings v. 9, v. 11, v. 13, x. 18, x. 26, xiv. 13; to Hosea i. 1; Obad. i. 1. — To Isaiah, Rashi (*Isaaki*, not as people still persist in calling him, *Jarchi*), Abudraham and Farissol quote it: and a fragment of the Targum to his prophet is extant in Cod. Urbin. Vatican No. 1, containing about 120 words, and beginning: "Prophecy of Isaiah, which he prophesied at the end of his prophecy in the days of Manasseh the Son of Hezekiah the King of the Tribe of the House of Judah on the 17th of Tamus in the hour when Manasseh set up an idol in the Temple," etc. Isaiah predicts in this his own violent death. Parts of this Targum are also found in Hebrew, in Pesik tah Rabbathi 6 *a*, and Yalkut Isa. 58 *d*. A Jerusalem Targum to Jeremiah is mentioned by Kimchi; to Ezekiel by R. Simeon, Nathan (Aruch), and likewise by Kimchi, who also speaks of a further additional Targum to Jonathan for this book. A "Targum-Jerushalmi" to Micah is known to Rashi, and of Zechariah a fragment has been published in Bruns (Eichhorn's *Repert.* xv. 174) from a Reuchlinian MS. (Cod. 354, Kennic 25`, written 1106. The passage, found as a marginal gloss to Zech. xii. 10, reads as follows: —

"Targum Jerushalmi. And I shall pour out upon the House of David and the inhabitants of Jerusalem the spirit of prophecy and of prayer for truth. And after this shall go forth Messiah the

Digitized by Google

Son of Ephraim to wage war against Gog. And Gog will kill him before the city of Jerushalaim. They will look up to me and they will ask me wherefore the heathens have killed Messiah the Son of Ephraim. They will then mourn over him as mourn father and mother over an only son, and they will wail over him as one wails over a firstborn." — A Targum Jerushalmi to the third chapter of *Habakkuk*, quoted by Rashi, is mentioned by De Rossi (Cod. 265 and 405, both 13th century). It has been suggested that a Targum Jerushalmi on the Prophets only existed to the Haftarahs, which had at one time been translated perhaps, like the portion from the Law, in public; but we have seen that entire books, not to mention single chapters, possessed a Palestinian Targum, which never were intended or used for the purpose of Haftarah. And there is no reason to doubt that the origin of this Targum to the Prophets is precisely similar to, and perhaps contemporaneous with, that which we traced to that portion which embraces the Pentateuch. The Babylonian Version, the "Jonathan-" Targum, though paraphrastic, did not satisfy the apparently more imaginative Palestinian public. Thus from heaped-up additions and marginal glosses, the step to a total re-writing of the entire Codex in the manner and taste of the latter times and the different locality, was easy enough. From a critique of the work as such, however, we must naturally keep aloof, as long as we have only the few specimens named to judge from. But its general spirit and tendency are clear enough. So is also the advantage to which even the minimum that has survived may some day be put by the student of Midrashic literature, as we have briefly indicated above.

We cannot conclude without expressing the hope — probably a vain one — that linguistic studies may soon turn in the direction of that vast and most interesting, as well as important, Aramaic literature, of which the Targums form but a small item.

The writer finally begs to observe that the translations of all the passages quoted from Talmud and Midrash, as well as the specimens from the Targum, have been made by him directly from the respective originals.

**VERSION, AUTHORIZED.** The history of the English translations of the Bible connects itself with many points of interest in that of the nation and the Church. The lives of the individual translators, the long struggle with the indifference or opposition of men in power, the religious condition of the people as calling for, or affected by, the appearance of the translation, the time and place and form of the successive editions by which the demand, when once created, was supplied — each of these has furnished, and might again furnish, materials for a volume. It is obvious that the work now to be done must lie within narrower limits; and it is proposed, therefore, to exclude all that belongs simply to the personal history of the men, or the general history of the time, or that comes within the special province of bibliography. What will be aimed at will be to give an account of the several versions as they appeared; to ascertain the qualifications of the translators for the work which they undertook, and the principles on which they acted; to form an estimate of the final result of their labors in the received version, and, as consequent on this, of the necessity or desirableness of a new or revised translation; and, finally, to give such a survey of the literature of the subject as may help the reader to obtain a fuller knowledge for himself.

I. EARLY TRANSLATIONS. — It was asserted by Sir Thomas More, in his anxiety to establish a point against Tyndal, that he had seen English translations of the Bible, which had been made before Wycliffe, and that these were approved by the Bishops, and were allowed by them to be read by laymen, and even by devout women (*Dialogues*, ch. viii.–xiv. col. 82). There seem good grounds, however, for doubting the accuracy of this statement. No such translations — versions, *i. e.* of the entire Scriptures — are now extant. No traces of them appear in any contemporary writer. Wycliffe's great complaint is, that there is no translation (Forshall and Madden, *Wycliffe's Bible*, *Pref.* p. xxi. *Prol.* p. 59). The Constitutions of Archbishop Arundel (A. D. 1408) mention two only, and these are Wycliffe's own, and the one based on his and completed after his death. More's statement must therefore be regarded either as a rhetorical exaggeration of the fact that parts of the Bible had been previously translated, or as rising out of a mistake as to the date of MSS. of the Wycliffe version. The history of the English Bible will therefore begin, as it has begun hitherto, with the work of the first great reformer. One glance, however, we may give, in passing, to the earlier history of the English Church, and connect some of its most honored names with the great work of making the truths of Scripture, or parts of the books themselves, if not the Bible as a whole, accessible to the people. We may think of Caedmon as embodying the whole history of the Bible in the alliterative metre of Anglo-Saxon poetry (Bede, *Hist. Eccl.* iv. 24); of Aldhelm, Bishop of Sherborne, in the 7th century, as rendering the Psalter; of Bede, as translating in the last hours of his life the Gospel of St. John (*Epist. Cuthberti*); of Alfred, setting forth in his mother-tongue as the great groundwork of his legislation, the four chapters of Exodus (xx.–xxiii. that contained the first code of the laws of Israel

(Pauli's *Life of Alfred*. ch. v.). The wishes of the great king extended further. He desired that "all the free-born youth of his kingdom should be able to read the English Scriptures" [a] (*ibid.*). Portions of the Bible, some of the Psalms, and extracts from other books, were translated by him for his own use and that of his children. The traditions of a later date, seeing in him the representative of all that was good in the old Saxon time, made him the translator of the whole Bible (*ibid.* Supp. to ch. v.).

The work of translating was, however, carried on by others. One Anglo-Saxon version of the four Gospels, interlinear with the Latin of the Vulgate, known as the Durham Book, is found in the Cottonian MSS. of the British Museum, and is referred to the 9th or 10th century. Another, known as the Rushworth Gloss, and belonging to the same period, is in the Bodleian Library at Oxford.[b] Another, of a somewhat later date, is in the same collection, and in the library of C. C. College, Cambridge. The name of Aldhelm, Bishop of Sherborne, is connected with a version of the Psalms; that of Ælfric, with an Epitome of Scripture History, including a translation of many parts of the historical books of the Bible (Lewis, *Hist. of Transl.* ch. i.; Forshall and Madden, *Preface*; Bagster's *English Hexapla*, Pref.). The influence of Norman ecclesiastics, in the reigns that preceded or followed the Conquest, was probably adverse to the continuance of this work. They were too far removed from sympathy with the subjugated race to care to educate them in their own tongue. The spoken dialects of the English of that period would naturally seem to them too rude and uncouth to be the channel of Divine truth. Pictures, mysteries, miracle-plays, rather than books, were the instruments of education for all but the few who, in monasteries under Norman or Italian superintendence, devoted themselves to the study of theology or law. In the remoter parts of England, however, where their influence was less felt, or the national feeling was stronger, there were those who carried on the succession, and three versions of the Gospels, in the University Library at Cambridge, in the Bodleian, and in the British Museum, belonging to the 11th or 12th century, remain as attesting their labors. The metrical paraphrase of the Gospel history, known as the Ormulum, in alliterative English verse, ascribed to the latter half of the 12th century, is the next conspicuous monument, and may be looked upon as indicating a desire to place the facts of the Bible within reach of others than the clergy.[c] The 13th century, a time in England, as throughout Europe, of religious revival, witnessed renewed attempts. A prose translation of the Bible into Norman-French, cir. A. D. 1260, indicates a demand for devotional reading within the circle of the Court, or of the wealthier merchants, or of convents for women of high rank. Further signs of the same desire are found in three English versions of the Psalms — one towards the close of the 13th century; another by Schorham, cir. A. D. 1320; another — with other canticles from the O. T. and N. T. — by Richard Rolle of Hampole, cir. 1349; the last being accompanied by a devotional exposition: and in one of the Gospels of St. Mark and St. Luke, and of all St. Paul's epistles (the list includes the apocryphal epistle to the Laodiceans), in the library of C. C. College, Cambridge. The fact stated by Archbishop Arundel in his funeral sermon on Anne of Bohemia, wife of Richard II., that she habitually read the Gospels in the vulgar tongue, with divers expositions, was probably true of many others of high rank.[d] It is interesting to note these facts, not as detracting from the glory of the great reformer of the 14th century, but as showing that for him also there had been a preparation; that what he supplied met a demand which had for many years been gathering strength. It is almost needless to add that these versions started from nothing better than the copies of the Vulgate, more or less accurate, which each translator had before him (Lewis, ch. i.; Forshall and Madden, *Preface*).

II. WYCLIFFE (b. 1324; d. 1384). — (1.) It is singular, and not without significance, that the first translation from the Bible connected with the name of Wycliffe should have been that of part of the Apocalypse.[e] The *Last Age of the Church* (A. D. 1356) translates and expounds the vision in which the reformer read the signs of his own times, the sins and the destruction of "Antichrist and his meynee" (= multitude). Shortly after this he completed a version of the Gospels, accompanied by a commentary "so that pore Christen men may some dele know the text of the Gospel, with the comyn sentence of olde holie doctores" (*Preface*). Wycliffe, however, though the chief, was not the only laborer in the cause. The circle of English readers was becoming wider, and they were not content to have the Book which they honored above all others in a tongue not their own.[f] Another translation and commentary appear to have

[a] So Pauli (Eng. transl.). But would "Englisc gewrit" mean "the Scriptures" exclusively? Do not the words of Alfred point to a general as well as a religious education?

[b] One interesting fact connected with this version is that its text agrees with that of the Codex Bezæ where that MS. differs most from the *textus receptus* of the N. T. Another is its publication by Foxe the Martyrologist in 1571, at the request of Archbishop Parker. It was subsequently edited by Dr. Marshall in 1665.

It may be noticed, as bearing upon a question afterwards the subject of much discussion, that in this and the other Anglo-Saxon versions the attempt is made to give vernacular equivalents even for the words which, as belonging to a systematic theology, or for other reasons, most later versions have left practically untranslated. Thus *baptisma* is "fyllith" (washing) · *penitentia*, "dœd-bote" (redress for evil deeds). So *scribæ* are "bocere" (bookmen). Synagogues "gesamnungum" (meetings); amen, "sothlice" (in sooth); and phylacteries, "healsbee" (neck-books). See Lewis, *Hist. of Translations*, p. 9.

[c] The Ormulum, edited by Dr. White, was printed at the Oxford University Press in 1852.

[d] Chronologically, of course, the Gospels thus referred to may have been Wycliffe's translation; but the strong opposition of Arundel to the work of the Reformer makes it probable that those which the queen used belonged to a different school, like that of the versions just mentioned.

[e] The authorship of this book has however been disputed (comp. Todd's *Preface*).

[f] "One comfort is of knightes; they saveren much the Gospells, and have wille to read in Englische the Gospelle of Christes life" (Wycliffe, *Prologue*). Compare the speech ascribed to John of Gaunt (13 Ric. II.). "We will not be the dregs of all, seeing other nations have the law of God, which is the law of our faith, written in their own language" (Foxe, *Pref. to Saxon Gospels*; Lewis, p. 29).

Digitized by Google

been made about the same time, in ignorance of Wycliffe's work, and for the "manie lewid men that gladlie would kon the Gospelle, if it were draghen into the Englisch tung." The fact that many MSS. of this period are extant, containing in English a Monotessaron, or Harmony of the Gospels, accompanied by portions of the epistles, or portions of the O. T., or an epitome of Scripture history, or the substance of St. Paul's epistles, or the catholic epistles at full length, with indications more or less distinct of Wycliffe's influence, shows how wide-spread was the feeling that the time had come for an English Bible. (Forshall and Madden, *Pref.* pp. xiii.–xvii.) These preliminary labors were followed up by a complete translation of the N. T. by Wycliffe himself. The O. T. was undertaken by his coadjutor, Nicholas de Hereford, but was interrupted probably by a citation to appear before Archbishop Arundel in 1382, and ends abruptly (following so far the order of the Vulgate) in the middle of Baruch. Many of the MSS of this version now extant present a different recension of the text, and it is probable that the work of Wycliffe and Hereford was revised by Richard Purvey, cir. A. D. 1388. To him also is ascribed the interesting Prologue, in which the translator gives an account both of his purpose and his method. (Forshall and Madden, *Pref.* p. xxv.)

(2.) The former was, as that of Wycliffe had been, to give an English Bible to the English people. He appeals to the authority of Bede, of Alfred, and of Grostête, to the examples of "Frenshe, and Beemers (Bohemians), and Britons." He answers the hypocritical objections that men were not holy enough for such a work; that it was wrong for "idiots" to do what the great doctors of the Church had left undone. He hopes "to make the sentence as trewe and open in Englishe as it is in Latine, or more trewe and open."

It need hardly be said, as regards the method of the translator, that the version was based entirely upon the Vulgate.[a] If, in the previous century, scholars like Grostête and Roger Bacon, seeking knowledge in other lands, and from men of other races, had acquired, as they seem to have done, some knowledge both of Greek and Hebrew, the succession had, at all events, not been perpetuated. The war to be waged at a later period with a different issue between Scholastic Philosophy and "Humanity" ended, in the first struggle, in the triumph of the former, and there was probably no one at Oxford among Wycliffe's contemporaries who could have helped him or Purvey in a translation from the original. It is something to find at such a time the complaint that "learned doctoris taken littel heede to the lettre," the recognition that the Vulgate was not all sufficient, that "the texte of oure bokis" (he is speaking of the Psalter and the difficulty of understanding it) "discordeth much from the Ebreu."[b] The difficulty which was thus felt was increased by the state of the Vulgate text. The translator complains that what the Church had in view was not Jerome's version, but a later and corrupt text; that "the comune Latyne Bibles han more neede to be corrected as manie as I have seen in my life, than hath the Englishe Bible late translated." To remedy this he had recourse to collation. Many MSS. were compared, and out of this comparison, the true reading ascertained as far as possible. The next step was to consult the *Glossa Ordinaria*, the commentaries of Nicholas de Lyrâ, and others, as to the meaning of any difficult passages. After this (we recognize here, perhaps, a departure from the right order) grammars were consulted. Then came the actual work of translating, which he aimed at making idiomatic rather than literal. As he went on, he submitted his work to the judgment of others, and accepted their suggestions.[c] It is interesting to trace these early strivings after the true excellence of a translator; yet more interesting to take note of the spirit, never surpassed, seldom equaled, in later translators, in which the work was done. Nowhere do we find the conditions of the work, intellectual and moral, more solemnly asserted. "A translator hath grete nede to studie well the sentence, both before and after," so that no equivocal words may mislead his readers or himself, and then also "he hath nede to lyve a clene life, and be ful devout in preiers, and have not his wit occupied about worldli things, that the Holie Spiryt, author of all wisedom, and cunnynge and truthe, dresse (= train) him in his work, and suffer him not for to err" (Forshall and Madden, *Prol.* p. 60).

(3.) The extent of the circulation gained by this version may be estimated from the fact that, in spite of all the chances of time, and all the systematic efforts for its destruction made by Archbishop Arundel and others, not less than 150 copies are known to be extant, some of them obviously made for persons of wealth and rank, others apparently for humbler readers. It is significant as bearing, either on the date of the two works, or on the position of the writers, that while the quotations from Scripture in Langton's [Langland's] *Vision of Piers Plowman* are uniformly given in Latin, those in the *Persone's Tale* of Chaucer are given in English, which for the most part agrees substantially with Wycliffe's translation.

(4.) The following characteristics may be noticed as distinguishing this version: (1.) The general homeliness of its style. The language of the court or of scholars is as far as possible avoided, and that of the people followed. In this respect the principle has been acted on by later translators. The

a A crucial instance is that of Gen. iii. 15: "*She* hall trede thy head."

b This knowledge is, however, at second hand, "bi witnesse of Jerom, of Lire, and other expositouris."

c It is worth while to give his own account of this rocess: "First this simple creature," his usual way of speaking of himself, "hedde mychc travaile, with diverse felawis and helperis, to gedere manie elde bibles, and othere doctoris, and comune glosis, and to make oo Latyn bible sumdel trewe, and thanne to stodie it of the new, the text with the glose, and othere doctoris, as he mi-te, and speciali Lire on the elde testament, that helpid full mvche in this werk, the thridde time to counsel with elde grammarians and elde dyvynis of harde wordes and harde sentences how those mists best be understode and translated, the fiij^th tyme to translate as clearlie as he coude to the sentence, and to have manie good felawis and kunnynge at the correcting of the translacioun" (*Prol.* c. xv.). The note at the close of the preface, on the grammatical idioms of different languages, the many English equivalents, *e. g.* for the Latin ablative absolute, shows considerable discernment.

Digitized by Google

style of Wycliffe is to that of Chaucer as Tyndal's is to Surrey's, or that of the A. V. to Ben Jonson's. (2.) The substitution, in many cases, of English equivalents for quasi-technical words. Thus we find "fy" or "fogh" instead of "Raca" (Matt. v. 22); "they were *washed*" in Matt. iii. 6; "richesse" for "mammon" (Luke xvi. 9, 11, 13); "bishop" for "high-priest" (*passim*). (3.) The extreme literalness with which, in some instances, even at the cost of being unintelligible, the Vulgate text is followed, as in 2 Cor. i. 17–19.

III. TYNDAL. — The work of Wycliffe stands by itself. Whatever power it exercised in preparing the way for the Reformation of the 16th century, it had no perceptible influence on later translations. By the reign of Henry VIII. its English was already obsolescent, and the revival of classical scholarship led men to feel dissatisfied with a version which had avowedly been made at second-hand, not from the original. With Tyndal, on the other hand, we enter on a continuous succession. He is the patriarch, in no remote ancestry, of the Authorized Version. With a consistent, unswerving purpose, he devoted his whole life to this one work; and through dangers and difficulties, amid enemies and treacherous friends, in exile and loneliness, accomplished it. More than Cranmer or Ridley he is the true hero of the English Reformation. While they were slowly moving onwards, halting between two opinions, watching how the court-winds blew, or, at the best, making the most of opportunities, he set himself to the task without which, he felt sure, reform would be impossible, which once accomplished, would render it inevitable. "Ere many years," he said, at the age of thirty-six (A. D. 1520), he would cause "a boy that driveth the plough" to know more of Scripture than the great body of the clergy then knew (Foxe, in Anderson's *Annals of English Bible*, i. 36). We are able to form a fairly accurate estimate of his fitness for the work to which he thus gave himself. The change which had come over the universities of continental Europe since the time of Wycliffe had affected those of England. Greek had been taught in Paris in 1458. The first Greek Grammar, that of Constantine Lascaris, had been printed in 1476. It was followed in 1480 by Craston's Lexicon. The more enterprising scholars of Oxford visited foreign universities for the sake of the new learning. Grocyn (d. 1519), Linacre (d. 1524), Colet (d. 1519), had, in this way, from the Greeks whom the fall of Constantinople had scattered over Europe, or from their Italian pupils, learnt enough to enter, in their turn, upon the work of teaching. When Erasmus visited Oxford in 1497, he found in these masters a scholarship which even he could admire. Tyndal, who went to Oxford circ. 1500, must have been within the range of their teaching. His two great opponents, Sir Thomas More and Bishop Tonstal, are known to have been among their pupils. It is significant enough that after some years of study Tyndal left Oxford and went to Cambridge. Such changes were, it is true, common enough. The fame of any great teacher would draw round him men from other universities, from many lands. In this instance, the reason of Tyndal's choice is probably not far to seek (Walter, *Biog. Notices* to Tyndal's *Doctrinal Treatises*). Erasmus was in Cambridge from 1509 to 1514. All that we know of Tyndal's character and life, the fact especially that he had made translations of portions of the N. T. as early as 1502[a] (Offor, *Life of Tyndal*, p. 9), leads to the conclusion that he resolved to make the most of the presence of one who was emphatically the scholar and philologist of Europe. It must be remembered, too, that the great scheme of Cardinal Ximenes was just then beginning to interest the minds of all scholars. The publication of the Complutensian Bible, it is true, did not take place till 1520; but the collection of MSS. and other preparations for it began as early as 1504. In the mean time Erasmus himself, in 1516, brought out the first published edition of the Greek Testament; and it was thus made accessible to all scholars. Of the use made by Tyndal of these opportunities we have evidence in his coming up to London (1522), in the vain hope of persuading Tonstal (known as a Greek scholar, an enlightened Humanist) to sanction his scheme of rendering the N. T. into English, and bringing a translation of one of the orations of Isocrates as a proof of his capacity for the work. The attempt was not successful. "At the last I understood not only that there was no room in my Lord of London's palace to translate the N. T., but also that there was no place to do it in all England" (*Pref. to Five Books of Moses*).

It is not so easy to say how far at this time any knowledge of Hebrew was attainable at the English universities, or how far Tyndal had used any means of access that were open to him. It is probable that it may have been known, in some measure, to a few bolder than their fellows, at a time far earlier than the introduction of Greek. The large body of Jews settled in the cities of England must have possessed a knowledge, more or less extensive, of their Hebrew books. On their banishment, to the number of 16,000, by Edward I., these books fell into the hands of the monks, superstitiously reverenced or feared by most, yet drawing some to examination, and then to study. Grostête, it is said, knew Hebrew as well as Greek. Roger Bacon knew enough[b] to pass judgment on the Vulgate as incorrect and misleading. Then, however, came a period in which linguistic studies were thrown into the background, and Hebrew became an unknown speech even to the best-read scholars. The first signs of a revival meet us toward the close of the 15th century. The remarkable fact that a Hebrew Psalter was printed at Soncino in 1477 (forty years before Erasmus's Greek Testament), the Pentateuch in 1482, the Prophets in 1486, the whole of the O. T. in 1488, that by 1496 four editions had been published, and by 1506 not fewer than eleven (Whitaker, *Hist. and Crit. Inquiry*, p. 22) indicates a demand on the part of the Christian students of Europe, not less than on that of the most learned Jews. Here also the progress of the Complutensian Bible would have attracted the notice of scholars. The cry raised by the "Trojans" of Oxford in 1519 (chiefly consisting of the friars, who from the time of Wycliffe had all but swamped the education of the place) against the first Greek lectures — that to study that language would make

[a] The MS. on which this statement is founded is pronounced by Mr. Francis Fry of Bristol to be unquestionably a forgery. So Mr. Westcott regards it (*Hist. of the English Bible*, p. 82, note). A.

[b] The boast of Bacon, that any one using his method could learn Hebrew and Greek within a week, bold as it is, shows that he knew something of both (*De Laude Stac. Script.* c. 23).

Digitized by Google

men Pagans, that to study Hebrew would make them Jews — shows that the latter study as well as the former was the object of their dislike and fear[a] (Anderson, i. 24; Hallam, *Lit. of Eur.* i. 403).

Whether Tyndal had in this way gained any knowledge of Hebrew before he left England in 1524 may be uncertain. The fact that in 1530–31 he published a translation of Genesis, Deuteronomy, and Jonah,[b] may be looked on as the first-fruits of his labors, the work of a man who was giving this proof of his power to translate from the original (Anderson, *Annals*, i. 209–288). We may perhaps trace, among other motives for the many wanderings of his exile, a desire to visit the cities Worms, Cologne, Hamburgh, Antwerp (Anderson, pp. 48–84), where the Jews lived in greatest numbers, and some of which were famous for their Hebrew learning. Of at least a fair acquaintance with that language we have, a few years later, abundant evidence in the table of Hebrew words prefixed to his translation of the five books of Moses, and in casual etymologies scattered through his other works, *e. g.* Mammon (*Parable of Wicked Mammon*, p. 68[c]), Cohen (*Obedience*, p. 255), Abel Mizraim (p. 347), Pesah (p. 353). A remark (*Preface to Obedience*, p. 148) shows how well he had entered into the general spirit of the language. "The properties of the Hebrew tongue agreeth a thousand times more with the Englishe than with the Latine. The manner of speaking is in both one, so that in a thousand places thou needest not but to translate it into Englishe word for word." When Spalatin describes him in 1534 it is as one well-skilled in seven languages, and one of these is Hebrew[d] (Anderson, i. 397).

The N. T. was, however, the great object of his care. First the Gospels of St. Matthew and St. Mark were published tentatively, then in 1525 the whole of the N. T. was printed in 4to at Cologne and in small 8vo at Worms.[e] The work was the fruit of a self-sacrificing zeal, and the zeal was its own reward. In England it was received with denunciations. Tonstal, Bishop of London, preaching at Paul's Cross, asserted that there were at least 2,000 errors in it, and ordered all copies of it to be bought up and burnt. An Act of Parliament (35 Hen. VIII. cap. 1) forbade the use of all copies of Tyndal's "false translation." Sir T. More (*Dialogues*, l. c. *Supplication of Souls*, *Confutation of Tyndal's Answer*) entered the lists against it, and accused the translator of heresy bad scholarship, and dishonesty, of "corrupting Scripture after Luther's counsel." The treatment which it received from professed friends was hardly less annoying. Piratical editions were printed, often carelessly, by trading publishers at Antwerp.[f] A scholar of his own, George Joye, undertook (in 1534) to improve the version by bringing it into closer conformity with the Vulgate, and made it the vehicle of peculiar opinions of his own, substituting "life after this life," or "verie life," for "resurrection," as the translation of *ἀνάστασις*. (Comp. Tyndal's indignant protest in Pref. to edition of 1534.) Even the most zealous reformers in England seemed disposed to throw his translation overboard, and encouraged Coverdale (*infra*) in undertaking another. In the mean time the work went on. Editions were printed one after another.[g] The last appeared in 1535, just before his death, "diligently compared with the Greek," presenting for the first time systematic chapter-headings, and with some peculiarities in spelling specially intended for the pronunciation of the peasantry (Offor, *Life*, p. 82[h]). His heroic life was brought to a close in 1536. We may cast one look on its sad end — the treacherous betrayal, the Judas-kiss of the false friend, the imprisonment at Vilvorden, the last prayer, as the axe was about to fall, "Lord, open the King of England's eyes."[i]

The work to which a life was thus nobly devoted was as nobly done. To Tyndal belongs the honor of having given the first example of a translation based on true principles, and the excellence of later versions has been almost in exact proportion as they followed his. Believing that every part of Scripture had one sense and one only, the sense in the mind of the writer (*Obedience*, p. 304), he made it his work, using all philological helps that were accessible, to attain that sense. Believing that the duty of a translator was to place his readers as nearly as possible on a level with those for whom the books were originally written, he looked on all the later theological associations that had gathered round the words of the N. T. as hindrances rather than helps, and sought, as far as possible, to get rid of them. Not "grace," but "favor," even in John i. 17 (in edition of 1525); not "charity," but "love;" not "confessing," but "acknowl-

[a] As indicating progress, it may be mentioned that the first Hebrew professor, Robert Wakefield, was appointed at Oxford in 1530, and that Henry VIII.'s secretary, Pace, knew Greek, Hebrew, and Chaldee.

[b] The existence of a translation of Jonah by Tyndal, previously questioned by some editors and biographers, has been placed beyond a doubt by the discovery of a copy (believed to be unique) in the possession of the Hon. Lord Arthur Hervey. It is described in a letter by him to the *Bury Post* of Feb. 8, 1862, transferred shortly afterwards to the *Athenæum*

[c] The references to Tyndal are given to the Parker Society edition.

[d] Hallam's assertion that Tyndal's version "was avowedly taken from Luther's," originated probably in an inaccurate reminiscence of the title-page of Coverdale's (*Lit. of Europe*, i. 526).

[e] The only extant copy of the 8vo edition is in the Library of the Baptist College at Bristol. It was reproduced in 1862 in *fac-simile* by Mr. Francis Fry, Bristol, the impression being limited to 177 copies. Mr. Fry proves, by a careful comparison of type, size, water-mark, and the like, with those of other books from the same press, that it was printed by Peter Schoeffer of Worms. By a like process Mr. Anderson (i. 68) fixes Cologne as the place, and Peter Quentel as the printer of the 4to.

[f] In two of these (1534 and 1535) the words, "This cup is the New Testament in my blood," in 1 Cor. xi. were omitted (Anderson, i. 415).

[g] The localities of the editions are not without interest. Hamburgh, Cologne, Worms, in 1525; Antwerp in 1526–1528; Marlborow (= Marburg) in 1529; Strasburg (Joye's edit.) in 1531; Bergen-op-Zoom in 1533 (Joye's); John c. vi. at Nuremberg in 1533; Antwerp in 1534 (Cotton, *Printed Editions*, pp. 4–6).

[h] * This conjecture of Mr. Offor is not borne out by an examination of the book itself. See Westcott's *Hist. of the English Bible*, p. 64 f. A.

[i] Two names connect themselves sadly with this version A copy of the edition of 1534 was presented specially to Anne Boleyn, and is now extant in the British Museum. Several passages, such as might be marked for devotional use, are underscored in red ink Another reforming Lady, Joan Bocher, was known to have been active in circulating Tyndal's N. T. (Foxe i. 43; Strype, *Mem.* i. c. 26).

adging;" not "penance," but "repentance;" not "priests," but "seniors" or "elders;" not "salvation," but "health;" not "church," but "congregation," are instances of the changes which were then looked on as startling and heretical innovations (Sir T. More, *l. c.*). Some of them we are now familiar with. In others the later versions bear traces of a reaction in favor of the older phraseology. In this, as in other things, Tyndal was in advance, not only of his own age, but of the age that followed him. To him, however, it is owing that the versions of the English Church have throughout been popular, and not scholastic. All the exquisite grace and simplicity which have endeared the A. V. to men of the most opposite tempers and contrasted opinions — to J. H. Newman (*Dublin Review*, June, 1853) and J. A. Froude — is due mainly to his clear-sighted truthfulness.[a] The desire to make the Bible a people's book led him in one edition to something like a provincial, rather than a national translation,[b] but on the whole it kept him free from the besetting danger of the time, that of writing for scholars, not for the people; of a version full of "ink-horn" phrases, not in the spoken language of the English nation. And throughout there is the pervading stamp, so often wanting in other like works, of the most thorough truthfulness. No word has been altered to court a king's favor, or please bishops, or make out a case for or against a particular opinion. He is working freely, not in the fetters of prescribed rules. With the most entire sincerity he could say, "I call God to record, against the day we shall appear before our Lord Jesus to give a reckoning of our doings, that I never altered one syllable of God's word against my conscience, nor would this day, if all that is in the world, whether it be pleasure, honor, or riches, might be given me" (Anderson, i. 349).

IV. COVERDALE. — (1.) A complete translation of the Bible, different from Tyndal's, bearing the name of Miles Coverdale, printed probably at Zurich, appeared in 1535. The undertaking itself, and the choice of Coverdale as the translator, were probably due to Cromwell. Tyndal's controversial treatises, and the polemical character of his prefaces and notes, had irritated the leading ecclesiastics and embittered the mind of the king himself against him. All that he had written was publicly condemned. There was no hope of obtaining the king's sanction for anything that bore his name. But the idea of an English translation began to find favor. The rupture with the see of Rome, the marriage with Anne Boleyn, made Henry willing to adopt what was urged upon him as the surest way of breaking forever the spell of the Pope's authority. The bishops even began to think of the thing as possible. It was talked of in Convocation They would take it in hand themselves. The work did not, however, make much progress. The great preliminary question whether "venerable" words, such as hostia, penance, pascha, holocaust, and the like, should be retained, was still unsettled (Anderson, i. 414).[c] Not till "the day after doomsday" (the words are Cranmer's) were the English people likely to get their English Bible from the bishops (*ibid.* i. 577). Cromwell, it is probable, thought it better to lose no further time, and to strike while the iron was hot. A divine whom he had patronized, though not, like Tyndal, feeling himself called to that special work (*Pref. to Coverdale's Bible*), was willing to undertake it. To him accordingly it was intrusted. There was no stigma attached to his name, and, though a sincere reformer, neither at that time nor afterwards did he occupy a sufficiently prominent position to become an object of special persecution.[d]

(2.) The work which was thus executed was done, as might be expected, in a very different fashion from Tyndal's. Of the two men, one had made this the great object of his life, the other, in his own language, "sought it not, neither desired it," but accepted it as a task assigned him. One prepared himself for the work by long years of labor in Greek and Hebrew. The other is content to make a translation at second hand "out of the Douche (Luther's German Version) and the Latine."[e] The one aims at a rendering which shall be the truest and most exact possible. The other loses himself in weak commonplace as to the advantage of using many English words for one and the same word in the original, and in practice oscillates between "penance" and "repentance," "love" and "charity," "priests" and "elders," as though one set of words were as true and adequate as the other (*Preface*, p. 19). In spite of these weaknesses, however, there is much to like in the spirit and temper of Coverdale. He is a second-rate man, laboring as such contentedly, not ambitious to appear other than he is. He thinks it a great gain that there should be a diversity of translations. He acknowledges, though he dare not name it, the excellence of Tyndal's version,[f] and regrets the misfortune which left it incomplete.

---

[a] The testimony of a Roman Catholic scholar is worth quoting: "In point of perspicacity and noble simplicity, propriety of idiom and purity of style, no English version has as yet surpassed it (Geddes, *Prospectus for a new Translation*, p. 89). The writer cannot forbear adding Mr. Froude's judgment in his own words: "The peculiar genius, if such a word may be permitted, which breathes through it, the mingled tenderness and majesty, the Saxon simplicity, the preternatural grandeur, unequaled, unapproached, in the attempted improvements of modern scholars, — all are here, and bear the impress of the mind of one man, and that man William Tyndal" (*Hist. of Eng.* iii. 84).

[b] * Error; see p. 3428, note *h*. A.

[c] A list of such words, 99 in number, was formally laid before Convocation by Gardiner in 1542, with the proposal that they should be left untranslated, or Englished with as little change as possible (Lewis, *Hist.* ch. 2; [*Eng. Hexapla*, p. 105]).

[d] It is uncertain where this version was printed, the title-page being silent on that point. Zurich, Cologne, and Frankfort have all been conjectured. Coverdale is known to have been abroad, and may have come in contact with Luther.

[e] There seems something like an advertising tact in this title-page. A scholar would have felt that there was no value in any translation but one from the original. But the "Douche" would serve to attract the Reforming party, who held Luther's name in honor; while the "Latine" would at least conciliate the conservative feeling of Gardiner and his associates. Whitaker, however, maintains that Coverdale knew more Hebrew than he chose, at this time, to acknowledge, and refers to his translation of one difficult passage ("Ye take youre pleasure under the okes and under all grene trees, the children beyinge slaine in the valleys," Is. lvii. 5) as proving an independent judgment against the authority of Luther and the Vulgate (*Hist. and Crit. Enquiry*, p. 52).

[f] "If thou [the reader] be fervent in prayer, God shall not only send thee it [the Bible] in a bette

He states frankly that he had done his work with the assistance of that and of five others.[a] If the language of his dedication to the king, whom he compares to Moses, David, and Josiah, seems to be somewhat fulsome in its flattery, it is, at least, hardly more offensive than that of the dedication of the A. V., and there was more to palliate it.[b]

(3.) An inspection of Coverdale's version serves to show the influence of the authorities he followed.[c] The proper names of the O. T. appear for the most part in their Latin form, Elias, Eliseus, Ochozias; sometimes, as in Esay and Jeremy, in that which was familiar in spoken English. Some points of correspondence with Luther's version are not without interest. Thus "Cush," which in Wycliffe, Tyndal, and the A. V. is uniformly rendered "Ethiopia," is in Coverdale "Morians' land" (Ps. lxviii. 31; Acts viii. 27, &c.), after the "Mohrenlande" of Luther, and appears in this form accordingly in the P. B. [Prayer Book] version of the Psalms. The proper name Rabshakeh passes, as in Luther, into the "chief butler" (2 K. xviii. 17; Is. xxxvi. 11). In making the sons of David "priests" (2 Sam. viii. 18), he followed both his authorities. Ἐπίσκοποι are "bishops" in Acts xx. 28 ("overseers" in A. V.). "Shiloh," in the prophecy of Gen. xlix. 10, becomes "the worthy," after Luther's "der Held." "They houghed oxen" takes the place of "they digged down a wall," in Gen. xlix. 6. The singular word "Lamia" is taken from the Vulg., as the English rendering of *Ziim* ("wild beasts," A. V.) in Is. xxxiv. 14. The "tabernacle of witness," where the A. V. has "congregation," shows the same influence. In spite of Tyndal, the Vulg. "plena gratiâ," in Luke i. 28, leads to "full of grace;" while we have, on the other hand, "congregation" throughout the N. T. for ἐκκλησία, and "love" instead of "charity" in 1 Cor. xiii. It was the result of the same indecision that his language as to the Apocrypha lacks the sharpness of that of the more zealous reformers. "Baruch" is placed with the canonical books, after "Lamentations." Of the rest he says that they are "placed apart," as "not held by ecclesiastical doctors in the same repute" as the other Scriptures, but this is only because there are "dark sayings" which seem to differ from the "open Scripture." He has no wish that they should be "despised or little set by." "Patience and study would show that the two were agreed."

(4.) What has been stated practically disposes of the claim which has sometimes been made for this version of Coverdale's, as though it had been made from the original text (Anderson, i. 564; Whitaker, *Hist. and Crit. Enquiry*, p. 58). It is not improbable, however, that as time went on he added to his knowledge. The letter addressed by him to Cromwell (*Remains*, p. 492, Parker Soc.) obviously asserts, somewhat ostentatiously, an acquaintance "not only with the standing text of the Hebrew, with the interpretation of the Chaldee and the Greek," but also with "the diversity of reading of all texts." He, at any rate, continued his work as a painstaking editor. Fresh editions of his Bible were published, keeping their ground in spite of rivals, in 1537, 1539, 1550, 1553. He was called in at a still later period to assist in the Geneva version. Among smaller facts connected with this edition may be mentioned the appearance of Hebrew letters — of the name Jehovah — in the title-page (יהוה), and again in the margin of the alphabetic poetry of Lamentations, though not of Ps. cxix. The plural form "Biblia" is retained in the title-page, possibly however in its later use as a singular feminine [comp. BIBLE]. There are no notes, no chapter headings, no divisions into verses. The letters A, B, C, D, in the margin, as in the early editions of Greek and Latin authors, are the only helps for finding places. Marginal references point to parallel passages. The O. T. especially in Genesis, has the attraction of wood-cuts. Each book has a table of contents prefixed to it.[d]

V. MATTHEW. — (1.) In the year 1537, a large folio Bible appeared as edited and dedicated to the king, by Thomas Matthew. No one of that name appears at all prominently in the religious history of Henry VIII., and this suggests the inference that the name was pseudonymous, adopted to conceal the real translator. The tradition which connects this Matthew with John Rogers, the proto-martyr of the Marian persecution, is all but undisputed. It rests (1) on the language of the indictment and sentence which describe him (Foxe, *Acts and Monuments*, pp. 1029, 1563; Chester, *Life of Rogers*, pp. 418–423) as Joannes Rogers alias Matthew, as if it were a matter of notoriety; (2) the testimony of Foxe himself, as representing, if not personal knowledge, the current belief of his time; (3) the occurrence, at the close of a short exhortation to the Study of Scripture in the Preface, of the initials J. R.;[e] (4) internal evidence. This subdivides itself. (*a.*) Rogers, who had graduated at Pembroke Coll. Cambridge in 1525, and had sufficient fame to be invited to the new Cardinal's College at Oxford, accepted the office of chaplain to the merchant adventurers of Antwerp, and there became acquainted with Tyndal, two years before the latter's death. Matthew's Bible, as might be expected, if this hypothesis were true, reproduces Tyndal's work, in the N. T. entirely, in the O. T. as far as 2 Chr., the rest being taken with occasional modifications from Coverdale. (*b.*) The language of the dedication is that of one who has mixed much, as

[version] by the ministration of those that began it before, but shall also move the hearts of those that before meddled not withal."

[a] The five were probably — (1) the Vulgate, (2) Luther's, (3) the German Swiss version of Zurich, (4) the Latin of Pagninus, (5) Tyndal's. Others, however, have conjectured a German translation of the Vulgate earlier than Luther's, and a Dutch version from Luther (Whitaker, *Hist. and Crit. Enquiry*, p. 49).

[b] He leaves it to the king, *e. g.*, "to correct his translation, to amend it, to improve [= condemn] it, yea, and clean to reject it, if your godly wisdom shall think necessary."

[c] Ginsburg (*App. to Coheleth*) has shown that with regard to one book at least of the O. T., Coverdale followed the German-Swiss version printed at Zurich in 1531, with an almost servile obsequiousness.

[d] A careful reprint, though not a fac-simile, of Coverdale's version has been published by Bagster (1838; T.) for William Tyndal, R. G. for Richard Grafton printer.

[e] These ornamental initials are curiously selected. H. R. for the king's name, W. T. (at the end of the O. T.) for William Tyndal, R. G. for Richard Grafton printer.

Digitized by Google

Rogers mixed, with foreign reformers. "This hope have the godlie even in strange countries, in your grace's godliness."

(2.) The printing of the book was begun apparently abroad, and was carried on as far as the end of Isaiah. At that point a new pagination begins, and the names of the London printers, Grafton and Whitechurch, appear. The history of the book was probably something like this: Coverdale's translation had not given satisfaction — least of all were the more zealous and scholar-like reformers contented with it. As the only complete English Bible, it was, however, as yet, in possession of the field. Tyndal and Rogers, therefore, in the year preceding the imprisonment of the former, determined on another, to include O. T., N. T., and Apocrypha, but based throughout on the original. Left to himself, Rogers carried on the work, probably at the expense of the same Antwerp merchant who had assisted Tyndal (Poyntz), and thus got as far as Isaiah. The enterprising London printers, Grafton and Whitechurch, then came in (Chester, *Life of Rogers*, p. 29). It would be a good speculation to enter the market with this, and so drive out Coverdale's, in which they had no interest. They accordingly embarked a considerable capital, £500, and then came a stroke of policy which may be described as a miracle of audacity. Rogers's name, known as the friend of Tyndal, is suppressed, and the simulacrum of Thomas Matthew disarms suspicion. The book is sent by Grafton to Cranmer. He reads, approves, rejoices. He would rather have the news of its being licensed than a thousand pounds (Chester, pp. 425–427). Application is then made both by Grafton and Cranmer to Cromwell. The king's license is granted, but the publisher wants more. Nothing less than a monopoly for five years will give him a fair margin of profit. Without this, he is sure to be undersold by piratical, inaccurate editions, badly printed, on inferior paper. Failing this, he trusts that the king will order one copy to be bought by every incumbent, and six by every abbey. If this was too much, the king might, at least, impose that obligation on all the popishly-inclined clergy. That will bring in something, besides the good it may possibly do them (Chester, p. 430). The application was, to some extent, successful. A copy was ordered, by royal proclamation, to be set up in every church, the cost being divided between the clergy and the parishioners. This was, therefore, the first Authorized Version. It is scarcely conceivable, however, that Henry could have read the book which he thus sanctioned, or known that it was substantially identical with what had been publicly stigmatized in his Acts of Parliament (*ut supra*). What had before given most offense had been the polemic character of Tyndal's annotations, and here were notes bolder and more thorough still. Even the significant W. T. does not appear to have attracted notice.

(3.) What has been said of Tyndal's version applies, of course, to this. There are, however, signs of a more advanced knowledge of Hebrew. All the technical words connected with the Psalms, Neginoth, Shiggaion, Sheminith, etc., are elaborately explained. Ps. ii. is printed as a dialogue. The names of the Hebrew letters are prefixed to the verses of Lamentations. Reference is made to the Chaldee Paraphrase (Job vi.), to Rabbi Abraham (Job xix.), to Kimchi (Ps. iii.). A like range of knowledge is shown in the N. T. Strabo is quoted to show that the Magi were not kings, Macrobius as testifying to Herod's ferocity (Matt. ii.), Erasmus's Paraphrase on Matt. xiii., xv. The popular identification of Mary Magdalene with "the woman that was a sinner" is discussed, and rejected (Luke x.). More noticeable even than in Tyndal is the boldness and fullness of the exegetical notes scattered throughout the book. Strong and earnest in asserting what he looked on as the central truths of the Gospel, there was in Rogers a Luther-like freedom in other things which has not appeared again in any authorized translation or popular commentary. He guards his readers against looking on the narrative of Job i. as literally true. He recognizes a definite historical starting-point for Ps. xlv. ("The sons of Korah praise Solomon for the beauty, eloquence, power, and nobleness, both of himself and of his wife"), Ps. xxii. ("David declareth Christ's dejection . . . . . and all, under figure of himself"), and the Song of Solomon ("Solomon made this balade for himself and his wife, the daughter of Pharaoh, under the shadow of himself, figuring Christ," etc.). The chief duty of the Sabbath is "to minister the fodder of the Word to simple souls," to be "pitiful over the weariness of such neighbors as labored sore all the week long." "When such occasions come as turn our rest to occupation and labor, then ought we to remember that the Sabbath was made for man, and not man for the Sabbath" (Jer. xvii.). He sees in the Prophets of the N. T. simply "expounders of Holy Scripture" (Acts xv.). To the man living in faith, "Peter's fishing after the resurrection, and all deeds of matrimony are pure spiritual;" to those who are not, "learning, doctrine, contemplation of high things, preaching, study of Scripture, founding of churches and abbeys, are works of the flesh" (*Pref. to Romans*).[a] "Neither is outward circumcision or outward baptism worth a pin of themselves, save that they put us in remembrance to keep the covenant" (1 Cor. vii.). "He that desireth honor, graspeth after lucre . . . . castles, parks, lordships . . . . desireth not a work, much less a good work, and is nothing less than a bishop" (1 Tim. iii.). Ez. xxiv. is said to be "against bishops and curates that despise the flock of Christ." The ἄγγελον ἐκκλησίας of Rev. ii. and iii. appears (as in Tyndal) as "the messenger of the congregation." Strong protests against purgatory are found in notes to Ez. xviii. and 1 Cor. iii., and in the "Table of Principal Matters" it is significantly stated under the word Purgatory that "it is not in the Bible, but the purgation and remission of our sin is made us by the abundant mercy of God." The preface to the Apocrypha explains the name, and distinctly asserts the inferiority of the books. No notes are added, and the translation is taken from Coverdale, as if it had not been worth while to give much labor to it.

(4.) A few points of detail remain to be noticed. In the order of the books of the N. T. Rogers follows Tyndal, agreeing with the A. V. as far as the Epistle to Philemon. This is followed by the Epistles of St. John, then that to the Hebrews, then those of St. Peter, St. James, and St. Jude. Wood-cuts, not very freely introduced elsewhere, are prefixed to every chapter in the Revelation. The introduction of the "Table" mentioned above

[a] The long preface to the Romans (seven folio pages) was substantially identical with that in Tyndal's edition of 1534.

Digitized by Google

gives Rogers a claim to be the Patriarch of Concordances, the "father" of all such as write in dictionaries of the Bible. Reverence for the Hebrew text is shown by his striking out the three verses which the Vulgate has added to Ps. xiv. In a later edition, published at Paris, not by Rogers himself, but by Grafton, under Coverdale's superintendence, in 1539, the obnoxious prologue and prefaces were suppressed, and the notes systematically expurgated and toned down. The book was in advance of the age. Neither book-sellers nor bishops were prepared to be responsible for it.

VI. TAVERNER (1539). — (1.) The boldness of the pseudo-Matthew had, as has been said, frightened the ecclesiastical world from its propriety. Coverdale's version was, however, too inaccurate to keep its ground. It was necessary to find another editor, and the printers applied to Richard Taverner. But little is known of his life. The fact that, though a layman, he had been chosen as one of the canons of the Cardinal's College at Oxford indicates a reputation for scholarship, and this is confirmed by the character of his translation. It professes, in the title-page, to be "newly recognized, with great diligence, after the most faithful exemplars." The editor acknowledges "the labors of others (*i. e.* Tyndal, Coverdale, and Matthew, though he does not name them) who have neither undiligently nor unlearnedly travelled," owns that the work is not one which can be done "absolutely" (*i. e.* completely) by one or two persons, but requires "a deeper conferring of many learned wittes together, and also a juster time, and longer leisure;" but the thing had to be done; he had been asked to do it. He had "used his talent" as he could.

(2.) In most respects this may be described as an expurgated edition of Matthew's. There is a Table of Principal Matters, and there are notes; but the notes are briefer, and less polemical. The passages quoted above are, *e. g.* omitted wholly or in part. The epistles follow the same order as before.

VII. CRANMER. — (1.) In the same year as Taverner's, and coming from the same press, appeared an English Bible, in a more stately folio, printed with a more costly type, bearing a higher name than any previous edition. The title-page is an elaborate engraving, the spirit and power of which indicate the hand of Holbein. The king, seated on his throne, is giving the *Verbum Dei* to the bishops and doctors, and they distribute it to the people, while doctors and people are all joining in cries of "*Vivat Rex.*" It declares the book to be "truly translated after the verity of the Hebrew and Greek texts" by "divers excellent learned men, expert in the foresaid tongues." A preface, in April, 1540, with the initials T. C., implies the archbishop's sanction. In a later edition (Nov. 1540), his name appears on the title-page, and the names of his coadjutors are given, Cuthbert (Tonstal) Bishop of Durham, and Nicholas (Heath) Bishop of Rochester; but this does not exclude the possibility of others having been employed for the first edition.

(2.) Cranmer's version presents, as might be expected, many points of interest. The prologue gives a more complete ideal of what a translation ought to be than we have as yet seen. Words not in the original are to be printed in a different type. They are added, even when "not wanted by the sense," to satisfy those who have "missed them" in previous translations, *i. e.* they represent the various readings of the Vulgate where it differs from the Hebrew. The sign * indicates diversity in the Chaldee and Hebrew. It had been intended to give all these, but it was found that this would have taken too much time and space, and the editors purposed therefore to print them in a little volume by themselves. The frequent hands (☞) in the margin, in like manner, show an intention to give notes at the end; but Matthew's Bible had made men cautious, and, as there had not been time for "the King's Council to settle them," they were omitted, and no help given to the reader beyond the marginal references. In absence of notes, the lay-reader is to submit himself to the "godly-learned in Christ Jesus." There is, as the title-page might lead us to expect, a greater display of Hebrew than in any previous version. The books of the Pentateuch have their Hebrew names given, *Bereschith* (Genesis), *Velle Schemoth* (Exodus), and so on. 1 and 2 Chr. in like manner appear, as *Dibre Haiamim*. In the edition of 1541, many proper names in the O. T. appear in the fuller Hebrew form, *e. g.* Amaziahu, Jeremiahu. In spite of this parade of learning, however, the edition of 1539 contains, perhaps, the most startling blunder that ever appeared under the sanction of an archbishop's name. The editors adopted the preface which, in Matthew's Bible, had been prefixed to the Apocrypha. In that preface the common traditional explanation of the name was concisely given. They appear, however, to have shrunk from offending the conservative party in the Church by applying to the books in question so damnatory an epithet as Apocrypha. They looked out for a word more neutral and respectful, and found one that appeared in some MSS. of Jerome so applied, though in strictness it belonged to an entirely different set of books. They accordingly substituted that word, leaving the preface in all other respects as it was before, and the result is the somewhat ludicrous statement that the "books were called *Hagiographa*," because "they were read in secret and apart"!

(3.) A later edition in 1541 presents a few modifications worth noticing. It appears as "authorized" to be "used and frequented" in "every church in the kingdom." The introduction, with all its elaborate promise of a future perfection disappears, and, in its place, there is a long preface by Cranmer, avoiding as much as possible all references to other translations, taking a safe Via Media tone, blaming those who "refuse to read," on the one hand, and "inordinate reading," on the other. This neutral character, so characteristic of Cranmer's policy, was doubtless that which enabled it to keep its ground during the changing moods of Henry's later years. It was reprinted again and again, and was the Authorized Version of the English Church till 1568 — the interval of Mary's reign excepted. From it, accordingly, were taken most, if not all, the portions of Scripture in the Prayer Books of 1549 and 1552. The Psalms, as a whole, the quotations from Scripture in the Homilies, the sentences in the Communion Services and some phrases elsewhere, [a] still preserve the remembrance of it. The oscillating character of the book is shown in the use of "love" instead of "charity" in 1 Cor. xiii.; and "congregation" instead of "church" generally, after Tyndal; while in 1 Tim. iv. 14, we have the singular rendering

[a] Such, *e. g.*, as "worthy fruits of penance."

Digitized by Google

as if to gain the favor of his opponents, "with authority of priesthood." The plan of indicating doubtful texts by a smaller type was adhered to, and was applied, among other passages, to Ps. xiv. 5, 6, 7, and the more memorable text of 1 John v. 7. The translation of 2 Tim. iii. 16, "All Scripture given by inspiration of God, is profitable," etc., anticipated a construction of that text which has sometimes been boasted of, and sometimes attacked, as an innovation. In this, however, Tyndal had led the way.

VIII. GENEVA. — (1.) The experimental translation of the Gospel of St. Matthew by Sir John Cheke into a purer English than before (Strype, *Life of Cheke*, vii. 3), had so little influence on the versions that followed that it hardly calls for more than a passing notice, as showing that scholars were as yet unsatisfied. The reaction under Mary gave a check to the whole work, as far as England was concerned; but the exiles who fled to Geneva entered on it with more vigor than ever. Cranmer's version did not come up to their ideal. Its size made it too costly. There were no explanatory or dogmatic notes. It followed Coverdale too closely; and where it deviated, did so, in some instances, in a retrograde direction. The Genevan refugees — among them Whittingham, Goodman, Pullain, Sampson, and Coverdale himself — labored "for two years or more, day and night." They entered on their "great and wonderful work" with much "fear and trembling." Their translation of the N. T. was "diligently revised by the most approved Greek examples" (MSS. or editions?) (*Preface*). The N. T., translated by Whittingham, was printed by Conrad Badius in 1557, the whole Bible in 1560.

(2.) Whatever may have been its faults, the Geneva Bible was unquestionably, for sixty years, the most popular of all versions. Largely imported in the early years of Elizabeth, it was printed in England in 1561, and a patent of monopoly given to James Bodleigh. This was transferred, in 1576, to Barker, in whose family the right of printing Bibles remained for upwards of a century. Not less than eighty editions, some of the whole Bible, were printed between 1558 and 1611.[a] It kept its ground for some time even against the A. V., and gave way, as it were, slowly and under protest. The causes of this general acceptance are not difficult to ascertain. The volume was, in all its editions, cheaper and more portable — a small quarto, instead of the large folio of Cranmer's "Great Bible." It was the first Bible which laid aside the obsolescent black letter, and appeared in Roman type. It was the first which, following the Hebrew example, recognized the division into verses, so dear to the preachers or hearers of sermons. It was accompanied, in most of the editions after 1578, by a Bible Dictionary of considerable merit. The notes were often really helpful in dealing with the difficulties of Scripture, and were looked on as spiritual and evangelical. It was accordingly the version specially adopted by the great Puritan party through the whole reign of Elizabeth, and far into that of James. As might be expected, it was based on Tyndal's version, often returning to it where the intermediate renderings had had the character of a compromise.

(3.) Some peculiarities are worthy of special notice: (1.) It professes a desire to restore the "true writing" of many Hebrew names, and we meet accordingly with forms like Izhak (Isaac), Jaacob, and the like. (2.) It omits the name of St. Paul from the title of the Epistle to the Hebrews; and, in a short preface, leaves the authorship an open question. (3.) It avows the principle of putting all words not in the original in Italics. (4.) It presents, in a calendar prefixed to the Bible something like a declaration of war against the established order of the Church's lessons, commemorating Scripture facts, and the deaths of the great Reformers, but ignoring saints' days altogether. (5.) It was the first English Bible which entirely omitted the Apocrypha. (6.) The notes were characteristically Swiss, not only in their theology, but in their politics. They made allegiance to kings dependent upon the soundness of their faith, and in one instance (note on 2 Chr. xv. 16) at least seemed, to the easily startled James I., to favor tyrannicide.[b]

(4.) The circumstances of the early introduction of the Geneva version are worth mentioning, if only as showing in how different a spirit the great fathers of the English Reformation, the most conservative of Anglican theologians, acted from that which has too often animated their successors. Men talk now of different translations and various readings as likely to undermine the faith of the people. When application was made to Archbishop Parker, in 1565, to support Bodleigh's application for a license to reprint the Geneva version in 12mo, he wrote to Cecil in its favor. He was at the time looking forward to the work he afterwards accomplished, of "one other special Bible for the churches, to be set forth as convenient time and leisure should permit;" but in the mean time it would "nothing hinder, but rather do much good, to have diversity of translations and readings" (Strype, *Life of Parker*, iii. 6).[c] In many of the later reprints of this edition the N. T. purports to be based upon Beza's Latin version; and the notes are said to be taken from [Beza,] Joac. Camerarius, P. Loseler Villerius, and Fr. Junius.

IX. THE BISHOPS' BIBLE. — (1.) The facts just stated will account for the wish of Archbishop Parker, in spite of his liberal tolerance, to bring out another version which might establish its claims against that of Geneva. Great preparations were made. The correspondence of Parker with his suffragans presents some points of interest, as showing how little agreement there was as to the true theory of a translation. Thus while Sandys Bishop of Worcester, finds fault with the "common translation" (Geneva?), as "following Munster too much," and as "swerving much from the Hebrew," Guest, Bishop of St. David's, who took

[a] Between 1558 and 1644, according to the *Quar. Rev.* for April, 1870, about 150 editions were published of the Bible or parts thereof. It has been observed that in the *Souldiers Pocket Bible*, published in 1643 for the use of Cromwell's army, nearly all the selections of Scripture were taken from the Geneva version. See the reprint by George Livermore, Cambridge, 1861, p. vi. A.

[b] The note "Herein he showed that he lacked zeal, for she ought to have died," was probably one which Scotch fanatics had handled in connection with the name of James's mother.

[c] The Geneva version, as published by Parker, is that popularly known as the *Breeches* Bible, from its rendering of Gen. iii. 7. It had however been preceded in this by Wycliffe's

Digitized by Google

the Psalms, acted on the principle of translating them so as to agree with the N. T. quotations, "for the avoiding of offense;" and Cox, Bishop of Ely, while laying down the sensible rule that "inkhorn terms were to be avoided," also went on to add "that the usual terms were to be retained so far forth as the Hebrew will well bear" (Strype, *Parker*, iii. 6). The principle of pious frauds, of distorting the truth for the sake of edification, has perhaps often been acted on by other translators. It has not often been so explicitly avowed as in the first of these suggestions.

(2.) The bishops thus consulted, eight in number, together with some deans and professors, brought out the fruit of their labors in a magnificent folio (1568 and 1572). Everything had been done to make it attractive. A long erudite preface vindicated the right of the people to read the Scriptures, and (quoting the authority of Bishop Fisher) admitted the position which later divines have often been slow to admit that "there be yet in the Gospel many dark places which, without all doubt, to the posterity shall be made much more open." Wood-engravings of a much higher character than those of the Geneva Bible were scattered profusely, especially in Genesis. Three portraits of the Queen, the Earl of Leicester, and Lord Burleigh, beautiful specimens of copperplate engraving, appeared on the title-pages of the several parts.[a] A map of Palestine was given, with degrees of latitude and longitude, in the edition of 1572. A most elaborate series of genealogical tables, prepared by Hugh Broughton, the great Rabbi of the age (of whom more hereafter), but ostensibly by Speed the antiquary (Broughton's name being in disfavor with the bishops), was prefixed (Strype, *Parker*, iv. 20; Lightfoot, *Life of Broughton*). In some points it followed previous translations, and was avowedly based on Cranmer's. "A new edition was necessary." "This had led some well-disposed men to recognize it again, not as condemning the former translation, which has been followed mostly of any other translation, excepting the original text" (*Pref. of* 1572). Cranmer's prologue was reprinted. The Geneva division into verses was adopted throughout.

(3.) Some peculiarities, however, appear for the first and last time. (1.) The books of the Bible are classified as legal, historical, sapiential, and prophetic. This was easy enough for the O. T., but the application of the same idea to the N. T. produced some rather curious combinations. The Gospels, the Catholic Epistles, and those to Titus, Philemon, and the Hebrews, are grouped together as legal, St. Paul's other epistles as sapiential; the Acts appear as the one historical, the Revelation as the one prophetic book. (2.) It is the only Bible in which many passages, sometimes nearly a whole chapter, have been marked for the express purpose of being omitted when the chapters were read in the public service of the Church. (3.) One edition contained the older version of the Psalms from Matthew's Bible, in parallel columns with that now issued, a true and practical acknowledgment of the benefit of a diversity of translations. (4.) The initials of the translators were attached to the books which they had severally undertaken. The work was done on the plan of limited, not joint liability. (5.) Here as in the Geneva, there is the attempt to give the Hebrew proper names more accurately, as, *e. g.*, in Heva, Isahac, Uzishu, etc.

(4.) Of all the English versions, the Bishops' Bible had probably the least success. It did not command the respect of scholars, and its size and cost were far from meeting the wants of the people. Its circulation appears to have been practically limited to the churches which were ordered to be supplied with it. It had however, at any rate, the right to boast of some good Hebrew scholars among the translators. One of them, Bishop Alley, had written a Hebrew Grammar; and though vehemently attacked by Broughton (Townley, *Literary History of the Bible*, iii. 190), it was defended as vigorously by Fulke, and, together with the A. V. received from Selden the praise of being "the best translation in the world" ("Table Talk," *Works*, iii. 2009).

X. RHEIMS AND DOUAY. — (1.) The successive changes in the Protestant versions of the Scriptures were, as might be expected, matter of triumph to the controversialists of the Latin Church. Some saw in it an argument against any translation of Scripture into the spoken language of the people. Others pointed derisively to the want of unity which these changes displayed. There were some, however, who took the line which Sir T. More and Gardiner had taken under Henry VIII. They did not object to the principle of an English translation. They only charged all the versions hitherto made with being false, corrupt, heretical. To this there was the ready retort, that they had done nothing: that their bishops in the reign of Henry had promised, but had not performed. It was felt to be necessary that they should take some steps which might enable them to turn the edge of this reproach, and the English refugees who were settled at Rheims — Martin, Allen (afterwards cardinal), and Bristow — undertook the work. Gregory Martin, who had graduated at Cambridge, had signalized himself by an attack on the existing versions,[b] and had been answered in an elaborate treatise by Fulke, Master of Catherine Hall, Cambridge (*A Defence of the Sincere and True Translation*, etc.). The charges are mostly of the same kind as those brought by Sir T. More against Tyndal. "The old time-honored words were discarded. The authority of the LXX. and Vulgate was set at nought when the translator's view of the meaning of the Hebrew and Greek differed from what he found in them." The new model translation was to avoid these faults. It was to command the respect at once of priests and people. After an incubation of some years it was published at Rheims in 1582. Though Martin was competent to translate from the Greek, it professed to be based on "the authentic text of the Vulgate."

---

[a] The fitness of these illustrations is open to question. Others still more incongruous found their way into the text of the edition of 1572, and the feelings of the Puritans were shocked by seeing a wood-cut of Neptune in the initial letters of Jonah, Micah, and Nahum, while that of the Ep. to the Hebrews went so far as to give Leda and the Swan. There must, to say the least, have been very slovenly editorship to permit this.

[b] "A discovery of the manifold corruptions of Holy Scriptures by the Heretikes of our days, specially of the English sectaries." The language of this and other like books was, as might be expected, very abusive. The Bible, in Protestant translations, was "not God's word, but the devil's."

Digitized by Google

Notes were added, as strongly dogmatic as those of the Geneva Bible, and often keenly controversial. The work of translation was completed somewhat later by the publication of the O. T. at Douay in 1609. The language was precisely what might have been expected from men who adopted Gardiner's ideal of what a translation ought to be. At every page we stumble on "strange ink-horn words," which never had been English, and never could be, such, *e. g.*, as "the Pasche and the Azymes" (Mark xvi. 1), "the arch-synagogue" (Mark v. 35), "in prepuce" (Rom. iv. 9), "obdurate with the fallacie of sin" (Heb. iii. 13), "a greater hoste" (Heb. xi. 4), "this is the annuntiation" (1 John v. 5), "pre-ordinate" (Acts xiii. 48), "the justifications of our Lord" (Luke i. 6), "what is to me and thee" (John ii. 4), "longanimity" (Rom. ii. 4), "purge the old leaven that you may be a new paste, as you are azymes" (1 Cor. iv. 7), "you are evacuated from Christ" (Gal. v. 4), and so on.[a]

(2.) A style such as this had, as might be expected, but few admirers. Among those few, however, we find one great name. Bacon, who leaves the great work of the reign of James unnoticed, and quotes almost uniformly from the Vulgate, goes out of his way to praise the Rhemish version for having restored "charity" to the place from which Tyndal had expelled it, in 1 Cor. xiii. (*Of the Pacification of the Church*).

XI. AUTHORIZED VERSION. — (1.) The position of the English Church in relation to the versions in use at the commencement of the reign of James was hardly satisfactory. The Bishops' Bible was sanctioned by authority. That of Geneva had the strongest hold on the affections of the people. Scholars, Hebrew scholars in particular, found grave fault with both. Hugh Broughton, who spoke Hebrew as if it had been his mother-tongue, denounced the former as being full of "traps and pitfalls," "overthrowing all religion," and proposed a new revision to be effected by an English Septuagint (72), with power to consult gardeners, artists, and the like, about the words connected with their several callings, and bound to submit their work to "one qualified for difficulties." This ultimate referee was, of course, to be himself (Strype, *Whitgift*, iv. 19, 23). Unhappily, neither his temper nor his manners were such as to win favor for this suggestion. Whitgift disliked him, worried him, drove him into exile. His feeling was, however, shared by others; and among the demands of the Puritan representatives at the Hampton Court Conference in 1604 (Dr. Reinolds being the spokesman), was one for a new, or, at least, a revised translation. The special objections which they urged were neither numerous (three passages only — Ps. cv. 28, cvi. 30, Gal. iv. 25, were referred to) nor important, and we must conclude either that this part of their case had not been carefully got up, or that the bullying to which they were exposed had had the desired effect of throwing them into some confusion. The bishops treated the difficulties which they did raise with supercilious scorn. They were "trivial, old, and often answered." Bancroft raised the cry of alarm which a timid Conservatism has so often raised since. "If every man's humor were to be followed, there would be no end of translating" (Cardwell, *Conferences*, p. 188). Cranmer's words seemed likely to be fulfilled again. Had it been left to the bishops, we might have waited for the A. V. "till the day after doomsday." Even when the work was done, and the translators acknowledged that the Hampton Court Conference had been the starting-point of it, they could not resist the temptation of a fling at their opponents. The objections to the Bishops' Bible had, they said, been nothing more than a shift to justify the refusal of the Puritans to subscribe to the Communion Book (*Preface* to A. V.). But the king disliked the politics of the Geneva Bible. Either repeating what he had heard from others, or exercising his own judgment, he declared that there was as yet no good translation, and that that was the worst of all. Nothing, however, was settled at the Conference beyond the hope thus held out.

(2.) But the king was not forgetful of what he thought likely to be the glory of his reign. The work of organizing and superintending the arrangements for a new translation was one specially congenial to him, and in 1606 the task was accordingly commenced. The selection of the fifty-four scholars[b] to whom it was entrusted, seems, on the whole, to have been a wise and fair one. Andrews Saravia, Overal, Montague, and Barlow, represented the "higher" party in the Church; Reinolds, Chaderton, and Lively that of the Puritans.[c] Scholarship unconnected with party was represented by Henry Savile and John Boys. One name is indeed conspicuous by its absence. The greatest Hebrew scholar of the age, the man who had, in a letter to Cecil (1595), urged this very plan of a joint translation, who had already translated several books of the O. T. (Job, Ecclesiastes, Daniel, Lamentations) was ignominiously excluded. This may have been, in part, owing to the dislike with which Whitgift and Bancroft had all along regarded him. But in part, also, it was owing to Broughton's own character. An unmanageable temper showing itself in violent language, and the habit of stigmatizing those who differed from him, even on such questions as those connected with names and dates, as heretical and atheistic, must have made him thoroughly impracticable; one of the men whose presence throws a committee or Conference into chaos.[d]

---

[a] Even Roman Catholic divines have felt the superiority of the A. V., and Challoner, in his editions of the N. T. in 1748, and the Bible, 1763, often follows it in preference to the Rheims and Douay translations.

[b] Only forty-seven names appear in the king's list (Burnet, *Reform. Records*). Seven may have died, or declined to act; or it may have been intended that there should be a final Committee of Revision. A full list is given by Fuller (*Ch. Hist.* x.); and is reproduced, with biographical particulars, by Todd and Anderson.

[c] This side was, however, weakened by the death of Reinolds and Lively during the progress of the work. The loss of the latter, Hebrew professor at Cambridge for thirty years, was every way deplorable.

[d] It deserves notice that Broughton is the only English translator who has adopted the *Eternal* as the equivalent for Jehovah, as in the French version. To him also perhaps, more than to any other divine, we owe the true interpretation of the Descent into Hell.

(3.) What reward other than that of their own consciences and the judgment of posterity were the men thus chosen to expect for their long and laborious task? The king was not disposed to pay them out of his state revenue. Gold and silver were not always plentiful in the household of the English Solomon, and from him they received nothing (Heywood, *State of Auth. Bibl. Revision*). There remained, however, an ingenious form of liberality, which had the merit of being inexpensive. A king's letter was sent to the archbishops and bishops, to be transmitted by them to their chapters, commending all the translators to their favorable notice. They were exhorted to contribute in all 1,000 marks, and the king was to be informed of each man's liberality. If any livings in their gift, or in the gift of private persons, became vacant, the king was to be informed of it, that he might nominate some of the translators to the vacant preferment. Heads of colleges, in like manner, were enjoined to give free board and lodging to such divines as were summoned from the country to labor in the great work (Strype, *Whitgift*, iv.). That the king might take his place as the director of the whole, a copy of fifteen instructions was sent to each translator, and apparently circulated freely in both Universities.

(4.) The instructions thus given will be found in Fuller (*l. c.*), and with a more accurate text in Burnet (*Reform. Records*). It will not be necessary to give them here in full; but it will be interesting to note the bearing of each clause upon the work in hand, and its relation to previous versions. (1.) The Bishops' Bible was to be followed, and as little altered as the original will permit. This was intended probably to quiet the alarm of those who saw, in the proposal of a new version, a condemnation of that already existing. (2.) The names of prophets and others were to be retained, as nearly as may be as they are vulgarly used. This was to guard against forms like Izhak, Jeremiahu, etc., which had been introduced in some versions, and which some Hebrew scholars were willing to introduce more copiously. To it we owe probably the forms Jeremy, Elias, Osee, Core, in the N. T. (3.) The old ecclesiastical words to be kept, as the word Church not to be translated Congregation. The rule was apparently given for the sake of this special application. "Charity," in 1 Cor. xiii. was probably also due to it. The earlier versions, it will be remembered, had gone on the opposite principle. (4.) When any word hath divers significations, that to be kept which hath been most commonly used by the most eminent fathers, being agreeable to the propriety of the place and the analogy of faith. This, like the former, tends to confound the functions of the preacher and the translator, and substitutes ecclesiastical tradition for philological accuracy. (5.) The division of the chapters to be altered either not at all, or as little as possible. Here, again, convenience was more in view than truth and accuracy, and the result is that divisions are perpetuated which are manifestly arbitrary and misleading. (6.) No marginal notes to be affixed but only for the explanation of Hebrew and Greek words. This was obviously directed against the Geneva notes, as the special objects of the king's aversion. Practically, however, in whatever feeling it originated, we may be thankful that the A. V. came out as it did, without note or comment. The open Bible was placed in the hands of all readers. The work of interpretation was left free. Had an opposite course been adopted, we might have had the tremendous evil of a whole body of exegesis imposed upon the Church by authority, reflecting the Calvinism of the Synod of Dort, the absolutism of James, the high flying prelacy of Bancroft. (7.) Such quotations of places to be marginally set down as may serve for fit reference of one Scripture to another. The principle that Scripture is its own best interpreter was thus recognized, but practically the marginal references of the A. V. of 1611 were somewhat scanty, most of those now printed having been added in later editions. (8 and 9.) State plan of translation. Each company of translators is to take its own books; each person to bring his own corrections. The company to discuss them, and having finished their work, to send it on to another company, and so on. (10.) Provides for differences of opinion between two companies by referring them to a general meeting. (11.) Gives power, in cases of difficulty, to consult any scholars. (12.) Invites suggestions from any quarter. (13.) Names the directors of the work: Andrews, Dean of Westminster; Barlow, Dean of Chester; and the Regius Professors of Hebrew and Greek at both Universities. (14.) Names translations to be followed when they agree more with the original than the Bishops' Bible, *sc.* Tyndal's, Coverdale's, Matthew's, Whitchurch's (Cranmer's), and Geneva. (15.) Authorizes Universities to appoint three or four overseers of the work.

(5.) It is not known that any of the correspondence connected with this work, or any minute of the meetings for conference is still extant. Nothing is more striking than the silence with which the version that was to be the inheritance of the English people for at least two centuries and a half was ushered into the world. Here and there we get glimpses of scholars coming from their country livings to their old college haunts to work diligently at the task assigned them (Peck, *Desiderata Curiosa*, ii. 87). We see the meetings of translators, one man reading the chapter which he has been at work on, while the others listen, with the original, or Latin, or German, or Italian, or Spanish versions in their hands (Selden, *Table Talk*). We may represent to ourselves the differences of opinion, settled by the casting vote of the "odd man," or by the strong overbearing temper of a man like Bancroft,[a] the minority comforting themselves with the thought that it was no new thing for the truth to be outvoted (Gell, *Essay towards Amendment of last Eng. Transl. of Bible*, p. 321).[b] Dogmatic interests were in some cases allowed to bias the translation, and the Calvinism of one party, the prelatic views of another, were both represented at the expense of accuracy (Gell, *l. c.*).[c]

(6.) For three years the work went on, the sepa-

[a] Miles Smith, himself a translator and the writer of the Preface, complained of Bancroft that there was no contradicting him (Beard, *Revised Eng. Bible*).

[b] Gell's evidence, as having been chaplain to Archbishop Abbot, carries some weight with it. His works are to be found in the Brit. Mus. Library, Mr. Scrivener's statement to the contrary being apparently an oversight (*Supplement to A. V. of N. T.* p. 101).

[c] The following passages are those commonly referred to in support of this charge: (1.) The rendering "such as should be saved," in Acts ii. 47. (2.) The insertion of the words "any man" in Heb. x 38

Digitized by Google

ate companies comparing notes as directed. When the work drew towards its completion it was necessary to place it under the care of a select few. Two from each of the three groups were accordingly selected, and the six met in London, to superintend the publication. Now, for the first time, we find any more definite remuneration than the shadowy promise held out in the king's letter, of a share in the 1,000 marks which Deans and Chapters would not contribute. The matter had now reached its business stage, and the Company of Stationers thought it expedient to give the six editors thirty pounds each, in weekly payments, for their nine months' labor. The final correction, and the task of writing the arguments of the several books, was given to Bilson, Bishop of Winchester, and Dr. Miles Smith, the latter of whom also wrote the Dedication and the Preface. Of these two documents the first is unfortunately familiar enough to us, and is chiefly conspicuous for its servile adulation.[a] James I. is "that sanctified person," "enriched with singular and extraordinary graces," that had appeared "as the sun in his strength." To him they appeal against the judgment of those whom they describe, in somewhat peevish accents, as "Popish persons or self-conceited brethren." The Preface to the Reader is more interesting, as throwing light upon the principles on which the translators acted. They "never thought that they should need to make a new translation, nor yet to make of a bad one a good one." "Their endeavor was to make a good one better, or out of many good ones one principal good one." They claim credit for steering a middle course between the Puritans who "left the old ecclesiastical words," and the obscurity of the Papists "retaining foreign words of purpose to darken the sense." They vindicate the practice, in which they indulge very freely, of translating one word in the original by many English words, partly on the intelligible ground that it is not always possible to find one word that will express all the meanings of the Greek or Hebrew, partly on the somewhat childish plea that it would be unfair to choose some words for the high honor of being the channels of God's truth, and to pass over others as unworthy.

(7.) The version thus published did not all at once supersede those already in possession. The fact that five editions were published in three years, shows that there was a good demand. But the Bishops' Bible probably remained in many churches (Andrews takes his texts from it in preaching before the king as late as 1621), and the popularity of the Geneva Version is shown by not less than thirteen reprints, in whole or in part, between 1611 and 1617. It is not easy to ascertain the impression which the A. V. made at the time of its appearance. Probably, as in most like cases, it was far less for good or evil than friends or foes expected. The Puritans, and the religious portion of the middle classes generally, missed the notes of the Geneva book (Fuller, *Ch. Hist.* x. 50, 51). The Romanists spoke as usual, of the unsettling effect of these frequent changes, and of the marginal readings as leaving men in doubt what was the truth of Scripture.[b] One frantic cry was heard from Hugh Broughton the rejected (*Works*, p. 661), who "would rather be torn in pieces by wild horses than impose such a version on the poor churches of England." Selden, a few years later, gives a calmer and more favorable judgment. It is "the best of all translations as giving the true sense of the original." This, however, is qualified by the remark that "no book in the world is translated as the Bible is, word for word, with no regard to the difference of idioms. This is well enough so long as scholars have to do with it, but when it comes among the common people, Lord! what gear do they make of it!" (*Table Talk*). The feeling of which this was the expression, led even in the midst of the agitations of the Commonwealth to proposals for another revision, which, after being brought forward in the Grand Committee of Religion in the House of Commons in Jan. 1656, was referred to a sub-committee, acting under Whitelocke, with power to consult divines and report. Conferences were accordingly held frequently at Whitelocke's house, at which we find, mingled with less illustrious names, those of Walton and Cudworth. Nothing, however came of it (Whitelocke, *Memorials*, p. 564; Collier, *Ch. Hist.* ii. 9). No report was ever made, and with the Restoration the tide of conservative feeling, in this as in other things, checked all plans of further alteration. Many had ceased to care for the Bible at all. Those who did care were content with the Bible as it was. Only here and there was a voice raised, like R. Gell's (*ut supra*), declaring that it had defects, that it bore in some things the stamp of the dogmatism of a party (p. 321).

(8.) The highest testimony of this period is that of Walton. From the editor of the Polyglott, the few words "inter omnes eminet" meant a good deal (*Pref.*). With the reign of Anne the tide of glowing panegyric set in. It would be easy to put together a long *catena* of praises stretching from that time to the present. With many, of course, this has been only the routine repetition of a traditional boast. "Our unrivaled Translation," and "our incomparable Liturgy," have been, equally, phrases of course. But there have been witnesses of a far higher weight. In proportion as the English of the 18th century was infected with a Latinized or Gallicized style, did those who had a purer taste look with reverence to the strength and purity of a better time as represented in the A. V. Thus

("the just shall live by faith, but if *any man* draw back," etc.) to avoid an inference unfavorable to the doctrine of Final Perseverance. (3.) The use of "bishopric," in Acts i. 20, of "oversight," in 1 Pet. v. 2, of "bishop," in 1 Tim. iii. 1, &c., and "overseers," in Acts xx. 28, in order to avoid the identification of bishops and elders. (4.) The chapter-heading of Ps. xxix. in 1611 (since altered), "The Prophet exhorteth to praise God for that power which he hath given the Church to bind the consciences of men." Blunt (*Duties of a Parish Priest*, Lect. II.) appears in this question on the side of the prosecution; Trench (*On the A. V. of the N. T.* c. x.) on that of the defense. The charge of an undue bias against Rome in 1 Cor. xi 27, Gal. v. 6, Heb. xiii. 4, is one on which an acquittal may be pronounced with little or no hesitation.

[a] It may be at least pleaded, in mitigation, that the flattery of the translators is outdone by that of Francis Bacon.

[b] Whitaker's answer, by anticipation, to the charge is worth quoting: "No inconvenience will follow if interpretations or versions of Scripture, when they have become obsolete, or ceased to be intelligible, may be afterwards changed or corrected" (*Disser. on Script.* p. 282, Parker Soc. ed.). The wiser divines of the English Church had not then learned to raise the cry of finality.

Addison dwells on its ennobling the coldness of modern languages with the glowing phrases of Hebrew (*Spectator*, No. 405), and Swift confesses that "the translators of the Bible were masters of an English style far fitter for that work than any we see in our present writings" (*Letter to Lord Oxford*). Each half-century has naturally added to the prestige of these merits. The language of the A. V. has intertwined itself with the controversies, the devotion, the literature of the English people. It has gone, wherever they have gone, over the face of the whole earth. The most solemn and tender of individual memories are, for the most part, associated with it. Men leaving the Church of England for the Church of Rome turn regretfully with a yearning look at that noble "well of English undefiled," which they are about to exchange for the uncouth monstrosities of Rheims and Douay. In this case too, as in so many others, the position of the A. V. has been strengthened, less by the skill of its defenders than by the weakness of its assailants. While from time to time, scholars and divines (Lowth, Newcome, Waterland, Trench, Ellicott), have admitted the necessity of a revision, those who have attacked the present version and produced new ones have been, for the most part, men of narrow knowledge and defective taste (Purver, and Harwood, and Bellamy, and Conquest), just able to pick out a few obvious faults, and showing their competence for the task by entering on the work of translating or revising the whole Bible single-handed. One memorable exception must not, however, be passed over. Hallam (*Lit. of Europe*, iii. ch. 2, *ad fin.*) records a brief but emphatic protest against the "enthusiastic praise" which has been lavished on this translation. "It may, in the eyes of many, be a better English, but it is not the English of Daniel, or Raleigh, or Bacon, . . . . It abounds, in fact, especially in the O. T., with obsolete phraseology, and with single words long since abandoned, or retained only in provincial use." The statement may, it is believed, be accepted as an encomium. If it had been the English of the men of letters of James's reign, would it have retained as it has done, for two centuries and a half, its hold on the mind, the memory, the affections of the English people?

XII. SCHEMES FOR A REVISION. — (1.) A notice of the attempts which have been made at various times to bring about a revision of the A. V., though necessarily brief and imperfect, may not be without its use for future laborers. The first half of the 18th century was not favorable for such a work. An almost solitary *Essay for a New Translation* by H. R. (Ross), 1702, attracted little or no notice (Todd, *Life of Walton*, i. 134). A Greek Test. with an English translation, singularly vulgar and offensive, [by W. Mace,] was published in 1729, of which extracts are given by Lewis (*Hist. of Transl.* ch. v.) With the slight revival of learning among the scholars of the latter half of that period the subject was again mooted. Lowth in a Visitation Sermon (1758), and Secker in a Latin Speech intended for Convocation (1761), recommended it. Matt. Pilkington in his *Remarks* (1759), and Dr. Thomas Brett, in an *Essay on Ancient Versions of the Bible* (1760), dwelt on the importance of consulting them with reference to the O. T. as well as the N. T., with a view to more accurate text than that of the Masoretic Hebrew, the former insisting also on the obsolete words which are scattered in the A. V. and giving a useful alphabetic list of them. A folio *New and Literal Translation* of the whole Bible by Anthony Purver, a Quaker (1764), was a more ambitious attempt. He dwells at some length on the "obsolete, uncouth, clownish" expressions which disfigure the A. V. He includes in his list such words as "joyous," "solace," "damsel," "day-spring," "bereaved," "marvels," "bowels men." He substitutes "He hearkened to what he said," for "he hearkened to his voice;" "eat victuals," for "eat bread" (Gen. iii. 19); "was in favor with," for "found grace in the eyes of;" "was angry," for "his wrath was kindled." In spite of this defective taste, however, the work has considerable merit, is based upon a careful study of the original, and of many of the best commentators, and may be contrasted favorably with most of the single-handed translations that have followed. It was, at any rate, far above the depth of degradation and folly which was reached in Harwood's *Literal Translation of the N. T.* "with freedom, spirit, and elegance" (1768). Here again, a few samples are enough to show the character of the whole. "The young lady is not dead" (Mark v. 39). "A gentleman of splendid family and opulent fortune had two sons" (Luke xv. 11). "The clergyman said, You have given him the only right and proper answer" (Mark xii. 32). "We shall not pay the common debt of nature, but by a soft transition," etc. (1 Cor. xv. 51).

(2.) Biblical revision was happily not left entirely in such hands as these. A translation by Worsley "according to the present idiom of the English tongue" (1770) was, at least, less offensive. Durell (*Preface to Job*), Lowth (*Preface to Isaiah*), Blayney (*Pref. to Jeremiah*, 1784), were all strongly in favor of a new, or revised translation. Durell dwells most on the arbitrary additions and omissions in the A. V. of Job, on the total absence in some cases, of any intelligible meaning. Lowth speaks chiefly of the faulty state of the text of the O. T., and urges a correction of it, partly from various readings, partly from ancient versions, partly from conjecture. Each of the three contributed, in the best way, to the work which they had little expectation of seeing accomplished, by laboring steadily at a single book and committing it to the judgment of the Church.[a] Kennicott's labors in collecting MS. of the O. T. issued in his *State of the present Hebrew Text* (1753, 1759), and excited expectations that there might before long be something like a basis for a new version in a restored original.

A more ambitious scheme was started by the Roman Catholic Dr. Geddes, in his *Prospectus for a New Translation* (1786). His remarks on the history of English translations, his candid acknowledgment of the excellences of the A. V., and especially of Tyndal's work as pervading it, his critical notes on the true principles of translation, on the A. V. as falling short of them, may still be read with interest. He too, like Lowth, finds fault with the superstitious adherence to the Masoretic text, with the undue deference to lexicons, and disregard

[a] Whatever be the demerits of Lowth's Isaiah, it deserves something better than the sarcasm of Hurd, that "its only use was to show how little was to be expected from any new translation." As the Boswell of Warburton, Hurd could not resist the temptation of attacking an old antagonist of his master's.

*A* versions shown by our translators. The proposal was well received by many Biblical scholars, Lowth, Kennicott, and Barrington being foremost among its patrons. The work was issued in parts, according to the terms of the prospectus, but did not get further than 2 Chron. in 1792, when the death of the translator put a stop to it. Partly perhaps owing to its incompleteness, but still more from the extreme boldness of a preface, anticipating the conclusions of a later criticism,[a] Dr. Geddes's translation fell rapidly into disfavor. A Sermon by White (famous for his Bampton Lectures) in 1779, and two Pamphlets by J. A. Symonds, Professor of Modern History at Cambridge, the first on the Gospels and the Acts, in 1789; the second on the Epistles, in 1794, though attacked in an *Apology for the Liturgy and Church of England* (1795), helped to keep the discussion from oblivion.

(3.) The revision of the A. V., like many other salutary reforms, was hindered by the French Revolution. In 1792, Archbishop Newcome had published an elaborate defense of such a scheme, citing a host of authorities (Doddridge, Wesley, Campbell, in addition to those already mentioned), and taking the same line as Lowth. Revised translations of the N. T. were published by Wakefield in 1795, by Newcome himself in 1796, by Scarlett in 1798. Campbell's version of the Gospels appeared in 1788, that of the Epistles by Macknight in 1795. But in 1796 the note of alarm was sounded. A feeble pamphlet by George Burges (*Letter to the Lord Bishop of Ely*) took the ground that "the present period was unfit," and from that time, Conservatism, pure and simple, was in the ascendant. To suggest that the A. V. might be inaccurate, was almost as bad as holding "French principles." There is a long interval before the question again comes into anything like prominence, and then there is a new school of critics in the *Quarterly Review* and elsewhere, ready to do battle vigorously for things as they are. The opening of the next campaign was an article in the *Classical Journal* (No. 36), by Dr. John Bellamy, proposing a new translation, followed soon afterwards by its publication under the patronage of the Prince Regent (1818). The work was poor and unsatisfactory enough, and a tremendous battery was opened upon it in the *Quarterly Review* (Nos. 37 and 38), as afterwards (No. 46) upon an unhappy critic, Sir J. B. Burges, who came forward with a pamphlet in its defense (*Reasons in Favor of a New Translation*, 1819). The rash assertion of both Bellamy and Burges that the A. V. had been made almost entirely from the LXX. and Vulgate, and a general deficiency in all accurate scholarship, made them easy victims. The personal element of this controversy may well be passed over, but three less ephemeral works issued from it, which any future laborer in the same field will find worth consulting. Whitaker's *Historical and Critical Inquiry* was chiefly an able exposure of the exaggerated statement just mentioned. H. J. Todd, in his *Vindication of the Authorized Translation* (1819), entered more fully than any previous writer had done into the history of the A. V., and gives many facts as to the lives and qualifications of the translators not easily to be met with elsewhere.[b] The most masterly, however, of the manifestoes against all change, was a pamphlet (*Remarks on the Critical Principles*, etc., Oxford, 1820), published anonymously, but known to have been written by Archbishop Laurence. The strength of the argument lies chiefly in a skillful display of all the difficulties of the work, the impossibility of any satisfactory restoration of the Hebrew of the O. T., or any settlement of the Greek of the N. T., the expediency therefore of adhering to a *Textus receptus* in both. The argument may not be decisive, but the scholarship and acuteness brought to bear on it make the book instructive, and any one entering on the work of a translator ought at least to read it, that he may know what difficulties he has to face.[c]

(4.) A correspondence between Herbert Marsh, bishop of Peterborough, and the Rev. H. Walter, in 1828, is the next link in the chain. Marsh had spoken (*Lectures on Biblical Criticism*, p. 295) with some contempt of the A. V. as based on Tyndal's, Tyndal's on Luther's, and Luther's on Münster's Lexicon, which was itself based on the Vulgate. There was, therefore, on this view, no real translation from the Hebrew in any one of these. Substantially this was what Bellamy had said before, but Marsh was a man of a different calibre, and made out a stronger case. Walter, in his answer, proves what is plain enough, that Tyndal knew some Hebrew, and that Luther in some instances followed Rabbinical authority and not the Vulgate; but the evidence hardly goes to the extent of showing that Tyndal's version of the O. T. was entirely independent of Luther's, or Luther's of the Latin.

(5.) The last five-and-twenty years have seen the question of a revision from time to time gaining fresh prominence. If men of second-rate power have sometimes thrown it back by meddling with it in wrong ways, others, able scholars and sound theologians, have admitted its necessity, and helped it forward by their work. Dr. Conquest's Bible, with "20,000 emendations" (1841), has not commanded the respect of critics, and is almost self-condemned by the silly ostentation of its title. The motions which have from time to time been made in the House of Commons by Mr. Heywood, have borne little fruit beyond the display of feeble Liberalism and yet feebler Conservatism by which such debates are, for the most part, characterised; nor have the discussions in Convocation, though opened by a scholar of high repute (Professor Selwyn), been much more productive. Dr. Beard's *A Revised English Bible the Want of the Church* (1857), though tending to overstate the defects of the A. V., is yet valuable as containing much information, and representing the opinions of the more learned Nonconformists. Far more impor-

---

[a] "I will not pretend to say that it [the history of the Pentateuch] is entirely unmixed with the leaven of the heroic ages. Let the father of Hebrew be tried by the same rules of criticism as the father of Greek history."

[b] A short epitome of this portion of Todd's book has been published by the S. P. C. K. as a tract, and will be found useful.

[c] About this period also (1819) a new edition of Newcome's version was published by Belsham and other Unitarian ministers, and, like Bellamy's attempt on the O. T., had the effect of stiffening the resistance of the great body of the clergy to all proposals for a revision. [The so-called *Improved Version*, here referred to, was published in 1808; reprinted Boston 1809. — A.]

Digitized by Google

haut, every way, both as virtually an authority in favor of revision, and as contributing largely to it, are Professor Scholefield's *Hints for an Improved Translation of the N. T.* (1832). In his second edition, indeed, he disclaims any wish for a new translation, but the principle which he lays down clearly and truly in his preface, that if there is "any adventitious difficulty resulting from a defective translation, then it is at the same time an act of charity and of duty to clear away the difficulty as much as possible," leads legitimately to at least a revision; and this conclusion Mr. Selwyn in the last edition of the *Hints* (1857) has deliberately adopted. To Bishop Ellicott also belongs the credit of having spoken at once boldly and wisely on this matter. Putting the question whether it would be right to join those who oppose all revision, his answer is, "God forbid. . . . . It is in vain to cheat our own souls with the thought that these errors (in A. V.) are either insignificant or imaginary. There *are* errors, there *are* inaccuracies, there *are* misconceptions, there *are* obscurities . . . . and that man who, after being in any degree satisfied of this, permits himself to lean to the counsels of a timid or popular obstructiveness, or who, intellectually unable to test the truth of these allegations, nevertheless permits himself to denounce or deny them, will . . . . have to sustain the tremendous charge of having dealt deceitfully with the inviolable word of God" (*Pref. to Pastoral Epistles*). The translations appended by Dr. Ellicott to his editions of St. Paul's Epistles, proceed on the true principle of altering the A. V. "only where it appears to be incorrect, inexact, insufficient, or obscure," uniting a profound reverence for the older translators with a bold truthfulness in judging of their work. The copious collation of all the earlier English versions makes this part of his book especially interesting and valuable. Dr. Trench (*On the A. V. of the N. T.*, 1858), in like manner, states his conviction that "a revision ought to come," though as yet, he thinks, "the Greek and the English necessary to bring it to a successful issue are alike wanting" (p. 3). The work itself, it need hardly be said, is the fullest contradiction possible of this somewhat despondent statement, and supplies a good store of materials for use when the revision actually comes. The *Revision of the A. V. by Five Clergymen* (Dr. Barrow, Dr. Moberly, Dean Alford, Mr. Humphry, and Dr. Ellicott), represents the same school of conservative progress, has the merit of adhering to the clear, pure English of the A. V., and does not deserve the censure which Dr. Beard passes on it as "promising little and performing less." As yet, this series includes only the Gospel of St. John, and the Epistles to the Romans and Corinthians.[a] The publications of the American Bible Union are signs that there also the same want has been felt. The translations given respectively by Alford, Stanley, Jowett, and Conybeare and Howson, in their respective Commentaries, are in like manner, at once admissions of the necessity of the work, and contributions towards it. Mr. Sharpe (1840) and Mr. Highton (1862) have ventured on the wider work of translations of the entire N. T. Mr. Cookesley has published the Gospel of St. Matthew as Part I. of a like undertaking. It might almost seem as if at last there was something like a *consensus* of scholars and divines on this question. That assumption would, however, be too hasty. Partly the *vis inertiæ*, which in a large body like the clergy of the English Church, is always great, partly the fear of ulterior consequences, partly also the indifference of the majority of the laity, would probably, at the present moment give at least a numerical majority to the opponents of a revision. Writers on this side are naturally less numerous, but the feeling of Conservatism, pure and simple, has found utterance in four men representing different sections, and of different calibre, — Mr. Scrivener (*Supp. to A. Eng. V. of N. T.*), Dr. M'Caul (*Reasons for holding fast the Authorized English Version*), Mr. S. C. Malan (*A Vindication* etc.), and Dr. Cumming (*Revision and Translation*).[b]

XIII. PRESENT STATE OF THE QUESTION. — (1.) To take an accurate estimate of the extent to which the A. V. requires revision would call for nothing less than an examination of each single book, and would therefore involve an amount of detail incompatible with our present limits. To give a few instances only, would practically fix attention on a part only of the evidence, and so would lead to a false rather than a true estimate. No attempt, therefore, will be made to bring together individual passages as needing correction. A few remarks on the chief questions which must necessarily come before those who undertake a revision will not, perhaps, be out of place. Examples, classified under corresponding heads, will be found in the book by Dr. Trench already mentioned, and, scattered in the form of annotations, in that of Professor Scholefield.

(2.) The translation of the N. T. is from a text confessedly imperfect. What editions were used is a matter of conjecture: most probably, one of those published with a Latin version by Beza between 1565 and 1598, and agreeing substantially with the *textus receptus* of 1633. It is clear, on principle, that no revision ought to ignore the results of the textual criticism of the last hundred years. To shrink from noticing any variation, to go on printing as the inspired Word that which there is a preponderant reason for believing to be an interpolation or a mistake, is neither honest nor reverential. To do so for the sake of greater edification is simply to offer to God the unclean sacrifice of a lie. The authority of the A. V. is at any rate in favor of the practice of not suppressing facts. In Matt. i. 11, xxvi. 26; Luke xvii. 36; John ix. 6; Acts xiii. 18; Eph. vi. 9; Heb. ii. 4; James ii. 18; 1 John ii. 23; 1 Pet. ii. 21; 2 Pet. ii. 11, 18; 2 John 8, diffbrent readings are given in the margin, or, as in 1 John ii. 23, indicated by a different type. In earlier versions, as has been mentioned, 1 John v. 7 was printed in smaller letters. The degree to which this should be done will, of course, require discernment. An apparatus like that in Tischendorf or Alford would obviously be out o

[a] * The Epistles to the Galatians, Ephesians, Philippians and Colossians have since appeared. A.

[b] Mr. Malan's careful translation of the chief Oriental and other versions of the Gospel according to St. John, and Mr. Scrivener's notes on St. Matthew, leave to be mentioned as valuable contributions towards the work which they deprecate. A high American authority, Mr. George P. Marsh, may also be referred to as throwing the weight of his judgment into the scale against any revision at the present moment (*Lectures on the English Language*, Lect. xxviii.).

Digitized by Google

dence. Probably the useful Greek Testament edited by Mr. Scrivener might serve as an example of a middle course.

(3.) Still less had been done at the commencement of the 17th century for the text of the O. T. The Jewish teachers, from whom Protestant divines derived their knowledge, had given currency to the belief that in the Masoretic text were contained the *ipissima verba* of Revelation, free from all risks of error, from all casualties of transcription. The conventional phrases, "the authentic Hebrew," "the Hebrew verity," were the expression of this undiscerning reverence.[a] They refused to apply the same rules of judgment here which they applied to the text of the N. T. They assumed that the Masoretes were infallible, and were reluctant to acknowledge that there had been any variations since. Even Walton did not escape being attacked as unsound by the great Puritan divine, Dr. John Owen, for having called attention to the fact of discrepancies (*Prolog.* cap. vi.). The materials for a revised text are, of course, scantier than with the N. T.; but the labors of Kennicott, De Rossi, J H. Michaelis, and Davidson have not been fruitless, and here, as there, the older versions must be admitted as at least evidence of variations which once existed, but which were suppressed by the rigorous uniformity of the later Rabbis. Conjectural emendations, such as Newcome, Lowth, and Ewald have so freely suggested, ought to be ventured on in such places only as are quite unintelligible without them.

(4.) All scholars worthy of the name are now agreed that as little change as possible should be made in the language of the A. V. Happily there is little risk of an emasculated elegance such as might have infected a new version in the last century. The very fact of the admiration felt for the A. V., and the general revival of a taste for the literature of the Elizabethan period, are safeguards against any like tampering now. Some words, however, absolutely need change, as being altogether obsolete, others, more numerous, have been slowly passing into a different, often into a lower or a narrower meaning, and are therefore no longer what they once were, adequate renderings of the original.

(5.) The self-imposed law of fairness which led the A. V. translators to admit as many English words as possible to the honor of representing one in the Hebrew or Greek text has, as might be expected, marred the perfection of their work. Sometimes the effect is simply the loss of the solemn emphasis of the repetition of the same word. Sometimes it is more serious, and affects the meaning. While it would be simple pedantry to lay down unconditionally that but one and the same word should be used throughout for one in the original, there can be no doubt that such a limitation is the true principle to start with, and that instances to the contrary should be dealt with as exceptional necessities. Side by side with this fault, there is another just the opposite of it. One English word appears for several Greek or Hebrew words, and thus shades of meaning, often of importance to the right understanding of a passage, are lost sight of. Taken together, the two forms of error, which meet us in well-nigh every chapter, make the use of an English Concordance absolutely misleading.[b]

(6.) Grammatical inaccuracy must be noted as a defect pervading, more or less, the whole extent of the present version of the N. T. Instances will be found in abundance in Trench and Scholefield (*passim*), and in any of the better Commentaries. The true force of tenses, cases, prepositions, articles, is continually lost, sometimes at the cost of the finer shades which give vividness and emphasis, but sometimes also entailing more serious errors. In justice to the translators of the N. T., it must be said that, situated as they were, such errors were almost inevitable. They learned Greek through the medium of Latin. Lexicons[c] and grammars were alike in the universal language of scholars; and that language was poorer and less inflected than the Greek, and failed utterly to represent, *e. g.* the force of its article, or the difference of its aorist and perfect tenses. Such books of this nature as were used by the translators were necessarily based upon a far scantier induction, and were therefore more meagre and inaccurate than those which have been the fruits of the labors of later scholars. Recent scholarship may in many things fall short of that of an earlier time, but the introduction of Greek lexicons and grammars in English has been beyond all doubt a change for the better.

(7.) The field of the O. T. has been far less adequately worked than that of the N. T., and Hebrew scholarship has made far less progress than Greek. Relatively, indeed, there seems good ground for believing that Hebrew was more studied in the early part of the 17th century than it is now. It was newer and more popular. The reverence which men felt for the perfection of the "Hebrew verity" made them willing to labor to learn a language which they looked upon as half-divine. But here also there was the same source of error. The early Hebrew lexicons represented partly, it is true, a Jewish tradition; but partly also were based upon the Vulgate (Bishop Marsh, *Lectures*, ii. App. 61). The forms of cognate Shemitic languages had not been applied as a means for ascertaining the precise value of Hebrew words. The grammars, also in Latin, were defective. Little as Hebrew professors have, for the most part, done in the way of exegesis, any good commentary on the O. T. will show that here also there are errors as serious as in the N. T. In one memorable case, the inattention, real or apparent, of the translators to the force of the *Hiphil* form of the verb (Lev iv. 12) has led to a serious attack on the truth-

---

[a] The Judaising spirit on this matter culminated in the *Formula Helvetici Consensus*, which pronounces the existing O. T. text to be "tum quoad consonas, tum quoad vocalia, sive puncta ipsa, sive punctorum potestatem, tum quoad res, tum quoad verba, θεόπνευστον."

[b] The *Englishman's Hebrew Concordance* and the *Englishman's Greek Concordance*, published by Walton and Maberly, deserve mention as useful helps for the student of the A. V. in overcoming this difficulty.

[c] Constantine's and Scapula's were the two principally used. During the half century that preceded the A. V. the study of Greek had made great progress, was taught at all the great schools in 1586, and made part of the system of new ones then founded. Nowell, Dean of St. Paul's, published a Greek version of the Catechism. The Grammar chiefly in use was probably Colet's (?).

lameness of the whole narrative of the Pentateuch (Colenso, *Pentateuch Critically Examined*, Part I. ch. vii.).

(8.) The division into chapters and verses is a matter that ought not to be passed over in any future revision. The former, it must be remembered, does not go further back than the 13th century. The latter, though answering, as far as the O. T. is concerned, to a long-standing Jewish arrangement, depends, in the N. T., upon the work of Robert Stephens. [BIBLE.] Neither in the O. T. nor in the N. T. did the verse-division appear in any earlier English edition than that of Geneva. The inconveniences of changing both are probably too great to be risked. The habit of referring to chapter and verse is too deeply rooted to be got rid of. Yet the division, as it is, is not seldom artificial, and sometimes is absolutely misleading. No one would think of printing any other book, in prose or poetry, in short clauses like the verses of our Bibles, and the tendency of such a division is to give a broken and discontinuous knowledge, to make men good textuaries but bad divines. An arrangement like that of the Paragraph Bibles of our own time, with the verse and chapter divisions relegated to the margin, ought to form part of any authoritative revision.[a]

(9.) Other points of detail remain to be noticed briefly: (i.) The chapter headings of the A. V. often go beyond their proper province. If it is intended to give an authoritative commentary to the lay reader, let it be done thoroughly. But if that attempt is abandoned, as it was deliberately in 1611, then for the chapter-headings to enter, as they do, upon the work of interpretation, giving, as in Canticles, Psalms, and Propheta, *passim*, mystical meanings, is simply an inconsistency. What should be a mere table of contents becomes a gloss upon the text. (ii.) The use of Italics in printing the A. V. is at least open to some risks. At first they seem an honest confession on the part of the translators of what is or is not in the original. On the other hand, they tempt to a loose translation. Few writers would think it necessary to use them in translating other books. If the words do not do more than represent the sense of the original, then there is no reason for treating them as if they were added at the discretion of the translators. If they go beyond that, they are of the nature of a gloss, altering the force of the original, and have no right to be there at all, while the fact that they appear as additions frees the translator from the sense of responsibility. (iii.) Good as the principle of marginal references is, the margins of the A. V., as now printed, are somewhat inconveniently crowded, and the references, being often merely verbal, tend to defeat their own purpose, and to make the reader weary of referring They need, accordingly, a careful sifting; and though it would not be desirable to go back to the scanty number of the original edition of 1611, something intermediate between that and the present over-abundance would be an improvement. (iv.) Marginal readings, on the other hand, indicating variations in the text, or differences in the judgment of translators, might be profitably increased in number. The results of the labors of scholars would thus be placed within the reach of all intelligent readers, and so many difficulties and stumbling-blocks might be removed.[b]

(10.) What has been said will serve to show at once to what extent a new revision is required, and what are the chief difficulties to be encountered. And the work, it is believed, ought not to be delayed much longer. Names will occur to every one of men competent to undertake the work as far as the N. T. is concerned; and if such alterations only were to be introduced as commanded the assent of at least two thirds of a chosen body of twenty or thirty scholars, while a place in the margin was given to such renderings only as were adopted by at least one third, there would be, it is believed, at once a great change for the better, and without any shock to the feelings or even the prejudices of the great mass of readers. Men fit to undertake the work of revising the translation of the O. T. are confessedly fewer, and, for the most part, occupied in other things. The knowledge and the power, however, are there, though in less measure, and even though the will be for the time absent, a summons to enter on the task from those whose authority they are bound to respect, would, we cannot doubt, be listened to. It might have the result of directing to their proper task and to a fruitful issue energies which are too often withdrawn to ephemeral and unprofitable controversies. As the revised Bible would be for the use of the English people, the men appointed for the purpose ought not to be taken exclusively from the English Church, and the learning of Nonconformists should, at least, be fairly represented. The changes recommended by such a body of men, under conditions such as those suggested, might safely be allowed to circulate experimentally for two or three years. When they had stood that trial, they might without risk be printed in the new Authorized Version. Such a work would unite reverence for the past with duty towards the future. In undertaking it we should be, not alighting the translators on whose labors we have entered, but following in their footsteps. It is the wisdom of the Church to bring out of its treasures things new and old.

* LITERATURE. — (1.) *History of English Ver-*

---

[a] As examples of what may be said on both sides on this point, the reader may be referred to an article on *Paragraph Bibles* in No. 206 of the *Edinburgh Review* (subsequently reprinted by the Rev. W. Harness, 1855) and the pamphlet by Dr. M'Caul (*Reasons for holding fast*) already mentioned. Reeves's Bibles and Testaments (1802) and Boothroyd's translation (1824) should be mentioned as having set the example followed by the Religious Tract Society in their *Paragraph Bible*.

[b] In all these points there has been, to a much larger extent than is commonly known, a work of unauthorized revision. Neither Italics, nor references, nor readings, nor chapter-headings, nor, it may be added, punctuation, are the same now as they were in the A. V. of 1611. The chief alterations appear to to have been made first in 1638, and afterwards in 1769, by Dr. Blayney, under the sanction of the Oxford Delegates of the Press (*Gentleman's Magazine*, November, 1789). A like work was done about the same time by Dr. Paris at Cambridge. There had however, been some changes previously. The edition of 1638, in particular, shows considerable augmentations in the Italics (Turton, *Text of the English Bible* 1833, pp. 91, 126). To Blayney also we owe most of the notes on weights and measures, and coins, and the explanation, where the text seems to require it, of Hebrew proper names. The whole question of the use of Italics is discussed elaborately by Turton in the work just mentioned.

T.*, Lond. 1836, followed by *Annotations*, 1837, and *Supplemental Annotations*, new ed., 1841. (Edgar Taylor,) *The N. T. revised from the A. V. and made conformable to the Text of Griesbach*, Lond., Pickering, 1840. Sam. Sharpe, *The N. T. trans. from Griesbach's Text* (1st ed. 1840), 5th ed. Lond. 1862, and *Crit. Notes*, 2d ed., Lond. 1867. Andrews Norton, *Trans. of the Gospels, with Notes*, 2 vols. Boston, 1855. L. A. Sawyer, *The N. T. translated, with improved Divisions of Chapters and Verses*, Boston, 1858. Mr. Sawyer has also published translations of the *Hebrew Prophets* and *Poets*, Bost. 1861–62. A translation of the N. T. has been published anonymously by John Nelson Darby, the founder of the sect of the Plymouth Brethren London, [186–?] each book issued separately. It is not without merit. The "second revision" of the N. T. by the Final Committee of the Amer. Bible Union was published in N. Y., in different forms, in 1866. In this version, "immerse" is substituted for "baptize," "immersion" for "baptism," etc. Preliminary revisions of most of the books of the N. T., with notes, were previously issued for public examination and criticism. Among the authors of these were Dr. T. J. Conant (Matthew), the Rev. N. N. Whiting (Mark, Luke Ephesians, Pastoral Epistles), Rev. Alex. Campbell (Acts), Dr. John Lillie (1 and 2 Thess., and 2d Peter to Rev. inclusive), and Dr. H. B. Hackett (Philemon). A very large sum of money has been spent by the American Bible Union in carrying on this important work; and some of our ablest scholars have been engaged upon it. T. S. Green, *The Twofold N. T., being a New Trans accompanying a newly formed Text*, Lond. Bagster, [1865,] 4to; comp. his *Crit. Notes on the N. T.*, Lond. 1867. Henry Alford, *The N. T. after the A. V. newly compared with the Orig. Greek and revised*, Lond. 1869; comp. his *N. T. for Eng. Readers*, with corrections of the A. V. and notes, 2 vols. in 4 pts., 1863–66. G. R. Noyes, *The N. T.: translated from the Greek Text of Tischendorf*, Boston, 1869; 4th ed. 1870. Robt. Ainslie, *The N. T. trans. from the Greek Text of Tischendorf* (8vo, *Lips.* 1865), Lond. and Brighton, 1869. (The title and also the preface are deceptive. The translation is *not* from the text of Tischendorf, but from his edition of the *Codex Sinaiticus*, which has many readings that neither he nor any other critic would ever dream of regarding as genuine.) N. S. Folsom, *The Four Gospels: trans.* [mainly] *from the Greek Text of Tischendorf, with various Readings and Notes*, Boston, 1869. For other translations of parts of the N. T., see the literature under the separate books. — The translations of Abner Kneeland (*N. T. in Greek and English*, Phil. 1822), Rodolphus Dickinson (Bost. 1833), and Benj. Wilson (*Emphatic Diaglott*, N. Y. [Geneva, Ill.] 1864) may be mentioned as literary curiosities. — Among the versions which have been named, both of the O. T. and the New, those of the late Dr. Noyes appear to the present writer eminently distinguished for accuracy, clearness, good taste, natural, idiomatic English, and the attainment, generally, of the happy medium between bald literalness and loose paraphrase.

The Convocation of Canterbury has already (July, 1870) undertaken a revision of the A. V., and appointed a Committee for the work, under the chairmanship of the Bishop of Winchester (Wilberforce). They have divided themselves into two companies, that on the Old Test. consisting of the Bishops of St. David's, Llandaff, Ely, Lincoln, Bath and Wells, Archd. Rose, Can. Selwyn, Dr. Jebb, and Dr. Kay; that on the New, of the Bps. of Winchester, Gloucester and Bristol (Ellicott), and Salisbury, the Prolocutor, the Deans of Canterbury (Alford), Westminster (Stanley), and Can Blakesley. Many other distinguished scholars have been invited, some of them not members of the Church of England. The Convocation of York and the British Government have declined to par

Digitized by Google

dispute. The Committee on the N. T. were to hold their first meeting on June 22 and 23, 1870. We have no room for further details.

For the literature pertaining to this topic, see further Darling's *Cycl. Bibliographica* (Subjects), col. 82 ff., and McClintock and Strong's *Cyclopædia*, vol. iii., art. "English Versions," where will be found many references to articles in periodical publications. A.

* **VESTRY** (מַלְתַּחְדוֹ), a house or depository at Samaria, of the sacred vestments of the priests of Baal. The English and Hebrew terms occur only in 2 K. x. 22. The garments were probably of fine byssus (Bähr, *Symbolik des Mosaisch. Cultus*, ii. 87), and were worn by the priests only in religious occupations. It was not the royal wardrobe, except as it may have been under the monarch's control. H.

* **VEX** is very often used in the A. V. in the sense of "harass," "torment," "afflict," "oppress" (*e. g.* Num. xx. 15; 1 Sam. xiv. 47; Job xxvii. 2; Matt. xv. 22; Acts xii. 1). It has now become a much weaker word. A similar remark applies to "VEXATION;" see Deut. xxviii. 20; 1 Chr. xv. 5; Is. ix. 1. A.

* **VIAL** in the A. V. Rev. v. 9, "golden *vials* full of odors," and xv. 7, xvi. 1–17, xvii. 1, xxi. 9, "the seven *vials* full of the wrath of God," suggests a false idea to the common reader. The Greek word φιάλη, which is here used, signifies not "a small bottle," but "a broad, shallow bowl." A.

**VILLAGES.**[a] It is evident that *châtser*, "a village," lit., an inclosure, a collection of huts, is often used, especially in the enumeration of towns in Josh. xiii., xv., xix., to imply unwalled suburbs outside the walled towns. And so it appears to mean when we compare Lev. xxv. 31 with v. 34. *Migrâsh*,[b] A. V. "suburbs," *i. e.* a place thrust out from the city (see also Gen. xli. 48). Arab villages, as found in Arabia, are often mere collections of stone huts, "long, low, rude hovels, roofed only with the stalks of palm-leaves," or covered for a time with tent-cloths, which are removed when the tribe change their quarters. Others are more solidly built, as are most of the modern villages of Palestine, though in some the dwellings are mere mud huts (Robinson, i. 167, ii. 13, 14, 44, 387; Hasselquist, *Trav.* p. 155; Stanley, *S. & P.* p. 233, App. § 83, p. 525). Arab villages of the Hedjâz and Yemen often consist of huts with circular roofs of leaves or grass, resembling the description given by Sallust of the Numidian *mapalia*, namely, ships with the keel uppermost (Sallust, *Jug.* 18. Shaw, *Trav.* p. 220; Niebuhr, *Descr. de l'Arab* p. 54).

There is little in the O. T. to enable us more precisely to define a village of Palestine, beyond the fact that it was destitute of walls or external defenses. Persian villages are spoken of in similar terms (Ez. xxxviii. 11; Esth. ix. 19).

By the Talmudists a village was defined as a place destitute of a synagogue (Lightfoot, *Chorogr. Century*, ch. xcviii.). Galilee, in our Lord's time, contained many villages and village-towns,[c] and Josephus says that in his time there were in Galilee 204 towns and villages,[d] some of which last had walls (Joseph. *Vit.* § 45). At present the country is almost depopulated (Raumer, *Pal.* p. 105; Stanley, *S. & P.* p. 384). Most modern Turkish and Persian villages have a *Menzil* or *Medhâfeh*, a house for travellers (Burckhardt, *Syria*, p. 295; Robinson, ii. 19; Martyn, *Life*, p. 437).

The places to which in the O. T. the term *châtser* is applied were mostly in the outskirts of the country (Stanley, p. 526). In the N. T. the term κώμη is applied to Bethphage (Matt. xxi. 2), Bethany (Luke x. 38; John xi. 1), Emmaus (Luke xxiv. 13), Bethlehem (John vii. 42). A distinction between city or town (πόλις) and village (κώμη) is pointed out (Luke viii. 1). On the other hand, Bethsaida is called πόλις (John i. 44; Luke ix. 10) and also κώμη (Mark viii. 23, 26), unless by the latter word we are to understand the suburbs of the town, which meaning seems to belong to "country"[e] (Mark vi. 56). The relation of dependence on a chief town of a district appears to be denoted by the phrase "villages of Cæsarea Philippi" (Mark viii. 27).

In the Hebrew language the prefix *Caphar* implied a regular village, as Capernaum, which place, however, had in later times outgrown the limits implied by its original designation (Lightfoot, *l. c.*, Stanley, pp. 521–527; 1 Macc. vii. 31). H. W. P.

**VINE.** The well-known valuable plant (*Vitis vinifera*) very frequently referred to in the Old and New Testaments, and cultivated from the earliest times. The first mention of this plant occurs in Gen. ix. 20, 21, where Noah is represented as having been its first cultivator. The Egyptians say that Osiris first taught men the use of the vine. That it was abundantly cultivated in Egypt is evident from the frequent representations on the monuments, as well as from the Scriptural allusions. See Gen. xl. 9–11, Pharaoh's dream; and Num. xx. 5, where the Israelites complain that the

wilderness was "no place of figs or of vines," evidently regretting that they had left the vines of Egypt. Comp. also Ps. lxxviii. 47: "He destroyed their vines with hail" (see on this subject Celsius, *Hierob.* ii. 412).

The vines of Palestine were celebrated both for luxuriant growth and for the immense clusters of grapes which they produced. When the spies were sent forth to view the promised land, we are told that on their arrival at the valley of Eshcol they cut down a branch with one cluster of grapes, and bare it between two on a staff (Num. xiii. 23). This they did no doubt for convenience of carriage, and in order that the grapes on that splendid cluster might not be bruised. Travellers have frequently testified to the large size of the grape-clusters of Palestine. Schulz (*Leitungen des Höchsten*, v. 285, quoted by Rosenmüller, *Bibl. Bot.* p. 223) speaks of supping at Beitshin, a village near Ptolemais, under a vine whose stem was about a foot and a half in diameter, and whose height was about thirty feet, which by its branches formed a hut upwards of thirty feet broad and long. "The clusters of these extraordinary vines," he adds, "are so large that they weigh ten or twelve pounds, and the berries may be compared with our small plums." See also Belon, *Observat.* ii. 340: "Les seps des vignes sont fort gros et les rameaux fort spacieux. Les habitants entendent bien comme il la faut gouverner. Car ils la plantent si loing l'une de l'autre, qu'on pourroit mener une charrette entre deux. Ce n'est pas grande merveille si les raisins sont si beaux et le vin si puissant." Strabo states that it is recorded that there are vines in Margiana whose stems are such as would require two men to span round, and whose clusters are two cubits long (*Geograph.* i. 112, ed. Kramer). Now Margiana is the modern district of Ghilan in Persia, southwest of the Caspian Sea, and the very country on whose hills the vine is believed to be indigenous. Nothing would be easier than to multiply testimonies relative to the large size of the grapes of Palestine, from the published accounts of travellers such as Elliot, Laborde, Mariti, Dandini (who expresses his surprise at the extraordinary size of the grapes of Lebanon), Russell, etc. We must be content with quoting the following extract from Kitto's *Physical History of Palestine*, p. 330, which is strikingly illustrative of the spies' mode of carrying the grapes from Eshcol: "Even in our own country a bunch of grapes was produced at Welbeck, and sent as a present from the Duke of Rutland to the Marquis of Rockingham, which weighed nineteen pounds. It was conveyed to its destination — more than twenty miles distant — on a staff by four laborers, two of whom bore it in rotation." The greatest diameter of this cluster was nineteen inches and a half, its circumference four feet and a half, and its length nearly twenty-three inches.

Especial mention is made in the Bible of the vines of Eshcol (Num. xiii. 24, xxxii. 9), of Sibmah, Heshbon, and Elealeh (Is. xvi. 8, 9, 10; Jer. xlviii. 32), and En-gedi (Cant. i. 14). Prof. Stanley thus speaks of the vineyards of Judah, which he saw along the slopes of Bethlehem: "Here, more than elsewhere in Palestine, are to be seen on the sides of the hills, the vineyards marked by their watch-towers and walls, seated on their ancient terraces — the earliest and latest symbol of Judah. The elevation of the hills and table-lands of Judah is the true climate of the vine. He 'bound his foal to the vine, and his ass's colt to the choice vine; he washed his garments in wine, and his clothes in the blood of grapes.' It was from the Judæan valley of Eshcol, 'the torrent of the cluster,' that the spies cut down the gigantic cluster of grapes. 'A vineyard on a hill of olives,' with the 'fence,' and 'the stones gathered out,' and the tower in the midst of it,' is the natural figure which, both in the prophetical and evangelical records, represents the kingdom of Judah" (*S. & P.* p. 164). From the abundance and excellence of the vines, it may readily be understood how frequently this plant is the subject of metaphor in the Holy Scriptures. Thus Israel is a vine brought from Egypt, and planted by the Lord's hand in the Land of Promise; room had been prepared for it (compare with this the passage from Belon quoted above); and where it took root it filled the land, it covered the hills with its shadow, its boughs were like the goodly cedar-trees (Ps. lxxx. 8, 10). Comp. Gmelin (*Travels through Russia and N. Persia*, iii. 431), who thus speaks of the vines of Ghilan: "It is found of forests, . . . . and is frequently found about promontories, and their lower part is almost entirely covered with it. There, higher than the eye can reach, it winds itself about the loftiest trees; and its tendrils, which here have an arm's thickness, so spread and mutually entangle themselves far and wide, that in places where it grows in the most luxuriant wildness it is very difficult to find a passage." To dwell under the vine and fig-tree is an emblem of domestic happiness and peace (1 K. iv. 25; Mic. iv. 4; Ps. cxxviii. 3); the rebellious people of Israel are compared to "wild grapes," "an empty vine," "the degenerate plant of a strange vine," etc. (Is. v. 2, 4, but see COCKLE; Hos. x. 1; Jer. ii. 21). It is a vine which our Lord selects to show the spiritual union which subsists between Himself and his members (John xv. 1–6).

The following Hebrew words denote the vine: —

1. *Gephen* (גֶּפֶן), or, more definitely, *gephen hayyayin* (גֶּפֶן הַיַּיִן), of frequent occurrence in the Bible, and used in a general sense. Indeed *gephen* sometimes is applied to a plant that resembles a vine in some particulars, as גֶּפֶן שָׂדֶה (*gephen sâdeh*), 2 K. iv. 39, *i. e.* probably the Colocynth plant [GOURD, ii. 962], or גֶּפֶן סְדֹם (*gephen Sedôm*), the vine of Sodom, certainly not a vine. (See below.)

2. *Sôrêk* (שֹׂרֵק), or *sôrêkâh* (שֹׂרֵקָה), is a term expressive of some choice kind of vine (Jer. ii. 21; Is v. 2; Gen. xlix. 11), supposed to be identical with that now called in Morocco *serki*, and in Persia *kishmish*, with small round dark berries, and soft stones. (See Niebuhr, *Descript. de l'Arabie*, p. 147; and Oedmann, *Sammlung*, ii. 97.) From the passage in Jeremiah, it is clear that the *sôrêk* denotes not another species of vine, but the common vine which by some process of cultivation attained a high state of excellence.

3. *Nâzîr* (נָזִיר), originally applied to a Nazarite who did not shave his hair, expresses an "undressed vine" (A. V.), *i. e.* one which every seventh and every fiftieth year was *not pruned*. (See Gesenius, *Thes.* s. v.)

Grapes are designated by various names: (1. *Eshcôl* (אֶשְׁכֹּל), is either "a cluster," ripe or unripe, like *racemus*, or a "single grape" (as in

Digitized by Google

a. lxv. 8; Mic. vii. 1). (2.) *'Enâb* (עֲנָב; Arab. عِنَب, "a cluster"). (3.) *Bôser* (בֹּסֶר), sour, i. e. unripe grapes (Is. xviii. 5). (4.) *Zemôrâh* (זְמוֹרָה) "a grape cut off." "The blossom" of the vine is called *semâdar* (סְמָדַר), Cant. ii. 13, 15. "Grape-stones" are probably meant by *chartsanîm* (חַרְצַנִּים); A. V. "kernel," Num. vi. 4. "The cuticle" of the grape is denominated *zâg* (זָג), Num. *l. c.*; "the tendrils" by *sârigîm* (שָׂרִיגִים), Joel i. 7.

The ancient Hebrews probably allowed the vine to grow trailing on the ground, or upon supports. This latter mode of cultivation appears to be alluded to by Ezekiel (xix. 11, 12): "her strong rods were broken and withered." Dr. Robinson, who has given us much information on the vines of Palestine, thus speaks of the manner in which he saw them trained near Hebron: "They are planted singly in rows, eight or ten feet apart in each direction. The stock is suffered to grow up large to the height of six or eight feet, and is then fastened in a sloping position to a strong stake, and the shoots suffered to grow and extend from one plant to another, forming a line of festoons. Sometimes two rows are made to slant towards each other, and thus form by their shoots a sort of arch. These shoots are pruned away in autumn" (*Bibl. Res.* ii. 80, 81).

The vintage, *bâtsîr* (בָּצִיר), which formerly was a season of general festivity, as is the case more or less in all vine-growing countries, commenced in September. The towns are deserted, and the people live among the vineyards (כְּרָמִים) in the lodges and tents (*Bibl. Res.* l. c.; comp. Judg. ix. 27; Jer. xxv. 30; Is. xvi. 10). The grapes were gathered with shouts of joy by the "grape-gatherers" (בֹּצֵר) (Jer. xxv. 30), and put into baskets (see Jer. vi. 9). They were then carried on the head and shoulders, or slung upon a yoke, to the "wine-press" (גַּת). [WINE.] Those intended for eating were perhaps put into flat open baskets of wickerwork, as was the custom in Egypt (Wilkinson, *Anc. Egypt.* i. 43). In Palestine at present the finest grapes, says Dr. Robinson, are dried as raisins, *tsimmûk* (צִמּוּק), and the juice of the remainder, after having been trodden and pressed, "is boiled down to a syrup which, under the name of *dibs* (דִּבְשׁ), is much used by all classes, wherever vineyards are found, as a condiment with their food." For further remarks on the modes of making fermented drinks, etc., of the juice of the grape, see under WINE.

The vineyard (כֶּרֶם), which was generally on a hill (Is. v. 1; Jer. xxxi. 5; Amos ix. 13), was surrounded by a wall or hedge in order to keep out the wild boars (Ps. lxxx. 13), jackals, and foxes (Num. xxii. 24; Cant. ii. 15; Neh. iv. 3; Ez. xiii. 4, 5; Matt. xxi. 33), which commit sad havoc amongst the vines, both by treading them down and by eating the grapes. Within the vineyard was one or more towers of stone in which the vine-dressers *côrîmîm* (כֹּרְמִים), lived (Is. i. 8, v. 2; Matt. xxi. 33; see also Robinson, *Bibl. Res.* i. 213 ii. 81). The press, *gath* (גַּת), and vat, *yekeb* (יְקֶב), which was dug (Matt. xxi. 33) or hewn out of the rocky soil, were part of the vineyard furniture (Is. v. 2). See the art. WINE, for a figure of a large foot-press with vat, represented in operation. The wine-press of the Hebrews was probably of the form there depicted. [FAT, p 814 *a*.]

The vine in the Mosaic ritual was subject to the usual restrictions of the "seventh year" (Ex. xxiii. 11), and the jubilee of the fiftieth year (Lev. xxv. 11). The gleanings, *ôlêlôth* (עֹלֵלוֹת) were to be left for the poor and stranger (Jer. xlix. 9; Deut. xxiv. 21). The vineyard was not to be sown "with divers seeds" (Deut. xxii. 9), but fig-trees were sometimes planted in vineyards (Luke xiii. 6). Comp. 1 K. iv. 25: "Every man under his vine and under his fig-tree." Persons passing through a vineyard were allowed to eat the grapes therein, but not to carry any away (Deut. xxiii. 24).

Besides wild-boars, jackals, and foxes, other enemies, such as birds, locusts, and caterpillars, occasionally damaged the vines.

Beth-haccerem, "the house of the vine" (Jer. vi. 1; Neh. iii. 14), and Abel-ceramîm, "the plain of the vineyards," took their respective names from their vicinity to vineyards. Gophna (now *Jifna*), a few miles N. of Jerusalem, is stated by Eusebius (*Onom.* Φθραγξ βότρυος) to have derived its name from its vines. But see OPHNI. W. H.

**VINE OF SODOM** (גֶּפֶן סְדֹם, *gephen Sedôm*: ἄμπελος Σοδόμων: *vinea Sodomorum*) occurs only in Deut. xxxii. 32, where of the wicked it is said — "their vine is of the vine of Sodom, and of the fields of Gomorrah." It is generally supposed that this passage alludes to the celebrated apples of Sodom, of which Josephus (*Bell. Jud.* iv. 8, § 4) speaks, and to which apparently Tacitus (*Hist.* v. 6) alludes. Much has been written on this curious subject, and various trees have been conjectured to be that which produced those

> "Dead Sea fruits that tempt the eye,
> But turn to ashes on the lips,"

of which Moore and Byron sing.

The following is the account of these fruits, as given by Josephus: speaking of Sodom, he says: "It was of old a happy land, both in respect of its fruits, and the abundance of its cities. But now it is all burnt up. Men say that, on account of the wickedness of its inhabitants, it was destroyed by lightning. At any rate, there are still to be seen remains of the divine fire and traces of five cities, and moreover ashes produced in the fruits, which indeed resemble edible fruit in color, but, on being plucked by the hand, are dissolved into smoke and ashes." Tacitus is more general, and speaks of *all* the herbs and flowers, whether growing wild or planted, turning black, and crumbling into ashes.

Some travellers, as Maundrell (*Early Trav. in Palestine*, p. 454, Bohn, 1848), regard the whole story as a fiction, being unable either to see or hear of any fruit that would answer the required description. Pococke supposed the apples of Sodom to be pomegranates, "which, having a tough, hard rind, and being left on the trees two or three years, may be dried to dust inside, and the outside may

Digitized by Google

remain fair." Hasselquist (*Trav.* p. 287) seeks to identify the apples in question with the egg-shaped fruit of the *Solanum melongena* when attacked by some species of *tenthredo*, which converts the whole of the inside into dust, while the rind remains entire and keeps its color. Seetzen in his letters to Baron Zach (*Monat. Correspond.* xviii. 442) thought he had discovered the apples of Sodom in the fruit of a kind of cotton-tree, which grew in the plain of el-Ghor, and was known by the name of *Áóschar*. The cotton is contained in the fruit, which is like a pomegranate, but has no pulp. Chateaubriand concludes the long-sought fruit to be that of a thorny shrub with small taper leaves, which in size and color is exactly like the little Egyptian lemon; when dried, this fruit yields a blackish seed, which may be compared to ashes, and which in taste resembles bitter pepper. Burckhardt (*Trav. in Syria*, p. 392) and Irby and Mangles believe that the tree which produces these celebrated apples is one which they saw abundantly in the Ghor to the east of the Dead Sea, known by the vernacular name of *asheyr* or *oshar*. This tree bears a fruit of a reddish-yellow color, about three inches in diameter, which contains a white substance resembling the finest silk, and enveloping some seeds. This silk is collected by the Arabs, and twisted into matches for their firelocks. Dr. Robinson (*Bibl. Res.* i. 523), when at *'Ain Jidy*, without knowing at the moment whether it had been observed by former travellers or not, instantly pronounced in favor of the *'ôsher* fruit being the apples of Sodom. His account of this tree is minute, and may well be quoted: "The *'ôsher* of the Arabs," which he identifies with the *Asclepias* (*Calotropis*) *procera* of botanists, "is found in abundance in Upper Egypt and Nubia, and also in Arabia Felix; but seems to be confined in Palestine to the borders of the Dead Sea. We saw it only at *'Ain Jidy;* Hasselquist found it in the desert between Jericho and the northern shore; and Irby and Mangles met with it of large size at the south end of the sea, and on the isthmus of the peninsula. We saw here several trees of the kind, the trunks of which were six or eight inches in diameter, and the whole height from ten to fifteen feet. It has a grayish cork-like bark, with long oval leaves . . . . it discharges copiously from its broken leaves and flowers a milky fluid. The fruit greatly resembles externally a large smooth apple or orange, hanging in clusters of three or four together, and when ripe is of a yellow color. It was now fair and delicious to the eye, and soft to the touch; but, on being pressed or struck, it explodes with a puff, like a bladder or puff-ball, leaving in the hand only the shreds of the thin rind and a few fibres. It is indeed filled chiefly with air, which gives it the round form. . . . . After a due allowance for the marvelous in all popular reports, I find nothing which does not apply almost literally to the fruit of the *'ôsher* as we saw it. It must be plucked and handled with great care, in order to preserve it from bursting."

Mr. Walter Elliot, in an article "on the *Pomum Sodomitica*, or Dead-Sea apples" (*Trans. of the Entomol. Soc.* ii. 14, 1837–1840), endeavors to show that the apples in question are oak galls, which he found growing plentifully on dwarf oaks (*Quercus infectoria*) in the country beyond the Jordan. He tells us that the Arabs asked him to bite one of these galls, and that they laughed when they saw his mouth full of dust. "That these galls are the true Dead-Sea apples," it is added, "there can no longer be a question: nothing can be more beautiful than their rich, glossy, purplish-red exterior: nothing more bitter than their porous and easily pulverized interior" (p. 16). The opinion of Pococke may, we think, be dismissed at once as being a most improbable conjecture. The objection to the *Solanum melongena* is that the plant is not peculiar to the shores or neighborhood of the Sea of Sodom, but is generally distributed throughout Palestine, besides which it is not likely that the fruit of which Josephus speaks should be represented by occasional diseased specimens of the fruit of the egg-apple; we must look for some plant, the normal character of whose fruit comes somewhere nearer to the required conditions. Seetzen's plant is the same as that mentioned by Burckhardt, Irby and Mangles, and Robinson, i. e. the *'ôsher*. Chateaubriand's thorny shrub, with fruit like small lemons, *may be* the *Zukkum* (*Balanites Ægyptiaca*), but it certainly cannot be the tree intended. It is not at all probable that the oak-galls of which Mr. Elliot speaks should be the fruit in question; because these being formed on a tree so generally known as an oak, and being common in all countries, would not have been a subject worthy of especial remark, or have been noticed as something peculiar to the district around the Sea of Sodom. The fruit of the *'ôsher* appears to have the best claim to represent the apples of Sodom; the *Calotropis procera* is an Indian plant, and thrives in the warm valley of *'Ain Jidy*, but is scarcely to be found elsewhere in Palestine. The readiness with which its fruit, "fair to the eye," bursts when pressed, agrees well with Josephus's account; and although there is a want of suitableness between "the few fibres" of Robinson, and the "smoke and ashes" of the Jewish historian, yet, according to a note by the editor of Seetzen's Letters, the fruit of the *Calotropis* in winter contains a yellowish dust, in appearance resembling certain fungi, but of pungent quality.[a]

W. H.

---

[a] "You do not mention the *Solanum Sodomæum*, which I thought had been quoted as one apple of the Dead Sea, and which is the plant I always thought to be as probably the fruit in question as any other. The objection to *S. melongena* is, that it is a cultivated plant; to the oak gall, that it is wholly absent from the Dead Sea district, though it answers the description best, so far as its beautiful exterior and powdery bitter interior are concerned.

"The Vine of Sodom, again, I always thought might refer to *Cucumis colocynthis* [see GOURD, ii. 962], which is bitter and powdery inside; the term *vine* would scarcely be given to any but a trailing or other plant of the habit of a vine. The objection to the *Calotropis procera* (*Asclep. gigantea*, Lin.) is, that it is very scarce and not characteristic of the district, being found in one spot only. The beautiful silky cotton would never suggest the idea of anything but what is exquisitely lovely — it is impossible to imagine anything more beautiful: to assume that a diseased state of it was intended, is arguing *ad ignotum ab ignoto* and a very far-fetched idea." J. D. HOOKER.

Dr. Hooker's remark, that the term *vine* must refer to some plant of the habit of a vine, is conclusive against the claims of all the plants hitherto identified with the Vine of Sodom. The *C. colocynthis* alone possesses the required condition implied in the name W. H.

**VINEGAR** (חֹמֶץ: ὄξος: *acetum*). The Hebrew term *chomets* was applied to a beverage, consisting generally of wine or strong drink turned sour (whence its use was proscribed to the Nazarite, Num. vi. 3), but sometimes artificially made by an admixture of barley and wine, and thus liable to fermentation (Mishn. *Pes.* 3, § 1). It was acid even to a proverb (Prov. x. 26), and by itself formed a nauseous draught (Ps. lxix. 21), but was serviceable for the purpose of sopping bread, as used by laborers (Ruth ii. 14). The degree of its acidity may be inferred from Prov. xxv. 20, where its effect on nitre is noticed. Similar to the *chomets* of the Hebrews was the *acetum* of the Romans, — a thin, sour wine, consumed by soldiers (Veget. *Re Mil.* iv. 7), either in a pure state, or, more usually, mixed with water, when it was termed *posca* (Plin. xix. 29; Spart. *Hadr.* 10). This was the beverage of which the Saviour partook in his dying moments (Matt. xxvii. 48; Mark xv. 36; John xix. 29, 30), and doubtless it was refreshing to his exhausted frame, though offered in derision either on that occasion or previously (Luke xxiii. 36). The same liquid, mingled with gall (as St. Matthew states, probably with the view of marking the fulfillment of the prediction in Ps. lxix. 21), or with myrrh (as St. Mark states with an eye to the exact historical fact[a]), was offered to the Saviour at an earlier stage of his sufferings, in order to deaden the perception of pain (Matt. xxvii. 34; Mark xv. 23).

W. L. B.

**VINEYARDS, PLAIN OF THE** (אָבֵל כְּרָמִים: Ἐβελχαρμείν; Alex. Αβελ αμπελωνων: *Abel quæ est vineis consita*). This place, mentioned only in Judg. xi. 33, has been already noticed under ABEL (5: see vol. i. p. 5 *a*). To what he has there said, the writer has only to call attention to the fact that a ruin bearing the name of *Beit el-Kerm*, — "house of the vine," was encountered by De Saulcy to the north of *Kerak* (*Narr.* i. 353). This may be the *Abel ceramim* of Jephthah, if the Aroer named in the same passage is the place of that name on the Arnon (*W. Mojeb*). It is however by no means certain; and indeed the probability is that the Ammonites, with the instinct of a nomadic or semi-nomadic people, betook themselves, when attacked, not to the civilized and cultivated country of Moab (where *Beit el-Kerm* is situated), but to the spreading deserts towards the east, where they could disperse themselves after the usual tactics of such tribes.

G.

**VIOL.** For an explanation of the Hebrew word translated "viol" see PSALTERY. The old English viol, like the Spanish *viguela*, was a six-stringed guitar. Mr. Chappell (*Pop. Mus.* i. 246) says, "the position of the fingers was marked on the finger-board by frets, as in guitars of the present day. The 'Chest of Viols' consisted of three, four, five, or six of different sizes; one for the treble, others for the mean, the counter-tenor, the tenor, and perhaps two for the bass." Etymologically *viol* is connected with the Dan. *fiol* and the A.-S. *fiðele*, through the Fr. *viole*, Old Fr. *vielle*, Med. Lat. *vitella*. In the *Promptorium Parvulorum* we find "Fyyele, viella, fidicina, vitella." Again, in North's Plutarch (*Antonius*, p. 980, ed. 1595) there is a description of Cleopatra's barge, "the poope whereof was of gold, the sailes of purple, and the owers of silver, which kept stroke in rowing after the sound of the musicke of flutes, howboyes, cytherns, *vyolls*, and such other instruments as they played vpon in the barge." W. A. W.

* **VINTAGE.** [HARVEST; VINE; WINE.]

**VIPER.** [SERPENT.]

* **VOLUME.** [BOOK; ROLL; WRITING.]

**VOPH'SI** (וָפְסִי: Ζαβί; Alex. Ιαβι: *Vapsi*). Father of Nahbi, the spy selected from the tribe of Naphtali (Num. xiii. 14).

* **VOTE.** This is the proper word in Acts xxvi. 10, instead of "voice" of the A. V. Paul says there that when Stephen and other disciples were put to death he "gave his vote," κατήνεγκα ψῆφον, against them. Some allege this as proof that he was a member of the Jewish Sanhedrim at the time, and voted for the sentence of death. But the language does not warrant this conclusion. Like our "suffrage," ψῆφος, a stone used as a ballot, often signified opinion merely, assent or dissent, with only a figurative allusion to the act of voting. Plato often uses the word in this sense (see Rost and Palm's *Gr. Handwörterb.* iii. p. 2575). It is improbable on other grounds that Paul belonged to the Sanhedrim at that time. His age would hardly have allowed him to attain that honor so early (see Acts vii. 58), and his being unmarried (as we may infer from 1 Cor. vii. 8) was a disqualification if, as the later Jews maintain, no one could be a judge unless he was a father, because a parent may be expected to be merciful. Lechler gives the right interpretation. H.

**VOWS.**[b] The practice of making vows, *i. e.* incurring voluntary obligations to the Deity, on fulfillment of certain conditions, such as deliverance from death or danger, success in enterprises, and the like, is of extremely ancient date, and common in all systems of religion. The earliest mention of a vow is that of Jacob, who, after his vision at Bethel, promised that in case of his safe return he would dedicate to Jehovah the tenth of his goods, and make the place in which he had set up the memorial-stone a place of worship (Gen. xxviii. 18–22, xxxi. 13). Vows in general are also mentioned in the book of Job (xxii. 27).

Among instances of heathen usage in this respect the following passages may be cited: Jer. xliv. 25, and Jonah i. 16; Hom. *Il.* i. 64, 93, vi. 93, 308; *Odyss.* iii. 382; Xen. *Anab.* iii. 2, § 12; Virg. *Georg.* i. 436; *Æn.* v. 234; Hor. *Carm.* i. 5, 13, iii. 29, 59; Liv. xxii. 9, 10; Cic. *Att.* viii. 16; Justin, xxi. 3; a passage which speaks of immoral vows; Vell. Pat. ii. 48.

The Law therefore did not introduce, but regulated the practice of vows. Three sorts are mentioned: I. Vows of devotion, *Neder*; II. Vows of abstinence, *Esar* or *Isar*; III. Vows of destruction, *Cherem*.

I. As to vows of devotion, the following rules

---

[a] St. Mark terms it οἶνος ἐσμυρνισμένος. There is no difficulty in the application of οἶνος and ὄξος to the same substance; but whether the μετὰ χολῆς ἐμεμιγμένον of St. Matthew can in any way be identified with the ἐσμυρνισμένος of Mark, is doubtful. The term χολή may well have been applied to some soporific substance.

[b] נְדָרִים, from נָדַר, "to make vow" (Gen. p. 855). See also ANATHEMA.

Digitized by Google

are laid down: A man might devote to sacred uses possessions or persons, but not the first-born either of man or beast, which was devoted already (Lev. xxvii. 26). [FIRST-BORN.]

(*a*.) If he vowed land, he might either redeem it or not. If he intended to redeem, two points were to be considered: (1) the rate of redemption; (2) the distance, prospectively and retrospectively, from the year of jubilee. The price of redemption was fixed at 50 shekels of silver for the quantity of land which a homer of barley (eight bushels) would suffice to sow (Lev. xxvii. 16; see Knobel). This payment might be abated under the direction of the priest, according to the distance of time from the jubilee-year. But at whatever time it was redeemed, he was required to add to the redemption-price one fifth (20 per cent.) of the estimated value. If he sold the land in the mean time, it might not then be redeemed at all, but was to go to the priests in the jubilee-year (ver. 20).

The purchaser of land, in case he devoted and also wished to redeem it, was required to pay a redemption-price according to the priestly valuation first mentioned, but without the additional fifth. In this case, however, the land was to revert in the jubilee to its original owner (Lev. xxvii. 16, 24, xxv. 27; Keil, *Hebr. Arch.* §§ 66, 80).

The valuation here laid down is evidently based on the notion of annual value. Supposing land to require for seed about 3 bushels of barley per acre, the homer, at the rate of 32 pecks, or 8 bushels, would be sufficient for about 2⅔ or 3 acres. Fifty shekels, 25 ounces of silver, at five shillings the ounce, would give £6 5*s*., and the yearly valuation would thus amount to about £2 per acre.

The owner who wished to redeem, would thus be required to pay either an annual rent or a redemption-price answering to the number of years short of the jubilee, but deducting Sabbatical years (Lev. xxv. 3, 15, 16), and adding a fifth, or 20 per cent., in either case. Thus, if a man devoted an acre of land in the jubilee year, and redeemed it in the same year, he would pay a redemption-price of 49—6 = 43 years' value, + 20 per cent. = £103 4*s*., or an annual rent of £2 8*s*.; a rate by no means excessive when we consider, (1) the prospect of restoration in the jubilee; (2) the undoubted fertility of the soil, which even now, under all disadvantages, sometimes yields an hundredfold (Burckhardt, *Syria*, p. 297).

If he refused or was unable to redeem, either the next of kin (Goel) came forward, as he had liberty to do, or, if no redemption was effected, the land became the property of the priests (Lev. xxv. 25, xxvii. 21; Ruth iii. 12, iv. 1, etc.).

In the case of a house devoted, its value was to be assessed by the priest, and a fifth added to the redemption price in case it was redeemed (Lev. xxvii. 15). Whether the rule held good regarding houses in walled cities, namely, that the liberty of redemption lasted only for one year, is not certain; but as it does not appear that houses devoted, but not redeemed, became the property of the priests, and as the Levites and priests had special towns assigned to them, it seems likely that the price only of the house, and not the house itself, was made over to sacred uses, and thus that the act of consecration of a house means, in fact, the consecration of its value. The Mishna, however, says, that if a devoted house fell down, the owner was not liable to payment, but that he was liable if he had devoted the value of the house (*Eracin* v. 5).

(*b*.) Animals fit for sacrifice, if devoted, were not to be redeemed or changed, and if a man attempted to do so, he was required to bring both the devotee and the changeling (Lev. xxvii. 9, 10, 33). They were to be free from blemish (Mal. i. 14). An animal unfit for sacrifice might be redeemed, with the addition to the priest's valuation of a fifth, or it became the property of the priests, Lev. xxvii. 12, 13. [OFFERING.]

(*c*.) The case of persons devoted stood thus: A man might devote either himself, his child (not the first-born), or his slave. If no redemption took place, the devoted person became a slave of the sanctuary — see the case of Absalom (2 Sam. xv. 8; Michaelis, § 124, ii. 166, ed. Smith). [NAZARITE.] Otherwise he might be redeemed at a valuation according to age and sex, on the following scale (Lev. xxvii. 1–7): —

| | | £ | *s*. | *d*. |
|---|---|---|---|---|
| A. 1. | A male from one month to 5 years old, 5 shekels . . . . . = | 0 | 12 | 6 |
| 2. | From 5 years to 20 years, 20 shekels = | 2 | 10 | 0 |
| 3. | From 20 years to 60 years, 50 shekels = | 6 | 5 | 0 |
| 4. | Above 60 years, 15 shekels . . . = | 1 | 17 | 6 |
| B. 1. | Females from one month to 5 years, 3 shekels . . . . . = | 0 | 7 | 6 |
| 2. | From 5 years to 20 years, 10 shekels = | 1 | 5 | 0 |
| 3. | From 20 years to 60 years, 30 shekels = | 3 | 15 | 0 |
| 4. | Above 60 years, 10 shekels . . . = | 1 | 5 | 0 |

If the person were too poor to pay the redemption price, his value was to be estimated by the priest, not, as Michaelis says, the civil magistrate (Lev. xxvii. 8; Deut. xxi. 5; Mich. § 145, ii. 283).

Among general regulations affecting vows, the following may be mentioned: —

1. Vows were entirely voluntary, but once made were regarded as compulsory, and evasion of performance of them was held to be contrary to true religion (Num. xxx. 2; Deut. xxiii. 21; Eccl. v. 4).

2. If persons in a dependent condition made vows, as (*a*) an unmarried daughter living in her father's house, or (*b*) a wife, even if she afterwards became a widow, the vow, if (*a*) in the first case her father, or (*b*) in the second, her husband heard and disallowed it, was void; but if they heard without disallowance, it was to remain good (Num. xxx. 3–16). Whether this principle extended to all children and to slaves is wholly uncertain, as no mention is made of them in Scripture, nor by Philo when he discusses the question (*de Spec. Leg.* 6, ii. 274, ed. Mangey). Michaelis thinks the omission of sons implies absence of power to control them (§ 83, i. 447).

3. Votive offerings arising from the produce of any impure traffic were wholly forbidden (Deut. xxiii. 18). A question has risen on this part of the subject as to the meaning of the word *celeb*, dog, which is understood to refer either to immoral intercourse of the grossest kind, or literally and simply to the usual meaning of the word. The prohibition against dedication to sacred uses of gain obtained by female prostitution was doubtless directed against the practice which prevailed in Phœnicia, Babylonia, and Syria, of which mention is made in Lev. xix. 29; Baruch vi. 43 [or Epist. of Jer. 43]; Herod. i. 199; Strabo, p. 561; August. *de civ. Dei*, iv. 10, and other authorities quoted by Spencer (*de leg. Hebr.* ii. 35, p. 566) Following out this view, and bearing in mind the

Digitized by Google

mention made in 2 K. xxiii. 7, of a practice evidently connected with idolatrous worship, the word *celeb* has been sometimes rendered *cinædus*; some have understood it to refer to the first-born, but Spencer himself, ii. 35, p. 572; Josephus, *Ant.* iv. 8, § 9; Gesen. ii. 685, and the Mishna, *Temurah*, vi. 3, all understand dog in the literal sense. [DOG.]

II., III. For vows of abstinence, see CORBAN; and for vows of extermination, ANATHEMA, and Ex. x. 8; Mic. iv. 13.

Vows in general and their binding force as a test of religion are mentioned — Job xxii. 27; Prov. vii. 14; Ps. xxii. 25, l. 14, lvi. 12, lxvi. 13, cxvi. 14; Is. xix. 21; Nah. i. 15.

Certain refinements on votive consecrations are noticed in the Mishna, *e. g.*: —

1. No evasion of a vow was to be allowed which substituted a part for the whole, as, "I vowed a sheep but not the bones" (*Nedar.* ii. 5).

2. A man devoting an ox or a house, was not liable if the ox was lost, or the house fell down; but otherwise, if he had devoted the value of the one or the other of these.

3. No devotions might be made within two years before the jubilee, nor redemptions within the year following it. If a son redeemed his father's land, he was to restore it to him in the jubilee (*Erac.* vii. 3).

4. A man might devote some of his flock, herd, and heathen slaves, but not all these (*ibid.* viii. 4).

5. Devotions by priests were not redeemable, but were transferred to other priests (*ibid.* 6).

6. A man who vowed not to sleep on a bed, might sleep on a skin if he pleased (Otho, *Lex. Rabb.* p. 673).

7. The sums of money arising from votive consecrations were divided into two parts — sacred (1) to the altar; (2) to the repairs of the Temple (Reland, *Ant.* c. x. § 4).

It seems that the practice of shaving the head at the expiration of a votive period was not limited to the Nazaritic vow (Acts xviii. 18, xxi. 24).

The practice of vows in the Christian Church, though evidently not forbidden, as the instance just quoted serves to show, does not come within the scope of the present article (see Bingham, *Antiq.* xvi. 7, 9, and Suicer, *εὐχή*). H. W. P.

**VULGATE, THE.** (LATIN VERSIONS OF THE BIBLE.) The influence which the Latin Versions of the Bible have exercised upon Western Christianity is scarcely less than that of the LXX. upon the Greek churches. But both the Greek and the Latin Vulgates have been long neglected. The revival of letters, bringing with it the study of the original texts of Holy Scripture, checked for a time the study of these two great bulwarks of the Greek and Latin churches, for the LXX. in fact belongs rather to the history of Christianity than to the history of Judaism, and, in spite of recent labors, their importance is even now hardly recognised. In the case of the Vulgate, ecclesiastical controversies have still further impeded all efforts of liberal criticism. The Romanist (till lately) regarded the Clementine text as fixed beyond appeal; the Protestant shrank from examining a subject which seemed to belong peculiarly to the Romanist. Yet, apart from all polemical questions, the Vulgate should have a very deep interest for all the Western churches. For many centuries it was the only Bible generally used; and, directly or indirectly, it is the real parent of all the vernacular versions of Western Europe. The Gothic Version of Ulphilas alone is independent of it, for the Slavonic and modern Russian versions are necessarily not taken into account. With England it has a peculiarly close connection. The earliest translations made from it were the (lost) books of Bede, and the Glosses on the Psalms and Gospels of the 8th and 9th centuries (ed. Thorpe, Lond. 1835, 1842). In the 10th century Ælfric translated considerable portions of the O. T. (*Heptateuchus*, etc., ed. Thwaites, Oxon. 1698). But the most important monument of its influence is the great English Version of Wycliffe (1324–1384, ed. Forshall and Madden, Oxfd. 1850), which is a literal rendering of the current Vulgate text. In the age of the Reformation the Vulgate was rather the guide than the source of the popular versions. The Romanist translations into German (Michaelis, ed. Marsh, ii. 107), French, Italian, and Spanish, were naturally derived from the Vulgate (R. Simon, *Hist. Crit. N. T.* Cap. 28, 29, 40, 41). Of others that of Luther (N. T. in 1523) was the most important, and in this the Vulgate had great weight though it was made with such use of the originals as was possible. From Luther the influence of the Latin passed to our own Authorized Version. Tyndal had spent some time abroad, and was acquainted with Luther before he published his version of the N. T. in 1526. Tyndal's version of the O. T., which was unfinished at the time of his martyrdom (1536), was completed by Coverdale, and in this the influence of the Latin and German translations was predominant. A proof of this remains in the Psalter of the Prayer Book, which was taken from the "Great English Bible" (1539, 1540), which was merely a new edition of that called Matthew's, which was itself taken from Tyndal and Coverdale. This version of the Psalms follows the Gallican Psalter, a revision of the Old Latin, made by Jerome, and afterwards introduced into his new translation (comp. § 22), and differs in many respects from the Hebrew text (*e. g.* Ps. xiv.). It would be out of place to follow this question into detail here. It is enough to remember that the first translators of our Bible had been familiarized with the Vulgate from their youth, and could not have cast off the influence of early association. But the claims of the Vulgate to the attention of scholars rest on wider grounds. It is not only the source of our current theological terminology, but it is, in one shape or other, the most important early witness to the text and interpretation of the whole Bible. The materials available for the accurate study of it are unfortunately at present as scanty as those yet unexamined are rich and varied (comp. § 30). The chief original works bearing on the Vulgate generally are —

R. Simon, *Histoire Critique du V. T.* 1678–1685: *N. T.* 1689–1693.

Hody, *De Bibliorum textibus originalibus*, Oxon. 1705.

Martianay, *Hieron. Opp.* (Paris, 1693, with the prefaces and additions of Vallarsi, Verona, 1734, and Maffei, Venice, 1767).

Bianchini (*Blanchinus* or *Blanchini*), *Vindicia Canon. SS. Vulg. Lat. Edit.* Rome, 1740.

Bukentop, *Lux de Luce* Brunellis, 1710.

Digitized by Google

Sabatier, *Bibl. SS. Lat. Vers. Ant.*, Remis, 1743.

Van Ess, *Pragmatisch-kritische Gesch. d. Vulg.* Tübingen, 1824.

Vercellone, *Variæ Lectiones Vulg. Lat. Bibliorum*, tom. i., Romæ, 1860; tom. ii. pars prior, 1862.

In addition to these there are the controversial works of Mariana, Bellarmin, Whitaker, Fulke, etc., and numerous essays by Calmet, D. Schulz, Fleck, Riegler, etc., and in the N. T. the labors of Bentley, Sanftl, Griesbach, Schulz, Lachmann, Tregelles, and Tischendorf, have collected a great amount of critical materials. But it is not too much to say that the noble work of Vercellone has made an epoch in the study of the Vulgate, and the chief results which follow from the first installment of his collations are here for the first time incorporated in its history. The subject will be treated under the following heads: —

I. THE ORIGIN AND HISTORY OF THE NAME VULGATE. §§ 1–3.

II. THE OLD LATIN VERSIONS. §§ 4–13. *Origin*, 4, 5. *Character*, 6. *Canon*, 7. *Revisions:* Itala, 8–11. *Remains*, 12, 13.

III. THE LABORS OF JEROME. §§ 14–20. *Occasion*, 14. Revision of Old Latin of N. T., 15–17. *Gospels*, 15, 16. *Acts, Epistles*, etc., 17. Revision of O. T. from the LXX., 18, 19. Translation of O. T. from the Hebrew, 20.

IV. THE HISTORY OF JEROME'S TRANSLATION TO THE INTRODUCTION OF PRINTING. §§ 21–24. *Corruption of Jerome's text*, 21, 22. Revision of Alcuin, 23. *Later revisions: divisions of the text*, 24.

V. THE HISTORY OF THE PRINTED TEXT. §§ 25–29. *Early editions*, 25. The Sixtine and Clementine Vulgates, 26. *Their relative merits*, 27. *Later editions*, 28, 29.

VI. THE MATERIALS FOR THE REVISION OF JEROME'S TEXT. §§ 30–32. *MSS. of O. T.*, 30, 31. *Of N. T.*, 32.

VII. THE CRITICAL VALUE OF THE LATIN VERSIONS. §§ 33–39. *In O. T.*, 33. *In N. T.*, 34–38. Jerome's Revision, 34–36. *The Old Latin*, 37. *Interpretation*, 39.

VIII. THE LANGUAGE OF THE LATIN VERSIONS, §§ 40–45. *Provincialisms*, 41, 42. *Græcisms*, 43. *Influence on Modern Language*, 45.

I. THE ORIGIN AND HISTORY OF THE NAME VULGATE. — 1. The name *Vulgate*, which is equivalent to *Vulgata editio* (the *current* text of Holy Scripture), has necessarily been used differently in various ages of the Church. There can be no doubt that the phrase originally answered to the κοινὴ ἔκδοσις of the Greek Scriptures. In this sense it is used constantly by Jerome in his Commentaries, and his language explains sufficiently the origin of the term: "Hoc juxta LXX. interpretes diximus, quorum *editio toto orbe vulgata est*" (Hieron. *Comm. in Is.* lxv. 20). "Multum in hoc loco LXX. editio Hebraicumque discordant. Primum ergo *de Vulgata editione* tractabimus et postea sequemur ordinem veritatis" (*id.* xxx. 22). In some places Jerome distinctly quotes the Greek text: "Porro in editione Vulgata dupliciter legimus; quidam enim codices habent ὃ ἦλθον εἶσιν, hoc est *manifesti sunt:* alii ὃ εἰλαῖοι εἰσιν, hoc est *meticulosi* sive *miseri sunt*" (*Comm. in Osee*, vii. 12; comp. 8–11, etc.). But generally he regards the Old Latin, which was rendered from the LXX., as substantially identical with it, and thus introduces Latin quotations under the name of the LXX. or *Vulgata editio:* ". . . . miror quomodo *vulgata editio* . . . . testimonium alia interpretatione subverterit: *Congregabor et glorificabor coram Domino.* . . . . Illud autem quod in LXX legitur: Congregabor et glorificabor coram Domine . . . ." (*Comm. in Is.* xlix. 5). So again: "Philisthæos . . . . *alienigenas* Vulgata scribit editio" (*ibid.* xiv. 29). ". . . . Palæstinis, quos indifferenter LXX. *alienigenas* vocant" (*in Ezek.* xvi. 27). In this way the transference of the name from the current Greek text to the current Latin text became easy and natural; but there does not appear to be any instance in the age of Jerome of the application of the term to the Latin Version of the O. T. without regard to its derivation from the LXX., or to that of the N. T.

2. Yet more: as the phrase κοινὴ ἔκδοσις came to signify an uncorrected (and so corrupt) text, the same secondary meaning was attached to *vulgata editio*. Thus in some places the *vulgata editio* stands in contrast with the true Hexaplaric text of the LXX. One passage will place this in the clearest light: ". . . . breviter admoneo aliam esse editionem quam Origenes et Cæsariensis Eusebius, omnesque Græciæ translatores κοινὴν, id est, *communem* appellant, atque *vulgatam*, et a pleriaque nunc Λουκιανὸς dicitur; aliam LXX. interpretum quæ in ἑξαπλοῖς codicibus reperitur, et a nobis in Latinum sermonem fideliter versa est . . . . Κοινὴ autem ista, hoc est, *Communis editio*, ipsa est quæ et LXX., sed hoc interest inter utramque, quod κοινὴ pro locis et temporibus et pro voluntate scriptorum vetus corrupta editio est; ea autem quæ habetur in ἑξαπλοῖς et quam nos vertimus, ipsa est quæ in eruditorum libris incorrupta et immaculata LXX. interpretum translatio reservatur" (Ep. cvi. *ad Sun. et Fret.* § 2).

3. This use of the phrase *Vulgata editio* to describe the LXX. (and the Latin Version of the LXX.) was continued to later times. It is supported by the authority of Augustine, Ado of Vienne (A. D. 860), R. Bacon, etc.; and Bellarmin distinctly recognizes the application of the term, so that Van Ess is justified in saying that the Council of Trent erred in a point of history when they described Jerome's Version as "vetus et vulgata editio, quæ longo tot seculorum usu in ipsa ecclesia probata est" (Van Ess, *Gesch.* 34) As a general rule, the Latin Fathers speak of Jerome's Version as "our" version (*nostra editio, nostri codices*); but it was not unnatural that the Tridentine Fathers (as many later scholars) should be misled by the associations of their own time, and adapt to new circumstances terms which had grown obsolete in their original sense. And when the difference of the (Greek) "Vulgate" of the early Church, and the (Latin) "Vulgate" of the modern Roman Church has once been apprehended, no further difficulty need arise from the identity of name. (Compare Augustine, *Ed. Benedict.* Paris, 1836, tom. V. p. xxxiii.; Sabatier, i. 792; Van Ess, *Gesch.* 24–42, who gives very full and conclusive references, though he fails to perceive that the *Old Latin* was practically identified with the LXX.)

II. THE OLD LATIN VERSIONS. — 4. The history of the earliest Latin Version of the Bible is lost in complete obscurity. All that can be affirmed with certainty is that it was made in

Digitized by Google

Africa.[a] During the first two centuries the Church of Rome, to which we naturally look for the source of the version now identified with it, was essentially Greek. The Roman bishops bear Greek names; the earliest Roman liturgy was Greek; the few remains of the Christian literature of Rome are Greek.[b] The same remark holds true of Gaul (comp. Westcott, *Hist. of Canon of N. T.* pp. 269, 270, and reff.); but the Church of N. Africa seems to have been Latin-speaking from the first. At what date this Church was founded is uncertain. A passage of Augustine (*a. Donat. Ep.* 37) seems to imply that Africa was converted late; but if so, the Gospel spread there with remarkable rapidity. At the end of the second century Christians were found in every rank, and in every place; and the master-spirit of Tertullian, the first of the Latin Fathers, was then raised up to give utterance to the passionate thoughts of his native Church. It is therefore from Tertullian that we must seek the earliest testimony to the existence and character of the *Old Latin* (*Vetus Latina*).

5. On the first point the evidence of TERTULLIAN, if candidly examined, is decisive. He distinctly recognizes the general currency of a Latin Version of the N. T., though not necessarily of every book at present included in the Canon, which even in his time had been able to mould the popular language (*adv. Prax.* 5: In usu est nostrorum per simplicitatem interpretationis . . . . *De Monog.* 11: Sciamus plane non sic esse in Graeco authentico quomodo in usum exiit per duarum syllabarum aut callidam aut simplicem eversionem . . . .). This was characterized by a "rudeness" and "simplicity," which seems to point to the nature of its origin. In the words of Augustine (*De doctr. Christ.* ii. 16 (11)), "any one in the first ages of Christianity who gained possession of a Greek MS., and fancied that he had a fair knowledge of Greek and Latin, ventured to translate it." (Qui scripturas ex Hebraea lingua in Graecam verterunt numerari possunt; Latini autem interpretes nullo modo. Ut enim cuivis primis fidei temporibus in manus venit Codex Graecus, et aliquantulum facultatis sibi utriusque linguae habere videbatur, ausus est interpretari.)[c] Thus the version of the N. T. appears to have arisen from individual and successive efforts; but it does not follow by any means that numerous versions were simultaneously circulated, or that the several parts of the version were made independently.[d] Even if it had been so, the exigencies of the public service must soon have given definiteness and substantial unity to the fragmentary labors of individuals. The work of private hands would necessarily be subject to revision for ecclesiastical use. The separate books would be united in a volume; and thus a standard text of the whole collection would be established. With regard to the O. T. the case is less clear. It is probable that the Jews who were settled in N. Africa were confined to the Greek towns; otherwise it might be supposed that the Latin Version of the O. T. is in part anterior to the Christian era, and that (as in the case of Greek) a preparation for a Christian Latin dialect was already made when the Gospel was introduced into Africa. However this may have been, the substantial similarity of the different parts of the Old and New Testaments establishes a real connection between them, and justifies the belief that there was one popular Latin Version of the Bible current in Africa in the last quarter of the second century. Many words which are either Greek (machaera, sophia, perizoma, poderis, agonizo, etc.) or literal translations of Greek forms (vivifico, justifico, etc.) abound in both, and explain what Tertullian meant when he spoke of the "simplicity" of the translation (compare below § 43).

6. The exact literality of the Old Version was not confined to the most minute observance of order and the accurate reflection of the words of the original: in many cases the very forms of Greek construction were retained in violation of Latin usage. A few examples of these singular anomalies will convey a better idea of the absolute certainty with which the Latin commonly indicates the text which the translator had before him, than any general statements: Matt. iv. 13, habitavit in Capharnaum *maritimam; id.* 15, terra Neptalim *viam* maris; *id.* 25, ab Jerosolymis . . . . et trans Jordanem; v. 22, reus erit *in gehennam* ignis; vi. 19, ubi tinea et *comestura* exterminat. Mark xii. 31, *majus horum praeceptorum* aliud non est. Luke x. 19, nihil *vos* nocebit. Acts xix. 26, non solum Ephesi sed paene *totius Asiae*. Rom. ii. 15, inter se *cogitationum accusantium* vel etiam defendentium. 1 Cor. vii. 32, solicitus est quae sunt Domini. It is obvious that there was a continual tendency to alter expressions like these, and in the first age of the version it is not improbable that the continual Graecism which marks the Latin texts of $D_1$ (*Cod. Bezae*), and $E_2$ (*Cod. Laud.*) had a wider currency than it could maintain afterwards.

7. With regard to the African Canon of the N. T. the Old Version offers important evidence. From considerations of style and language it seems certain that the Epistle to the Hebrews, James, and 2 Peter, did not form part of the original African Version, a conclusion which falls in with that which is derived from historical testimony (comp. *The Hist. of the Canon of the N. T.* p. 282 ff.). In the O. T., on the other hand, the Old Latin erred by excess and not by defect: for as the Version was made from the current copies of the LXX. it included the Apocryphal books which are commonly contained in them, and to these 2 Esdras was early added.

8. After the translation once received a definite shape in Africa, which could not have been long after the middle of the second century, it was not

[a] This has been established with the greatest fullness by Card. Wiseman, *Two Letters on 1 John* v. 7, addressed to the editor of the *Catholic Magazine*, 1832, 1833; republished with additions, Rome, 1836; and again in his collected *Essays*, vol. i. 1853. Eichhorn and Hug had maintained the same opinion; and Lachmann has further confirmed it (*N. T.* i. Praef.).

[b] In the absence of all evidence it is impossible to say how far the Christians of the Italian provinces used the Greek or Latin language habitually

[c] Card. Wiseman has shown (*Essays*, i. 24, 25) that "interpretor" and "verto" *may* be used of a revision; but in connection with *primis fidei temporibus* the seem certainly to describe the origin of the Version.

[d] It would be out of place here to point out minute differences in rendering which show that the translation was the work of different hands. Mill (*Prolegg.* 521 ff.) has made some interesting collections to establish this result, but he places too much reliance on the version of $D_1$ (Cod. Bezae).

Digitized by Google

publicly revised. The old text was jealously guarded by ecclesiastical use, and was retained there at a time when Jerome's Version was elsewhere almost universally received. The well-known story of the disturbance caused by the attempt of an African bishop to introduce Jerome's "*cucurbita*" for the old "*hedera*" in the history of Jonah (August. *Ep.* civ. ap. Hieron. *Epp.*, quoted by Tregelles, *Introduction*, p. 242) shows how carefully intentional changes were avoided. But at the same time the text suffered by the natural corruptions of copying, especially by interpolations, a form of error to which the Gospels were particularly exposed (comp. § 15). In the O. T. the version was made from the unrevised edition of the LXX. and thus from the first included many false readings of which Jerome often notices instances (e. g. Ep. cvi. *ad Sun. et Fret.*). In Table A two texts of the *Old Latin* are placed for comparison with the Vulgate of Jerome.

TABLE A. DAN. ix. 4–8.[a]

[a] The differences in the two first columns are marked by Italics. The Italics in col. 3 mark where the text of Jerome differs from both the other texts.

[1] m. *om.* Tol [2] et c. s. *om.* Tol [3] iniqua, Tol. [4] a. *om.* Tol. [5] Judæ, Tol.

9. The Latin translator of Irenæus was probably contemporary with Tertullian,[a] and his renderings of the quotations from Scripture confirm the conclusions which have been already drawn as to the currency of (substantially) one Latin version. It does not appear that he had a Latin MS. before him during the execution of his work, but he was so familiar with the common translation that he reproduces continually characteristic phrases which he cannot be supposed to have derived from any other source (Lachmann, *N. T.* i. pp. x., xi.). CYPRIAN († A. D. 257) carries on the chain of testimony far through the next century; and he is followed by Lactantius, Juvencus, J. Firmicus Maternus, HILARY the deacon (Ambrosiaster), HILARY of Poitiers († A. D. 368), and LUCIFER of Cagliari († A. D. 370). Ambrose and Augustine exhibit a peculiar recension of the same text, and Jerome offers some traces of it. From this date MSS. of parts of the African text have been preserved (§ 12), and it is unnecessary to trace the history of its transmission to a later time.

10. But while the earliest Latin Version was preserved generally unchanged in N. Africa, it fared differently in Italy. There the provincial rudeness of the version was necessarily more offensive, and the comparative familiarity of the leading bishops with the Greek texts made a revision at once more feasible and less startling to their congregations. Thus in the fourth century a definite ecclesiastical recension (of the Gospels at least) appears to have been made in N. Italy by reference to the Greek, which was distinguished by the name of *Itala*. This Augustine recommends on the ground of its close accuracy and its perspicuity (Aug. *De Doctr. Christ.* 15, "in ipsis interpretationibus Itala[b] ceteris præferatur, nam est verborum tenacior cum perspicuitate sententiæ"), and the text of the Gospels which he follows is marked by the latter characteristic when compared with the African. In the other books the difference cannot be traced with accuracy; and it has not yet been accurately determined whether other national recensions may not have existed (as seems certain from the evidence which the writer has collected) in Ireland (Britain), Gaul, and Spain.

[a] It should be added that Dodwell places him much later, at the close of the 4th cent. Comp. Grabe, *Prolegg. ad Iren.* 2. § 3.

[b] It is unnecessary now to examine the conjectures which have been proposed, *usitata-quæ, illa quæ*. They were made at a time when the history of the Old Latin was unknown.

Digitized by Google

11. The *Itala* appears to have been made in some degree with authority: other revisions were made for private use, in which such changes were introduced as suited the taste of scribe or critic. The next stage in the deterioration of the text was the intermixture of these various revisions; so that at the close of the fourth century the Gospels were in such a state as to call for that final recension which was made by Jerome. What was the nature of this confusion will be seen from the accompanying tables (B and C, on next page) more clearly than from a lengthened description.

12. The MSS. of the Old Latin which have been preserved exhibit the various forms of that version which have been already noticed. Those of the Gospels, for the reason which has been given, present the different types of text with unmistakable clearness. In the O. T. the MS. remains are too scanty to allow of a satisfactory classification.

i. MSS. of the *Old Latin* Version of the O. T.
1. Fragments of Gen. (xxxvii., xxxviii., xli., xlvi., xlviii.–l., parts) and Ex. (x., xi., xvi., xvii., xxiii.–xxvii., parts) from Cod. E. (§ 30) of the Vulgate: Vercellone, i. pp. 183–84, 307–10.
2. Fragments (scattered verses) of the Pentateuch: Münter, *Miscell. Hafn.* 1821, pp. 89–95.
3. Fragments (scattered verses of 1, 2 Sam. and 1, 2 Kings, and the Canticles), given by Sabatier.
4. Corbei. 7, Sæc. xiii. (Sabatier), Esther.
5. Pechianus (Sabatier), Fragm. Esther.
6. Orat. (Sabatier), Esther i.–iii.
7. Majoris Monast. Sæc. xii. (Martianay, Sabatier), Job.
8. Sangerm. Psalt. Sæc. vii. (Sabatier).
9. Fragments of Jeremiah (xiv.–xli., detached verses), Ezekiel (xl.–xlviii., detached fragments), Daniel (iii. 15–23, 33–50, viii., xi., fragments), Hosea (ii.–vi., fragments), from a palimpsest MS. at Würzburg (Sæc. vi., vii.): Münter, *Miscell. Hafn.* 1821.
11. Fragments Hos. Am. Mich. . . . . ed. E. Ranke, 1858, &c. (This book the writer has not seen.)
12. Bodl. *Auct.* F. 4, 32. Fragments of Deuteronomy and the Prophets, "Græce et Latine litteris Saxonicis," Sæc. viii., ix.[a]

ii. MSS. of the Apocryphal books.
1. Reg. 3564, Sæc. ix. (Sabatier), Tob. and Jud.
2, 3. Sangerm. 4, 15, Sæc. ix. (Sabatier), Tob. and Jud.
4. Vatic. (Reg. Suec.), Sæc. viii., Tob.
5. Corbei. 7 (Sabatier), Jud.
6. Pechian. (Sabatier), Sæc. x., Jud.
The text of the remaining books of the *Vetus Latina* not having been revised by Jerome is retained in MSS. of the Vulgate.

iii. MSS. of the N. T.
(1.) Of the Gospels.
*African* (i. e. unrevised) text.
*a. Cod. Vercellensis*, at Vercelli, written by Eusebius, bishop of Vercelli in the 4th cent. Published by Irici, 1748, and Bianchini, *Ev. Quadr.* 1749.
*b. Cod. Veronensis*, at Verona, of the 4th or 5th cent. Published by Bianchini (as above).
*c. Cod. Colbertinus*, in Bibl. Imp. at Paris, of the 11th cent. Published by Sabatier, *Versiones antiquæ.*
*d. Cod. Claromontanus*, in the Vatican Libr., of the 4th or 5th cent. It contains a great part of St. Matthew, and is mainly African in character. Published by Mai, *Script. vet. nov. Coll.* iii. 1828.
*e. Cod. Vindobonensis*, at Vienna, of 5th or 6th cent. It contains fragments of St. Mark and St. Luke. Edited by Alter in two German periodicals.
*f. Cod. Bobbiensis*, at Turin, of the 5th cent. It contains parts of St. Matthew and St. Mark. The chief parts published by Tischendorf in the *Jahrbücher d. Literatur*, Vienna, 1847 ff. The text is a remarkable revision of the African.
*g.* The readings of a *Speculum*, published by Mai, *Patrum nova collectio*, i. 2, 1852. Comp. Tregelles, *Introduction* 240.
*h. Cod. Sangallensis*, of the 5th or 4th cent. It contains fragments of St. Matthew and St. Mark. Transcribed by Tischendorf.
*i. Cod. Palat.*, at Vienna, of the 5th cent. Published by Tischdf. 1847.[b] A very important MS., containing St. John, and St. Luke nearly entire, and considerable parts of the other Gospels.
To these must be added a very remarkable fragment of St. Luke published by A. M. Ceriani, from a MS. of the 6th cent. in the Ambrosian Libr. at Milan: *Monum. Sacra*, . . . . 1861; and a purple fragment at Dublin (Sæc. v.) containing Matt. xii. 13–23, published by Dr. Todd in *Proceedings of R. I. A.* iii. 374.
*k. Cod. Corbeiensis*, St. Matt. Edited by Martianay and Sabatier.
*Italic* revision.[b]
*l. Cod. Brixianus*, of the 6th cent. The best type of the *Italic* text. Published by Bianchini, *l. c.* Comp. Lachm. *N. T.* i. Præf. xiv.

[a] To these must probably be added the MSS. of Genesis and the Psalter in the possession of Lord Ashburnham, said to be "of the fourth century."
The text of the Oxford MS. (No. 12) is extremely interesting, and offers many coincidences with the earliest African readings. The passages contained in it are (α) Deut. xxxi. 7; 24–30; xxxii. 1–4. (β) Hos. ii. 14 – iv 1–3 *a*; 9 *a*; vi. 1 *b*, 2; 16; x. 12 *a*; xii 6; viii. 1, 4. Amos iii. 8; v. 8; 14. Mich. iii. 2; iv. 1, 2; (part); v. 2; vi. 8; vii 6, 7. Joel iii. 18. Obad. 4. Jon. i. 8 *b*, 9. Nah. iii. 13. Hab. ii. 4 *b*; iii. 3. Zephan. i. 14–16; 19 (part) Agg. ii. 7, 8. Zech. i. 4 (part); viii. 16, 17, 19 *b*; ix. 9; xiii. 5; 7. Mal. i. 6 (part), 10 *b*, 11; ii. 7; iii. 1. Zech. ii. 8 *b*; Mal. iv 2, 13; 5, 6 *a*. (γ) Gen. i. 1–ii. 3; Ex. xiv. 24–xv. 3; Is. iv. 1–v. 7; lv. 1–5; Ps. xii 1–4; Gen. xxii. 1–19.

[b] The critical value of these revised ante-Hieronymian texts is unduly underrated. Each recension, as the representative of a revision of the oldest text by the help of old Greek MSS., is perhaps not inferior to the recension of Jerome; and the MSS. in which they are severally contained, though numerically inferior to Vulgate MSS., are scarcely inferior in real authority.

(α.) Cambridge *Univ. Libr.* Kk. 1, 24. Sæc. viii.? St. Luke, i. 15–end, and St. John, i. 18–xx. 17. Bentley's X. Capitula wanting in St. Luke; xiv. in St. John. No Ammonian Sections. (Plate ii. fig. 1.)

(β.) Cambridge *Univ. Libr.* Tt. 6, 32. Sæc. viii.–x. *The Book of Deer.* St. Matt. i.–vii. 23. St. Mark, i. 1, v. 36. St. Luke, i. 1, iv. 2. St. John, entire. Very many old and peculiar readings. Nearer Vulg. than (α), but very carelessly written. No Ammonian Sections or Capitula. Belonged to monks of Deer in Aberdeenshire Comp. Mr. H. Bradshaw in the *Printed Catalogue*.[b] [See p. 3482 *a*.]

(γ.) Lichfield, *Book of St. Chad.* Sæc. viii. St. Matt., St. Mark, and St. Luke, i.–iii. 9. Bentley's ξ.

(δ.) Oxford, *Bodl.* D. 24 (3946). Sæc. viii. *The Gospels of Mac Regol*, or the *Rushworth* MS. Bentley's χ. No Capit., Sect., or Prefaces. A collation of the Latin text in the Lindisfarne text of St. Matt. and St. Mark (comp. p. 3475, note *a*), together with the Northumbrian gloss, has been published by Rev. J. Stevenson. Deficient Luke iv. 29–viii. 38.[c]

(ε.) Oxford, C. C. Coll. 122. Sæc. x.,

[a] It would be impossible to enter in detail in the present place into the peculiarities of the text presented by this group of MSS. It will be observed that copies are included in it which represent historically the Irish (η, ε), Scotch (β), Mercian (ζ), Northumbrian (δ), and — if we may trust the very uncertain tradition which represents the Gospels of St. Chad as written by Gildas (comp. *Lib. Landav.* p. 615, ed. 1840) — Welsh churches. Bentley, who had collated more or less completely four of them, observed their coincidence in remarkable readings, but the individual differences of the copies, no less than their wide range both in place and age, exclude the idea that all were derived from one source. They stand out as a remarkable monument of the independence, the antiquity, and the influence of British (Irish) Christianity.

For the present it must suffice to give a few special readings which show the extent and character of the variations of this family from other families of MSS. The notation of the text is preserved for the sake of brevity.

Matt. viii. 24. — Fluctibus + *erat autem* (enim γ) *illis ventus contrarius* (contr. vent. ζ) (γ δ ε ζ).

Matt. x. 29. — *Sine voluntate Dei patris vestri qui in cælis est* (sine p. vol. q. e. in c. ε). Sine p. v. vol. qui in c. e. $\zeta^{vg}$. Sine patre vestro voluntate, etc., $\zeta^{e}$ (γ ε ζ).

Matt. xiv. 35. — *Loci illius venerunt at* [om. ven. et. δ ζ] *adoraverunt eum et* (δ ε ζ).

Matt. xxvii. 49. — *Alius autem accepta lancea pupugit* (pupungit) *latus ejus et exit* (-iit -ivit) *aqua et sanguis* (γ δ ε).

Mark xiii. 18. — Ut *hieme non fiat* (-et) *fuga vestra* (γ δ ε) *vel sabbato* (δ ε), ut *non fra* (sic) *fuga vestra hieme vel sabbato* (ζ).

Luke xxiii. 2. — Nostram + *et solventem legem* (+ nostram ζ) *et prophetas* (δ ε ζ).

Luke xxiv. 1. — Ad mon. + *Maria Magdalene et altera Maria et quædam cum eis* (δ ε).

John xix. 30. — *Cum autem expiravit* (asp. ε trdisset spm (sic) ζ) *velamentum* (velum α ε ζ) *templi scissum est medium a summo usque* (ad α) *deorsum* (α γ ε ζ).

John xxi. 6. — Invenietis + *Dixerunt autem Per totam noctem laborantes nihil cepimus: in verbo autem tuo mittimus* (laxttemus [sic i. e. laxabimus] rete ε, mitemus (sic) ζ) (γ ε ζ).

Other readings more or less characteristic are Matt. ii. 14, matrem *om* ejus; ii. 15, est *om* a Domino; iv. 9, vade + *retro*: iv. 6, de te + *ut custodiant te in omnibus viis tuis*; v. 5, lugent + *nunc*; v. 48, sicut pater; vi. 13, *patiaris nos induci*, etc.

As a more continuous specimen the following readings occur in one chapter in the Hereford Gospels in which this Latin text, with a few others only, agrees closely with the Greek: Luke xxiv. 6, *esset* in *Gal. i, tertia die*; 16, *agnoscerent eum*; 20, *tradiderunt eum*; 24, *viderunt*; 28, *finxit longius ire*; 38, *quare cogitationes*; 39. *pedes meos*; 44, *hæc sunt verba mea quæ locutus sum ad vos*. Other remarkable readings in the same passage are 8, *horum verborum*; 12, *Respondens unus* om. et; 21, *quo hæc omnia*; 27, *et erat in cipiens*; 29, *inclinata est dies jam*.

A comparison of the few readings from the Gospels given in the Epistle of GILDAS according to the Cambridge MS. (*Univ. Libr.* Dd. 1, 17), for the text in Stevenson's edition is by no means accurate, shows some interesting coincidences with these Irish (British) MSS. (For the explanation of the additional references see § 31.)

Matt. v. 15. — *Supra* γ δ ε ζ K W P (*b*); v. 16, *magnificent* δ (*a*, *b*); v. 19, qui *enim* γ ε P (*a*, *b*); vii. 2, *judicabitur de vobis* ε (*a*, *b*); vii. 3. non *consideras* (*a*); vii. 4, *in oculo tuo est* γ; vii. 6, *miseritis* (*a*, *b*); vii. 15, attendite + *vobis* γ δ φ (*b*); vii. 17, *bonus fructus* δ O (*a*, *b*); *id et mala malos*; vii. 23, *operarii iniquitatis* (*a*); vii. 27, *impigerunt* O; x. 28, *et corpus et animam*, ε, *c. et an.* γ δ; xv. 14, *cæci duces sunt*; xvi. 18, infirm γ δ ε ζ B H O Z K φ (*a*); xvi. 19, *quæcunque*; *id. erunt ligata* δ (*b*); xxiii. 8, *vero opera* δ ζ φ; id., et *ipsi* non f. δ ε ζ (*b*); xxiii. 13, *qui* claud. D. id., vos *autem* δ ζ H O φ.

Thus of twenty-one readings which differ from *Cod. Am.* thirteen are given in one or other of those MSS. which have been supposed to present a typical British (Irish) text, and of these eleven are found in the *Rushworth* MS. alone. While on the other hand nine readings agree with *Cod. Veron.* and seven with *Cod. Vercell.*, and every reading is supported by some old authority. Thus, though the range of comparison is very limited, the evidence of these quotations, as far as it goes, supports the belief in a distinct British text.

In the Evangelic quotations in the printed text of ST. PATRICK, out of seventeen variations, eight (as far as I can find) are supported by no known Latin authority: the remainder are found in γ, δ, ε or φ. BACHIARIUS I have not been able to examine, though his writings are not unlikely to offer some illustrations of the early text.

SEDULIUS (*Opus Paschale*), as might have been expected from his foreign training, gives in the main a pure Vulgate text in his quotations from the Vulgate. When he differs from it (*e. g.* Luke x. 19, 20; John xi. 43, *prodi*), he often appears to quote from memory, and differs from all MSS.

The quotations given at length in the British copy of Juvencus (Camb. *Univ. Libr.* Ff. 4, 42) would probably repay a careful examination.

[b] This MS., in common with many Irish MSS. (*e. g.* Brit. Mus. Harl. 1802, 2795, the Book of MacDurnan, and some others, as *Harl.* 1775, *Cotton.* Tib. A ii.) separates the genealogy in St. Matt. from the rest of the Gospel, closing v. 17 with the words *Finit Prologus*, and then adding *Incipit Evangelium*.

[c] The reading of this MS. in Matt. xxi. 28 ff. is very remarkable: Homo quidam habebat duos filios et accedens ad primum dixit fili vade operare in vinea meam ille autem respondens dixit ego (sic) domine et non ibi

xl.? Bentley's C. Has Canons and Prefaces, but no Sect. or Capit.

(ζ.) Hereford (*Saxon*) *Gospels*. Sæc. viii. (ix.). The four Gospels, with two small lacunæ. Without Prefaces, Canons, Capitula, or Sections. A very important copy, and probably British in origin.[a] (Plate ii. fig. 5.)

(η.) *The Book of Armagh* (all N. T.), Trin. Coll. Dublin: written A. D. 807. Comp. *Proceedings of R. I. A.* iii. pp. 316, 356. Sir W. Betham, *Irish Antiq. Researches*, ii.[b]

(θ.) A copy found in the *Domhnach Airgid* (Royal I. Acad.), Sæc. v., vi. Comp. Petrie, *Transactions of R. I. A.*, xviii. 1838. O'Curry's *Lectures*, Dublin 1861, pp. 321 ff., where a fac-simile is given.

(ι.) (κ.) Two copies in Trin. Coll. Dublin, said to be "ante-Hieronymian, Sæc. vii."[c]

To these must be added a large number of Irish, including under this term North British MSS., which exhibit a text more nearly approaching the Vulgate, but yet with characteristic old readings. Such are: —

Brit. Mus., *Harl.* 1802. Sæc. x.–xii. A. D. 1138? Prefaces all at the beginning. No *Capitula* or *Sections*. Bentley's W. (Plate ii. fig. 4.)

Brit. Mus., *Harl.* 1023. Sæc. x.–xii.? No *Capitula* or *Sections*. (Plate ii. fig. 3.)

Lambeth. *The Book of Mac Durnan.*[d] Sæc. x. Has Sections, but no Prefaces or Canons.

Dublin, *T. C. C. The Book of Kells.* Sæc. viii.

Dublin, *T. C. C. The Book of Durrow.* Sæc. viii.

Dublin, *T. C. C. The Book of Dimma.* Sæc. viii.

Dublin, *T. C. C. The Book of Moling.* Sæc. viii.[e]

*Gallican* (?) revision.[f]

Brit. Mus., *Egerton*, 609, formerly *Majoris Monasterii*; iv. Gospp. deficient from Mark vi. 56 to Luke xi. 1. This MS. is called *mm*, and classified under Vulgate MSS. in the editions of the N. T., but it has been used only after Calmet's very imperfect collation, and offers a distinct type of text. *Præf. Can.* No *Capitula*.

(2.) Of the Acts and Epistles.

*a*. *Cod. Bobbiensis*, at Vienna. A few fragments of the Acts and Cath. Epp Edited by Tischendorf, *Jahrbücher d Lit.* l. c.

*o*. *Cod. Corbei.*, a MS. of Ep. of St James. Published by Martianay, 1695

*p*. (Of St. Paul's Epp.) *Cod. Clarom.* the Latin text of $D_2$. Published by Tischendorf.

*q*. (Of St. Paul's Epp.) *Cod. Sangerm.*, the Latin text of $E_{2a}$, said to have an independent value, but imperfectly known.

*r*. (Of St. Paul's Epp.) *Cod. Boern.*, the Latin text of $G_2$, is in the main an old copy, adapted in some points to the Greek.

*s*. (See Gospels.)

*t*. Fragments of St. Paul's Epistles transcribed at Munich by Tischendorf.

*u*, *v*. (Acts) the Latin text of $D_1$ and $E_2$ (Cod. Bezæ and Cod. Laud.).

To these must be added, from the result of a partial collection [collation?]: —

$a_1$. Oxford, *Bodl.* 3418 (Selden, 30). Acts. Sæc. viii., vii. An uncial MS. of the highest interest. Deficient xiv. 26, *fidei* — xv. 32, *cum essent*. Bentl. $\chi_2$. Among its characteristic readings may be noticed: v. 34, foras modicum apostolos secedere: ix. 40, surge in nomine Domini Ihu Xti.; xi. 17, ne daret illis Spiritum Sanctum credentibus in̄ nomine Ihu Xti.; xiii. 14, Paulus et Barnabas; xvi. 1, et cum circuisset has nationes pervenit in Derben. (Plate i. fig. 4.)

$a_2$. Oxford, *Bodl.* Laud. *Lat.* 108 (E, 67). Sæc. ix. St. Paul's Epp. in Saxon letters. Ends Hebr. xi. 34, *aciem gladii*. Corrected apparently by three hands. The original text was a revision of the Old Latin, but it has been much erased. In many cases it agrees with *d* almost or quite alone: *e. g.* Rom. ii. 14, 16, iii. 22, 26, x. 20, xv. 13, 23, 27, 30. The Epistles to Thess. are placed before the Ep. to Coloss. This arrangement, which is given by Augustine (*De Doctr. Christ.* ii. 13), appears to have prevailed in early English MSS., and occurs in

---

cesdens autem ad alterum dixit similiter at ille respondens ait nolo. postea autem pœnitentia motus abiit in vineam.[a] quis ex duob: fecit voluntatem patris. dicunt[b] novissimus.

[a] For the opportunity of examining this MS. the writer is indebted to the kindness of the Rev. J. Jebb, D., Canon of Hereford.

[b] This MS. contains the Ep. to the Laodicenes, with the note *Sed Hirunumus eam negat esse Pauli*: Pethæra, ii. 268. The stichometry is as follows: *Matheus versus habet MMDCC, Marcus MDCC, Lucas MMDCCC, Johannis MMCCC. Id.* p. 318.

[c] Dr. Reeves undertook to publish the text of the Book of Armagh, with collations of ι, κ, and other MSS. in T. C. D., but the writer has been unable to learn whether he will carry out his delign. The MSS. η–κ the writer knows only by description, and very imperfectly.

[d] Fac similes of many of these "Irish" MSS. are given in Westwood's *Palæographia Sacra* and in O'Curry's *Lectures*. The text of most of them (even of those collated by Bentley) is very imperfectly known, and it passes by a very gradual transition into the ordinary type of Vulgate. The whole question of the general character and the specific varieties of these MSS. requires careful investigation. The Table (F) will give some idea of their variations from the common text. The Stow St. John, at present in Lord Ashburnham's collection, probably belongs to this family.

[e] These four MSS I know only by Mr. Westwood's descriptions in his *Palæographia Sacra*; and to Mr. Westwood belongs the credit of first directing attention to Irish MSS. after the time of Bentley.

[f] The text of this recension, which I believe to be contained also in *g* 1, and Bentley's ρ (comp. p. 3477 note *c*) is closely allied to the British type. As to the Spanish text I have no sufficient materials to form an estimate of its character.

Digitized by Google

the Saxon Cambridge MS., and several other MSS. of the Bible quoted by Hody, p. 664. Comp. § 31 (2) 8.[a] The well-known *Harleian* MS. 1772 (§ 32, (2) 3) ought to be reckoned rather among the Old than the Vulgate texts. A good collection of its more striking variations is given in the Harleian Catalogue. In the Acts and Epistles (no less than in the Gospels) there are indications of an unrevised (African) and revised texts, but the materials are as yet too imperfect to allow of an exact determination of the different types.

(3.) In the Apocalypse the text depends on *m* and early quotations, especially in Primasius.

13. It will be seen that for the chief part of the O. T., and for considerable parts of the N. T. (*e. g.* Apoc. Acts), the Old text rests upon early quotations (principally Tertullian, Cyprian, Lucifer of Cagliari, for the African text, Ambrose and Augustine for the Italic). These were collected by Sabatier with great diligence up to the date of his work; but more recent discoveries (*e. g.* of the Roman *Speculum*) have furnished a large store of new materials which have not yet been fully employed. (The great work of Sabatier, already often referred to, is still the standard work on the Latin Versions. His great fault is his neglect to distinguish the different types of text, African, Italic, British, Gallic; a task which yet remains to be done. The earliest work on the subject was by Flaminius Nobilius, *Vetus Test. sec. LXX. Latine redditum* . . . . Rome, 1588. The new collations made by Tischendorf, Mai, Münter, Ceriani, have been noticed separately.) [See also the addition at the end of this article. — A.]

III. THE LABORS OF JEROME. — 14. It has been seen that at the close of the 4th century the Latin texts of the Bible current in the Western Church had fallen into the greatest corruption. The evil was yet greater in prospect than at the time; for the separation of the East and West, politically and ecclesiastically, was growing imminent, and the fear of the perpetuation of false and conflicting Latin copies proportionately greater. But in the crisis of danger the great scholar was raised up who probably alone for 1,500 years possessed the qualifications necessary for producing an original version of the Scriptures for the use of the Latin churches. Jerome — Eusebius Hieronymus — was born in 329 A. D. at Stridon in Dalmatia, and died at Bethlehem in 420 A. D. From his early youth he was a vigorous student, and age removed nothing from his zeal. He has been well called the Western Origen (Hody, p. 350), and if he wanted the largeness of heart and generous sympathies of the great Alexandrine, he had more chastened critical skill and closer concentration of power. After long and self-denying studies in the East and West, Jerome went to Rome A. D. 382, probably at the request of Damasus the Pope, to assist in an important synod (*Ep.* cviii. 6), where he seems to have been at once attached to the service of the Pope (*Ep.* cxxiii. 10). His active Biblical labors date from this epoch, and in examining them it will be convenient to follow the order of time noticing (1) the Revision of the Old Latin Version of the N. T.; (2) the Revision of the Old Latin Version (from the Greek) of the O. T.; (3) the New Version of the O. T. from the Hebrew.

(1.) *The Revision of the Old Latin Version of the N. T.* — 15. Jerome had not been long at Rome (A. D. 383) when Damasus consulted him on points of Scriptural criticism (*Ep.* xix. "Dilectionis tuæ est ut ardenti illo strenuitatis ingenio . . . . vivo sensu scribas"). The answers which he received (*Epp.* xx., xxi.) may well have encouraged him to seek for greater services; and apparently in the same year he applied to Jerome for a revision of the current Latin Version of the N. T. by the help of the Greek original. Jerome was fully sensible of the prejudices which such a work would excite among those "who thought that ignorance was holiness" (*Ep ad Marc.* xxvii.), but the need of it was urgent. "There were," he says, "almost as many forms of text as copies" ("tot sunt exemplaria pene quot codices," *Præf. in Evv.*). Mistakes had been introduced "by false transcription, by clumsy corrections, and by careless interpolation" (*id.*), and in the confusion which had ensued the one remedy was to go back to the original source (Græca veritas, Græca origo). The Gospels had naturally suffered most. Thoughtless scribes inserted additional details in the narrative from the parallels, and changed the forms of expression to those with which they had been originally familiarized (*id.*). Jerome therefore applied himself to these first ("hæc præsens præfatiuncula pollicetur quatuor tantum Evangelia"). But his aim was to revise the Old Latin, and not to make a new version. When Augustine expressed to him his gratitude for "his *translation* of the Gospel" (*Ep.* civ. 6, "non parvas Deo gratias agimus de opere tuo quo Evangelium *ex Græco interpretatus es*"), he tacitly corrected him by substituting for this phrase "the *correction* of the N. T." (*Ep.* cxii. 20, "Si me, ut dicis, in N. T. *emendatione* suscipis . . . . "). For this purpose he collated early Greek MSS., and preserved the current rendering wherever the sense was not injured by it (" . . . . Evangelia . . . . codicum Græcorum emendata collatione sed veterum. Quæ ne multum a lectionis Latinæ consuetudine discreparent, ita calamo temperavimus (*all.* imperavimus) ut his tantum quæ sensum videbantur mutare, correctis, reliqua manere pateremur ut fuerant;" *Præf. ad Dam.*). Yet although he proposed to himself this limited object, the various forms of corruption which had been introduced were, as he describes, so numerous that the difference of the Old and Revised (Hieronymian) text is throughout clear and striking. Thus in Matt. v. we have the following variations: —

| *Vetus Latina.*[b] | *Vulgata nova* (Hieron.). |
|---|---|
| 7 ipsis *miserebitur Deus.* | 7 ipsi *misericordiam eos sequentur.* |
| 11 dixerint . . . . | 11 dixerint . . . . *mentientes.* |
| — propter *justitiam.* | — propter *me.* |
| 12 ante vos *patres eorum* (Luke vi. 26). | 12 ante vos. |

[a] A very interesting historical notice of the use of the Old Latin in the North of England is given by Bede, who says of Ceolfrid, a contemporary abbot, Bibliothecam utriusque Monasterii [Wearmouth and Jarrow] magna æmulatione industriæ. Ita ut tres Pandectas novæ translationis, ad unum vetustæ translationis, quem de Roma attulerat, ipse supera[d]jungeret . . . . " (*Hist. Abbot. Wiremuth. et Girwiens.* Quoted by Hody, *De Text.* p. 409).

[b] In giving the readings of *Vetus Latina* the writer

| *Vetus Latina.* | *Vulgata nova* (Hieron.). |
|---|---|
| 17 non veni solvere *legem aut prophetas.* | 17 non veni solvere. |
| 18 fiant: *cælum et terra transibunt, verba autem mea non præteribunt.* | 18 fiant. |
| 22 fratri suo *sine causa.* | 22 fratri suo. |
| 25 es cum *illo* in ira. | 25 es in via cum *eo* (and often). |
| 29 *eat* in gehennam. | 29 *mittatur* in gehennam. |
| 37 quod autem *amplius.* | 37 quod autem *his abundantius.* |
| 41 *adhuc* alia duo. | 41 *et* alia duo. |
| 43 *odies.* | 43 *odio habebis.* |
| 44 vestros, *et benedicite qui maledicent vobis et* benefacite. | 44 vestros benefacite. |

Of these variations those in vers. 17, 44, are only partially supported by the old copies, but they illustrate the character of the interpolations from which the text suffered. In St. John, as might be expected, the variations are less frequent. The 6th chapter contains only the following: —

| | |
|---|---|
| 2 sequebatur *autem.* | 2 *et* sequebatur. |
| 21 (volebant) | 21 (voluerunt). |
| 23 (quem benedixerat Dominus (alii aliter) ). | 23 (gratias agente Domino). |
| 39 hæc est *enim.* | 39 hæc est *autem.* |
| 39 (Patris mei). | 39 (Patris mei *qui misit me*). |
| 53 (manducare). | 53 (ad manducandum). |
| 66 (a patre). | 66 (a patre *meo*). |
| 67 ex hoc *ergo.* | 67 ex hoc. |

16. Some of the changes which Jerome introduced were, as will be seen, made purely on linguistic grounds, but it is impossible to ascertain on what principle he proceeded in this respect (comp. § 35). Others involved questions of interpretation (Matt. vi. 11, *supersubstantialis* for ἐπιούσιος). But the greater number consisted in the removal of the interpolations by which the synoptic Gospels especially were disfigured. These interpolations, unless his description is very much exaggerated, must have been far more numerous than are found in existing copies; but examples still occur which show the important service which he rendered to the Church by checking the perpetuation of apocryphal glosses: Matt. iii. 3, 15 (v. 12); (ix. 21); xx. 28; (xxiv. 36); Mark i. 3, 7, 8; iv. 19; (vi. 4; Luke (v. 10); viii. 43; ix. 43, 50; xi. 36; xii. 38; xxiii. 48; John vi. 56. As a check upon further interpolation he inserted in his text the notation of the Eusebian Canons [NEW TESTAMENT, § 21]; but it is worthy of notice that he included in his revision the famous *pericope*, John vii. 53–viii. 11, which is not included in that analysis.

17. The preface to Damasus speaks only of a revision of the Gospels, and a question has been raised whether Jerome really revised the remaining books of the N. T. Augustine (A. D. 403) speaks only of "the Gospel" (*Ep.* civ. 6, quoted above), and there is no preface to any other books, such as is elsewhere found before all Jerome's versions or editions. But the omission is probably due to the comparatively pure state in which the text of the rest of the N. T. was preserved. Damasus had requested (*Præf. ad Dam.*) a revision of the whole, and when Jerome had faced the more invidious and difficult part of his work there is no reason to think that he would shrink from the completion of it. In accordance with this view he enumerates (A. D. 398) among his works "the restoration of the (Latin Version of the) N. T. to harmony with the original Greek." (*Ep. ad Lucin.* lxxi. 5: "N. T. Græcæ reddidi auctoritati, ut enim Veterum Librorum fides de Hebræis voluminibus examinanda est, ita novorum Græcæ (?) sermonis normam desideravit." *De Vir. Ill.* cxxxv.: "N. T. Græcæ fidei reddidi. Vetus juxta Hebraicam transtuli.") It is yet more directly conclusive as to the fact of this revision, that in writing to Marcella (cir. A. D. 385) on the charges which had been brought against him for "introducing changes in the Gospels," he quotes three passages from the Epistles in which he asserts the superiority of the present Vulgate reading to that of the Old Latin (Rom. xii. 11, *Domino* servientes, for *tempori* servientes; 1 Tim. v. 19, add. nisi sub duobus aut tribus testibus; 1 Tim. i. 15, *fidelis* sermo, for *humanus* sermo). An examination of the Vulgate text, with the quotations of ante-Hieronymian fathers and the imperfect evidence of MSS., is itself sufficient to establish the reality and character of the revision This will be apparent from a collation of a few chapters taken from several of the later books of the N. T.; but it will also be obvious that the revision was hasty and imperfect; and in later times the line between the Hieronymian and Old texts became very indistinct. Old readings appear in MSS. of the Vulgate, and on the other hand no MS. represents a pure African text of the Acts and Epistles.

(2.) *The Revision of the O. T. from the LXX.* — 18. About the same time (cir. A. D. 383) at which he was engaged on the revision of the N. T., Jerome undertook also a first revision of the Psalter. This he made by the help of the Greek, but the work was not very complete or careful, and the words in which he describes it may, perhaps, be extended without injustice to the revision of the later books of the N. T.: "Psalterium Romæ . . . emendaram et juxta LXX. interpretes, *licet cursim magna illud ex parte* correxeram" (*Præf. in Lib. Ps.*). This revision obtained the name of the *Roman* Psalter, probably because it was made for the use of the Roman Church at the request of Damasus, where it was retained till the pontificate of Pius V. (A. D. 1566), who introduced the Gallican Psalter generally, though the Roman Psalter was still retained in three Italian churches (Hody, p. 383[b], "in una Romæ *Vaticana* ecclesia, et extra urbem in *Mediolanensi* et in ecclesia *S. Marci*, Venetiis"). In a short time "the old error prevailed over the new correction," and at the urgent request of Paula and Eustochium Jerome commenced a new and more thorough revision (*Gallican* Psalter).[b] The exact date at which this was made is not known, but it may be fixed with great probability very shortly after A. D. 387, when he retired to Bethlehem, and certainly before 391, when he had begun his new translations from the Hebrew. In the new revision Jerome attempted to represent as far as possible, by the help of the Greek Versions, the real reading of the Hebrew. With this view he adopted the notation of Origen [Septuagint; compare *Præf. in Gen.*, etc.], and thus indicated all the additions and omissions of the LXX. text reproduced in the Latin. The additions were marked by an *obelus* (÷); the omissions, which he supplied, by an asterisk (*). The omitted passages he supplied by a version of the Greek of Theodotion, and not directly from the Hebrew ("unusquisque . . . ubicunque viderit virgulam præcedentem (÷) ab ea usque ad duo puncta (:) quæ impressimus, sciat in LXX. interpretibus plus haberi. Ubi autem stellæ (*) similitudinem perspexerit, de Hebraïs voluminibus additum noverit, æque usque ad duo puncta, *juxta Theodotionis dumtaxat editionem, qui simplicitate sermonis a LXX. interpretibus non discordat*," *Præf. ad Ps.*; compare *Præff. in Job, Paralip., Libr. Solom. juxta LXX. Intt., Ep.* cvi. *ad Sun. et Fret.*). This new edition soon obtained a wide popularity. Gregory of Tours is said to have introduced it from Rome into the public services in France, and from this it obtained the name of the *Gallican* Psalter. The comparison of one or two passages will show the extent and nature of the corrections which Jerome introduced into this second work, as compared with the Roman Psalter. (See Table D, on next page.)

How far he thought change really necessary will appear from a comparison of a few verses of his translation from the Hebrew with the earlier revised Septuagintal translations. (See Table E.)

Numerous MSS. remain which contain the Latin Psalter in two or more forms. Thus *Bibl. Bodl.* Laud. 35 (Sæc. x.?) contains a triple Psalter, Gallican, Roman, and Hebrew: *Coll. C. C. Oxon.* xii. (Sæc. xv.) Gallican, Roman, Hebrew: *Id.* x. (Sæc. xiv.) Gallican, Hebrew, Hebr. text with interlinear Latin: *Brit. Mus.* Harl. 634, a double Psalter, Gallican and Hebrew: *Brit. Mus.* Arund. 155 (Sæc. xi.) a Roman Psalter with Gallican corrections: *Coll. SS. Trin. Cambr.*, R. 17, 1, a triple Psalter, Hebrew, Gallican, Roman (Sæc. xii.): *Id.* R. 8, 6, a triple Psalter, the Hebrew text, with a peculiar interlinear Latin Version, Jerome's Hebrew, Gallican. An example of the unrevised Latin, which, indeed, is not very satisfactorily distinguished from the Roman, is found with an Anglo-Saxon interlinear version, *Univ. Libr.* Cambr. Ff. i. 23 (Sæc. xi.). H. Stephens published a "*Quincuplex Psalterium, Gallicum, Rhomaicum, Hebraicum, Vetus, Conciliatum.* . . . . Paris, 1513," but he does not mention the MSS. from which he derived his texts.

19. From the second (Gallican) revision of the Psalms Jerome appears to have proceeded to a revision of the other books of the O. T., restoring

[a] The Latin readings of *Cod. Aug.* have been added, as offering an interesting example of the admixture of a few old readings with the revised text. Those of *Cod. Barn* (g) differ, as will be seen, very widely from them.

[b] In one place Jerome seems to include these two revisions in one work: "Psalterium . . . certe emendatissimum juxta LXX. interpretes nostro labore studium Roma suscipit" . . . (*Apol. adv. Ruf.* ii. 30).

all, by the help of the Greek, to a general conformity with the Hebrew. In the preface to the Revision of Job, he notices the opposition which he had met with, and contrasts indignantly his own labors with the more mechanical occupations of monks which excited no reproaches ("Si aut fiscellam junco texerem aut palmarum folia complicarem . . . . nullus morderet, nemo reprehenderet. Nunc autem . . . . corrector vitiorum falsarius vocor"). Similar complaints, but less strongly expressed, occur in the preface to the books of Chronicles, in which he had recourse to the Hebrew as well as to the Greek, in order to correct the innumerable errors in the names by which both texts were deformed. In the preface to the three books of Solomon (Proverbs, Ecclesiastes, Canticles) he notices no attacks, but excuses himself for neglecting to revise Ecclesiasticus and Wisdom, on the ground that "he wished only to amend the Canonical Scriptures" ("tantummodo Canonicas Scripturas vobis emendare desiderans"). No other prefaces remain, and the revised texts of the Psalter and Job have alone been preserved; but there is no reason to doubt that Jerome carried out his design of revising all the "Canonical Scriptures" (comp. *Ep.* cxii. *ad August.* (cir. A. D. 404), "Quod autem in aliis quæris epistolis: cur prior mea *in libris Canonicis* interpretatio asteriscos habeat et virgulas prænotatas . . . . "). He speaks of this work as a whole in several places (e. g. *adv. Ruf.* ii. 24, "Egone contra LXX. interpretes aliquid sum locutus, quos ante annos plurimos diligentissime emendatos meæ linguæ studiosis dedi . . . ?" Comp. *Id.* iii. 25; *Ep.* lxxi. *ad Lucin.*, "Septuaginta interpretum editionem et te habere non dubito, et ante annos plurimos (he is writing A. D. 398) diligentissime emendatam studiosis tradidi"), and distinctly represents it as a Latin Version of Origen's Hexaplar text (*Ep.* cvi. *ad Sun. et Fret.*, "Ea autem quæ habetur in Ἑξαπλοῖς et quam non vertimus"), if, indeed, the reference is not to be confined to the Psalter, which was the immediate subject of discussion. But though it seems certain that the revision was made, there is very great difficulty in tracing its history, and it is remarkable that no allusion to the revision occurs in the preface to the new translation of the Pentateuch, Joshua (Judges, Ruth), Kings, the Prophets, in which Jerome touches more or less plainly on the difficulties of his task, while he does refer to his former labors on Job, the Psalter, and the books of Solomon in the parallel prefaces to those books, and also in his Apology against Rufinus (ii. 27, 29, 30, 31). It has, indeed, been supposed (Vallarsi, *Præf. in Hier.* x.) that these six books only were published by Jerome himself. The remainder may have been put into circulation surreptitiously. But this supposition is not without difficulties. Augustine, writing to Jerome (cir. A. D. 405), earnestly begs for a copy of the revision from the LXX., of the publication of which he was then only lately aware (*Ep.* xcvi. 34, "Deinde nobis mittas, obsecro, interpretationem tuam de Septuaginta, *quam te edidisse nesciebam;* " comp. § 34). It does not appear whether the request was granted or not, but at a much later period (cir. A. D. 416) Jerome says that he cannot furnish him with "a copy of the LXX. (*i. e.* the Latin version of it) furnished with asterisks and obeli, as he had lost the chief part of his former labor by some person's treachery" (*Ep.* cxxxiv., "Pleraque prioris laboris fraude cujusdam amisimus"). However this may have been, Jerome could not have spent more than four (or five) years on the work, and that too in the midst of other labors, for in 391 he was already engaged on the versions from the Hebrew which constitute his great claim on the lasting gratitude of the Church.

(3.) *The Translation of the O. T. from the Hebrew.* — 20. Jerome commenced the study of Hebrew when he was already advanced in middle life (cir. A. D. 374), thinking that the difficulties of the language, as he quaintly paints them, would serve to subdue the temptations of passion to which he was exposed (*Ep.* cxxv. § 12; comp. *Præf. in Dan.*). From this time he continued the study with unabated zeal, and availed himself of every help to perfect his knowledge of the language. His first teacher had been a Jewish convert; but afterwards he did not scruple to seek the instruction of Jews, whose services he secured with great difficulty and expense. This excessive zeal (as it seemed) exposed him to the misrepresentations of his enemies, and Rufinus indulges in a silly pun on the name of one of his teachers, with the intention of showing that his work was not "supported by the authority of the Church, but only of a second Barabbas" (Ruf. *Apol.* ii. 12; Hieron. *Apol.* i. 13; comp. *Ep.* lxxxiv. § 3, and *Præf. in Paral.*). Jerome, however, was not deterred by opposition from pursuing his object, and it were only to be wished that he had surpassed his critics as much in generous courtesy as he did in honest labor. He soon turned his knowledge of Hebrew to use. In some of his earliest critical letters he examines the force of Hebrew words (*Epp.* xviii., xx., A. D. 381, 383); and in A. D. 384, he had been engaged for some time in comparing the version of Aquila with Hebrew MSS. (*Ep.* xxxii. § 1), which a Jew had succeeded in obtaining for him from the synagogue (*Ep.* xxxvi. § 1). After retiring to Bethlehem, he appears to have devoted himself with renewed ardor to the study of Hebrew, and he published several works on the subject (cir. A. D. 389; *Quæst. Hebr. in Gen.* etc.). These essays served as a prelude to his New Version, which he now commenced. This version was not undertaken with any ecclesiastical sanction, as the revision of the Gospels was, but at the urgent request of private friends, or from his own sense of the imperious necessity of the work. Its history is told in the main in the prefaces to the several installments which were successively published. The *Books of Samuel and Kings* were issued first, and to these he prefixed the famous *Prologus galeatus*, addressed to Paula and Eustochium, in which he gives an account of the Hebrew Canon. It is impossible to determine why he selected these books for his experiment, for it does not appear that he was requested by any one to do so. The work itself was executed with the greatest care. Jerome speaks of the translation as the result of constant revision (*Prol. Gal.*, "Lege ergo primum Samuel et Malachim meum: meum, inquam, meum. Quidquid enim crebrius vertendo et emendando sollicitius et didicimus et tenemus nostrum est"). At the time when this was published (cir. A. D. 391, 392) other books seem to have been already translated (*Prol. Gal.*, "omnibus libris quos de Hebræo vertimus"); and in 393 the sixteen prophets[a] were in circulation,

[a] A question has been raised whether Daniel was not translated at a later time (comp. *Vit. Hieron.* xxi.),

Digitized by Google

and Job had lately been put into the hands of his most intimate friends (*Ep.* xlix. *ad Pammach.*). Indeed, it would appear that already in 392 he had in some sense completed a version of the O. T. (*De Vir. Ill.* cxxxv., "Vetus juxta Hebraicum transtuli." This treatise was written in that year);[a] but many books were not completed and published till some years afterwards. The next books which he put into circulation, yet with the provision that they should be confined to friends (*Præf. in Esr.*), were Ezra and Nehemiah, which he translated at the request of Dominica and Rogatianus, who had urged him to the task for three years. This was probably in the year 394 (*Vit. Hieron.* xxi. 4), for in the preface he alludes to his intention of discussing a question which he treats in *Ep.* lvii., written in 395 (*De optimo Gen. interpret.*). In the preface to the Chronicles (addressed to Chromatius), he alludes to the same epistle as "lately written," and these books may therefore be set down to that year. The three books of Solomon followed in 398,[b] having been "the work of three days" when he had just recovered from a severe illness, which he suffered in that year (*Præf.* "Itaque longa segrotatione fractus . . . . tridui opus nomini vestro [Chromatio et Heliodoro] consecravi." Comp. *Ep.* lxxiii. 10). The *Octateuch* now alone remained (*Ep.* lxxi. 5, i. e. Pentateuch, Joshua, Judges, Ruth, and Esther, *Præf. in Jos.*). Of this the Pentateuch (inscribed to Desiderius) was published first, but it is uncertain in what year. The preface, however, is not quoted in the Apology against Rufinus (A. D. 400), as those of all the other books which were then published, and it may therefore be set down to a later date (Hody, p. 357). The remaining books were completed at the request of Eustochium, shortly after the death of Paula, A. D. 404 (*Præf. in Jos.*). Thus the whole translation was spread over a period of about fourteen years, from the sixtieth to the seventy-sixth year of Jerome's life. But still parts of it were finished in great haste (e. g. the books of Solomon). A single day was sufficient for the translation of Tobit (*Præf. in Tob.*); and "one short effort" (una lucubratiuncula) for the translation of Judith. Thus there are errors in the work which a more careful revision might have removed, and Jerome himself in many places gives renderings which he prefers to those which he had adopted, and admits from time to time that he had fallen into error (Hody, p. 362). Yet such defects are trifling when compared with what he accomplished successfully. The work remained for eight centuries the bulwark of western Christianity; and as a monument of ancient linguistic power the translation of the O. T. stands unrivaled and unique. It was at least a direct rendering of the original, and not the version of a version. The Septuagintal tradition was at length set aside and a few passages will show the extent and character of the differences by which the new translation was distinguished from the *Old Latin* which it superseded.

IV. THE HISTORY OF JEROME'S TRANSLATION TO THE INVENTION OF PRINTING. — 21. The critical labors of Jerome were received, as such labors always are received by the multitude, with a loud outcry of reproach. He was accused of disturbing the repose of the Church, and shaking the foundations of faith. Acknowledged errors, as he complains, were looked upon as hallowed by ancient usage (*Præf. in Job* fi.); and few had the wisdom or candor to acknowledge the importance of seeking for the purest possible text of Holy Scripture. Even Augustine was carried away by the popular prejudice, and endeavored to discourage Jerome from the task of a new translation (*Ep.* civ.), which seemed to him to be dangerous and almost profane. Jerome, indeed, did little to smooth the way for the reception of his work. The violence and bitterness of his language is more like that of the rival scholars of the 16th century than of a Christian Father; and there are few more touching instances of humility than that of the young Augustine bending himself in entire submission before the contemptuous and impatient reproof of the veteran scholar (*Ep.* cxii. 3 *f.*). But even Augustine could not overcome the force of early habit. To the last he remained faithful

Digitized by Google

to the Italic text which he had first used; and while he notices in his *Retractationes* several faulty readings which he had formerly embraced, he shows no tendency to substitute generally the New Version for the Old.[a] In such cases time is the great reformer. Clamor based upon ignorance soon dies away; and the new translation gradually came into use equally with the old, and at length supplanted it. In the 5th century it was adopted in Gaul by Eucherius of Lyons, Vincent of Lerins, Sedulius and Claudianus Mamertus (Hody, p. 398); but the Old Latin was still retained in Africa and Britain (*ibid.*). In the 6th century the use of Jerome's Version was universal among scholars except in Africa, where the other still lingered (Junilius); and at the close of it Gregory the Great, while commenting on Jerome's Version, acknowledged that it was admitted equally with the Old by the Apostolic See (*Præf. in Job ad Leandrum*), "Novam translationem dissero, sed ut comprobationis causa exigit, nunc Novam, nunc Veterem, per testimonia assumo; ut quia sedes Apostolica (cui auctore Deo præsideo) utraque utitur mei quoque labor studii ex utraque fulciatur." But the Old Version was not authoritatively displaced, though the custom of the Roman Church prevailed also in the other churches of the West. Thus Isidore of Seville (*De Offic. Eccles.* i. 12), after affirming the inspiration of the LXX., goes on to recommend the Version of Jerome, "which," he says, "is used universally, as being more truthful in substance and more perspicuous in language." "[Hieronymi] editione generaliter omnes ecclesiæ usquequaque utuntur, pro eo quod veracior sit in sententiis et clarior in verbis:" (Hody, p. 402). In the 7th century the traces of the Old Version grow rare. Julianus of Toledo (A. D. 676) affirms with a special polemical purpose the authority of the LXX., and so of the Old Latin; but still he himself follows Jerome when not influenced by the requirements of controversy (Hody, pp. 405, 406). In the 8th century Bede speaks of Jerome's Version as "*our* edition" (Hody, p. 408); and from this time it is needless to trace its history, though the Old Latin was not wholly forgotten.[b] Yet throughout, the New Version made its way without any direct ecclesiastical authority. It was adopted in the different churches gradually, or at least without any formal command. (Compare Hody, p. 411 ff. for detailed quotations.)

22. But the Latin Bible which thus passed gradually into use under the name of Jerome was a strangely composite work. The books of the O. T., with one exception, were certainly taken from his version from the Hebrew; but this had not only been variously corrupted, but was itself in many particulars (especially in the Pentateuch) at variance with his later judgment. Long use, however, made it impossible to substitute his Psalter from the Hebrew for the Gallican Psalter; and thus this book was retained from the Old Version, as Jerome had corrected it from the LXX. Of the Apocryphal books Jerome hastily revised or translated two only, Judith and Tobit. The remainder were retained from the Old Version against his judgment, and the Apocryphal additions to Daniel and Esther, which he had carefully marked as apocryphal in his own version, were treated as integral parts of the books. A few MSS. of the Bible faithfully preserved the "Hebrew Canon," but the great mass, according to the general custom of copyists to omit nothing, included everything which had held a place in the Old Latin. In the N. T. the only important addition which was frequently interpolated was the apocryphal Epistle to the Laodiceans. The text of the Gospels was in the main Jerome's revised edition; that of the remaining books his very incomplete revision of the Old Latin. Thus the present Vulgate contains elements which belong to every period and form of the Latin Version — (1.) *Unrevised Old Latin:* Wisdom, Ecclus., 1, 2 Macc., Baruch. (2.) *Old Latin revised from the LXX.:* Psalter. (3.) *Jerome's free translation from the original text:* Judith, Tobit. (4.) *Jerome's translation from the Original:* O. T. except Psalter. (5.) *Old Latin revised from Greek MSS.:* Gospels. (6.) *Old Latin cursorily revised:* the remainder of N. T.

*The Revision of Alcuin.* — 23. Meanwhile the text of the different parts of the Latin Bible was rapidly deteriorating. The simultaneous use of the Old and New versions necessarily led to great corruptions of both texts. Mixed texts were formed according to the taste or judgment of scribes, and the confusion was further increased by the changes which were sometimes introduced by those who had some knowledge of Greek.[c] From this cause scarcely any Anglo-Saxon Vulgate MS. of the 8th or 9th centuries which the writer has examined is wholly free from an admixture of old readings. Several remarkable examples are noticed below (§ 32); and in rare instances it is difficult to decide whether the text is not rather a revised *Vetus* than a corrupted *Vulgata nova* (e. g. Brit. Mus. *Reg.* i. E. vi.; *Addit.* 5,463). As early as the 6th century, Cassiodorus attempted a partial revision of the text (Psalter, Prophets, Epistles) by a collation of old MSS. But private labor was unable to check the growing corruption; and in the 8th century this had arrived at such a height, that it attracted the attention of Charlemagne. Charlemagne at once sought a remedy, and entrusted to Alcuin (cir. A. D. 802) the task of revising the

[a] When he quotes it, he seems to consider an explanation necessary (*De doctr. Christ.* iv. 7, 15): "Ex illius prophetæ libro potissimum hoc faciam . . . . non autem secundum LXX. interpretes, *qui etiam ipsi divino spiritu interpretati, ob hoc aliter videntur nonnulla dixisse, ut ad spiritualem sensum magis admoneretur lectoris intentio* . . . . sed sicut ex Hebræo in Latinum eloquium, presbytero Hieronymo utriusque linguæ perito interpretante, translata sunt." In his *Retractationes* there is no definite reference, as far as I have observed, to Jerome's critical labors. He notices, however, some false readings: *Lib.* i. vii.; Ps. xciii. 22 (Rom. viii. 26); Wisd. viii. 7; Eccles. i. 2; *id.* xix 4; Matt. v. 22, *om.* sine causa; *Lib.* ii., xii.; Matt. xx. 17 *duodecim* for *duo*.

[b] Thus Bede, speaking of a contemporary abbot, says that he increased the library of two monasteries with great zeal, "ita ut tres *Pandectas*" (the name for the collection of the Holy Scriptures adopted by Alcuin, in place of *Bibliotheca*) "novæ translationis ad unum veteris translationis, quam de Roma attulerat, ipse superadjungeret . . . ." (Hody, p. 409).

[c] Jerome notices this fruitful source of error: "Si quid pro studio ex latere additum est non debet poni in corpore, ne priorem translationem pro scribentium voluntate conturbat" (*Ep.* cvi. *ad Sun. et Frat.*) Bede, Walafrid Strabo, and others, complain of the same custom.

Digitized by Google

Latin text for public use. This Alcuin appears to have done simply by the use of MSS. of the Vulgate, and not by reference to the original texts (Porson, *Letter* vi. *to Travis*, p. 145). The passages which are adduced by Hody to prove his familiarity with Hebrew, are in fact only quotations from Jerome, and he certainly left the text unaltered, at least in one place where Jerome points out its inaccuracy (Gen. xxv. 8).[a] The patronage of Charlemagne gave a wide currency to the revision of Alcuin, and several MSS. remain which claim to date immediately from his time.[b] According to a very remarkable statement, Charlemagne was more than a patron of sacred criticism, and himself devoted the last year of his life to the correction of the Gospels "with the help of Greeks and Syrians" (Van Ess, p. 159, quoting Theganus, *Script. Hist. Franc.* ii. 277).[c]

24. However this may be, it is probable that Alcuin's revision contributed much towards preserving a good Vulgate text. The best MSS. of his recension do not differ widely from the pure Hieronymian text, and his authority must have done much to check the spread of the interpolations which reappear afterwards, and which were derived from the intermixture of the Old and New Versions. Examples of readings which seem to be due to him occur: Deut. i. 9, add. *solitudinem; venimus.* for *-etis;* id. 4, *ascendimus,* for *ascendemus;* ii 24, *in manu tua,* for *in manus tuas;* iv. 33, *audisti,* for *vixisti;* vi. 13, *ipsi,* add. *soli;* xv. 9, *oculos,* om. *tuos:* xvii. 20, *filius,* for *filii:* xx. 6, add. *veniant;* xxvi. 16, *at,* for *et.* But the new revision was gradually deformed, though later attempts at correction were made by Lanfranc of Canterbury (A. D. 1089, Hody, p. 416), Card. Nicolaus (A. D. 1150), and the Cistercian Abbot Stephanus (cir. A. D. 1150). In the 13th century *Correctoria* were drawn up, especially in France, in which varieties of reading were discussed;[d] and Roger Bacon complains loudly of the confusion which was introduced into the "Common, that is the Parisian copy," and quotes a false reading from Mark viii. 38, where the correctors had substituted *confessus* for *confusus* (Hody, pp. 419 ff.). Little more was done for the text of the Vulgate till the invention of printing; and the name of Laurentius Valla (cir. 1450) alone deserves mention, as of one who devoted the highest powers to the criticism of Holy Scripture, at a time when such studies were little esteemed.[e]

V. THE HISTORY OF THE PRINTED TEXT. —

[a] Hieron. *Quaest. in Gen.* xxv. 8; *Comm. in Eccles.* ix. 466; *ibid.* xii. 490.

[b] Among these is that known as Charlemagne's Bible, *Brit. Mus.* Add. 10,546, which has been described by Hug, *Einl.* § 128. Another is in the library of the Oratory at Rome (comp. § 30, Cod. D). A third is in the Imperial Library at Paris. All of these, however, are later than the age of Charlemagne, and date probably from the time of Charles the Bald, A. D. 875.

[c] Mr. H. Bradshaw suggests that this statement derives some confirmation from the preface which Charlemagne advied to the collection of Homilies arranged by Paulus Diaconus, in which he speaks "of the pains which he had taken to set the church books to rights." A copy of this collection, with the Preface (xith cent.), is preserved in the Library of St. Peter's Coll. Cambr.

[d] Vercellone has given the readings of three Vatican *Correctoria,* and refers to his own essay upon them in *Atti della Pontif. Acad. Rom. di Archeologia,* xiv. There is a *Correctorium* in *Brit. Mus.* Reg. 1 A, viii.

[e] The divisions of the Latin Versions into *capitula* were very various. Cassiodorus († 560 A. D.) mentions an ancient division of some books existing in his time ("Octateuchi [*i. e.* Pentateuch, Joshua, Judges, Ruth] titulos . . . credidimus imprimendos a majoribus nostris ordine currente descriptos." *De Inst. Div. Litt.* .), and in other books (1, 2 Chron., the books of Solomon), he himself made a corresponding division. Jerome mentions *capitula,* but the sections which he indicates do not seem to establish the existence of any generally received arrangement; and the variety of the capitulation in the best existing MSS. of his version proves that no one method of subdivision could claim his authority. The divisions which are given in MSS. correspond with the summary of contents by which the several books are prefaced, and vary considerably in length. They are called indiscriminately *capitula, breves, tituli.* Martianay, in his edition of the *Bibliotheca,* gives a threefold arrangement, and assigns the different terms to the three several divisions. Thus Genesis has xxxviii *tituli,* xlvi *breves* lxxxii (or liv) *capitula.* But while Jerome does not appear to have fixed any division of the Bible into chapters, he arranged the text in lines (*versus,* στίχοι) for convenience in reading and interpretation; and the lines were combined in marked groups (*membra,* κῶλα). In the poetical books a further arrangement marked the parallelism of the answering clauses (Martianay, *Prolegg.* iv. *Ad Div. Bibl.*). The number of lines (*versus*) is variously given in different MSS. (Comp. Vercellone, *Var. Lect. App. ad Jos.*) For the origin of the present division of the Vulgate, see BIBLE, i. 307 *a.*

An abstract of the *capitula* and *versus* given in the Alcuin MS., known as "Charlemagne's Bible" (Brit. Mus. Addit. 10,546), will give a satisfactory idea of the contents, nomenclature, and arrangement of the best copies of the Latin Bible.

25. It was a noble omen for the future progress of printing that the first book which issued from the press was the Bible; and the splendid pages of the Mazarin Vulgate (Mainz, Gutenburg and Fust) stand yet unsurpassed by the latest efforts of typography. This work is referred to about the year 1455, and presents the common text of the 15th century. Other editions followed in rapid succession (the first with a date, Mainz, 1462, Fust and Schoiffer), but they offer nothing of critical interest. The first collection of various readings appears in a Paris edition of 1504, and others followed at Venice and Lyons in 1511, 1513; but Cardinal Ximenes (1502–1517) was the first who seriously revised the Latin text (" . . . . contulimus cum quamplurimis exemplaribus venerandæ vetustatis; sed his maxime, quæ in publica Complutensis nostræ Universitatis bibliotheca reconduntur, quæ supra octingentesimum abhinc annum litteris Gothicis conscripta, ea sunt sinceritate ut nec apicis lapsus possit in eis deprehendi," *Præf.*) [a], to which he assigned the middle place of honor in his Polyglott between the Hebrew and Greek texts [comp. New Testament, iii. 2129 *b*]. The Complutensian text is said to be more correct than those which preceded it, but still it is very far from being pure. This was followed in 1528 (2d edition 1533) by an edition of R. Stephens, who had bestowed great pains upon the work, consulting three MSS. of high character and the earlier editions, but as yet the best materials were not open for use. About the same time various attempts were made to correct the Latin from the original texts (Erasmus, 1516; [b] Pagninus, 1518–28; Card. Cajetanus; Steuchius, 1529; Clarius, 1542), or even to make a new Latin version (Jo. Campensis, 1533). A more important edition of R. Stephens followed in 1540, in which he made use of twenty MSS. and introduced considerable alterations into his former text. In 1541 another edition was published by Jo. Benedictus at Paris, which was based on the collation of MSS. and editions, and was often reprinted afterwards. Vercellone speaks much more highly of the *Biblia Ordinaria*, with glosses,

An *argumentum* is given before each of the books of the N. T. except the Catholic Epistles and the Epistle to the Laodiceans, and the whole MS. closes with sixty-eight hexameter Latin verses.

The divisions agree generally with *Brit. Mus.* Harl. 2805, and *Lambeth* 3, 4. In the Valliscellian Alcuin MS. (comp. p. 3474 *b*) the apocryphal *Ep. to the Laodiceans* is not found; but it occurs in the same position in the great Bible in the King's Library (1 B. viii. viii.), with four *capitula*.

Many examples of the various divisions into *capitula* are given at length by Thomasius, *Opera*, i. ed. Vezzosi, *Romæ*, 1747. The divisions of the principal MSS. which the writer has examined are given below, § 30.

Bentley gives the following stichometry from *Cod. Sangerm.* (g): —

Ep. ad Rom., *Scripta de Charintho.* *Versus* DCCCC. (so two other of B.'s MSS.).
ad Cor. i., *Scripta de Philipis.* *Versus* DCCCLXX.

No verses are given from this MS. for the other books.

[a] The copy which is here alluded to is still in the library at Alcala, but the writer is not aware that it has been reëxamined by any scholar. There is also a second copy of the Vulgate of the 12th cent. A list of Biblical MSS. at Alcala is given in Dr. Tregelles *Printed Text of N. T.*, pp. 15–18.

[b] Erasmus himself wished to publish the Latin text as he found it in MSS.; but he was dissuaded by the advice of a friend, " urgent rather than wise " (" amici consiliis improbis verius quam fidelibus ").

Digitized by Google

etc., published at Lyons, 1545, as giving readings in accordance with the oldest MSS., though the sources from which they are derived are not given (*Variæ Lect.* xcix.). The course of controversy in the 16th century exaggerated the importance of the differences in the text and interpretation of the Vulgate, and the confusion called for some remedy. An authorized edition became a necessity for the Romish Church, and, however gravely later theologians may have erred in explaining the policy or intentions of the Tridentine Fathers on this point, there can be no doubt that (setting aside all reference to the *original* texts) the principle of their decision — the preference, that is, of the oldest Latin text to any later Latin version — was substantially right.[a]

*The Sixtine and Clementine Vulgates.* — 26. The first session of the Council of Trent was held on Dec. 13th, 1545. After some preliminary arrangements the Nicene Creed was formally promulgated as the foundation of the Christian faith on Feb. 4th, 1546, and then the Council proceeded to the question of the authority, text, and interpretation of Holy Scripture. A committee was appointed to report upon the subject, which held private meetings from Feb. 20th to March 17th. Considerable varieties of opinion existed as to the relative value of the original and Latin texts, and the final decree was intended to serve as a compromise.[b] This was made on April 8th, 1546, and consisted of two parts, the first of which contains the list of the canonical books, with the usual anathema on those who refuse to receive it; while the second, "On the Edition and Use of the Sacred Books," contains no anathema, so that its contents are not articles of faith.[c] The wording of the decree itself contains several marks of the controversy from which it arose, and admits of a far more liberal construction than later glosses have affixed to it. In affirming the authority of the 'Old Vulgate' it contains no estimate of the value of the original texts. The question decided is simply the relative merits of the current *Latin* versions ("si ex omnibus Latinis versionibus quæ circumferuntur . . . . "), and this only in reference to *public* exercises. The object contemplated is the advantage (utilitas) of the Church, and not anything essential to its constitution. It was further enacted, as a check to the license of printers, that "Holy Scripture, but *especially* the old and common (Vulgate) edition (evidently without excluding the original texts), should be printed as correctly as possible." In spite, however, of the comparative caution of the decree, and the interpretation which was affixed to it by the highest authorities, it was received with little favor, and the want of a standard text of the Vulgate practically left the question as unsettled as before. The decree itself was made by men little fitted to anticipate the difficulties of textual criticism, but afterwards these were found to be so great that for some time it seemed that no authorized edition would appear. The theologians of Belgium did something to meet the want. In 1547 the first edition of Hentenius appeared at Louvain, which had very considerable influence upon later copies. It was based upon the collation of Latin MSS. and the Stephanic edition of 1540. In the Antwerp Polyglott of 1568–1572 the Vulgate was borrowed from the Complutensian (Vercellone, *Var. Lect.* ci.); but in the Antwerp edition of the Vulgate of 1573–74 the text of Hentenius was adopted with copious additions of readings by Lucas Brugensis. This last was designed as the preparation and temporary substitute for the Papal edition: indeed it may be questioned whether it was not put forth as the "correct edition required by the Tridentine decree" (comp. Lucas Brug. ap. Vercellone, cii.). But a Papal board was already engaged, however desultorily, upon the work of revision. The earliest trace of an attempt to realize the recommendations of the Council is found fifteen years after it was made. In 1561 Paulus Manutius (son of Aldus Manutius) was invited to Rome to superintend the printing of Latin and Greek Bibles (Vercellone, *Var. Lect.* etc., i. Prol. xix. *n.*). During that year and the next several scholars (with Sirletus at their head) were engaged in the revision of the text. In the pontificate of Pius V. the work was continued, and Sirletus still took a chief part in it (1569, 1570, Vercellone, *l. c.* xx. *n.*), but it was currently reported that the difficulties of publishing an authoritative edition were insuperable. Nothing further was done towards the revision of the Vulgate under Gregory XIII., but preparations were made for an edition of the LXX. This appeared in 1587, in the second year of the pontificate of Sixtus V., who had been one of the chief promoters of the work. After the publication of the LXX., Sixtus immediately devoted himself to the production of an edition of the Vulgate. He was himself a scholar, and his imperious genius led him to face a task from which others had shrunk. "He had felt," he says, "from his first accession to the papal throne (1585), great grief, or even indignation (indigne ferentes), that the Tridentine decree was still unsatisfied;" and a board was appointed, under the presidency of Card. Carafa, to arrange the materials and offer suggestions for an edition. Sixtus himself revised the text, rejecting or confirming the suggestions of the board by his absolute judgment; and when the work was printed he examined the sheets with the utmost care, and corrected the errors with his own hand.[d] The

[a] Bellarmin justly insists on this fact, which has been strangely overlooked in later controversies (*De Verbo Dei*, x. ap. Van Ess, § 27): "Nec enim Patres Tridentini] fontium ullam mentionem fecerunt. Sed solum ex tot latinis versionibus, quæ nunc circumferuntur, unam delegerunt, quam ceteris anteponerent . . . . antiquam novis, probatam longo usu recentibus adhuc, ac ut sic loquar, crudis . . . . "

[b] The original authorities are collected and given at length by Van Ess, § 17.

[c] Insuper eadem Sacrosancta Synodus considerans non parum *utilitatis* accedere posse ecclesiæ Dei, si ex omnibus *latinis* editionibus, quæ circumferuntur sacrorum librorum, quenam pro authentica habenda sit, innotescat, statuit et declarat, ut hæc ipsa vetus et vulgata editio, quæ longo tot seculorum usu in ipsa ecclesia probata est, in *publicis* lectionibus, disputationibus, prædicationibus et expositionibus pro authentica habeatur; et ut nemo illam rejicere quovis prætextu audeat vel præsumat. . . . . Sed et impressoribus modum. . . . . imponere volens. . . . . decrevit et statuit ut posthac sacra scriptura *potissimum* vero hæc ipsa vetus et vulgata editio quam emendatissime imprimatur. . . .

[d] The original words are both interesting and important: "Nos . . . . ipsius Apostolorum Principis auctoritate confisi . . . haudquaquam gravati sumus . . . . hunc quoque non mediocrem accuratæ lucubrationis laborem suscipere, atque ea omnia perlegere quæ alii collegerant aut senserant, diver-

edition appeared in 1590. with the famous constitution *Æternus ille* (dated March 1st, 1589) prefixed, in which Sixtus affirmed with characteristic decision the plenary authority of the edition for all future time. "By the fullness of Apostolical power" (such are his words) "we decree and declare that this edition . . . . approved by the authority delivered to us by the Lord, is to be received and held as true, lawful, authentic, and unquestioned, in all public *and private* discussion, reading, preaching, and explanation." [a] He further forbade expressly the publication of various readings in copies of the Vulgate, and pronounced that all readings in other editions and MSS. which vary from those of the revised text "are to have no credit or authority for the future" (ea in iis quæ huic nostræ editioni non consenserint, nullam in posterum fidem, nullamque auctoritatem habitura esse decernimus). It was also enacted that the new revision should be introduced into all missals and service-books; and the greater excommunication was threatened against all who in any way contravened the constitution. Had the life of Sixtus been prolonged, there is no doubt but that his iron will would have enforced the changes which he thus peremptorily proclaimed; but he died in Aug. 1590, and those whom he had alarmed or offended took immediate measures to hinder the execution of his designs. Nor was this without good reason. He had changed the readings of those whom he had employed to report upon the text with the most arbitrary and unskillful hand; and it was scarcely an exaggeration to say that his precipitate "self-reliance had brought the Church into the most serious peril." [b] During the brief pontificate of Urban VII. nothing could be done; but the reaction was not long delayed.

On the accession of Gregory XIV. some went so far as to propose that the edition of Sixtus should be absolutely prohibited; but Bellarmin suggested a middle course. He proposed that the erroneous alterations of the text which have been made in it ("quæ *male mutata* erant") "should be corrected with all possible speed and the Bible reprinted under the name of Sixtus, with a prefatory note to the effect that errors (aliqua *errata*) had crept into the former edition by the carelessness of the printers." [c] This pious fraud, or rather daring falsehood, [d] for it can be called by no other name, found favor with those in power. A commission was appointed to revise the Sixtine text, under the presidency of the Cardinal Colonna (Columna). At first the commissioners made but slow progress, and it seemed likely that a year would elapse before the revision was completed (Ungarelli, in Vercellone, *Proleg.* lviii.). The mode of proceedings was therefore changed, and the commission moved to Zagarolo, the country seat of Colonna; and, if we may believe the inscription which still commemorates the event, and the current report of the time, the work was completed in *nineteen* days. But even if it can be shown that the work extended over six months, it is obvious that there was no time for the examination of new authorities, but only for making a rapid revision with the help of the materials already collected. The task was hardly finished when Gregory died (Oct. 1591), and the publication of the revised text was again delayed. His successor, Innocent IX., died within the same year, and at the beginning of 1592 Clement VIII. was raised to the popedom. Clement entrusted the final revision of the text to Toletus, and the whole was printed by Aldus Manutius (the grandson) before the end of 1592. The Preface, which is moulded upon that of Sixtus, was written by Bellarmin, and is favorably distinguished from that of Sixtus by its temperance and even modesty. The text, it is said, had been prepared with the greatest care, and though not absolutely perfect was at least (what is no idle boast) more correct than that of any former edition. Some readings indeed, it is allowed, had, though

sarum lectionum rationes perpendere, sanctorum doctorum sententias recognoscere: quæ quibus antefereuda essent dijudicare, adeo ut in hoc laboriosissimo emendationis curriculo, in quo operam quotidianam, eamque pluribus horis collocandam duximus, aliorum quidem labor fuerit in consulendo, noster autem in eo quod ex pluribus esset optimum deligendo; ita tamen ut veterem multis in Ecclesia abhinc sæculis receptam lectionem omnino retinuerimus. Novam interea Typographiam in Apostolico Vaticano Palatio nostro . . . . exstruximus . . . . ut in ea emendatum jam Bibliorum volumen excuderetur; eaque res quo magis incorrupte perficeretur, nostra nos ipsi manu correximus, si qua prælo vitia obrepserant, et quæ confusa aut facile confundi posse videbantur . . . . distinximus" (Hody, p. 498; Van Ess, p. 273).

[a] ". . . . ex certa nostra scientia, deque Apostolicæ potestatis plenitudine statuimus ac declaramus, eam Vulgatam sacræ, tam veteris, quam novi Testamenti paginæ Latinam editionem, quæ pro authentica a Concilio Tridentino recepta est, sine ulla dubitatione, aut controversia censendam esse hanc ipsam, quam nunc, prout optime fieri poterit, emendatam et in Vaticana Typographia impressam in universa Christiana Republica, atque in omnibus Christiani orbis Ecclesiis legendam evulgamus, decernentes eam . . . . pro vera, legitima, authentica et indubitata, in omnibus publicis privatisque disputationibus, lectionibus, prædicationibus, et explanationibus recipiendam et tenendam esse."

[b] Bellarmin to Clement VIII.: "Novit beatitudo vestra cui se totamque ecclesiam discrimini commiserit Sixtus V. dum *juxta propria doctrina sensus* sacrorum bibliorum emendationem aggressus est; nec satis scio an gravius unquam periculum occurrerit" (Van Ess, p. 290).

[c] The following is the original passage quoted by Van Ess from the first edition of Bellarmin's *Autobiography* (p. 291), anno 1591: "Cum Gregorius XIV. cogitaret quid agendum esset de bibliis a Sixto V. editis, in quibus erant *permulta perperam mutata*, non deserant viri graves, qui censerent ea biblia esse publice prohibenda, sed N. (Bellarminum) coram pontifice demonstravit, biblia illa non esse prohibenda, sed esse ita corrigenda, ut salvo honore Sixti V. pontificis biblia illa emendata proderentur, quod fieret si quam celerrime tollerentur *quæ male mutata erant*, et biblia recuderentur sub nomine ejusdem Sixti, et addita præfatione qua significaretur in prima editione Sixti *pro festinatione irrepsisse aliqua errata*, vel typographorum vel aliorum incuria, et sic N. reddidit Sixto pontifici bona pro malis." The last words refer to Sixtus' condemnation of a thesis of Bellarmin, in which he denied "Papam esse dominum directum totius orbis;" and it was this whole passage, and not the Preface to the Clementine Vulgate, which cost Bellarmin his canonization (Van Ess, from the original documents, pp. 291–318). It will be observed that Bellarmin first describes the errors of the Sixtine editor really as *deliberate alterations*, and then proposes to represent them as *errors*.

[d] The evidence collected by Van Ess (pp. 285 ff. and even the cautious admissions of Ungarelli and Vercellone (pp. xxxix.–xliv.), will prove that this language is not too strong.

Digitized by Google

strong, been left unchanged, to avoid popular offense [a] But yet even here Bellarmin did not scruple to repeat the fiction of the intention of Sixtus to recall his edition, which still disgraces the front of the Roman Vulgate by an apology no less needless than untrue.[b] Another edition followed in 1593, and a third in 1598, with a triple list of errata, one for each of the three editions. Other editions were afterwards published at Rome (comp. Vercellone, civ.), but with these corrections the history of the authorised text properly concludes.

27. The respective merits of the Sixtine and Clementine editions have been often debated. In point of mechanical accuracy, the Sixtine seems to be clearly superior (Van Ess, 365 ff.), but Van Ess has allowed himself to be misled in the estimate which he gives of the critical value of the Sixtine readings. The collections lately published by Vercellone [c] place in the clearest light the strange and uncritical mode in which Sixtus dealt with the evidence and results submitted to him. The recommendations of the Sixtine correctors are marked by singular wisdom and critical tact, and in almost every case where Sixtus departs from them he is in error. This will be evident from a collation of the readings in a few chapters as given by Vercellone. Thus in the first four chapters of Genesis the Sixtine correctors are right against Sixtus: i. 2, 27, 31; ii. 18, 20; iii. 1, 11, 12, 17, 21, 22; iv. 1, 5, 7, 8, 9, 15, 16, 19; and on the other hand Sixtus is right against the correctors in i. 15. The Gregorian correctors, therefore (whose results are given in the Clementine edition), in the main simply restored readings adopted by the Sixtine board and rejected by Sixtus. In the book of Deuteronomy the Clementine edition follows the Sixtine correctors where it differs from the Sixtine edition: i. 4, 19, 31; ii. 21; iv. 6, 22, 28, 30, 33, 39; v. 24; vi. 4; viii. 1; ix. 9; x. 3; xi. 3; xii. 11, 12, 15, &c.; and every change (except probably vi. 4; xii. 11, 12) is right; while on the other hand in the same chapters there are, as far as I have observed, only two instances of variation without the authority of the Sixtine correctors (xi. 10, 32). But in point of fact the Clementine edition errs by excess of caution. Within the same limits it follows Sixtus against the correctors wrongly in ii. 33; iii. 10, 12, 13, 16, 19, 20; iv. 10, 11, 28, 42; vi. 3; xi. 28; and in the whole book admits in the following passages arbitrary changes of Sixtus: iv. 10; v. 24; vi. 13; xii. 15, 32; xviii. 10, 11; xxix. 23.[d] In the N. T., as the report of the Sixtine correctors has not yet been published, it is impossible to say how far the same law holds good; but the following comparison of the variations of the two editions in continuous passages of the Gospels and Epistles will show that the Clementine, though not a pure text, is yet very far purer than the Sixtine, which often gives Old Latin readings, and sometimes appears to depend simply on patristic authority [e] (*i. e.* pp. ll.): —

[a] This fact Bellarmin puts in stronger light when writing to Lucas Brugensis (1603) to acknowledge his critical collations on the text of the Vulgate: "De libello ad me misso gratias ago, sed scias velim biblia vulgata non esse a nobis accuratissime castigata, multa enim de industria justis de causis pertransivimus, quæ correctione indigere videbantur."

[b] The original text of the passages here referred to is full of interest: "Sixtus V. . . . . opus tandem confectum typis mandari jussit. Quod cum jam esset excusum et ut in lucem emitteretur, idem Pontifex operam daret [implying that the edition was *not* published], animadvertens non pauca in Sacra Biblia prelii vitia irrepsisse, quæ iterata diligentia indigere viderentur, totum opus sub incudem revocandum censuit atque decrevit [of this there is not the faintest shadow of proof]. . . . . Accipe igitur, Christiane lector . . . . ex Vaticana typographia veterem ac vulgatam sacræ scripturæ editionem, quanta fieri potuit diligentia castigatam: quam quidem sicut omnibus numeris absolutam, pro humanâ imbecillitate affirmare difficile est, ita ceteris omnibus quæ ad hanc usque diem prodierunt emendatiorem, purioremque esse, minime dubitandum. . . . . In hac tamen pervulgata lectione sicut nonnulla consulto mutata, ita etiam alia, quæ mutanda videbantur, consulto immutata relicta sunt, tum quod ita faciendum esse ad offensionem populorum vitandam S. Hieronymus non semel admonuit tum quod . . . ." The candor of these words contrasts strangely with the folly of later champions of the edition.

In consequence of a very amusing mistranslation of a phrase of Hug, it has been commonly stated in England that this Preface *gained*, instead of *cost*, Bellarmin his canonisation: (Hug, *Einl.* i. 490, "Welche ihn um seine Heiligsprechung gebracht haben soll"). The real offence lay in the words quoted above (p. 3470, note *c*).

[c] The most important of these is the *Codex Carafianus*, a copy of the Antwerp edition of 1583, with the MS. corrections of the Sixtine board. This was found by Ungarelli in the Library of the Roman College of SS. Blaise and Charles. Comp. Vercellone, *Præf.* xi.

[d] The common statement that the Clementine edition follows the revision of Alcuin, while the Sixtine gives the true text of Jerome, is apparently a mere conjectural assertion. In Deuteronomy, Sixtus gives the Alcuinian reading in the following passages: i. 19; iv. 30, 38; xxi. 6; and I have not observed one passage where the Clementine text agrees with that of Alcuin unless that of Sixtus does also.

Passages have been taken from the Pentateuch, because in that Vercellone has given complete and trustworthy materials. The first book of Samuel, in which the later corruptions are very extensive, gives results generally of the same character. Great and obvious interpolations are preserved both in the Sixtine and Clementine editions: iv. 1; v. 6; x. 1; xiii. 15; xiv 22, 41; xv. 8, 12; xvii. 36; xx. 15 (chiefly from the LXX.). The Sixtine text gives the old reading displaced from the Clementine: iii. 2, 3; iv 1, 4; vii. 10 (?); ix. 1 (?), 25. The Clementine restores the old reading against Sixtus: i. 9, 19; ii. 11, 17, 26, 30; iv. 9 (?), (21); vi 9; ix. 7; x. 12; xii. 6, 11, 15, 23; xiii. 18; xiv. 2 (?), 14, 15. Thus in fifteen chapters Clement alone gives the old readings sixteen times, Sixtus alone five times. Vercellone, in the second part of his Variæ Lectiones, which was published after this article was printed, promises a special discussion of the interpolations of 1 Sam., which were, as might have been expected, expunged by the Sixtine correctors. Vercellone *ad* 1 Reg. iv. 1.

[e] The variations between the Sixtine and Clementine editions were collated by T. James, *Bellum papale, s. concordiæ discors . . . .* Lond. 1600; and more completely, with a collation of the Clementine editions, by H. de Bukentop, *Lux de luce*, lib. iii. pp. 315 ff. Vercellone, correcting earlier critics, reckons that the whole number of variations between the two revisions is about 3,000 (*Prolegg.* xlviii. *not.*).

(Some of the readings of Bodl. (§ 13, (3) $a_2$) are added. *It.* is used, as is commonly done, for the old texts generally; and the notation of the MSS. is that usually followed.)

28. While the Clementine edition was still recent some thoughts seem to have been entertained of revising it. Lucas Brugensis made important collections for this purpose, but the practical difficulties were found to be too great, and the study of various readings was reserved for scholars (Bellarmin. ad Lucam Brug. 1606). In the next generation use and controversy gave a sanctity to the authorized text. Many, especially in Spain, pronounced it to have a value superior to the originals, and to be inspired in every detail (comp. Van Ess, 401 402; Hody, III. ii. 15); but it is useless to dwell on the history of such extravagancies, from which the Jesuits at least, following their great champion Bellarmin, wisely kept aloof. It was a more serious matter that the universal acceptance of the papal text checked the critical study of the materials on which it was professedly based. At length, however, in 1706, Martianay published a new, and in the main better text, chiefly from original MSS., in his edition of Jerome. Vallarsi added fresh collations in his revised issue of Martianay's work, but in both cases the collations are imperfect, and it is impossible to determine with accuracy on what MS. authority the text which is given depends. Sabatier, though professing only to deal with the Old Latin, published important materials for the criticism of Jerome's Version, and gave at length the readings of Lucas Brugensis (1743). More than a century elapsed before anything more of importance was done for the Text of the Latin version of the O. T., when at length the fortunate discovery of the original revision of the Sixtine correctors again directed the attention of Roman scholars to their authorized text. The first-fruits of their labors are given in the volume of Vercellone already often quoted, which has thrown more light upon the history and criticism of the Vulgate than any previous work. There are some defects in the arrangement of the materials, and it is unfortunate that the editor has not added either the authorized or corrected text; but still the work is such that every student of the Latin text must wait anxiously for its completion.

29. The neglect of the Latin text of the O. T. is but a consequence of the general neglect of the criticism of the Hebrew text. In the N. T. far more has been done for the correction of the Vulgate, though even here no critical edition has yet been published. Numerous collations of MSS., more or less perfect, have been made. In this, as in many other points, Bentley pointed out the true path which others have followed. His own collation of Latin MSS. was extensive and important (comp. Ellis, *Bentleii Critica Sacra*, xxxv. ff.).[a] Griesbach added new collations, and arranged those which others had made. Lachmann printed the Latin text in his larger edition, having collated the *Codex Fuldensis* for the purpose. Tischendorf has labored among Latin MSS. only with less zeal than among Greek. And Tregelles has given in his edition of the N. T. the text of *Cod. Amiatinus* from his own collation with the variations of the

[a] The materials which Bentley collected (see p. 3474, note c) are an invaluable help for investigation, but they will not supersede it. It is, indeed, impossible to determine on what principle he inserted or omitted variations. Sometimes he notes with the greatest care discrepancies of orthography, and at other times he neglects important differences of text. Thus in John i. 18-51 he gives correctly 28 variations of the Cambridge MS. (Kk. 1, 24) and omits 51; and in Luke i. 1-39 he gives 13 variations of St. Chad's Gospels and omits 30; and there is nothing in the character of the readings recorded which can have determined the selection, as the variations which are neglected are sometimes noted from other MSS., and are in themselves of every degree of importance. A specimen from each of the volumes which contain his collations will show the great amount of labor which he bestowed upon the work; and, hitherto, no specimen

Clementine edition. But in all these cases the study of the Latin was merely ancillary to that of the Greek text. Probably from the great antiquity and purity of the *Codd. Amiatinus* and *Fuldensis*, there is comparatively little scope for criticism in the revision of Jerome's Version; but it could not be an unprofitable work to examine more in detail than has yet been done the several phases through which it has passed, and the causes which led to its gradual corruption. (A full account of the editions of the Vulgate is given by Masch [Le Long], Bibliotheca Sacra, 1778–90. Copies of the Sixtine and Clementine editions are in the library of the British Museum.)

VI. THE MATERIALS FOR THE REVISION OF JEROME'S TEXT. — 30. Very few Latin MSS. of the O. T. have been collated with critical accuracy. The Pentateuch of Vercellone (*Roma*, 1860) is the first attempt to collect and arrange the materials for determining the Hieronymian text in a manner at all corresponding with the importance of the subject. Even in the N. T. the criticism of the Vulgate text has always been made subsidiary to that of the Greek, and most of the MSS. quoted have only been examined cursorily. In the following list of MSS., which is necessarily very imperfect, the notation of Vercellone (from whom most of the details, as to the MSS. which he has examined, are derived) has been followed as far as possible; but it is much to be regretted that he marks the readings of MSS. Correctoria and editions in the same manner.

(i.) *MSS. of Old Test. and Apocrypha.*

A (*Codex Amiatinus*, Bibl. Laurent. Flor.), at Florence, written about the middle of the 6th cent. (cir. 541, Tischendf.) with great accuracy, so that both in age and worth it stands first among the authorities for the Hieronymian text. It contains Jerome's Psalter from the Hebrew, and the whole Latin Bible, with the exception of Baruch. The variations from the Clementine text in the N. T. have been edited by F. F. Fleck (1840); and Tischendorf and Tregelles separately collated the N. T. in 1843 and 1846, the former of whom published a complete edition (1850; 2d ed. 1854) of this part of the MS., availing himself also of the collation of Tregelles. The O. T. has been now collated by Vercellone and Palmieri for Vercellone's *Variæ Lectiones* (Vercellone, i. p. lxxxiv.). The MS. was rightly valued by the Sixtine correctors, who in many places follow its authority alone, or when only feebly supported by other evidence: e. g. Gen. ii. 18, v. 26, vi. 21, vii. 3, 5, ix. 18, 19, x. 1.

B (*Codex Toletanus*, Bibl. Eccles. Tolet.), at Toledo, written in Gothic letters about the 8th

---

has been published. The student may find it interesting to compare the variations noted with those in Table B.

The collations in this volume are, as will be seen, somewhat confused. Many are in Bentley's hand, who has added numerous emendations of the Latin text in B. 17, 14. Thus, on the same page from which this example is taken, we find: Mark ix. 20, *ab infantia.* h. leg. *ab infanti. manducav.* x. 14, *Quos quum viderat.* forte leg. Quod cŭ videret (sic a p. m O: a later note). x. 38, *Et baptismum quo ego.* leg. *Aut baptisma*, quod ego. For the MSS. quoted, see the lists already referred to.

Digitized by Google

cent. The text is generally pure, and closely approaches to that of A, at least in O. T. A collation of this MS. with a Louvain edition of the Vulgate (1569, fol.) was made by Christopher Palomares by the command of Sixtus V., and the Sixtine correctors set a high value upon its readings: *e. g.* Gen. vi. 4. The collation of Palomares was published by Bianchini (*Vindicia*, p. lv. ff.), from whom it has been reprinted by Migne (*Hieron. Opp.* x. 875 ff.). Vercellone has made use of the original collation preserved in the Vatican Library, which is not always correctly transcribed by Bianchini; and at the same time he had noted the various readings which have been neglected owing to the difference between the Louvain and Clementine texts. The MS. contains all the Latin Bible (the Psalter from the Hebrew), with the exception of Baruch. A new collation of the MS. is still desirable; and for the N. T. at least the work is one which might easily be accomplished.

C (*Codex Paulinus*, v. *Carolinus*, Romæ, Mon. S. Benedict. ap. Basil. S. Paulli extr. mœnia), a MS. of the whole Latin Bible, with the exception of Baruch. Vercellone assigns it to the 9th century. It follows the recension of Alcuin, and was one of the MSS. used by the original board appointed by Pius IV. for the revision of the Vulgate. It has been collated by Vercellone.

D (*Codex Vallicellianus* olim *Statianus*, Romæ, Bibl. Vallicell. Orat. B. vi.), an Alcuinian MS. of the Bible also used by the Roman correctors, of the same date (or a little older) and character as C. Comp. Vallarsi, *Præf. ad Hieron.* ix. 15 (ed. Migne), and note *b*, p. 3467. Collated by Vercellone.

E (*Codex Ottobonianus* olim *Cervinianus*, Vatic. 60), a MS. of a portion of the O. T., imperfect at the beginning, and ending with Judg. xiii. 20. It is of the 8th century, and gives a text older than Alcuin's recension. It contains also important fragments of the Old Version of Genesis and Exodus published by Vercellone in his *Varia Lectiones*, i. Coll. by Vercellone.

F (Romæ, Coll. SS. Blasii et Caroli), a MS. of the entire Latin Bible of the 10th century. It follows, in the main, the recension of Alcuin, with some variations, and contains the Roman Psalter. Coll. by Vercellone.

G (Romæ, Coll. SS. Blasii et Caroli), a MS. of the 13th century, of the common late type. Coll. by Vercellone.

H, L, P, Q, are used by Vercellone to mark the readings given by Martianay, Hentenius, Castellanus, and R. Stephanus, in editions of the Vulgate.

I, Sæc. xiii. Collated in part by C. J. Bauer, Eichhorn, *Repertorium*, xvii.

K (Monast. SS. Trin. Cavæ), a most important MS. of the whole Bible, belonging to the monastery of La Cava, near Salerno. An exact copy of it was made for the Vatican Library (num. 3484) by the command of Leo XII., and this has been used by Vercellone for the books after Leviticus. For the three first books of the Pentateuch he had only an imperfect collation. The MS. belongs to the 6th or 7th century (Mai, *Nova Patrum Bibl* i. 2, 7; *Spicil. Rom.* ix. Præf. xxiii.), and presents a peculiar text. Tischendorf has quoted it on 1 John v. 7, 8.

M, N, O, are Correctoria in the Vatican Library.

R, S (Romæ, Coll. SS. Blasii et Caroli), Sæc. xiv., of the common late type given in the editions of the 15th century.

T, Sæc. x., xi.; U, Sæc. xii., two MSS. of the type of the recension of Alcuin.

V (Romæ, Coll. SS. Blasii et Caroli), Sæc. xiii., akin to F.

These MSS., of which Vercellone promises complete collations, thus represent the three great types of the Hieronymian text: the original text in various stages of decadence (A, B, K); the recension of Alcuin (C, D, F, T, U, V); and the current later text (E, G, R, S). But though perhaps no MS. will ever surpass A in general purity, it is to be hoped that many more MSS., representing the ante-Alcuinian text, may yet be examined.

31. Martianay, in his edition of the *Divina Bibliotheca*, quotes, among others, the following MSS., but he uses them in such a way that it is impossible to determine throughout the reading of any particular MS.:—

*Codex Memmianus*, Sæc. x.
*Codex Carcassonensis*, Sæc. x.
*Codex Sangermanensis* (1), Sæc. x.
*Codex Regius*, 3563–64.
*Codex Sangermanensis* (2), a fragment.
*Codex Narbonensis*. (*Index MSS. Codd.* Hieron. ix. pp. 135 ff. ed. Migne.)

To these, Vallarsi, in his revised edition, adds a collation, more or less complete, of other MSS. for the Pentateuch (Joshua, Judges) — of

*Cod. Palatinus*, 3.
*Cod. Urbinas.*

For the books of Samuel and Kings.

*Cod. Veronensis*, a MS. of the very highest value. (Comp. Vallarsi, *Præf.* 19 ff. ed. Migne.)

For the Psalms.

*Codd. Reg. Suec.* ii. 1236.
*Cod. Vatic.* 154.
*Cod. S. Crucis* (or 104, *Cisterciensis*), (the most valuable).

For Daniel.

*Cod. Palat.* 3.
*Cod. Vatic.* 333.

For Esther, Tobit, and Judith.

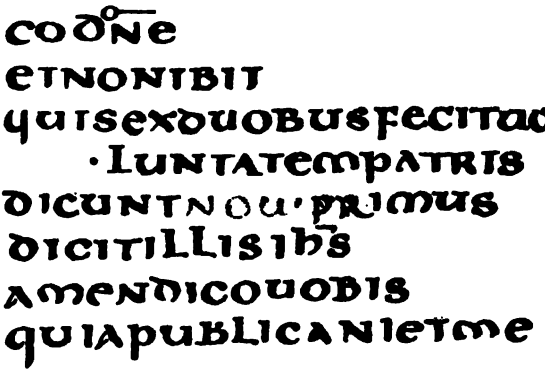
*Cod. Reg. Suec.* 7.
*Cod. Vatic. Palat.* 24.

But of all these only special readings are known. Other MSS. which deserve examination are:—

1. *Brit. Mus.* Addit. 10, 546. Sæc. ix. (Charlemagne's Bible), an Alcuinian copy. Comp p. 3467, note *c*.

2. *Brit. Mus.* Reg. 1 E, vii., viii. Sæc. ix., x. (Bentley's MS. R).[a]

3. *Brit. Mus.* Addit. 24,142. Sæc. ix., x.



[a] Bentley procured collations of upwards of sixty English and French Latin MSS. of the N. T., which are still preserved among his papers in Trin. Coll. Cambridge, B. 17, 5, and B. 17, 14. A list of these, as given by Bentley, is printed in Ellis's *Bentleii Critica Sacra*, pp. xxxv. ff. I have identified and noticed the English MSS. below (comp. p. 3475 ff.). Of Bibles Bentley gives more or less complete collations of the N. T. from Paris. *Bibl. Reg.* 2562 (A. D. 876) 2561, Sæc. ix.; 3563–64, Sæc. ix.; 3564a, Sæc. ix., x. All appear to be Alcuinian.

Sir F. Madden has given a list of the chief MSS of the Latin Bible (19 copies) in the *Gentleman's Magazine*, 1836, pp. 580 ff. This list, however, might be increased.

Important: apparently taken from a much older copy. The Psalter is Jerome's Version of the Hebrew. The Apocryphal books are placed after the Hagiographa, with the heading: *Incipit quartus ordo eorum librorum qui in Veteri Testamento extra Canonem Hebraeorum sunt.* The MS. begins Gen. xlix. 6.)

4. *Brit. Mus.* Harl. 2,805 to Psalms with some lacunæ. Sæc. ix.

5. *Brit. Mus.* Egerton 1,046. Sæc. viii. Prov. Eccles. Cant. Sap. Ecclus. (with some lacunæ). Good Vulgate.

6. *Lambeth*, 3, 4. Sæc. xii.

32. ii. *MSS. of the N. T.*

A, B, C, D, F, etc., as enumerated before. To these must be added the *Codex Fuldensis* of the whole N. T., which, however, contains the Gospels in the form of a Harmony. The text of the MS. is of nearly equal value with that of A, and both seem to have been derived from the same source (Tischdf. *Prolegg. Cod. Am.* p. xxiii.). The MS. has been collated by Lachmann and Buttmann, and a complete edition is in preparation by E. Ranke.

Other Vulgate MSS. of parts of the N. T. have been examined more or less carefully. Of the *Gospels*, Tischendorf (*Proleg.* ccxlix. ff.) gives a list of a considerable number, which have been examined very imperfectly. Of the more important of these the best known are: —

*For. Prag.* (at Prague and Venice). Published by Bianchini, in part after Dobrowsky.

*Harl.* (Brit. Mus. *Harl.* 1,775). Sæc. vii. Coll in part by Griesbach (*Symb. Crit.* i. 305 ff.).

*Per.* Fragments of St. Luke, edited by Bianchini.

Brit. Mus. *Cotton.* Nero D, iv. Sæc. viii. (Bentl. Y). The Lindisfarne (St. Cuthbert) Gospels with interlinear Northumbrian gloss. Ed. by Stevenson, for *Surtees Society* (St. Matt.; St. Mark). The Northumbrian gloss by Bouterwek, 1857. Stevenson has added a collation of the Latin of the Rushworth Gospels[a] (p. 3457, No. 8).

The following, among many others in the United Kingdom, deserve examination:[b] —

(1.) Of the Gospels.

1. Brit. Mus. *Harl.* 1,775, Sæc. vii. (Griesbach's *Harl.* Bentley's Z). A new and complete collation of this most precious MS. is greatly to be desired. It contains the *Prefaces*, *Canons*, and *Sections*, with blank places for the *Capitula.*[c] (Plate I., fig. 1.)
2. Brit. Mus. *Reg.* 1 E. vi. Sæc. vii. (Bentley's P). A very important English MS., with many old readings, *Præf. Can.* (no Sections), *Cap.* Mt. xxviii. Mc. xvi (?) Lc. xx. Joh. xiv. Supposed to have formed part of the *Biblia Gregoriana:* Westwood, *Archæological Journal*, xl. p. 292.
3. Brit. Mus. *Reg.* 1 B. vii. Sæc. viii. (Bentley's H). Another very important MS., preserving an old text.[d] *Præf. Can.* (Sect.)

[a] For all critical purposes the Latin texts of this edition are worthless. In one chapter taken at random (Mark viii.), there are *seventeen* errors in the text of the Lindisfarne MS., including the omission of one line with the corresponding gloss.

[b] The accompanying Plates will give a good idea of the external character of some of the most ancient and precious Latin MSS. which the writer has examined. For permission to take the tracings, from which the fac-similes were made, his sincere thanks are due to the various Institutions in whose charge the MSS. are placed.

Pl. i. *fig.* 1. *Brit. Mus.* Harl. 1,775, Matt. xxi. 30, 31, *Eo domine — et me*[*retrices*]. This MS. (like figs. 2, 3) exhibits the arrangement of the text in lines (*versus*, στίχοι). The original reading *novissimus* has been changed by a late hand into *primus*. A characteristic error of sound will be noticed, ibit for ivit (*b* for *v*), which occurs also in fig. 2.

*Fig.* 2. *Brit. Mus.* Add. 5,463. Matt. xxi. 30, 31, *sit — novissimus*. This magnificent MS. shows the beginning of contraction (*duob'*) and punctuation.

Fig. 3. *Stonyhurst.* John xix. 15–17, *non habemus — crucem*. This MS., unlike the former, seems to have been prepared for private use. It is written throughout with the greatest regularity and care. The large capitals probably indicate the beginnings of *membra* (κῶλα). The words are here separated.

*Fig.* 4. *Oxf. Bodl.* 3,418. Acts viii. 36, 37, *et ait — pare.*

Pl. ii. *Fig.* 1. *Cambr. Univ. Libr.* Kk. i. 24. John v. 4, *sanus fiebat — homo ibi*. This MS. offers a fine example of the semi-uncial "Irish" character, with the characteristic dotted capitals, which seems to have been used widely in the 8th century throughout Ireland and central and northern England. The text contains a most remarkable instance of the incorporation of a marginal gloss into the body of the book (*hoc in Græcis exemplaribus non habetur*), without any mark of separation by the original hand. This clause also offers a distinct proof of the revision of the copy from which the MS. was derived by Greek MSS. The punctuation for *artem* is worthy of notice.

*Fig.* 2. *Brit. Mus. Reg.* 1 B. vii. Another type of "Saxon" writing.

*Figs.* 3, 4. *Brit. Mus.* Harl. 1,023. Matt. xxvii. 49, with the addition *Alius autem — et sanguis*. Ibid. 1802. Matt. xxi. 30, 31, *et non iit — pupil*[*casu*]. Two characteristic specimens of later Irish writing. The contractions for *eum*, *autem*, *ejus*, *et*, *aqua*, in fig. 3, and for *et*, *non*, *enim*, *quia* in fig. 4, are noticeable.

*Fig.* 5. *Hereford Gospels.* John i. 3, 4, *factum est — comprachenderunt*. Probably a British type of the "Irish" character. The symbol for est (÷), and the *ch* for h, are to be observed.

[c] The varying divisions into *capitula* probably indicate different families of MSS., and deserve attention at least in important MSS. The terms *breviarium*, *capitula*, *breves*, appear to be used quite indiscriminately. One term is often given at the beginning and another at the end of the list. *Brit. Mus.* Addit. 9,381 gives *tituli* (a division into *smaller* sections) as well as *capitula*.

[d] This MS. contains the addition, after Matt. xx 28, in the following form: —

> Vos autem quæritis de *modico*
> crescere et de *maximo* minui
> *Cum autem introieretis*
> *ad coenam vocati*
> Nolite recumbere in *supe*
> *rioribus locis* [veniat
> Ne forte *dignior* te super
> et accedens *is* qui te *invitavit*
> Dicat tibi adhuc *inferius*
> accede et confundaris
> Si autem *recubueris in in*
> *feriori loco* et *venerit* hu
> milior te
> Dicet tibi qui te *invitabit*
> *Accede adhuc superius* et
> eri[t] tibi *hoc* utilius.

The same addition is given in the first hand of Oxford *Bodl.* 857, and in the second hand of B.M. *Add.* 24,142, with the following variations: *introieritis* advenerit,

*Cap.* Mt. lxxxvii. (sic). Mc. xlvi. Lc. xciv. Joh. xlv. (Plate II., fig. 2.)

4. Brit. Mus. *Cotton.* Otho C V. Sæc. viii. (Fragments of Matt. and Mark. Bentley's φ). Injured by fire: restored and mounted, 1848. The complement of 24.

5. Brit. Mus. *Addit.* 5,463. Sæc. viii. (Bentley's F). A magnificent (Italian) uncial MS. with many old readings. *Præf. Can.* (Sect.) *Cap.* Mt. xxviii. Mc. xiii. Lc. xx. Joh. xiv. (Plate I., fig. 2.)

6. Brit. Mus. *Harl.* 2,788. Sæc. viii., ix. (Codex aureus i. Bentley's $M_2$). Good Vulgate.

7. Brit. Mus. *Harl.* 2,797. Sæc. viii., ix. (Codex aureus ii.) Vulgate of late type.

8. Brit. Mus. *Reg.* 2 A. xx. Sæc. viii. (Lectiones quædam ex Evangeliis.) Good Vulgate.

9. Brit. Mus. *Harl.* 2,790, cir. 850. A fine copy, with some old readings.

10. Brit. Mus. *Harl.* 2,795. Sæc. ix. (In red letters.) Vulgate of late type.

11. Brit. Mus. *Harl.* 2,823. Sæc. ix. Good Vulgate, with *versus*.

12. Brit. Mus. *Harl.* 2,826. Sæc. ix., viii. (Bentley's $H_2$). Good Vulgate.

13. Brit. Mus. *Reg.* 1 A, xviii. Sæc. ix., x. (Cod. Athelstani. Bentley's O). Many old and peculiar readings.

14. Brit. Mus. *Reg.* 1 D, iii. Sæc. x. Like 13, but most carelessly written.

15. Brit. Mus. *Addit.* 11,848. Sæc. ix. Carefully written and corrected. Closely resembling 20.

16. Brit. Mus. *Addit.* 11,849. Sæc. ix. Vulgate of late type.

17. Brit. Mus. *Egerton*, 768. Sæc. ix. (St. Luke and St. John.) Some important readings.

18. Brit. Mus. *Egerton*, 873. Sæc. ix. Good Vulgate. *Præf. Can.* (Sect.) *Cap.* Matt. xxviii. Mc. xiii. Lc. xxi. Joh. xiv.

19. Brit. Mus. *Addit.* 9,381. Sæc. ix. From St. Petroc's, Bodmin. Some peculiar readings. *Præf. Can.* (Sect.) *Tituli.* Mt. cclii. (*Cap.* lxxxiv. *versus* IIDCC.). Mc. clxxxvi. Lc. ccccl. Joh. ccxxvi.

20. Brit. Mus. *Cotton.* Tib. A, ii. Sæc. x. (The Coronation Book. Bentley's E). Many old readings in common with 1, 3, 5, but without great interpolations.[a]

21. Brit. Mus. *Reg.* 1 D. ix. Sæc. xi. (Canute's Book. Bentley's A). Good Vulgate.

22. Cambridge *Univ. Libr.* Ll. i. 10. (Pascha et Resurrectio ex iv. Evv.). Sæc. viii Written (apparently) for Ethelwald, Bp. of Lindisfarne.

23. Cambridge, *C. C. C. Libr.* cclxxxvi. (iv Gospels, with Eusebian Canons.) Sæc. vi. vii. Supposed by many to have been sent by Gregory the Great to Augustine. *Cap.* Matt. xxviii. Mark xiii. Luke xx. John xiv. Vulgate with many old readings. It has been corrected by a very pure Vulgate text Described and some readings given by J. Goodwin, *Publ. of Cambr. Antiquarian Society*, 1847.[b]

24. Cambridge, *C. C. C. Libr.* cxcvii. (Fragments of St. John and St. Luke, extending over John i. 1–x. 29, and Luke iv. 5–xxiii. 26, with Eusebian Canons.) Sæc. viii. The fragments of St. John were published by J. Goodwin, *l. c.* A curiously mixed text, forming a connecting link between the "Irish" text and the Vulgate, but without any great interpolations. See No. 4. Comp. p. 3457.

25. Cambridge, *Trin. Coll.* B. 10, 4, iv. Gospels, Sæc. ix. (*Cap.*) Matt. xxvii. Mc. xiii. Lc. xxi. Joh. xiv. Good Vulgate, with some old readings. (Bentley's T.)

26. Cambridge, *Coll. D. Joh.* C. 23. The Bendish Gospels, Sæc. ix. Good Vulgate, very carefully written.

27. Oxford, *Bodl.* 857 (D. 2, 14). Sæc. vii. Begins, Matt. iv. 14, ut adim. — ends John xxi. 15, with a lacuna from Matt. viii. 29 dicentes — ix. 18, defuncta est. *Sect. Præf.* (*Cap.*) Mc. xiii. Lc. xx. Joh. xiv. Closely akin to 23.[c]

28. Durham, "Codex Evangeliorum plus mille annorum, litteris capitalibus ex Bibliotheca Dunelmensi." (Bentley's K.) Ends John i. 27.

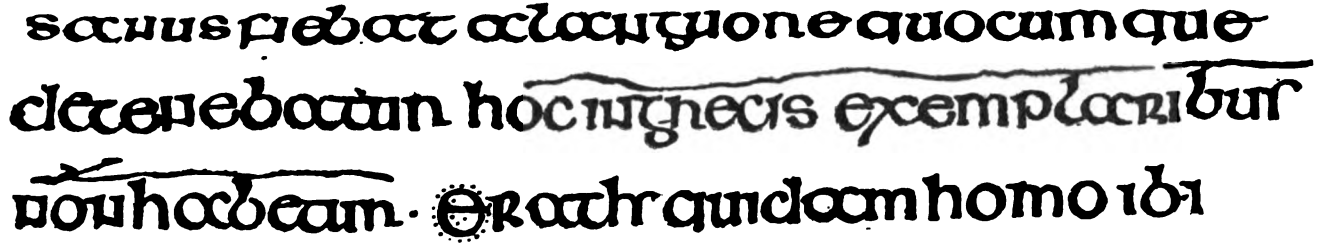
29. Durham, "Codex Evangeliorum plus mille annorum, sed imperfectus." (Bentley's ξ.) Begins Mark i. 12. Two very important MSS. Both have many old readings in common with 1, 3, 4, 5.

30. Stonyhurst, *St. Cuthbert's St. John*, found in 1105 at the head of St. Cuthbert when his tomb was opened. Sæc. vii. Very pure Vulgate, agreeing with *Cod. Am.* in many very remarkable readings: *e. g.* i. 15, *dixi vobis*; ii. 4, *tibi et mihi*; iv. 10, *respondit Jesus dixit*; iv. 16, *et veni*, om. *hoc*, etc.[d] (Plate I. fig. 3.)

---

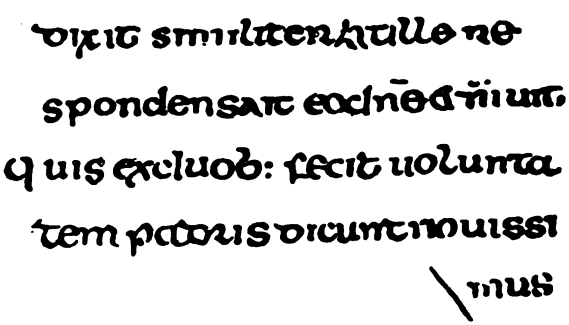
*invitavit*. In B. M. *Reg.* A. xviii. the variations are much more considerable: *pusillo, majori minores esse, introeuntes autem et rogati ad cœnam, locis eminentioribus, clarior*, om. *is, ad cœnam vocavit, deorsum, in inf. rec., supervenerit, ad cœnam vocavit, adhuc sursum accede*, om. *hoc*.

[a] Bentley has also given a collation of another Cottonian MS. (Otho, B ix.) very similar to this, which almost perished in the fire in 1731. Mr. H. A. Bond, Deputy Keeper of the MSS., to whose kindness the writer is greatly indebted for important help in examining the magnificent collection of Latin MSS. in the British Museum, has shown him fragments of a few leaves of this MS. which were recovered from the wreck of the fire. By a singular error Bentley calls this MS., and not Tib. A. ii., the *Coronation Book*. Comp. Smith, *Cotton. Cat.*



[b] A complete edition of this text, with collations of London *Brit. Mus.* Harl. 1,775; *Reg.* 1 B. vi. 1 B. vii.; *Addit.* 5,463; Oxford, *Bodl.* 857, is, I believe, in preparation by the Rev. G. Williams, Fellow of King's College, Cambridge.

[c] By a very strange mistake Tischendorf describes this MS. as "multorum Ni. Ti. fragmentorum."



[d] It may be interesting to give a rough classification of these MSS., all of which the writer has examined with more or less care. Many others of later date may be of equal value; and there are several early copies in private collections (as at Middlehill) and at Dublin (*e. g.* the (Vulgate) *Book of St. Columba*, Sæc. vii (Westwood) *Pal. Sacra*), which he has been obliged to leave unexamined.

(2.) Of the Acts and Epistles and Apoc.: —

1. Oxford, Bodl. *Seld.* 30 (Acts). See § 12, (2). (Plate I. fig. 4.)
2. Oxford, Bodl. *Laud.* E, 67 (Epp. Paul). See § 12, (2).
3. Brit. Mus., *Harl.* 1,772. (Epp. Paul. et Cath. (except 3 Jo. Jud.). Apoc.) Saec. viii. Griesbach, *Symb. Crit.* i. 326 ff., a most important MS. (Bentley's M.) See § 12, (2).
4. Brit. Mus. *Harl.* 7,551. (Fragm. of Cath. Epp. and St. Luke.) Saec. viii. (Bentley's α, γ.)
5. Brit. Mus. *Addit.* 11,852. Saec. ix. Epp. Paul. Act. Cath. Epp. Apoc. Good Vulgate.[a]
6. Brit. Mus. *Reg.* 1 A. xvi. Saec. xi. Good Vulgate.
7. Cambridge, *Coll. SS. Trin.* B. 10, 5. Saec. ix. (Collated by F. J. A. Hort. Bentley's S.) In Saxon letters: akin to 2.[b]
8. Cambridge, *Coll. SS. Trin. Cod. Aug.* ($F_2$). Published by F. H. Scrivener, 1859.[c]
9. "Codex ecclesiæ Lincolniensis 800 annorum." (Bentley's ξ, Act. Apoc.)
10. Brit. Mus. *Reg.* 2 F. i. Saec. xii. (Bentley's B.) Paul. Epp. xiv. cum commentario. Many old readings.

A Lectionary quoted by Sabatier (Saec. viii.), and the Mozarabic Liturgy, are also of great critical value.

In addition to MSS. of the Vulgate, the Anglo-Saxon Version which was made from it is an important help towards the criticism of the text. Of this the *Heptateuch* and *Job* were published by E. Thwaites, Oxfd. 1699; the (Latin-Saxon) *Psalter*, by J. Spelman, 1640, and B. Thorpe, 1835; the *Gospels*, by Archbp. Parker, 1571, T. Marshall, 1665, and more satisfactorily by B. Thorpe, 1842, and *St. Matt.* by J. M. Kemble (and C. Hardwick), with two Anglo-Saxon texts, formed on a collation of five MSS. and the Lindisfarne text and gloss. Comp. also the Frankish Version of the Harmony of Ammonius, ed. Schmeller, 1841.

VII. THE CRITICAL VALUE OF THE LATIN VERSIONS. — 33. The Latin Version, in its various forms, contributes, as has been already seen, more or less important materials for the criticism of the original texts of the Old and New Testaments, and of the Common and Hexaplaric texts of the LXX. The bearing of the Vulgate on the LXX. will not be noticed here, as the points involved in the inquiry more properly belong to the history of the LXX. Little, again, need be said on the value of the translation of Jerome for the textual criticism of the O. T. As a whole his work is a remarkable monument of the substantial identity of the Hebrew text of the 4th century with the present Masoretic text; and the want of trustworthy materials for the exact determination of the Latin text itself, has made all detailed investigation of his readings impossible or unsatisfactory. The passages which were quoted in the premature controversies of the 16th and 17th centuries, to prove the corruption of the Hebrew or Latin text, are commonly of little importance as far as the text is concerned. It will be enough to notice those only which are quoted by Whitaker, the worthy antagonist of Bellarmin (*Disputation on Scripture*, pp. 163 ff., ed. Park. Soc.).

Gen. i. 30, *om.* all green herbs (in Vet. L.); iii. 15, *Ipsa* conteret caput tuum. There seems good reason to believe that the original reading was *ipse*. Comp. Vercellone, *ad loc.* See also Gen. iv. 16.

iii. 17, in opere tuo. בעבוך for בעבורך.

iv. 16, *om.* Nod, which is specially noticed in Jerome's *Quaest. Hebr.*

vi. 6, *add.* et præcavens in futurum. The words are a gloss, and not a part of the Vulgate text.

viii. 4, *vicesimo* septimo, *for* septimo *decimo*. So LXX.

Id. 7, egrediebatur et *non* revertebatur. The *non* is wanting in the best MSS. of the Vulgate, and has been introduced from the LXX.

xi. 13, *trecentis* tribus, for quadringentis tribus. So LXX.

ix. 6, fundetur sanguis illius. *Om.* "by man."

xxxvii. 2. Sedecim for septemdecim. Probably a transcriptural error.

---

*whole to the Cod. Amiat.*: 6, 8, 11, 12, 18, 21, 22, 25, 26, 30.

Group ii. *Vulgate text of a later type*: 7, 10, 16.

Group iii. *A Vulgate text mainly with old readings*: 1, 9, 17, 19, 23, 27.

Group iv. *A mixed text, in which the old readings are numerous and important*: 2, 3, 4 (24), 5, 13, 14, 15, 20, 28, 29.

A more complete collation might modify this arrangement, but it is (I believe) approximately true.

[a] This MS. contains the Epistle to the Laodiceans after that to the Hebrews, and also the addition 1 Joh. v. 7, in the following form: *Quia tres sunt qui testimonium dant in terra, spiritus, et aqua, et sanguis, et tres unum sunt. Sicut in cælo tres sunt, pater verbum et spiritus, et hi tres unum sunt.* It is remarkable that the two other oldest authorities in support of this addition, also support the Epistle to the Laodiceans — the MS. of La Cava, and the *Speculum* published by Mai.

[b] A fragment containing prefatory excerpts to a copy of St. Paul's epistles written in a hand closely resembling this is found B. M. *Cotton.* Vitell. C. viii.

[c] From an examination of Bentley's unpublished collations, it may be well to add that of the eighteen French MSS., which he caused to be compared with the Clementine text (*Lutet. Paris.* apud *Claudium Stephanum*, MDCXXVIII. See Trin. Coll. Camb. B. 17, 5), the following are the most important, and would repay a complete collation. The writer has retained Bentley's notation: some of the MSS. may probably have passed into other collections.

α. *S. Germani a Pratis.* Saec. viii. Gold uncials on purple vellum. Matt. vi. 2, *ut* — to end. Mark ix. 47, *eice* — xi. 13, *vidisset.* xii. 23, *resurrexerint* — to end. Good Vulgate.

μ. *S. Germani a Pratis.* (g' of Tischdf. etc.) A very important MS., containing part of O. T., the whole of N. T. (of Gallican text?), and "*tria folia Pastoris.*" Existing collations are very incomplete. At the end of the Epistle to the Hebrews, which precedes the Shepherd, the MS. has (according to Bentley) the following note; *Explicit ad Hebræos. Lege cum pace. Bibliotheca Hieronimi Presbiteri Bethleem secundum Græcum ex emendatis. mis exemplaribus contasta* (sic).

ν. *S. Germani a Pratis*, 1, 2, A. D. 809.

ε. *Bibl. Regia*, Paris. 8,706. 4 Gosp. Saec. ix. Many old readings.

σ. *Bibl. Regia*, Paris. 8,706 (2, 3). 4 Gosp., with some lacunæ. Saec. viii. Many old readings.

ρ. *S. Martini Turonensis.* Lit. aureis. Saec. viii An important MS. (Gallican?). Comp. p. 3453, note *f*.

xxxix. 6, *om.* "Wherefore he left — Joseph."
xl. 5, *om.* "The butler — prison."
xlix. 10. Comp. Vercellone *ad loc.*
33, *om.*

In xxiv. 6, xxvii. 5, xxxiv. 29, the variation is probably in the rendering only. The remaining passages, ii. 8; iii. 6; iv. 6, 13, 26; vi. 3; xiv. 3; xvii. 16; xix. 18; xxi. 9; xxiv. 22; xxv. 34; xxvii. 33; xxxi. 32; xxxviii. 5, 23; xlix. 22, contain differences of interpretation; and in xxxvi. 24, xli. 45, the Vulgate appears to have preserved important traditional renderings.

34. The examples which have been given show the comparatively narrow limits within which the Vulgate can be used for the criticism of the Hebrew text. The Version was made at a time when the present revision was already established; and the freedom which Jerome allowed himself in rendering the sense of the original, often leaves it doubtful whether in reality a various reading is represented by the peculiar form which he gives to a particular passage. In the N. T. the case is far different. In this the critical evidence of the Latin is separable into two distinct elements, the evidence of the Old Latin and that of the Hieronymian revision. The latter, where it differs from the former, represents the received Greek text of the 4th century, and so far claims a respect (speaking roughly) equal to that due to a first-class Greek MS.; and it may be fairly concluded, that any reading opposed to the combined testimony of the oldest Greek MSS. and the true Vulgate text, either arose later than the 4th century, or was previously confined within a very narrow range. The *corrections* of Jerome do not carry us back beyond the age of existing Greek MSS., but, at the same time, they supplement the original testimony of MSS. by an independent witness. The *substance* of the Vulgate, and the copies of the Old Latin, have a more venerable authority. The origin of the Latin Version dates, as has been seen, from the earliest age of the Christian Church. The translation, as a whole, was practically fixed and current more than a century before the transcription of the oldest Greek MS. Thus it is a witness to a text more ancient, and therefore, *cæteris paribus*, more valuable, than is represented by any other authority, unless the Peshito in its present form be excepted. This primitive text was not, as far as can be ascertained, free from serious corruptions (at least in the synoptic Gospels) from the first, and was variously corrupted afterwards. But the corruptions proceeded in a different direction and by a different law from those of Greek MSS., and, consequently, the two authorities mutually correct each other. What is the nature of these corruptions, and what the character and value of Jerome's revision, and of the Old Latin, will be seen from some examples to be given in detail.

35. Before giving these, however, one preliminary remark must be made. In estimating the critical value of Jerome's labors, it is necessary to draw a distinction between his different works. His mode of proceeding was by no means uniform; and the importance of his judgment varies with the object at which he aimed. The three versions of the Psalter represent completely the three different methods which he followed. At first he was contented with a popular revision of the current text (the *Roman* Psalter); then he instituted an accurate comparison between the current text and the original (the *Gallican* Psalter); and in the next place he translated independently, giving a direct version of the original (the *Hebrew* Psalter). These three methods follow one another in chronological order, and answer to the wider views which Jerome gradually gained of the functions of a Biblical scholar. The revision of the N. T. belongs unfortunately to the first period. When it was made, Jerome was as yet unused to the task, and he was anxious not to arouse popular prejudice. His aim was little more than to remove obvious interpolations and blunders; and in doing this he likewise introduced some changes of expression which softened the roughness of the Old Version, and some which seemed to be required for the true expression of the sense (*e. g.* Matt. vi. 11, *supersubstantialem* for *quotidianum*). But while he accomplished much, he failed to carry out even this limited purpose with thorough completeness. A rendering which he commonly altered was still suffered to remain in some places without any obvious reason (*e. g.* μυστήριον, δοξάζω, ἀφανίζω); and the textual emendations which he introduced (apart from the removal of glosses) seem to have been made after only a partial examination of Greek copies, and those probably few in number. The result was such as might have been expected. The greater corruptions of the Old Latin, whether by addition or omission, are generally corrected in the Vulgate. Sometimes, also, Jerome gives the true reading in details which had been lost in the Old Latin: Matt. i. 25, *cognoscebat;* ii. 23, *prophetas;* v. 22, *om.* εἰκῇ; ix. 15, *lugere;* John iii. 8; Luke ii. 33, ὁ πατήρ; iv. 12: but not rarely he leaves a false reading uncorrected (Matt. ix. 28, *vobis;* x. 42), or adopts a false reading where the true one was also current; Matt. xvi. 6; xviii. 29; xix. 4; John i. 3, 16; vi. 64. Even in graver variations he is not exempt from error. The famous *pericope*, John vii. 53–viii. 11, which had gained only a partial entrance into the Old Latin, is certainly established in the Vulgate. The additions in Matt. xxvii. 35, Luke iv. 19, John v. 4, 1 Pet. iii. 22, were already generally or widely received in the Latin copies, and Jerome left them undisturbed. The same may be said of Mark xvi. 9–20; but the "heavenly testimony" (1 John v. 7), which is found in the editions of the Vulgate, is, beyond all doubt, a later interpolation, due to an African gloss; and there is reason to believe that the interpolations in Acts viii. 37, ix. 5, were really erased by Jerome, though they maintained their place in the mass of Latin copies.

36. Jerome's revision of the Gospels was far more complete than that of the remaining parts of the N. T. It is, indeed, impossible, except in the Gospels, to determine any substantial difference in the Greek texts which are represented by the Old and Hieronymian Versions. Elsewhere the differences, as far as they can be satisfactorily established, are differences of expression and not of text, and there is no sufficient reason to believe that the readings which exist in the best Vulgate MSS. when they are at variance with other Latin authorities, rest upon the deliberate judgment of Jerome. On the contrary, his Commentaries show that he used copies differing widely from the recension which passes under his name, and even expressly condemned as faulty in text or rendering many passages which are undoubtedly part of the Vulgate. Thus in his Commentary on the Galatians he condemns the additions, iii. 1, *veritati non obedire* v. 21, *homicidia;* and the translations, i. 16, *non*

Digitized by Google

*acquievi carni et sanguini* (for *non contuli cum carne et sanguine*); v. 9, *modicum fermentum totam massam corrumpit* (for *modicum fermentum totam conspersionem fermentat*); v. 11, *evacuatum est* (for *cessavit*); vi. 3, *seipsum* (seipse) *seducit* (for *mentem suam decipit*). And in the text of the epistle which he gives there are upwards of fifty readings which differ from the best Vulgate text, of which about ten are improvements (iv. 21; v. 13, 23; vi. 13, 15, 16, &c.), as many more inferior readings (iv. 17, 26, 30, &c.), and the remainder differences of expression: *malo* for *nequam*, *recto pede incedunt* for *recte ambulant*, *rursum* for *iterum*. The same differences are found in his Commentaries on the other epistles: *ad Ephes.* i. 6; iii. 14; iv. 19; v. 22, 31; *ad Tit.* iii. 15. From this it will be evident that the Vulgate text of the Acts and the Epistles does not represent the critical opinion of Jerome, even in the restricted sense in which this is true of the text of the Gospels. But still there are some readings which may with probability be referred to his revision: Acts xiii. 18, *mores eorum sustinuit* for *nutriit* (*aluit*) *eos*. Rom. xii. 11, *Domino* for *tempori*. Eph. iv. 19, *illuminabit te Christus* for *continges Christum*. Gal. ii. 5, *neque ad horam cessimus* for *ad horam cessimus*. 1 Tim. v. 19, add. *nisi sub duobus aut tribus testibus*.

37. The chief corruptions of the Old Latin consist in the introduction of glosses. These, like the corresponding additions in the *Codex Bezæ* ($D_1$), are sometimes indications of the venerable antiquity of the source from which it was derived, and seem to carry us back to the time when the evangelic tradition had not yet been wholly superseded by the written Gospels. Such are the interpolations at Matt. iii. 15; xx. 28; Luke iii. 22 (compare also Luke i. 46; xii. 33); but more frequently they are derived from parallel passages, either by direct transference of the words of another evangelist, or by the reproduction of the substance of them. These interpolations are frequent in the synoptic Gospels; Matt. iii. 3; Mark xvi. 4; Luke i. 29, vi. 10; ix. 43, 50, 54; xi. 2; and occur also in St. John vi. 56, &c. But in St. John the Old Latin more commonly errs by defect than by excess. Thus it omits clauses certainly or probably genuine: iii. 31; iv. 9; v. 36; vi. 23; viii. 58, &c. Sometimes, again, the renderings of the Greek text are free: Luke i. 29; ii. 15; vi. 21. Such variations, however, are rarely likely to mislead. Otherwise the Old Latin text of the Gospels is of the highest value. There are cases where some Latin MSS. combine with one or two other of the most ancient witnesses to support a reading which has been obliterated in the mass of authorities: Luke vi. 1; Mark xvi. 9 ff.; v. 3; and not unfrequently (comp. § 35) it preserves the true text which is lost in the Vulgate: Luke xiii. 19; xiv. 5; xv. 28.

38. But the places where the Old Latin and the Vulgate have separately preserved the true reading are rare, when compared with those in which they combine with other ancient witnesses against the great mass of authorities. Every chapter of the Gospels will furnish instances of this agreement, which is often the more striking because it exists only in the original text of the Vulgate, while the later copies have been corrupted in the same way as the later Greek MSS.: Mark ii. 16; iii. 25 (?); viii. 13, &c.; Rom. vi. 8; xvi. 24, &c. In the first few chapters of St. Matthew, the following may be noticed: i. 18 (*bis*); ii. 18; iii. 10; v. 4, 5, 11, 30, 44, 47; vi. 5, 13; vii. 10, 14, 29; viii. 12 (x. 8), &c. It is useless to multiply examples which occur equally in every part of the N. T.: Luke ii. 14, 40; iv. 2, &c.; John i. 52; iv. 42, 51; v. 16; viii. 59; xiv. 17, &c.: Acts ii. 30, 31, 37, &c.; 1 Cor. i. 1, 15, 22, 27, &c. On the other hand, there are passages (comp. § 35) in which the Latin authorities combine in giving a false reading: Matt. vi. 15; vii. 10; viii. 28 (?), &c.: Luke iv. 17; xiii. 23, 27, 31, &c.; Acts iii. 20, &c.; 1 Tim. iii. 16, &c. But these are comparatively few, and commonly marked by the absence of all Eastern corroborative evidence. It may be impossible to lay down definite laws for the separation of readings which are due to free rendering, or carelessness, or glosses, but in practice there is little difficulty in distinguishing the variations which are due to the idiosyncrasy (so to speak) of the version from those which contain real traces of the original text. And when every allowance has been made for the rudeness of the original Latin, and the haste of Jerome's revision, it can scarcely be denied that the Vulgate is not only the most venerable but also the most precious monument of Latin Christianity. For ten centuries it preserved in Western Europe a text of Holy Scripture far purer than that which was current in the Byzantine Church; and at the revival of Greek learning, guided the way towards a revision of the late Greek text, in which the best Biblical critics have followed the steps of Bentley, with ever-deepening conviction of the supreme importance of the coincidence of the earliest Greek and Latin authorities.

39. Of the *interpretative* value of the Vulgate little need be said. There can be no doubt that in dealing with the N. T., at least, we are now in possession of means infinitely more varied and better suited to the right elucidation of the text than could have been enjoyed by the original African translators. It is a false humility to rate as nothing the inheritance of ages. If the investigation of the laws of language, the clear perception of principles of grammar, the accurate investigation of words, the minute comparison of ancient texts, the wide study of antiquity, the long lessons of experience, have contributed nothing towards a fuller understanding of Holy Scripture, all trust in Divine Providence is gone. If we are not in this respect far in advance of the simple peasant or half-trained scholar of North Africa, or even of the laborious student of Bethlehem, we have proved false to their example, and dishonor them by our indolence. It would be a thankless task to quote instances where the Latin Version renders the Greek incorrectly. Such faults arise most commonly from a servile adherence to the exact words of the original, and thus that which is an error in rendering proves a fresh evidence of the scrupulous care with which the translator generally followed the text before him. But while the interpreter of the N. T. will be fully justified in setting aside without scruple the authority of early versions, there are sometimes ambiguous passages in which a version may preserve the traditional sense (John i. 3, 9, viii. 25, &c.) or indicate an early difference of translation; and then its evidence may be of the highest value. But even here the judgment must be free. Versions supply authority for the text, and opinion only for the rendering.

VIII. The Language of the Latin Versions. — 40. The characteristics of Christian

Digitized by Google

Latinity have been most unaccountably neglected by lexicographers and grammarians. It is, indeed, only lately that the full importance of provincial dialects in the history of languages has been fully recognized, and it may be hoped that the writings of Tertullian, Arnobius, and the African Fathers generally, will now at length receive the attention which they justly claim. But it is necessary to go back one step further, and to seek in the remains of the Old Latin Bible the earliest and the purest traces of the popular idioms of African Latin. It is easy to trace in the patristic writings the powerful influence of this venerable Version; and on the other hand, the Version itself exhibits numerous peculiarities which were evidently borrowed from the current dialect. Generally it is necessary to distinguish two distinct elements both in the Latin Version and in subsequent writings: (1) Provincialisms and (2) Grecisms. The former are chiefly of interest as illustrating the history of the Latin language; the latter as marking, in some degree, its power of expansion. Only a few remarks on each of these heads, which may help to guide inquiry, can be offered here; but the careful reading of some chapters of the Old Version (*e. g.* Psalms, Ecclus., Wisdom, in the modern Vulgate) will supply numerous illustrations.[a]

(1.) *Provincialisms.* — 41. One of the most interesting facts in regard to the language of the Latin Version is the reappearance in it of early forms which are found in Plautus or noted as archaisms by grammarians. These establish in a signal manner the vitality of the popular as distinguished from the literary idiom, and, from the great scarcity of memorials of the Italian dialects, possess a peculiar value. Examples of *words, forms,* and *constructions* will show the extent to which this phenomenon prevails.

(α) *Words:*

*Stultiloquium, multiloquium, veniloquus* (Plautus); *stabilimentum* (id.); *datus* (subst. id.); *condignus* (id.); *aratiuncula* (id.); *versipellis* (id.); *saturitas* (id.); *stacte* (id.); *cordatus* (Ennius); *custoditio* (Festus); *decipula, dejero* (Plautus); *exentero* (id.); *scius* (Pac.); *mino* (to *drive*, Festus).

(β) *Forms:*

Deponents as Passive: *consolor, hortor, promereor* (Heb. xiii. 16); *ministror.*

Irregular inflections: *partibor absconsus*; conversely, *exies*, etc.

*tapetia* (Plautus), *hasc* (fem. pl.).

Unusual forms: *pascua* (fem.); *murmur* (masc.); *sal* (neut.); *retia* (sing.); *certor, odio, cornum, placor* (subst.), *dulcor.*

(γ) *Constructions:*

*Emigro* with *acc.* (Ps. lxi. 7, emigrabit te de tabernaculo); *dominor* with *gen.*; *soceo* with *acc.*; *sui, suus,* for *ejus*, etc.; *non* for *ne* prohibitive; *capit* impers.

42. In addition to these there are many other peculiarities which evidently belong to the Africas (or common) dialect, and not merely to the Christian form of it. Such are the words *minorare, minoratio, improperium, framea* (a sword), *ablactatio, annualis, alleviare, pectusculum, antemuralia, pamifica, paratura, tortura, tribulare* (met.), *tribulatio, valefacere, veredarius, viare, victualia, virectum* (viretum), *vitulamen, volatilia* (subst.), *quaternio, reclinatorium, scrutinium, sponsare, stratoria* (subst.), *sufferentia, sufficientia, superabundantia, sustinentia, cartallus, cassidile, collactaneus, conduleare, geminen, grossitudo, refectio* (κατάλυμα), *exterminium, defunctio* (decease), *substantia* (abs.), *incolatus.*

New verbs are formed from adjectives: *pessimare, proximare, approximare, assiduare, pigritari, salvare* (*salvator, salvatio*), *obviare, jucundare*, and especially a large class in *-fico: mortifico, vivifico, sanctifico, glorifico, clarifico, beatifico, castifico, gratifico, fructifico.*

Other verbs worthy of notice are: *appropriare, appretiare, tenebrescere, induloare, implanare*, (plānus), *manioare.*

In this class may be reckoned also many

(1.) New substantives derived from adjectives: *possibilitas, præclaritas, paternitas, præscientia, religiositas, nativitas, superexcusitas, magnalia.*

Or verbs: *requietio, respectio, creatura, subitatio, extollentia.*

(2.) New verbals: *accensibilis, acceptabilis, docibilis, productilis, passibilis, receptibilis, reprehensibilis, suadibilis, subjectibilis, arreptitius*; and participial forms: *pudoratus, angustiatus, timoratus, sensatus, disciplinatus, magnatus, linguatus.*

(3.) New adjectives: *animanyus, temporaneus, unigenitus, querulosus*; and adverbs, *terribiliter, unanimiter, spiritualiter, cognoscibiliter, fiducialiter.*

The series of *negative* compounds is peculiarly worthy of notice: *immemoratio, increditio, inconsummatio; inhonorare; incuriliatus, indeficiens, inconfusibilis, inportabilis.*

Among the characteristics of the late stage of a language must be reckoned the excessive frequency of compounds, especially formed with the prepositions. These are peculiarly abundant in the Latin Version, but in many cases it is difficult to determine whether they are not direct translations of the late LXX. forms, and not independent forms: e. g. *addecimare, adinvenire -ntio, adincrescere, perefluere, permundare, propurgare, superexaltare, superinvalescere, supererogare, reinniare, rememoratio, repropitiari, subinferre.* Of these many are the direct representatives of Greek words: *superadulta* (1 Cor. vii. 36), *superseminare* (Matt. xiii. 25), *comparticipes, concaptivus, complantatus*, etc. (*supersubstantialis*, Matt. vi. 11); and others are formed to express distinct ideas: *subcinericius, subnervare*, etc.[b]

(2.) *Grecisms.* — 43. The "simplicity" of the Old Version necessarily led to the introduction of very numerous Septuagintal or N. T. forms, many of which have now passed into common use. In this respect it would be easy to point out the dif

---

[a] Cardinal Wiseman (*Two Letters*, etc., republished in *Essays*, i. pp. 46–64) has examined this subject in some detail, and the writer has fully availed himself of his examples, in addition to those which he had himself collected. The *Thesaurus* of Faber (ed. 1749) is the most complete for Ecclesiastical Latin; and Dutripon's *Concordance* is, as far as the writer has observed, complete for the authorised Clementine text.

[b] It would be interesting to trace the many striking parallelisms between the Vulgate and the African Appuleius (e. g. *incredibilis* (act.) *ineffugibilis, malecare*, etc.), or the Spanish Seneca (e. g. *inquietudo, impunitus*, etc.).

Digitized by Google

ference which exists between Jerome's own work and the original translation, or his revision of it. Examples of Greek words are: *zelare, perizoma, python, pythonissa, proselytus, prophetes -tissa -tizare -tare, poderis, pompaticæ, thesaurizare, anathematizare, agonizare, agonia, aromatizare, angelus -icus, peribolus, pisticus, probatica, papyrio, pastophoria, telonium, eucharis, acharis, romphæa, bravium, dithalassus, dema (thronus), thymiatorium, tristega, scandalum, sitarcia, blasphemare*, etc., besides the purely technical terms: *patriarcha, Parasceve, Pascha, Paracletus*. Other words based on the Greek are: *apostor, angario, apostatare, apostolus, acedior* (ἀχηδία).

Some close renderings are interesting: *amodo* (ἀπὸ τούτου), *propitiatorium* (ἱλαστήριον), *inidipsum* (ἐπὶ τὸ αὐτὸ), *rationale* (λογεῖον, Ex. xxviii. 15, &c.), *consentaneus* (Acts xviii. 8), *seminiverbius* (Acts xvii. 18), *subintroductus* (Gal. ii. 4), *supercrescere* (Jude 3), *civilitas* (Acts xxii. 28), *intentator malorum* (James i. 13). To this head also must be referred such constructions as *zelare* with *accus.* (ζηλοῦν τινα); *facere* with *inf.* (ποιεῖν . . . . γενέσθαι); *potestas* with *inf.* (ἐξουσία ἀφιέναι); the use of the *inf.* to express an end (Acts vii. 43, ἐποιήσατε προσκυνεῖν) or a result (Luke i. 25, ἐπεῖδεν ἀφελεῖν, *respexit auferre*); the introduction of *quia* for ὅτι in the sense of *that* (Luke i. 58, *audierunt . . . . quia*), or for ὅτι *recitativum* (Matt. vii. 23, *Confitebor illis quia . . . .*); the *dat.* with *assequi* (Luke i. 3, παρακολουθεῖν V. L.); the use of the *gen.* with the comparative (John i. 50, *majora horum*); and such Hebraisms as *vir mortis* (1 K. ii. 26). Comp. § 6.

Generally it may be observed that the Vulgate Latin bears traces of a threefold influence derived from the original text; and the modifications of form which are capable of being carried back to this source occur yet more largely in modern languages, whether in this case they are to be referred to the plastic power of the Vulgate on the popular dialect, or, as is more likely, we must suppose that the Vulgate has preserved a distinct record of powers which were widely working in the times of the Empire on the common Latin. These are (1) an extension of the use of prepositions for simple cases, *e. g.* in the renderings of ἐν, Col. iii. 17, *facere in verbo*, etc.; (2) an assimilation of pronouns to the meaning of the Greek article, *e. g.* 1 John i. 2, *ipsa* vita; Luke xxiv. 9, *illis* undecim, etc.; and (3) a constant employment of the definitive and epithetic genitive, where classical usage would have required an adjective, *e. g.* Col. i. 13, filius *caritatis suæ*; iii. 12, viscera *miserieordiæ*.

44. The peculiarities which have been enumerated are found in greater or less frequency throughout the Vulgate. It is natural that they should be most abundant and striking in the parts which have been preserved least changed from the Old Latin, the Apocrypha, the Acts, Epistles, and Apocalypse. Jerome, who, as he often says, had spent many years in the schools of grammarians and rhetoricians, could not fail to soften down many of the asperities of the earlier version, either by adopting variations already in partial use, or by correcting faulty expressions himself as he revised the text. An examination of a few chapters in the Old and New Versions of the Gospels will show the character and extent of the changes which he ventured to introduce: Luke i. 60, οὐχί, *non*, Vet. L., *nequaquam*, Vulg.; *id.* 65, ἐν ὅλῃ τῇ ὀρεινῇ, *in omni montana*, Vet. L., *super omnia montana*, Vulg.; ii. 1, *profiteretur, professio*, Vet. L., *describeretur, descriptio*, Vulg.; *id.* 13, *exercitus cælestis*, Vet. L., *militia cælestis*, Vulg.; *id.* 34, *quod contradicetur*, Vet. L., *cui contr.* Vulg.; *id.* 49, *in propria Patris mei*, Vet. L., *in his quæ patris mei sunt*, Vulg. Some words he seems to have changed constantly, though not universally: e. g. *obauditio, obaudio* (obedientia, obedio); *mensurare* (metiri); *dilectio* (caritas); *sacramentum* (mysterium), etc. And many of the most remarkable forms are confined to books which he did not revise: *elucidare, inultare* (jucundari); *fumigabundus, illamentatus, indisciplinatus, insuspicabilis; exsecramentum* (*exterminium*), *gaudimonium; extollentia, honorificentia: horripilatio, inhonoratio*.

45. Generally it may be said that the Scriptural idioms of our common language have come to us mainly through the Latin; and in a wider view the Vulgate is the connecting link between classical and modern languages. It contains elements which belong to the earliest stage of Latin, and exhibits (if often in a rude form) the flexibility of the popular dialect. On the other hand, it has furnished the source and the model for a large portion of current Latin derivatives. Even a cursory examination of the characteristic words which have been given will show how many of them, and how many corresponding forms, have passed into living languages[a] To follow out this question in detail would be out of place here; but it would furnish a chapter in the history of language fruitful in results and hitherto unwritten. Within a more limited range, the authority of the Latin Versions is undeniable, though its extent is rarely realized. The vast power which they have had in determining the theological terms of western Christendom can hardly be overrated. By far the greater part of the current doctrinal terminology is based on the Vulgate, and, as far as can be ascertained, was originated in the Latin Version. *Predestination, justification, supererogation* (supererogo), *sanctification, salvation, mediator, regeneration, revelation, visitation* (met.), *propitiation*, first appear in the Old Vulgate. *Grace, redemption, elect, reconciliation, satisfaction, inspiration, scriptura*, were devoted there to a new and holy use. *Sacrament* (μυστήριον) and *communion* are from the same source; and though *baptism* is Greek, it comes to us from the Latin. It would be easy to extend the list by the addition of *orders, penance, congregation, priest*. But it can be seen from the forms already brought forward that the Latin Versions have left their mark both upon our language and upon our thoughts; and if the right method of controversy is based upon a clear historical perception of the force of words, it is evident that the study of the Vulgate, however much neglected, can never be neglected with impunity. It was the Version which alone they knew who handed down to the Reformers the rich stores of mediæval wisdom;

[a] Probably the most remarkable example of the influence of theology upon popular language, is the entire suppression of the correlatives of *verbum* in all the Romance languages. The forms occur in the religious technical sense (the Word), but otherwise they are replaced by the representatives of *parabola* (parola, parole, etc.) Compare Diez, *Etym. Wörth.* p 253.

the Version with which the greatest of the Reformers were most familiar, and from which they had drawn their earliest knowledge of Divine truth.

**VULTURE.** The rendering in A. V. of the Heb. דָּיָה (*dayyâh*) and דַּאָה; and also in Job xxviii. 7, of אַיָּה, *ayyâh*; elsewhere, in Lev. xi. 14, and Deut. xiv. 13, more correctly rendered "kite": LXX. γύψ and ἱκτῖνος: Vulg. *vultur*: except in Is. xxxiv. 15, where LXX. read ἔλαφος, and Vulg. correctly *milvus*.

There seems no doubt but that the A. V. translation is incorrect, and that the original words refer to some of the smaller species of raptorial birds, as kites or buzzards. דָּיָה is evidently synonymous with Arab. حَدَيَة, *h'dayah*, the vernacular for the "kite" in North Africa, and, without the epithet "red," for the black kite especially. Bochart (*Hieroz.* ii. 2, 195) explains it *Vultur niger*. The Samaritan and all other Eastern Versions agree in rendering it "kite." אַיָּה (*ayyâh*) is yet more certainly referable to this bird, which in other passages it is taken to represent. Bochart (*Hieroz.* ii. b. 2, c. 8, p. 193) says it is the same bird which the Arabs call يايا (*yaya*) from its cry; but does not state what species this is, supposing it apparently to be the magpie, the Arab name for which, however, is العقعاق, *el aqaaq*.

There are two very different species of bird comprised under the English term vulture: the griffon (*Gyps fulvus*, Sav.), Arab. نسر, *nesser*: Heb. נֶשֶׁר, *nesher*: invariably rendered "eagle" by A. V.; and the *percnopter*, or Egyptian vulture (*Neophron percnopterus*, Sav.), Arab. رخمة, *rakhma*: Heb. רָחָם, *râchâm*: rendered "gier-eagle" by A. V.

The identity of the Hebrew and Arabic terms in these cases can scarcely be questioned. However degrading the substitution of the ignoble vulture for the royal eagle may at first sight appear in many passages, it must be borne in mind that the griffon is in all its movements and characteristics a majestic and royal bird, the largest and most powerful which is seen on the wing in Palestine, and far surpassing the eagle in size and power. Its only rival in these respects is the bearded vulture or lammergeyer, a more uncommon bird everywhere, and which, since it is not, like the griffon, bald on the head and neck, cannot be referred to as *nesher* (see Mic. i. 16). Very different is the slovenly and cowardly Egyptian vulture, the familiar scavenger of all oriental towns and villages, protected for its useful habits, but loathed and despised, till its name has become a term of reproach like that of the dog or the swine.

If we take the Heb. *ayyâh* to refer to the red kite (*milvus regalis*, Temm.), and *dayyâh* to the black kite (*milvus ater*, Temm.), we shall find the piercing sight of the former referred to by Job (xxviii. 7), and the gregarious habits of the latter by Isaiah (xxxiv. 15). Both species are inhabitants of Palestine, the red kite being found all over the country, as formerly in England, but nowhere in great numbers, generally soaring at a great height over the plains, according to Dr. Roth, and apparently leaving the country in winter. The black kite, which is so numerous everywhere as to be gregarious, may be seen at all times of the year, hovering over the villages and the outskirts of towns, on the lookout for offal and garbage, which are its favorite food. Vulture-like, it seldom, unless pressed by hunger, attacks living animals. It is therefore never molested by the natives, and builds its nest on trees in their neighborhood, fantastically decorating it with as many rags of colored cloth as it can collect.

There are three species of vulture known to inhabit Palestine: —

1. The Lammergeyer (*Gypaëtos barbatus*, Cuv.), which is rare everywhere, and only found in desolate mountain regions, where it rears its young in the depth of winter among inaccessible precipices. It is looked upon by the Arabs as an eagle rather than a vulture.

2. The Griffon (*Gyps fulvus*, Sav.), mentioned above, remarkable for its power of vision and the great height at which it soars. Aristotle (*Anim. Hist.* vi. 5) notices the manner in which the griffon scents its prey from afar, and congregates in the wake of an army. The same singular instinct was remarked in the Russian War, when vast numbers of this vulture were collected in the Crimea, and remained till the end of the campaign in the neighborhood of the camp, although previously they had been scarcely known in the country. "Wheresoever the carcass is there will the eagles be gathered together" (Matt. xxiv. 28); "Where the slain are, there is she" (Job xxxix. 30). The writer observed this bird universally distributed in all the mountainous and rocky districts of Palestine, and especially abundant in the southeast. Its favorite breeding-places are between Jerusalem and Jericho and all round the Dead Sea.

The third species is the Egyptian vulture (*Neophron percnopterus*, Sav.), often called Pharaoh's

Digitized by Google

sen, observed in Palestine by Hasselquist and all subsequent travellers, and very numerous everywhere. Two other species of very large size, the sared and cinereous vultures (*Vultur nubicus*, Smith, and *Vultur cinereus*, L.), although inhabitants of the neighboring countries, and probably also of the southeast of Palestine, have not yet been noted in collections from that country.

**WAGES.**[a] The earliest mention of wages is of a recompense not in money but in kind, to Jacob from Laban (Gen. xxix. 15, 20, xxx. 28, xxxi. 7, 8, 41). This usage was only natural among a pastoral and changing population like that of the tent-dwellers of Syria. In Egypt, money payments by way of wages were in use, but the terms cannot now be ascertained (Ex. ii. 9). The only mention of the rate of wages in Scripture is found in the parable of the householder and vineyard (Matt. xx. 2), where the laborer's wages are set at one denarius per day, probably = 7½*d.*, a rate which agrees with Tobit v. 14, where a drachma is mentioned as the rate per day, a sum which may be fairly taken as equivalent to the denarius, and to the usual pay of a soldier (ten *asses* per diem) in the later days of the Roman republic (Tac. *Ann.* i. 17; Polyb. vi. 39). It was perhaps the traditional remembrance of this sum as a day's wages that suggested the mention of "drachmas wrung from the hard hands of peasants" (Shakespeare, *Jul. Cæs.* iv. 3). In earlier times it is probable that the rate was lower, as until lately it was throughout India. In Scotland we know that in the last century a laborer's daily wages did not exceed sixpence (Smiles, *Lives of Engineers*, ii. 96). But it is likely that laborers, and also soldiers, were supplied with provisions (Michaelis, *Laws of Moses*, § 130, vol. ii. p. 190, ed. Smith), as is intimated by the word ὀψώνια, used in Luke iii. 14, and 1 Cor. ix. 7, and also by Polybius, vi. 39. The Mishnah (*Baba metzia*, vii. 1, § 5), speaks of victuals being allowed or not according to the custom of the place, up to the value of a denarius, *i. e.* inclusive of the pay.

The law was very strict in requiring daily payment of wages (Lev. xix. 13; Deut. xxiv. 14, 15); and the Mishnah applies the same rule to the use of animals (*Baba metzia*, ix. 12). The employer who refused to give his laborers sufficient victuals is censured (Job xxiv. 11), and the iniquity of withholding wages is denounced (Jer. xxii. 13; Mal. iii. 5; James v. 4).

Wages in general, whether of soldiers or laborers, are mentioned (Hag. i. 6; Ez. xxix. 18, 19; John iv. 36). Burckhardt mentions a case in Syria resembling closely that of Jacob with Laban — a man who served eight years for his food, on condition of obtaining his master's daughter in marriage, and was afterwards compelled by his father-in-law to perform acts of service for him (*Syria*, p. 297). H. W. P.

**WAGON.** [CART and CHARIOT.] The oriental wagon or *arabah* is a vehicle composed of two or three planks fixed on two solid circular blocks of wood, from two to five feet in diameter, which serve as wheels. To the floor are sometimes attached wings, which splay outwards like the sides of a wheelbarrow. For the conveyance of passengers, mattresses or clothes are laid in the bottom, and the vehicle is drawn by buffaloes or oxen (Arundell, *Asia Minor*, ii. 191, 235, 238; Olearius, *Trav.* p. 309; Ker Porter, *Trav.* ii. 533.) Egyptian carts or wagons, such as were sent to convoy Jacob (Gen. xlv. 19, 21, 27), are described under CART. The covered wagons for conveying the materials of the Tabernacle were probably constructed on Egyptian models. They were each drawn by two oxen (Num. vii. 3, 8). Herodotus mentions a four-wheeled Egyptian vehicle (ἅμαξα) used for sacred purposes (Her. ii. 63).

H. W. P.

* Under this head belongs "litters" Is. lxvi. 20, the Hebrew word being the same as that for "wagons" in Num. vii. 3, 8. Litters occurs only this once in the A. V. H.

* **WALL OF PARTITION.** [PARTITION WALL.]

**WALLS.**[b] Only a few points need be noticed in addition to what has been said elsewhere on wall-construction, whether in brick, stone, or wood. [BRICKS; HANDICRAFT; MORTAR.] 1. The practice common in Palestine of carrying foundations down to the solid rock, as in the case of the Temple, and in the present day with structures intended to be permanent (Joseph. *Ant.* xv. 11, § 3; Luke vi. 48; Robinson, ii. 338; *Col. Ch. Chron.* (1857), p. 459). The pains taken by the ancient builders to make good the foundations of their work may still be seen, both in the existing substructions and in the number of old stones used in more modern constructions. Some of these stones — ancient, but of uncertain date — are from 20 feet to 30 feet 10 inches long, 3 feet to 6 feet 6 inches broad, and 5 feet to 7 feet 6 inches thick (Rob. i. 233, 282, 286, iii. 228). As is the case in numberless instances of Syrian buildings, either old or built of old materials, the edges and sometimes the faces of these stones are "beveled" in flat grooves. This is commonly supposed to indicate work at least as old as the Roman period (Rob. i. 261, 286, ii. 75, 76, 278, 353, iii. 52, 58, 84, 229, 461, 493, 511; Fergusson, *Hdbk. of Arch.* p. 288). On the contrary side, see *Col. Ch. Chron.* (1858), p. 350.

But the great size of these stones is far exceeded by some of those at Baalbek, three of which are

---

a 1. מַשְׂכֹּרֶת, שָׂכָר: μισθός: *merces.*

2. פְּעֻלָּה: μισθός: *opus:* wages for work done, from פָּעַל, "work" (Ges. p. 1117)

b 1. אֲשֻׁרָה: χορηγία: *muri:* only in Ezra v. 8.

2. (a) גָּדֵר: φραγμός: *macuria.* (b) גְּדֵר· φραγμός: *macuria.* (c) גְּדֵרָה: διάστημα, φραγμός: *spes*

3. חוֹמָה: τεῖχος: *murus.*

4. חֵיל: δύναμις: *virtus*: also προτείχισμα: *agger*

each about 63 feet long; and one, still lying in the quarry, measures 68 feet 4 inches in length, 17 feet 2 inches broad, and 14 feet 7 inches thick. Its weight can scarcely be less than 600 tons (Rob. iii. 505. 512; Volney, *Trav.* ii. 241).

2. A feature of some parts of Solomon's buildings, as described by Josephus, corresponds remarkably to the method adopted at Nineveh of encrusting or veneering a wall of brick or stone with slabs of a more costly material, as marble or alabaster (Joseph. *Ant.* viii. 5, § 2; Fergusson, *Hdbk.* 202, 203).

3. Another use of walls in Palestine is to support mountain roads or terraces formed on the sides of hills for purposes of cultivation (Rob. ii. 493, iii. 14, 45).

4. The "paths of the vineyards" (Num. xxii. 24) is illustrated by Robinson as a pathway through vineyards, with walls on each side (*Bibl. Res.* ii. 80; Stanley, *S. and P.* 102, 420; Lindsay, *Trav.* p. 239; Maundrell, *Early Trav.* p. 437). [WINDOW.]

H. W. P.

**WANDERING IN THE WILDERNESS.** [WILDERNESS OF WANDERING.]

**WAR.** The most important topic in connection with war is the formation of the army, which is destined to carry it on. This has been already described under the head of ARMY, and we shall therefore take up the subject from the point where that article leaves it. Before entering on a war of aggression the Hebrews sought for the Divine sanction by consulting either the Urim and Thummim (Judg. i. 1, xx. 27, 28; 1 Sam. xiv. 37, xxiii. 2, xxviii. 6, xxx. 8), or some acknowledged prophet (1 K. xxii. 6; 2 Chr. xviii. 5). The heathens betook themselves to various kinds of divination for the same purpose (Ez. xxi. 21). Divine aid was further sought in actual warfare by bringing into the field the Ark of the Covenant, which was the symbol of Jehovah Himself (1 Sam. iv. 4–18, xiv. 18), a custom which prevailed certainly down to David's time (2 Sam. xi. 11; comp. Ps. lxviii. 1, 24). During the wanderings in the wilderness the signal for warlike preparations was sounded by priests with the silver trumpets of the sanctuary (Num. x. 9, xxxi. 6). Formal proclamations of war were not interchanged between the belligerents; but occasionally messages either deprecatory or defiant were sent, as in the cases of Jephthah and the Ammonites (Judg. xi. 12–27), Ben-hadad and Ahab (1 K. xx. 2), and again Amaziah and Jehoash (2 K. xiv. 8). Before entering the enemy's district spies were sent to ascertain the character of the country and the preparations of its inhabitants for resistance (Num. xiii. 17; Josh. ii. 1; Judg. vii. 10; 1 Sam. xxvi. 4). When an engagement was imminent a sacrifice was offered (1 Sam. vii 9, xiii. 9), and an inspiriting address delivered either by the commander (2 Chr. xx. 20) or by a priest (Deut. xx. 2). Then followed the battle signal, sounded forth from the silver trumpets as already described, to which the host responded by shouting the war-cry (1 Sam. xvii. 52; Is. xlii. 13; Jer. l. 42; Ez. xx. 22; Am. i. 14). The combat assumed the form of a number of hand-to-hand contests, depending on the qualities of the individual soldier rather than on the disposition of masses. Hence the high value attached to fleetness of foot and strength of arm (2 Sam. i. 23, ii. 18; 1 Chr. xii. 8). At the same time various strategic devices were practiced, such as the ambuscade (Josh. viii. 2, 12; Judg. xx. 36), surprise (Judg. vii. 16), or circumvention (2 Sam. v. 23) Another mode of settling the dispute was by the selection of champions (1 Sam. xvii.; 2 Sam. ii. 14), who were spurred on to exertion by the offer of high reward (1 Sam. xvii. 25, xviii. 25; 2 Sam. xviii. 11; 2 Chr. xi. 6). The contest having been decided, the conquerors were recalled from the pursuit by the sound of a trumpet (2 Sam. ii. 28, xviii. 16, xx. 22).

The siege of a town or fortress was conducted in the following manner: A line of circumvallation [a] was drawn round the place (Ex. iv. 2; Mic. v. 1), constructed out of the trees found in the neighborhood (Deut. xx. 20), together with earth and any other materials at hand. This line not only cut off the besieged from the surrounding country, but also served as a base of operations for the besiegers. The next step was to throw out from this line one or more "mounts" or "banks" [b] in the direction of the city (2 Sam. xx. 15; 2 K. xix. 32; Is. xxxvii. 33), which was gradually increased in height until it was about half as high as the city wall. On this mound or bank towers [c] were erected (2 K. xxv. 1; Jer. lii. 4; Ez. iv. 2, xvii. 17, xxi. 22, xxvi. 8), whence the slingers and archers might attack with effect. Battering-rams [d] (Ez. iv. 2, xxi. 22) were brought up to the walls by means of the bank, and scaling-ladders might also be placed on it. Undermining the walls, though practiced by the Assyrians (Layard, *Nin.* ii. 371), is not noticed in the Bible; the reference to it in the LXX. and Vulg., in Jer. li. 58, is not warranted by the original text. Sometimes, however, the walls were attacked near the foundation, either by individual warriors who protected themselves from above by their shields (Ez. xxvi. 8), or by the further use of such a machine as the *Helepolis*,[e] referred to in 1 Macc. xiii. 43. Burning the gates was another mode of obtaining ingress (Judg. ix. 52). The water-supply would naturally be cut off, if it were

---

[a] מָצוֹר, lit. an "enclosing" or "besieging," and hence applied to the wall by which the siege was effected.

[b] סֹלְלָה. Prætschütz (*Archäol.* ii. 504) understands this term of the scaling-ladder, comparing the cognate *sullâm* (Gen. xxviii 12), and giving the verb *shâphac*, which accompanies *sollâh*, the sense of a "hurried advancing" of the ladder.

[c] דָּיֵק. Some doubt exists as to the meaning of this term. The sense of "turrets" assigned to it by Josephus (*Tres.* p. 330) has been objected to on the ground that the word always appears in the singular number, and in connection with the expression "round about" the city. Hence the sense of "circumvallation" has been assigned to it by Michaelis, Kali (*Archäol.* ii. 303), and others. It is difficult, however, in this case, to see any distinction between the terms *dâyêk* and *mâtsôr*. The expression "round about" may refer to the custom of casting up banks at different points; the use of the singular in a collective sense forms a greater difficulty.

[d] כָּרִים.

[e] This is described by Ammianus Marcellinus (xxiii 4, § 10) as a combination of the *testudo* and the battering-ram, by means of which the besiegers broke through the lower part of the wall, and thus "leaped into the city," not from above, as the words *prima facie* imply, but from below.

Digitized by Google

possible (Jud. viii. 7). The besieged, meanwhile, strengthened and repaired their fortifications (Is. xxii. 10), and repelled the enemy from the wall by missiles (2 Sam. xi. 24), by throwing over beams and heavy stones (Judg. ix. 53; 2 Sam. xi. 21; Joseph. *B. J.* v. 3, § 3, 6, § 3), by pouring down boiling oil (*B. J.* iii. 7, § 28), or lastly by erecting fixed engines for the propulsion of stones and arrows (2 Chr. xxvi. 15). [ENGINE.] Sallies were also made for the purpose of burning the besiegers' works (1 Macc. vi. 31; *B. J.* v. 11, § 4), and driving them away from the neighborhood. The foregoing operations receive a large amount of illustration from the representations of such scenes on the Assyrian slabs. We there see the "bank" thrown up in the form of an inclined plane, with the battering-ram hauled up on it assaulting the walls; movable towers of considerable elevation brought up, whence the warriors discharge their arrows into the city; the walls undermined, or attempts made to destroy them by picking to pieces the lower courses; the defenders actively engaged in archery, and averting the force of the battering-ram by chains and ropes; the scaling-ladders at length brought, and the conflict become hand-to-hand (Layard's *Nin.* ii. 366–374).

The treatment of the conquered was extremely severe in ancient times. The leaders of the host were put to death (Josh. x. 26; Judg. vii. 25), with the occasional indignity of decapitation after death (1 Sam. xvii. 51; 2 Macc. xv. 30; Joseph. *B. J.* i. 17, § 2). The bodies of the soldiers killed in action were plundered (1 Sam. xxxi. 8; 2 Macc. iii. 27); the survivors were either killed in some savage manner (Judg. ix. 45; 2 Sam. xii. 31; 2 Chr. xxv. 12), mutilated (Judg. i. 6; 1 Sam. xi. 2), or carried into captivity (Num. xxxi. 26; Deut. xx. 14). Women and children were occasionally put to death with the greatest barbarity (2 K. viii. 12, xv. 16; Is. xiii. 16, 18; Hos. x. 14, xiii. 16; Am. i. 13; Nah. iii. 10; 2 Macc. v. 13): but it was more usual to retain the maidens as concubines or servants (Judg. v. 30; 2 K. v. 2). Sometimes the bulk of the population of the conquered country was removed to a distant locality, as in the case of the Israelites when subdued by the Assyrians (2 K. xvii. 6), and of the Jews by the Babylonians (2 K. xxiv. 14, xxv. 11). In addition to these measures, the towns were destroyed (Judg. ix. 45; 2 K. iii. 25; 1 Macc. v. 28, 51, x. 84), the idols and shrines were carried off (Is. xlvi. 1, 2), or destroyed (1 Macc. v. 68, x. 84); the fruit-trees were cut down, and the fields spoiled by overspreading them with stones (2 K. iii. 19, 25); and the horses were lamed (2 Sam. viii. 4; Josh. xi. 6, 9). If the war was carried on simply for the purpose of plunder or supremacy, these extreme measures would hardly be carried into execution; the conqueror would restrict himself to rifling the treasuries (1 K. xiv. 26; 2 K. xiv. 14, xxiv. 13), or levying contributions (2 K. xviii. 14).

The Mosaic Law mitigated to a certain extent the severity of the ancient usages towards the conquered. With the exception of the Canaanites, who were delivered over to the ban of extermination by the express command of God, it was forbidden to the Israelites to put to death any others than males bearing arms: the women and children were to be kept alive (Deut. xx. 13, 14). In a similar spirit of humanity the Jews were prohibited from felling fruit-trees for the purpose of making siege-works (Deut. xx. 19). The Law further restricted the power of the conqueror over females, and secured to them humane treatment (Deut. xxi. 10–14). The majority of the savage acts recorded as having been practiced by the Jews were either in retaliation for some gross provocation, as instanced in the cases of Adoni-bezek (Judg. i. 6, 7), and of David's treatment of the Ammonites (2 Sam. x. 2–4, xii. 31; 1 Chr. xx. 3); or else they were done by lawless usurpers, as in Menahem's treatment of the women of Tiphsah (2 K. xv. 16). The Jewish kings generally appear to have obtained credit for clemency (1 K. xx. 31).

The conquerors celebrated their success by the erection of monumental stones (1 Sam. vii. 12; 2 Sam. viii. 13, where, instead of "gat him a name," we should read "*set up a memorial*"), by hanging up trophies in their public buildings (1 Sam. xxi. 9, xxxi. 10; 2 K. xi. 10), and by triumphal songs and dances, in which the whole population took part (Ex. xv. 1–21; Judg. v.; 1 Sam. xviii. 6–8; 2 Sam. xxii.; Jud. xvi. 2–17; 1 Macc. iv. 24). The death of a hero was commemorated by a dirge (2 Sam. i. 17–27; 2 Chr. xxxv. 25), or by a national mourning (2 Sam. iii. 31). The fallen warriors were duly buried (1 K. xi. 15), their arms being deposited in the grave beside them (Ez. xxxii. 27), while the enemies' corpses were exposed to the beasts of prey (1 Sam. xvii. 44; Jer. xxv. 33). The Israelites were directed to undergo the purification imposed on those who had touched a corpse, before they entered the precincts of the camp or the sanctuary (Num. xxxi. 19). The disposal of the spoil has already been described under BOOTY. W. L. B.

* **WARDROBE**, 2 K. xxii. 14, where, as rendered in the margin, the Hebrew signifies "garments." The vestments of the priests are probably meant, said there to have been under the care of SHALLUM. The same notice occurs in 2 Chr. xxxiv. 22. [See VESTRY, Amer. ed.] H.

* **WARES.** [COMMERCE; MERCHANT.]

**WASHING THE HANDS AND FEET.** The particular attention paid by the Jews to the cleansing of the hands and feet, as compared with other parts of the body, originated in the social usages of the East. As knives and forks were dispensed with in eating, it was absolutely necessary that the hand, which was thrust into the common dish, should be scrupulously clean; and again, as sandals were ineffectual against the dust and heat of an eastern climate, washing the feet on entering a house was an act both of respect to the company and of refreshment to the traveller. The former of these usages was transformed by the Pharisees of the New Testament age into a matter of ritual observance (Mark vii. 3), and special rules were laid down as to the times and manner of its performance. The neglect of these rules by our Lord and his disciples drew down upon Him the hostility of that sect (Matt. xv. 2; Luke xi. 38). Whether the expression πυγμῇ used by St. Mark has reference to any special regulation may perhaps be doubtful; the senses "oft" (A. V.), and "diligently" (Alford), have been assigned to it, but it may possibly signify "with the fist," as though it were necessary to close the one hand, which had already been cleansed, before it was applied to the unclean one. This sense appears preferable to the other interpretations of a similar character, such as "up to the wrist" (Lightfoot); "up to the elbow" (Theophylact); "having closed

Digitized by Google

the hand" which is undergoing the washing (Grot.; Scalig.). The Pharisaical regulations on this subject are embodied in a treatise of the Mishnah, entitled *Yadaim*, from which it appears that the ablution was confined to the hand (2, § 3), and that great care was needed to secure perfect purity in the water used. The ordinary, as distinct from the ceremonial, washing of hands before meals is still universally prevalent in eastern countries (Lane, i. 190; Burckhardt's *Notes*, i. 63).

Washing the feet did not rise to the dignity of a ritual observance, except in connection with the services of the sanctuary (Ex. xxx. 19, 21). It held a high place, however, among the rites of hospitality. Immediately that a guest presented himself at the tent-door, it was usual to offer the necessary materials for washing the feet (Gen. xviii. 4, xix. 2, xxiv. 32, xliii. 24; Judg. xix. 21; comp. Hom. *Od.* iv. 49). It was a yet more complimentary act, betokening equally humility and affection, if the host actually performed the office for his guest (1 Sam. xxv. 41; Luke vii. 38, 44; John xiii. 5–14; 1 Tim. v. 10). Such a token of hospitality is still occasionally exhibited in the East, either by the host, or by his deputy (Robinson's *Bib. Res.* ii. 229; Jowett's *Res.* pp. 78, 79). The feet were again washed before retiring to bed (Cant v. 3). A symbolical significance is attached in John xiii. 10 to washing the feet as compared with bathing the whole body, the former being partial (νίπτω), the latter complete (λούω), the former oft-repeated in the course of the day, the latter done once for all; whence they are adduced to illustrate the distinction between occasional sin and a general state of sinfulness. After being washed, the feet were on festive occasions anointed (Luke vii. 38; John xii. 3). The indignity attached to the act of washing another's feet, appears to have been extended to the vessel used (Ps. lx. 8).

W. L. B.

* **WASHPOT.** [See the article above.]

**WATCHES OF NIGHT** (אַשְׁמֹרֶת: φυλακή). The Jews, like the Greeks and Romans, divided the night into military watches instead of hours, each watch representing the period for which sentinels or pickets remained on duty. The proper Jewish reckoning recognized only three such watches, entitled the first or "beginning of the watches"[a] (Lam. ii. 19), the middle watch[b] (Judg. vii. 19), and the morning watch[c] (Ex. xiv. 24; 1 Sam. xi. 11). These would last respectively from sunset to 10 P. M.; from 10 P. M. to 2 A. M.; and from 2 A. M to sunrise. It has been contended by Lightfoot (*Hor. Heb.* in Matt. xiv. 25) that the Jews really reckoned four watches, three only of which were in the dead of the night, the fourth being in the morning. This, however, is rendered improbable by the use of the term "middle," and is opposed to Rabbinical authority (Mishnah, *Berach.* c. 1, § 1; Kimchi, on Ps. lxiii. 7; Rashi, on Judg. vii. 19). Subsequently to the establishment of the Roman supremacy, the number of watches was increased to four, which were described either according to their numerical order, as in the case of the "fourth watch" (Matt. xiv. 25; comp. Joseph. *Ant.* v. 6, § 5), or by the terms "even, midnight, cock-crowing, and morning" (Mark xiii. 35). These terminated respectively at 9 P. M., midnight, 3 A. M., and 6 A. M. Conformably to this, the guard of soldiers was divided into four relays (Acts xii. 4), showing that the Roman régime was followed in Herod's army. Watchmen appear to have patrolled the streets of the Jewish towns (Cant. iii. 3, v. 7; Ps. cxxvii. 1,[d] where for "waketh" we should substitute "watcheth;" Ps. cxxx. 6).

W. L. B.

* **WATCHMAN.** [WATCHES OF NIGHT.]

**WATER OF JEALOUSY** (Num. v 11–31), מֵי הַמָּרִים, "waters of bitterness," sometimes with הַמְאָרְרִים added, as "causing a curse" (אָלָה, ὕδωρ τοῦ ἐλεγμοῦ; Philo, ii. 310, πότος ἐλέγχου). The ritual prescribed consisted in the husband's bringing the woman before the priest, and the essential part of it is unquestionably the oath, to which the "water" was subsidiary, symbolical, and ministerial. With her he was to bring the tenth part of an ephah of barley-meal as an offering. Perhaps the whole is to be regarded from a judicial point of view, and this "offering" in the light of a court-fee.[e] God himself was suddenly invoked to judge, and his presence recognized by throwing a handful of the barley-meal on the blazing altar in the course of the rite. In the first instance, however, the priest "set her before the Lord" with the offering in her hand. The Mishnah (*Sotah*) prescribes that she be clothed in black with a rope girdle around her waist; and from the direction that the priest "shall uncover her head" (ver. 18), it would seem she came in veiled, probably also in black. As she stood holding the offering, so the priest stood holding an earthen vessel of holy water[f] mixed with the dust from the floor of the sanctuary, and declaring her free from all evil consequences if innocent, solemnly devoted her in the name of Jehovah to be "a curse and an oath among her people," if guilty, further describing the exact consequences ascribed to the operation of the water in the "members" which she had "yielded as servants to uncleanness"[g] (vv. 21, 22, 27; comp. Rom. vi. 19 and Theodoret, *Quæst.* x. *in Num.*). He then

[a] רֹאשׁ אַשְׁמֹרוֹת.

[b] אַשְׁמֹרֶת הַתִּיכוֹנָה

[c] אַשְׁמֹרֶת הַבֹּקֶר. [d] שִׁקַּד.

[e] Yet being an offering to "bring iniquity to remembrance" (ver. 15), it is ceremonially rated as a "sin offering;" hence no oil is to be mixed with the meal before burning it, nor any frankincense to be placed upon it when burnt, which same rule was applied to "sin offerings" generally (Lev. v. 11). With meat offerings, on the contrary, the mixture of oil and the imposition of frankincense were prescribed (ii. 1, 6, 7, 14, 15).

[f] Probably not the "water of separation" for purification, mixed with the ashes of the red heifer, for as its ceremonial property was to defile the pure and to purify the unclean (Num. xix. 21) who touched it, it could hardly be used in a rite the object of which was to establish the innocence of the upright or discover the guilt of the sinner, without the symbolism jarring. Perhaps water from the laver of the sanctuary is intended.

[g] The words נָפַל, לִנְפִּיל, נֹפֶלֶת, rendered in the A. V. by the word "rot," rather indicate, according to Gesen. s. v. נָפַל, to "become or make lean." Michaelis thought ovarian dropsy was intended by the symptoms. Josephus says, τοῦ τε σπεί-

Digitized by Google

"wrote these curses in a book, and blotted them out with the bitter water," and, having thrown, probably at this stage of the proceedings, the handful of meal on the altar, "caused the woman to drink" the potion thus drugged, she moreover answering to the words of his imprecation, "Amen, Amen." Josephus adds, if the suspicion was unfounded, she obtained conception; if true, she died infamously. This accords with the sacred text, if she "be clean, then shall she be free and *shall conceive seed*" (ver. 28), words which seem to mean that when restored to her husband's affection she should be blessed with fruitfulness; or, that if conception had taken place *before* her appearance, it would have its proper issue in child-bearing, which, if she had been unfaithful, would be intercepted by the operation of the curse. It may be supposed that a husband would not be forward to publish his suspicions of his own injury, unless there were symptoms of apparent conception,[a] and a risk of a child by another being presented to him as his own. In this case the woman's natural apprehensions regarding her own gestation would operate very strongly to make her shrink from the potion, if guilty. For plainly, the effect of such a ceremonial on the nervous system of one so circumstanced, might easily go far to imperil her life, even without the precise symptoms ascribed to the water. Meanwhile the rule would operate beneficially for the woman, if innocent, who would be during this interval under the protection of the court to which the husband had himself appealed, and so far secure against any violent consequence of his jealousy, which had thus found a vent recognized by law. Further, by thus interposing a period of probation the fierceness of conjugal jealousy might cool. On comparing this argument with the further restrictions laid down in the treatise *Sotah* tending to limit the application of this rite, there seems grave reason to doubt whether recourse was ever had to it in fact. [ADULTERY.] The custom of writing on a parchment words cabalistic or medical relating to a particular case, and then washing them off, and giving the patient the water of this ablution to drink, has descended among oriental superstitions to the present day, and a sick Arab would probably think this the most natural way of "taking" a prescription. See, on the general subject, Groddeck *de vett. Hebr. purgat. castitatis* in Ugol. *Thesaur.* (Winer). The custom of such an ordeal was probably traditional in Moses' time, and by fencing it round with the wholesome awe inspired by the solemnity of the prescribed ritual, the lawgiver would deprive it to a great extent of its barbarous tendency, and would probably restrain the husband from some of the ferocious extremities to which he might otherwise be driven by a sudden fit of jealousy, so powerful in the oriental mind. On the whole it is to be taken, like the permission of divorce by a written instrument, rather as the mitigation of a custom ordinarily harsh, and as a barrier placed in the way of uncalculating vindictiveness. Viewing the regulations concerning matrimony as a whole, we shall find the same principle animating them in all their parts — that of providing a legal channel for the course of natural feelings where irresistible, but at the same time of surrounding their outlet with institutions apt to mitigate their intensity, and so assisting the gradual formation of a gentler temper in the bosom of the nation. The precept was given "because of the hardness of their hearts," but with the design and the tendency of softening them. (See some remarks in Spencer, *de Leg. Hebr.*) H. H.

**WATER OF SEPARATION.** [PURIFICATION.]

* **WATERCOURSE.** [CONDUIT.]

* **WATERING WITH THE FOOT.** [GARDEN; FOOT, WATERING WITH THE.]

* **WATER-SPOUT.** [GUTTER, Amer. ed.]

**WAVE-OFFERING** (תְּנוּפָה, "a waving," from נוּף, "to wave," הַתְנוֹפָה לִפְנֵי יְהוָה, "a waving before Jehovah"). This rite, together with that of "heaving" or "raising" the offering, was an inseparable accompaniment of peace-offerings. In such the right shoulder, considered the choicest part of the victim, was to be "heaved," and viewed as holy to the Lord, only eaten therefore by the priest; the breast was to be "waved," and eaten by the worshipper. On the second day of the Passover a sheaf of corn, in the green ear, was to be waved, accompanied by the sacrifice of an unblemished lamb of the first year, from the performance of which ceremony the days till Pentecost were to be counted. When the feast arrived, two loaves, the first-fruits of the ripe corn, were to be offered with a burnt-offering, a sin-offering, and two lambs of the first year for a peace-offering. These likewise were to be waved.

The Scriptural notices of these rites are to be found in Ex. xxix. 24, 27; Lev. vii. 30, 34, viii. 27, ix. 21, x. 14, 15, xxiii. 10, 15, 20; Num. vi. 20, xviii. 11, 18, 26–29, etc.

We find also the word תְּנוּפָה applied in Ex. xxxviii. 24 to the gold offered by the people for the furniture of the sanctuary. It is there called זְהַב הַתְּנוּפָה. It may have been waved when presented, but it seems not impossible that תְּנוּפָה had acquired a secondary sense so as to denote "free-will offering." In either case we must suppose the ceremony of waving to have been known to and practiced by the Israelites before the giving of the Law.

---

*ἀτενόντος αὐτῇ, καὶ τὴν κοιλίαν ὕδρωπα καταλαμβάνουσι* (*Ant.* iii. 11, § 6).

[a] This is somewhat supported by the rendering in the A. V. of the words וְנִקָּתָה לֹא תִנָּקֶה, v. 28, by "neither she be taken *with the manner*," the italicised words being added as explanatory, without any to correspond in the original, and pointing to the sudden cessation of the manner" or "custom of women" (Gen. xviii. 11, xxxi. 35), *i. e.* the menstrual flux, suggesting, in the case of a woman not past the age of child-bearing, that conception had taken place. If this be the sense of the original, the suspicions of the husband would be so far based upon a fact. It seems, however, also possible that the words may be an extension of the sense of those immediately preceding, וְעֵד אֵין בָּהּ, when the connected tenor would be, "and there be no witness against her, and she be not taken," *i. e.* taken in the fact: comp. John viii. 4, *αὕτη ἡ γυνὴ κατειλήφθη ἐπαυτοφώρῳ μοιχευομένη.*

Digitized by Google

It seems not quite certain from Ex. xxix 26. 27, whether the waving was performed by the priest or by the worshipper with the former's assistance. The Rabbinical tradition represents it as done by the worshipper, the priest supporting his hands from below.

In conjecturing the meaning of this rite, regard must be had, in the first instance, to the kind of sacrifice to which it belonged. It was the accompaniment of peace-offerings. These not only, like the other sacrifices, acknowledged God's greatness and his right over the creature, but they witnessed to a ratified covenant, an established communion between God and man. While the sin-offering merely removed defilement, while the burnt-offering gave entirely over to God of his own, the victim being wholly consumed, the peace-offering, as establishing relations between God and the worshipper, was participated in by the latter, who ate, as we have seen, of the breast that was waved. The Rabbis explain the heaving of the shoulder as an acknowledgment that God has his throne in the heaven, the waving of the breast that He is present in every quarter of the earth. The one rite testified to his eternal majesty on high, the other to his being among and with his people.

It is not said in Lev. xxiii. 10–14, that a peace-offering accompanied the wave-sheaf of the Passover. On the contrary, the only bloody sacrifice mentioned in connection with it is styled a burnt-offering. When, however, we consider that everywhere else the rite of waving belongs to a peace-offering, and that besides a sin and a burnt offering, there was one in connection with the wave-loaves of Pentecost (Lev. xxiii. 19), we shall be wary of concluding that there was none in the present case. The significance of these rites seems considerable. The name of the month Abib, in which the Passover was kept, means the month of the green ear of corn, the month in which the great produce of the earth has come to the birth. In that month the nation of Israel came to the birth; each succeeding Passover was the keeping of the nation's birthday. Beautifully and naturally, therefore, were the two births — that of the people into national life; that of their needful sustenance into yearly life — combined in the Passover. All first-fruits were holy to God: the first-born of men, the first-produce of the earth. Both principles were recognised in the Passover. When six weeks after, the harvest had ripened, the first-fruits of its matured produce were similarly to be dedicated to God. Both were waved, the rite which attested the Divine presence and working all around us being surely most appropriate and significant in their case. F. G.

**WAY.** This word has now in ordinary parlance so entirely forsaken its original sense (except in combination, as in "highway," "causeway") and is so uniformly employed in the secondary or metaphorical sense of a "custom" or "manner," that it is difficult to remember that in the Bible it most frequently signifies an actual road or track. Our translators have employed it as the equivalent of no less than eighteen distinct Hebrew terms. Of these, several had the same secondary sense which the word "way" has with us. Two others (אֹרַח and מְסִלָּה) are employed only by the poets, and are commonly rendered "path" in the A. V. But the term which most frequently occurs, and in the majority of cases signifies (though it also is now and then used metaphorically) an actual road, is דֶּרֶךְ, *derec*, connected with the German *treten* and the English "tread." It may be truly said that there is hardly a single passage in which this word occurs which would not be made clearer and more real if "road to" were substituted for "way of." Thus Gen. xvi. 7, "the spring on the road to Shur;" Num. xiv. 25, "the road to the Red Sea;" 1 Sam. vi. 12, "the road to Bethshemesh:" Judg. ix. 37, "the road to the oak [a] of Meonenim:" 2 K. xi. 19, "the road to the gate." It turns that which is a mere general expression into a substantial reality. And so in like manner with the word ὁδός in the New Testament, which is almost invariably translated "way." Mark x. 32, "They were on the road going up to Jerusalem;" Matt. xx. 17, "and Jesus took the twelve disciples apart in the road" — out of the crowd of pilgrims who, like themselves, were bound for the Passover.

There is one use of both *derec* and ὁδός which must not be passed over, namely, in the sense of a religious course. In the Old Test. this occurs but rarely, perhaps twice: namely in Amos viii. 14. "the manner of Beersheba," where the prophet is probably alluding to some idolatrous rites then practiced there; and again in Ps. cxxxix. 24, "look if there be any evil way," any idolatrous practices, "in me, and lead me in the everlasting way." But in the Acts of the Apostles ὁδός, "the way," "the road," is the received, almost technical, term for the new religion which Paul first resisted and afterwards supported. See Acts ix. 2, xix. 9, 23, xxii. 4, xxiv. 14, 22. In each of these the word "that" is an interpolation of our translators, and should have been put into Italics, as it is in xxiv. 22.

The religion of Islam is spoken of in the Koran as "the path (*et tarik*, iv. 66), and "the right path" (i. 5; iv. 174). Gesenius (*Thes.* p. 353) has collected examples of the same expression in other languages and religions. G.

* **WEALTH** is used in the A. V. in some passages (Ezr. ix. 12; Esth. x. 3; 1 Cor. x. 24) in its old sense of "weal" or "welfare." A.

* **WEALTHY** is used in the A. V., Jer. xlix. 31, in the sense of "prosperous," "at ease"; and in Ps. lxvi. 12 it has a similar meaning. [WEALTH.] A.

**WEANING.** [ABRAHAM; BANQUET, CHILD.]

**WEAPONS.** [ARMS.]

**WEASEL** (חֹלֶד, *chôled*: γαλῆ: *mustela*) occurs only in Lev. xi. 29, in the list of unclean animals. According to the old versions and the Talmud, the Heb. *chôled* denotes "a weasel" (see Lewysohn, *Zool. des Talm.* p. 91, and Buxtorf, *Lex. v. Rab. et Talm.* p. 756); but if the word is identical with the Arabic *chuld* (خُلْد) and the Syriac *chuldo* (ܚܘܠܕܐ), as Bochart (*Hieroz.* ii. 435) and others have endeavored to show, there is no doubt that "a mole" is the animal indicated. Gesenius (*Thes.* p. 474), however, has the following very true observation: "Satis constat animalium nomina persepe in hac lingua hoc, in alia cognata

[a] This is more obscure in the A. V. even than the others: "Come along by the plain of Meonenim."

Digitized by Google

aliud, id vero simile, animal significare." He prefers to render the term by "Weasel."

Moles are common enough in Palestine; Hasselquist (*Trav.* p. 120), speaking of the country between Jaffa and Rana, says he had never seen in any place the ground so cast up by moles as in these plains. There was scarce a yard's length between each mole-hill. It is not improbable that both the *Talpa europæa* and the *T. cæca*, the blind mole of which Aristotle speaks (*Hist. Anim.* i. 8, § 3), occur in Palestine, though we have no definite information on this point. The family of *Mustelidæ* also is doubtless well represented. Perhaps it is better to give to the Heb. term the same signification which the cognate Arabic and Syriac have, and understand a "mole" to be denoted by it. [MOLE.] W. H.

**WEAVING** (אָרַב). The art of weaving appears to be coeval with the first dawning of civilization. In what country, or by whom it was invented, we know not; but we find it practiced with great skill by the Egyptians at a very early period, and hence the invention was not unnaturally attributed to them (Plin. vii. 57). The "vestures of fine linen" such as Joseph wore (Gen. xli. 42), were the product of Egyptian looms, and their quality, as attested by existing specimens, is pronounced to be not inferior to the finest cambric of modern times (Wilkinson, ii. 75) The Israelites were probably acquainted with the process before their sojourn in Egypt; but it was undoubtedly there that they attained the proficiency which enabled them to execute the hangings of the Tabernacle (Ex. xxxv. 35; 1 Chr. iv. 21), and other artistic textures. At a later period the Egyptians were still famed for their manufactures of "fine" (*i. e.* hackled) flax and of *chóri*,[a] rendered in the A. V. "networks," but more probably a *white* material either of linen or cotton (Is. xix. 9). From them the Tyrians procured the "fine linen with broidered work" for the sails of their vessels (Ez. xxvii. 7), the handsome character of which may be inferred from the representations of similar sails in the Egyptian paintings (Wilkinson, ii. 131, 167). Weaving was carried on in Egypt, generally, but not universally, by men (Herod. ii. 35; comp. Wilkinson, ii. 84). This was the case also among the Jews about the time of the Exodus (1 Chr. iv. 21), but in later times it usually fell to the lot of the females to supply the household with clothing (1 Sam. ii. 19; 2 K. xxiii. 7), and an industrious housewife would produce a surplus for sale to others (Prov. xxxi. 13, 19, 24).

The character of the loom and the process of weaving can only be inferred from incidental notices. The Egyptian loom was usually upright, and the weaver stood at his work. The cloth was fixed sometimes at the top, sometimes at the bottom, so that the remark of Herodotus (ii. 35), that the Egyptians, contrary to the usual practice, pressed the woof downwards, must be received with reservation (Wilkinson, ii. 85). That a similar variety of usage prevailed among the Jews, may be inferred from the remark of St. John (xix. 23), that the seamless coat was woven "from the top" (ἐκ τῶν ἄνωθεν). Tunics of this kind were designated by the Roman *recta*, implying that they were made at an upright loom at which the weaver stood to his work, thrusting the woof upwards (Plin. viii. 74). The modern Arabs use a procumbent loom raised above the ground by short legs (Burckhardt's *Notes*, i. 67). The Bible does not notice the loom itself, but speaks of the beam[b] to which the warp was attached (1 Sam. xvii. 7; 2 Sam. xxi. 19); and of the pin[c] to which the cloth was fixed, and on which it was rolled (Judg. xvi. 14). We have also notice of the shuttle,[d] which is described by a term significant of the act of weaving (Job vii. 6), the thrum[e] or threads which attached the web to the beam (Is. xxxviii. 12, *margin*); and the web[f] itself (Judg. xvi. 14; A. V. "beam"). Whether the two terms in Lev. xiii. 48, rendered "warp"[g] and "woof,"[g] really mean these, admits of doubt, inasmuch as it is not easy to see how the one could be affected with leprosy without the other: perhaps the terms refer to certain kinds of texture (Knobel, *in loc.*). The shuttle is occasionally dispensed with, the woof being passed through with the hand (Robinson's *Bibl. Res.* i. 169). The speed with which the weaver used his shuttle, and the decisive manner in which he separated the web from the thrum when his work was done, supplied vivid images, the former of the speedy passage of life (Job vii. 6), the latter of sudden death (Is. xxxviii. 12).

The textures produced by the Jewish weavers were very various. The coarser kinds, such as tent-cloth, sackcloth, and the "hairy garments" of the poor were made of goat's or camel's hair (Ex. xxvi. 7; Matt. iii. 4). Wool was extensively used for ordinary clothing (Lev. xiii. 47; Prov. xxvii. 26, xxxi. 13; Ez. xxvii. 18), while for finer work flax was used, varying in quality, and producing the different textures described in the Bible as "linen" and "fine linen." The mixture of wool and flax in cloth intended for a garment was interdicted (Lev. xix. 19; Deut. xxii. 11). With regard to the ornamental kinds of work, the terms *rikmah*, "needlework," and *ma'ásēh chóshēb*, "the work of the cunning workman," have been already discussed under the head of EMBROIDERER, to the effect that both kinds were produced in the loom, and that the distinction between them lay in the addition of a device or pattern in the latter, the *rikmah* consisting simply of a variegated stuff without a pattern. We may further notice the terms: (1.) *shábats*[h] and *tashbēts*[i] applied to the robes of the priest (Ex. xxviii. 4 39), and signifying *tesselated* (A. V. "broidered"), *i. e.* with depressions probably of a square shape worked in it, similar to the texture described by the Romans under the term *scutulatus* (Plin. viii. 73; Juv. ii. 97); this was produced in the loom, as it is expressly said to be the work of the weaver (Ex. xxxix. 27). (2.) *Moshzár*[k] (A. V. "twined"), applied to the fine linen out of which the curtains

of the Tabernacle and the sacerdotal vestments were made (Ex xxvi. 1, xxviii. 6, etc); in this texture each thread consisted of several finer threads twisted together, as is described to have been the case with the famed corselet of Amasis (Herod. iii. 47). (3.) *Mishbetsôth zâhâb* [a] (A. V. "of wrought gold"), textures in which gold thread was interwoven (Ps. xlv. 13). The Babylonians were particularly skillful in this branch of weaving, and embroidered groups of men or animals on the robes (Plin. viii. 74; Layard, *Nin.* ii. 413); the "goodly Babylonish garment" secreted by Achan was probably of this character (Josh. vii. 21). The sacerdotal vestments are said to have been woven in one piece without the intervention of any needlework to join the seams (Joseph. *Ant.* iii. 7, § 4). The "coat without seam" (χιτὼν ἄῤῥαφος), worn by Jesus at the time of his crucifixion (John xix. 23), was probably of a sacerdotal character in this respect, but made of a less costly material (Carpzov, *Appar.* p. 72). * WEB. [WEAVING]

* WEDDING. This topic has been exhaustively treated under the head of MARRIAGE (iii. 1793–1807), to which the reader is referred. In this relation, the Canticles may be entitled to special recognition, as a sacred book portraying, according to almost every theory of its interpretation, the sacredness of wedded love — there being a general agreement that its two principal personages were wedded, or solemnly betrothed, and that the theme of the song is chaste, connubial love. This view is fatal to the hypothesis advanced in a preceding article [SHULAMITE, iv. p. 3021], that "the object of Solomon's passion" was a lovely Shunammite girl, who figured in the history of the royal family (1 K. i. 3, 4, ii. 17, 21), one of the court-beauties of his day. The conjecture is further discountenanced by the allusions (Cant. iii. 6, viii. 5) to the bridal procession and the bride coming up from "the wilderness" (וַמִּדְבָּר), the term by which the sacred writers generally designate the southern desert. It is still further discredited by her allusions to her foreign extraction; and the deprecatory appeal to the daughters of Jerusalem (Cant. i. 5, 6), quite out of place on the lips of a native Jewess, of the court circle, would well befit a dark-skinned daughter of Egypt, or of one of the desert tribes. S. W.

* WEDGE. [MINES, iii. 1939 *b*.]

WEEK (שָׁבוּעַ, or שָׁבֻעַ, from שָׁבַע, "seven," a heptad of anything, but particularly used for a period of seven days: ἑβδομάς: *septimana*). We have also, and much oftener, שִׁבְעָה, or שִׁבְעַת יָמִים.

Whatever controversies exist respecting the origin of the week, there can be none about the great antiquity, on particular occasions at least, among the Shemitic races, of measuring time by a period of seven days. This has been thought to be implied in the phrase respecting the sacrifices of Cain and Abel (Gen. iv. 3), "in process of time," literally "at the end of days." It is to be traced in the narrative of the subsidence of the Flood (Gen. viii. 10), "and he stayed yet other seven days;" and we find it recognized by the Syrian Laban (Gen. xxix. 27), "fulfill her week." It is needless to say that this division of time is a marked feature of the Mosaic Law, and one into which the whole year was parted, the Sabbath sufficiently showing that. The week of seven days was also made the key to a scale of seven, running through the Sabbatical years up to that of jubilee. [See SABBATH; SABBATICAL YEAR; and JUBILEE, YEAR OF.]

The origin of this division of time is a matter which has given birth to much speculation. Its antiquity is so great, its observance so wide-spread, and it occupies so important a place in sacred things, that it has been very generally thrown back as far as the creation of man, who on this supposition was told from the very first to divide his time on the model of the Creator's order of working and resting. The week and the Sabbath are, if this be so, as old as man himself; and we need not seek for reasons either in the human mind or the facts with which that mind comes in contact, for the adoption of such a division of time, since it is to be referred neither to man's thoughts nor to man's will. A purely theological ground is thus established for the week and for the sacredness of the number seven. They who embrace this view support it by a reference to the six days' creation and the Divine rest on the seventh, which they consider to have been made known to man from the very first, and by an appeal to the exceeding prevalence of the hebdomadal division of time from the earliest age — an argument the force of which is considered to be enhanced by the alleged absence of any natural ground for it.

To all this, however, it may be objected that we are quite in the dark as to when the record of the six days' creation was made known, that as human language is used and human apprehensions are addressed in that record, as the week being already known, the perfection of the Divine work and Sabbath may well have been set forth under the figure of one, the existing division of time moulding the document, instead of the document giving birth to the division; that old and wide-spread as is the recognition of that division, it is not universal; that the nations which knew not of it were too important to allow the argument from its prevalency to stand; and that so far from its being without ground in nature, it is the most obvious and convenient way of dividing the month. Each of these points must now be briefly considered: —

1st. That the week rests on a theological ground may be cheerfully acknowledged by both sides; but nothing is determined by such acknowledgment as to the original cause of adopting this division of time. The records of creation and the fourth commandment give no doubt the ultimate and therefore the deepest ground of the weekly division, but it does not therefore follow that it was not adopted for lower reasons before either was known. Whether the week gave its sacredness to the number seven, or whether the ascendency of that number helped to determine the dimensions of the week, it is impossible to say. The latter fact, the ancient ascendency of the number seven, might rest on divers grounds. The planets, according to the astronomy of those times, were seven in number; so are the notes of the diatonic scale so also many other things naturally attracting observation.

2d'y. The prevalence of the weekly division was

[a] מְשִׁבְצוֹת זָהָב

indeed very great, but a nearer approach to universality is required to render it an argument for the view in aid of which it is appealed to. It was adopted by all the Shemitic races, and, in the later period of their history at least, by the Egyptians. Across the Atlantic we find it, or a division all but identical with it, among the Peruvians. It also obtains now with the Hindoos, but its antiquity among them is matter of question. It is possible that it was introduced into India by the Arabs and Mohammedans. So in China we find it, but whether universally or only among the Buddhists admits of doubt. (See, for both, Priaulx's *Quæstiones Mosaicæ*, a work with many of the results of which we may be well expected to quarrel, but which deserves, in respect not only of curious learning, but of the vigorous and valuable thought with which it is impregnated, to be far more known than it is.) On the other hand, there is no reason for thinking the week known till a later period either to Greeks or Romans.

3dly. So far from the week being a division of time without ground in nature, there was much to recommend its adoption. Where the days were named from planetary deities, as among first the Assyrians and Chaldees, and then the Egyptians, there of course each period of seven days would constitute a whole, and that whole might come to be recognized by nations that disregarded or rejected the practice which had shaped and determined it. But further, the week is a most natural and nearly an exact quadripartition of the month, so that the quarters of the moon may easily have suggested it.

It is beside the purpose of this article to trace the hebdomadal division among other nations than the Hebrews. The week of the Bible is that with which we have to do. Even if it were proved that the planetary week of the Egyptians, as sketched by Dion Cassius (*Hist. Rom.* xxxvii. 18), existed at or before the time of the Exodus, the children of Israel did not copy that. Their week was simply determined by the Sabbath; and there is no evidence of any other day, with them, having either had a name assigned to it, or any particular associations bound up with it. The days seemed to have been distinguished merely by the ordinal numerals, counted from the Sabbath. We shall have indeed to return to the Egyptian planetary week at a later stage of our inquiry, but our first and main business, as we have already said, is with the week of the Bible.

We have seen in Gen. xxix. 27, that it was known to the ancient Syrians, and the injunction to Jacob, "fulfill her week," indicates that it was in use as a fixed term for great festive celebrations. The most probable exposition of the passage is, that Laban tells Jacob to fulfill Leah's *week*, the proper period of the nuptial festivities in connection with his marriage to her, and then he may have Rachel also (comp. Judg. xiv.). And so too for funeral observance, as in the case of the obsequies of Jacob, Joseph "made a mourning for his father seven days" (Gen. l. 10). But neither of these instances, any more than Noah's procedure in the ark, go further than showing the custom of observing a term of seven days for any observance of importance. They do not prove that the whole year, or the whole month, was thus divided at all times, and without regard to remarkable events.

In Exodus of course the week comes into very distinct manifestation. Two of the great feasts — the Passover and the Feast of Tabernacles — are prolonged for seven days after that of their initiation (Exod. xii. 15–20, etc.), a custom which remains in the Christian Church, in the rituals of which the remembrances and topics of the great festivals are prolonged till what is technically called the *octave*. Although the Feast of Pentecost lasted but one day, yet the time for its observance was to be counted by weeks from the Passover, whence one of its titles, "the Feast of Weeks."

The division by seven was, as we have seen expanded so as to make the seventh month and the seventh year Sabbatical. To whatever extent the laws enforcing this may have been neglected before the Captivity, their effect, when studied, must have been to render the words שָׁבוּעַ, ἑβδομάς, *week*, capable of meaning a seven of years almost as naturally as a seven of days. Indeed the generality of the word would have this effect at any rate. Hence their use to denote the latter in prophecy, more especially in that of Daniel, is not mere arbitrary symbolism, but the employment of a not unfamiliar and easily understood language. This is not the place to discuss schemes of prophetic interpretation, nor do we propose giving our opinion of any such, but it is connected with our subject to remark that, whatever be the merits of that which in Daniel and the Apocalypse understands a year by a *day*, it cannot be set aside as forced and unnatural. Whether days were or were not intended to be thus understood in the places in question, their being so would have been a congruous, and we may say logical attendant on the scheme which counts weeks of years, and both would have been a natural computation to minds familiar and occupied with the law of the Sabbatical year.

In the N. T. we of course find such clear recognition of and familiarity with the week as needs scarcely be dwelt on. Sacred as the division was, and stamped deep on the minds and customs of God's people, it now received additional solemnity from our Lord's last earthly Passover gathering up his work of life into a week.

Hence the Christian Church, from the very first, was familiar with the week. St. Paul's language (1 Cor. xvi. 2, κατὰ μίαν σαββάτων) shows this. We cannot conclude from it that such a division of time was observed by the inhabitants of Corinth generally; for they to whom he was writing, though doubtless the majority of them were Gentiles, yet knew the Lord's day, and most probably the Jewish Sabbath. But though we can infer no more than this from the place in question, it is clear that if not by this time yet very soon after, the whole Roman world had adopted the hebdomadal division. Dion Cassius, who wrote in the 2d century, speaks of it as both universal and recent in his time. He represents it as coming from Egypt, and gives two schemes, by one or other of which he considers that the planetary names of the different days were fixed (Dion Cassius, xxvii. 18). Those names, or corresponding ones, have perpetuated themselves over Christendom, though no associations of any kind are now connected with them, except in so far as the whimsical conscience of some has quarrelled with their Pagan origin, and led to an attempt at their disuse. It would be interesting, though foreign to our present purpose, to inquire into the origin of this planetary week. A deeply-learned paper in the *Philological Museum*,

Digitized by Google

by the late Archdeacon Hare,[a] gives the credit of its invention to the Chaldees. Dion Cassius was however pretty sure to have been right in tracing its adoption by the Roman world to an Egyptian origin. It is very striking to reflect that while Christendom was in its cradle, the law by which she was to divide her time came without collusion with her into universal observance, thus making things ready for her to impose on mankind that week on which all Christian life has been shaped — that week grounded on no worship of planetary deities nor dictated by the mere wish to quadripartite the month, but based on the earliest lesson of revelation, and proposing to man his Maker's model as that whereby to regulate his working and his rest — that week which once indeed in modern times it has been attempted to abolish, because it was attempted to abolish the whole Christian faith, but which has kept, as we are sure it ever will keep, its ground, being bound up with that other, and sharing therefore in that other's invincibility and perpetuity. F. G.

## WEEKS, FEAST OF. [PENTECOST.]

## WEIGHTS AND MEASURES.

### I. WEIGHTS.

*Introduction.* — It will be well to explain briefly the method of inquiry which led to the conclusions stated in this article, the subject being intricate, and the conclusions in many main particulars different from any at which other investigators have arrived. The disagreement of the opinions respecting ancient weights that have been formed on the evidence of the Greek and Latin writers shows the importance of giving the first place to the evidence of monuments. The evidence of the Bible is clear, except in the case of one passage, but it requires a monumental commentary. The general principle of the present inquiry was to give the evidence of the monuments the preference on all doubtful points, and to compare it with that of literature, so as to ascertain the purport of statements which otherwise appeared to be explicable in two, or even three, different ways. Thus, if a certain talent is said to be equal to so many Attic drachms, these are usually explained to be drachms on the old, or Commercial standard, or on Solon's reduced standard, or again on the further reduced standard equal to that of Roman denarii of the early emperors; but if we ascertain from weights or coins the weight of the talent in question, we can decide with what standard it is compared, unless the text is hopelessly corrupt.

Besides this general principle, it will be necessary to bear in mind the following postulates.

1. All ancient Greek systems of weight were derived, either directly or indirectly, from an eastern source.

2. All the older systems of ancient Greece and Persia, the Æginetan, the Attic, the Babylonian, and the Euboic, are divisible either by 6,000, or by 3,600.

3. The 6,000th or 3,600th part of the talent is a divisor of all higher weights and coins, and a multiple of all lower weights and coins, except its two thirds.

4. Coins are always somewhat below the standard weight.

5. The statements of ancient writers as to the relation of different systems are to be taken either as indicating original or current relation. When a set of statements shows a special study of metrology we must infer original relation; isolated statements may rather be thought to indicate current relation. All the statements of a writer, which are not borrowed, probably indicate either the one or the other kind of relation.

6. The statements of ancient writers are to be taken in their seemingly obvious sense, or discarded altogether as incorrect or unintelligible.

7. When a certain number of drachms or other denominations of one metal are said to correspond to a certain number of drachms or other denominations of another metal, it must not be assumed that the system is the same in both cases.

Some of these postulates may seem somewhat strict, but it must be recollected that some, if not all, of the systems to be considered have a mutual relation that is very apt to lead the inquirer to visionary results if he does not use great caution in his investigations.

The information respecting the Hebrew weights that is contained in direct statements necessitates an examination of the systems used by, or known to, the Greeks as late as Alexander's time. We begin with such an examination, then state the direct data for the determination of the Hebrew system or systems, and finally endeavor to effect that determination, adding a comparative view of all our main results.

I. *Early Greek Talents.* — Three principal systems were used by the Greeks before the time of Alexander, — those of the Æginetan, the Attic, and the Euboic talents.

1. The Æginetan talent is stated to have contained 60 minæ, and 6,000 drachms. The following points are incontestably established on the evidence of ancient writers. Its drachm was heavier than the Attic, by which, when unqualified, we mean the drachm of the full monetary standard, weighing about 67.5 grains Troy. Pollux states that it contained 10,000 Attic drachms and 100 Attic minæ. Aulus Gellius, referring to the time of Demosthenes, speaks of a talent being equal to 10,000 drachms, and, to leave no doubt, says they would be the same number of denarii, which in his own time were equal to current reduced Attic drachms, the terms drachms and denarii being then used interchangeably. In accordance with these statements, we find a monetary system to have been in use in Macedonia and Thrace, of which the drachm weighs about 110 grs., in very nearly the proportion required to the Attic (6 : 10 : : 67.5 : 112.5).

The silver coins of Ægina, however, and of many ancient Greek cities, follow a lower standard, of which the drachm has an average maximum weight of about 96 grs. The famous Cyzicene staters of electrum appear to follow the same standard as the coins of Ægina, for they weigh about 240 grs., and are said to have been equal in value to 28 Attic drachms of silver, a daric, of 129 grs., being equal to 20 such drachms, which would give the Cyzicenes (20 : 129 : : 28 : 180) three fourths of gold. the very proportion assigned to the composition of electrum by Pliny. If we may infer that the silver was not counted in the value, the Cyzicenes would be equal to low didrachms of Ægina. The drachm obtained from the silver coins of Ægina has very nearly the weight, 92.3 grs., that Boeckh assigns to that of Athens before Solon's reduction, of which

[a] *Philolog. Mus.* vol. i

the system continued in use afterwards as the Commercial talent. The coins of Athens give a standard, 67.5 grs., for the Solonian drachm, that does not allow, taking that standard for the basis of computation, a higher weight for the ante-Solonian drachm than about that computed by Boeckh.

An examination of Mr. Burgon's weights from Athens, in the British Museum, has, however, induced us to infer a higher standard in both cases. These weights bear inscriptions which prove their denominations, and that they follow two systems. One weighing 9,980 grs. troy has the inscription ΜΝΑ ΑΓΟΡ (*μνᾶ ἀγοραῖον*?), another weighing 7,171, simply ΜΝΑ. We have therefore two systems evidently in the relation of the Commercial Attic, and Solonian Attic (9,980 : 7,171 : : 138.88 : 99.7 instead of 100), a conclusion borne out by the fuller data given a little later (§ L. 2). The lower weight is distinguished by ΔΕΜΟ on a weight of 3,482 (× 2 = 6,964) grs., and by $\frac{\Xi\Delta}{\text{O}\Delta\,\urcorner\text{O}}$ on one of 884 (× 8 = 7,072): its mina was therefore called *δημοσία*. The identity of these two systems, the Market and the Popular, with the Commercial and Solonian of Athens, is therefore evident, and we thus obtain a higher standard for both Attic talents. From the correct relation of the weights of the two minæ given above, we may compute the drachms of the two talents at about 99.8 and 71.7 grs. The heavier standard of the two Attic systems afforded by these weights reduces the difficulty that is occasioned by the difference of the two Æginetan standards.

We thus obtain the following principal standards of the Æginetan weight.

A. — TABLE OF MR. BURGON'S WEIGHTS FROM ATHENS.
All these weights are of lead, except Nos. 15 and 26, which are of bronze.

| No. | Weight, Grs. Troy. | Inscription. | Type. | Condition.[5] | Value, Attic Commercial.[6] | Excess or deficiency. | Value, Attic Solonian.[7] | Excess or deficiency. |

[1] Countermark, tripod. [2] Countermark, prow. [3] Turtle, headless? [4] Countermark.
Explanation of signs: A, Scarcely injured. B, A little weight lost. C, More than a little lost. D, Much weight lost. d, Much corroded. E, Very much weight lost. When two signs are given, the former is the more probable. [6] The weight of the Commercial Attic mina is here assumed to be about 9,980 grs. [7] The weight of the Solonian Attic mina is here assumed to be about 7,171 grs. The heavier talent is indicated by capital letters.

Digitized by Google

*a*. The Macedonian talent, or Æginetan of the writers, weighing about 660,000 grs., containing 60 minæ and 6,000 drachms.

*c*. The Commercial talent of Athens, used for the coins of Ægina, weighing, as a monetary talent, never more than about 576,000 grs., reduced from a weight-talent of about 598,800, and divided into the same principal parts as the preceding.

It may be objected to this opinion, that the coins of Ægina should rather give us the true Æginetan standard than those of Macedonia, but it may be replied, that we know from literature and monuments of but two Greek systems heavier than the ordinary or later Attic, and that the heavier of these systems is sometimes called Æginetan, the lighter, which bears two other names, never.

2. The Attic talent, when simply thus designated, is the standard weight introduced by Solon, which stood to the older or Commercial talent in the relation of 100 to 138 8-9. Its average maximum weight, as derived from the coins of Athens and the evidence of ancient writers, gives a drachm of about 67.5 grs.; but Mr. Burgon's weights, as already shown, enable us to raise this sum to 71.7. Those weights have also enabled us to made a very curious discovery. We have already seen that two minæ, the Market and the Popular, are recognized in them, one weight, having the inscription ΜΝΑ ΑΓΟΡ (*μνᾶ ἀγοραῖον*?), weighing 9,980 grs., and another, inscribed ΜΝΑ (*μνᾶ [δημοσία]*), weighing 7,171 grs., these being in almost exactly the relation of the Commercial and ordinary Attic minæ *δημόσιαι*. There is no indication of any third system, but certain of the marks of value prove that the lower system had two talents, the heavier of which was double the weight of the ordinary talent. No. 9 has the inscription ΤΕΤΑΡΤ. "the quarter," and weighs 3,218 grs., giving a unit of 12,872 grs.; No. 14, inscribed $\frac{\text{ΕΜΙΤ}}{\text{ΕΤΑΡ}}$ the "half-quarter," weighs 1,770 grs., giving a unit of 14,160 grs. We thus obtain a mina twice that of Solon's reduction. The probable reason for the use of this larger Solonian talent will be shown in a later place (§ IV.). These weights are of about the date of the Peloponnesian War. (See Table A.)

From these data it appears that the Attic talent weighed about 430.260 grs. by the weights, and that the coins give a talent of about 405,000 grs., the latter being apparently the weight to which the talent was reduced after a time, and the maximum weight at which it is reckoned by ancient writers. It gradually lost weight in the coinage, until the drachm fell to about 57 grs. or less, thus coming to be equivalent to, or a little lighter than, the denarius of the early Cæsars. It is important, when examining the statements of ancient writers, to consider whether the full monetary weight of the drachm, mina, or talent, or the weight after this last reduction, is intended. There are cases, as in the comparison of a talent fallen into disuse, where the value in Attic drachms or denarii so described is evidently used with reference to the full Attic monetary weight.

3. The Euboic talent, though used in Greece, is also said to have been used in Persia, and there can be no doubt of its eastern origin. We therefore reserve the discussion of it for the next section (§ II., 2).

II. *Foreign Talents of the same Period.* — Two foreign systems of the same period, besides the Hebrew, are mentioned by ancient writers, the Babylonian talent and the Euboic, which Herodotus relates to have been used by the Persians of his time respectively for the weighing of their silver and gold paid in tribute.

1. The Babylonian talent may be determined from existing weights found by Mr. Layard at Nineveh. These are in the forms of lions and ducks, and are all upon the same system, although the same denominations sometimes weigh in the proportion of 2 to 1. On account of their great importance we insert a table, specifying their weights.

B. — TABLE OF WEIGHTS FROM NINEVEH.

Two weights in the series are omitted in this table: one is a large duck representing the same weight as No. 1, but much injured; the other is a small lion, of which the weight is doubtful, as it cannot be decided whether it was adjusted with one or two rings.

| No. | Form and Material. | Phœnician Inscription. | Cuneiform Inscription. | Marks of Value. | Condition.[1] | Weight. Grs. Troy. | Computed Weight. | Division of Gt. T. | Division of Lsr. T |

[1] A. Well preserved. B, Somewhat injured. C, Much injured.

Digitized by Google

inscriptions, and degree of preservation. (See Table B, previous page.)

From these data we may safely draw the following inferences.

The weights represent a double system, of which the heavier talent contained two of the lighter talents.

The heavier talent contained 60 manehs. The maneh was divided into thirtieths and sixtieths. We conclude the units having these respective relations to the maneh of the heavy talent to be divisions of it, because in the case of the first a thirtieth is a more likely division than a fifteenth, which it would be if assigned to the lighter talent, and because, in the case of the second, eight sixtieths is a more likely division than eight thirtieths.

The lighter talent contained 60 manehs. According to Dr. Hincks, the maneh of the lighter talent was divided into sixtieths, and these again into thirtieths. The sixtieth is so important a division in any Babylonian system, that there can be no doubt that Dr. Hincks is right in assigning it to this talent, and moreover its weight is a value of great consequence in the Babylonian system as well as in one derived from it. Besides, the sixtieth bears a different name from the sixtieth of the heavier talent, so that there must have been a sixtieth in each, unless, but this we have shown to be unlikely, the latter belongs to the lighter talent, which would then have had a sixtieth and thirtieth. The following table exhibits our results.

| | | | | Grs. Troy. |
|---|---|---|---|---|
| *Heavier Talent.* | | | | |
| $\frac{1}{60}$ Maneh | | | | 266.4 |
| 2 | $\frac{1}{30}$ Maneh | | | 532.8 |
| 60 | 30 Maneh | | | 15,984 |
| 3,600 | 1,800 | 60 | Talent | 959,040 |
| *Lighter Talent.* | | | | |
| $\frac{1}{30}$ of $\frac{1}{60}$ Maneh | | | | 4.44 |
| 30 | $\frac{1}{60}$ Maneh | | | 133.2 |
| 1,800 | 60 | Maneh | | 7.992 |
| 108,000 | 3,600 | 60 | Talent | 479,520 |

Certain low subdivisions of the lighter talent may be determined from smaller weights, in the British Museum, from Babylonia or Assyria, not found with those last described. These are, with one exception, ducks, and have the following weights, which we compare with the multiples of the smallest subdivision of the lighter talent.

| Smaller Babylonian or Assyrian Weights. | Grs. Troy. | Thirtieths of Sixtieth of Maneh. Unit, 4.44 | Supposed Unit, 4. |
|---|---|---|---|
| 1. Duck, marked II, wt. | 529 | 30. 355.2 | 320 |
| 2. " | 120 | 30. 133.2 | 120 |
| 3. " | 119 | | |
| 4. " | 100 | 25. 111 | 100 |
| 5. " | 87+ | 22. 97.6 | 88 |
| 6. Weight like short stopper. | 93 | 21. 93.2 | 84 |
| 7. Duck. | 90+ | 20. 88.8 | 80 |
| 8. " | 40— | 10. 44.4 | 40 |
| 9. " | 24— | 8. 35.5 | 32 |
| 10. " | 19 | 5. 22.2 | 20 |

Before comparing the evidence of the coins which we may suppose to have been struck according to the Babylonian talent, it will be well to ascertain whether the higher or lower talent was in use, or whether both were, in the period of the Persian coins.

Herodotus speaks of the Babylonian talent as not greatly exceeding the Euboïc, which has been computed to be equivalent to the Commercial Attic, but more reasonably as nearly the same as the ordinary Attic. Pollux makes the Babylonian talent equal to 7,000 Attic drachms. Taking the Attic drachm at 67.5 grs., the standard probably used by Pollux, the Babylonian talent would weigh 472,500, which is very near the weight of the lighter talent. Ælian says that the Babylonian talent was equal to 72 Attic minæ, which, on the standard of 67.5 to the drachm, gives a sum of 486,000. We may therefore suppose that the lighter talent was generally, if not universally, in use in the time of the Persian coins.

Herodotus relates that the king of Persia received the silver tribute of the satrapies according to the Babylonian talent, but the gold, according to the Euboïc. We may therefore infer that the silver coinage of the Persian monarchy was then adjusted to the former, the gold coinage to the latter, if there was a coinage in both metals so early. The oldest coins, both gold and silver, of the Persian monarchy, are of the time of Herodotus, if not a little earlier; and there are still more ancient pieces, in both metals, of the same weights as Persian gold and silver coins, which are found at or near Sardes, and can scarcely be doubted to be the coinage of Croesus, or of another Lydian king of the 6th century. The larger silver coins of the Persian monarchy, and those of the satraps, are of the following denominations and weights: —

| | Grs. Troy. |
|---|---|
| Piece of three sigli | 258.5 |
| Piece of two sigli | 169 |
| Siglos | 84.5 |

The only denomination of which we know the name is the siglos, which, as having the same type as the Daric, appears to be the oldest Persian silver coin. It is the ninetieth part of the maneh of the lighter talent, and the 5,400th of that talent. The piece of three sigli is the thirtieth part of that maneh, and the 1,800th of the talent. If there were any doubt as to these coins being struck upon the Babylonian standard, it would be removed in the next part of our inquiry, in which we shall show that the relation of gold and silver occasioned these divisions.

2. The Euboïc talent, though bearing a Greek name, is rightly held to have been originally an eastern system. As it was used to weigh the gold sent as tribute to the king of Persia, we may infer that it was the standard of the Persian gold money; and it is reasonable to suppose that the coinage of Eubœa was upon its standard. If our result as to the talent, when tested by the coins of Persia and Eubœa, confirms this inference and supposition, it may be considered sound.

We must now discuss the celebrated passage of Herodotus on the tribute of the Persian satrapies. He there states that the Babylonian talent contained 70 Euboïc minæ (iii. 89). He specifies the amount of silver paid in Babylonian talents by each province, and then gives the sum of the silver according to the Euboïc standard, reduces the gold paid to its equivalent in silver, reckoning the former at thirteen times the value of the latter, and lastly gives the sum total. His statements may be thus tabulated: —

| Sum of items, silver. | Equivalent in E. T. at 70 minæ = E. T. | Equivalent stated. | Difference |
|---|---|---|---|
| 7,740 E. T. | = 9,030 E. T. | 9,540 E. T. | +510 |

Digitized by Google

| Gold tribute. 360 B. T. | Equivalent at 13 to 1. 4,680 B. T. | Id |
|---|---|---|
| Total . . | 13,710 B. T | 14,220 |
| Total stated | 14,560 | 14,560 |
| Difference . | +850 | +340 |

It is impossible to explain this double error in any satisfactory manner. It is, however, evident that in the time of Herodotus there was some such relation between the Babylonian and Euboic talents as that of 11.66 to 10. This is so near 12 to 10 that it may be inquired whether ancient writers speak of any relative value of gold to silver about this time that would make talents in this proportion easy for exchange, and whether, if such a proportion is stated, it is confirmed by the Persian coins. The relative value of 13 to 1, stated by Herodotus, is very nearly 12 to 1, and seems as though it had been the result of some change, such as might have been occasioned by the exhaustion of the surface-gold in Asia Minor, or a more careful working of the Greek silver mines. The relative value 12 to 1 is mentioned by Plato (*Hipparch.*). About Plato's time the relation was, however, 10 to 1. He is therefore speaking of an earlier period. Supposing that the proportion of the Babylonian and Euboic talents was 12 to 10, and that it was based upon a relative value of 12 to 1, what light do the Persian coins throw upon the theory? If we take the chief or only Persian gold coin, the Daric, assuming its weight to be 129 grs., and multiply it by 12, we obtain the product 1,548. If we divide this product as follows, we obtain as aliquot parts the weights of all the principal and heavier Persian silver coins: —

1,548 ÷ 6 = 258 three sigli.
÷ 9 = 172 two sigli.
÷ 18 = 86 sigli.

On these grounds we may suppose that the Euboic talent was to the Babylonian as 60 to 72, or 5 to 6. Taking the Babylonian maneh at 7,992 grs., we obtain 399,600 for the Euboic talent.

This result is most remarkably confirmed by an ancient bronze weight in the form of a lion discovered at Abydos in the Troad, and bearing in Phœnician characters the following inscription: אמספרן לקבל סהריא זי כספא, "Approved," or "found correct on the part of the satrap who is appointed over the silver," or "money." It weighs 396,000 grs., and is supposed to have lost one or two pounds' weight. It has been thought to be a weight of 50 Babylonian minæ, but it is most unlikely that there should have been such a division of the talent, and still more that a weight should have been made of that division without any distinctive inscription. If, however, the Euboic talent was to the Babylonian in the proportion of 5 to 6, 50 Babylonian minæ would correspond to a Euboic talent, and this weight would be a talent of that standard. We have calculated the Euboic talent at 399,600 grs., this weight is 396,000, or 3,600 deficient, but this is explained by the supposed loss of one (5,760) or two (11,520) pounds weight.[a]

We have now to test our result by the Persian gold money, and the coins of Euboea.

The principal, if not the only, Persian gold coin is the Daric, weighing about 129 grs. This, we have seen, was the standard coin, according to which the silver money was adjusted. Its double in actual weight is found in the silver coinage, but its equivalent is wanting, as though for the sake of distinction. The double is the thirtieth of the maneh of the lighter or monetary Babylonian talent, of which the Daric is the sixtieth, the latter being, in our opinion, a known division. The weight of the sixtieth is, it should be observed, about 133.2 grs., somewhat in excess of the weight of the Daric, but ancient coins are always struck below their nominal weight. The Daric was thus the 3,600th part of the Babylonian talent. It is nowhere stated how the Euboic talent was divided, but if we suppose it to have contained 50 minæ, then the Daric would have been the sixtieth of the mina, but if 100 minæ, the thirtieth. In any case it would have been the 3,000th part of the talent. As the 6,000th was the chief division of the Æginetan and Attic monetary talents, and the 3,000th of the Hebrew talent according to which the sacred tribute was paid, and as an Egyptian talent contained 6,000 such units, no other principal division of the chief talents, save that of the Babylonian into 3,600, being known, this is exactly what we should expect.

The coinage of Euboea has hitherto been the great obstacle to the discovery of the Euboic talent. For the present we speak only of the silver coins, for the only gold coin we know is later than the earliest notices of the talent, and it must therefore have been in Greece originally, as far as money was concerned, a silver talent. The coins give the following denominations, of which we state the average highest weights and the assumed true weights, compared with the assumed true weights of the coins of Athens: —

| Coins of Eubœa. | | Coins of Athens. | |
|---|---|---|---|
| Highest weight. | Assumed true weight. | Assumed true weight. | |
| | 258 | Tetradrachm | 270 |
| 121 | 129 | Didrachm | 135 |
| 85 | 86 | | |
| 63 | 64·5 | Drachm | 67·5 |
| 43 | 43 | Tetrobolon | 45 |

It must be remarked that the first Euboic denomination is known to us only from two very early coins of Eretria, in the British Museum, which may possibly be Attic, struck during a time of Athenian supremacy, for they are of about the weight of very heavy Attic tetradrachms.

It will be perceived that though the weights of all denominations, except the third in the Euboic list, are very near the Attic, the system of division is evidently different. The third Euboic denomination is identical with the Persian siglos, and indicates the Persian origin of the system. The second piece is, however, identical with the Daric. It would seem that the Persian gold and silver systems of division were here combined; and this might perfectly have been done, as the Daric, though a division of the gold talent, is also a division of the silver talent. As we have noticed, the Daric is omitted in the Persian silver coinage for some special reason. The relation of the Persian and Greek systems may be thus stated: —

[a] Since this was written we have ascertained that M. de Vogüé has supposed this lion to be a Euboic talent (*Revue Archéologique*, n. s. Jan. 1862). See also *Archæological Journal*, 1860, Sept. pp. 199, 200.

Digitized by Google

| Persian silver, Babylonian. | Persian gold, Euboïc. | Greek Euboïc. Actual weight. | Assumed. |
|---|---|---|---|
| 256-5 | | | 2[illegible]9 |
| 169 | | | |
| | 129 | 121 | 129 |
| 84-5 | | 85 | 86 |
| | | 63 | 64-5 |
| | | 42 | 43 |

The standard weights of Persian silver coins are here assumed from the highest average weight of the siglos. We hold that the coins of Corinth probably follow the Euboïc system.

The only gold coin of Euboea known to us has the extraordinary weight of 49.4 grs. It is of Carystus, and probably in date a little before Alexander's time. It may be upon a system for gold money derived from the Euboïc, exactly as the Euboïc was derived from the Babylonian, but it is not safe to reason upon a single coin.

3. The talents of Egypt have hitherto formed a most unsatisfactory subject. We commence our inquiry by stating all certain data.

The gold and silver coins of the Ptolemies follow the same standard as the silver coins of the kings of Macedon to Philip II. inclusive, which are on the full Æginetan weight. The copper coins have been thought to follow the same standard, but this is an error.

The ancient Egyptians are known to have had two weights, the MeN or UTeN, containing ten smaller weights bearing the name KeT, as M. Chabas has proved. The former name, if rightly read MeN, is a maneh or mina, the latter, according to the Copts, was a drachm or didrachm ⲕⲓϯ : ⲕⲓϯⲉ, ϹⲔⲒϯⲈ, S. drachma, didrachma. the last form not being known to have the second signification). A weight, inscribed "Five KeT," and weighing 698 grs., has been discovered. It probably originally weighed about 700 (*Revue Archéologique*, n. s.). We can thus determine the KeT to have weighed about 140 grs., and the MeN or UTeN about 1,400. An examination of the copper coins of the Ptolemies has led us to the interesting discovery that they follow this standard and system. The following are all the heavier denominations of the copper coins of the earlier Ptolemies, and the corresponding weights: the coins vary much in weight, but they clearly indicate their standard and their denominations: —

EGYPTIAN COPPER COINS, AND WEIGHTS.

| *Coins.* | *Weights.* |
|---|---|
| Grs. | |
| A circ. 1400. | MeN, or UTeN (Maneh?) |
| B circ. 700. | 5 KeT. |
| C circ. 280. | (2 KeT). |
| D circ. 140. | KeT. |
| E circ. 70. | (½ KeT). |

We must therefore conclude that the gold and silver standard of the Ptolemies was different from the copper standard, the latter being that of the ancient Egyptians. The two talents, if calculated from the coins, which in the gold and silver are below the full weight, are in the proportion of about 10 (gold and silver) to 13 (copper); or, if calculated from the higher correct standard of the gold and silver system, in the proportion of about 10 to 12.7: we shall speak as to the exchange in a later place (§ III.).

It may be observed that the difficulty of explaining the statements of ancient writers as to the Egyptian, Alexandrian, or Ptolemaic talent or talents, probably arises from the use of two systems which could be easily confounded, at least in their lower divisions.

4. The Carthaginian talent may not be as old as the period before Alexander, to which we limit our inquiry, yet it reaches so nearly to that period that it cannot be here omitted. Those silver coins of the Carthaginians which do not follow the Attic standard seem to be struck upon the standard of the Persian coins, the Babylonian talent. The only clew we have, however, to the system is afforded by a bronze weight inscribed משקל מכת, and weighing 321 grammes = 4,956.5 grs. (Dr. Levy in *Zeitschrift d. Deutsch. morgenl. Gesellsch.* xiv. p. 710). This sum is divisible by the weights of all the chief Carthaginian silver coins, except the "decadrachm," but only as sevenths, a system of division we do not know to have obtained in any ancient talent. The Carthaginian gold coins seem also to be divisions of this mina on a different principle.

III. *The Hebrew Talent or Talents and Divisions.* — The data we have obtained enable us to examine the statements respecting the Hebrew weights with some expectation of determining this difficult question. The evidence may be thus stated.

1. A talent of silver is mentioned in Exodus, which contained 3,000 shekels, distinguished as "the holy shekel," or "shekel of the sanctuary." The number of Israelite men who paid the ransom of half a shekel apiece was 603,550, and the sum paid was 100 talents and 1,775 shekels of silver (Ex. xxx. 13, 15, xxxviii. 25–28), whence we easily discover that the talent of silver contained 3,000 shekels (603,550 + 2 = 301,775 shekels — 1,775 = 300,000 + 100 talents = 3,000 shekels to the talent).

2. A gold maneh is spoken of, and, in a parallel passage, shekels are mentioned, three manehs being represented by 300 shekels, a maneh therefore containing 100 shekels of gold.

3. Josephus states that the Hebrew talent of gold contained 100 minæ (λυχνία ἐκ χρυσοῦ . . . . σταθμὸν ἔχουσα μνᾶς ἑκατόν, ἃς Ἑβραῖοι μὲν καλοῦσι κίγγαρες, εἰς δὲ τὴν Ἑλληνικὴν μεταβαλλόμενον γλῶσσαν σημαίνει τάλαντον. *Ant.* iii. 6, § 7).

4. Josephus states that the Hebrew mina of gold was equal to two libræ and a half (δοκὸν ὁλοσφυρήλατον χρυσῆν, ἐκ μνῶν τριακοσίων πεποιημένην· ἡ δὲ μνᾶ παρ' ἡμῖν ἰσχύει λίτρας δύο καὶ ἥμισυ. *Ant.* xiv. 7, § 1). Taking the Roman pound at 5,050 grs., the maneh of gold would weigh about 12,625 grs.

5. Epiphanius estimates the Hebrew talent at 125 Roman pounds, which, at the value given above, are equal to about 631,250 grs.

6. A difficult passage in Ezekiel seems to speak of a maneh of 50 or 60 shekels: "And the shekel [shall be] twenty gerahs: twenty shekels, five and twenty shekels, fifteen shekels, shall be your maneh" (xlv. 12). The ordinary text of the LXX. gives a series of small sums as the Hebrew, though differing in the numbers, but the Alex. and Vat. MSS have 50 for 15 (εἴκοσι ὀβολοί, πέντε σίκλοι, πέντε καὶ σίκλοι δέκα, καὶ πεντήκοντα σίκλοι ἡ μνᾶ ἔσται ὑμῖν). The meaning would be, either that there were to be three manehs, respectively containing 20, 25, and 15 shekels, or the like, or else that a sum is intended by these numbers (20 + 25 + 15) = 60, or possibly 50. But it

Digitized by Google

must be remembered that this is a prophetical passage.

7. Josephus makes the gold shekel a Daric (*Ant.* iii. 8, § 10).

From these data it may reasonably be inferred, (1) that the Hebrew gold talent contained 100 manehs, each of which again contained 100 shekels of gold, and, basing the calculation on the stated value of the maneh, weighed about 1,262,500 grs., or, basing the calculation on the correspondence of the gold shekel to the Daric, weighed about 1,290,000 grs. ($129 \times 100 \times 100$), the latter being probably nearer the true value, as the $2\frac{1}{2}$ libræ may be supposed to be a round sum; and (2) that the silver talent contained 3,000 shekels, and is probably the talent spoken of by Epiphanius as equal to 125 Roman pounds, or 631,250 grs., which would give a shekel of 210.4 grains. It is to be observed that, taking the estimate of Josephus as the basis for calculating the maneh of the former talent, and that of Epiphanius for calculating the latter, their relation is exactly 2 to 1, 50 manehs at $2\frac{1}{2}$ pounds, making 125 pounds. It is therefore reasonable to suppose that two talents of the same system are referred to, and that the gold talent was exactly double the silver talent.

Let us now examine the Jewish coins.

1. The shekels and half-shekels of silver, if we take an average of the heavier specimens of the Maccabean issue, give the weight of the former as about 220 grs. A talent of 3,000 such shekels would weigh about 660,000 grs. This result agrees very nearly with the weight of the talent given by Epiphanius.

2. The copper coins are generally without any indications of value. The two heaviest denominations of the Maccabean issue, however, bear the names "half" (חצי), and "quarter" (רביע). M. de Saulcy gives the weights of three "halves" as, respectively, 251.6 grs. (16.3 grammes), 236.2 (15.3), and 219.2 (14.2). In Mr. Wigan's collection are two "quarters," weighing, respectively, 145.2 grs. and 118.9 grs.; the former being, apparently, the one "quarter" of which M. de Saulcy gives the weight as 142. (9.2 grammes). We are unable to add the weights of any more specimens. There is a smaller coin of the same period, which has an average weight, according to M. de Saulcy, of 81.8 grs. (5.3 grammes). If this be the third of the "half," it would give the weight of the latter at 245.4 grs. As this may be thought to be slender evidence, especially so far as the larger coins are concerned, it is important to observe that it is confirmed by the later coins. From the copper coins mentioned above, we can draw up the following scheme, comparing them with the silver coins.

| Copper Coins. | | | Silver Coins. | | |
|---|---|---|---|---|---|
| | Average weight. | Supposed weight. | | Average weight. | Supposed weight. |
| Half | 235.4 | 250 | Shekel | 220 | 220 |
| Quarter | 122.0 | 125 | Half-shekel | 110 | 110 |
| (Sixth) | 81.8 | 83.3 | (Third) | 73.3 | |

It is evident from this list that the copper "half" and "quarter" are half and quarter shekels, and are nearly in the relation to the silver like denominations of 2 to 1. But this relation is not exact, and it is therefore necessary to ascertain further, whether the standard of the silver talent can be raised, if not, whether the gold talent can be more than twice the weight of the silver, and, should this explanation be impossible, whether there is any ground for supposing a third talent with a shekel heavier than two shekels of silver.

The silver shekel of 220 grs. gives a talent of 660,000 grs.: this is the same as the Æginetan, which appears to be of Phœnician origin. There is no evidence of its ever having had a higher shekel or didrachm.

The double talent of 1,320,000 grs., gives a Daric of 132 grs., which is only 1 gr. and a small fraction below the standard obtained from the Babylonian talent.

The possibility of a separate talent for copper depends upon the relations of the three metals.

The relation of gold to silver in the time of Herodotus was 1:13. The early relation upon which the systems of weights and coins used by the Persian state were founded was 1:12. Under the Ptolemies it was 1:12 5. The two Hebrew talents, if that of gold were exactly double that of silver, would have been easy for exchange in the relation of 1:12, 1 talent of gold corresponding to 24 talents of silver. The relation of silver to copper can be best conjectured from the Ptolemaic system. If the Hebrews derived this relation from any neighboring state, Egypt is as likely to have influenced them as Syria; for the silver coinage of Egypt was essentially the same as that of the Hebrews, and that of Syria was different. Besides, the relation of silver and copper must have been very nearly the same in Syria and Palestine as in Egypt during the period in which the Jewish coinage had its origin, on account of the large commerce between those countries. It has, we venture to think, been satisfactorily shown by Letronne that the relation of silver to copper under the Ptolemies was 1:60, a mina of silver corresponding to a talent of copper. It has, however, been supposed that the drachm of copper was of the same weight as that of gold and silver, an opinion which we have proved to be incorrect in an earlier part of this article (§ II. 3). An important question now arises. Is the talent of copper, when spoken of in relation to that of silver, a talent of weight or a talent of account? — in other words, Is it of 6,000 actual drachms of 140 grs. each, or of 6,000 drachms of account of about 110 grs. or a little less? This question seems to be answered in favor of the former of the two replies by the facts. (1) that the copper coins being struck upon the old Egyptian weight, it is incredible that so politic a prince as the first Ptolemy should have introduced a double system of reckoning, which would have given offense and occasioned confusion; (2) that the ancient Egyptian name of the monetary unit became that of the drachm, as is shown by its being retained with the sense drachm and didrachm by the Copts (§ II. 3); and had there been two didrachms of copper, that on the Egyptian system would probably have retained the native name. We are of opinion, therefore, that the Egyptian copper talent was of 6,000 copper drachms of the weight of 140 grs. each. But this solution still leaves a difficulty. We know that the relation of silver to copper was 1:60 in drachms, though 1:78 or 80 in weight. In a modern state the actual relation would force itself into the position of the official relation, and 1:60 would become 1:78 or 80; but this was not necessarily the case in an ancient country in so peculiar a condition as Egypt. Alexandria and a few other towns were Greek, the rest of the country purely Egyptian and it is quite possible that, while the gold and

Digitized by Google

silver coinage was current in the Greek towns, the Egyptians may have refused to take anything but copper on their own standard. The issue of copper coins above their value would have been a sacrifice to the exchequer, if given in exchange for gold or silver, rough or coined; but they might have been exclusively paid out for salaries and small expenditure, and would have given an enormous profit to the government, if repaid in small taxes. Supposing that a village paid a silver mina in taxes collected from small proprietors, if they had only copper the government would receive in excess 180,000 grs., or not much less than a fifth of the whole amount. No one who is conversant with the East in the present day will deny the possibility of such a state of things in Egypt under the Ptolemies. Our decision may be aided by the results of the two theories upon the relations of the metals.

| | | | | |
|---|---|---|---|---|
| Nominal relation | Au 1 (Stater) | = | Ar 12.5 (Mina) | = Æ 60 (Talent) |
| | Au 1 | = | | Æ 750 |
| Relation in weight | Au 1 | = | Ar 12.5 | = Æ 78 / 80 |
| | Au 1 | = | | Æ 975 / 1,000 |

It must be remembered that, in endeavoring to determine which of these two relations is the correct one, we must be guided by the evidence of antiquity, not by the mathematical proportions of the results, for we are now not dealing with coins, but with relations only originally in direct connection with systems of coinage.

Letronne gives the relation of silver to copper among the Romans, at the end of the Third Punic War, as 1:112, reduced from 1:83.3, both much higher values of the former metal than 1:60. It is therefore reasonable to suppose that the relation of 1:80 is that which prevailed in Egypt under the Ptolemies, and so at the time at which the first Jewish coins were struck, that of Simon the Maccabee.

We may therefore suppose that the Hebrew talents of silver and copper were exchangeable in the proportion of about 1:80, and, as we have seen that the coins show that their shekels were of the relative weight 1 : 2+, we may take as the basis of our computation the supposition that 50 shekels of silver were equal to a talent of copper, or 100 = 1 talent double the former. We prefer the former relation as that of the Egyptian system.

| | | | |
|---|---|---|---|
| 220 ×50=11,000 grs. | ×60=660,000+1500=440+2=220 | | |
| | ×70 770,000 | 513 3 | 256 6 |
| | ×72 792,000 | 528 | 264 |
| | ×75 825,000 | 550 | 275 |
| | ×80 880,000 | 586.6 | 293.3 |

Of these results, the first is too low, and the fourth and fifth too high, the second and third agreeing with our approximative estimate of the shekel and half-shekel of copper. It is, however, possible that the fourth result may be the true one, as some coins give very nearly this standard. Which is the right system can only be inferred from the effect on the exchange, although it must be remembered that very awkward exchanges of silver and copper may have obtained wherever copper was not an important metal. Thus at Athens 8 pieces of brass went to the obolus, and 7 lepta to the piece of brass. The former relation would be easy of computation, the latter very inconvenient. Among the Jews, the copper coinage was of more importance: at first of accurate fabric and not very varying weight, afterwards the only coinage. Its relation to the silver money, and afterwards to the Egyptian and Phœnician currency of the same weight, must therefore have been correct. On this ground, we should prefer the relation of silver to copper 1:72, giving a talent of 792,000 grs., or nearly twice the Euboïc. The agreement is remarkable, but may be fortuitous.

Our theory of the Hebrew coinage would be as follows: —

Gold . . Shekel or Daric (foreign) 129 grs.
Silver . Shekel 220, Half-shekel 110.
Copper . Half (-shekel) 264, Quarter (-shekel) 132, (Sixth-shekel) 88.

We can now consider the weights.

The gold talent contained 100 manehs, and 10,000 shekels.

The silver talent contained 3,000 shekels, 6,000 bekas, and 60,000 gerahs.

The copper talent probably contained 1,500 shekels.

The "holy shekel," or "shekel of the sanctuary" (שֶׁקֶל הַקֹּדֶשׁ), is spoken of both of the gold (Ex. xxxviii. 24) and silver (25) talents of the time of the Exodus. We also read of "the king's weight" (אֶבֶן הַמֶּלֶךְ, 2 Sam. xiv. 26). But there is no reason for supposing different systems to be meant.

The significations of the names of the Hebrew weights must be here stated.

The talent (כִּכָּר) means "a circle," or "globe," probably "an aggregate sum."

The shekel (שֶׁקֶל) signifies simply "a weight."

The beka (בֶּקַע) or half-shekel, signifies "a division," or "half."

The "quarter-shekel" (רֶבַע שֶׁקֶל) is once mentioned (1 Sam. ix. 8).

The gerah (גֵּרָה) signifies "a grain," or "bean."

IV. *The History and Relations of the Principal Ancient Talents.* — It is necessary to add a view of the history and relations of the talents we have discussed in order to show what light our theories throw upon these matters. The inquiry must be prefaced by a list of the talents: —

A. Eastern Talents.

| | | | |
|---|---|---|---|
| Hebrew gold | 1,220,000 | Hebrew silver | 660,000 |
| Babylonian (silver) | 959,040 | Babylonian lesser (silver) | 479,520 |
| Egyptian | 840,000 | | |
| | | Persian gold | 899,600 |
| Hebrew copper? | 792,000? | | |

B. Greek Talents.

| | |
|---|---|
| Æginetan | 660,000 |
| Attic Commercial | 598,800 |
| Attic Commercial, lowered | 558,900 |
| Attic Solonian, double | 860,520 |
| Attic Solonian, ordinary | 430,260 |
| Attic Solonian, lowered | 405,000 |
| Euboïc | 887,040 |

We omit the talent of the coins of Ægina, as a mere monetary variety of the Æginetan, through the Attic Commercial.

Digitized by Google

We take the Hebrew to be the oldest system of weight. Apart from the evidence from its relation to the other systems, this may be almost proved by our finding it to obtain in Greece, in Phœnicia, and in Judæa, as the oldest Greek and Phœnician system, and as the Jewish system. As the Jewish system, it must have been of far greater antiquity than the date of the earliest coin struck upon it. The weight according to which the ransom was first paid must have been retained as the fixed legal standard. It may seem surprising, when we remember the general tendency of money to depreciate, of which such instances as those of the Athenian silver and the English gold will occur to the reader, that this system should have been preserved, by any but the Hebrews, at its full weight, from the time of the Exodus to that of the earliest Greek coins upon the Æginetan standard, a period probably of not much less than a thousand years; but we may cite the case of the solidus of the Roman and Byzantine emperors, which retained its weight from its origination under Constantine the Great until the fall of Constantinople, and its purity from the time of Constantine until that of Alexius Comnenus; and again the long celebrity of the sequin of Venice and the florin of Venice for their exact weight. It must be remembered, moreover, that in Phœnicia, and originally in Greece, this system was that of the great trading nation of antiquity, who would have had the same interest as the Venetians and Florentines in maintaining the full monetary standard. There is a remarkable evidence in favor of the antiquity of this weight in the circumstance that, after it had been depreciated in the coins of the kings and cities of Macedon, it was restored, in the silver money of Philip II., to its full monetary standard.

The Hebrew system had two talents for the precious metals in the relation of 2: 1. The gold talent, apparently not used elsewhere, contained 100 manehs, each of which contained again 100 shekels, there being thus 10,000 of these units, weighing about 132 grs. each, in the talent.

The silver talent also known as the Æginetan contained 3,000 shekels, weighing about 220 grs. each. One gold talent appears to have been equal to 24 of these. The reason for making the talent of gold twice that of silver was probably merely for the sake of distinction.

The Babylonian talent, like the Hebrew, consisted of two systems, in the relation of 2 to 1, upon one standard. It appears to have been formed from the Hebrew by reducing the number of units from 10,000 to 7,200. The system was altered by the maneh being raised so as to contain 120 instead of 100 units, and the talent lowered so as to contain 60 instead of 100 manehs. It is possible that this talent was originally of silver, as the exchange, in their common unit, with the Hebrew gold, in the relation of 1 : 12, would be easy, 6 units of the gold talent passing for 72 of the silver, so that 10 gold units would be equal to a silver maneh, which may explain the reason of the change in the division of the talent.

The derivation, from the lighter Babylonian talent, of the Euboïc talent, is easily ascertained. Their relation is that of 6: 5, so that the whole talents could be readily exchanged in the relation of 12 : 1; and the units being common, their exchange would be even more easy.

The Egyptian talent cannot be traced to any other. Either it is an independent system, or, perhaps it is the oldest talent and parent of the rest. The Hebrew copper talent is equally obscure. Perhaps it is the double of the Persian gold talent.

The Æginetan talent, as we have seen, was the same as the lesser or silver Hebrew talent. Its introduction into Greece was doubtless due to the Phœnicians. The Attic Commercial was a degradation of this talent, and was itself further degraded to form the Attic Solonian. The Æginetan talent thus had five successive standards (1, Original Æginetan; 2, Attic Commercial; 3, Id. lowered; 4, Attic Solonian; 5, Id. lowered) in the following relation: —

| I. | II. | III. | IV. | V. |
|---|---|---|---|---|
| 6. : | 5.44 : | 5. : | 3.9 : | 3.6 |
| | 6. | | : 4.3 | |
| | | 6. : | | 4.3 |

The first change was probably simply a degradation. The second may have been due to the influence of a Graeco-Asiatic talent of Cyzicus or Phocæa, of which the stater contained about 180 grs. of gold, although weighing, through the addition of 60 grs. of silver, about 240 grs., thus implying a talent in the relation to the Æginetan of about 5: 6. Solon's change has been hitherto an unresolved enigma. The relation of the two Attic talents is so awkward that scarcely any division is common to them in weight, as may be inferred from the data in the table of Athenian weights that we have given. Had the heavier talent been divided into quarters, and the lighter into thirds, this would not have been the case. The reason of Solon's change is therefore to be looked for in the influence of some other talent. It has been supposed that this talent was the Euboïc, but this theory is destroyed by our discovery that the Attic standard of the oldest coins is below the weight-standard of about the time of the Peloponnesian War, and thus that the reduction of Solon did not bring the weights down to the Euboïc standard. If we look elsewhere we see that the heavier Solonian weight is almost the same in standard as the Egyptian, the didrachm of the former exceeding the unit of the latter by no more than about 3 grs. This explanation is almost proved to be the true one by the remarkable fact that the Attic Solonian talent, apparently unlike all other Greek talents, had a double talent, which would give a drachm instead of a didrachm, equivalent to the Egyptian unit. At the time of Solon nothing would be more likely than such an Egyptian influence as this explanation implies. The commercial relations of Egypt and Greece, through Naucratis, were then active; and the tradition or myth of the Egyptian origin of the Athenians was probably never stronger. The degradation of the Attic Solonian talent was no doubt effected by the influence of the Euboïc, with the standard of which its lower standard is probably identical.

The principal authorities upon this subject are: Boeckh's *Metrologische Untersuchungen;* Mommsen's *Geschichte des Römischen Münzwesens;* and Hussey's *Ancient Weights.* Don V. Vazquez Queipo's *Essai sur les Systèmes Métriques et Monétaires des Anciens Peuples* also contains much information. The writer must express his obligations to Mr. de Saris, Mr. Vaux, and Mr. E. Wigan, and more especially to his colleagues M. Madden and Mr. Coxe, for valuable assistance.

## II. MEASURES.

The most important topic to be discussed in connection with the subject of the Hebrew measures is their relative and absolute value. Another topic, of secondary importance perhaps, but possessing an independent interest of its own, demands a few prefatory remarks, namely, the origin of these measures, and their relation to those of surrounding countries. The measures of length are chiefly derived from the members of the human body, which are happily adapted to the purpose from the circumstance that they exhibit certain definite proportions relatively to each other. It is unnecessary to assume that a system founded on such a basis was the invention of any single nation: it would naturally be adopted by all in a rude state of society. Nevertheless, the particular parts of the body selected for the purpose may form more or less a connecting link between the systems of various nations. It will be observed in the sequel that the Hebrews restricted themselves to the fore-arm, to the exclusion of the foot and also of the pace, as a proper measure of length. The adoption of foreign names is also worthy of remark, as showing a probability that the measures themselves were borrowed. Hence the occurrence of words of Egyptian extraction, such as *hin* and *ephah*, and probably *ammah* (for "cubit"), inclines us to seek for the origin of the Hebrew scales both of length and capacity in that quarter. The measures of capacity, which have no such natural standard as those of length, would more probably be settled by conventional usage, and the existence of similar measures, or of a similar scale of measures in different nations, would furnish a strong probability of their having been derived from some common source. Thus the coincidence of the Hebrew bath being subdivided into 72 logs, and the Athenian *metrétés* into 72 *xesta*, can hardly be the result of chance; and, if there further exists a correspondence between the ratios that the weights bear to the measures, there would be still further evidence of a common origin. Boeckh, who has gone fully into this subject in his *Metrologische Untersuchungen*, traces back the whole system of weights and measures prevalent among the civilized nations of antiquity to Babylon (p. 39). The scanty information we possess relative to the Hebrew weights and measures as a connected system, precludes the possibility of our assigning a definite place to it in ancient metrology. The names already referred to lead to the inference that Egypt rather than Babylonia was the quarter whence it was derived, and the identity of the Hebrew with the Athenian scales for liquids furnishes strong evidence that these had a community of origin. It is important, however, to observe in connection with this subject, that an identity of ratios does not involve an identity of absolute quantities, a distinction which very possibly escaped the notice of early writers, who were not unnaturally led to identify the measures in their absolute values, because they held the same relative positions in the several scales.

We divide the Hebrew measures into two classes, according as they refer to length or capacity, and subdivide each of these classes into two, the former into measures of length and distance, the latter into liquid and dry measures.

1. Measures of length.

(1.) The denominations referring to length were derived for the most part from the arm and hand. We may notice the following four as derived from this source: (*a.*) The *etsba*,[a] or finger's breadth, mentioned only in Jer. lii. 21. (*b.*) The *tephach*,[b] or hand breadth (Ex. xxv. 25; 1 K. vii. 26; 2 Chr. iv. 5), applied metaphorically to a short period of time in Ps. xxxix. 5. (*c.*) The *zereth*,[c] or span, the distance between the extremities of the thumb and the little finger in the extended hand (Ex. xxviii. 16; 1 Sam. xvii. 4; Ez. xliii. 13), applied generally to describe any small measure in Is. xl 12. (*d.*) The *ammâh*,[d] or cubit, the distance from the elbow to the extremity of the middle finger. This occurs very frequently in the Bible in relation to buildings, such as the Ark (Gen. vi. 15), the Tabernacle (Ex. xxvi., xxvii.), and the Temple (1 K. vi. 2; Ez. xl., xli.), as well as in relation to man's stature (1 Sam. xvii. 4; Matt. vi. 27), and other objects (Esth. v. 14; Zech. v. 2). In addition to the above we may notice: (*e.*) The *gómed*,[e] lit. a *rod*, applied to Eglon's dirk (Judg. iii. 16). Its length is uncertain, but it probably fell below the cubit, with which it is identified in the A. V. (*f.*) The *kâneh*,[f] or reed (compare our word "cane") for measuring buildings on a large scale (Ez. xl 5–8, xli. 8, xlii. 16–19).

Little information is furnished by the Bible itself as to the relative or absolute lengths described under the above terms. With the exception of the notice that the reed equals six cubits (Ez. xl. 5), we have no intimation that the measures were combined in anything like a scale. We should indeed infer the reverse, from the circumstance that Jeremiah speaks of "four fingers," where according to the scale, he would have said "a hand breadth;" that in the description of Goliath's height (1 Sam. xvii. 4), the expression "six cubits and a span," is used instead of "six cubits and a half;" and that Ezekiel mentions "span" and "half a cubit" in close juxtaposition (xliii. 13, 17), as though they bore no relation to each other either in the ordinary or the long cubit. That the denominations held a certain ratio to each other, arising out of the proportions of the members in the body, could hardly escape notice; but it does not follow that they were ever worked up into an artificial scale. The most important conclusion to be drawn from the Biblical notices, is to the effect that the cubit, which may be regarded as the standard measure, was of varying length, and that, in order to secure accuracy, it was necessary to define the kind of cubit intended, the result being that the other denominations, if combined in a scale, would vary in like ratio. Thus in Deut. iii. 11, the cubit is specified to be "after the cubit of a man;" in 2 Chr. iii. 3, "after the first," or rather "after the older" measure; and in Ex. xli. 8, "a great cubit," or literally "a cubit

---

[a] אֶצְבַּע. [b] טֶפַח. [c] זֶרֶת.

[d] אַמָּה. This term is generally referred to a Coptic origin, being derived from a word, *make* or *mahi*, signifying the "fore-arm," which with the article prefixed becomes *ammahi* (Boeckh, p. 265). Gesenius, however, refers it to the Hebrew word signifying "mother," as though the fore-arm were in some sense the "mother of the arm" (*Thes.* p. 110).

[e] גֹּמֶד. [f] קָנֶה.

[g] That the expression רִאשׁוֹנָה applies to priority of time, as well as of order, is clear from many passages, as *e. g.*, 2 K. xvii. 34; Ezr. iii. 12; Hag. ii. 3

to the joint," which is further defined in xl. 5, to be "a cubit and an hand-breadth." These expressions involve one of the most knotty points of Hebrew archæology, namely, the number and the respective lengths of the Scriptural cubits. That there was more than one cubit, is clear; but whether there were three, or only two, is not so clear. We shall have occasion to refer to this topic again; for the present we shall confine ourselves to the consideration of the expressions themselves. A cubit "after the cubit of a man," implies the existence of another cubit, which was either longer or shorter than it, and from analogy it may be taken for granted that this second cubit would be the longer of the two. But what is meant by the "*ammâh* of a man?" Is it the *cubitus* in the anatomical sense of the term, in other words, the bone of the fore-arm between the elbow and the wrist? or is it the full cubit in the ordinary sense of the term, from the elbow to the extremity of the middle finger? What, again, are we to understand by Ezekiel's expression, "cubit to the joint?" The term *atstsîl*,[a] is explained by Gesenius (*Thes.* p. 144) of the *knuckles*, and not of the "armholes," as in the A. V. of Jer. xxxviii. 12, where our translators have omitted all reference to the word *yâdîcâ*, which follows it. A "cubit to the knuckles" would imply the space from the elbow to the knuckles, and as this cubit exceeded by a hand-breadth the ordinary cubit, we should infer that it was contradistinguished from the cubit that reached only to the wrist. The meaning of the word is, however, contested: Hitzig gives it the sense of a *connecting wall* (*Comm. on Jer.*). Sturmius (*Sciagr.* p. 94) understands it of the *edge* of the walls, and others in the sense of a *wing* of a building (Rosenmüller, *Schol. in Jer.*). Michaelis on the other hand understands it of the knuckles (*Supplem.* p. 119), and so does Saalschütz (*Archäol.* ii. 165). The expressions now discussed, taken together, certainly favor the idea that the cubit of the Bible did not come up to the full length of the cubit of other countries. A further question remains to be discussed, namely, whether more than two cubits were in vogue among the Hebrews. It is generally conceded that the "former" or "older" measure of 2 Chr. iii. 3, was the Mosaic or legal cubit, and that the modern measure, the existence of which is implied in that designation, was somewhat larger. Further, the cubit "after the cubit of a man" of Deut. iii. 11, is held to be a *common* measure in contradistinction to the Mosaic one, and to have fallen below this latter in point of length. In this case, we should have three cubits — the common, the Mosaic or old measure, and the new measure. We turn to Ezekiel and find a distinction of another character, namely, a long and a short cubit. Now, it has been urged by many writers, and we think with good reason, that Ezekiel would not be likely to adopt any other than the old orthodox Mosaic standard for the measurements of his ideal temple. If so, his long cubit would be identified with the *old* measure, and his short cubit with the one "after the cubit of a man," and the *new* measure of 2 Chr. iii. 3 would represent a still longer cubit than Ezekiel's long one. Other explanations of the prophet's language have, however, been offered. it has been sometimes assumed that, while living in Chaldæa he and his countrymen had adopted the long Babylonian cubit (Jahn, *Archæol.* § 113); but in this case his short cubit could not have belonged to the same country, inasmuch as the difference between these two amounted to only three fingers (Herod. i. 178). Again, it has been explained that his short cubit was the ordinary Chaldæan measure, and the long one the Mosaic measure (Rosenmüller. *in Ez.* xl. 5); but this is unlikely on account of the respective lengths of the Babylonian and the Mosaic cubits, to which we shall hereafter refer. Independently of these objections, we think that the passages previously discussed (Deut. iii. 11; 2 Chr. iii. 3) imply the existence of three cubits. It remains to be inquired whether from the Bible itself we can extract any information as to the length of the Mosaic or legal cubit. The notices of the height of the altar and of the height of the lavers in the Temple are of importance in this respect In the former case three cubits is specified (Ex xxvii. 1), with a direct prohibition against the use of steps (Ex. xx. 26); in the latter, the height of the base on which the laver was placed was three cubits (1 K. vii. 27). If we adopt the ordinary length of the cubit (say 20 inches), the heights of the altar and of the base would be 5 feet. But it would be extremely inconvenient, if not impossible, to minister at an altar, or to use a laver placed at such a height. In order to meet this difficulty without any alteration of the length of the cubit, it must be assumed[b] that an inclined plane led up to it, as was the case with the loftier altar of the Temple (Mishn. *Midd.* 3, §§ 1, 3). But such a contrivance is contrary to the spirit of the text; and, even if suited to the altar, would be wholly needless for the lavers. Hence Saalschütz infers that the cubit did not exceed a Prussian foot, which is less than an English foot (*Archäol.* ii. 167). The other instances adduced by him are not so much to the point. The molten sea was not designed for the purpose of bathing (though this impression is conveyed by 2 Chr. iv. 6 as given in the A. V.), and therefore no conclusion can be drawn from the depth of the water in it. The height of Og, as inferred from the length of his bedstead (9 cubits, Deut. iii. 11), and the height of Goliath (6 cubits and a span, 1 Sam. xvii. 4), are not inconsistent with the idea of a cubit about 18 inches long, if credit can be given to other recorded instances of extraordinary stature (Plin. vii. 2, 16; Herod. i. 68; Joseph. *Ant.* xviii. 4, § 5). At the same time the rendering of the LXX. in 1 Sam. xvii. 4, which is followed by Josephus (*Ant.* vi. 9, § 1), and which reduces the number of cubits to four, suggests either an error in the Hebrew text, or a considerable increase in the length of the cubit in later times.

The foregoing examination of Biblical notices has tended to the conclusion that the cubit of early times fell far below the length usually assigned to it; but these notices are so scanty and ambiguous that this conclusion is by no means decisive. We now turn to collateral sources of information, which we will follow out as far as possible in chronological order. The earliest and most reliable testimony as to the length of the cubit is supplied by the existing specimens of old Egyptian measures.

Several of these have been discovered in tombs, carrying us back at all events to 1700 B. C., while the Nilometer at Elephantiné exhibits the length of the cubit in the time of the Roman emperors. No great difference is exhibited in these measures, the longest being estimated at about 21 inches, and the shortest at about 20½, or exactly 20.4729 inches (Wilkinson, *Anc. Eg.* ii. 258). They are divided into 28 digits, and in this respect contrast with the Mosaic cubit, which, according to Rabbinical authorities, was divided into 24 digits. There is some difficulty in reconciling this discrepancy with the almost certain fact of the derivation of the cubit from Egypt. It has been generally surmised that the Egyptian cubit was of more than one length, and that the sepulchral measures exhibit the shorter as well as the longer by special marks. Wilkinson denies the existence of more than one cubit (*Anc. Eg.* ii. 257–259), apparently on the ground that the total lengths of the measures do not materially vary. It may be conceded that the measures are intended to represent the same length, the variation being simply the result of mechanical inaccuracy; but this does not decide the question of the double cubit, which rather turns on the peculiarities of notation observable on these measures. For a full discussion of this point we must refer the reader to Thenius's essay in the *Theologische Studien und Kritiken* for 1846, pp. 297–342. Our limits will permit only a brief statement of the facts of the case, and of the views expressed in reference to them. The most perfect of the Egyptian cubit measures are those preserved in the Turin and Louvre Museums. These are unequally divided into two parts, the one on the right hand containing 15, and the other 13 digits. In the former part the digits are subdivided into aliquot parts from $\frac{1}{2}$ to $\frac{1}{16}$, reckoning from right to left. In the latter part the digits are marked on the lower edge in the Turin, and on the upper edge in the Louvre measure. In the Turin measure the three left-hand digits exceed the others in size, and have marks over them indicating either fingers or the numerals 1, 2, 3. The four left-hand digits are also marked off from the rest by a double stroke, and are further distinguished by hieroglyphic marks supposed to indicate that they are digits of the old measure. There are also special marks between the 6th and 7th, and between the 10th and 11th digits of the left hand portion. In the Louvre cubit two digits are marked off on the lower edge by lines running in a slightly transverse direction, thus producing a greater length than is given on the upper side. It has been found that each of the three above specified digits in the Turin measure $= \frac{1}{24}$ of the whole length, less these three digits; or, to put it in another form, the four left-hand digits $= \frac{1}{8}$ of the 25 right-hand digits: also that each of the two digits in the Louvre measure $= \frac{1}{24}$ of the whole length, less these two digits; and further, that twice the left half of either measure = the whole length of the Louvre measure, less the two digits. Most writers on the subject agree in the conclusion that the measures contain a combination of two, if not three, kinds of cubit. Great difference of opinion, however, is manifested as to particulars. Thenius makes the difference between the royal and old cubits to be no more than two digits, the average length of the latter being 484.289[a] millimètres, or 19.066 inches, as compared with 523.524 millimètres, or 20.611 inches and 523 millimètres, or 20.591 inches, the lengths of the Turin and Louvre measures respectively. He accounts for the additional two digits as originating in the practice of placing the two fingers crossways at the end of the arm and hand used in measuring, so as to mark the spot up to which the cloth or other article has been measured. He further finds, in the notation of the Turin measure, indications of a third or ordinary cubit 23 digits in length. Another explanation is that the old cubit consisted of 24 old or 25 new digits, and that its length was 462 millimètres, or 18.189 inches; and again, others put the old cubit at 24 new digits, as marked on the measures. The relative proportions of the two would be, on these several hypotheses, as 28 : 26, as 28 : 25, and as 28 : 24.

The use of more than one cubit appears to have also prevailed in Babylon, for Herodotus states that the "royal" exceeded the "moderate" cubit (πῆχυς μέτριος) by three digits (i. 178). The appellation "royal," if borrowed from the Babylonians, would itself imply the existence of another; but it is by no means certain that this other was the "moderate" cubit mentioned in the text. The majority of critics think that Herodotus is there speaking of the ordinary Greek cubit (Boeckh, p. 214), though the opposite view is affirmed by Grote in his notice of Boeckh's work (*Class. Mus.* i. 28). Even if the Greek cubit be understood, a further difficulty arises out of the uncertainty whether Herodotus is speaking of digits as they stood on the Greek or on the Babylonian measure In the one case the proportions of the two would be as 8 : 7, in the other case as 9 : 8. Boeckh adopts the Babylonian digits (without good reason, we think), and estimates the Babylonian royal cubit at 234.2743 Paris lines, or 20.806 inches (p. 219). A greater length would be assigned to it according to the data furnished by M. Oppert, as stated in Rawlinson's *Herod.* i. 315; for if the cubit and foot stood in the ratio of 5 : 3, and if the latter contained 15 digits, and had a length of 315 millimètres, then the length of the ordinary cubit would be 525 millimètres, and of the royal cubit, assuming, with Mr. Grote, that the cubits in each case were Babylonian, 588 millimètres, or 23.149 inches.

Reverting to the Hebrew measures, we should be disposed to identify the *new* measure implied in 2 Chr. iii. 3 with the full Egyptian cubit; the "old" measure and Ezekiel's cubit with the lesser one, either of 26 or 24 digits; and the "cubit of a man" with the third one of which Thenius speaks. Boeckh, however, identifies the Mosaic measure with the full Egyptian cubit, and accounts for the difference in the number of digits on the hypothesis that the Hebrews substituted a division into 24 for that into 28 digits, the size of the digits being of course increased (pp. 266, 267). With regard to the Babylonian measure, it seems highly improbable that either the ordinary or the royal cubit could be identified with Ezekiel's short cubit (as

[a] The precise amount of 484.289 is obtained by taking the mean of the four following amounts: $\frac{24}{25}$ of 523.524, the total length of the Turin measure, = 496.120; twice the left-hand division of the same measure, = 480.792; the length of the 26 digits on the Louvre measure, = 486.375; and twice the left-hand division of the same, = 483.360.

Rosenmüller thinks), seeing that its length on either of the computations above offered exceeded that of the Egyptian cubit.

In the Mishnah the Mosaic cubit is defined to be one of six palms (*Celim*, p. 17, § 10). It is termed the moderate[a] cubit, and is distinguished from a lesser cubit of five palms on the one side (*Celim, ibid.*), and on the other side from a larger one, consisting, according to Bartenora (*in Cel.* 17, § 9), of six palms and a digit. The palm consisted, according to Maimonides (*ibid.*), of four digits; and the digit, according to Arias Montanus (*Ant.* p. 113), of four barleycorns. This gives 144 barleycorns as the length of the cubit, which accords with the number assigned to the *cubitus justus et mediocris* of the Arabians (Boeckh, p. 246). The length of the Mosaic cubit, as computed by Thenius (after several trials with the specified number of barleycorns of middling size, placed side by side), is 214.512 Paris lines, or 19.0515 inches (*St. u. Kr.* p. 110). It seems hardly possible to arrive at any very exact conclusion by this mode of calculation. Eisenschmid estimated 144 barleycorns as equal to 238.35 Paris lines (Boeckh, p. 269), perhaps from having used larger grains than the average. The writer of the article on "Weights and Measures" in the *Penny Cyclopædia* (xviii. 198) gives, as the result of his own experience, that 38 average grains make up 5 inches, in which case 144 = 18.947 inches; while the length of the Arabian cubit referred to is computed at 213.058 Paris lines (Boeckh, p. 247). The Talmudists state that the Mosaic cubit was used for the edifice of the Tabernacle and Temple, and the lesser cubit for the vessels thereof.[b] This was probably a fiction; for the authorities were not agreed among themselves as to the extent to which the lesser cubit was used, some of them restricting it to the golden altar, and parts of the brazen altar (Mishnah. *Cel.* p. 17, § 10). But this distinction, fictitious as it may have been, shows that the cubits were not regarded in the light of *sacred* and *profane*, as stated in works on Hebrew archæology. Another distinction, adopted by the Rabbinists in reference to the palm, would tend to show that they did not rigidly adhere to any definite length of cubit: for they recognized two kinds of palms, one wherein the fingers lay loosely open, which they denominated a *smiling* palm; the other wherein the fingers were closely compressed, and styled the *grieving* palm (Carpzov, *Appar.* pp. 674, 676).

The conclusions to be drawn from the foregoing considerations are not of the decisive character that we would wish. For while the collateral evidence derived from the practice of the adjacent countries and from later Jewish authorities favors the idea that the Biblical cubit varied but little from the length usually assigned to that measure, the evidence of the Bible itself is in favor of one considerably shorter. This evidence is, however, of so uncertain a character, turning on points of criticism and on brief notices, that we can hardly venture to adopt it as our standard. We accept, therefore, with reservation, the estimate of Thenius, and from the cubit we estimate the absolute length of the other denominations according to the proportions existing between the members of the body, the cubit equaling the two spans (compare Ex. xxv. 3, 10 with Joseph. *Ant.* iii. 6, §§ 5, 6), the span three palms, and the palm four digits.

| | | | | | Inches. |
|---|---|---|---|---|---|
| Digit | . . . . . | | | | .7938 |
| 4 | Palm . . . . . | | | | 3.1753 |
| 12 | 3 | Span . . . . . | | | 9.5257 |
| 24 | 6 | 2 | Cubit . . . . | | 19.0515 |
| 144 | 36 | 12 | 6 | Reed . | 114.3090 |

Land and area were measured either by the cubit (Num. xxxv. 4, 5; Ez. xl. 27) or by the reed (Ex. xlii. 20, xliii. 17, xlv. 2, xlviii. 20; Rev. xxi. 16). There is no indication in the Bible of the use of a square measure by the Jews.[c] Whenever they wished to define the size of a plot, they specified its length and breadth, even if it were a perfect square, as in Ez. xlviii. 16. The difficulty of defining an area by these means is experienced in the interpretation of Num. xxxv. 4, 5, where the suburbs of the Levitical cities are described as reaching outward from the wall of the city 1,000 cubits round about, and at the same time 2,000 cubits on each side from without the city. We can hardly understand these two measurements otherwise than as applying, the one to the width, the other to the external boundary of the suburb, the measurements being taken respectively perpendicular and parallel to the city walls. But in this case it is necessary to understand the words rendered "from without the city," in ver. 5, as meaning *to the exclusion of* the city, so that the length of the city wall should be added in each case to the 2,000 cubits. The result would be that the size of the areas would vary, and that where the city walls were unequal in length, the sides of the suburb would be also unequal. For instance, if the city wall was 500 cubits long, then the side of the suburb would be 2,500 cubits; if the city wall were 1,000 cubits, then the side of the suburb would be 3,000 cubits. Assuming the existence of two towns, 500 and 1,000 cubits square, the area of the suburb would in the former case = 6,000,000 square cubits, and would be 24 times the size of the town; while in the latter case the suburb would be 8,000,000 square cubits, and only 8 times the size of the town. This explanation is not wholly satisfactory, on account of the disproportion of the suburbs as compared with the towns; nevertheless any other explanation only exaggerates this disproportion. Keil, in his comment on Josh. xiv. 4, assumes that the city wall was in all cases to be regarded as 1,000 cubits long, which with the 1,000 cubits outside the wall, and measured in the same direction as the wall, would make up the 2,000 cubits, and would give to the side of the suburb in every case a length of 3,000 cubits. The objection to this view is that there is no evidence as to an uniform length of the city walls, and that the suburb might have been more conveniently described as 3,000 cubits on each side. All ambiguity

---

[a] א"ר חבינונית.

[b] Hence they were denominated אמת חבנין, "cubit of the building," and א"ר חכלים, "cubit of the vessels."

[c] The term "acre" occurs in the A. V. as the equivalent for *maánah* (מַעֲנָה) in 1 Sam. xiv 14 and for *tsemed* (צֶמֶד) in Is. v. 10. The latter term also occurs in the passage first quoted, and would with more consistency be rendered *acre* instead of "yoke." It means such an amount of land as a yoke of oxen would plough in a day. *Maanah* means a *furrow*.

Digitized by Google

would have been avoided if the size of the suburb had been decided either by absolute or relative acreage; in other words, if it were to consist in all cases of a certain fixed acreage outside the walls, or if it were made to vary in a certain ratio to the size of the town. As the text stands, neither of these methods can be deduced from it.

(2.) The measures of distance noticed in the Old Testament are the three following: (*a.*) The *tsa'ad*,[a] or pace (2 Sam. vi. 13), answering generally to our yard. (*b.*) The *Cibrath hâârets*,[b] rendered in the A. V. "a little way" or "a little piece of ground" (Gen. xxxv. 16, xlviii. 7; 2 K. v. 19). The expression appears to indicate some definite distance, but we are unable to state with precision what that distance was. The LXX. retains the Hebrew word in the form Χαβραθά, as though it were the name of a place, adding in Gen. xlviii. 7 the words κατὰ τὸν ἱππόδρομον, which is thus a second translation of the expression. If a certain distance was intended by this translation, it would be either the ordinary length of a race-course, or such a distance as a horse could travel without being over-fatigued, in other words, a stage. But it probably means a locality, either a race-course itself, as in 3 Macc. iv. 11, or the space outside the town walls where the race-course was usually to be found. The LXX. give it again in Gen. xlviii. 7 as the equivalent for Ephrath. The Syriac and Persian versions render *cibrath* by parasang, a well-known Persian measure, generally estimated at 30 stades (Herod. ii. 6, v. 53), or from 3½ to 4 English miles, but sometimes at a larger amount, even up to 60 stades (Strab. xi. 518). The only conclusion to be drawn from the Bible is that the *cibrath* did not exceed and probably equaled the distance between Bethlehem and Rachel's burial-place, which is traditionally identified with a spot 1½ mile north of the town. (*c.*) The *derec yóm*,[c] or *mahâlac yóm*,[d] a day's journey, which was the most usual method of calculating distances in travelling (Gen. xxx. 36, xxxi. 23; Ex. iii. 18, v. 3; Num. x. 33, xi. 31, xxxiii. 8; Deut. i. 2; 1 K. xix. 4; 2 K. iii. 9; Jon. iii 3; 1 Macc. v. 24, vii. 45; Tob. vi. 1), though but one instance of it occurs in the New Testament (Luke ii. 44). The distance indicated by it was naturally fluctuating according to the circumstances of the traveller or of the country through which he passed. Herodotus variously estimates it at 200 and 150 stades (iv. 101, v. 53); Marinus (*ap. Ptol.* i. 11) at 150 and 172 stades; Pausanias (x. 33, § 2) at 150 stades; Strabo (i. 35) at from 250 to 300 stades; and Vegetius (*De Re Mil.* i. 11) at from 20 to 24 miles for the Roman army. The ordinary day's journey among the Jews was 30 miles; but when they travelled in companies only 10 miles; Neapolis formed the first stage out of Jerusalem, according to the former, and Beeroth according to the latter computation (Lightfoot, *Exerc. in Luc.* ii. 44). It is impossible to assign any distinct length to the day's journey: Jahn's estimate of 33 miles, 172 yards, and 4 feet, is based upon the false assumption that it bore some fixed ratio to the other measures of length.

In the Apocrypha and New Testament we meet with the following additional measures: (*d.*) The Sabbath-day's journey,[e] already discussed in separate article. (*e.*) The *stadion*,[f] or "furlong," a Greek measure introduced into Asia subsequently to Alexander's conquest, and hence first mentioned in the Apocrypha (2 Macc. xi. 5, xii. 9, 17, 29), and subsequently in the New Testament (Luke xxiv. 13; John vi. 19, xi. 18; Rev. xiv. 20, xxi. 16). Both the name and the length of the stade were borrowed from the foot-race course at Olympia. It equaled 600 Greek feet (Herod. ii. 149), or 125 Roman paces (Plin. ii. 23), or 606¾ feet of our measure. It thus falls below the furlong by 53¼ feet. The distances between Jerusalem and the places Bethany, Jamnia, and Scythopolis, are given with tolerable exactness at 15 stades (John xi. 18), 240 stades (2 Macc. xii. 9), and 600 stades (2 Macc. xii. 29). In 2 Macc. xi. 5 there is an evident error, either of the author or of the text, in respect to the position of Bethsura, which is given as only 5 stades from Jerusalem. The Talmudists describe the stade under the term *rês*,[g] and regarded it as equal to 625 feet and 125 paces (Carpzov, *Appar.* p. 679). (*f.*) The Mile,[h] a Roman measure, equalling 1,000 Roman paces, 8 stades, and 1,618 English yards [MILE].

2. Measures of capacity.

The measures of capacity for liquids were: (*a.*) The log[i] (Lev. xiv. 10, etc.), the name originally signifying a "basin." (*b.*) The hin,[k] a name of Egyptian origin, frequently noticed in the Bible (Ex. xxix. 40, xxx. 24; Num. xv. 4, 7, 9; Ex. iv. 11, etc.). (*c.*) The bath,[l] the name meaning "measured," the largest of the liquid measures (1 K. vii. 26, 38; 2 Chr. ii. 10; Ezr. vii. 22; Is. v. 10). With regard to the relative values of these measures we learn nothing from the Bible, but we gather from Josephus (*Ant.* iii. 8, § 3) that the bath contained 6 hins (for the bath equaled 72 *xestæ* or 12 *choës*, and the hin 2 *choës*), and from the Rabbinists that the hin contained 12 logs (Carpzov, *Appar.* p. 685). The relative values therefore stand thus: —

| Log | Hin | Bath |
|---|---|---|
| 12 | | |
| 72 | 6 | |

The dry measure contained the following denominations: (*a.*) The cab,[m] mentioned only in 2 K. vi. 25, the name meaning literally *hollow* or *concave*. (*b.*) The omer,[n] mentioned only in Ex. xvi. 16–36. The same measure is elsewhere termed *issârôn*,[o] as being the tenth part of an ephah (comp. Ex. xvi. 36), whence in the A. V. "tenth deal" (Lev. xiv. 10, xxiii. 13; Num. xv. 4, etc.). The word omer implies a *heap*, and secondarily a *sheaf*. (*c.*) The *shâlish*,[p] or "measure," this being the etymological meaning of the term, and appropriately applied to it, inasmuch as it was the ordinary measure for household purposes (Gen. xviii 6; 1 Sam. xxv. 18; 2 K. vii. 1, 16). The Greek equivalent occurs in Matt. xiii. 33; Luke xiii. 21. The seah was otherwise termed *shâlish*,[q] as being the third part of an ephah (Is. xl. 12; Ps. lxxx. 5). (*d.*) The ephah,[r] a word of Egyptian origin, and

of frequent recurrence in the Bible (Ex. xvi. 36; Lev. v. 11, vi. 20; Num. v. 15, xxviii. 5; Judg. vi. 19; Ruth ii. 17; 1 Sam. i. 24, xvii. 17; Ez. xlv. 11, 13, xlvi. 5, 7, 11, 14). (*e.*) The *lethec*,[a] or "half-homer," literally meaning what is *poured out*: it occurs only in Hos. iii. 2. (*f.*) The homer,[b] meaning *heap* (Lev. xxvii. 16; Num. xi 32; Is. v. 10; Ez. xlv. 13). It is elsewhere termed cor,[c] from the circular vessel in which it was measured (1 K. iv. 22, v. 11; 2 Chr. ii. 10, xxvii. 5; Ezr. vii. 22; Ez. xlv. 14). The Greek equivalent occurs in Luke xvi. 7.

The relative proportions of the dry measures are to a certain extent expressed in the names *issârón*, meaning a tenth, and *shâlish*, a third. In addition we have the Biblical statement that the omer is the tenth part of the ephah (Ex. xvi. 36), and that the ephah was the tenth part of a homer, and corresponded to the bath in liquid measure (Ez. xlv. 11). The Rabbinists supplement this by stating that the ephah contained three seahs, and the seah six cabs (Carpzov, p. 683). We are thus enabled to draw out the following scale of relative values: —

| Cab | Omer | Seah | Ephah | Homer |
|---|---|---|---|---|
| 1⅔ | 1 | | | |
| 6 | 3⅓ | 1 | | |
| 18 | 10 | 3 | 1 | |
| 180 | 100 | 30 | 10 | 1 |

The above scale is constructed, it will be observed, on a combination of decimal and duodecimal ratios, the former prevailing in respect to the omer, ephah, and homer, the latter in respect to the cab, seah, and ephah. In the liquid measure the duodecimal ratio alone appears, and hence there is a fair presumption that this was the original, as it was undoubtedly the most general, principle on which the scales of antiquity were framed (Boeckh, p. 38). Whether the decimal division was introduced from some other system, or whether it was the result of local usage, there is no evidence to show.

The absolute values of the liquid and dry measures form the subject of a single inquiry, inasmuch as the two scales have a measure of equal value, namely, the bath and the ephah (Ex. xlv. 11); if either of these can be fixed, the conversion of the other denominations into their respective values readily follows. Unfortunately the data for determining the value of the bath or ephah are both scanty and conflicting. Attempts have been made to deduce the value of the bath from a comparison of the dimensions and the contents of the molten sea as given in 1 K. vii. 23–26. If these particulars had been given with greater accuracy and fullness, they would have furnished a sound basis for a calculation; but, as the matter now stands, uncertainty attends every statement. The diameter is given as 10 cubits, and the circumference as 30 cubits, the diameter being stated to be "from one brim to the other." Assuming that the vessel was circular, the proportions of the diameter and circumference are not sufficiently exact for mathematical purposes, nor are we able to decide whether the diameter was measured from the internal or the external edge of the vessel. The shape of the vessel has been variously conceived to be circular and polygonal, cylindrical and hemispherical, with perpendicular and with bulging sides. The contents are given as 2,000 baths in 1 K. vii. 26, and 3,000 baths in 2 Chr. iv. 5, the latter being probably a corrupt text. Lastly, the length of the cubit is undefined, and hence every estimate is attended with suspicion. The conclusions drawn have been widely different, as might be expected. If it be assumed that the form of the vessel was cylindrical (as the description *primâ facie* seems to imply), that its clear diameter was 10 cubits of the value of 19·0515 English inches each, and that its full contents were 2,000 baths, then the value of the bath would be 4·8965 gallons; for the contents of the vessel would equal 2,715,638 cubic inches, or 9,793 gallons. If, however, the statement of Josephus (*Ant.* viii. 3, § 5), as to the hemispherical form of the vessel, be adopted, then the estimate would be reduced. Saigey, as quoted by Boeckh (p. 261), on this hypothesis calculates the value of the bath at 18.066 French litres, or 3.9807 English gallons. If, further, we adopt Saalschütz's view as to the length of the cubit, which he puts at 15 Dresden inches at the highest, the value of the bath will be further reduced, according to his calculation, to 10⅓ Prussian quarts, or 2.6057 English gallons; while at his lower estimate of the cubit at 12 inches, its value would be little more than one half of this amount (*Archäol.* ii. 171). On the other hand, if the vessel bulged, and if the diameter and circumference were measured at the neck or narrowest part of it, space might be found for 2,000 or even 3,000 baths of greater value than any of the above estimates. It is therefore hopeless to arrive at any satisfactory conclusion from this source. Nevertheless we think the calculations are not without their use, as furnishing a certain amount of presumptive evidence. For, setting aside the theory that the vessel bulged considerably, for which the text furnishes no evidence whatever, all the other computations agree in one point, namely, that the bath fell far below the value placed on it by Josephus, and by modern writers on Hebrew archæology generally, according to whom the bath measures between 8 and 9 English gallons.

We turn to the statements of Josephus and other early writers. The former states that the bath equals 72 *xesta* (*Ant.* viii. 2, § 9), that the hin equals 2 Attic *choës* (*ibid.* iii. 8, §§ 3, 9, § 4), that the seah equals 1½ Italian *modii* (*ibid.* ix. 4, § 5), that the cor equals 10 Attic *medimni* (*ibid.* xv. 9, § 2), and that the issaron or omer equals 7 Attic *cotylæ* (*ibid.* iii. 6, § 6). It may further be implied from *Ant.* ix. 4, § 4, as compared with 2 K. vi. 25, that he regarded the cab as equal to 4 *xestês*. Now, in order to reduce these statements to consistency, it must be assumed that in *Ant.* xv. 9, § 2, he has confused the *medimnus* with the *metrêtês*, and in *Ant.* iii. 6, § 6, the *cotylê* with the *xestês*. Such errors throw doubt on his other statements, and tend to the conclusion that Josephus was not really familiar with the Greek measures. This impression is supported by his apparent ignorance of the term *metrêtês*, which he should have used not only in the passage above noticed, but also in viii. 2, § 9, where he would naturally have substituted it for 72 *xesta*, assuming that these were Attic *xesta*. Nevertheless his testimony must be taken as decisively in favor of the identity of the Hebrew bath with the Attic *metrêtês*.

Jerome (*in Matt.* xiii. 33) affirms that the seah equals 1½ *modii*, and (*in Es.* xlv. 11) that the cor equals 30 *modii*, — statements that are glaringly inconsistent, inasmuch as there were 30 seahs in the cor. The statements of Epiphanius in his treatise *De Mensuris* are equally remarkable for inconsistency. He states (ii. 177) that the cor equals 30 *modii*: on this assumption the bath would equal 51 *sextarii*, but he gives only 50 (p. 178): the seah would equal 1 *modius*, but he gives 1½ *modii* (p. 178), or, according to his estimate of 17 *sextarii* to the *modius*, 21½ *sextarii*, though elsewhere he assigns 56 *sextarii* as its value (p. 182): the omer would be 5$\frac{1}{10}$ *sextarii*, but he gives 7½ (p. 182), implying 45 *modii* to the cor: and, lastly, the ephah is identified with the Egyptian *artabe* (p. 182), which was either 4½ or 3½ *modii*, according as it was in the old or the new measure, though according to his estimate of the cor it would only equal 3 *modii*. Little reliance can be placed on statements so loosely made, and the question arises whether the identification of the bath with the *metrétés* did not arise out of the circumstance that the two measures held the same relative position in the scales, each being subdivided into 72 parts, and, again, whether the assignment of 30 *modii* to the cor did not arise out of there being 30 seahs in it. The discrepancies can only be explained on the assumption that a wide margin was allowed for a long measure, amounting to an increase of 50 per cent. This appears to have been the case from the definitions of the seah or *σάτον* given by Hesychius, *μόδιος γέμων, ἤγουν, ἓν ἥμισυ μόδιον Ἰταλικόν*, and again by Suidas, *μόδιον ὑπερπεπληρωμένον, ὡς εἶναι μόδιον ἑνὰ καὶ ἥμισυν*. Assuming, however, that Josephus was right in identifying the bath with the *metrétés*, its value would be, according to Boeckh's estimate of the latter (pp. 261, 278), 1993.5 Paris cubic inches, or 8.7053 English gallons, but according to the estimate of Bertheau (*Gesch.* p. 73) 1,985.77 Paris cubic inches, or 8.6696 English gallons.

The Rabbinists furnish data of a different kind for calculating the value of the Hebrew measures. They estimated the log to be equal to six hen eggs, the cubic contents of which were ascertained by measuring the amount of water they displaced (Maimonides, *in Cel.* 17, § 10). On this basis Thenius estimated the log at 14.088 Paris cubic inches, or .06147 English gallon, and the bath at 1,014.39 Paris cubic inches, or 4.4286 gallons (*St. u. Kr.* pp. 101, 121). Again, the log of water is said to have weighed 108 Egyptian drachmæ,[a] each equalling 61 barleycorns (Maimonides, *in Beah*, 3, § 6, ed. Guisius.). Thenius finds that 6,588 barleycorns fill about the same space as 6 hen eggs (*St. u. Kr.* p. 112). And again, a log is said to fill a vessel 4 digits long, 4 broad, and 2$\frac{7}{10}$ high (Maimonides, *in Praf. Menachoth*). This vessel would contain 21.6 cubic inches, or .07754 gallon. The conclusion arrived at from these data would agree tolerably well with the first estimate formed on the notices of the molten sea.

As we are unable to decide between Josephus and the Rabbinists, we give a double estimate of the various denominations, adopting Bertheau's estimate of the *metrétés*: —

| | (*Josephus.*) Gallons. | | (*Rabbinists.*) Gallons. |
|---|---|---|---|
| Homer or Cor . . | 86.696 | or | 44.286 |
| Ephah or Bath . . | 8.6696 | or | 4.4286 |
| Seah . . . . . | 2.8898 | or | 1.4762 |
| Hin . . . . . | 1.4449 | or | .7381 |
| Omer . . . . . | .8669 | or | .4428 |
| Cab . . . . . | .4816 | or | .246 |
| Log . . . . . | .1204 | or | .0615 |

In the New Testament we have notices of the following foreign measures: (*a.*) The *metrétés*[b] (John ii. 6; A. V. "firkin"), for liquids. (*b.*) The *chœnix*[c] (Rev. vi. 6; A. V. "measure"), for dry goods. (*c.*) The *xestés*,[d] applied, however, not to the particular measure so named by the Greeks, but to any small vessel, such as a cup (Mark vii. 4, 8; A. V. "pot"). (*d.*) The *modius*, similarly applied to describe any vessel of moderate dimensions (Matt. v. 15; Mark iv. 21; Luke xi. 33; A. V. "bushel"); though properly meaning a Roman measure, amounting to about a peck.

The value of the Attic *metrétés* has been already stated to be 8.6696 gallons, and consequently the amount of liquid in six stone jars, containing on the average 2½ *metrétæ* each, would exceed 110 gallons (John ii. 6). Very possibly, however, the Greek term represents the Hebrew *bath*, and if the bath be taken at the lower estimate assigned to it, the amount would be reduced to about 60 gallons. Even this amount far exceeds the requirements for the purposes of legal purification, the tendency of Pharisaical refinement being to reduce the amount of water to a minimum, so that a quarter of a log would suffice for a person (Mishnah, *Yad.* 1, § 1) The question is one simply of archæological interest as illustrating the customs of the Jews, and does not affect the character of the miracle with which it is connected. The *chœnix* was $\frac{1}{48}$ of an Attic *medimnus*, and contained nearly a quart. It represented the usual amount of corn for a day's food, and hence a *chœnix* for a penny, or *denarius*, which usually purchased a bushel (Cic. *Verr.* iii. 81), indicated a great scarcity (Rev. vi. 6).

With regard to the use of fair measures, various precepts are expressed in the Mosaic law and other parts of the Bible (Lev. xix. 35, 36; Deut. xxv 14, 15; Prov. xx. 10; Es. xlv. 10), and in all probability standard measures were kept in the Temple, as was usual in the other civilized countries of antiquity (Boeckh. p. 12).

The works chiefly referred to in the present article are the following: Boeckh, *Metrologische Untersuchungen*, 1838; *Classical Museum*, vol. i.; *Theologische Studien und Kritiken* for 1846; Mishnah, ed. Surenhusius; Wilkinson, *Ancient Egyptians*, 2 vols. 1854; Epiphanius, *Opera*, 2 vols., ed. Petavius. W. L. B.

the use of the former word to denote a receptacle for water springing up freshly from the ground, while the latter usually denotes a reservoir for rain-water (Gen. xxvi. 19, 32; Prov. v. 15; John iv. 14).[a]

The special necessity of a supply of water (Judg. i. 15) in a hot climate has always involved among Eastern nations questions of property of the highest importance, and sometimes given rise to serious contention. To give a name to a well denoted a right of property, and to stop or destroy one once dug was a military expedient, a mark of conquest, or an encroachment on territorial right claimed or existing in its neighborhood. Thus the well Beer-sheba was opened, and its possession attested with special formality by Abraham (Gen. xxi. 30, 31). In the hope of expelling Isaac from their neighborhood, the Philistines stopped up the wells which had been dug in Abraham's time and called by his name, an encroachment which was stoutly resisted by the followers of Isaac (Gen. xxvi. 15–33; see also 2 K. iii. 19; 2 Chr. xxvi. 10; Burckhardt, *Notes*, ii. 185, 194, 204, 276). The Kuran notices abandoned wells as signs of desertion (Sur. xxii.). To acquire wells which they had not themselves dug, was one of the marks of favor foretold to the Hebrews on their entrance into Canaan (Deut. vi. 11). To possess one is noticed as a mark of independence (Prov. v. 15), and to abstain from the use of wells belonging to others, a disclaimer of interference with their property (Num. xx. 17, 19, xxi. 22). Similar rights of possession, actual and hereditary, exist among the Arabs of the present day. Wells, Burckhardt says, in the interior of the Desert, are exclusive property, either of a whole tribe, or of individuals whose ancestors dug the wells. If a well be the property of a tribe, the tents are pitched near it, whenever rain-water becomes scarce in the desert; and no other Arabs are then permitted to water their camels. But if the well belongs to an individual, he receives presents from all strange tribes who pass or encamp at the well, and refresh their camels with the water of it. The property of such a well is never alienated; and the Arabs say, that the possessor is sure to be fortunate, as all who drink of the water bestow on him their benedictions (*Notes on Bed.* i. 228, 229; comp. Num. xxi. 17, 18, and Judg. i. 15).

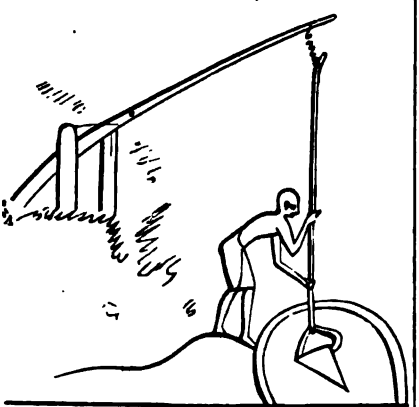
It is thus easy to understand how wells have become in many cases links in the history and landmarks in the topography both of Palestine and of the Arabian Peninsula. The well once dug in the rocky soil of Palestine might be filled with earth or stones, but with difficulty destroyed, and thus the wells of Beer-sheba, and the well near *Nâbulus*, called Jacob's well, are among the most undoubted witnesses of those transactions of sacred history in which they have borne, so to speak, a prominent part. On the other hand, the wells dug in the sandy soil of the Arabian valleys, easily destroyed, but easily renewed, often mark, by their ready supply, the stations at which the Hebrew pilgrims slaked their thirst, or, as at Marah, were disappointed by the bitterness of the water. In like manner the stations of the Mohammedan pilgrims from Cairo and Damascus to Mecca (the Hadj route) are marked by the wells (Robinson, i. 66. 69, 204, 205, ii. 283; Burckhardt, *Syria*, pp. 318, 472, 474; App. III. 656, 660: Shaw, *Trav.* 314; Niebuhr, *Descrip. de l'Ar.*, pp. 347, 348; Wellsted, *Trav.* ii. 40, 43, 64, 457. App.).

Wells in Palestine are usually excavated from the solid limestone rock, sometimes with steps to descend into them (Gen. xxiv. 16; Burckhardt, *Syria*, p. 232; *Col. Ch. Chron.* 1858, p. 470). The brims are furnished with a curb or low wall of stone, bearing marks of high antiquity in the furrows worn by the ropes used in drawing water (Rob. i. 204). This curb, as well as the stone cover, which is also very usual, agrees with the directions of the Law, as explained by Philo and Josephus, namely, as a protection against accident (Ex. xxi. 33; Joseph. *Ant.* iv. 8, § 37; Philo, *De Spec. Leg.* iii. 27, ii. 324, ed. Mangey; Maundrell, in *E. Trav.* 435).[b] It was on a curb of this sort that our Lord sat when He conversed with the woman of Samaria (John iv. 6), and it was this, the usual stone cover, which the woman placed on the mouth of the well at Bahurim (2 Sam. xvii. 19), where A. V. weakens the sense by omitting the article.[c] Sometimes the wells are covered with cupolas raised on pillars (Burckhardt, App. V. p. 665).

The usual methods for raising water are the following: (1.) The rope and bucket, or water-skin (Gen. xxiv. 14–20; John iv. 11). When the well is deep the rope is either drawn over the curb by the man or woman, who pulls it out to the distance of its full length, or by an ass or ox employed in the same way for the same purpose. Sometimes a pulley or wheel is fixed over the well to assist the work (Robinson, i. 204, ii. 248; Niebuhr, *Descr. de l'Ar.* 137, pl. 15; *Col. Ch. Chron.* 1859, p. 350; Chardin, *Voy.* iv. 98; Wellsted, *Trav.* i. 280). (2.) The sakiyeh, or Persian wheel. This consists of a vertical wheel furnished with a set of buckets or earthen jars, attached to a cord passing over the wheel, which descend empty and return full as the wheel revolves. On the axis of the wheel revolves a second wheel, parallel to it, with cogs which turn a third wheel set horizontally at a sufficient height from the ground to allow the animal used in turning it to pass under. One or two cows or bulls are yoked to a pole which passes through the axis of this wheel, and as they travel round it turn the whole machine (Num. xxiv. 7; Lane, *Mod. Eg.* ii. 163; Niebuhr, *Voy.* i. 190; *Col. Ch. Chron.* 1859, p. 352; Shaw, pp. 291, 408). (3.) A modification of the last method, by which a man, sitting opposite to a wheel furnished with

---

a * The A.V. does not always observe the proper distinction between "well" and "fountain" or "spring." Thus it renders the same word (עַיִן) "well" in Judg. vii. 1; Neh. ii. 13, etc., and "fountain" in Gen. xvi. 7; Num. xxxiii. 9, etc. There is another inconsistency in the A. V., which is a source of confusion. Our translators sometimes transfer the first part of the compound expression, as "En-rogel," "En-shemesh," "En-tappuah," etc., and sometimes translate it, as "Well of Harod," "Dragon Well," etc. H.



b * Mr. E. H. Palmer, in passing from Sinai to Nakhl, went up the *Wady Bîyâr*, of which he says: "This wady is so called from the wells (*Bi-ár*) which exist near its head, and which, in their form and use remarkably illustrate the passage in Genesis xxix 7-9: 'Till they roll the stone from the well's mouth then we water the sheep.'" (*Quart. Statem. Pal. Ex. Fund*, No. v. p. 257.) S. W.

Digitized by Google

buckets, turns it by drawing with his hands one set of spokes prolonged beyond its circumference, and pushing another set from him with his feet (Niebuhr, *Voy.* i. p. 120, pl. 15; Robinson, ii. 22, iii. 89). (4.) A method very common, both in ancient and modern Egypt, is the shadoof, a simple contrivance consisting of a lever moving on a pivot, which is loaded at one end with a lump of clay or some other weight, and has at the other a bowl or bucket. This is let down into the water, and, when raised, emptied into a receptacle above (Niebuhr, *Voy.* i. 120; Lane, *M. E.* ii. 163; Wilkinson, *A. E.* i. 35, 72, ii. 4).

Wells are usually furnished with troughs of wood or stone,* into which the water is emptied for the use of persons or animals coming to the wells. In modern times an old stone sarcophagus is often used for this purpose. The bucket is very commonly of skin (Burckhardt, *Syria*, p. 63; Robinson, i. 204, ii. 21, 315, iii. 35, 89, 109, 134; Lord Lindsay, *Tyre*. pp. 235, 237; Wilkinson, *A. E.* l. c.; Gen. xxiv. 20; Ex. ii. 16).

Ancient Egyptian machine for raising water, identical with the *shadoof* of the present day. (Wilkinson.)

Unless machinery is used, which is commonly worked by men, women are usually the water-carriers. They carry home their water-jars on their heads (Lindsay, p. 236). Great contentions often occur at the wells, and they are often, among Bedouins, favorite places for attack by enemies (Ex. ii. 16, 17; Judg. v. 11; 2 Sam. xxiii. 15, 16; Burckhardt, *Syria*, p. 63; *Notes on Bed.* i. 228; *Col. Ch. Chron.* 1859, p. 473; Lane, *M. E.* i. 252; Robinson, iii. 153). H. W. P.

* **WELL IS HIM**, Eccles. xxv. 8, 9 (A. V.), exhibits a curious remnant of the old use of "him" as a dative, = "to him." Compare "Woe is me," nd the examples from Chaucer (*Cant. Tales*, 2,111, 6,362) cited in Eastwood and Wright's *Bible Word Book*, p. 524. A.

* **WELL OF JACOB.** [SHECHEM, p. 2957 f.]

**WHALE.** As to the signification of the Hebrew terms *tan* (תַּן or תָּנִין) and *tannin*, (תַּנִּין), variously rendered in the A. V. by "dragon," "whale," "serpent," "sea-monster," see DRAGON. It remains for us in this article to consider the transaction recorded in the book of Jonah, of that prophet having been swallowed by some "great fish" (דָּג גָּדוֹל), which in Matt. xii. 40 is called κῆτος, rendered in our version by "whale."

Much criticism has been expended on the Scriptural account of Jonah being swallowed by a large fish; it has been variously understood as a literal transaction, as an entire fiction or an allegory, as a poetical mythus or a parable. With regard to the remarks of those writers who ground their objections upon the *denial of miracle*, it is obvious that this is not the place for discussion; the question of Jonah in the fish's belly will share the same fate as any other miracle recorded in the Old Testament.

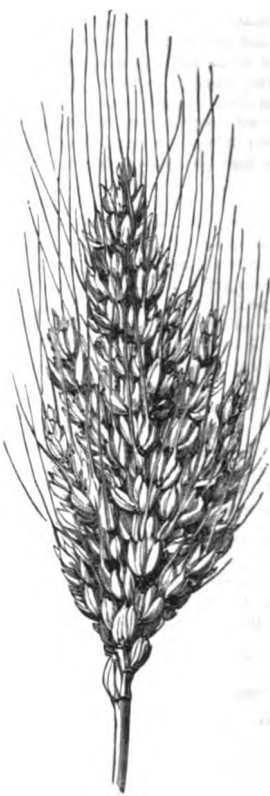
The reader will find in Rosenmüller's *Prolegomena* several attempts by various writers to explain the Scriptural narrative, none of which, however, have anything to recommend them, unless it be in some cases the ingenuity of the authors, such as for instance that of Godfrey Less, who supposed that the "fish" was no animal at all, but a ship with the figure of a fish painted on the stern, into which Jonah was received after he had been cast out of his own vessel! Equally curious is the explanation of G. C. Anton, who endeavored to solve the difficulty, by supposing that just as the prophet was thrown into the water, the dead carcase of some large fish floated by, into the belly of which he contrived to get, and that thus he was drifted to the shore! The opinion of Rosenmüller, that the whole account is founded on the Phœnician fable of Hercules devoured by a sea-monster sent by Neptune (Lycophron, *Cassand.* 33), although sanctioned by Gesenius, Winer, Ewald, and other German writers, is opposed to all sound principles of Biblical exegesis. It will be our purpose to consider what portion of the occurrence partakes of a natural, and what of a miraculous nature.

In the first place then, it is necessary to observe, that the Greek word κῆτος, used by St. Matthew, is not restricted in its meaning to "a whale," or any *Cetacean*; like the Latin *cete* or *cetus*, it may denote any sea-monster, either "a whale," or "a shark," or "a seal," or "a tunny of enormous size" (see Athen. p. 303 B, ed. Dindorf; *Odys.* xii. 97, iv. 446, 452; *Il.* xx. 147). Although two or three species of whale are found in the Mediterranean Sea, yet the "great fish" that swallowed the prophet, cannot properly be identified with any *Cetacean*, for, although the sperm whale (*Catodon macrocephalus*) has a gullet sufficiently large to admit the body of a man, yet it can hardly be the fish intended; as the natural food of cetaceans consists of small animals, such as medusæ and crustacea.

Nor, again, can we agree with Bishop Jebb (*Sacred Literature*, pp. 178, 179), that the κοιλία of the Greek Testament denotes the back portion of a whale's mouth, in the cavity of which the prophet was concealed; for the whole passage in Jonah is clearly opposed to such an interpretation.

The only fish, then, capable of swallowing a man would be a large specimen of the White Shark (*Carcharias vulgaris*), that dreaded enemy of sailors, and the most voracious of the family of *Squalidæ*. This shark, which sometimes attains the length of thirty feet, is quite able to swallow a man whole. Some commentators are skeptical on

* שִׁקֻּת: ποτιστήριον: *canalis*.



Digitized by Google

this point It would, however, be easy to quote passages from the writings of authors and travellers in proof of this assertion: we confine ourselves to two or three extracts. The shark "has a large gullet, and in the belly of it are sometimes found the bodies of men half eaten, sometimes *whole and entire*" (*Nature Displayed*, iii. p. 140). But lest the Abbé Pluche should not be considered sufficient authority, we give a quotation from Mr. Couch's recent publication, *A History of the Fishes of the British Islands*. Speaking of white sharks, this author, who has paid much attention to the habits of fish, states that "they usually cut asunder any object of considerable size and thus swallow it; but if they find a difficulty in doing this, there is no hesitation in passing into the stomach even what is of enormous bulk; and the formation of the jaws and throat render this a matter of but little difficulty." Ruysch says that the whole body of a man in armor (*loricatus*), has been found in the stomach of a white shark; and Captain King, in his Survey of Australia, says he had caught one which could have swallowed a man with the greatest ease. Blumenbach mentions that a whole horse has been found in a shark, and Captain Basil Hall reports the taking of one in which, besides other things, he found the whole skin of a buffalo which a short time before had been thrown overboard from his ship (i. p. 27). Dr. Baird of the British Museum (*Cyclop. of Nat. Sciences*, p. 514), says that in the river Hooghly below Calcutta, he had seen a white shark swallow a bullock's head and horns entire, and he speaks also of a shark's mouth being "sufficiently wide to receive the body of a man." Wherever therefore the Tarshish, to which Jonah's ship was bound, was situated, whether in Spain, or in Cilicia, or in Ceylon, it is certain that the common white shark might have been seen on the voyage. The *C. vulgaris* is not uncommon in the Mediterranean; it occurs, as Forskål (*Descript. Animal.* p. 20) assures us, in the Arabian Gulf, and is common also in the Indian Ocean. So far for the *natural* portion of the subject. But how Jonah could have been swallowed whole *unhurt*, or how he could have existed for any time in the shark's belly, it is impossible to explain by simply natural causes. Certainly the preservation of Jonah in a fish's belly is not more remarkable than that of the three children in the midst of Nebuchadnezzar's "burning fiery furnace." [JONAH, Amer. ed.]

Naturalists have recorded that sharks have the habit of throwing up again whole and alive the prey they have seized (see Couch's *Hist. of Fishes*, i. p. 33). "I have heard," says Mr. Darwin, from Dr. Allen of Forres, that he has frequently found a diodon floating alive and distended in the stomach of a shark; and that on several occasions he has known it eat its way out, not only through the coats of the stomach, but through the sides of the monster which has been thus killed."

W. H.

**WHEAT.** The well-known valuable cereal, cultivated from the earliest times, and frequently mentioned in the Bible. In the A. V. the Heb. words *bar* (בַּר or בָּר), *dâgân* (דָּגָן), *rĕphôth* (רִיפוֹת), are occasionally translated "wheat:" but there is no doubt that the proper name of this cereal, as distinguished from "barley," "spelt," etc., is *chittâh* (חִטָּה: Chald. חִנְטִין, *chintin*). As to the former Hebrew terms, see under CORN. The first mention of wheat occurs in Gen. xxx. 14 in the account of Jacob's sojourn with Laban in Mesopotamia. Much has been written on the subject of the origin of wheat, and the question appears to be still undecided. It is said that the *Triticum vulgare* has been found wild in some parts of Persia and Siberia, apparently removed from the influence of cultivation (*English Cyclop.* art. "Triticum"). Again, from the experiments of M. Esprit Fabre of Agde it would seem that the numerous varieties of cultivated wheat are merely improved transformations of *Ægilops ovata* (*Journal of the*

Egyptian Wheat.

*Royal Agricult. Soc.*, No. xxxiii. pp. 167–180). M. Fabre's experiments, however, have not been deemed conclusive by some botanists (see an interesting paper by the late Prof. Henfrey in No. xli. of the *Journal* quoted above). Egypt in ancient times was celebrated for the growth of its wheat; the best quality, according to Pliny (*Nat. Hist.* xviii. 7), was grown in the Thebaid; it was all bearded, and the same varieties, Sir G. Wilkinson writes (*Anc. Egypt.* ii. 39, ed. 1854), "existed in ancient as in modern times, among which may be mentioned the seven-eared quality described in Pharaoh's dream" (Gen. xli. 22). This is the so-called mummy-wheat, which, it has been said, has germinated after the lapse of thousands of years but it is now known that the whole thing was a fraud. Babylonia was also noted for the excellence of its wheat and other cereals. "In grain," says

Digitized by Google

Herodotus (i. 193), "it will yield commonly two hundred fold, and at its greatest production as much as three hundred fold. The blades of the wheat and barley plants are often four fingers broad." But this is a great exaggeration. (See also Theophrastus, *Hist. Plant.* viii. 7.) Modern writers, as Chesney and Rich, bear testimony to the great fertility of Mesopotamia. Syria and Palestine produced wheat of fine quality and in large quantities (Ps. cxlvii. 14, lxxxi. 16, etc.). There appear to be two or three kinds of wheat at present grown in Palestine, the *Triticum vulgare* (var. *hybernum*), the *T. spelta* [see RYE], and another variety of bearded wheat which appears to be the same as the Egyptian kind, the *T. compositum*. In the parable of the sower our Lord alludes to grains of wheat which in good ground produce a hundred fold (Matt. xiii. 8). "The return of a hundred for one," says Trench, "is not unheard of in the East, though always mentioned as something extraordinary." Laborde says, "There is to be found at Kerek a species of hundred wheat which justifies the text of the Bible against the charges of exaggeration of which it has been the object." The common *Triticum vulgare* will sometimes produce one hundred grains in the ear. Wheat is reaped towards the end of April, in May, and in June, according to the differences of soil and position; it was sown either broadcast, and then ploughed in or trampled in by cattle (Is. xxxii. 20), or in rows, if we rightly understand Is. xxviii. 25, which seems to imply that the seeds were *planted* apart in order to insure larger and fuller ears. The wheat was put into the ground in the winter, and some time after the barley; in the Egyptian plague of hail, consequently, the barley suffered, but the wheat had not appeared, and so escaped injury. Wheat was ground into flour; the finest qualities were expressed by the term "fat of kidneys of wheat," חֵלֶב כְּלָיוֹת חִטָּה (Deut. xxxii. 14). Unripe ears are sometimes cut off from the stalks, roasted in an oven, mashed and boiled, and eaten by the modern Egyptians (Sonnini, *Trav.*). Rosenmüller (*Botany of the Bible*, p. 80), with good reason, conjectures that this dish, which the Arabs call *Ferik*, is the same as the *geres carmel* (גֶּרֶשׂ כַּרְמֶל) of Lev. ii. 14 and 2 K. iv. 42. The Heb. word *Kâli* (קָלִי, Lev. ii. 4) denotes, it is probable, *roasted* ears of corn, till used as food in the East. An "ear of corn" was called *Shibboleth* (שִׁבֹּלֶת), the word which betrayed the Ephraimites (Judg. xii. 1, 6), who were unable to give the sound of *sh*. The curious expression in Prov. xxvii. 22, "though thou shouldest bray a fool in a mortar among wheat with a pestle, yet will not his foolishness depart from him," appears to point to the custom of mixing the grains of inferior cereals with wheat; the meaning will then be, "Let a fool be ever so much in the company of wise men, yet he will continue a fool." Maurer (*Comment.* l. c.) simply explains the passage thus: "Quomodocunque tractaveris stultum non patietur se emendari." [Compare articles CORN; AGRICULTURE. BARLEY.]

W. H.

* **WHEEL.** [CART; LAVER; WELL.]

* **WHEN AS**, Matt. i. 18 (A. V.), is simply = "when," as often in old English writers. A.

* **WHIP.** [CORD; GOAD; SCOURGING.]

* **WHIRLPOOL**, as the marginal rendering of "leviathan" in Job xli. 1, is not used in its present sense, but denotes a kind of whale. See the quotations from Holland's Pliny, xi. 37, ix. 3, 4, in Eastwood and Wright's *Bible Word-Book*, p. 330. A.

**WHIRLWIND** (סוּפָה; סְעָרָה). The Hebrew terms *sûphâh* and *se'ârâh* convey the notion of a violent wind or hurricane, the former because such a wind *sweeps away* every object it encounters, the latter because the objects so swept away are *tossed about* and *agitated*. In addition to this, Gesenius gives a similar sense to *galgal*,* in Ps. lxxvii. 18 (A. V. "heaven") and Ez. x. 13 (A. V. "wheel"). Generally, however, this last term expresses one of the effects of such a storm in *rolling* along chaff, stubble, or such light articles (*Thes.* p. 288). It does not appear that any of the above terms express the specific notion of a *whirlwind*, *i. e.* a gale moving violently round on its own axis — and there is no warrant for the use of the word in the A. V. of 2 K. ii. 11. The most violent winds in Palestine come from the east; and the passage in Job xxxvii. 9, which in the A. V. reads, "Out of the south cometh the whirlwind," should rather be rendered, "Out of his chamber," etc. The whirlwind is frequently used as a metaphor of violent and sweeping destruction. Cyrus's invasion of Babylonia is compared to a southerly gale coming out of the wilderness of Arabia (Is. xxi. 1; comp. Knobel, *in loc.*), the effects of which are most prejudicial in that country. Similar allusions occur in Ps. lviii. 9; Prov. i. 27, x. 25; Is. xl. 24; Dan. xi. 40. W. L. B.

* **WHITE.** [COLORS, 1.]

* **WHITE STONE.** [STONES, 8.]

* **WHOT** (Deut. ix. 19), appears in the edition of 1611, subsequently changed to "hot." H.

**WIDOW** (אַלְמָנָה: χήρα: *vidua*). Under the Mosaic dispensation no legal provision was made for the maintenance of widows. They were left dependent partly on the affection of relations, more especially of the eldest son, whose birthright, or extra share of the property, imposed such a duty upon him, and partly on the privileges accorded to other distressed classes, such as a participation in the triennial third tithe (Deut. xiv. 29, xxvi. 12), in leasing (Deut. xxiv. 19–21), and in religious feasts (Deut. xvi. 11, 14). In the spirit of these regulations a portion of the spoil taken in war was assigned to them (2 Macc. viii. 28, 30). A special prohibition was laid against taking a widow's garments in pledge (Deut. xxiv. 17), and this was practically extended to other necessaries (Job xxiv. 3). In addition to these specific regulations, the widow was commended to the care of the community (Ex. xxii. 22; Deut. xxvii. 19; Is. i. 17; Jer. vii. 6, xxii. 3; Zech. vii. 10), and any neglect or oppression was strongly reprobated (Job xxii. 9, xxiv. 21; Ps. xciv. 6; Is. x. 2; Ez. xxii. 7; Mal. iii. 5; Ecclus. xxxv. 14, 15; Bar. vi. 38 [or Epist. of Jer. 38]; Matt. xxiii. 14). In times of danger widows were permitted to deposit their property in the treasury of the Temple (2 Macc. iii. 10). With regard to the remarriage of widows, the only restriction imposed by the Mosaic law had reference to the contingency of one being left childless, in

* גַּלְגַּל.

which case the brother of the deceased husband had a right to marry the widow (Deut. xxv. 5, 6; Matt. xxii. 23–30). [MARRIAGE.] The high-priest was prohibited from marrying a widow, and in the ideal polity of the prophet Ezekiel the prohibition is extended to the ordinary priests (Ez. xliv. 22).

In the Apostolic Church the widows were sustained at the public expense, the relief being daily administered in kind, under the superintendence of officers appointed for this special purpose (Acts vi. 1–6). Particular directions are given by St. Paul as to the class of persons entitled to such public maintenance (1 Tim. v. 3–16). He would confine it to the "widow indeed" (ἡ ὄντως χήρα), whom he defines to be one who is left alone in the world (μεμονωμένη), without any relations or Christian friends responsible for her support (vv. 3–5, 16). Poverty combined with friendlessness thus formed the main criterion of eligibility for public support; but at the same time the character of the widow — her piety and trustfulness — was to be taken into account (ver. 5). Out of the body of such widows a certain number were to be enrolled (καταλεγέσθω; A. V. "taken into the number"), the qualifications for such enrollment being (1) that they were not under sixty years of age; (2) that they had been "the wife of one man," probably meaning *but once married*; and (3) that they had led useful and charitable lives (vv. 9, 10). The object of the enrollment is by no means obvious. If we were to form our opinion solely on the qualifications above expressed, we should conclude that the enrolled widows formed an ecclesiastical order, having duties identical with or analogous to those of the deaconesses of the early Church. For why, if the object were of an eleemosynary character, should the younger or twice-married widows be excluded? The weight of modern criticism is undoubtedly in favor of the view that the enrolled widows held such an official position in the Church (Alford, De Wette, Lange, etc., in 1 Tim. v. 9, 10). But we can perceive no ground for isolating the passage relating to the enrolled widows from the context, or for distinguishing these from the "widows indeed" referred to in the preceding and succeeding verses. If the passage be read as a whole, then the impression derived from it will be that the enrollment was for an eleemosynary purpose, and that the main condition of enrollment was, as before, poverty. The very argument which has been adduced in favor of the opposite view, in reality equally favors this one; for why should unmarried or young women be excluded from an ecclesiastical order? The practice of the early Church proves that they were not excluded. The author of the *Apostolical Constitutions* lays down the rule that virgins should be generally, and widows only exceptionally, appointed to the office of deaconess (vi. 17, § 4); and though the directions given to Timothy were frequently taken as a model for the appointment of deaconesses, yet there was great diversity of practice in this respect (Bingham's *Ant.* ii. 22, §§ 2–5). On the other hand, the restrictions contained in the Apostolic directions are not inconsistent with the eleemosynary view, if we assume, as is very possible, that the enrolled widows formed a *permanent* charge on the public funds, and enjoyed certain privileges by reason of their long previous services, while the remainder, who were younger, and might very possibly remarry, would be regarded in the light of temporary and casual recipients. But while we thus believe that the primary object of the enrollment was simply to enforce a more methodical administration of the Church funds, it is easy to understand how the order of widows would obtain a quasi-official position in the Church Having already served a voluntary diaconate, and having exhibited their self-control by refraining from a second marriage, they would naturally be looked up to as models of piety to their sex, and would belong to the class whence deaconesses would be chiefly drawn. Hence we find the term "widow" (χήρα) used by early writers in an extended sense, to signify the adoption of the conditions by which widows, enrolled as such, were bound for the future. Thus Ignatius speaks of "virgins who were called widows" (παρθένους τὰς λεγομένας χήρας; *Ep. ad Smyrn.* 13); and Tertullian records the case of a virgin who was placed on the roll of widows (*in viduitatu*) while yet under twenty years of age (*De Vel. Virg.* 9). It is a further question in what respect these virgins were called "widows." The annotations on Ignatius regard the term as strictly equivalent to "deaconess" (*Patres Apos.* ii. 441, ed. Jacobson), but there is evidently another sense in which it may be used, namely, as betokening *celibacy*, and such we believe to have been its meaning, inasmuch as the abstract term χηρεία is used in the sense of *continence, or unmarried state*, in the *Apostolical Constitutions* (παρθένος μὴ φέρουσα τὴν ἐν νεότητι χηρείαν: δῶρον ἔχουσα χηρείας, iii. 1, §§ 1, 2). We are not therefore disposed to identify the widows of the Bible either with the deaconesses or with the πρεσβύτιδες of the early Church, from each of which classes they are distinguished in the work last quoted (ii. 57, § 8, viii. 13, § 4). The order of widows (τὸ χηρικόν) existed as a separate institution, contemporaneously with these offices, apparently for the same eleemosynary purpose for which it was originally instituted (*Const. Apos.* iii. 1, § 1, iv. 5, § 1). W. L. B.

WIFE. [DIVORCE; MARRIAGE.]

WILD BEASTS. [BEASTS.]

* WILDERNESS OF SIN. [SIN, WILDERNESS OF.]

WILDERNESS OF THE WANDERING. The historical magnitude of the Exodus as an event, including in that name not only the exit from Egypt, but the passage of the sea and desert, and the entry into Canaan, and the strange scenery in which it was enacted, no less than the miraculous agency sustained throughout forty years, has given to this locality an interest which is heightened, if possible, by the constant retrospect taken by the great Teacher of the New Testament and his Apostles, of this portion of the history of the race of Israel, as full of spiritual lessons necessary for the Christian Church throughout all ages. Hence this region, which physically is, and has probably been for three thousand years or more, little else than a barren waste, has derived a moral grandeur and obtained a reverential homage which has spread with the diffusion of Christianity. Indeed, to Christian, Jew, and Moslem it is alike holy ground. The mystery which hangs over by far the greater number of localities, assigned to events even of first-rate magnitude, rather inflames than allays the eagerness for identification; and the result has been a larger array of tourists than has probably ever penetrated any other country of equal difficulty. Burckhardt, Niebuhr, Seetzen, Laborde and Linant Rüppell, Raumer, Russegger, Lepsius, Henniker

Wallsted, Fazakerley, and Miss Martineau, are conspicuous amongst those who have contributed since the close of the last century to deepen, to vivify, and to correct our impressions, besides the earlier works of Monconys in the 17th century, and Hasselquist and Pococke in the 18th; whilst Wilson, Stewart, Bartlett, Bonar, Olin, Bertou, Robinson, and Stanley have added a rich detail of illustration, reaching to the present day. And thus it is at length "possible by the internal evidence of the country itself to lay down, not indeed the actual route of the Israelites in every stage, but in almost all cases the main alternatives between which we must choose, and in some cases the very spots themselves." Yet with all the material which now lies at the disposal of the topographical critic, there is often a real poverty of evidence where there seems to be an abundance; and the single lines of information do not weave up into a fabric of clear knowledge. "Hitherto no one traveller has traversed more than one, or at most two routes of the Desert, and thus the determination of these questions has been obscured; first, by the tendency of every one to make the Israelites follow his own track; and secondly, by his inability to institute a just comparison between the facilities or difficulties which attend the routes which he has not seen. This obscurity will always exist till some competent traveller has explored the whole Peninsula. When this has been fairly done, there is little doubt that some of the most important topographical questions now at issue will be set at rest" (Stanley, *S. & P.* 33).

I. The uncertainties commence from the very starting-point of the route of the Wandering. It is impossible to fix the point at which in "the wilderness of Etham" (Num. xxxiii. 6, 7) Israel, now a nation of freemen, emerged from that sea into which they had passed as a nation of slaves. But, slippery as is the physical ground for any fixture of the miracle to a particular spot, we may yet admire the grandeur and vigor of the image of baptism which Christianity has appropriated from those waters. There their freedom was won; "not of themselves, it was the gift of God," whose presence visibly preceded; and therefore St. Paul says, "they were baptized in the cloud," and not only "in the sea." The fact that from "Etham in the edge of the wilderness," their path struck across the sea (Ex. xiii. 20), and from the sea into the same wilderness of Etham, seems to indicate the upper end of the furthest tongue of the Gulf of Suez as the point of crossing, for here, as is probable, rather than lower down the same, the district on either side would for a short distance on both shores have the same name. There seems reason also to think that this gulf had then, as also at Ezion-Geber [EZION-GEBER], a further extension northward than at present, owing to the land having upheaved its level. This action seems to have been from early times the predominant one, and traces of it have recently been observed.[a] Thus it is probable, as a result of the same agency, that the sea was even then shallow, and the sudden action of a tidal sea in the *cul-de-sac* of a narrow and shallow gulf is well known. Our own Solway Firth is a familiar example of the rise and rush of water, surprising, at times, especially when combined with the action of a strong wind, even those habitually cognizant of its power. Similarly by merely venturing, it seems, below high-water mark our own King John lost his baggage, regalia, and treasures in the estuary of The Wash. Pharaoh's exclamation, "they are entangled (נְבֻכִים)[b] in the land," merely expresses the perplexity in which such a multitude, having, from whatever cause, no way of escape, would find themselves. "The wilderness hath shut them in," refers merely, it is probable, to his security in the belief that, having reached the flat of the waste, they were completely at the mercy of a chariot force, like his, and rather excludes than implies the notion of mountains.[c] The direction of the wind is "east" in the Hebrew (קָדִים רוּחַ), but in the LXX. "south" (νότῳ), in Ex. xiv. 21. On a local question the probable authority of the latter, executed in Egypt near the spot, is somewhat enhanced above its ordinary value. The furthest tongue of the gulf, now supposed dry, narrows to a strait some way below, *i. e.* south of its northern extremity, as given in Laborde's map (*Commentary on Exod.*) and then widens again.[d] In such a narrow pass the action of the water would be strongest when "the sea returned," and here a wind anywhere between E. and S. S. E., to judge from that map, would produce nearly the same effect; only the more nearly due E. the more it would meet the sea at right angles.[e] The probability is certainly that Pharaoh, seeing his bondmen, now all but within his clutch, yet escaping from it, would in the darkness of night, especially as he had spurned calmer counsels and remonstrances before, pursue with headlong rashness, even although, to a sober judgment guided by experience, the risk was plain. There is a resemblance in the names Migdol and the "ancient 'Magdolum,' twelve miles S. of Pelusium, and undoubtedly described as 'Migdol' by Jeremiah and Ezekiel" (Jer. xliv. 1, xlvi. 14; Ez. xxix. 10, xxx. 6; *S. & P.* p. 37), also between the same and the modern *Mûktala*, "a gentle slope through the hills" towards Suez; and Pi-Hahiroth perhaps is '*Ajrûd*. The "wilderness of Etham" probably lay on either side adjacent to the now dry trough of the northern end of the gulf. Dr. Stewart (*Tent and Khan*, p. 64) thinks the name Etham traceable in the *Wady Âkthi*, on the Arabian shore, but this and the preceding '*Ajrûd* are

[a] See a pamphlet by Charles T. Beke, Ph. D., "A Few Words with Bishop Colenso," pp. 4, 5.

[b] Compare the use of the same word, of a multitude of men or cattle (in Joel i. 18), to express ἐν τροπῇ εἶναι, without reference to egress or direction course, merely for want of food.

[c] Josephus (*Ant.* ii. 15, § 3) speaks of the obstruction of precipitous and impassable mountains, but when we consider his extravagant language of the height of the buildings of the Temple, it is likely that much more, when speaking in general terms of a spot so distant, such expressions may be set down as simply rhetorical.

[d] Dr. Stanley (*S. & P.* p. 36) thinks that this supposed extension "depends on arguments which have not yet been thoroughly explored."

[e] If the wind were direct S. it would at some points favor the notion that "the passage was not a transit but a short circuit, returning again to the Egyptian shore, and then pursuing their way round the head of the gulf," an explanation favored "by earlier Christian commentators, and by almost all the Rabbinical writers" (*S. & P.* p. 36). The landing-place would on this view be considerably north of the point of entering the sea.

Digitized by Google

of doubtful identity. The probability seems on the whole to favor the notion that the crossing lay to the N. of the *Jebel 'Atâkah*, which lies on the Egyptian side S. of Suez, and therefore neither the *'Ayûn Mûsa*,[a] nor, much less, the *Hummâm Pharaûn*, further down on the eastern shore — each of which places, as well as several others, claims in local legend to be the spot of landing — will suit. Still, these places, or either of them, may be the region where "Israel saw the Egyptians dead upon the sea-shore" (Ex. xiv. 30). The crossing place from the Egyptian *Wady Tawârik* to the *'Ayûn Mûsa* has been supported, however, by Wilson, Olin, Dr. Stewart (*Tent and Khan*, p. 56), and others. The notion of *Migdal* being *Migdol* will best suit the previous view of the more northerly passage. The "wilderness of Shur," into which the Israelites "went out" from the Red Sea, appears to be the eastern and southeastern continuation of that of Etham, for both in Ex. xv. 22, and in Num. xxxiii. 8, they are recorded to have "gone three days in the wilderness," indicated respectively in the two passages as that of Shur and that of Etham. From the expression in Ex. xiii. 20, "Etham, the edge of the wilderness," the habitable region would seem to have ended at that place. Josephus (*Ant.* vi. 7, § 3) seems to identify Pelusium with Shur (comp. 1 Sam. xv. 7); but probably he merely uses the former term in an approximate sense, as a land-mark well known to his readers; since Shur is described as "over against, or before Egypt" (Gen. xxv. 18), being perhaps the same as Sihor, similarly spoken of in Josh. xiii. 3; Jer. ii. 18. When so described, we may understand "Egypt" to be taken in a strict sense as excluding Goshen and the Arabian nome. [GOSHEN.] Shur "before Egypt," whatever the name may have meant, must probably be viewed as lying eastward of a line drawn from Suez to Pelusium; and the wilderness named from it or from Etham, extended three days' journey (for the Israelites) from the head of the gulf, if not more. It is evident that, viewed from Egypt, the wilderness might easily take its name from the last outpost of the habitable region, whether town or village, whereas in other aspects it might have a name of its own, from some land-mark lying in it. Thus the Egyptians may have known it as connected with Etham, and the desert inhabitants as belonging to Shur; while from his residence in Egypt and sojourn with Jethro, both names may have been familiar to Moses. However this may be, from Suez eastward, the large desert tract stretching as far east as the Ghor and Mount Seir i. e. from 32° 40′ to 35° 10′ E. long., begins. The 31st parallel of latitude, nearly traversing *el-'Arish*, the "River of Egypt," on the Mediterranean, and the southernmost extremity of the Dead Sea, may be taken roughly to represent its northern limit, where it really merges imperceptibly into the "south country" of Judah. It is scarcely called in Scripture by any one general name, but the "wilderness of Paran" most nearly approximates to such a designation, though lost, short of the Egyptian or western limit, in the wilderness of Shur, and perhaps, although not certainly, curtailed eastward by that of Zin. On the south side of the *et-Tîh* range, a broad angular band runs across the peninsula with its apex turned southward, and pointing towards the central block of granite mountains. This is a tract of sand known as the *Debbet er-Ramleh* or *Ramlah*, but which name is omitted in Kiepert's map. The long horizontal range and the sandy plain together form a natural feature in marked contrast with the pyramidal configuration of the southern or Sinaitic region. The "wilderness of Sinai" lies of course in that southern region, in that part which, although generally elevated, is overhung by higher peaks. How far this wilderness extended is uncertain. The Israelites only traversed the northwestern region of it. The "wilderness of Sin" was their passage into it from the more pleasant district of coast wadies with water-springs, which succeeded to the first-traversed wilderness of Shur or Etham, where no water was found. Sin may probably be identified with the coast strip, now known as *el-Kâa*, reaching from a little above the *Jebel Feirân*, or as nearly as possible on the 29th parallel of latitude,[b] down to and beyond *Tûr* on the Red Sea. They seem to have only dipped into the "Sin" region at its northern extremity, and to have at once moved from the coast towards the N. W. upon Sinai (Ex. xv. 22–27, xvi. 1; Num. xxxiii. 8–11). It is often impossible to assign a distinct track to this vast body — a nation swarming on the march. The fact of many, perhaps most, of the ordinary avenues being incapable of containing more than a fraction of them, would often have compelled them to appropriate all or several of the modes of access to particular points, between the probabilities of which the judgment of travellers is balanced.[c] Down the coast, however, from Etham or the Suez region southwards, the

[a] A warm spring, the temperature of which is given by Mr. Hamilton (*Sinai, the Hedjaz and Soudan*, p. 14) as being 83° Fahrenheit. "Robinson found the water here salt, and yielding a hard deposit, yet the Arabs called these springs 'sweet:' there are several of them" (Seetzen, *Reisen*, iii. pt. iii. 431). The *Hummâm* ("warm baths") *Pharaûn* are similar springs, lying a little W. of S. from *Wady Useit*, on the coast close to whose edge rises the precipitous *Jebel Hummâm*, so called from them, and here intercepting the path along the shore. The Rev. R. S. Tyrwhitt, who made the desert journey in February, 1868, says that there *may* be a warm spring out of the twelve or thirteen which form the *'Ayûn Mûsa*, but that the water of the larger well is cold, and that he drank of it.

[b] North of this limit lies the most southern wady which has been fixed upon by any considerable number of authorities for Elim, from which the departure was taken into the wilderness of Sin. Seetzen, but he alone, suggests that Elim is to be found in a warm spring in a northerly direction from *Tûr*, at a very slight distance, which waters the extensive date-palm plantations there. If this were so, *Tûr* itself would have certainly been included in the radius of the camp; but it is unlikely that they went so far south.

[c] It may be worth while to notice that the same observations apply to the battle in Rephidim with Amalek. To look about for a battle-field large enough to give sufficient space for two hosts worthy of representing Israel and Amalek, and to reject all sites where this possibility is not obvious, is an unsafe method of criticism. The most reticulated mass of wadies in the whole peninsula, if deemed worth fighting for, would form a battle-ground for all practical purposes, though not properly a "field" of battle, and the battle might decisively settle supremacy within certain limits, although no regular method of warfare might be applicable, and the numbers actually engaged might be inconsiderable. It would perhaps

Digitized by Google

course is broad and open, and there the track would be more definite and united. Before going into the further details of this question, a glance may be taken at the general configuration of the *et-Tîh* region, computed at 40 parasangs, or about 140 miles, in length, and the same in breadth, by Jakût, the famous geographer of Hamah (Seetzen, *Reisen*, iii. 47). For a description of the rock desert of Sinai, in which nature has cast, as it were, a pyramid of granite, culminating at *Um Shaumer*, 9,300 feet above sea-level, but cloven and sulcated in every direction by wadies into minor blocks, see SINAI.

II. The twin gulfs of Suez and 'Akabah, into which the Red Sea separates, embrace the Peninsula on its W. and E. sides respectively. One or other of them is in sight from almost all the summits of the Sinaitic cluster, and from the highest points both branches. The eastern coast of the Gulf of Suez is strewn with shells, and with the forests of submarine vegetation which possibly gave the whole sea its Hebrew appellation of the "Sea of Weeds." The "huge trunks" of its "trees of coral may be seen even on the dry shore;" while at *Tûr*, cabins are formed of madrepores gathered from it, and the *débris* of conchylia lie thickly heaped on the beach.[a] Similar "coralline forests" are described (*S. & P.* p. 83) as marking the coast of the Gulf of 'Akabah. The northern portion of the whole Peninsula is a plateau bounded southwards by the range of *et-Tîh*, which droops across it on the map with a curve somewhat like that of a slack chain, whose points of suspension are, westwards, Suez, and eastward, but further south, some "sandstone cliffs, which shut off"[b] this region from the Gulf of 'Akabah. The northwestern member of this chain converges with the shore of the Gulf of Suez, till the two run nearly parallel. Its eastern member throws off several fragments of long and short ridges towards the Gulf of 'Akabah and the northern plateau called from it *et-Tîh*. The *Jebel Dillâl* (Burckhardt, *Dhelel*) is the most southerly of the continuations of this eastern member (Seetzen, *Reisen*, iii. pt. iii. 413). The greatest elevation in the *et-Tîh* range is attained a little W. of the meridian 34°, near its most southerly point; it is here 4,654 feet above the Mediterranean. From this point the watershed of the plateau runs obliquely between N. and E. towards Hebron; westward of which line, and northward from the westerly member of *Jebel et-Tîh*, the whole wady-system is drained by the great *Wady el-'Arish*, along a gradual slope to the Mediterranean. The shorter and much steeper slope eastward partly converges into the large ducts of wadies *Fikreh* and *el-Jeib*, entering the Dead Sea's southwestern angle through the southern wall of the Ghôr, and partly finds an outlet nearly parallel, but further to the S., by the *Wady Jerafeh* into the 'Arabah. The great depression of the Dead Sea (1,300 feet below the Mediterranean) explains the greater steepness of this eastern slope.

In crossing this plateau, Seetzen found that rain and wind had worked depressions in parts of its flat, which contained a few shrubs or isolated bushes. This flat rose here and there in heights steep on one side, composed of white chalk with frequent lumps of flint embedded (iii. 48). The plateau has a central point in the station[c] *Khan Nûkhl*, so named from the date-trees which once adorned its wady, but which have all disappeared. This point is nearly equidistant from Suez westward, 'Akabah eastward, *el-'Arish* northward, and the foot of *Jebel Mûsa* southward. It lies half a mile N. of the "Hadj-route," between Suez and 'Akabah, which traverses "a boundless flat, dreary and desolate" (*ibid.* 56), and is 1,494[d] feet above the Mediterranean — nearly on the same meridian as the highest point before assigned to *et-Tîh*. On this meridian also lies *Um Shaumer* farther south, the highest point of the entire Peninsula, having an elevation of 9,300 feet, or nearly double that of *et-Tîh*. A little to the W. of the same meridian lies *el-'Arish*, and the southern cape, *Râs Mohammed*, is situated about 34° 17′. Thus the parallel 31°, and the meridian 34°, form important axes of the whole region of the Peninsula. A full description of the wilderness of *et-Tîh* is given by Dr. Robinson (i. 177, 178, 199), together with a memorandum of the travellers who explored it previously to himself.

On the eastern edge of the plateau to the N. of the *et-Tîh* range, which is raised terrace-wise by a step from the level of the Ghôr, rises a singular second, or, reckoning that level itself, a third plateau, superimposed on the general surface of the *et-Tîh* region. These Russegger (*Map*) distinguishes as three terraces in the chalk ridges. Dr. Kruse, in his *Anmerkungen* on Seetzen's travels (iii. pt. iii. 410), remarks that the *Jebel et-Tîh* is the *montes nigri*, or μέλανες of Ptolemy, in whose view that range descends to the extreme southern point of the Peninsula, thus including of course the Sinaitic region. This confusion arose from a want of distinct conception of geographical details. The name seems to have been obtained from the dark, or even black color, which is observable in parts (see p. 3516, note *d*).

The Hadj-route from Suez to 'Akabah, crossing the Peninsula in a direction a little S. of E., may stand for the chord of the arc of the *et-Tîh* range, the length of which latter is about 120 miles. This slope, descending northwards upon the Mediterranean, is of limestone (*S. & P.* p. 7), covered with coarse gravel interspersed with black flints and drift (Russegger's *Map*). But its desolation has not always been so extreme, oxen, asses, and sheep having once grazed in parts of it where now only the camel is found. Three passes through the *et-Tîh* range are mentioned by Robinson (i. 123; comp. 561–563, App. xxii.) — *er-Rdkineh*, the western; *el-Mureikhy*, the eastern; and *el-Wûrsah*, between the two. These all meet S. of *Ruhaibeh* (Rehoboth, Gen. xxvi. 22?), in about N.

---

resemble somewhat more closely a street fight for the mastery of a town.

[a] Stanley, *S. & P.* p. 5; Hamilton, *Sinai, the Hedâs, and Soudan*, p. 14.

[b] Stanley, *S. & P.* p. 8.

[c] Seetzen, who crossed this route 6 hours to the E. this station, says that this road, and not the range of *et-Tîh*, is the political division of the country, all the country to the S. of the road being reckoned as the *Tûr*, and that northwards as appertaining to Syria (*Reisen*, iii. 410, 411, comp. p. 58). His course lay between the route from Hebron to 'Akabah, and that from Hebron to Suez. He went straight southwards to *Feirân*; a route which no traveller has followed since.

[d] This measurement is a mean between that given in Stanley (map, *S. & P.* p. 5), and Russegger's estimate, as given by Seetzen (*Reisen*, iii. pt. iii. 411).

Digitized by Google

lat. 31° 5′, E. long. 34° 42′, and thence diverge towards Hebron and Gaza. The eastern [a] is noted by Russegger as 4,853 feet [b] above sea-level. Seetzen took the *et-Tîh* range for the "Mount Seir," passed on the way from Sinai (Horeb, Deut. i. 2) to Kadesh Barnea by the Israelites (*Reisen*, iii. 28; comp. *ibid.* Kruse's *Anmerkungen*, pt. iii. 417). It would form a conspicuous object on the left to the Israelites, going southeastwards near the coast of the Gulf of Suez. Seetzen, proceeding towards Suez, *i. e.* in the opposite direction, mentions a high sandy plain (*Reisen*, iii. 111), apparently near *Wady Ghŭrŭndel*, whence its steep southern face was visible in a white streak stretching westwards and eastwards. Dr. Stanley (*S. & P.* p. 7) says, "However much the other mountains of the Peninsula vary in form or height, the mountains of the Tîh are always alike — always faithful to their tabular outline and blanched desolation." [c] They appear like "a long limestone wall." This traveller saw them, however, only "from a distance" (*ibid.* and note 2). Seetzen, who crossed them, going from Hebron to Sinai, says of the view from the highest ridge of the lower mountain-line: "What a landscape was that I looked down upon! On all sides the most frightful wilderness extended out of sight in every direction, without tree, shrub, or speck of green. It was an alternation of flats and hills, for the most part black as night, only the naked rock walls on the hummocks and heights showed patches of dazzling whiteness [d] . . . . a striking image of our globe, when, through Phaeton's carelessness, the sun came too near to it" (*Reisen*, iii. 50). Similarly, describing the scenery of the *Wady el-Bidra*, by which he passed the *et-Tîh* range (see note *a* below), he says: "On the S. side rose a considerable range, desolate, craggy, and naked. All was limestone, chalk, and flint. The chalk cliffs gave the steep offset of the *Tîh* range on its S. side the aspect of *a snow mountain*" (p. 62).

The other routes which traverse the Peninsula are, that from Hebron to Suez along the maritime plain, at a distance of from 10 to 30 miles from the sea, passing *el-'Arish*; that from Suez to *Tûr* along the coast of the Gulf of Suez through the *Kâa*, and that from 'Akabah, near Ezion-geber, ascending the western wall of the 'Arabah through the *Wady el-Jeib*, by several passes, not far from the southern extremity of the Dead Sea, towards Hebron, in a course here nearly N. W., then again N.[e] A modern mountain road has been partially constructed by Abbas Pasha in the pass of the *Wady Hebrân*, leading from the coast of the Gulf of Suez towards the convent commonly called St. Catharine's. The ascent from the trough of the 'Arabah (which is steeper-sided at its N. W. extremity than elsewhere) towards the general plateau is by the pass *el-Khŭrâr*, by which the level of that broad surface is attained. The smaller plateau rests obliquely upon the latter, abutting on the Dead Sea at Masada, where its side and that of the lower floor converge, and is reached by ascending through the higher *Nukb es-Sâfa*. Its face, corresponding to the southern face of the *Tîh* plateau, looks considerably to the W. of S., owing to this obliquity, and is delineated like a well-defined mountain wall in Kiepert's map, having at the S. E. angle a bold buttress in the *Jebel Mâkhrâh*, and, at the S. W. another in the *Jebel 'Arâif en-Nakah*, which stands out apparently in the wilderness like a promontory at sea. From the former mountain, its most southerly point, at about 30° 20′ N. L., this plateau extends northward a little east, till it merges in the southern slope of Judæa, but at about 30° 50′ N. lat., is cut nearly through by the *Wady Fikreh*, trenching its area eastward, and not quite meeting the *Wady Mŭkrâh*, which has its declivity apparently toward the *Wady el-'Arish* westward. The face of mountain wall mentioned above may probably be "the mountain of the Amorites," or this whole higher plateau may be so (Deut. i. 7, 19, 20). A line drawn northwards from *Râs Mohammed* passes a little to the W. of *'Arâif en-Nakah*. A more precise description of some parts of this plateau has been given under KADESH.

On the whole, except in the *Debbet er-Ramleh*, sand is rare in the Peninsula. There is little or none on the sea-shore, and the plain *el-Kâa* on the S. W. coast is gravelly rather than sandy (*S. & P.* p. 8). Of sandstone on the edges of the granitic central mass there is no lack. [f] It is chiefly found between the chalk and limestone of *et-Tîh* and the southern rocky triangle of Sinai. Thus the *Jebel Dillâl* is of sandstone, in tall vertical cliffs, forming the boundary of *er-Ramleh* on the east side, and similar steep sandstone cliffs are visible in the same plain, lying on its N. and N. W. sides (Seetzen, iii. 66; comp. pt. iii. 413). In the *Wady Mokatteb* "the soft surface of these sandstone cliffs offered ready tablets" to the unknown wayfarers who wrote the "Sinaitic inscriptions." This stone gives in some parts a strong red hue to the nearer landscape, and softens into shades of the subtlest delicacy in the distance. Where the surface has been broken away, or fretted and eaten by the action of water, these hues are most vivid (*S. & P.* pp. 10–12). It has been supposed that the Egyptians worked the limestone of *et-Tîh*, and that that

[a] Seetzen probably took this eastern pass, which leads out into the *Wady Berâh* (Seetzen, *El Bidra*, called also *El Schdida*, *Reisen*, iii. pt. iii. 411, Kruse's *Anmerkungen*, comp. iii. 62). He, however, shortly before crossing the range, came upon "a flat hill yielding wholesome pasture for camels, considerable numbers (Haufen) of which are met with here, also two herds of goats and some sheep" (iii. 60); not strictly confirming the previous statement, which is Dr. Robinson's.

[b] It is not easy to reconcile this statement with the figure (4,646 ft.) given by Dr. Stanley (*S. & P.*, map, p. 5) apparently as the extreme height of the mountain *El-Odjme* (Stanley, *J. Edime*), since we might expect that the pass would be somewhat *lower* than the highest point, instead of *higher*. On this mountain, see p. 3594, note *a*.

[c] Seetzen (iii. 56) remarks that "the slope of the *et-Tîh* range shows an equal wildness" to that of the desert on its northern side.

[d] Comp. Dr. Stanley's description of the march down the *Wady Tayibeh* "between vast cliffs white on the one side, and on the other of a black calcined color" (*S. & P.* p. 69).

[e] Nearly following this track in the opposite direction, *i. e.* to the S. E., Seetzen went from Hebron to *Mâdara* (al. *Madurah*, or *Modera*), passing by *Maon*, *el-Kirmel* (the "Carmel" of Nabal's pasture-ground in 1 Sam. xxv. 2), and *Arâr* (*Reisen*, iii. 10–18).

[f] A remarkable sandstone mountain on the S. W. plain near the sea is the *Jebel Nakûs* ("bell"), said to be so called from the ringing sound made by the sand pouring over its cliffs (Stewart *T. & K.* p. 386, comp Russegger, *Reisen*, iii. 277).

Digitized by Google

material, as found in the pyramids, was there quarried. The hardness of the granite in the *Jebel et-Tûr* has been emphatically noticed by travellers. Thus, in constructing recently the mountain road for Abbas Pasha, "the rocks" were found "obstinately to resist even the gunpowder's blast," and the sharp glass-like edges of the granite soon wear away the workmen's shoes and cripple their feet (Hamilton, *Sinai, the Hedjaz, and Soudan*, p. 17). Similarly, Laborde says (*Comm. on Num.* xxxiii. 36): "In my journey across that country (from Egypt, through Sinai to the Ghôr), I had carried from Cairo two pair of shoes; they were cut, and my feet came through; when I arrived at 'Akabah, luckily I found in the magazines of that fortress two other pair to replace them. On my return to Sinai, I was barefoot again. Hussein then procured me sandals half an inch thick, which, on my arrival in Cairo, themselves were reduced to nothing, though they had well preserved my feet." Seetzen noticed on Mount St. Catherine that the granite was "fine-grained and very firm" (iii. 90). For the area of greatest relief in the surface of the whole Peninsula, see SINAI, §§ 1, 2, 3. The name *Jebel et-Tûr* includes the whole cluster of mountains from *el-Fureidi* on the N. to *Um Shaumer* on the S., and from *Mûsa* and *ed-Deir* on the E. to *Hum'r* and *Serbâl* on the W., including St. Catherine, nearly S. W. of *Mûsa*. By "Sinai" is generally understood the *Mûsa* plateau, between the *Wady Ledjâ* (Stanley, *Map*) and the *Wady Shueib* on its western and northeastern flanks, and bounded northwestward by the *Wady er-Raheh*, and southeastward by the *Wady Sebâyeh* (*Sebaiyeh*, Stanley, *ibid.*). The Arabs give the name of *Tûr* — properly meaning a high mountain (Stanley, *S. & P.* p. 8) — to the whole region south of the Hadj-route from Suez to *'Akabah* as far as *Râs-Mohammed* (see above, p. 3515, note c). The name of *Tûr* is also emphatically given to the cultivable region lying S. W. of the *Jebel et-Tûr*. Its fine and rich date-palm plantation lies a good way southwards down the Gulf of Suez. Here opens on the sea the most fertile wady now to be found in the Peninsula (Burckhardt, *Arab.* ii. 362; Wellsted, ii. 9), receiving all the waters which flow down the range of Sinai westward [a] (Stanley, *S. & P.* p. 19).

III. A most important general question, after settling the outline of this "wilderness," is the extent to which it capable of supporting animal and human life, especially when taxed by the consumption of such flocks and herds as the Israelites took with them from Egypt, and probably — though we know not to what extent this last was supplied by the manna — by the demand made on its resources by a host of from 2,000,000 to 3,000,000 souls.[b] In answer to this question, "much," it has been observed (*S. & P.* p. 24), "may be allowed for the spread of the tribes of Israel far and wide through the whole Peninsula, and also for the constant means of support from their own flocks and herds. Something, too, might be elicited from the undoubted fact that a population nearly, if not quite, equal to the whole permanent population of the Peninsula does actually pass through the desert in the caravan of the 5,000 African pilgrims, on their way to Mecca. But, amongst these considerations, it is important to observe what indications there may be of the mountains of Sinai having ever been able to furnish greater resources than at present. These indications are well summed up by Ritter (*Sinai*, pp. 926, 927). There is no doubt that the vegetation of the wadies has considerably decreased. In part, this would be an inevitable effect of the violence of the winter torrents. The trunks of palm-trees washed up on the shore of the Dead Sea, from which the living tree has now for many centuries disappeared, show what may have been the devastation produced among those mountains where the floods, especially in earlier times, must have been violent to a degree unknown in Palestine; whilst the peculiar cause — the impregnation of salt — which has preserved the vestiges of the older vegetation there, has here, of course, no existence. The traces of such a destruction were pointed out to Burckhardt (*Arab.* p. 538) on the eastern side of Mount Sinai, as having occurred within half a century before his visit; also to Wellsted (ii. 15), as having occurred near *Tûr* in 1832. In part, the same result has followed from the reckless waste of the Bedouin tribes — reckless in destroying and careless in replenishing. A fire, a pipe, lit under a grove of desert trees, may clear away the vegetation of a whole valley.

"The acacia-trees [c] have been of late years ruthlessly destroyed by the Bedouins for the sake of charcoal," which forms "the chief, perhaps it might be said the only traffic of the Peninsula" (*S. & P.* p. 24). Thus, the clearance of this tree in the mountains where it abounded once, and its decrease in the neighbor groups in which it exists still, is accounted for, since the monks appear to have aided the devastation. Vegetation, where maintained, nourishes water and keeps alive its own life; and no attempts to produce vegetation anywhere in this desert seem to have failed. "The gardens at the wells of Moses, under the French and English agents from Suez, and the gardens in the valleys of *Jebel Mûsa*, under the care of the Greek monks of the Convent of St. Catherine," [d] are conspicuous

---

[a] The following positions by East longitude from Paris are given in Seetzen, iii. pt. iii., *Anmerk.* 414: —
Suez, 29° 57′ 30″, Berghaus.
'Akabah, 28° 45′, Niebuhr; but 28° 55′ by others.
Convent St. Catherine, 28° 36′ 40″ 5‴, Seetzen and Zach; but 31° 37′ 54″ by Rüppell.
Sinai, 28° 46′.
Râs Mohammed, 27° 42′ 24″.
But there must be grave errors in the figures, since Suez is placed furthest to the east of all the places named, whereas it lies furthest to the west; also 'Akabah lies an entire degree, by Kiepert's map, to the east of the Convent, whereas it is here put at less than 9′; and *Râs Mohammed*, which lies further to the east than all these except 'Akabah, is placed to the west of them all

[b] Dr. Stanley (*S. & P.* p. 24, note 1), following Ewald (*Geschichte*, ii. 61, 258, 259, 2d ed.), says, "the most recent and the most critical investigation of this (the Israelitish) history inclines to adopt the numbers of 600,000 (males of the warlike age) as authentic."

[c] Dr. Stanley (p. 25) thinks the ark and wooden utensils of the Tabernacle were of this timber. Seetzen (iii. 109) saw no trees nearly big enough for such service, and thinks it more probable that the material was obtained by purchase from travelling caravans: but it is not clear whether he thinks that the tree (*Mimosa Nilotica*) is in this wilderness below its usual size, or that not this but something else is the "Shittim-wood" of the A. V.

[d] So called, but the proper name appears to be τὸ ἅγιον μεταμόρφωσιον, *i. e.* the Transfiguration of our

examples (*ibid.* p. 26). Besides, a traveller in the 16th century calls the *Wady er-Raheh* in front of the Convent, now entirely bare, "a vast *green* plain."[a] In this wilderness, too, abode Amalek, "the first of the nations," powerful enough seriously to imperil the passage of the Israelites through it, and importantly contributing to subsequent history under the monarchy. Besides whom we have "king Arad the Canaanite, who dwelt in the south," *i. e.* apparently on the terrace of mountain overhanging the Ghôr near *Masada* on the Dead Sea, in a region now wholly desolate. If his people were identical with the Amorites or Canaanites of Num. xiv. 43; Deut. i. 44, then, besides the Amalekites of Ex. xvii. 8, we have *one* other host within the limits of what is now desert, who fought with Israel on equal or superior terms: and, if they are not identical, we have *two* such (Num. xiv. 40–45, xxi. 1, xxxiii. 40; Deut. i. 43, 44). These must have been "something more than a mere handful of Bedouins. The Egyptian copper-mines, monuments, and hieroglyphics in *Sûrâbît el-Khadîm* and the *Wady Mûghâra*, imply a degree of intercourse between Egypt and the Peninsula" in a period probably older than the Exodus, "of which all other traces have long ceased. The ruined cities of Edom in the mountains east of the *'Arabah*, and the remains and history of *Petra* itself, indicate a traffic and a population in these remote regions which now is almost inconceivable" (*S. & P.* p. 26). Even the 6th and 7th centuries A. D. showed traces of habitation, some of which still remain in ruined cells and gardens, etc., far exceeding the tale told by present facts. Seetzen, in what is perhaps as arid and desolate a region as any in the whole desert, asked his guide to mention all the neighboring places whose names he knew. He received a list of sixty-three places in the neighborhood of *Madûrah*, *Petra*, and *'Akabah*, and of twelve more in the *Ghôr es-Saphia*, of which total of seventy-five all save twelve are now abandoned to the desert, and have retained nothing save their names — "a proof," he remarks, "that in very early ages this region was extremely populous, and that the furious rage with which the Arabs, both before and after the age of Mohammed, assailed the Greek emperors, was able to convert into a waste this blooming region, extending from the limit of the *Hedjaz* to the neighborhood of Damascus" (*Reisen*, iii. 17, 18).

Thus the same traveller in the same journey (from Hebron to *Madûrah*) entered a wady called *el-Jemen*, where was no trace of water save moist spots in the sand, but on making a hole with the hand it was quickly full of water, good and drinkable (*ibid.* p. 13). The same, if saved in a cistern, and served out by sluices, might probably have clothed the bare wady with verdure. This is confirmed by his remark (*ibid.* p. 83), that a blooming vegetation shows itself in this climate wherever there is water; as well as by the example of the tank system as practiced in Hindostan. He also notices that there are quicksands in many spots of the *Debbet er-Ramleh*, which it is difficult to understand, unless as caused by accumulations of water (*ibid.* p. 67). Similarly in the desert *Wady el-Kudeis* between Hebron and Sinai, he found a spot of quicksand with sparse shrubs growing in it (*ibid.* p. 48).

Now the question is surely a pertinent one, as compared with that of the subsistence of the flocks and herds of the Israelites during their wanderings, how the sixty-three perished communities named by Seetzen's guide can have supported themselves? It is pretty certain that fish cannot live in the Dead Sea,[b] nor is there any reason for thinking that these extinct towns or villages were in any large proportion near enough to its waters to avail themselves of its resources, even if such existed. To suppose that the country could ever have supported extensive coverts for game is to assume the most difficult of all solutions of the question. The creatures that find shelter about the rocks, as hares, antelopes, gazelles, jerboas, and the lizards that burrow in the sand (*el-Dsobb*), alluded to by this traveller in several places (iii. 67, comp. pt. iii. 415-442, and Laborde, *Comm. on Num.* xxxiii. 42), are far too few, to judge from appearances, to do more than eke out a subsistence, the staple of which must have been otherwise supplied; and the same remark will apply to such casual windfalls as swarms of edible locusts, or flights of quails. Nor can the memory of these places be probably connected with the distant period when Petra, the commercial metropolis of the Nabathæans, enjoyed the carrying trade between the Levant and Egypt westwards, and the rich communities further east. There is least of all reason for supposing that by the produce of mines, or by asphalt gathered from the Dead Sea, or by any other native commodities, they can ever have enjoyed a commerce of their own. We are thrown back, then, upon the supposition that they must in some way have supported themselves from the produce of the soil. And the produce for which it is most adapted is either that of the date-palm, or that to which earlier parallels point, as those of Jethro and the Kenites, and of the various communities in the southern border of Judah (Num. xxxiv. 4, 5; Josh. xv. 3, 4; 1 Sam. xxx. 27–31), namely, that of pasturage for flocks and herds, a possibility which seems solely to depend on adequately husbanding the water supplied by the rains. This tallies with the use of the word מִדְבָּר, for "wilderness," *i. e.* "a wide, open space, with or without actual pasture, the country of the nomads, as distinguished from that of the agricultural and settled people" (*S. & P.* p. 486, *App.* § 9).[c] There seems however to be implied in the name a capacity for pasturage, whether actually realized or not. This corresponds, too, with the "thin," or rather "transparent coating of vegetation," seen to clothe the greater part of the Sinaitic wilderness in the present day (*ibid.* pp. 16,

---

Lord, represented in the great mosaic of Justinian, in the apse of its church, probably of his age, as is also the name (Tyrwhitt). The transfer of the body of St. Catherine thither from Egypt by angels is only one of the local legends; but its association appears to have predominated with travellers (Seetzen, iii. pt. iii. 414, 415).

[a] Monconys quoted by Stanley, *S. & P.*

[b] Seetzen speaks in one place of a few shell-fish being seen along its southern shore. Compare Stanley *S. & P.* p. 293. [SEA, THE SALT.]

[c] The word *Midbar* has been examined under the head of DESERT (vol. i. p. 591). The writer of the article has nothing to add to it, except to call attention to the use of the term in Jer. ii. 2, where the prophet in two words gives an exact definition of a *Midbar*: "a land *not sown*" — that is, left to nature.

Digitized by Google

82), and which furnishes an initial minimum from which human fostering hands might extend the prospect of possible resources up to a point as far in excess of present facts as were the numbers of the Israelitish host above the 6,000 Bedouins computed now to form the population of the desert. As regards the date-palm, Hasselquist speaks as though it alone afforded the means of life to some existing Arab communities. Hamilton (*Sinai*, etc., p. 17) says that in his path by the *Wady Hebrân*, towards the modern Sinai, "small clumps of uncultivated date trees rise between the granite walls of the pass, wherever the winter torrents have left sufficient detritus for their nourishment." And again, after describing the pass of the Convent, he continues, "beneath lies a veritable chaos, through which now trickles a slender thread of water, where in winter rushes down a boiling torrent" [a] (*ibid.* p. 19). It is hardly too much to affirm that the resources of the desert, under a careful economy of nature's bounty, might be, to its present means of subsistence, as that winter torrent's volume to that summer streamlet's slender thread. In the *Wady Hebrân* this traveller found "a natural bath," formed in the granite by the *'Ain Hebrân*, called "the Christians' pool" (*ibid.* p. 17). Two thirds of the way up the *Jebel Mûsa* he came upon "a frozen streamlet" (*ibid.* p. 30); and Seetzen, on the 14th of April, found snow lying about in sheltered clefts of the *Jebel Catharin*, where the rays of the sun could not penetrate (iii. 92). Hamilton encountered on the *Jebel Mûsa* a thunder-storm, with "heavy rain" (*Sinai*, etc., p. 16). There seems on the whole no deficiency of precipitation. Indeed, the geographical situation would rather bespeak a copious supply. Any southerly wind must bring a fair amount of watery vapor from the Red Sea, or from one of its expanding arms, which embrace the peninsula on either side, like the blades of a forfex; while at no greater distance than 140 miles northward roll the waters of the Mediterranean, supplying, we may suppose, their quota, which the much lower ranges of the *Tîh* and *Odjme* cannot effectually intercept. Nor is there any such shelter from rain-clouds on either of the Gulfs of Suez and 'Akabah, as the long line of mountains on the eastern flank of Egypt, which screens the rain supply of the former from reaching the valley of the Nile. On the contrary, the conformation of the Peninsula, with the high wedge of granitic mountains at its core, would rather receive and condense the vapors from either gulf, and precipitate their bounty over the lower faces of mountain and troughs of wady, interposed between it and the sea. It is much to be regretted that the low intellectual condition of the monks [b] forbids any reasonable hope of adequate meteorological observations to check these merely probable arguments with reliable statements of fact; but in the absence of any such register, it seems only fair to take reasonable probabilities fully into view. Yet some significant facts are not wanting to redeem in some degree these probabilities from the ground of mere hypothesis. "In two of the great wadies" which break the wilderness on the coast of the Gulf of Suez, "*Ghurundel*, and *Useit*, with its continuation of the *Wâdy Tayibeh*, tracts of vegetation are to be found in considerable luxuriance." The wadies leading down from the Sinai range to the Gulf of 'Akabah "furnish the same testimony, in a still greater degree," as stated by Rüppell, Miss Martineau, Dr. Robinson, and Burckhardt. "In three spots, however, in the desert . . . . this vegetation is brought by the concurrence of the general configuration of the country to a still higher pitch. By far the most remarkable collection of springs is that which renders the clusters of the *Jebel Mûsa* the chief resort of the Bedouin tribes during the summer heats. Four abundant sources in the mountains immediately above the Convent of St. Catherine must always have made that region one of the most frequented of the desert. . . . Oases (analogous to that of Ammon in the western desert of the Nile) are to be found wherever the waters from the different wadies or hills, whether from winter streams or from such living springs as have just been described, converge to a common reservoir. One such oasis in the Sinaitic desert seems to be the palm-grove of *El-Wâdy* at *Tûr*, described by Burckhardt as so thick that he could hardly find his way through it (*S. & P.* p. 19, note 1; see Burckh. *Arab.* ii. 362). The other and the more important is the *Wâdy Feirân*, high up in the table-land of Sinai itself (*S. & P.* pp. 18, 19)." Now, what nature has done in these favored spots might surely be seconded [c] in others by an ample population, familiarised, to some extent, by their sojourn in Egypt with the most advanced agricultural experience of the then world, and guided by an able leader who knew the country, and found in his wife's family others who knew it even better than he (Num. x. 31). It is thus supposable that the language of Ps. cvii. 35–38, is based on no mere pious imagery, but on actual fact: "He turneth the wilderness into a standing water, and dry ground into water-springs. And there He maketh the hungry to dwell, that they may prepare a city for habitation; and sow the fields and plant vineyards, which may yield fruits of increase. He blesseth them so that they are multiplied greatly; and *suffereth not their cattle to decrease*." And thus we may find an approximate basis of reality for the enhanced poetic images of Isaiah (xli. 19, lv. 13). Palestine itself affords abundant tokens of the resources of nature so husbanded, as in the artificial "terraces of which there are still traces to the very summits" of the mountains, and some of which still, in the Jordan valley, "are occupied by

[a] There is no mistaking the enormous amount of rain which must fall on the desert and run off uselessly into the sea. In February all the wadies had evidently had strong torrents down, and all across them from hillside to hillside. The whole surface of wide valleys was marked and ribbed like the bed of a stony and sandy stream in England. The great plain of *Murkhâ* was intersected in all directions by these torrents, draining the mountains about *Nukb Badera*. So all the wadies, wherever there was a decided fall. Major Macdonald (engaged at present in superintending the working of a turquoise bed at *Sîrâbit el-Khadim*) said that after a sudden storm in the hills to the N., he had from two to three feet of water running furiously through his tents for three hours, in *Wady Mâghâra*. Common industry in digging tanks would make all the wadies "blossom as the rose" (Tyrwhitt).

[b] See Dr. Stanley's estimate of the inmates of the convent (*S. & P.* pp. 55, 56).

[c] Nay, it is possible that such works had already to some extent been undertaken on account of the mining colonies which certainly then existed at *Wady Mâghâra* and *Sîrâbit el-Khadim*, and were probably supported on the produce of the country, not sent on camels from Egypt (Tyrwhitt).

Digitized by Google

masses of vegetation" (*S. & P.* pp. 138, 297). In favored spots wild luxuriance testifies to the extent of the national resources, as in the wadies of the coast, and in the plain of Jericho, where "far and wide extends the green circle of tangled thickets, in the midst of which are the hovels of the modern village, beside which stood, in ancient times, the great city of Jericho" (*ibid.* p. 306). From this plain alone, a correspondent of the British Consul at Jaffa asserts that he could feed the whole population of modern Syria (*Cotton Supply Reporter*, June 14, 1862). But a plantation redeemed from the wilderness is ever in the position of a besieged city; when once the defense of the human garrison is withdrawn, the fertility stimulated by its agency must obviously perish by the invasion of the wild. And thus we may probably suppose that, from numberless tracts, thus temporarily rescued from barrenness, in situations only moderately favorable, the traces of verdure have vanished, and the desert has reclaimed its own; or that there the soil only betrays its latent capacity by an unprofitable dampness of the sand.

Seetzen, on the route from Hebron to Sinai, after describing an "immense flinty plain," the "dreariest and most desolate solitude," observes that, "as soon as the rainy season is over and the warm weather sets in, the pits (of rain-water) dry up, and it becomes uninhabitable," as "there are no brooks or springs here" (iii. 55, 56). Dr. Stewart (*The Tent and the Khan*, pp. 14, 15) says of the *Wady Akhi*, which he would identify with Etham (Ex. xiii. 20: Num. xxxiii. 6), "sand-hills of considerable height separate it from the sea, and prevent the winter rains from running off rapidly. A considerable deposit of rich alluvial loam is the result, averaging from 2 to 4 inches in thickness, by sowing upon which immediately after the rains the Bedouins could certainly reap a profitable harvest; but they affect to despise all agricultural labor. . . . . Yet," he adds, "the region never could have supplied food by its own natural vegetation for so great a multitude of flocks and herbs as followed in the train of the Israelites." This seems rather a precipitate sentence; for one can hardly tell what its improved condition under ancient civilization may have yielded, from merely seeing what it now is, after being overrun for centuries by hordes of contemptuous Bedouins. Still, as regards the general question, we are not informed what numbers of cattle followed the Israelites out of Egypt. We only know that "flocks and herds" went with them, were forbidden to graze "before the mount" (Sinai), and shared the fortunes of the desert with their owners. It further appears that, at the end of the forty years' wandering, two tribes and a half were the chief, perhaps the only, cattle-masters. And, when we consider how greatly the long and sore bondage of Egypt must have interfered with their favorite pursuit during the eighty years of Moses' life before the Exodus, it seems reasonable to think that in the other tribes only a few would have possessed cattle on leaving Egypt. The notion of a people "scattered abroad throughout all the land of Egypt" (Ex. v. 12) in pursuit of wholly different and absorbing labor, being able generally to maintain their wealth as sheep-masters is obviously absurd. It is therefore supposable that Reuben, Gad, and a portion of Manasseh had, by remoteness of local position, or other favorable circumstances to us unknown, escaped the oppressive consequences to their flocks and herds which must have generally prevailed. We are not told that the lambs at the first passover were obtained from the flock of each family, but only that they were bidden to "*draw out and take* a lamb for an house" - - a direction quite consistent in many, perhaps in most cases, with purchase. Hence it is probable that these two tribes and a half may have been the chief cattle-masters first as well as last. If they had enough cattle to find their pursuit in tending them, and the others had not, economy would dictate a transfer; and the whole multitude of cattle would probably fare better by such an arrangement than by one which left a few head scattered up and down in the families of different tribes. Nor is there any reason to think that the whole of the forty years' sojourn was spent in such locomotion as marks the more continuous portion of the narrative. The great gap in the record of events left by the statement of Deut. i. 46, "Ye abode in Kadesh many days," may be filled up by the supposition of quarters established in a favorable site, and the great bulk of the whole time may have been really passed in such stationary encampments. And here, if two tribes and a half only were occupied in tending cattle, some resource of labor, to avoid the embarrassing temptations of idleness in a host so large and so disposed to murmur, would be, in a human sense, necessary. Nor can any so probable an occupation be assigned to the remaining nine and a half tribes, as that of drawing from the wilderness whatever contributions it might be made to afford. From what they had seen in Egypt, the work of irrigation would be familiar to them, and from the prospect before them in Palestine the practice would at some time become necessary: thus there were on the whole the soundest reasons for not allowing their experience, if possible, to lapse. And, irrigation being supposed, there is little, if any, difficulty in supposing its results; to the spontaneousness of which ample testimony, from various travellers, has been cited above. At any rate it is unwise to decide the question of the possible resources of the desert from the condition to which the apathy and fastidiousness of the Bedouins have reduced it in modern times. On this view, while the purely pastoral tribes would retain their habits unimpaired, the remainder would acquire some slight probation in those works of the field which were to form the staple industry of their future country. But, if any one still insists that the produce of the desert, however supposably improved, could never have yielded support for *all* "the flocks and herds" — utterly indefinite as their number is — which were carried thither; this need not invalidate the present argument, much less be deemed inconsistent with the Scriptural narrative. There is nothing in the latter to forbid our supposing that the cattle perished in the wilderness by hundreds or by thousands. Even if the words of Ps. cvii. 38 be taken in a sense literally historical, they need mean no more than that, by the time they reached the borders of Palestine, the numbers so lost had, by a change of favorable circumstances, been replaced, perhaps even by capture from the enemy, over whom God, and not their own sword, had given them the victory. All that is contended for is, that the resources of the wilderness were doubtless utilized to the utmost, and that the flocks and herds, so far as they have survived, were so kept alive. What those resources might amount to, is perhaps nearly as indefinite an inquiry as what was the number of the cattle. The difficulty

Digitized by Google

would "find its level" by the diminution of the latter till it fell within the limits of the former; and in this balanced state we must be content to leave the question.

Nor ought it to be left out of view, in considering any arguments regarding the possible change in the character of the wilderness, that Egyptian policy certainly lay, on the whole, in favor of extending the desolation to their own frontier on the Suez side; for thus they would gain the surest protection against invasion on their most exposed border; and as Egypt rather aimed at the development of a high internal civilization than an extension of influence by foreign conquest, such a desert frontier would be to Egypt a cheap defense. Thus we may assume that the Pharaohs, at any rate after the rise of the Assyrian empire, would discern their interest and would act upon it, and that the felling of wood and stopping of wells, and the obliteration, wherever possible, of oases, would systematically make the Peninsula untenable to a hostile army descending from the N. E. or the N.

IV. It remains to trace, so far as possible, the track pursued by the host, bearing in mind the limitation before stated, that a variety of converging or parallel routes must often have been required to allow of the passage of so great a number. Assuming the passage of the Red Sea to have been effected at some spot N. of the now extreme end of the Gulf of Suez, they would march from their point of landing a little to the E. of S. Here they were in the wilderness of Shur, and in it "they went three days and found no water." The next point mentioned is Marah. The *'Ain el-Hawdra* has been thought by most travellers since Burckhardt's time to be Marah. Between it and the *'Ayûn Mûsa* the plain is alternately gravelly, stony, and sandy, while under the range of *Jebel Wardân* (a branch of *et-Tîh*) chalk and flints are found. There is no water on the direct line of route (Robinson, i. 87–98). *Hawdra* stands in the line and gypsum region which lines the eastern shore of the Gulf of Suez at its northern extremity. Seetzen (*Reisen*, iii. 117) describes the water as salt, with purgative qualities; but adds that his Bedouins and their camels drank of it. He argues, from its inconsiderable size, that it could not be the Marah of Moses. This, however, seems an inconclusive reason. [MARAH.] It would not be too near the point of landing assumed, as above, to be to the N. of the *'Ayûn Mûsa*, nor even, as Dr. Stewart argues (p. 55), too near for a landing at the *'Ayûn Mûsa* itself,[a] when we consider the incumbrances which would delay the host, and, especially whilst they were new to the desert, prevent rapid marches. But the whole region appears to abound in brackish or bitter springs (Seetzen, *ibid* iii. 117, &c.; *Anmerk* 430). For instance, about 1¼ hour nearer Suez than the *Wady Ghurûndel* (which Lepsius took for Marah, but which Niebuhr and Robinson regard as more probably Elim), Seetzen (*ibid.* iii. 113, 114) found a *Wady*[b] *Tâl*, with a salt spring and a salt crust on the surface of its bed, the same, he thinks, as the spot where Niebuhr speaks of finding rock-salt. This corresponds in general proximity with Marah. The neighboring region is described as a low plain girt with limestone hills, or more rarely chalk. For the consideration of the miracle of sweetening the waters, see MARAH. On this first section of their desert-march, Dr. Stanley (*S. & P.* p. 37) remarks, "There can be no dispute as to the general track of the Israelites after the passage (of the Red Sea). If they were to enter the mountains at all, they must continue in the route of all travellers, between the sea and the table-land of the *Tîh*, till they entered the low hills of *Ghurûndel*. According to the view taken of the scene of the passage, Marah may either be at 'the springs of Moses,' or else at *Hawdra* or *Ghurûndel*." He adds in a note, "Dr. Graul, however, was told . . . . of a spring near *Tîh el-Amâra*, right (*i. e.* south) of *Hawâra*, so bitter that neither men nor camels could drink of it. From hence the road goes straight to *Wady Ghurûndel*." Seetzen also inclines to view favorably the identification of *el-Amâra* with Marah. He gives it the title of a "wady," and precisely on this ground rejects the pretensions of *el-Hawdra* as being no "wady," but only a brook;[c] whereas, from the statement "they encamped" at Marah, Marah must, he argues, have been a wady.[d] It seems certain, however, that *Wady Ghurûndel* — whether it be Marah, as Lepsius and (although doubtfully) Seetzen thought, or Elim as Niebuhr, Robinson, and Kruse — must have lain on the line of march, and almost equally certain that it furnished a camping station. In this wady Seetzen found more trees, shrubs, and bushes than he anywhere else saw in his journey from Sinai to Suez. He particularizes several date-palms and many tamarisks, and notes that the largest quantity of the vegetable manna, now to be found anywhere in the Peninsula, is gathered here (iii. 116) from the leaves of the last-named tree, which here grows "with gnarled boughs and hoary head; the wild acacia, tangled by its desert growth into a thicket, also shoots out its gray foliage and white blossoms over the desert" (Stanley, *S. & P.* p. 68). The "scenery" in this region becomes "a succession of watercourses"[e] (*ibid.*); and the *Wady Tayibeh*, connected with *Ghurûndel* by

---

[a] Dr. Aitoun, quoted by Dr. Stewart (*l. c.*), it seems, denies this.

[b] In the *Wady Tâl* were found date-palms, wild trunkless tamarisks, and the white-flowering broom; also a small, sappy growth, scarce a hand high, called *el Szemmhh* by the Bedouins, which, when dried, is pounded by them, and mixed with wheat for bread. It has a saltish-sour taste, and is a useful salad herb, belonging to the order *Mesembryanthemum*, Linn. (Seetzen, *ibid.*).

[c] Yet he apparently allows as possible that Marah may be found *in a brook* observed by Fürer a little to the N. of *Ghurûndel* (iii. 117).

[d] There is, however, a remarkable difference between the indication of locality given by Seetzen to this wady, and the position ascribed to the *Tîh el-Amâra*, as above. For Seetzen (or rather Dr. Kruse, commenting on his journal) says, Robinson passed the wady *two hours nearer Suez* than *Hawâra*, and therefore so far to the north, *not south*, of it (*Reisen*, iii. pt. iii. 430 431). Hence it is possible that the Tîh and the *Wady el-Amâra* may be distinct localities, and the common name result from the common property of a briny or bitter spring. Kiepert's map (in Robinson, vol. i.) gives the two names *Amâra* and *Hawâra* close together, the former a little, but less than a mile, to the north.

[e] So Dr. Kruse notices that Dr. Robinson's Arabs who camped in *Ghurûndel* found, at half an hour's distance from their camping ground, a flowing brook and copious fountains, such as they hitherto nowhere found in the Peninsula (Seetzen, iii. pt. iii. 430)

Digitized by Google

*Useit*,[a] is so named from the goodly water and vegetation which it contains. These three wadies encompass on three sides the *Jebel Hummâm*; the sea, which it precipitously overhangs, being on the fourth. To judge from the configuration as given in the maps, there seems no reason why all three should not have combined to form Elim, or at any rate, as Dr. Stanley (*ibid.*) suggests, two of them. Only, from Num. xxxiii. 9, 10, as Elim appears *not* to have been on the sea, we must suppose that the encampment, if it extended into three wadies, stopped short of their seaward extremities. The Israelitish host would scarcely find in all three more than adequate ground for their encampment. Beyond (*i. e.* to the S. E. of *Ghürûndel*), the ridges and spurs of limestone mountain push down to the sea, across the path along the plain (Robinson, i. 70, and *Map*).

This portion of the question may be summed up by presenting in a tabular form, the views of some leading travellers or annotators, on the site of Elim: —

| *Wady Ghürûndel.* | | *Wady Useit.* | Some warm springs north of *Tûr*, which feed the rich date-plantations of the convent there. |
|---|---|---|---|
| Niebuhr, Robinson Kruse. (By Lepsius identified with Marah.) | One or both, Stanley. | Laborde Robinson (i. 72). | Seetzen. |

Dr. Kruse (*Anmerk.* p. 418) singularly takes the words of Ex. xv. 27, "they encamped there (in Elim) *by the waters*," as meaning "by the sea;" whereas, from Num. xxxiii. 9, 10, it appears they did not reach the sea till a stage further, although their distance from it previously had been but small.

From Elim, the next stage brought the people again to the sea. This fact, and the enviable position in respect of water supply, and consequent great fertility, enjoyed by *Tûr* on the coast, would make it seem probable that Tûr was the locality intended; but as it lies more than seventy miles, in a straight line, from the nearest probably assignable spot for Elim, such a distance makes it a highly improbable site for the next encampment. The probable view is that their seaside camp was fixed much nearer to the group of wadies viewed as embracing Elim, perhaps in the lower part of the *Wady Tayibeh*, which appears to have a point of juncture with the coast (Stanley, *S. & P.* p. 38). The account in Ex. xvi. knows nothing of this encampment by the sea, but brings the host at once into "the wilderness of Sin;" but we must bear in mind the general purpose of recording, not the people's history so much as God's dealings with them, and the former rather as illustrative of the latter, and subordinate thereto. The evident design however, in Num. xxxiii. being, to place on record their itinerary, this latter is to be esteemed as the *locus classicus* on any topographical questions, as compared with others having a less special relation to the track. The "wilderness of Sin" is an appellation no doubt representing some natural feature, and none more probably than the alluvial plain, which, lying at the edge of the sea, about the spot we now regard them as having reached, begins to assume a significant appearance. The modern name for this is *el-Kâa*, identified by Seetzen[b] with this wilderness (iii. pt. iii. 412). Dr. Stanley[c] calls *el Kâa*, at its initial point, "the plain of *Murkhâh*," and thinks it is probably this wilderness. Lower down the coast this plain expands into the broadest in the Peninsula, and somewhere in the still northern portion of it we must doubtless place the "Dophkah"[d] and "Alush" of Num. xxxiii. 12–14.

In the wilderness of Sin occurred the first murmuring for food, and the first fall of manna. The modern confection sold under that name is the exudation collected from the leaves of the tamarisk tree (*Tamarisk Orientalis*, Linn., Arab. *tarfa*, Heb. אֶשֶׁל) only in the Sinaitic valleys, and in no great abundance.[e] If it results from the punctures made in the leaf by an insect (the *Coccus manniparus*, Ehrenberg) in the course of June, July, and August, this will not suit the time of the people's entering the region "on the fifteenth day of the second month after" their departure from Egypt (Ex. xvi. 1–8). It is said to keep as a hardened syrup for years (Laborde, *Comment. Geogr.* on Ex. xvi. 13, 14), and thus does not answer to the more striking characteristics described in Ex. xvi. 14–26. [MANNA.] Seetzen thought that the gum Arabic, an exudation of the acacia, was the real manna of the Israelites; *i. e.* Seetzen regards the statement of "bread from heaven" as a fiction (*Reisen*, iii. 75–79). A caravan of a thousand persons is said by Hasselquist (*Voyages*, etc., *Materia Medica*, p. 298, transl. ed. 1766) to have subsisted solely on this substance for two months. In the same passage of Ex. (v. 13) quails are first mentioned.

In most portions of the earlier route it is more important to show the track than to fix the stations; and such an indication only can be looked for where nothing beyond the name of the latter is recorded. Supposing now that the alluvial plain, where it first begins to broaden to a significant size, is "the wilderness of Sin," all further questions, till we come to Sinai, turn on the situation assigned to Rephidim. If, as seems most likely, Rephidim be found at *Feirân* [REPHIDIM], it becomes almost certain that the track of the host lay to the north of *Serbâl*,[f] a magnificent five-peaked mountain,

---

[a] Robinson (i. 69) says that near this wady hot sulphureous springs were visited by Niebuhr, and are described by Russegger.

[b] He calls it the Wilderness of *Sir*, but this is plainly a misprint for *Sin*.

[c] His map, however, omits the name *el-Kâa*. Robinson thinks the wilderness of Sin is the maritime plain southeast of *Murkhâh*, but not certainly including the latter.

[d] Seetzen thought that Dophkah might possibly be retraced in the name of a place in this region, *el-Tabbâsha* (kruse). For Alush there is no conjecture.

[e] Seetzen compares it to the round beads obtained from the mastich; and says it is used as a purgative in Upper Egypt, and that it is supposed to be brought out by the great effect of heat on a sandy soil, since in Syria and elsewhere this tree has not the product.

[f] Dr. Stanley notices that possibly, viewing *Ghürûndel* (or *Useit*, which lies beyond it, from Suez) as Elim, the host may have gone to the latter (the *further* point), and then have turned back to the lower part of *Ghürûndel*, and *there* pitched by the "Red Sea." Then, he further remarks, it was open to them to take a northern course for Sinai (*Jebel Mûsa*) avoiding *Serbâl* and *Feirân* altogether (*S. & P.* p. 38 But all this, he adds, seems "not likely." That route

Digitized by Google

which some have thought to be Sinai, and which becomes first visible at the plain of *Ahurkhâh*. [SINAI.] The Tabernacle was not yet set up, nor the order of march organized, as subsequently (Num. x. 13, &c.), hence the words "track" or "route," as indicating a line, can only be taken in the most wide and general sense. The road slowly rises between the coast and *Feirân*, which has an elevation of just half the highest peak of the whole cluster. *Feirân* must have been gained by some road striking off from the sea-coast, like the *Wady Mokatteb*, which is now the usual route from Cairo thither, perhaps by several parallel or converging lines. Those who reject *Feirân* for Rephidim will have the onus of accounting for such a fruitful and blooming spot as, from its position, it must always have been, being left out of the route, and of finding some other site for Rephidim. Possibly *Tûr* itself might be Rephidim, but then not one of the sites generally discussed for Sinai will suit. It seems better then to take *Feirân*, or the adjacent valley of *es-Sheykh* in connection with it, for Rephidim. The water may have been produced in one, and the battle have taken place in the other, of these contiguous localities; and the most direct way of reaching them from *el-Murkhâh* (the "wilderness of Sin") will be through the wadies *Shellâh* and *Mokatteb*. Dr. Stanley, who suggests the road by the S. of *Serbâl*, through *Wady Hebrân* [a] (Robinson, i. 95), as also a possible route to Sinai (*S. & P.* p. 38, 4), and designates it "the southern" one, omits to propose any alternative station for Rephidim; as he also does in the case of "the northern" route being accepted. That route has been already mentioned (page 3522, note *f*), but is of too remote a probability to require being here taken into view. The *Wady Mokatteb*, the "written," as its name imports, contains the largest number of inscriptions known as the Sinaitic. They are scratched on the friable surface of the sandstone masses which dot the valley on either side, some so high as to have plainly not been executed without mechanical aid and great deliberation. They are described or noticed by Dr. Robinson, Burckhardt, Laborde, Seetzen, and others, but especially by Dr. Stanley (*S. & P.* pp. 57–62). [See on this subject SINAI, p. 3053, notes *c* and *d*.]

V. Besides the various suggestions regarding Horeb and Sinai given under SINAI, one occurs in Dr. Kruse's *Anmerkungen* on Seetzen, which is worth recording here. Seetzen approached the *Jebel Mûsa* from the N., a little W., by a route which seems to have brought him into the region through which Dr. Robinson approached it from the N. W. On this Dr. Kruse remarks, "Horeb lay in the plain of Rephidim . . . . a day's march short of (*vor*) Sinai, on a dry plain, which was extensive enough for a camping ground, with a rock fountain struck by Moses from the rock. This distance just hits the plain *es-Sheb* (*Scheb*, Kiepert's Map), which Robinson entered before reaching the foremost ridge of Sinai, and suits the peaked mountain *el-Orf*, in the highest point of this plain. That this plain, too, is large enough for fighting in (as mentioned Ex. xvii. 9), is plain from Robinson's statement (i. 141) of a combat between two tribes which took place there some years before his visit. Robinson, from this rocky peak, which I took for Horeb, in 1½ hour reached the spring *Gurbeh*, probably the one the opening of which was ascribed to Moses, and thence in another hour came to the steep pass *Nûkb Hâwy*, to mount which he took 2¼ hours, and in 2¼ hours more, crossing the plain *er-Râheh*, arrived at the convent at the foot of Sinai. Seetzen's Arabs gave the name of *Orribe* [b] to a mountain reached before ascending the pass, no doubt the same as Robinson's *el-Orf* and the Horeb of Holy Writ" (*Reisen*, iii. pt. iii. 422; comp. 414). He seeks to reconcile this with Ex. xxxiii. 6, which describes the people, penitent after their disobedience in the matter of the golden calf, as "stripping themselves of their ornaments *by the Mount Horeb*," by supposing that they were by Moses led back again [c] from Sinai, where God had appeared to him, and immediately below which they had encamped, to Horeb in the plain of Rephidim. But this must have been a day's journey backward, and of such a retrograde movement the itinerary in Num. xxxiii. 14, 15, 16, has no trace. On the contrary, it says, "they removed from the desert of Sinai and pitched in Kibroth Hattaavah." Now, although they stayed a year in the wilderness of Sinai (Ex. xix. 1; Num. x. 11, 12), and need not be supposed to have had but one camping station all the time, yet Rephidim clearly appears to lie without the limits of that wilderness (Ex. xvii. 1, xix. 1, 2; Num. xxxiii. 15), and a return thither, being a departure from those limits, might therefore, we should expect, be noticed, if it took place; even though all the shiftings of the camp *within* the wilderness of Sinai might not be set down in the itinerary Under SINAI an attempt is made to reconcile the "*rock in* Horeb" at Rephidim with a "*Mount* Horeb" (the same, in fact, as Sinai, though with a relative difference of view), by regarding "Horeb" as a designation descriptive of the ground, applicable, through similarity of local features, to either. If this be not admitted, we may perhaps regard the *Wady es-Sheykh*, a crescent concave southwards, whose western horn joins *Wady Feirân*, and whose eastern finds a southeastern continuation in the plain *er-Râheh* (leading up to *Jebel Mûsa*, the probable Sinai), as *the* Horeb proper. This contains a rock called traditionally the "seat of Moses" (Schubert, *Reisen*, ii. 356). And this is to some

passes by *Sîrâbit el-Khadim* to the *Jebel Mûsa*. Robinson, who went by this way, conjectured that *el-Khâdim* was a place of pilgrimage to the ancient Egyptians, and might have been the object of Moses' proposed journey of "three days into the wilderness" (i. 79). The best account of this locality by far, which the present contributor has met with, is that in the MS. referred to at the end of this article. The writer dwells especially on the immense remains of mining operations, refuse of fuel, metal, etc., to be seen there; also on the entrenched camp at *Mûghâra*, discovered recently by Major Macdonald, evidently a work of great labor and of capacity for a large garrison.

[a] Through the wilderness of *Kâa* (from its northern border) to the opening of *Wady Hebrân* into it is 5½ hours' journey. The manna tamarisk is found there; and some birds, called by Dr. Kruse "Wüstenhühnern," which he appears to think might be the quails of Scripture. Seetzen in his journal plainly sets down the "quails" as being wholly a mistake for locusts (*Reisen*, iii. pt. iii. 413, comp. 80).

[b] "Two hardly distinguishable mountains on either side of the way (from the *Wady Beitzarân*) were named *Orribe* and *Freuen*" (*Reisen*, iii. 69).

[c] He thinks the reason why they were thus countermanded was because "Horeb" was better supplied with water, but he does not show that th. "spring *Gurbeh*" adequately meets this condition (*ibid.* 422).

Digitized by Google

extent confirmed by the fact that the wady which continues the plain *er-Rāhah* to the N. W., forming with the latter a slightly obtuse angle, resumes the name of *es-Sheykh*. If we may suppose the name "Horeb," though properly applied to the crescent *Wady es-Sheykh*, which joins *Feirān*, to have had such an extension as would embrace *er-Rāhah*, then the "rock *in* Horeb" might be a day's journey from the "Mount (of) Horeb."[a] This view, it may be observed, does not exclude that just referred to under SINAI, but merely removes it from resting on the sense there proposed for "Horeb" (חוֹרֵב), as a local appellative, to more general grounds.

But whatever may be the case with other sacred localities, the identification of Sinai itself will probably never be free from obscurity. We seem to have adequate information regarding all the eminent mountains within the narrow compass to which our choice is reduced, and of all the important passes. Nor is it likely that any fresh clew of trustworthy local tradition will be unraveled, or any new light thrown on the text of the Scriptural statements. Somewhere in the granitic nucleus of lofty mountain crests the answer, doubtless, lies.[b] For the grounds on which a slight preponderance of probability rests in favor of the *Jebel Mūsa*,[c] see SINAI. But even that preponderance mainly rests on the view that the numbers ascribed in our present text to the host of Israel are trustworthy. If further criticism should make this more doubtful than it now is, that will have the probable effect of making the question more vague rather than more clear than it is at present. "This degree of uncertainty is a great safeguard for the real reverence due to the place. As it is, you may rest on your general conviction and be thankful" (*S. & P.* p. 76). The tradition which has consecrated the *Jebel Mūsa* can, we know, be traced to its source in a late year. It has the taint of modernism and the detective witness of the older tradition of *Serbāl*. Dr. Stanley thinks it "doubtful whether the scene of the giving of the Law, as we now conceive it, ever entered into the minds of those who fixed the traditional site. The consecrated peak of the *Jebel Mūsa* was probably revered simply as the spot where Moses saw the vision of God, without reference to any more general event" (*S. & P.* p. 76), and this is likely to have been equally true of *Serbāl* before it. The Eastern mind seized on the spot as one of devout contemplation by the one retired saint; the Western searches for a scene which will bring the people perceptibly into the region of that Presence which the saint beheld.

Certain vivid impressions left on the minds of travellers seem to bespeak such remarkable features for the rocks of this cluster, and they are generally so replete with interest, that a few leading details of the aspect of the principal mountains may find place here. Approaching the granitic nucleus from the N. side, Seetzen found himself "ever between two high, wild, and naked cliffs of granite." All possible forms of mountains blended in the view of the group, conical and pointed, truncated, serrated, and rounded (*Reisen*, iii. 69, 67). Immediately previous to this he had been upon the perpendicular sandstone cliffs, which in *el-Dilāl* bounded the sandy plain *er-Ramleh* on the eastern, whilst similar steep sandstone cliffs lay on the N. and N. W. On a nearer view small bright quartz-grit (*Quarzkiesel*), of whitish-yellow and reddish hue, was observed in the coarse-grained sandstone. Dr. Stanley, approaching from the N. W., from *Wady Shellāl*, through wadies *Sidri* and *Feirān*, found the rocks of various orders more or less interchanged and intermixed. In the first, "red tops resting on dark-green bases closed the prospect in front," doubtless both of granite. Contrast with this the description of *Jebel Mūsa*, as seen from Mount St. Catherine (*ibid.* 77), "the *reddish* granite of its *lower* mass, ending in the gray *green* granite of the *peak* itself." *Wady Sidri* lies "between red granite mountains descending precipitously on the sands," but just in the midst of it the granite is exchanged for sandstone, which last forms the rock-tablets of the *Wady Mokatteb*, lying in the way to *Wady Feirān*. This last is full of "endless windings," and here "began the curious sight of the mountains, streaked from head to foot, as if with boiling streams of dark red matter poured over them, the igneous fluid squirted upwards as they were heaved from the ground." . . . . "The colors tell their own story, of chalk and limestone and sandstone and granite." Besides these, "huge cones of white clay and sand are at intervals planted along these mighty watercourses (the now dry wadies), apparently the original alluvial deposit of some tremendous antediluvian torrent, left there to stiffen into sandstone" (*ib.* 71). The *Wady Feirān* is bounded southwards by the *Jebel Nedāyeh* and the *Jebel Serbāl*, which extend westwards to the maritime plain, and eastward to the Sinaitic group, and on whose further or southern side lies the widest part of *el-Kāa*, previously noticed as the "wilderness of Sin." Seetzen remarks that *Jebel Feirān* is not an individual mountain, but, like Sinai, a conspicuous group (*Reisen*, iii. 107; comp. pt. iii. 413).

*Serbāl* rises from a lower level than the Sinaitic group, and so stands out more fully. Dr. Stewart's account of its summit confirms that of Burckhardt. The former mounted from the northern side a

---

[a] The expression מִדְבַּר חוֹרֵב in Ex. xxxiii. 6 may probably be, like the expression הַר הָאֱלֹהִים, iii. 1, and that of מִדְבַּר יְהוּדָה, Josh. xxi. 11, etc., two nouns in regimen, the "mount *of* Horeb."

[b] The *Tabula Peutingeriana* gives in the interior of the Sinaitic peninsula a wilderness indicated as "desertum ubi xl. annos erraverunt filii Israelis ducente Moyse," and marks therein a three-peaked mountain, with the words, "hic legem acceperunt in monte Syna." Dr. Kruse thinks the "three peaks" mean Sinai (*i. e.* the *Jebel Mūsa*), *Ag. Episteme* and the *Jebel Hum'r* (Seetzen, *Reisen*, iii. pt. iii. 421).

[c] Dr. Kruse says, "This highest S. E. point of Sinai is indisputably the 'mountain of the Lord' of Holy Writ, the modern Mount St. Catherine. The N. W part of Sinai is, however, now named *Chorif* by the monks, not by the Arabs, probably in order to combine Horeb with Sinai, by which name they denote the most southeasterly point. The 'plain' or 'wilderness' of Sinai can be nothing else than the high plain situated on the northern steep declivity surrounded by the three before-named peaks of Sinai, the opposite plateau of *Jebel Fureiā*, and E. and W. some low ridges. It is now called the plain *Rāhah*, and is according to Robinson's measurement, quite large enough to hold two millions of Israelites, who have encamped together" (*ibid.* 422).

Digitized by Google

narrow plateau at the top of the easternmost peak. A block of gray granite crowns it, and several contiguous blocks form one or two grottoes, and a circle of loose stones rests in the narrow plateau at the top (*The Tent and the Khan*, pp. 117, 118). The "five peaks," to which "in most points of view it is reducible, at first sight appear inaccessible, but are divided by steep ravines filled with fragments of fallen granite." Dr. Stanley mounted "over smooth blocks of granite to the top of the third or central peak," amid which "innumerable shrubs, like sage or thyme, grew to the very summit." Here, too, his ascent was assisted by loose stones arranged by human hands. The peak divides into "two eminences," on "the highest of which, as on the back of some petrified tortoise, you stand, and overlook the whole Peninsula" (*S. & P.* pp. 71, 72). Russegger says "the stone of the peak of *Serbâl* is porphyry" (*Reisen*, iii. 276). Dr. Stewart mentions the extensive view from its summit of the mountains "which arise from the western shore of the Gulf of 'Akabah," seen in the N. E., and of the Sinaitic range, "closely packed" with the intermediate *Jebel Wateidh*, "forming the most confused mass of mountain tops that can be imagined" (pp. 114, 115). His description of the ascent of the eastern peak is formidable. He felt a rarity of the air, and often had to climb or crawl flat on the breast. It was like "the ascent of a glacier, only of smooth granite, instead of ice." At a quarter of an hour from the summit he also "found a stair of blocks of granite, laid one above another on the surface of the smooth slippery rock" (p. 113). On the northern summit are visible the remains of a building, "granite fragments cemented with lime and mortar," and "close beside it three of those mysterious inscriptions," implying "that this summit was frequented by unknown pilgrims who used those characters" (*S. & P.* p. 72).

The approach to *Jebel Mûsa* from the W. is only practicable on foot. It lies through *Wady Solâm* and the *Nâkb Hâwk*, "Pass of the Wind,"[a] whose stair of rock leads to the second or higher stage of the great mountain labyrinth. Elsewhere this pass would be a roaring torrent. It is amidst masses of rock a thread of a stream just visible, and here and there forming clear pools, shrouded in palms, or leaving its clew to be traced only by rushes. From the head of this pass the cliff-front of Sinai comes in sight through "a long continued plain between two precipitous mountain ranges of black and yellow granite." This is the often-mentioned plain *er-Râheh*. Deep gorges enter it on each side, and the convent and its gardens close the view. The ascent of *Jebel Mûsa*, which contains "high valleys with abundant springs," is by a long flight of rude steps winding through crags of granite. The cave and chapel "of Elias" are passed on the slope of the ascent, and the summit is marked by the ruins of a mosque and of a Christian church. But Strauss adds, "the 'Mount of Moses' rose in the south higher and higher still" and the point of this, *Jebel Mûsa*, eighty feet in diameter, is distant two hours and more from the plain below (*Sinai and Golgotha*, p. 116). The *Râs Sûfsâfeh* seems a small, steep, and high mountain, which is interposed between the slope of *Jebel Mûsa* and the plain; and, from its position, surveys both the openings of *es-Sheykh* N. E. and of *er-Râheh* N. W., which converge at its foot. Opposite to it, across the plain, is the *Jebel Fureid*, whose peak is cloven asunder, and the taller summit is again shattered and rent, and strewn, as by an earthquake, with its own fragments. The aspect of the plain between *Jebel Fureid*, which here forms a salient angle, wedging southwards, and the *Râs Sûfsâfeh*, is described as being, in conjunction with these mountains, wonderfully suggestive, both by its grandeur and its suitableness for the giving and the receiving of the Law. "That such a plain should exist at all in front of such a cliff is so remarkable a coincidence with the sacred narrative, as to furnish a strong internal argument, not merely of its identity with the scene, but of the scene itself having been described by an eye-witness" (*S. & P.* pp. 42, 43). The character of the Sinaitic granite is described by Seetzen (*Reisen*, iii. 86) as being (1) flesh-red with glass-colored quartz and black mica, and (2) grayish-white with abundance of the same mica. He adds that the first kind is larger-grained and handsomer than the second. Hamilton speaks of "long ridges of arid rock surrounding him in chaotic confusion on every side," and "the sharp broken peaks of granite far and near as all equally desolate" (*Sinai, the Hedjaz, and Soudan*, p. 81). This view of "granite peaks," so thickly and wildly set as to form "a labyrinth" to the eye, was what chiefly impressed Dr. Stanley in the view from the top of *Jebel Mûsa* (*S. & P.* p. 77). There the weather-beaten rocks are full of curious fissures and holes (p. 46), the surface being "a granite mass cloven into deep gullies and basins" (p. 76). Over the whole mountain the imagination of votaries has stamped the rock with tokens of miracle. The dendrites[c] were viewed as memorials of the Burning Bush. In one part of the mountain is shown the impress of Moses' back, as he hid himself from the presence of God (*ib.* 30); in another the hoof-print of Mohammed's mule; in the plain below, a rude hollow between contiguous blocks of stone passes for the mould of the head of the Golden Calf; while in the valley of the *Leja*, which runs, parallel to and overhung by the *Jebel Mûsa's* greatest length, into *er-Râheh*, close to *Râs Sûfsâfeh*, the famous "Stone of Moses" is shown — "a detached mass from ten to fifteen feet high, intersected with wide slits or cracks . . . . with the stone between them worn away, as if by the dropping of water from the crack immediately above." This distinctness of the mass of the stone lends itself to the belief of the Rabbis, that this "rock followed" the Israelites through the wilderness, which would not be the

[a] By this pass Dr. Stanley was himself conducted thither, sending his camels round by the *Wady es-Sheykh* from *Feirân*, "the more accessible though more circuitous route into the central upland." By this latter he supposes the great bulk of the host of Israel may have reached *er-Râheh* and Sinai, while "the chiefs of the people would mount" by the same pass which he took (*S. & P.* p. 42).

[b] Dr. Stewart (*ub. sup.* 122) says, "Ghebel Musa, the Sinai of monkish traditions, is neither visible from the Ghebel (*i. e.* Râs) Sûfsâfeh, nor from any other point in the plain of *er-Râheh*." This seems confirmed by the argument of *S. & P.* pp. 43, 44, that Moses, descending from the *Jebel Mûsa*, would not be able to see what was going on in the plain till he emerged upon it, the height of *Sûfsâfeh* effectually intercepting the view.

[c] These have become scarce on this mountain; Seetzen (*Reisen*, iii. 86) expressly mentions that he observed none. They are now found abundantly in the course of constructing Abbas Pasha's mountain road (Stewart, *T. & K.* pp. 132, 134).

Digitized by Google

ease with the non-detached off-set of some larger cliff. The Koran also contains reference to "the rock with the twelve mouths for the twelve tribes of Israel," *i. e.* the aforesaid cracks in the stone, into which the Bedouins thrust grass as they mutter their prayers before it. Bishop Clayton accepted it as genuine, so did Whiston the translator of Josephus;[a] but it is a mere *lusus naturæ;* and there is another fragment, "less conspicuous," in the same valley, "with precisely similar marks." In the pass of the *Wady es-Sheykh* is another stone, called the "Seat of Moses," described by Laborde (*S. & P.* pp. 45–48, and notes). Seetzen adds, some paces beyond the "Stone of Moses" several springs, copious for a region so poor in water, have their source from under blocks of granite, one of which is as big as this "Stone of Moses." These springs gush into a very small dike, and thence are conducted by a canal to supply water to a little fruit-garden. . . . . Their water is pure and very good. On this canal, several paces below the basin, lies a considerably bigger block of granite than the "Stone of Moses," "and the canal runs round so close to its side as to be half-concealed by it" (*Reisen*, iii. 95). He seems to argue that this appearance and half-concealment may have been made use of by Moses to procure belief in his having produced the water miraculously, which existed before. But this is wholly inconsistent, as indeed is any view of this being the actual "rock in Horeb," with his view of Rephidim as situated at *el-Hessueh*, the western extremity of the *Wady Feirán*. Equally at variance with the Scriptural narrative is the claim of a hole in *er-Ráheh*, below *Rás Sáfsáfeh*, to be "the Pit of Korah," whose story belongs to another and far later stage of the march.

On Mount St. Catherine the principal interest lies in the panorama of the whole Peninsula which it commands, embraced by the converging horns of the Red Sea, and the complete way in which it overlooks the *Jebel Músa*, which, as seen from it, is by no means conspicuous, being about 1,000 feet lower. Seetzen mounted by a path strewn with stones and blocks, having nowhere any steps, like those mentioned as existing at *Serbál*, and remarks that jasper and porphyry chiefly constitute the mountain. He reached the highest point in three hours, including intervals of rest, by a hard, steep path, with toilsome clambering; but the actual time of ascending was only 1¾ hours. The date-palm plantation of *Tûr* is said to be visible from the top; but the haze prevailing at the time prevented this traveller from verifying it (*Reisen*, iii. 89–93). "The rock of the highest point of this mountain swells into the form of a human body. Its arms swathed like that of a mummy, but headless — the counterpart, as it is alleged, of the corpse of the beheaded Egyptian saint. . . . . Not improbably this grotesque figure furnishes not merely the illustration, but the origin, of the story" of St. Catherine's body being transported to the spot, after martyrdom, from Egypt by angelic hands (*S. & P.* p. 45).

The remaining principal mountain is named variously *ed-Deir*, "the Convent;" "Restûa," from St. Epistemé, the first abbess of the nunnery "Solab," from "the Cross," which stands on its summit; and the "Mount of the Burning Bush," from a legend that a sunbeam shoots down, supposed miraculously, on one day in the year, through the mountain into the chapel of the "Burning Bush"[b] (so called) in the convent (*ib.* p. 78). In the pass of the Convent rocks arise on every side, in long succession, fantastically colored, gray, red, blue, bright yellow, and bronze, sometimes strangely marked with white lines of quartz or black bands of basalt; huge blocks worn into fantastic shapes . . . . interrupt the narrow track, which successive ages have worn along the face of the precipice, or, hanging overhead, threaten to overwhelm the traveller in their fall. The wady which contains this pass is called by the name of *Shu'eib* — a corruption of Hobab, the name of the father-in-law of Moses (*ib.* pp. 32, 33). At the foot of a mountain near the convent Seetzen noticed "a range of rocks of black horn-porphyry, of hornblende, and black jasper, and between their scrolls or volutes white quartz." The gardens, as has been noticed, are in sight from the approach through *er-Ráheh*. Seetzen enlarges on their beauty, enhanced, of course, by the savage wild about them; "indeed a blooming vegetation appears in this climate wherever there is water" (*Reisen*, iii. 70, 73, 87). These proved capabilities of the soil are of interest in reference to the Mosaic and to every period. As regards the Convent, the reader may be referred to Dr. Stanley's animated description of its character, the policy of its founder, and the quality of its inmates (*S. & P.* pp. 51–56). This traveller took three hours in the ascent. "In the recesses between the peaks was a ruined Bedouin village. On the highest level was a small natural basin, thickly covered with shrubs of myrrh — of all the spots of the kind that I saw, the best suited for the feeding of Jethro's flocks in the seclusion of the mountain" (*ib.* p. 78). He thought the prospect, however, from its summit inferior in various ways to any of the other views from the neighboring mountains, *Serbál*, *St. Catherine*, *Jebel Músa* or *Rás Sufsáfeh*.

The rocks, on leaving Sinai on the east for 'Akabah, are curiously intermingled, somewhat as in the opposite margin of the wadies *Sidri* and *Mokatteb*. *Wady Seydl* contains "hills of a conical shape, curiously slanting across each other, and with an appearance of serpentine and basalt. The wady . . . . then mounted a short rocky pass — of hills capped with sandstone — and entered on a plain of deep sand — the first we had encountered — over which were scattered isolated clumps of sandstone, with occasional chalk . . . . At the close of this plain, an isolated rock, its high tiers rising out of lower tiers, like a castle." Here "the level ranges of *et-Tîh* rose in front." And soon after, on striking down, apparently, northeastwards, "a sandy desert, amidst fantastic sandstone rocks, mixed with lilac and dull green, as if of tufa," succeeded. After this came a desert strewn with "fragments of the *Tîh*," *i. e.* limestone, but "presently," in the "*Wady Ghuadîeh*,"[c] which turns at first

[a] See his note on *Ant.* iii. 1, § 7.

[b] Dr. Stanley verified the possibility of the fact, and disproved its miraculous character by examining the ravine above the Convent, through which, when the sun gains the necessary altitude, a ray would reach the chapel (*S. & P.* p 46).

[c] Here Dr. Stanley quitted the track pursued by Dr Robinson, which from the Convent he had hitherto followed; the latter continuing in a N. E. direction through *Wady Sumghy* to the western shore of the Gulf of 'Akabah, the former turning northwards by

nearly due northward, and then deflects westward, the "high granite rocks" reappeared; and in the *Wady el-'Ain*, "the rocks rise, red granite or black basalt, occasionally tipped as if with castles of sandstone to the height of about 1,000 feet . . . and finally open on the sea. At the mouth of the pass are many traces of flood — trees torn down, and strewed along the sand" (*ib.* pp. 80, 81).

VI. We now pass on to resume the attempt to trace the progress of the Israelites. Their sojourn of a year in the neighborhood of Mount Sinai was an eventful one. The statements of the Scriptural narrative which relate to the receiving of the two Tables, the Golden Calf, Moses' vision of God, and the visit of Jethro, are too well known to need special mention here; but besides these, it is certain from Num. iii. 4, that before they quitted the wilderness of Sinai, the Israelites were thrown into mourning by the untimely death of Aaron's two sons, Nadab and Abihu. This event is probably connected with the setting up of the Tabernacle and the enkindling of that holy fire, the sanctity of which their death avenged. That it has a determinate chronological relation with the promulgations which from time to time were made in that wilderness, is proved by an edict in Lev. xvi., being fixed as subsequent to it (Lev. x., comp. xvi. 1). The only other fact of history contained in Leviticus is the punishment of the son of mixed parentage for blasphemy (xxiv. 10–14). Of course the consecration of Aaron and his sons is mentioned early in the book in connection with the laws relating to their office (viii., ix.). In the same wilderness region the people were numbered, and the exchange of the Levites against the firstborn was effected; these last, since their delivery when God smote those of Egypt, having incurred the obligation of sanctity to him. The offerings of the princes of Israel were here also received. The last incident mentioned before the wilderness of Sinai was quitted for that of Paran is the intended departure of Hobab the Kenite, which it seems he abandoned at Moses' urgency. They now quitted the Sinaitic region for that of Paran, in which they went three days without finding a permanent encampment, although temporary halts must of course have been daily made (Num. i., ix. 15–23; x. 12, 33; xi. 35; xii. 16). A glance at Kiepert's, or any map showing the region in detail, will prove that here a choice of two main routes begins, in order to cross the intervening space between Sinai and Canaan, which they certainly approached in the first instance on the southern, and not on the eastern side. Here the higher plateau surmounting the *Tih* region would almost certainly, assuming the main features of the wilderness to have been then as they are now, have compelled them to turn its western side nearly by the route by which Seetzen came in the opposite direction from Hebron to Sinai, or to turn it on the east by going up the 'Arabah, or between the 'Arabah and the higher plateau. Over its southern face there is no pass, and hence the roads from Sinai, and those from Petra towards Gaza and Hebron, all converge into one of two trunk-lines of route (Robinson, i. 147, 151, 152, ii 186). Taberah and Kibroth-Hattaavah, both seem to belong to the same encampment where Israel abode for at least a month (xi. 20), being names given to it from the two events which happened there. [TABERAH, KIBROTH-HATTAAVAH, QUAILS.] These stations seem from Num. x. 11–13, 33–36, to have lain in the wilderness of Paran; but possibly the passage x. 11–13 should come after that 33–36, and the "three days' journey" of ver. 33 lie still in the wilderness of Sinai; and even Taberah and Hazeroth, reached in xi., xii., also there. Thus they would reach Paran only in xii. 16, and x. 12 would be either misplaced or mentioned by anticipation only. One reason for thinking that they did not strike northwards across the *Tih* range from Sinai, is Moses' question when they murmur, "Shall all the fish of the sea be gathered together for them, to suffice them?" which is natural enough if they were rapidly nearing the Gulf of 'Akabah, but strange if they were posting towards the inland heart of the desert. Again the quails[a] are brought by "a wind from the sea" (Num. xi. 22, 31); and various travellers (Burckhardt, Schubert, Stanley) testify to the occurrence of vast flights of birds in this precise region between Sinai and 'Akabah. Again, Haseroth, the next station after these, is coupled with Dizahab, which last seems undoubtedly the *Dahab* on the shore of that gulf (Deut. i. 1, and Robinson, ii. 187, note). This makes a seaward position likely for Haseroth. And as Taberah, previously reached, was three days' journey or more from the wilderness of Sinai, they had probably advanced that distance towards the N. E. and 'Akabah; and the distance required for this will bring us so near *el-Hudherâh* (the spot which Dr. Robinson thought represented Haseroth in fact as it seems to do in name), that it may be accepted as a highly probable site. Thus they were now not far from the coast of the Gulf of 'Akabah. A spot which seems almost certain to attract their course was the *Wady el-'Ain*, being *the* water, *the* spring, of that region of the desert, which would have drawn around it such "nomadic settlements as are implied in the name of Haseroth, and such as that of Israel must have been" (*S. & P.* p. 82). Dr. Robinson remarks, that if this be so, this settles the course to Kadesh as being up the 'Arabah, and not across the plateau of *et-Tih*.[b] Dr. Stanley thinks this identification a "faint probability," and the more uncertain as regards identity, "as the name Haseroth is one of the least likely to be attached to any permanent or natural feature of the desert," meaning "simply the inclosures, such as may still be seen in the Bedouin villages, hardly less transitory than tents" (*S. & P.* pp. 81, 82). We rely, however, rather on the combination of the various circumstances mentioned above than on the name. The *Wady Hûdherâh* and *Wady el-'Ain* appear to run nearly parallel to each other, from S. W. to N. E., nearly from the eastern extremity of the *Wady es-Sheykh*, and their N. E. extremity comes nearly to the coast, marking about a midway distance between the *Jebel Mûsa* and 'Akabah. In

---

the *Wady Ghûzâleh*, as above, immediately after passing the *'Ain el-Hûdherâh*.

[a] Seetzen supposes that what are called quails in Scripture were really locusts (*Reisen*, iii. 80); an opinion which Coquerel (Laborde, *Comm. Geogr.* Ex. xvi. 13) appears to have shared. But surely locusts, as edible, are too well known in Scripture to make the confusion possible. Mr. Tyrwhitt says that quails, or small partridges, which he supposes rather meant, are, as far as he saw, more common in the desert than locusts.

Hazeroth the people tarried seven days, if not more (Num. xi. 35, xii.), during the exclusion of Miriam from the camp while leprous. The next permanent encampment brought them into the wilderness of Paran, and here the local commentator's greatest difficulty begins.

For we have not merely to contend with the fact that time has changed the desert's face in many parts, and obliterated old names for new; but we have beyond this, great obscurity and perplexity in the narrative. The task is, first, to adjust the uncertainties of the record *inter se*, and then to try and make the resultant probability square with the main historical and physical facts, so far as the latter can be supposed to remain unaltered. Besides the more or less discontinuous form in which the sacred narrative meets us in Exodus, a small portion of Leviticus, and the greater part of Numbers, we have in Num. xxxiii. what purports at first sight to be a complete skeleton route so far as regards nomenclature; and we further find in Deuteronomy a review of the leading events of the wandering, or some of them, without following the order of occurrence, and chiefly in the way of allusion expanded and dwelt upon. Thus the authority is of a threefold character. And as, in the main narrative, whole years are often sunk as uneventful, so in the itinerary of Num. xxxiii., on a near view great chasms occur, which require, where all else bespeaks a severe uniformity of method, to be somehow accounted for. But, beyond the questions opened by either authority in itself, we have difficulties of apparent incongruity between them; such as the omission in Exodus of Dophka and Alush, and of the encampment by the Red Sea; and, incomparably greater, that of the fact of a visit to Kadesh being recorded in Num. xiii. 26, and again in xx. 1, while the itinerary mentions the name of Kadesh only once. These difficulties resolve themselves into two main questions. Did Israel visit Kadesh once, or twice? And where is it now to be looked for?

Before attempting these difficulties individually, it may be as well to suggest a caution against certain erroneous general views, which often appear to govern the considerations of desert topography. One is, that the Israelites journeyed, wherever they could, in nearly a straight line, or took at any rate the shortest cuts between point and point. This has led some delineators of maps to simply register the file of names in Num. xxxiii. 16–36 from Sinai in rectilinear sequence to Kedesh, wherever they may happen to fix its site, then turn the line backward from Kadesh to Ezion-geber, and then either to Kadesh again, or to Mount Hor, and thence again, and here correctly, down the 'Arabah southwards and round the southeastern angle of Edom, with a sweep northwards towards Moab. In drawing a map of the Wanderings, we should mark as approximately or probably ascertained the stations from Etham to Hazeroth, after which no track should be attempted, but the end of the line should lose itself in the blank space; and out of the same blank space it might on the western side of the 'Arabah be similarly resumed and traced down the 'Arabah, etc., as before described. All the sites of intervening stations, as being either plainly conjectural merely, or lacking any due authority should simply be marked in the margin, save that Moserah may be put close to Mount Hor, and Ezion-geber further S. in the 'Arabah [EZION-GEBER], from which to the brook Zered and onwards to the plains of Moab, the ambiguities lie in narrow ground, and a probable light breaks on the route and its stations.

Another common error is, that of supposing that from station to station, in Num. xxxiii., always represents a day's march merely, whereas it is plain from a comparison of two passages in Ex. (xv. 22), and Num. (x. 33), that on two occasions three days formed the period of transition between station and station, and therefore, that not day's marches, but intervals of an indefinite number of days between permanent encampments, are intended by that itinerary; and as it is equally clear from Num. ix. 22, that the ground may have been occupied for "two days, or a month, or a year," we may suppose that the occupations of a longer period only may be marked in the itinerary. And thus the difficulty of apparent chasms in its enumeration, for instance the greatest, between Ezion-geber and Kadesh (xxxiii. 35–37) altogether vanishes.

An example of the error, consequent on neglecting to notice this, may be seen in Laborde's map of the Wanderings, in his Commentary on Exodus and Numbers, in which the stations named in Num. xxxiii. 18–34 are closely crowded, but between those of ver. 35 and those of ver. 37 a large void follows, and between those of ver. 37 and those of ver. 39 a still larger one, both of which, since on referring to the text of his Commentary [a] we find that the intervals all represent day's marches, are plainly impossible.

Omitting, then, for the present all consideration of the previous intervals after Hazeroth, some suggestions concerning the nomenclature and possible sites of which will be found in articles under their respective names, the primary question, did the people visit Kadesh twice, or once only, demands to be considered.

We read in Num. x. 11, 12, that ☿ on the twentieth day of the second month of the second year . . . . the children of Israel took their journeys out of the wilderness of Sinai, and *the cloud rested in the wilderness of Paran.*" The latter statement is probably to be viewed as made by anticipation; as we find that, after quitting Kibroth-Hattaavah and Hazeroth, "the people pitched in the wilderness of Paran" (Num. xii. 16). Here the grand pause was made while the spies, "sent," it is again impressed upon us (xiii. 3), "from the wilderness of Paran," searched the land for "forty days," and returned "to Moses and to Aaron, and to all the congregation . . . . *unto the wilderness of Paran to Kadesh.*" This is the first mention of Kadesh in the narrative of the Wanderings (vv. 25, 26). It may here be observed that an inaccuracy occurs in the rendering of Moses' directions to the spies in the A. V. of xiii. 17.

---

[a] He speaks of certain stations as "placées entre le mont Sinaï et Cadès, espace qui ne comporte pas plus de onze journées selon l'affirmation bien positive du Deutéronome" (i. 1). He then proceeds to argue, "Ces dix-sept stations réunies aux trois que nous venons d'examiner, en forment vingt; il y a donc neuf stations . . . . dont on ne sait que faire." The statement quoted from Deuteronomy, whether genuine or an annotation that has crept into the text, merely states the distance as ordinarily known and travelled and need not indicate that the Israelites crossed it at that rate of progress.

"get you up by this way *southward*" (בַּנֶּגְבָּה), where "by *the South*," *i. e.* by the border lying in that direction from Palestine, is intended, as is further plain from ver. 22, "And they ascended by the south and came to Hebron," *i. e.* they went *northward*.[a] From considerations adduced under KADESH, it seems that Kadesh probably means firstly, a region of the desert spoken of as having a relation, sometimes with the wilderness of Paran, and sometimes with that of Zin (comp. vers. 21, 26); and secondly, a distinct city within that desert limit. Now all the conditions of the narrative of the departure and return of the spies, and of the consequent despondency, murmuring, and penal sentence of wandering, will be satisfied by supposing that the name "Kadesh" here means *the region* merely. It is observable, also, that Kadesh is not named as the place of departure, but only as that of return. From Paran is the start; but from Zin (both regions in the desert) the search commences. And this agrees with the political geography of the southern border, to which the wilderness of Zin is always reckoned as pertaining,[b] whereas that of Paran always lies outside the promised land. Natural features of elevation, depression, and slope,[c] are the only tokens to which we can reasonably trust in deciding where the Paran wilderness ends, and that of Zin begins. It has been proposed under KADESH to regard part of the 'Arabah, including all the low ground at the southern and southwestern extremity of the Dead Sea, as the wilderness of Zin. [ZIN.] Then the broad lower northeastern plateau, including both its slopes as described above, will be defined as the Paran wilderness proper. If we assume the higher superimposed plateau, described above, to bear the name of "Kadesh" as a desert district, and its southwestern mountain wall to be "the mountain of the Amorites," then the Paran wilderness, so far as synonymous with Kadesh, will mean most naturally the region where that mountain wall from *Jebel 'Ardif en-Nûkah* to *Jebel Mûkhrah*, and perhaps thence northward along the other side of the angle of the highest plateau, overhangs the lower terrace of the *Tîh*. Moses identifies the coming "to Kadesh Barnea"[d] with the coming to "the mountain of the Amorites" (Deut. i. 19, 20), whence the spies were also despatched (vv. 22, 23), which is said to have been from "Paran" in Num. xiii. 3. Suppose the spies' actual start to have been made from somewhere on the watershed of the two slopes of *et-Tîh*, the spies' best way then would have been by the *Wady el-Jerafeh* into and so up the 'Arabah: this would be beginning "from the wilderness of Zin," as is said in Num. xiii. 21. Then, most naturally, by his direction to them, "go up into *the mountain*" (Num. xiii. 17), which he represents as acted on in Deut. i. 24, "and they turned and went up into the mountain," he meant them to mount the higher plateau, supposed the region Kadesh. By their "turning" in order to do so, it may be inferred that their course was not direct to their object, as indeed has been supposed in taking them along the 'Arabah and again up its western side by the passes *el-Khusâr* and *es-Sâfâ* (Zephath).[e] By these passes they must have left Zin or the 'Arabah, there being no choice. During the forty days of their absence, we may suppose the host to have moved from the watershed into the Kadesh-Paran region, and not at this period of their wanderings to have touched the city Kadesh at all. This is quite consistent with, if it be not even confirmed by, the words of the murmurers in xiv. 2, 3, "Would God we had died in *this wilderness!* And wherefore hath the Lord brought us unto *this land;*" and throughout the denunciation which follows, evidently on the same spot, the words "the wilderness," and "this wilderness," often recur, but from first to last there is no mention of a "city."

Now, in Deut. i. 19, where these proceedings pass in review before Moses, in his words to the people, there is, strictly speaking, no need to mention Kadesh at all, for the people were all the time in the wilderness of *Paran*. Yet this last is so wide a term, reaching almost from the 'Arabah to near the Egyptian frontier, that Moses might naturally use some more precise designation of the quarter he meant. He accordingly marks it by the proximity of Kadesh. Thus, the spies' return to "the wilderness of Paran *to Kadesh*" means to that part of the lower plateau where it is adjacent to the higher, and probably the eastern side of it. The expression "from Kadesh-barnea even unto Gaza" is decisive of an eastern site for the former (Josh. x. 41).

Here, as is plain both from Num. xiv. 40–45 and from Deut. i. 41–44, followed the wayward attempt of the host to win their way, in spite of their sentence of prohibition, to the "hill" (Num. xiv. 40–45, Deut. i. 41–44) or "mountain" of the Amalekites and Canaanites, or Amorites, and their humiliating defeat. They were repulsed in trying to force the pass at Hormah (or Zephath, Judg. i. 17), and the region of that defeat is called "Seir," showing that the place was also known by its Horite name; and here perhaps the remnant of the Horites were allowed to dwell by the Edomites, to whose border this territory, in the message of Num. xx. 16, is ascribed. [KADESH.] Here, from the notice in Num. xiv. 25, that these "Amalekites and Canaanites dwelt *in the valley*," we may suppose that their dwelling was where they would find pasture for their flocks, in the *Wady el-Fikreh* and others tributary to *el-Jeib*, and that they took post

[a] The word for "southward" would be נֶגְבָּה, as found in Ex. xl. 24; Josh. xvii. 9, 10. The word נֶגֶב appears to mean the "dry" country, and hence to become the appellative for the region on the south of Judah and Simeon where springs were scarce; see *The Negeb* by Rev. M. Wilton, pref. viii.

[b] Num. xxxiv. 4; Josh. xv. 3.

[c] For some good remarks on the level of the desert and the slope between the south country, Dead Sea, and the 'Arabah, see Robinson, i. 587.

[d] For "Barnea," as perhaps a Horite proper name, see KADESH, note *b*.

[e] Mr. Wilton (*Negeb*, pp. 12, 198–202), following Rowlands (in Williams), makes Zephath *es-Sebata* on the *northern* side of the high broad plateau, supposed here to be the "mountain of the Amorites." On this view the Israelites must already have won that eminence from which it was clearly the intention of the Amorites to repel them; and must, when defeated, have been driven up hill from a position occupied in the plain below. The position *es-Sâfa* is on the S. side of the high ground, and has probably always been the pass by which to mount it. For all this, see Mr. Wilton's own map, or any one which shows both *es-Sebata* and *es-Sâfa*.

Digitized by Google

in the 'mountain" or "hill," as barring the way of the Israelites' advance. So the spies had gone by Moses' direction "this way, by the South (not 'southward,' as shown above), up into the mountain;" and this same way, "the way of the spies,'[a] through the passes of *el-Khûrâr* and *es-Sâfâ*, was the approach to the *city* Kadesh also.

Here, then, the penal portion of the wanderings commences, and the great bulk of it, comprising a period of nearly thirty-eight years, passes over between this defeat in Num. xiv., and the resumption of local notices in Num. xx., where again the names of "Zin" and "Kadesh" are the first that meet us.

The only events recorded during this period (and these are interspersed with sundry promulgations of the Ceremonial Law), are the execution of the offender who gathered sticks on the Sabbath (Num. xv. 32–36), the rebellion of Korah (xvi.), and, closely connected with it, the adjudgment of the preëminence to Aaron's house with their kindred tribe, solemnly confirmed by the judicial miracle of the rod that blossomed. This seems to have been followed by a more rigid separation between Levi and the other tribes, as regards the approach to the Tabernacle, than had been practically recognised before (xvii., xviii. 22; comp. xvi. 40).

We gather, then, from Deut. i. 46, that the greater part, perhaps the whole, of this period of nearly thirty-eight years, if so we may interpret the "many days" there spoken of, was passed in Kadesh, — the *region*, that is, not the *city;* in which, of course, the camp may have been shifted at convenience, under direction, any number of times. But Num. xx. 1 brings us to a new point of departure. The people have grown old, or rather again young, in their wanderings. Here, then, we are at "the desert of Zin, in the first month," with the "people abiding in Kadesh." By the sequel, "Miriam died *there*, and was buried *there*," a more precise definition of locality now seems intended; which is further confirmed by the subsequent message from the same place to the king of Edom, "Behold, we are in Kadesh, *a city* in the uttermost of thy border" (v. 16). This, then, must be supposed to coincide with the encampment, recorded as taking place "in the wilderness of Zin, which is Kadesh," registered in the itinerary (xxxiii. 36). We see then why, in that register of specific camping-spots, there was no necessity for any previous mention of "Kadesh;" because the earlier notice in the narrative, where that name occurs, introduces it not as an individual encampment, but only as a region, within which perpetual changes of encampment went on for the greater part of thirty-eight years. We also see that they came twice to Kadesh the region, if the city Kadesh lay in it, and once to Kadesh the *city;* but once only to Kadesh the region, if the city lay without it. We are not told how the Israelites came into possession of the city Kadesh, nor who were its previous occupants. The probability is that these last were a remnant of the Horites, who after their expulsion by Edom from Mount Seir [EDOM] may have here retained their last hold on the territory between Edom and the Canaanitish Amorites of "the South." Probably Israel took it by force of arms, which may have induced the attack of "Arad the Canaanite,"[b] who would then feel his border immediately threatened (Num. xxxiii. 40; comp. xxi. 1). This warlike exploit of Israel may, perhaps, be alluded to in Judges v. 4 as the occasion when Jehovah "went out of Seir" and "marched out of the field of Edom" to give his people victory. The attack of Arad, however, though with some slight success at first, only brought defeat upon himself and destruction upon his cities (xxi. 3).[c] We learn from xxxiii. 36 only that Israel marched without permanent halt from Ezion-geber upon Kadesh. This sudden activity after their long period of desultory and purposeless wandering may have alarmed King Arad. The itinerary takes here another stride from Kadesh to Mount Hor. There their being engaged with the burial of Aaron may have given Arad his fancied opportunity of assaulting the rear of their march, he descending from the north whilst they also were facing southwards. In direct connection with these events we come upon a singular passage in Deuteronomy (x. 6, 7), a scrap of narrative imbedded in Moses' recital of events at Horeb long previous.[d] This contains a short list of names of localities, on comparing which with the itinerary, we get some clew to the line of march from the region Kadesh to Ezion-geber southwards.

We find at the part of their route in which

---

[a] Our A. V. here seems to have viewed הָאֲתָרִים as if derived from תּוּר, "to spy." Gesen. renders it "regions," and the LXX. makes it a proper name, Ἀθαρείμ. It is not elsewhere found. Now the verb תּוּר occurs in the passage where the spies are sent forth, Num. xiii., xiv., which gives a presumption in favor of the A. V.

[b] More properly "the Canaanitish king of Arad."

[c] He "took some of" the Israelites "prisoners." It is possible the name Mosera, or plur. Moseroth, may recall this fact; the word מוֹסֵר (found only in the plur.) meaning "bonds" or "fetters." This would accord with the suggestion of the text that Aaron's burial gave Arad the opportunity for his raid; for Mosera must have been near Mount Hor, where that burial took place. It is possible that the destruction of these cities may not have really taken place till the entry into Canaan under Joshua (Josh. xii. 14; Judg. i. 17) and may be mentioned in Num. xxi. 2, 3, by anticipation only as a subsequent fulfillment of the vow recorded as then made. It is obvious to suggest that *Moseroth* is the Mosera of Deut. x. 6, and so Mr. Wilton (*The Negeb*, p. 28, etc.) has suggested, wishing to identify it with Mount Hor. But the received site for Mount Hor is the least doubtful of all in the Exodus. Josephus clearly identifies it as we do; and there is a strong improbability in a Jewish tradition fixing it in Edomitish or in Nabathæan territory, unless the testimony in its favor had been overpowering. Moseroth might perhaps be the hill called "Sin" (Zin?) mentioned by Josephus as that in which Miriam was buried (*Ant.* iv. 4, §§ 6, 7).

[d] A somewhat similar fragment of narrative, but relating to what perhaps took place during the time of the allocution to the people between the paragraphs of which it occurs, is found in Deut. iv. 41–43; and indeed the mention of Aaron's death, with the date and his age, and of the attack of Arad, both of which had been detailed before, is hardly less of a deviation from the dry enumeration of stations in the itinerary itself (Num. xxxiii. 38, 39). But it would be foreign to our present purpose to enter on the critical questions which these passages suggest. We assume their genuineness, and suppose them displaced.

Digitized by Google

Aaron's death took place, that stations named 'Beeroth of the children of Jaakan, Mosera (where Aaron died), Gudgodah, and Jotbath," were successively passed through; and from Num. xxxiii. 38, we find that "Aaron went up into Mount Hor . . . . and died there in the fortieth year . . . . in the first day of the fifth month." Assuming for Mount Hor the traditional site overhanging the 'Arabah, which they very soon after this quitted, Mosera must have been close to it, probably in the 'Arabah itself. Now the stations which in the itinerary come next before Ezion-geber, and which were passed in the strictly penal wandering which commenced from the region Kadesh, have names so closely similar that we cannot doubt we are here on the same ground. Their order is, however, slightly changed, standing in the two passages as follows: —

| Conjectural Site. | Num. xxxiii. 30–35. | Deut. x. 6, 7. |
|---|---|---|
| (a.) *'Ain Hasb*, N. W. in the 'Arabah. | (a.) (Hashmonah.) | |
| (1.) *Kusheibeh*, mouth of the *Wady Abu*, near the foot of Mount Hor. | (1.) Moseroth. | (1.) Beeroth of the children of Jaakan. |
| (2.) *'Ain Gûrûndel.* | (2.) Bene-Jaakan.[a] | (2.) Mosera. |
| (3.) *Wady el-Ghûdhâghidh.* | (3.) Hor-hagidgad. | (3.) Gudgodah. |
| (4.) Confluence of *Wady el-Adhbeh* with *el-Jerafeh.* | (4.) Jotbathah. | (4.) Jotbath.[b] |
| | (Ebronah.) | |
| | (Ezion-geber.) | |

Now in Num. xx. 14, 16, 22–29, the narrative conducts us from Kadesh the *city*, reached in or shortly before "the fortieth year," to Mount Hor, where Aaron died, *a portion of which route* is accordingly that given in Deut. x. 6, 7; whereas the parallel column from Num. xxxiii. gives substantially *the same route* as pursued in the early part of the penal wandering, when fulfilling the command given in the region Kadesh, "turn you, get you into the wilderness by the way of the Red Sea" (Num. xiv. 25; Deut. i. 40), which command we further learn from Deut. ii. 1 was strictly acted on, and which a march towards Ezion-geber would exactly fulfill.

These half-obliterated footsteps in the desert may seem to indicate a direction only in which Kadesh the city[c] lay. Widely different localities, from Petra eastward to *el-Khâlesah* on the northwest, and westward to near the *Jebel Hellak*, have been assigned by different writers. The best way is to acknowledge that our research has not yet grasped the materials for a decision, and to be content with some such attempt as that under Kadesh, to fix it approximately only, until more undoubted tokens are obtained. The portion of the arc of a circle with *es-Sâfa* for its centre, and a day's journey — about fifteen miles — for its radius, will not take in *el-Khâlesah*, nor Petra,[d] and the former name seems to be traceable, with a slight metathesis, much more probably in *Chesil*[e] than in Kadesh.[f] The highest plateau is marked with the ruins of Aboda, and on the inferior one, some miles S. W. of the defile of the *Wady el-Fikreh* stands a round conical hill of limestone, mixed with sand, named Madarah (Modura, or Modera), at a short day's journey from the southern end of the Dead Sea. Seetzen, who visited it, had had his curiosity raised by a Bedouin legend of a village having been destroyed by Allah and buried under that hill for the wickedness of its people; and that, as a further attestation, human skulls were found on the ground around it. This statement he resolved by visiting the spot into a simple natural phenomenon of some curious rounded stones, or pebbles, which abound in the neighborhood. He thought it a legend of Sodom; and it might, with equal likelihood, have been referred to the catastrophe of Korah (Seetzen *Reisen*, iii. 13), which, if our sites for Kadesh the region and Paran are correct, should have occurred in the neighborhood, were it not far more probable that the physical appearance of the round pebbles having once given rise to the story of the skulls, the legend was easily generated to account for them.

The mountains on the west of the 'Arabah must have been always poor in water, and form a dreary contrast to the rich springs of the eastern side in Mount Seir. From the cliff front of this last, Mount Hor stands out prominently (Robinson, ii. 174–180). It has been suggested [Hor Hagidgad] that the name Ha-gidgad, or Gudgodah, may possibly be retraced in the *Wady el-Ghûdhâghidh*, which has a confluence with the *Wady el-Jerafeh*. This latter runs into the 'Arabah on the west side. That point of confluence, as laid down in Kiepert's map (Robinson, *Bibl. Res.* i.), is about fifteen miles from the 'Arabah's nearest point, and about forty or forty-five from the top of Mount Hor. On the whole it seems likely enough that the name of this wady may really represent that of this station, although the latter may have lain nearer the 'Arabah than the wady now reaches, and this conjectural identification has been adopted above. Jotbath, or Jotbatha,[g] is described as "a land of rivers of waters" (Deut. x. 7); and may stand for any confluence of wadies in sufficient force to justify that character. It should certainly be in the southern portion of the 'Arabah, or a little to the west of the same.

The probabilities of the whole march from Sinai,

---

[a] See Jaakan and Bene Jaakan for the name. Jaakan was the grandson of Seir (1 Chr. i. 42; comp. Gen. xiv. 6, xxxvi. 27).

[b] Dr. Robinson, judging from his visit, thinks that these stations could not have lain to the S. of Mount Hor, as that region is too poor in water to contain any such place as Jotbath in Deut. x. 7, and corresponds rather to the description given in Num. xxi. 4–6 (ii. 178). He thinks that *'Ain et-Tuyibeh* is either Beeroth, Bene Jaakan, or Moseroth, and *Wady el-Ghûdhâghidh* Jotbath (*ibid.*).

[c] Laborde (*Comment.* on Num. xxxiii. 36) places Kadesh the city "près des sources d'Embasch au fond de Ouadi Djerafi" (*Wady el-Jerafeh*). Dr. Robinson thought *'Ain el-Weibeh* was Kadesh, the city, or, as he calls it, Kadesh Barnea (see Map, vol. i., end). Dr Stanley remarks that there is no cliff (סֶלַע) there. See his remarks quoted under Kadesh.

[d] Robinson puts *es-Sâfa* at about two days' journey from the foot of Mount Hor, ii. 180, 181.

[e] As suggested in Williams's *Holy City*, i. 464.

[f] The northern Kadesh, (x Kedesh, in Naphtali has the very same consonants in its modern Arabic name as in the Hebrew.

[g] A writer in the *Journal of Sac. Lit.* April, 1860

them, seem to stand as follows: They proceeded towards the N. E. to the *'Ain el-Hudherâh* (Hazeroth), and thence quitted the maritime region, striking directly northwards to *el-'Ain*, and thence by a route wholly unknown, perhaps a little to the E. of N. across the lower eastern spurs of the *et-Tîh* range, descending the upper course of the *Wady el-Jerafeh*, until the southeastern angle of the higher plateau confronted them at the *Jebel el-Mûkhrah*. Hence, after dispatching the spies, they moved perhaps into the 'Arabah, or along its western overhanging hills, to meet their return. Then followed the disastrous attempt at or near *es-Sûfa* (Zephath), and the penal wandering in the wilderness of Kadesh, with a track wholly undetermined, save in the last half dozen stations to Ezion-geber inclusively, as shown just above. They then marched on Kadesh the city, probably up the 'Arabah by these same stations, took it, and sent from there the message to Edom. The refusal with which it was met forced them to retrace the 'Arabah once more, and meanwhile Aaron died. Thus the same stations (Deut. x. 6, 7) were passed again, with the slight variation just noticed, probably caused by the command to resort to Mount Hor which that death occasioned.[a] Thence, after reaching 'Akabah, and turning northeastward, they passed by a nearly straight line towards the eastern border of Moab.

Of the stations in the list from Rithmah to Mithcah, both inclusive, nothing is known. The latter, with the few preceding it, probably belong to the wilderness of Kadesh; but no line can be assigned to the route beyond the indications of the situation of that wilderness given above. In the sequel to the burial of Aaron, and the refusal of Edom to permit Israel to "pass through his border"[b] (which refusal may perhaps have been received at Mount Hor (Moserah), though the message which it answered was sent from the city Kadesh), occurred the necessity, consequent upon this refusal, of the people's "compassing the land of Edom" (Num. xxi. 4), when they were much "discouraged because of the way,"[c] and where the consequent murmuring was rebuked by the visitation of the "fiery serpents" (v. 5, 6). There is near Elath a promontory known as the *Rûs Um Haye*, "the mother of serpents," which seem to abound in the region adjacent; and, if we may suppose this the scene of that judgment, the event would be thus connected with the line of march, rounding the southern border of Mount Seir, laid down in Deut. ii. 8, as being "through the way of the plain (i. e. the 'Arabah) from Elath and from Ezion-geber," whence "turning northward," having "compassed that mountain (Mount Seir) long enough," they "passed by the way of the wilderness of Moab" (v. 3, 8).

Some permanent encampment, perhaps represented by Zalmonah in Num. xxxiii. 41, 42, seems here to have taken place, to judge from the urgent expression of Moses to the people in Deut. ii. 13: "Now rise up, said I, and get you over the brook Zered," which lay further N. a little E., being probably the *Wady el-Ahsy* (Robinson, ii. 157). [ZERED.] The delay caused by the plague of serpents may be the probable account of this apparent urgency, which would on this view have taken place at Zalmonah; and as we have connected the scene of that plague with the neighborhood of Elath, so, if we suppose Zalmonah[d] to have lain in the *Wady Ithm*, which has its junction with the 'Arabah close to 'Akabah, the modern site of Elath, this will harmonize the various indications, and form a suitable point of departure for the last stage of the wandering, which ends at the brook Zered (v. 14). Dr. Stanley, who passed through 'Akabah, thus describes the spot in question (*S. & P.* pp. 84, 85): "'Akabah is a wretched village shrouded in a palm-grove at the north end of the gulf, gathered round a fortress built for the protection of the Mecca pilgrimage. . . . . This is the whole object of the present existence of 'Akabah, which stands on the site of the ancient Elath, — 'the Palm-Trees,' so called from the grove. Its situation, however, is very striking, looking down the beautiful gulf, with its jagged ranges on each side. On the west is the great black pass, down which the pilgrimage descends, and from which 'Akabah ('the Pass') derives its name; on the north opens the wide plain, or Desert Valley, wholly different in character from anything we have seen, still called, as it was in the days of Moses, 'the 'Arabah.' Down this came the Israelites on their return from Kadesh, and through a gap up the eastern hills they finally turned off to Moab. . . . . This is the

---

connects this name with טוֹב, "good," from the goodness of the water supply. This is not unlikely; but his view of the name יָטְבָתָה, as from the same root as the Arabic عَذْبَة, *'Adhbah*, is very doubtful, the ع (Heb. ע) being probably radical. However, if *el-'Adhbah* be, as he avers, a region of abundant water, the *place* may correspond with Jotbath, though the name do not. His map places it about 17 miles N. W. of the modern extremity of the Gulf of 'Akabah — *i. e.* on the western side of the 'Arabah. His general view of the route to and from Kadesh, and especially of the site of Sinai and Mount Hor, is inadmissible. See further towards the end of this article. Burckhardt's map gives another watery spot with palm-trees in the 'Arabah itself, not far from its southern end, which might also suit for Jotbath.

[a] Hengstenberg (*Authenticity of the Pent.* ii. 856) has another explanation of the deranged order of the stations enumerated just above, based on the supposition that in the two passages (Num. xxxiii. 30–35, Deut. x. 6, 7) the march proceeded in two opposite directions; but this would obviously require a reverse order of *all* the stations, and not the derangement of two merely. Von Raumer thought that the line of march threaded the 'Arabah thrice through, and, making allowance for the mistake of giving it each time a nearly rectilinear direction, he is not far wrong.

[b] Dr. Robinson thinks that by the "King's Highway" the *Wady Ghuweir*, opening a thoroughfare into the heart of the Edomitish territory was meant (ii. 157). Though the passage through Edom was refused, the burial of the most sacred person of a kindred people may have been allowed, especially if Mount Hor was already, as Dr. Stanley suggests, a local sanctuary of the region (*S. & P.* pp. 97, 98).

[c] The way up the 'Arabah was toilsome, and is so at this day. Dr. Robinson calls it "a still more frightful desert" than the Sinaitic (ii. 184). The pass at the head of the Gulf of 'Akabah towards *et-Tîh* "is famous for its difficulty, and for the destruction which it causes to animals of burden" (i. 175). Only two travellers, Laborde and Bertou, have accomplished (or recorded their accomplishment of) the entire length of the 'Arabah.

[d] Von Raumer identifies it with *Mâdn*, a few minutes to the E. of Petra.

Digitized by Google

*Wady Ithm*, which turns the eastern range of the Arabah. . . . . It is still one of the regular roads to Petra, and in ancient times seems to have been the main approach from Elath or 'Akabah. . . . . The only published account of it is that of Laborde. These mountains appear to be granite, till, as we advance northward, we reach the entrance of the *Wady Tubal*, where, for the first time, red sandstone appears in the mountains, rising, as in the *Wady el-'Ain*, architecture-wise, above gray granite."

Three stations, Punon,[a] Oboth, and Ije-Abarim, were passed between this locality and the brook or valley of Zered (Num. xxi. 10–12, comp. xxxiii. 43, 44), which last name does not occur in the Itinerary, as neither do those of "the brooks of Arnon," Beer, Mattanah, Nahaliel, and Bamoth, all named in Num. xxi. 14–20; but the interval between Ije-Abarim and Nebo, which last corresponds probably (see Deut. xxxiv. 1) with the Pisgah[b] of xxi. 20, is filled by two stations merely, named Dibon-gad and Almon-diblathaim, from whence we may infer that in these two only were permanent halts made. [DIBON-GAD; ALMON-DIBLATHAIM.] In this stage of their progress occurred the "digging" of the "well" by "the princes," the successive victories over Sihon and Og, and, lastly, the famous episodes of Balaam and Phinehas, and the final numbering of the people, followed by the chastisement of the Midianites (Num. xxi. 17, xxii.–xxv., xxxi. 1–12; comp. Deut. ii. 24–37, iii. 1–17).

One passage remains in which, although the event recorded belongs to the close of Moses' life, relating to his last words in the plain of Moab, and as such lies beyond the scope of this article, several names of places yet occur which are identical with some herein considered, and it remains to be seen in what sense those places are connected with the scene of that event. The passage in question is Deut. i. 1, where Moses is said to have spoken "on this side Jordan in the wilderness, in the plain over against the Red Sea, between Paran and Tophel, and Laban and Hazeroth and Dizahab."[c] The words "on this side" might here mislead, meaning, as shown by the LXX. rendering, πέραν, "across" or "beyond," *i. e.* on the E. side. This is a passage in which it is of little use to examine the question by the aid of maps, since the more accurate they are, the more probably will they tend to confuse our view of it. The words seem to forget that the Gulf of 'Akabah presents its *end* to the end of the 'Arabah ("plain"), and to assume that it presents the *length* of its coast, on which Dizahab (*Dahab*) lies. This length of coast is regarded, then, as opposite to the 'Arabah; and thus the 'Arabah, in which Moses spoke, is defined by "Paran and Tophel," lying on opposite edges of the Dead Sea, or rather of the whole depression in which it lies, which is in fact the 'Arabah continued northward. Paran here is perhaps the El Paran to which Chedorlaomer came in Gen. xiv. 6 [PARAN], and probably Tophel is the well-known *Tufileh* to the N. N. E. of Petra; and similarly the Red Sea, "over against" which it is spoken of as lying, is defined by Dizahab on its coast, and Hazeroth near the same. The introduction of "Laban" is less clear, but probably means, from its etymology, "the white," *i. e.* the chalk and limestone region, which in the mountain-range of *Tih*, comes into view from the Edomitish mountains (Stanley, *S. & P.* p. 87), and was probably named, from that point of view, by the paler contrast which it there offered to the rich and varied hues of the sandstones and granites of Mount Seir, which formed their own immediate foreground.

A writer in the *Journal of Sac. Lit.*, April, 1860, on *Sinai, Kadesh, and Mount Hor*, propounds an entirely original view of these sites, in conflict with every known tradition and hitherto accepted theory.[d] For instance, Josephus identifies Mount Hor with Petra and Kerek; Jerome and Kosmas point to *Serbâl* in the granitic mountain region as Sinai; but this writer sets aside Josephus' testimony as a wholly corrupt tradition, invented by the Rabbis in their prejudice against the Idumæans, in whose territory between Eleutheropolis, Petra, and Elath (see Jerome *on Obad.*), he asserts they all lay. [EDOMITES.] Kadesh

---

[a] Punon is spoken of by Jerome (Reland, p. 592) as "Quondam civitas principum Edom nunc viculus in deserto, ubi aerum metalla damnatorum supplicils effodiuntur inter civitatem Petram et Zoaram." Athanas. *Epist. ad Solit. Vitam Agentes*, speaks of the condemnation of a person to the mines of Phæno, where he would only live a few days. Winer says, Seetzen took *Kalaât Phenan* for Punon, referring to *Monatl. Corresp.* xvii. 137. Laborde (*Comment.* on Num. xxxiii. 42) thinks that the place named by Jerome and Athanasius cannot be Punon, which he says lay S. E. of Petra. He adds that Burckhardt and Von Raumer took *Tufileh* for Punon. He places Oboth "dans les décombres de Butaieh (*Bûtâhy*, Robinson), laissant ainsi Maan à droite."

[b] Dr. Stewart (*T. & K.* p 336) says, "The river Arnon empties itself into the Dead Sea, and between them rises the lofty *Gebel Atarous*, which is believed to be the Nebo or Pisgah of Scripture." He justifies this from its being the highest mountain on the Moab-Ish border, and from the hot spring Callirhoë being situated at its base, which seems to correspond with the Ashdoth ("springs" or "streams") of Pisgah of Deut. iv. 49. He adds that "Moses could have seen the end of Israel from that mountain." The Arnon is without doubt, the *Wady el-Mojeb*. Ar of Moab is Areopolis, Rabbath-Moab, now *Rabba*. [AR-MOAB and ARNON.]

[c] עֲרָבָה חַיַּרְדֵּן בַּמִּדְבָּר בָּעֲרָבָה מוֹל סוּף בֵּין פָּארָן וּבֵין תֹּפֶל וְלָבָן וַחֲצֵרֹת וְדִי זָהָב are the words of the Heb. text, from which the LXX. offers some divergencies, being as follows: πέραν τοῦ Ἰορδάνου ἐν τῇ ἐρήμῳ πρὸς ἀνομαῖς πλησίον τῆς ἐρυθρᾶς θαλάσσης ἀναμέσον Φαρὰν Τοφὰλ, καὶ Λοβὸν καὶ Ἀϋλὸν καὶ καταχρύσεα. The phrase יַם־סוּף, if "Red Sea," be, as the LXX. confirms, the true meaning, is here abridged into סוּף. The word עֲרָבָה was possibly differently read by the LXX. (query, עֶרֶב, as if "the evening" were = "the west," ἀνομαῖς), whilst Φαρὰν Τοφὰλ looks as though it were meant for one compound name; and the two last names are translated, Hazeroth being = "inclosures," and Di-zahab = "the golden." N. B. Hazeroth elsewhere is represented by Ἀσηρώθ (Num. xi. 35, xii. 16).

[d] Some incidental errors of this writer, though unimportant, may assist in forming an estimate of his work. Thus he identifies Petra with Bozrah, the former being the capital of the later Nabathæans, the latter that of the Edom of the prophetic period and locally distinct. Again he says, "Of all the people in the universe, the race most detested by the Jews were

Digitized by Google

the city, and perhaps Kadesh Barnea, did so lie, and possibly Elusa, now *el-Khâlesah*, may retain a trace of "Kadesh," several types of which nomenclature are to be found in the region lying thence southward [KADESH]; but *el-Khâlesah* lies too far N. and W. to be the Kadesh Barnea to which Israel came "by the way of the spies," and which is clearly in far closer connection with Zephath (*es-Sâfa*) than *el-Khâlesah* could be. On the contrary, there seems great reason for thinking that, had so well-known and historical a place as Elusa been the spot of any great event in the history of the Exodus, the tradition would probably have been traceable in some form or other, whereas there is not a trace of any. Kadesh, again, lay "in the uttermost of the border" of Edom. Now, although that border may not have lain solely E. of the 'Arabah, it is utterly inconsistent with known facts to extend it to Elusa; for then the enemies encountered in Hormah would have been Edomites, whereas they were Amalekites, Canaanites, and Amorites; and Israel, in forcing the pass, would have been doing what we know they entirely abstained from — attempting violence to the territory of Edom. The "designs" which this writer attributes to the "Rabbis," as regards the period up to Josephus' time, are gratuitous imputations; nor does he cite any authorities for this or any other statement. Nor was there any such feeling against the Idumæans as he supposes.[a] They annexed part of the territory of Judah and Simeon during the Captivity, and were subsequently, by the warlike Maccabees, annexed themselves, received circumcision and the Law, by which an Edomite might, "in the third generation," enter the congregation of Israel (Deut. xxiii. 8), so that by the New Testament period they must have been fully recognized. The Jews proper, indeed, still speak *of* them as "foreigners," but *to* them as having the place of kinsmen, a common share in Jerusalem, and care of its sanctity as their "metropolis;" and Josephus expressly testifies that they kept the Jewish feasts there (*Ant.* xvii. 10, § 2; comp. *B. J.* iv. 4, §§ 4, 5). The zealots and the party of order both appealed to their patriotism, somewhat as in our Rebellion both parties appealed to the Scots.

It remains to notice the natural history of the wilderness which we have been considering. A number of the animals of the Sinaitic region have been mentioned. [SINAI.] The domestic cattle of the Bedouins will of course be found, but camels more numerously in the drier tracts of *et-Tîh*. Schubert (*Reisen*, ii. 354) speaks of Sinai as not being frequented by any of the larger beasts of prey, nor even by jackals. The lion has become very rare, but is not absolutely unknown in the region (*Negeb*, pp. 46, 47). Foxes and hyænas, Ritter (xiv. 333) says, are rare, but Mr. Tyrwhitt mentions hyænas as common in the *Wady Mughara*; and Ritter (*ibid.*), on the authority of Burckhardt, ascribes to the region a creature which appears to be a cross between a leopard and a wolf, both of which are rare in the Peninsula, but by which probably a hyæna is to be understood. A leopard-skin was obtained by Burckhardt on Sinai, and a fine leopard is stated by Mr. Tyrwhitt to have been seen by some of his party in their ascent of *Um Shaumer* in 1862. Schubert continues his list in the *hyrax Syriacus*, the ibex,[b] seen at *Tîfîleh* in flocks of forty or fifty together, and a pair of whose horns, seen by Burckhardt (*Asch.* pp. 405, 406) at *Kerek*, measured 3½ feet in length, the webr,[c] the shrew-mouse, and a creature which he calls the "spring-mans"[d] (*Mus jaculus* or jerboa?), also a *canis familicus*, or desert-fox, and a lizard known as the *Agama Sinaitica*, which may possibly be identical with one of those described below. Hares and jerboas are found in *Wady Feirân*. Schubert quotes (*ibid.* note) Rüppell as having found specimens of *helix* and of *coccinella* in this wilderness; for the former comp. Forskâl, *Icones Rerum Natur.* Tab. xvi. Schubert saw a fine eagle in the same region, besides catching specimens of thrush, with stonechat and other song-birds, and speaks of the warbling of the birds as being audible from the *mimosa* bush. Clouds of birds of passage were visible in the *Wady Murrah*. Near the same tract of wilderness Dr. Stanley saw "the sky darkened by the flights of innumerable birds, which proved to be large red-legged cranes, 3 feet in height, with black and white wings, measuring 7 feet from tip to tip" (*S. & P.* p. 89). At *Tîfileh* crows abound. On *Serbâl* Dr. Stewart saw the red-legged partridge (*Tent and Khan*, p. 117; comp. Burckhardt, *Syria*, p. 534); and the bird "katta," in some parts of the Peninsula, comes in such numbers that boys sometimes knock over three or four at a single throw of a stick.[e] Hare-

---

the Idumæans." That race has generally been thought, on good authority, to be the Samaritans.

[a] Some feeling of rivalry there no doubt was; but this writer vastly exaggerates it, in supposing that the Jewish Rabbis purposely obliterated genuine traditions, which referred these sites to Idumæan territory — that of a circumcised and vanquished race who had accepted the place of "proselytes of the covenant" — in order to transfer them to what was then the territory of the purely Gentile and often hostile Nabathæans. Surely a transfer the other way would have been far more likely. Above all, what reason is there for thinking that the Rabbis of the period busied themselves with such points at all? Zeal for sites is the growth of a later age. There is no proof that they ever cared enough for Mount Hor to falsify for the sake of it. As regards *Jebel Odjme* being Sinai, the writer seems to have formed a false conception of *Odjme*, which he draws as a prominent mountain boss in the range of *Tîh*, taking that range for Horeb, and the prominent mountain for Sinai. The best maps show that it had no such predominance. They give it (*e. g.* Kiepert's) as a distinct but less clearly defined and apparently lower range, falling back into the northern plateau in a N. W. direction from about the most southerly point of the *Tîh*; which, from all the statements regarding it, is a low, horizontal range of limestone, with no such prominent central point whatever. Russegger describes particularly the mounting by the wall-like partition of "Edjme" to the plateau of Edjme itself. "The height," he says, "which we had here to mount is in no wise considerable," and adds, "we had now arrived at the plateau" (*Reisen*, iii. 60, 61).

[b] Mr. Tyrwhitt commends the flesh of the ibex as superior to any of the deer tribe that he had ever eaten.

[c] Or Uabr, وبر, "fili similis sine cauda hoc biphagus monticola caro mollis edulis" (Forskâl, *Descript. Anim.* v.).

[d] Seetzen (iii. 41) saw holes in the earth, made, he thought, by mice, in going from Hebron to Madara.

[e] Probably these birds have furnished a story to Pliny, of their settling by night on the yards of ships in such vast numbers as to sink them (*H. N.* x.).

Digitized by Google

selquist, who saw it here and in Egypt, calls it a partridge, smaller than ours, and of a grayish color (p. 204). Ritter (xiv. 333) adds linnets (?), ducks, prairie-birds, heath-cocks, larks, a specimen of finch, besides another small bird, probably red-breast or chaffinch, the varieties of falcon known as the *brachydactylus* and the *niger*, and, of course, on the coast, sea-swallows, and mews. Flocks of blue rock pigeons were repeatedly seen by Mr. Tyrwhitt.

Seetzen, going from Hebron to Madara, makes mention of the following animals, whose names were mentioned by his guides, though he does not say that any of them were seen by himself: wolf, porcupine, wild-cat, ounce, mole, wild ass, and three not easily to be identified, the *Sellak*, dog-shaped,[a] the *Anuseh*, which devours the gazelle, and the *Ikkajib*, said to be small and in shape like a hedgehog. Seetzen's list in this locality also includes certain reptiles, of which such as can be identified are explained in the notes: *el-Melledahr*, *Umm el-Saleiman*, *el-Lidscha* or *Leja*,[b] *el-Harriba* or *Hirbà*,[c] *Dscherrár* or *Jarráreh*,[d] *el-Dáb*, otherwise *Dáde*,[e] *el-Hanne* or *Hanan*,[f] *el-Affed*; and among birds the partridge, duck, stork, eagle,[g] vulture (*er-Rukham*), crow (*el-Grâb*), kite (*Hidâiyeh*),[h] and an unknown bird called by him *Um-Sulêt*. His guides told him of ostriches as seen near *Bteiâha* on the way from Hebron to Sinai, and he saw a nightingale, but it seems at no great distance to the south of Hebron. The same writer also mentions the edible lizard, *el-Dsob*, as frequently found in most parts of the wilderness, and his third volume has an appendix on zoölogy, particularly describing, and often with illustrations, many reptiles and serpents of Egypt and Arabia, without, however, pointing out such as are peculiar to the wilderness. Among these are thirteen varieties of lizard, twenty-one of serpent, and seven of frog, besides fifteen of Nile-fish. Laborde speaks of serpents, scorpions, and black-scaled lizards, which perforate the sand, as found on the eastern border of Edom near *Tâfileh* (*Comm. on Num.* xxxiii. 42). The MS. of Mr. Tyrwhitt speaks of starting "a large sand-colored lizard, about 3 feet long, exactly like a crocodile, with the same bandy look about his fore-legs, the elbows turning out enormously." He is described as covered not only "in scales, but in a regular armour, which rattled quite loudly as he ran." He "got up before the dromedary, and vanished into a hole among some *retem*." This occurred at the head of the *Wady Mukatteb*. Hasselquist (p. 220) gives a *Lacerta Scincus*, "the Scinc," as found in Arabia Petræa, near the Red Sea, as well as in Upper Egypt, which he says is much used by the inhabitants of the East as an aphrodisiac, the flesh of the animal being given in powder, and broth made of the recent flesh. He also mentions the edible locust, *Gryllus Arabicus*, which appears to be common in the wilderness, as in other parts of Arabia, giving an account of the preparation of it in food (pp. 230–233). Burckhardt names a cape not far from 'Akabah, *Râs Um Haye*, from the number of serpents which abound there, and accordingly applied to this region the description of the "fiery serpents"[i] in Num. xxi. 4–9. Schubert (ii. 362) remarked the first serpents in going from Suez and Sinai to Petra, near *el-Hudherâh*; he describes them as speckled. Burckhardt (*Syria*, pp. 499, 502) saw tracks of serpents, two inches thick, in the sand. According to Rüppell, serpents elsewhere in the Peninsula are rare. He names two poisonous kinds, *Cerastes* and *Scytalis* (Ritter, xiv. 329). The scorpion has given his name to the "Ascent of Scorpions," which was part of the boundary of Judah on the side of the southern desert. *Wady es-Zuweirah* in that region swarmed with them; and De Saulcy says, "you cannot turn over a single pebble in the *Nedjd* (a branch wady) without finding one under it" (De Saulcy, i. 529, quoted in *Negeb*, p. 51).

The reader who is curious about the fish, molluscs,[k] etc., of the Gulf of Suez should consult Schubert (ii. 263, *note*, 298, *note*, and for the plants of the same coast, 294, *note*). For a description of the coral-banks of the Red Sea, see Ritter (xiv. 476 f.), who remarks that these formations rise from the coast-edge always in longitudinal extension parallel to its line, bespeaking a fundamental connection with the upheaval of the whole stretch of shore from S. E. to N. W. A fish which Seetzen calls the *Alân* may be mentioned as furnishing to the Bedouins the fish-skin sandals of which they are fond. Ritter (xiv. 327) thinks that fish may have contributed materially to the sustenance of the

---

[a] With this compare the mention by Burckhardt (*ap.* Ritter, xiv. 333) of a great wild-dog spoken of by the Bedouins, and thought by Ritter to be perhaps the same as the *Derbun* of the Medina desert.

[b] لَجَاء, *rana* (Freytag).

[c] حِرْبَا, *chamæleon* (Fr.). Mr. Tyrwhitt speaks of one of these as seen by him at the entrance of *Wady es-Sheykh* on the route from Suez to Sinai by *Birbâir el-Khadim*, which appeared green in shade and yellow in sunshine.

[d] جَرَارَة, *scorpionum parvorum species, scorpio flavus* (Fr.).

[e] ضَبّ, *Lacerta Ægypti* (Fr.); and دُوَيْد, "a worm;" but this difference of signification seems to show that they cannot represent one and the same animal, as Seetzen's text would seem to intend.

[f] حَنَش, *scarabæus*.

[g] عُقَاب, *aquila*.

[h] حِدَايَة, *milvus*.

[i] Mr. Wilton (*Negeb*, p. 51) interprets "flying," applied (Is. xxx. 6) to the serpent of the South, as "making great springs;" and "fiery" as either denoting a sensation caused by the bite, or else "red-colored;" since such are said to have been found by several travellers whom he cites in the region between the Dead and Red Seas.

[k] A number of these are delineated in Forskâl's *Icones Rerum Nat.* among the later plates: see also his *Vermes*, iv., *Coralia Maris Rubri* (*ibid.*). Also in Russegger's atlas some specimens of the same classes are engraved. Schubert (ii. 370) remarks that most of the fish found in the Gulf of 'Akabah belong to the tribes known as *Acanthurus* and *Chætodon* (Hasselquist, p. 223.) He saw a large turtle asleep and basking on the shore near the castle of 'Akabah, which he ineffectually tried to capture.

Digitized by Google

Israelites in the desert (Num. xi. 22), as they are now dried and salted for sale in Cairo or at the Convent of St. Catherine. In a brook near the foot of *Serbâl*, Schubert saw some varieties of *elaphrus*, *dyticus*, *colymbetes*, *gyrinus*, and other water insects (*Reise*, ii. 302, *note*).

As regards the vegetation of the desert, the most frequently found trees are the date-palm (*Phœnix dactylifera*), the desert acacia, and the tamarisk. The palms are almost always dwarf, as described in *S. & P.* p. 20, but sometimes the "dôm" palm is seen, as on the shore of the Gulf of 'Akabah (Schubert, ii. 370; comp. Robinson, i. 161). Hasselquist, speaking of the date-palm's powers of sustenance, says that some of the poorer families in Upper Egypt live on nothing else, the very stones being ground into a provender for the dromedary. This tree is often found in tufts of a dozen or more together, the dead and living boughs interlacing overhead, the dead and living roots intertwining below, and thus forming a canopy in the desert. The date-palms in *Wady Tûr* are said to be all numbered and registered. The acacia is the *Mimosa Nilotica*, and this forms the most common vegetation of the wilderness. Its Arabic name is *es-Seyâl* (سَيَال), and it is generally supposed to have furnished the "Shittim wood" for the Tabernacle (Forskâl, *Descr. Plant.* Cent. vi. No. 90; Celsii *Hierob.* i. 498 f.; Ritter, xiv. 335 f.). [SHITTAH-TREE.] It is armed with fearful thorns, which sometimes tear the packages on the camels' backs, and of course would severely lacerate man or beast. The gum arabic is gathered from this tree, on which account it is also called the *Acacia gummifera*. Other tamarisks, beside the *mannifera*, mentioned above, are found in the desert. Grass is comparatively rare, but its quantity varies with the season. Robinson, on finding some in *Wady Sumghy*, N. E. from Sinai, near the Gulf of 'Akabah, remarks that it was the first his party had seen since leaving the Nile. The terebinth (*Pistuchia terebinthus*, Arab. *Bâtm*)[a] is well known in the wadies about Beer-sheba, but in the actual wilderness it hardly occurs. For a full description of it see Robinson, ii. 222, 223, and *notes*, also i. 208; and comp. Cels. *Hierobot.* i. 34. The "broom," of the variety known as *retem* (Heb. and Arab.), rendered in the A. V. by "juniper," is a genuine desert plant; it is described (Robinson, i. 203, and *note*) as the largest and most conspicuous shrub therein, having very bitter roots, and yielding a quantity of excellent charcoal, which is the staple, if one may so say, of the desert. The following are mentioned by Schubert (ii. 352, 354)[b] as found within the limits of the wilderness: Mœpilus Aaronia, Colutea haleppica, Atraphaxis spinosa, Lycium arabicum, Zygophyllum album, Nitraria tridentata, Peganum harmala, Ononis alba, Cytisus uniflorus, and a Cynomorium, a highly interesting variety, compared by Schubert to a well known Maltese one. To these he adds in a note (*ibid.*): Dactylis memphitica, Gagea reticulata, Rumex vesicarius, Artemisia Judaica, Leymera discoidea, Santolina fragrantissima, Seriola, Lindenbergia Sinaica, Lamium amplexicaule,[c] Stachys affinis, Sisymbrium iris, Anchusa Milleri, Asperugo procumbens, Omphalodes intermedia, Dæmia cordata, Reseda canescens, and pruinosa, Reaumuria vermiculata, Fumaria parviflora, Hypecoum pendulum, Cleome trinervia, *Ærua* tomentosa, Malva Honbeney, Fagonia,[c] Zygophyllum coccineum,[d] Astragalus Fresenii, Genista monosperma.[e] Schubert (ii. 357) also mentions, as found near *Abu Suweir*, N. E. of Sinai, a kind of sage, and of what is probably goat's-rue, also (note, *ibid.*) a fine variety of Astragalus, together with Linaria, Lotus, Cynosurus echinatus, Bromus tectorum, and (p. 365) two varieties of Pergularia, the procera and the tomentosa.

In the S. W. region of the Dead Sea grows the singular tree of the apples of Sodom, the *Asclepias gigantea*[f] of botanists. Dr. Robinson, who gives a full description of it (i. 522, 523), says it might be taken for a gigantic species of the milk-weed or silkweed found in the northern regions of the U. S. He condemns the notion of Hasselquist (pp. 285, 287, 288) as an error, that the fruit of the *Solanum melongena* when punctured by a tenthredo, resulted in the Sodom apple, retaining the skin uninjured, but wholly changed to dust within (*ibid.* p. 524). It is the *'Osher* of the Arabs. Robinson also mentions willows, hollyhocks, and hawthorns in the Sinaitic region, from the first of which the *Râs Sâfsâfeh*, "willow-head," takes its name (i. 106, 109; Stanley, *S. & P.* p. 17). He saw hyssop (*jádeh*) in abundance, and thyme (*za'ter*), and in the *Wady Feirân* the colocynth, the *kirdhy* or *kirdee*,[g] a green thorny plant with a yellow flower; and in or near the 'Arabah, the juniper (*'arar*), the oleander (*difleh*), and another shrub like it, the *zukndm*, as also the plant *el-Ghûdah*, resembling the *retem*, but larger (i. 83, 110; ii. 119, and *note*, 124, 126). He also describes the *Ghurkhûd*, which has been suggested as possibly the "tree" cast by Moses into the waters of Marah (Ex. xv. 25). It grows in saline regions of intense heat, bearing a small red berry, very juicy, and slightly acidulous. Being constantly found amongst brackish pools, the "bane and antidote" would thus, on the above supposition, be side by side, but as the fruit ripens in June, it could not have been ready for its sup-

[a] Seetzen met with it (iii. 47) at about 1 hour to the W. of *Wady el-'Ain*, between Hebron and Sinai; but the mention of small cornfields in the same neighborhood shows that the spot has the character of an oasis.

[b] Schubert's floral catalogue is unusually rich. He travelled with an especial view to the natural history of the regions visited. His tracks extend from Cairo through Suez, Ayûn Mûsa, and Tôr, by way of Serbâl, to Sinai, thence to Mount Hor and Petra; thence by Madara and Hebron to Jerusalem; as well as in the northern region of Palestine and Syria. His book should be consulted by all students of this branch of the subject.

[c] Both these are found in cultivated grounds only.

[d] Shown in Forskâl's *Icones Rer. Natur.* tab. xi., where several kinds of *zygophyllum* are delineated.

[e] Probably the same as the *retem* mentioned above.

[f] Many varieties of *Asclepias*, especially the *Cornuta*, are given by Forskâl (*Descr. Plant.* Cent. ii. 49-51). A writer in the *English Cyclopæd. of Nat. Hist.* supports the view of Hasselquist, which Dr. Robinson condemns, calling this tree a *Solanum*, and ascribing (b) a tenthredo the phenomenon which occurs in its fruit. [See VINE OF SODOM.]

[g] "قرضي, arboris rarae nomen in deserto crescentis cujus flores flaviores sunt quam plantæ (*wars*, *memecylon tinctorium*) appellatæ" (Freytag). For this and most of the notes on the Arabic names of plants and animals, the present writer is indebted to Mr. E. S. Poole.

Digitized by Google

posed use in the early days of the Exodus (Robinson, i. 66-69). He adds in a note that Forskål gives it (*Flor. Æg. Arab.* p. lxvi.), as the *Pegnum retusum*, but that it is more correctly the *Nitraria tridentata* of Desfontaines (*Flora Atlant.* i. 372). The mountain *Um Shaumer* takes its name from the fennel found upon it, as perhaps may *Serbâl* from the *ser*, myrrh, which "creeps over its ledges up to the very summit," — a plant noticed by Dr. Stanley as "thickly covering" with its "shrubs" the "natural basin" which surmounts *ed-Deir*, and as seen in the *Wady Seydl*, N. E. from Sinai (*S. & P.* pp. 17, 78-80). Dr. Stanley also notices the wild thorn, from which the *Wady Sidri* takes its name, the fig-tree which entitles another wady the "Father of Fig-trees" (*Abû Hamad*), and in the *Wady Seydl*, "a yellow flowering shrub called *abeithiran*, and a blue thorny plant called *silleh*." Again, northeastwards in *Wady el-'Ain* were seen "rushes, the large-leaved plant called *esher*," and further down the "*kasif*, or caper plant, springing from the clefts." Seetzen's *mesembryanthemum*, described above, page 3521, note *b*, is noticed by Forskål, who adds that no herb is more common in sandy desert localities than the second, the *nodiflorum*, called in Arabic the *ghasûl* (غاسول). Hasselquist speaks of a *mesemb*, which he calls the "fig-marigold," as found in the ruins of Alexandria; its agreeable saltish-aromatic flavor, and its use by the Egyptians in salads, accord closely with Seetzen's description. Seetzen gives also Arabic names of two plants, one called *ickedum* by the guides, described as of the size of heath with blue flowers; the other named *Subbk-el-dlich*, found to the north of *Wady el-'Ain*, which had a club-shaped sappy root, ranged a foot high above the earth, having scales instead of leaves, and covered, when he saw it, with large, golden flowers clinging close together, till it seemed like a little ninepin (Kegel). Somewhat to the south of this he observed the "rose of Jericho" growing in the dreariest and most desolate solitude, and which appears always to be dead (*Reisen*, iii. 46, 54). In the region about Madara he also found what he calls "Christ's-thorn," Arab. *el-Aussitch*, and an anonymous plant with leaves broader than a tulip, perhaps the *esher* mentioned above. The following list of plants between Hebron and Madara is also given by Seetzen, having probably been written down by him from hearing them pronounced by his Bedouin guides, and some accordingly it has not been possible to identify with any known names, — *el-Khärrdy*, mentioned in the previous column, note *e*; *el-Bureid*, a hyacinth, whose small pear-shaped bulb is eaten raw by the Bedouins, *el-Arta*,[a] *el-Dscherra*, *el-Sphara* (or *Zafrà*?),[b] *el-Erbidn*, *el-Gdime*, *Schekera* (or *Shakooreeyeh*),[c] *el-Meindn*, described as a small shrub, *el-Hmim*, *el-Schilluch*, possibly the same as that called *silleh*, as above, by Dr. Stanley, *el-Khâlk* (or *Khal*),[d] *el-Handegûk* (or *Hamalakook*),[e] *el-Luklemma*, *el-Hadidd*, *Kali*, *Addm el-Hammdr* (or *'Addn el-Himdr*).[f] Some more rare plants, precious on account of their products, are the following: *Balsamum Aaronis*, or *nux behen*, called by the Arabs *Festuck el-Ban*, from which an oil is extracted having no perfume of its own, but scented at pleasure with jessamine or other odoriferous leaf, etc., to make a choice unguent. It is found in Mount Sinai and Upper Egypt: *Cucurbita Lagenaria*, Arab. *Charrah*, found in Egypt and the deserts of Arabia, wherever the mountains are covered with rich soil. The tree producing the famous balsam called "of Mecca," is found many days' journey from that place in Arabia Petræa. Linnæus, after some hesitation, decided that it was a species of *Amyris*. The *olibanum* frankincense is mentioned by Hasselquist as a product of the desert; but the producing tree appears to be the same as that which yields the gum arabic, namely, the *Mimosa nilotica*, mentioned above. The same writer mentions the *Schœnanthus officinalis*, "camel's hay," as growing plentifully in the deserts of both the Arabias, and regards it as undoubtedly one of the precious, aromatic, and sweet plants, which the Queen of Sheba gave to Solomon (Hasselquist, pp. 255, 288, 296, 297; comp. pp. 250, 251, 300). Fuller details on the facts of natural history of the region will be found in the writers referred to, and some additional authorities may be found in Sprengel, *Historia Rei Herb.* vol. ii.

Besides these, the cultivation of the ground by the Sinaitic monks has enriched their domain with the choicest fruit-trees, and with a variety of other trees. The produce of the former is famed in the markets of Cairo. The cypresses of the Convent are visible far away among the mountains, and there is a single conspicuous one near the "cave of Elias" on *Jebel Mûsa*. Besides, they have the silver and the common poplar, with other trees, for timber or ornament. The apricot, apple, pear, quince, almond, walnut, pomegranate, olive, vine, citron, orange, cornelian cherry, and two fruits named in the Arabic *schellûk* and *bargûk*, have been successfully naturalized there (Robinson, i. 94; Seetzen, iii. 70, &c.; Hasselquist, p. 425; *S. & P.* p. 52). Dr. Stanley views these as mostly introduced from Europe; Hasselquist on the contrary views them as being the originals whence the finest varieties we have in Europe were first brought. Certainly nearly all the above trees are common enough in the gardens of Palestine and Damascus.

[The present writer wishes to acknowledge the kindness of the Rev. R. S. Tyrwhitt of Oxford, in allowing him a sight of a valuable MS. read by that traveller before the Alpine Club. It is expected to be published in the Journal of that body,

---

[a] "أرطى, nomen arboris crescentis in arenis, flore salligneo, fructu sisiphino amaro, radicibus ramulisque rubris, cujus recentiore fructu vescuntur cameli, cortice autem coria concinnantur" (Freyt.). It grows to a man's height, with a flower like the *Salix Ægyptiaca*, but smaller, with a fruit like the jujube, and the root red.

[b] ذفراء, *ruta sylvestris* (Freyt.).

[c] شكورية *cichorium; intybus* (Forskål, *Flor Ægypt.* ap. Freyt.). Succory or endive. Contrilla (MS. notes).

[d] خال, nomen plantæ regionis Nedjid peculiaris cui est flos; caulis exiguus; Laser; Ruta (Freyt.).

[e] حَنْدَقُوق, Lotus-plant (Freyt.). Distinct, it should seem, from the lote-tree, or nibk (a species of the bird's-foot trefoil?). Melilot (MS. notes).

but was not in print when this paper went to press. The references to Mr. Tyrwhitt in the preceding article, either relate to that MS., or to his own remarks upon the article itself, which he inspected whilst in the proof sheet.] H. H.

* The desert of *et-Tih*, which is so thoroughly treated in this article, is being traversed at the present time (1870), under the auspices of the Palestine Exploration Fund, by Mr. E. H. Palmer, who has had large experience as an eastern traveller, and is familiar with the Arabic language; aided by Mr. C. F. Tyrwhitt Drake, of the University of Cambridge, who is making observations as a naturalist. Two letters have been published from Mr. Palmer (*Quart. Statement of the Pal. Expl. Fund*, No. v. pp. 254–259), dated at *Nutchl*, the point from which his exploration of the interior region of the *Tih* commences. His investigations, if completed, promise to throw light on difficult, obscure, and unknown points, relating to this deeply interesting tract. Compare addition to SINAI, Amer. ed. S. W.

* An addition to the present article, giving the important results of the exploration referred to, has been expected from the Rev. F. W. Holland, member of the Royal Geog. Society. Should it be received in season, it will appear at the end of this volume. A.

* WILL is often used in the A. V. of the N. T. in such a way that the force of the original is lost or obscured to the common reader, who takes it as merely the sign of the future tense, though it really represents θέλω or βούλομαι, "to desire," "to will," "to purpose." Thus "Herod *will kill* thee" (Luke xiii. 31) means "Herod *desires* (or *designs*) *to kill* thee" (θέλει σε ἀποκτεῖναι). "The lusts of your father ye *will do*" (θέλετε ποιεῖν, John viii. 44) — better "ye *love* to do" (Alford), or "ye *are ready* to do" (Noyes). "I *will* put you in remembrance" (Jude 5, βούλομαι, etc.), should be "I *wish* to remind you" (Noyes). For other examples, see Matt. v. 40, xi. 14, 27, xvi. 24, 25, xx. 26, 27; Mark viii. 34, 35, x. 43, 44; Luke ix. 23, 24, x. 22; John v. 40, vii. 17, ix. 27; Rom. xiii. 3; 1 Cor. xiv. 35; 1 Tim. v. 11; 2 Tim. iii. 12; Rev. xi. 5. A.

WILLOWS (עֲרָבִים, *'arâbim*, only in pl.: ἰτέα; (with נַחַל) ἄγνου κλάδους ἐκ χειμάῤῥου, κλῶνες ἄγνου: *salices*), undoubtedly the correct rendering of the above Hebrew term, as is proved by the old versions and the kindred Arabic *gharab* (غرب). Willows are mentioned in Lev. xxiii. 40, among the trees whose branches were to be used in the construction of booths at the Feast of Tabernacles; in Job xl. 22, as a tree which gave shade to Behemoth ("the hippopotamus"); in Is. xliv. 4, where it is said that Israel's offspring should spring up "as willows by the water-courses;" in the psalm (cxxxvii. 2) which so beautifully represents Israel's sorrow during the time of the Captivity in Babylon, — "we hanged our harps upon the willows in the midst thereof." With respect to the tree upon which the captive Israelites hung their harps, there can be no doubt that the weeping-willow (*Salix Babylonica*) is intended. This tree grows abundantly on the banks of the Euphrates, in other parts of Asia as in Palestine (Strand's *Flora Palæst.* No. 556), and also in North Africa. Bochart has endeavored to show (*Phaleg*, i. cap. xiii.) that country is spoken of, in Is. xv. 7, as "the Valley of Willows." This, however, is very doubtful. Sprengel (*Hist. Rei Herb.* i. 18, 270) seems to restrict the *'ârâb* to the *Salix Babylonica;* but there can scarcely be a doubt that the term is generic, and includes other species of the large family of *Salices*, which is probably well represented in Palestine and the Bible lands, such as the *Salix alba*, *S. viminalis* (osier), *S. Ægyptiaca*, which latter plant Sprengel identifies with the *safsâf* (صفصاف) of Abul'fadli, cited by Celsius (*Hierob.* ii. 108), which word is probably the same as the *Tsaphtsâphâh* (צַפְצָפָה) of Ezekiel (xvii. 5), a name in Arabic for a "willow." Burckhardt (*Syria*, p. 644) mentions a fountain called *'Ain Safsâf* (عين صفصاف), "the Willow Fountain" (Catafago, *Arabic Dictionary*, p. 1051). Rauwolf (quoted in *Bibl. Bot.* p. 274) thus speaks of the *safsâf* "These trees are of various sizes; the stems, branches, and twigs are long, thin, soft, and of a pale yellow, and have some resemblance to those of the birch; the leaves are like those of the common willow; on the boughs grow here and there shoots of a span long, as on the wild fig-trees of Cyprus, and these put forth in spring tender downy blossoms like those of the poplar; the blossoms are pale colored, and of a delicious fragrance; the natives pull them in great quantities, and distill from them a cordial which is much esteemed." Hasselquist (*Trav.* p. 449), under the name of *calaf*, apparently speaks of the same tree; and Forskål (*Descript. Plant.* p. lxxvi.) identifies it with the *Salix Ægyptiaca*, while he considers the *safsâf* to be the *S. Babylonica*. From these discrepancies it seems that the Arabic words are used indefinitely for willows of different kinds.

"The children of Israel," says Lady Callcott (*Scripture Herbal*, p. 533), "still present willows annually in their synagogues, bound up with palm and myrtle, and accompanied with a citron." In this country, as is well known, sprigs of willow-blossoms, under the name of "palms," are often carried in the hand, or borne on some part of the dress, by men and boys on Palm Sunday.

Before the Babylonish Captivity the willow was always associated with feelings of joyful prosperity. "It is remarkable," as Mr. Johns (*The Forest Trees of Britain*, ii. 240) truly says, "for having been in different ages emblematical of two directly opposite feelings, at one time being associated with the palm, at another with the cypress." After the Captivity, however, this tree became the emblem of sorrow, and is frequently thus alluded to in the poetry of our own country; and "there can be no doubt," as Mr. Johns continues, "that the dedication of the tree to sorrow is to be traced to the pathetic passage in the Psalms."

Various uses were no doubt made of willows by the ancient Hebrews, although there does not appear to be any definite allusion to them. The Egyptians used "flat baskets of wickerwork, similar to those made in Cairo at the present day" (Wilkinson, *Anc. Egypt.* i. 43). Herodotus (i. 194) speaks of boats at Babylon whose framework was of willow; such coracle-shaped boats are represented in the Nineveh sculptures (see Rawlinson's *Herodotus*, vol. i. p. 268) W. H.

## WILLOWS, THE BROOK OF THE

Digitized by Google

נַחַל הָעֲרָבִים: ἡ φάραγξ Ἀραβας: *torrens salicum*). A wady mentioned by Isaiah (xv. 7) in his dirge over Moab. His language implies that it was one of the boundaries of the country — probably, as Gesenius (*Jesaia*, i. 532) observes, the southern one. It is possibly identical with a wady mentioned by Amos (vi. 14) as the then recognized southern limit of the northern kingdom [a] (Fürst, *Handwb.*; Ewald, *Propheten*). This latter appears in the A. V. as "the river of the wilderness" (נַחַל הָעֲרָבָה: ὁ χειμαρρος τῶν δυσμῶν: *torrens deserti*). Widely as they differ in the A. V., it will be observed that the names are all but identical in the original, the only difference being that it is plural in Isaiah and singular in Amos. In the latter it is *ha-Arabah*, the same name which is elsewhere almost exclusively used for the Valley of the Jordan, the *Ghôr* of modern Arabs. If the two are regarded as identical, and the latter as the accurate form of the name, then it is probable that the *Wady el-Aksy* is intended, which breaks down through the southern part of the mountains of Moab into the so-called *Ghôr es-Safieh*, at the lower end of the lake, and appears (though our information as to that locality is very scanty) to form a natural barrier between the districts of *Kerak* and *Jebal* (Burckhardt, *Syria*, Aug. 7). This is not improbably also the brook ZERED (*nachal-Zered*) of the earlier history.

Should, however, the *Nachal ha-Arabim* be rendered "the Willow-torrent," — which has the support of Gesenius (*Jesaia*) and Pusey (*Comm. on Amos*, vi. 14), — then it is worthy of remark that the name *Wady Sufsâf*, "Willow Wady," is still attached to a part of the main branch of the ravine which descends from *Kerak* to the north end of the peninsula of the Dead Sea (Irby, May 9). Either of these positions would agree with the requirements of either passage.

The Targum Pseudojonathan translates the name Zered by "osiers," or "baskets."

The Rev. Mr. Wilton, in his work on *The Negeb, or South Country of Scripture*, endeavors to identify the *Nachal ha-Arabah* of Amos with the *Wady el-Jeib*, which forms the main drain by which the waters of the present Wady Arabah (the great tract between *Jebel Sherah* and the mountains of *et-Tih*) are discharged into the *Ghôr es-Safieh* at the southern end of the Dead Sea. (This important wady was first described by Dr. Robinson, and an account of it will be found in this work under the head of ARABAH, vol. i. p. 135 *b*.) This is certainly ingenious, but cannot be accepted as more than a mere conjecture, without a single consideration in its favor beyond the magnitude of the *Wady el-Jeib*, and the consequent probability that it would be mentioned by the Prophet.[b]

Over this name Jerome takes a singular flight in his Commentary on Is. xv. 7, connecting it with the *Orebim* (A. V. "ravens") who fed Elijah during his seclusion: "Pro salicibus in Hebræo legimus *Arabim* quod potest et Arabes intelligi et legi Orbim; id est villa in finibus eorum sita cujus a plerisque accolæ in Monte Oreb Eliæ præbuisse alimenta dicuntur. . . . ." The whole passage is a curious mixture of topographical confusion and what would now be denounced as rationalism.

G.

**WILLS.** The subject of testamentary disposition is of course intimately connected with that of inheritance, and little need be added here to what will be found above. [HEIR, vol. ii. p. 1034 f.] Under a system of close inheritance like that of the Jews, the scope for bequest in respect of land was limited by the right of redemption and general reentry in the Jubilee year. [JUBILEE; VOWS.] But the Law does not forbid bequests by will of such limited interest in land as was consistent with those rights. The case of houses in walled towns was different, and there can be no doubt that they must, in fact, have frequently been bequeathed by will (Lev. xxv. 30). Two instances are recorded in the O. T. under the Law, of testamentary disposition: (1) effected in the case of Ahithophel (2 Sam. xvii. 23); (2) recommended in the case of Hezekiah (2 K. xx. 1; Is. xxxviii. 1); and it may be remarked in both, that the word "set [c] in order," marg. "give charge concerning," agrees with the Arabic word "command," which also means "make a will" (Michaelis, *Law of Moses*, art. 80, vol. i. p. 430, ed. Smith). Various directions concerning wills will be found in the Mishna, which imply disposition of land (*Baba Bathr.* viii. 6, 7).

H. W. P.

**WIMPLE** (מִטְפַּחַת). An old English word for hood or veil, representing the Hebrew *mitpachath* in Is. iii. 22. The same Hebrew word is translated "veil" in Ruth iii. 15, but it signifies rather a kind of shawl or mantle (Schroeder, *De Vestitu Mulier. Hebr.* c. 16). [DRESS, i. 622 *a*.]

W. L. B.

**WINDOW** (חַלּוֹן; Chal. כְּוָא: θυρίς). The window of an oriental house consists generally of an aperture (as the word *challôn* implies) closed in with lattice-work, named in Hebrew by the terms *arubbâh* [d] (Eccl. xii. 3, A. V. "window;" Hos. xiii. 3, A. V. "chimney"), *chărakkim* [e] (Cant. ii. 9), and *eshnâb* [f] (Judg. v. 28; Prov. vii. 6, A. V. "casement"), the two former signifying the interlaced work of the lattice, and the third the coolness produced by the free current of air through it. Glass has been introduced into Egypt in modern times as a protection against the cold of winter, but lattice-work is still the usual, and with the

---

[a] Amos is speaking of the northern kingdom only, not of the whole nation, which excludes the interpretation of the LXX., *i. e.*, probably the *Wady el-Arish*, and also (if it were not precluded by other reasons) that of Gesenius, the Kidron.

[b] It is surely incautious (to say the least) to speak of a mere conjecture, such as this, in terms as positive and unhesitating as if it were a certain and indisputable identification — "Amos is the only sacred writer who mentions the *Wady el-Jeib*; which he defines as the southern limit of Palestine . . . . The minute accuracy of the Prophet in speaking of it as the 'nachal of the Arabah'" (*Negeb*, etc., pp. 84, 85). It has not even the support that it was in the Prophet's native district. Amos was no "prophet of the Negeb." He belonged to the pasture-grounds of Tekoa, not ten miles from Jerusalem, and all his work seems to have lain in Bethel and the northern kingdom. There is not one tittle of evidence that he ever set foot in the Negeb, or knew anything of it. Such statements as these are calculated only to damage and retard the too-faltering progress of Scripture topography.

[c] צִוָּה: ἐντέλλομαι: *dispono*. In Rabb., a will. (Ges. p. 1155).

[d] אֲרֻבָּד. [e] חֲרַכִּים. [f] אֶשְׁנָב.

Digitized by Google

poor the only contrivance for closing the window (Lane's *Mod. Eg.* i. 29). When the lattice-work was open, there appears to have been nothing in early times to prevent a person from falling through the aperture (Acts xx. 9). The windows generally look into the inner court of the house, but in every house one or more look into the street, and hence it is possible for a person to observe the approach of another without being himself observed (Judg. v. 28; 2 Sam. vi. 16; Prov. vii. 6; Cant. ii. 9). In Egypt these outer windows generally project over the doorway (Lane, i. 27; Carne's *Letters*, i. 94). When houses abut on the town wall it is not unusual for them to have projecting windows surmounting the wall and looking into the country as represented in Conybeare and Howson's *St. Paul*, i. 124. Through such a window the spies escaped from Jericho (Josh. ii. 15) and St Paul from Damascus[a] (2 Cor. xi. 33). W. L. B.

**WINDS** (רוּחַ). That the Hebrews recognized the existence of four prevailing winds as issuing, broadly speaking, from the four cardinal points, north, south, east, and west, may be inferred from their custom of using the expression "four winds" as equivalent to the "four quarters" of the hemisphere (Ez. xxxvii. 9; Dan. viii. 8; Zech. ii. 6; Matt. xxiv. 31). The correspondence of the two ideas is expressly stated in Jer. xlix. 36. The north wind, or, as it was usually called "the north,"[b] was naturally the coldest of the four (Ecclus. xliii. 20), and its presence is hence invoked as favorable to vegetation in Cant. iv. 16. It is further described in Prov. xxv. 23, as bringing (A. V. "driveth away" in text; "bringeth forth" in marg.) rain; in this case we must understand the northwest wind, which may bring rain, but was certainly not regarded as decidedly rainy. The difficulty connected with this passage has led to the proposal of a wholly different sense for the term *tzâphôn*, namely *hidden place*. The northwest wind prevails from the autumnal equinox to the beginning of November, and the north wind from June to the equinox (*vide* Raumer's *Palästt.* p. 79). The east wind[c] crosses the sandy wastes of Arabia Deserta before reaching Palestine, and was hence termed "the wind of the wilderness" (Job i. 19; Jer. xiii. 24). It is remarkably dry and penetrating, and has all the effects of the *sirocco* on vegetation (Ex. xvii. 10, xix. 12; Hos. xiii. 15; Jon. iv. 8). It also blows with violence, and is hence supposed to be used generally for any violent wind (Job xxvii. 21, xxxviii. 24; Ps. xlviii. 7; Is. xxvii. 8; Ez. xxvii. 26). It is probably in this sense that it is used in Ex. xiv. 21, though the east, or at all events the northeast wind would be the one adapted to effect the phenomenon described, namely, the partition of the waters towards the north and south, so that they stood as a wall on the right hand and on the left (Robinson, *Bibl. Res.* i. 57). In this as in many other passages, the LXX. gives the "south" wind (νότος), as the equivalent for the Greek *kâdîm*. Nor is this wholly incorrect, for in Egypt, where the LXX. was composed, the south wind has the same characteristics that the east has in Palestine. The Greek translators appear to have felt the difficulty of rendering *kâdîm* in Gen. xli. 6, 23, 27, because the *parching* effects of the east wind, with which the inhabitants of Palestine are familiar, are not attributable to that wind in Egypt, but either to the south wind, called in that country the *khamaseen*, or to that known as the *samoom*, which comes from the southeast or south-southeast (Lane's *Mod. Eg.* i. 22, 23). It is certainly possible that in Lower Egypt the east wind may be more parching than elsewhere in that country, but there is no more difficulty in assigning to the term *kâdîm* the secondary sense of *parching*, in this passage, than that of *violent* in the others before quoted. As such at all events the LXX. treated the term both here and in several other passages, where it is rendered *kausôn* (καύσων, lit. the *burner*). In James i. 11, the A. V. erroneously understands this expression of the burning heat of the sun. In Palestine the east wind prevails from February to June (*vide* Raumer, p. 79). The south wind,[d] which traverses the Arabian peninsula before reaching Palestine, must necessarily be extremely hot (Job xxxvii. 17; Luke xii. 55); but the rarity of the notices leads to the inference that it seldom blew from that quarter (Ps. lxxviii. 26; Cant. iv. 16; Ecclus. xliii. 16): and even when it does blow, it does not carry the *samoom* into Palestine itself,[e] although Robinson experienced the effects of this scourge not far south of Beer-sheba (*Res.* i. 196). In Egypt the south wind (*khamaseen*) prevails in the spring, a portion of which in the months of April and May is termed *el-khamaseen* from that circumstance (Lane, i. 22). The west and southwest winds reach Palestine loaded with moisture gathered from the Mediterranean (Robinson, i. 429), "and are hence expressively termed by the Arabs fathers of the rain" (*vide* Raumer, p. 79). The little cloud "like a man's hand" that rose out of the west, was recognized by Elijah as a presage of the coming downfall (1 K. xviii. 44), and the same token is adduced by our Lord as one of the ordinary signs of the weather (Luke xii. 54). Westerly winds prevail in Palestine from November to February.

In addition to the four regular winds, we have notice in the Bible of the local squalls (λαῖλαψ; Mark iv. 37; Luke viii. 23) to which the Sea of Gennesareth was liable in consequence of its proximity to high ground, and which were sufficiently violent to endanger boats (Matt. viii. 24; John vi. 18). The gales which occasionally visit Palestine are noticed under the head of WHIRLWIND. In the narrative of St. Paul's voyage we meet with the Greek term *lips* (λίψ) to describe the southwest wind; the Latin *Corus* or *Caurus* (χῶρος), the northwest wind (Acts xxvii. 12); and εὐροκλύδων (a term of uncertain origin, perhaps a corruption of εὐραυίλων, which appears in some MSS.

---

[a] A few steps to the left of *Bab-es-Shurkeh*, one of the eastern gates of Damascus, are two or three windows in the external face of the wall, said to open into houses on the inside of the city. If Saul was let down through such a window (which belongs equally to the house and the wall) the interchange of the two expressions becomes still more natural. The Apostle escaped "through the wall" (as stated in Acts), and (as stated in the Epistle to the Corinthians) he escaped at the same time "through a window through the wall." H.

[b] צָפוֹן. [c] קָדִים. [d] דָּרוֹם; תֵּימָן.

[e] The term *zilâphâh* (זְלָעָפָה) in Ps. xi. 6 (A. V. "horrible") has been occasionally understood as referring to the *samoom* (Olshausen, *in loc.*; Gesen. *Thes.* p. 418); but it may equally well be rendered "a vindictive" or "avenging" (Hengstenberg, *in loc.*).

Digitized by Google

[namely, Vat. Sin. and Alex.]), a wind of a very violent character (τυφωνικός) coming from E. N. E. (Acts xxvii. 14; Conyb. and Hows. *St. Paul*, ii. 402). [EUROCLYDON.]

The metaphorical allusions to the winds are very numerous; the east wind, in particular, was regarded as the symbol of nothingness (Job xv. 2; Hos. xii. 1), and of the wasting destruction of war (Jer. xviii. 17), and, still more, of the effects of Divine vengeance (Is. xxvii. 8), in which sense, however, general references to violent wind are also employed (Ps. ciii. 16; Is. lxiv. 6; Jer. iv. 11). Wind is further used as an image of speed (Ps. civ. 4, "He maketh his angels winds;" Heb. i. 7), and of transitoriness (Job vii. 7; Ps. lxxviii. 39). Lastly, the wind is frequently adduced as a witness of the Creator's power (Job xxviii. 25; Ps. cxxxv. 7; Eccl. xi. 5; Jer. x. 13; Prov. xxx. 4; Am. iv. 13), and as representing the operations of the Holy Spirit (John iii. 8; Acts ii. 2), whose name (πνεῦμα) represents a gentle wind. W. L. B.

**WINE.** The manufacture of wine is carried back in the Bible to the age of Noah (Gen. ix. 20, 21), to whom the discovery of the process is apparently, though not explicitly, attributed. The natural history and culture of the vine is described under a separate head. [VINE.] The only other plant whose fruit is noticed as having been converted into wine was the pomegranate (Cant. viii. 2). In Palestine the vintage takes place in September, and is celebrated with great rejoicings (Robinson, *Bibl. Res.* i. 431, ii. 81). The ripe fruit was gathered in baskets (Jer. vi. 9), as represented in Egyptian paintings (Wilkinson, i. 41–45), and was carried to the wine-press. It was then placed in the upper one of the two vats or receptacles of which the wine-press was formed [WINE-PRESS], and was subjected to the process of "treading," which has prevailed in all ages in Oriental and South-European countries (Neh. xiii. 15; Job xxiv. 11; Is. xvi. 10; Jer. xxv. 30, xlviii. 33; Am. ix. 13; Rev. xix. 15). A certain amount of juice exuded from the ripe fruit from its own pressure before the treading commenced. This appears to have been kept separate from the rest of the juice, and to have formed the *gleukos* or "sweet wine" noticed in Acts ii. 13. The first drops of juice that reached the lower vat were termed the *demi*, or "tear," and formed the first-fruits of the vintage (ἀπαρχὰς ληνοῦ, LXX.) which were to be presented to Jehovah (Ex. xxii. 29). The "treading" was effected by one or more men, according to the size of the vat, and, if the Jews adopted the same arrangements as the Egyptians, the treaders were assisted in the operation by ropes fixed to the roof of the wine-press, as represented in Wilkinson's *Anc. Eg.* i. 46. They encouraged one another by shouts and cries (Is. xvi. 9, 10; Jer. xxv. 30, xlviii. 33). Their legs and garments were dyed red with the juice (Gen. xlix. 11; Is. lxiii. 2, 3). The expressed juice escaped by an aperture into the lower vat, or was at once collected in vessels. A hand-press was occasionally used in Egypt (Wilkinson, i. 45), but we have no notice of such an instrument in the Bible. As to the subsequent treatment of the wine, we have but little information. Sometimes it was preserved in its unfermented state, and drunk as must, but more generally it was bottled off after fermentation, and, if it were designed to be kept for some time, a certain amount of lees was added to give it body (Is. xxv. 6). The wine consequently required to be "refined" or strained previously to being brought to table (Is. xxv. 6).

Egyptian Wine-press, from Wilkinson.

The produce of the wine-press was described in the Hebrew language by a variety of terms, indicative either of the quality or of the use of the liquid. These terms have of late years been subjected to a rigorous examination with a view to show that Scripture disapproves, or, at all events, does not speak with approval, of the use of fermented liquor. In order to establish this position it has been found necessary, in all cases where the substance is coupled with terms of commendation, to explain them as meaning either unfermented wine or fruit, and to restrict the notices of fermented wine to passages of a condemnatory character. We question whether the critics who have adopted these views have not driven their arguments beyond their fair conclusions. It may at once be conceded that the Hebrew terms translated "wine" refer occasionally to an unfermented liquor: but inasmuch as there are frequent allusions to intoxication in the Bible, it is clear that fermented liquors were also in common use. It may also be conceded that the Bible occasionally speaks in terms of strong condemnation of the effects of wine; but it is an open question whether in these cases the condemnation is not rather directed against intoxication and excess, than against the substance which is the occasion of the excess. The term of chief importance in connection with this subject is *tîrôsh*, which is undoubtedly spoken of with approval, inasmuch as it is frequently classed with *dâgân* and *shemen*, in the triplet "corn, wine, and oil," as the special gifts of Providence.[a] This has been made the subject of a special discussion in a pamphlet entitled *Tirush lo Yayin* by Dr Lees, the object being to prove that it means not wine but fruit. An examination of the Hebrew terms is therefore unavoidable, but we desire to carry it out simply as a matter of Biblical criticism, and without reference to the topic which has called forth the discussion.

[a] The word translated "oil" when "wine and oil" or "corn, wine, and oil" are spoken of in connection is not *shemen* (שֶׁמֶן), but *yitshâr* (יִצְהָר), which, according to Gesenius, "seems to differ from *shemen* as *tîrôsh* from *yayin*." *Shemen* is never associated with *tîrôsh*. A.

Digitized by Google

The most general term for wine is *yayin*,[a] which is undoubtedly connected with the Greek *οἶνος*, the Latin *vinum*, and our "wine." It has hitherto been the current opinion that the Indo-European languages borrowed the term from the Hebrews. The reverse, however, appears to be the case (Renan, *Lang. Sém.* i. 207): the word belongs to the Indo-European languages, and may be referred either to the root *wé*, "to weave," whence come *viere*, *vimen*, *vitis*, *vitta* (Pott, *Etym. Forsch.* i. 120, 230), or to the root *wan*, "to love" (Kuhn, *Zeitschr. f. vergl. Sprachf.* i. 191, 192). The word being a borrowed one, no conclusion can be drawn from etymological considerations as to its use in the Hebrew language. *Tîrôsh*[b] is referred to the root *yârash*, "to get possession of," and is applied, according to Gesenius (*Thes.* p. 633), to wine on account of its inebriating qualities, whereby it *gets possession of* the brain; but, according to Bythner, as quoted by Lees (*Tirosh*, p. 52), to the vine as being a *possession* (κατ' ἐξοχήν) in the eyes of the Hebrews. Neither of these explanations is wholly satisfactory, but the second is less so than the first, inasmuch as it would be difficult to prove that the Hebrews attached such pre-eminent value to the vine as to place it on a par with landed property, which is designated by the cognate terms *yerushshâh* and *môrâshâh*. Nor do we see that any valuable conclusion could be drawn from this latter derivation; for, assuming its correctness, the question would still arise whether it was on account of the natural or the manufactured product that such store was set on the vine. *'Âsis*[c] is derived from a word signifying "to tread," and therefore refers to the method by which the juice was expressed from the fruit. It would very properly refer to *new* wine as being recently trodden out, but not necessarily to unfermented wine. It occurs but five times in the Bible (Cant. viii. 2; Is. xlix. 26; Joel i. 5, iii. 18; Am. ix. 13). *Sôbe*[d] is derived from a root signifying to "soak" or "drink to excess." The cognate verb and participle are constantly used in the latter sense (Deut. xxi. 20; Prov. xxiii. 20, 21; Is. lvi. 12; Nah. i. 10). The connection between *sôbe* and the Latin *sapa*, applied to a decoction of must (Kitto's *Cycl.* s. v. *Wine*), appears doubtful: the latter was regarded as a true Latin word by Pliny (xiv. 11). *Sôbe* occurs but thrice (Is. i 22; Hos. iv. 18; Nah. i. 10). *Chemer*[e] (Deut. xxxii. 14), in the Chaldee *chamar* (Ezr. vi. 9, vii. 22) and *chamrâ* (Dan. v. 1 ff.), conveys the notion of *foaming* or *ebullition*, and may equally well apply to the process of fermentation or to the frothing of liquid freshly poured out, in which latter case it might be used of an unfermented liquid. *Mesech*[f] (Ps. lxxv. 8), *mezeg*[g] (Cant. vii. 2), and *mimsâc*[h] (Prov. xxiii. 30; Is. lxv. 11), are connected etymologically with *misceo* and "mix," and imply a mixture of wine with some other substance: no conclusion can be drawn from the word itself as to the quality of the wine, whether fermented or unfermented, or as to the nature of the substance introduced, whether spices or water. We may further notice *shêcâr*,[i] a generic term applied to all fermented liquors except wine [DRINK, STRONG]; *chômetz*,[k] a weak sour wine, ordinarily termed vinegar [VINEGAR]; *'ashîshâh*,[l] rendered "flagon of wine" in the A. V. (2 Sam. xvi. 1; 1 Chr. xvi. 3; Cant. ii. 5; Hos. iii. 1), but really meaning a cake of pressed raisins; and *shêmârim*,[m] properly meaning the "lees" or dregs of wine, but in Is. xxv. 6 transferred to wine that had been kept on the lees for the purpose of increasing its body. In the New Testament we meet with the following terms: *oinos*,[n] answering to *yayin* as the general designation of wine; *gleukos*,[o] properly *sweet* wine (Acts ii. 13); *sikera*,[p] a Grecized form of the Hebrew *shêcâr*; and *oxos*,[q] vinegar. In Rev. xiv. 10 we meet with a singular expression,[r] literally meaning *mixed unmixed*, evidently referring to the custom of mingling wine: the two terms cannot be used together in their literal sense, and hence the former has been explained as meaning "poured out" (De Wette *in l. c.*).

From the terms themselves we pass on to an examination of such passages as seem to elucidate their meaning. Both *yayin* and *tîrôsh* are occasionally connected with expressions that would apply properly to a fruit; the former, for instance, with verbs significant of *gathering* (Jer. xl. 10, 12), and *growing* (Ps. civ. 14, 15); the latter with *gathering* (Is. lxii. 9, A. V. "brought it together"), *treading* (Mic. vi. 15), and *withering* (Is. xxiv. 7; Joel i 10). So again the former is used in Num. vi. 4 to define the particular kind of tree whose products were forbidden to the Nazarite, namely, the "pendulous shoot of the vine;" and the latter in Judg. ix. 13, to denote the product of the vine. It should be observed, however, that in most, if not all, the passages where these and similar expressions occur, there is something to denote that the fruit is regarded not simply as fruit, but as the raw material out of which wine is manufactured. Thus, for instance, in Ps. civ. 15 and Judg. ix. 13 the *cheering* effects of the product are noticed, and that these are more suitable to the idea of wine than of fruit seems self-evident: in one passage indeed the A. V. connects the expression "make cheerful" with bread (Zech. ix. 17), but this is a mere mistranslation, the true sense of the expression there used being to *nourish* or *make to grow*. So, again, the *treading* of the grape in Mic. vi. 15 is in itself conclusive as to the pregnant sense in which the term *tîrôsh* is used, even if it were not subsequently implied that the effect of the treading was in the ordinary course of things to produce the *yayin* which was to be drunk. In Is. lxii. 9 the object of the *gathering* is clearly conveyed by the notice of *drinking*. In Is. xxiv. 7 the *tîrôsh*, which withers, is paralleled with *yayin* in the two following verses. And lastly, in Is. lxv. 8 the nature of the *tîrôsh*, which is said to be found in the cluster of the grapes, is not obscurely indicated by the subsequent eulogium, "a blessing is in it." That the terms "vine" and "wine" should be thus interchanged in poetical language calls for no explanation. We can no more infer from such instances that the Hebrew terms mean *grapes as fruit*, than we could infer the same of the Latin *vinum* because in some two or three passages (Plaut. *Trin.* ii. 4, 125; Varr. *de L. L.* iv. 17; Cato, *R. R.*

a. 147) the term is transferred to the grape out of which wine is made.

The question whether either of the above terms ordinarily signified a solid substance would be at once settled by a reference to the manner in which they were consumed. With regard to *yayin* we are not aware of a single passage which couples it with the act of *eating*.[a] With regard to *tir.sh* the case is somewhat different, inasmuch as that term generally follows "corn," in the triplet "corn, wine, and oil," and hence the term applied to the consumption of corn is carried on, in accordance with the grammatical figure *zeugma*, to the other members of the clause, as in Deut. xii. 17. In the only passage where the act of consuming *tirósh* alone is noticed (Is. lxii. 8, 9), the verb is *shiithâh*,[b] which constantly indicates the act of *drinking* (*e. g.* Gen. ix. 21, xxiv. 22; Ex. vii. 21; Ruth ii. 9), and is the general term combined with *kaal* in the joint act of "eating and drinking" (*e. g.* 1 Sam. xxx. 16; Job i. 4; Eccl. ii. 24). We can find no confirmation for the sense of *sucking* assigned to the term by Dr. Lees (*Tirosh*, p. 61): the passage quoted in support of that sense (Ps. lxxv. 8) implies at all events a kind of sucking allied to drinking rather than to eating, if indeed the sense of drinking be not the more correct rendering of the term. An argument has been drawn against the usual sense assigned to *tirósh*, from the circumstance that it is generally connected with "corn," and therefore implies an edible rather than a drinkable substance. The very opposite conclusion may, however, be drawn from this circumstance; for it may be reasonably urged that in any enumeration of the materials needed for man's support, "meat and drink" would be specified, rather than several kinds of the former and none of the latter.

There are, moreover, passages which seem to imply the actual manufacture of *tirósh* by the same process by which wine was ordinarily made. For, not to insist on the probability that the "bringing together," noticed in Is. lxii. 9, would not appropriately apply to the collecting of the fruit in the wine-vat, we have notice of the "treading" in connection with *tirósh* in Mic. vi. 15, and again of the "overflowing" and the "bursting out" of the *tirósh* in the vessels or lower vat (*yekeb*; ὑπολήνιον), which received the must from the proper press (Prov. iii. 10; Joel ii. 24).

Lastly, we have intimations of the effect produced by an excessive use of *yayin* and *tirósh*. To the former are attributed the "darkly flashing eye" (Gen. xlix. 12; A. V. "red," but see Gesen. *Thes.* Append. p. 89), the unbridled tongue (Prov. xx. 1; Is. xxviii. 7); the excitement of the spirit (Prov. xxxi. 6; Is. v. 11; Zech. ix. 15, x. 7), the enchained affections of its votaries (Hos. iv. 11), the perverted judgment (Prov. xxxi. 5; Is. xxviii. 7), the indecent exposure (Hab. ii. 15, 16), and the sickness resulting from the *heat* (*chemâh*, A. V. "bottles") of wine (Hos. vii. 5). The allusions to the effects of *tirósh* are confined to a single passage, but this a most decisive one, namely, Hos. iv. 11, "Whoredom and wine (*yayin*), and new wine (*tirósh*) take away the heart," where *tirósh* appears as the climax of engrossing influence, in immediate connection with *yayin*.

The impression produced on the mind by a general review of the above notices is, that both *yayin* and *tirósh* in their ordinary and popular acceptation referred to fermented, intoxicating wine. In the condemnatory passages no exception is made in favor of any other kind of liquid passing under the same name but not invested with the same dangerous qualities. Nor again in these passages is there any decisive condemnation of the substance itself, which would enforce the conclusion that elsewhere an unfermented liquid must be understood. The condemnation must be understood of *excessive use* in any case: for even where this is not expressed, it is implied: and therefore the instances of wine being drunk without any reproof of the act, may with as great a probability imply the moderate use of an intoxicating beverage, as the use of an unintoxicating one.

The notices of fermentation are not very decisive. A certain amount of fermentation is implied in the distension of the leather bottles when new wine was placed in them, and which was liable to burst old bottles. [BOTTLE.] It has been suggested that the object of placing the wine in bottles was to prevent fermentation, but that in "the case of old bottles fermentation might ensue from their being impregnated with the fermenting substance" (*Tirosh*, p. 65). This is not inconsistent with the statement in Matt. ix. 17, but it detracts from the spirit of the comparison which implies the presence of a strong, expansive, penetrating principle. It is, however, inconsistent with Job xxxii. 19, where the distension is described as occurring even in *new* bottles. It is very likely that new wine was preserved in the state of must by placing it in jars or bottles, and then burying it in the earth. But we should be inclined to understand the passages above quoted as referring to wine drawn off before the fermentation was complete, either for immediate use, or for the purpose of forming it into sweet wine after the manner described by the Geoponic writers (vii. 19) [*Dict. of Ant.* "Vinum"]. The presence of the gas-bubble, or as the Hebrews termed it, "the eye" that sparkled in the cup (Prov. xxiii. 31), was one of the tokens of fermentation having taken place, and the same effect was very possibly implied in the name *khemer*.

The remaining terms call for but few remarks. There can be no question that *asis* means wine, and in this case it is observable that it forms part of a Divine promise (Joel iii. 18; Am. ix. 13) very much as *tirósh* occurs elsewhere, though other notices imply that it was the occasion of excess (Is. xlix. 26; Joel i. 5). Two out of the three passages in which *sôbe* occurs (Is. i. 22; Nah. i. 10) imply a liquor that would be spoiled or *wounded* (the expression in Is. i. 22, *mâhûl*, A. V. "mixed," is supposed to convey the same idea as the Latin *castrare* applied to wine in Plin. xix. 19) by the application of water; we think the passages quoted favor the idea of *strength* rather than sweetness being the characteristic of *sôbe*. The term occurs in Hos. iv. 18, in the sense of a debauch, and the verb accompanying it has no connection with the notion of acidity, but would more properly be rendered "is past." The *mingling* implied in the term *mesek* may have been designed either to

[a] An apparent instance occurs in Is. lv. 1, where the "buy and eat" has been supposed to refer to the "buy wine and milk" which follows (*Tirosh*, p. 94). But the term rendered "buy" properly means "to buy *grain*," and hence expresses in itself the substance to be eaten.

[b] שָׁתָה.

Digitized by Google

increase, or to diminish the strength of the wine, according as spices or water formed the ingredient that was added. The notices chiefly favor the former view; for mingled liquor was prepared for high festivals (Prov. ix. 2, 5), and occasions of excess (Prov. xxiii. 30; Is. v. 22). A cup "full mixed," was emblematic of severe punishment (Ps. lxxv. 8). At the same time strength was not the sole object sought: the wine "mingled with myrrh" given to Jesus, was designed to deaden pain (Mark xv. 23), and the spiced pomegranate wine prepared by the bride (Cant. viii. 2) may well have been of a mild character. Both the Greeks and Romans were in the habit of flavoring their wines with spices, and such preparations were described by the former as wine ἐξ ἀρωμάτων κατασκευαζόμενος (Athen. i. p. 31 *e*), and by the latter as *aromatites* (Plin. xiv. 19, § 5). The authority of the Mishna may be cited in favor both of water and of spices, the former being noticed in *Berach.* 7, § 5; *Pesach.* 7, § 13, and the latter in *Schen.* 2, § 1. In the New Testament the character of the "sweet wine," noticed in Acts ii. 13, calls for some little remark. It could not be *new* wine in the proper sense of the term, inasmuch as about eight months must have elapsed between the vintage and the feast of Pentecost. It might have been applied, just as *mustum* was by the Romans, to wine that had been preserved for about a year in an unfermented state (Cato, *R. R.* c. 120). But the explanations of the ancient lexicographers rather lead us to infer that its luscious qualities were due, not to its being recently made, but to its being produced from the very purest juice of the grape: for both in Hesychius and the Etymologicum Magnum the term γλεῦκος is explained to be the juice that flowed spontaneously from the grape before the treading commenced. The name itself, therefore, is not conclusive as to its being an unfermented liquor, while the context implies the reverse: for St. Peter would hardly have offered a serious defense to an accusation that was not seriously made; and yet if the sweet wine in question were not intoxicating, the accusation could only have been ironical.

As considerable stress is laid upon the quality of sweetness, as distinguished from strength, supposed to be implied in the Hebrew terms *mesek* and *sôbe*, we may observe that the usual term for the inspissated juice of the grape, which was characterized more especially by sweetness, was *dêbash*,[a] rendered in the A. V. "honey" (Gen. xliii. 11; Ex. xxvii. 17). This was prepared by boiling it down either to a third of its original bulk, in which case it was termed *sapa* by the Latins, and ἕψημα or σίραιον by the Greeks, or else to half its bulk, in which case it was termed *defrutum* (Plin. xiv. 11). Both the substance and the name, under the form of *dibs*, are in common use in Syria at the present day. We may further notice a less artificial mode of producing a sweet liquor from the grape, namely, by pressing the juice directly into the cup, as described in Gen. xl. 11. And, lastly, there appears to have been a beverage, also of a sweet character, produced by macerating grapes, and hence termed the "liquor"[b] of grapes (Num. vi. 3). These latter preparations are allowed in the Koran (xvi 69) as substitutes for wine.

There can be little doubt that the wines of Palestine varied in quality, and were named after the localities in which they were made. We have no notices, however, to this effect. The only wines of which we have special notice, belonged to Syria: these were the wine of Helbon, a valley near Damascus, which in ancient times was prized at Tyre (Ez. xxvii. 18) and by the Persian monarchs (Strab. xv. p. 735), as it still is by the residents of Damascus (Porter, *Damascus*, i. 333); and the wine of Lebanon, famed for its aroma (Hos. xiv. 7).

With regard to the uses of wine in private life there is little to remark. It was produced on occasions of ordinary hospitality (Gen. xiv. 18), and at festivals, such as marriages (John ii. 3). The monuments of ancient Egypt furnish abundant evidence that the people of that country, both male and female, indulged liberally in the use of wine (Wilkinson, i. 52, 53). It has been inferred from a passage in Plutarch (*de Isid.* 6) that no wine was drunk in Egypt before the reign of Psammetichus, and this passage has been quoted in illustration of Gen. xl. 11. The meaning of the author seems rather to be that the kings subsequently to Psammetichus did not restrict themselves to the quantity of wine prescribed to them by reason of their sacerdotal office (Diod. i. 70). The cultivation of the vine was incompatible with the conditions of a nomad life, and it was probably on this account that Jonadab, wishing to perpetuate that kind of life among his posterity, prohibited the use of wine to them (Jer. xxxv. 6). The case is exactly parallel to that of the Nabathæans, who abstained from wine on purely political grounds (Diod. xix. 94).

Under the Mosaic Law wine formed the usual drink-offering that accompanied the daily sacrifice (Ex. xxix. 40), the presentation of the first-fruits (Lev. xxiii. 13), and other offerings (Num. xv. 5). It appears from Num. xxviii. 7 that strong drink might be substituted for it on these occasions. Tithe was to be paid of wine (*tîrôsh*) as of other products, and this was to be consumed "before the Lord," meaning within the precincts of the Temple, or perhaps, as may be inferred from Lev. vii. 16, at the place where the Temple was situated (Deut. xii. 17, 18). The priest was also to receive first-fruits of wine (*tîrôsh*), as of other articles (Deut. xviii. 4; comp. Ex. xxii. 29): and a promise of plenty was attached to the faithful payment of these dues (Prov. iii. 9, 10). The priests were prohibited from the use of wine and strong drink before performing the services of the Temple (Lev. x. 9), and the place which this prohibition holds in the narrative favors the presumption that the offense of Nadab and Abihu was committed under the influence of liquor. Ezekiel repeats the prohibition as far as wine is concerned (Ez. xliv. 21). The Nazarite was prohibited from the use of wine, or strong drink, or even the juice of grapes during the continuance of his vow (Num. vi. 3); but the adoption of that vow was a voluntary act. The use of wine at the paschal feast was not enjoined by the Law; but had become an established custom, at all events in the post-Babylonian period. The cup was handed round four times according to the ritual prescribed in the Mishna (*Pesach.* 10, § 1), the third cup being designated the "cup of blessing" (1 Cor. x. 16), because grace was then said (*Pesach.* 10 § 7). [PASSOVER.] The contents of the cup are specifically described by our Lord as "the fruit" (γένημα) of the vine (Matt. xxvi. 29; Mark xiv

35; Luke xxii. 18), and in the Mishna simply as wine. The wine was mixed with warm water on these occasions, as implied in the notice of the warming kettle (*Pesach.* 7, § 13). Hence in the early Christian Church it was usual to mix the sacramental wine with water, a custom as old, at all events, as Justin Martyr's time (*Apol.* i. 65). The Pastoral Epistles contain directions as to the moderate use of wine on the part of all holding office in the Church; as that they should not be πάροινοι (1 Tim. iii. 3; A. V. "given to wine"), meaning insolent and violent under the influence of wine; "not given to much wine" (1 Tim. iii. 8); "not enslaved to much wine" (Tit. ii. 3). The term νηφάλεος in 1 Tim. iii. 2 (A. V. "sober"), expresses general vigilance and circumspection (Schleusner, *Lex.* s. v.; Alford, *in loc.*). St. Paul advises Timothy himself to be no longer a habitual water-drinker, but to take a little wine for his health's sake (1 Tim. v. 23). No very satisfactory reason can be assigned for the place which this injunction holds in the epistle, unless it were intended to correct any possible misapprehension as to the preceding words, "Keep thyself pure." The precepts above quoted, as well as others to the same effect addressed to the disciples generally (Rom. xiii. 13; Gal. v. 21; 1 Pet. iv. 3), show the extent to which intemperance prevailed in ancient times, and the extreme danger to which the Church was subjected from this quarter. W. L. B.

* On the Bible names of wine and its use in the East, see articles by W. G. Schauffler in the *Bibl. Repos.* for Oct. 1836; L. Mayer, *Amer. Bibl. Repos.* for Oct. 1839; and T. Laurie, *Bibl. Sacra* for Jan. 1869. The view of Dr. F. R. Lees, referred to above, is set forth in his articles *Wine*, *Fruits*, and *Drink*, *Strong*, in the first edition (1845) of Kitto's *Cycl. of Bibl. Lit.*, also in his *Essays, Hist. and Crit. on the Temperance Question*, Lond. 1853 (including *Tirosh lo Yayin*), and very fully in the *Temperance Bible-Commentary* by Dr. F. R. Lees and the Rev. Dawson Burns, Lond. 1868, Amer. ed., with Preface by Dr. Tayler Lewis, N. Y. 1870. They are adopted in the main by Professor G. C. M. Douglas, art. *Wine* in Fairbairn's *Imp. Bible Dict.*, but are warmly controverted by Isaac Jennings, art. *Wine* in the 3d ed. of Kitto's *Cycl. of Bibl. Lit.* (1866). A.

* WINE-FAT. [WINE-PRESS.]

**WINE-PRESS** (גַּת; יְקֶב; פּוּרָה). From the scanty notices contained in the Bible we gather that the wine-presses of the Jews consisted of two receptacles or vats placed at different elevations, in the upper one of which the grapes were trodden, while the lower one received the expressed juice. The two vats are mentioned together only in Joel iii. 13: "The press (*gath*) is full: the fats (*yekebim*) overflow" — the upper vat being full of fruit, the lower one overflowing with the must. *Yekeb* is similarly applied in Joel ii. 24, and probably in Prov. iii. 10, where the verb rendered "burst out" in the A. V. may bear the more general sense of "abound" (Gesen. *Thes.* p. 1130). *Gath* is also strictly applied to the upper vat in Neh. xiii. 15, Lam. i. 15, and Is. lxiii. 2, with *pûrâh* in a parallel sense in the following verse. Elsewhere *yekeb* is not strictly applied; for in Job xxiv. 11, and Jer. xlviii. 33, it refers to the upper vat, just as in Matt. xxi. 33, ὑπολήνιον (properly the vat *under* the press) is substituted for ληνός, as given in Mark xii. 1. It would, moreover, appear natural to describe the whole arrangement by the term *gath*, as denoting the most important portion of it; but, with the exception of proper names in which the word appears, such as Gath, Gath-rimmon, Gath-hepher, and Gittaim, the term *yekeb* is applied to it (Judg. vii. 25; Zech. xiv. 10). The same term is also applied to the produce of the wine-press (Num. xviii. 27, 30; Deut. xv. 14; 2 K. vi. 27; Hos. ix. 2). The term *pûrâh*, as used in Hag. ii. 16, probably refers to the contents of a wine-vat,[a] rather than to the press or vat itself. The two vats were usually dug or hewn out of the solid rock (Is. v. 2, margin; Matt. xxi. 33). Ancient wine-presses, so constructed, are still to be seen in Palestine, one of which is thus described by Robinson: "Advantage had been taken of a ledge of rock; on the upper side a shallow vat had been dug out, eight feet square, and fifteen inches deep Two feet lower down another smaller vat was excavated, four feet square by three feet deep. The grapes were trodden in the shallow upper vat, and the juice drawn off by a hole at the bottom (still remaining) into the lower vat" (*Bibl. Res.* iii. 137 603). The wine-presses were thus permanent, and were sufficiently well known to serve as indications of certain localities (Judg. vii. 25; Zech. xiv. 10). The upper receptacle (*gath*) was large enough to admit of threshing being carried on in (not "by," as in A. V.) it, as was done by Gideon for the sake of concealment (Judg. vi. 11). [FAT.] W. L. B.

**WINNOWING.** [AGRICULTURE.]

* **WINTER.** [PALESTINE, iii. 2317 ff.; AGRICULTURE.]

**WISDOM OF JESUS, SON OF SIRACH.** [ECCLESIASTICUS.]

**WISDOM, THE, OF SOLOMON.** Σοφία Σαλωμών; Σοφία Σολομῶντος; later, ἡ Σοφία: *Liber Sapientiæ*; *Sapientia Salomonis*; *Sophia Salomonis*. The title Σοφία was also applied to the Book of Proverbs, as by Melito *ap.* Euseb. *H. E.* iv. 26 (Παροιμίαι ἢ καὶ ἡ Σοφία; see Vales. or Routh *ad loc.*), and also to Ecclesiasticus, as Epiphanius (*adv. hær.* lxxvi. p. 941, ἐν ταῖς Σοφίαις, Σολομῶντός τέ φημι καὶ υἱοῦ Σιράχ), from which considerable confusion has arisen.

1. *Text.* — The Book of Wisdom is preserved in Greek and Latin texts, and in subsidiary translations into Syriac, Arabic, and Armenian. Of these latter, the Armenian is said to be the most important; the Syriac and Arabic Versions being paraphrastic and inaccurate (Grimm, *Einl.* § 10). The Greek text, which, as will appear afterwards, is undoubtedly the original, offers no remarkable features. The variations in the MSS. are confined within narrow limits, and are not such as to suggest the idea of distinct early recensions; nor is there any appearance of serious corruptions anterior to existing Greek authorities. The Old Latin Version, which was left untouched by Jerome (*Præf. in Liber Sal.*, In eo libro qui a plerisque *Sapientia Salomonis* inscribitur . . . . calamo temperavi; tantummodo canonicas Scripturas emendare desiderans, et studium meum certis magis quam dubiis commendare), is in the main a close and faithful rendering of the Greek, though it contains some additions to the original text, such as are characteristic of the old version generally.

[a] The LXX. renders the term by μετρητής, the Greek measure equivalent to the Hebrew *bath*.

Digitized by Google

Examples of these additions are found — i. 15, *Injustitia autem mortis est acquisitio*; ii. 8, *Nullum pratum sit quod non pertranseat luxuria nostra*; ii. 17, *et sciemus quæ erunt novissima illius*; vi. 1, *Melior est sapientia quam vires, et vir prudens quam fortis.* And the construction of the parallelism in the two first cases suggests the belief that there, at least, the Latin reading may be correct. But other additions point to a different conclusion: vi. 23, *diligite lumen sapientiæ omnes qui præestis populis*; viii. 11, *et facies principum mirabuntur me*; ix. 19, *quicunque placuerunt tibi domine a principio*; xi. 5, *a defectione potus sui, et in eis cum abundarent filii Israel lætati sunt.*

The chief Greek MSS. in which the book is contained are the *Codex Sinaiticus* (ℵ), the *Cod. Alexandrinus* (A), the *Cod. Vaticanus* (B), and the *Cod. Ephraemi rescr.* (C). The entire text is preserved in the three former; in the latter, only considerable fragments: viii. 5–xi. 10; xiv. 19–xvii. 18; xviii. 24–xix. 22.

Sabatier used four Latin MSS of the higher class for his edition: "Corbeienses duos, unum Sangermanensem, et alium S. Theodorici ad Remos," of which he professes to give almost a complete (but certainly not a literal) collation. The variations are not generally important; but patristic quotations show that in early times very considerable differences of text existed. An important MS. of the book in the Brit. Mus. *Egerton*, 1046, Sæc. viii. has not yet been examined.

2. *Contents.* — The book has been variously divided; but it seems to fall most naturally into two great divisions: (1) i.–ix.; (2) x.–xix. The first contains the doctrine of Wisdom in its moral and intellectual aspects; the second, the doctrine of Wisdom as shown in history. Each of these parts is again capable of subdivision. The first part contains the praise of Wisdom as the source of immortality in contrast with the teaching of sensualists (i.–v.); and next the praise of Wisdom as the guide of practical and intellectual life, the stay of princes, and the interpreter of the universe (vi.–ix.). The second part, again, follows the action of Wisdom summarily, as preserving God's servants from Adam to Moses (x. 1–xi. 4), and more particularly in the punishment of the Egyptians and Canaanites (xi. 5–16, xi. 17–xii.). This punishment is traced to its origin in idolatry, which, in its rise and progress, presents the false substitute for Revelation (xiii., xiv.). And in the last section (xv.–xix.) the history of the Exodus is used to illustrate in detail the contrasted fortunes of the people of God and idolaters. The whole argument may be presented in a tabular form in the following shape: —

I. — Ch. i.–ix. *The doctrine of Wisdom in its spiritual, intellectual, and moral aspects.*

(α.) i.–v. Wisdom the giver of happiness and immortality.
- The conditions of wisdom (i. 1–11).
  - Uprightness of thought (1–5).
  - Uprightness of word (6–11).
- The origin of death (i. 12–ii. 24).
  - Sin (in fact) by man's free will (i. 12–16).
  - The reasoning of the sensualist (ii. 1–20).
  - Sin (in source) by the envy of the devil (21–24).
- The godly and wicked in life (as mortal), (iii. 1–iv.).
  - In chastisements (iii. 1–10).
  - In the results of life (iii. 11–iv. 6).
  - In length of life (7–20).
- The godly and wicked after death (v.).
  - The judgment of conscience (1–14).
  - The judgment of God —
    - On the godly (15, 16).
    - On the wicked (17–23).

(β.) vi.–ix. Wisdom the guide of life.
- Wisdom the guide of princes (vi. 1–21)
  - The responsibility of power (1–11).
  - Wisdom soon found (12–16).
  - Wisdom the source of true sovereignty (17–21).
- The character and realm of wisdom.
  - Open to all (vi. 22–vii. 7).
  - Pervading all creation (vii. 8–viii 1).
  - Swaying all life (viii. 2–17).
- Wisdom the gift of God (viii. 17–ix.).
  - Prayer for wisdom (ix.).

II. — Ch. x.–xix. *The doctrine of Wisdom in its historical aspects.*

(α.) Wisdom a power to save and chastise.
- Wisdom seen in the guidance of God's people from Adam to Moses (x.–xi. 4).
- Wisdom seen in the punishment of God's enemies (xi. 5–xii.).
  - The Egyptians (xi. 5–xii. 1).
  - The Canaanites (xii. 2–18).
  - The lesson of mercy and judgment (19–27).

(β.) The growth of idolatry the opposite to wisdom.
- The worship of nature (xiii. 1–9).
- The worship of images (xiii. 10–xiv. 13).
- The worship of deified men (xiv. 14–21).
- The moral effects of idolatry (xiv. 22–31).

(γ.) The contrast between true worshippers and idolaters (xv.–xix.).
- The general contrast (xv. 1–17).
- The special contrast at the Exodus —
  - The action of beasts (xv. 18–xvi. 13).
  - The action of the forces of nature — water, fire (xvi. 14–29).
  - The symbolic darkness (xvii.–xviii. 4).
  - The action of death (xviii. 5–25).
  - The powers of nature changed in their working to save and destroy (xix. 1–21).
  - Conclusion (xix. 21).

The subdivisions are by no means sharply defined, though it is not difficult to trace the main current of thought. Each section contains the preparation for that which follows, just as in the classic trilogy the close of one play shadowed forth the subject of the next. Thus in ii. 24 *b*, iv. 20, ix. 18, etc., the fresh idea is enunciated, which is subsequently developed at length. In this way the whole book is intimately bound together, and the clauses which appear at first sight to be idle repetitions of thought really spring from the elaborateness of its structure.

3. *Unity and Integrity.* — It follows from what has been said that the book forms a complete and harmonious whole. But the distinct treatment of the subject, theoretically and historically, in two parts, has given occasion from time to time for maintaining that it is the work of two or more authors. C. F. Houbigant (*Prolegg. ad Scrip. et Eccles.* 1777) supposed that the first nine chapters were the work of Solomon, and that the translator of the Hebrew original (probably) added the later

Digitized by Google

chapters. Eichhorn (*Einl. in d. Apoc.* 1795), rightly feeling that some historical illustrations of the action of wisdom were required by the close of ch. ix., fixed the end of the original book at ch. xi. 1. Nachtigall (*Das Buch Weish.* 1799) devised a far more artificial theory, and imagined that he could trace in the book the records of (so to speak) an antiphonic "Praise of Wisdom," delivered in three sittings of the sacred schools by two companies of doctors. Bretschneider (1804–5), following out the simpler hypothesis, found three different writings in the book, of which he attributed the first part (i. 1–vi. 8) to a Palestinian Jew of the time of Antiochus Epiph., the second (vi. 9–x.) to a philosophic Alexandrine Jew of the time of our Lord, and the third (xii.–xix.) to a contemporary, but uneducated Jew, who wrote under the influence of the rudest national prejudices. The eleventh chapter was, as he supposed, added by the compiler who brought the three chief parts together. Bertholdt (*Einleitung*, 1815) fell back upon a modification of the earliest division. He included cc. i.–xii. in the original book, which he regarded as essentially philosophical, while the later addition (xiii.–xix.) is, in his judgment, predominantly theological. It is needless to enter in detail into the arguments by which these various opinions were maintained, but when taken together, they furnish an instructive example of the course of subjective criticism. The true refutation of the one hypothesis which they have in common — the divided authorship of the book — is found in the substantial harmony and connection of its parts, in the presence of the same general tone and manner of thought throughout it, and yet more in the essential uniformity of style and language which it presents, though both are necessarily modified in some degree by the subject-matter of the different sections. (For a detailed examination of the arguments of the "Separatists," see Grimm, *Exeg. Handb.* § 4; and Bauermeister, *Comm. in lib. Sap.* 3 ff.)

Some, however, admitting the unity of the book, have questioned its integrity. Eichhorn imagined that it was left imperfect by its author (*Einl.* p. 148); Grotius, apparently, that it was mutilated by some accident of time (Videtur hic liber esse κόλουρος); and others have been found, in later times, to support each opinion. Yet it is obvious that the scope of the argument is fully satisfied by the investigation of the providential history of the Jews up to the time of the occupation of Canaan, and the last verse furnishes a complete epilogue to the treatise, which Grimm compares, not inaptly, with the last words of 3 Macc.

The idea that the book has been interpolated by a Christian hand (Grotius, Grätz) is as little worthy of consideration as the idea that it is incomplete. The passages which have been brought forward in support of this opinion (ii. 12–20, 24, iii. 13, 14, xv. 7; comp. *Homilies*, p. 174, ed. 1850) lose all their force, if fairly interpreted.

4. *Style and Language.* — The literary character of the book is most remarkable and interesting. In the richness and freedom of its vocabulary it most closely resembles the fourth book of Maccabees, but it is superior to that fine declamation, both in power and variety of diction. No existing work represents perhaps more completely the style of composition which would be produced by the sophistic schools of rhetoric; and in the artificial balancing of words, and the frequent niceties of arrangement and rhythm, it is impossible not to be reminded of the exquisite story of Prodicus (Xen. *Memorab.* ii. 1, 21), and of the subtle refinements of Protagoras in the dialogue which bears his name. It follows as a necessary consequence that the effect of different parts of the book is very unequal. The florid redundancy and restless straining after effect, which may be not unsuited to vivid intellectual pictures, is wholly alien from the philosophic contemplation of history. Thus the forced contrasts and fantastic exaggerations in the description of the Egyptian plagues cannot but displease; while it is equally impossible not to admire the lyrical force of the language of the sensualist (ii. 1 ff.), and of the picture of future judgment (v. 15 ff.). The magnificent description of Wisdom (vii. 22–viii. 1) must rank among the noblest passages of human eloquence, and it would be perhaps impossible to point out any piece of equal length in the remains of classical antiquity more pregnant with noble thought, or more rich in expressive phraseology. It may be placed beside the Hymn of Cleanthes or the visions of Plato, and it will not lose its power to charm and move. Examples of strange or new words may be found almost on every page. Such are ἀναποδισμός, πρωτόπλαστος, εἰδέχθεια, ἀγεροχία, ἐτάζειν, ἀκηλίδωτος, ῥεμβασμός, ξενιτεία; others belong characteristically to later Greek, as διαβούλιον, ἀντανακλᾶσθαι, ἀδιάπτωτος, ἑδράζειν, ἕξαλλος, ἀπερίσπαστος, etc.; others, again, to the language of philosophy, ὁμοιοπαθής, ζωτικός, προυφεστάναι, etc.; and others to the LXX., χερσόω, ὁλοκαύτωμα, etc. No class of writings and no mode of combination appear to be unfamiliar to the writer. Some of the phrases which he adopts are singularly happy, as κατάχρεος ἁμαρτίας (i. 4), ἀλαζονεύεσθαι πατέρα θεόν (ii. 16), ἐλπὶς ἀθανασίας πλήρης (iii. 4), etc.; and not less so some of the short and weighty sentences in which he gathers up the truth on which he is dwelling: vi. 19, ἀφθαρσία ἐγγὺς εἶναι ποιεῖ θεοῦ; xi. 26, φείδῃ δὲ πάντων ὅτι σὰ ἐστι δέσποτα φιλόψυχε. The numerous artificial resources with which the book abounds are a less pleasing mark of labor bestowed upon its composition. Thus, in i. 1, we have ἀγαπήσατε . . . . φρονήσατε . . . . ἐν ἀγαθότητι καὶ ἐν ἁπλότητι, . . . . ζητήσατε; v. 22, ποταμοὶ . . . . ἀποτόμως; xiii. 11, περιέξυσεν εὐμαθῶς . . . . καὶ τεχνησάμενος εὐπρεπῶς; xix. 21, τηκτὸν εὔτηκτον. The arrangement of the words is equally artificial, but generally more effective, and often very subtle and forcible; vii. 29, ἔστι γὰρ αὕτη (ἡ σοφία) εὐπρεπεστέρα ἡλίου καὶ ὑπὲρ πᾶσαν ἀστρων θέσιν. φωτὶ συγκρινομένη εὑρίσκεται προτέρα. τοῦτο μὲν γὰρ διαδέχεται νύξ, σοφίας δέ οὐκ ἀντισχύει κακία.

The language of the Old Latin translation is also itself full of interest. It presents, in great profusion, the characteristic provincialisms which elsewhere mark the earliest African version of the Scriptures. [Comp. VULGATE, § 43.] Such are the substantives *exterminium, refrigerium; praecluritas, medietas, nimietas, nativitas, supervacuitas; subitatio; assistrix, doctrix, electrix; immemoratio* (ἀμνησία); *incolatus;* the adjectives *contemptibilis, ineffusibilis, odibilis; incoinquinatus, inauxiliatus, indisciplinatus, insensatus, insimulatus* (ἀνυπόκριτος); *fumigabundus;* the verbs *angustiare, mansuetare, improperare;* and the phrases *impossibilis immittere, partibus* (=*partim*), *innumerabilis honestas, providentiae* (pl.).

5. *Original Language.* — The characteristics of

the language, which have been just noticed, are so marked that no doubt could ever have been raised as to the originality of the Greek text, if it had not been that the book was once supposed to be the work of Solomon. It was assumed (so far rightly) that if the traditional title were correct, the book must have been written in Hebrew; and the belief which was thus based upon a false opinion as to the authorship, survived, at least partially, for some time after that opinion was abandoned. Yet as it must be obvious, even on a superficial examination, that the style and language of the book show conclusively that it could not have been the work of Solomon, so it appears with equal certainty that the freedom of the Greek diction was checked by no Aramaic text. This was well stated by Jerome, who says, "Fertur et *πανάρετος* Jesu filii Sirach liber, et alius *ψευδεπίγραφος* qui Sapientia Salomonis inscribitur . . . . Secundus apud Hebræos nusquam est, quia et ipse stylus Græcam eloquentiam redolet" (*Præf. in Libr. Salom.*); and it seems superfluous to add any further argument to those which must spring from the reading of any one chapter. It is, however, interesting on other grounds to observe that the book contains unequivocal traces of the use of the LXX. where it differs from the Hebrew: ii. 12, *ἐνεδρεύσωμεν τὸν δίκαιον ὅτι δύσχρηστος ἡμῖν ἐστί* (Is. iii. 10); xv. 10, *σποδὸς ἡ καρδία αὐτῶν* (Is. xliv. 20); and this not in direct quotations, where it is conceivable that a Greek translator might have felt justified in adopting the rendering of the version with which he was familiar, but where the words of the LXX. are inwrought into the text itself. But while the original language of the book may be regarded as certainly determined by internal evidence, great doubt hangs over the date and place of its composition; and it will be necessary to examine some of the doctrinal peculiarities which it presents before any attempt is made to determine these points with approximate accuracy.

6. *Doctrinal Character.* — The theological teaching of the book offers, in many respects, the nearest approach to the language and doctrines of Greek philosophy which is found in any Jewish writing up to the time of Philo. There is much in the views which it gives of the world, of man, and of the Divine Nature, which springs rather from the combination or conflict of Hebrew and Greek thought than from the independent development of Hebrew thought alone. Thus, in speaking of the almighty power of God, the writer describes Him as "having created the universe out of matter without form" (*κτίσασα τὸν κόσμον ἐξ ἀμόρφου ὕλης*, xi. 17), adopting the very phrase of the Platonists, which is found also in Philo (*De Vict. Offer.* § 13), to describe the preëxisting matter out of which the world was made, and (like Philo, *De Mund. Op.* § 5) evidently implying that this indeterminate matter was itself uncreated. Whatever attempts may be made to bring this statement into harmony with the doctrine of an absolute primal creation, it is evident that it derives its form from Greece. Scarcely less distinctly heathen is the conception which is presented of the body as a mere weight and clog to the soul (ix. 15; contrast 2 Cor. v. 1–4); and we must refer to some extra-Judaic source for the remarkable doctrine of the preëxistence of souls, which finds unmistakable expression in viii. 20. The form, indeed, in which this doctrine is enunciated differs alike from that given by Plato and by Philo, but it is no less foreign to the pure Hebrew mode of thought. It is more in accordance with the language of the O. T. that the writer represents the Spirit of God as filling (i. 7) and inspiring all things (xii. 1), but even here the idea of "a soul of the world" seems to influence his thoughts; and the same remark applies to the doctrine of the Divine Providence (*πρόνοια*, xiv. 3, xvii. 2; comp. Grimm. *ad loc.*), and of the four cardinal virtues (viii. 7, *σωφροσύνη, φρόνησις, δικαιοσύνη, ἀνδρεία*), which, in form at least, show the effect of Stoic teaching. There is, on the other hand, no trace of the characteristic Christian doctrine of a resurrection of the body; and the future triumph of the good is entirely unconnected with any revelation of a personal Messiah[a] (iii. 7, 8, v. 16; comp. Grimm on i. 12, iii. 7, for a good view of the eschatology of the book). The identification of the tempter (Gen. iii.), directly or indirectly, with the devil, as the bringer "of death into the world" (ii. 23, 24), is the most remarkable development of Biblical doctrine which the book contains; and this pregnant passage, when combined with the earlier declaration as to the action of man's free will in the taking of evil to himself (i. 12–16), is a noble example of the living power of the Divine teaching of the O. T. in the face of other influences. It is also in this point that the Pseudo-Solomon differs most widely from Philo, who recognizes no such evil power in the world, though the doctrine must have been well known at Alexandria (comp. Gfrörer, *Philo*, etc. ii. 238).[b] The subsequent deliverance of Adam from his transgression (*ἐξείλατο αὐτὸν ἐκ παραπτώματος ἰδίου*) is attributed to Wisdom; and it appears that we must understand by this, not the scheme of Divine Providence, but that wisdom, given by God to man, which is immortality (viii. 17). Generally, too, it may be observed that, as in the cognate books, Proverbs and Ecclesiastes, there are few traces of the recognition of the sinfulness even of the wise man in his wisdom, which forms, in the Psalms and the Prophets, the basis of the Christian doctrine of the atonement (yet comp. xv. 2). With regard to the interpretation of the O. T., it is worthy of notice that a typical significance is assumed to underlie the historic details (xvi. 1, xviii. 4, 5, etc.); and in one most remarkable passage (xviii. 24) the high-

[a] The famous passage, ii. 12–20, has been very frequently regarded, both in early and modern times, as a prophecy of the Passion of Christ, "the child of God." It is quoted in this sense by Tertullian (*adv. Marc* iii. 22). Cyprian (*Testim.* ii. 14), Hippolytus (*Dem aav. Jud.* 9), Origen (*Hom. vi. in Ex.* l.), and many later Fathers, and Romish interpreters have generally followed their opinion. It seems obvious, however, that the passage contains no individual reference; and the coincidences which exist between the language and details in the Gospels are due partly to the O. T. passages on which it is based, and partly to the concurrence of each typical form of reproach and suffering in the Lord's Passion.

[b] There is also considerable difference between the sketch of the rise of idolatry in Philo, *De Monarch.* § 1–3, as that given in *Wisd.* xiii., xiv. Other differences are pointed out by Eichhorn, *Einl.* 172 ff. A trace of the cabbalistic use of numbers is pointed out by Ewald in the *twenty-one* attributes of Wisdom (vii 22, 23).

Digitized by Google

priestly dress is expressly described as presenting an image of the Divine glory in creation and in the patriarchal covenant — an explanation which is found, in the main, both in Philo (*De Vita Mos.* § 12) and Josephus (*Ant.* iii 7, § 7), as well as in later writers (comp. also xvi. 6, § 7). In connection with the O. T. Scriptures, the book, as a whole, may be regarded as carrying on one step further the great problem of life contained in Ecclesiastes and Job; while it differs from both *formally* by the admixture of Greek elements, and *doctrinally* by the supreme prominence given to the idea of immortality as the vindication of Divine justice (comp. below, § 9).

7. *The Doctrine of Wisdom* — It would be impossible to trace here in detail the progressive development of the doctrine of Wisdom, as a Divine Power standing in some sense between the Creator and creation, yet without some idea of this history no correct opinion can be formed on the position which the book of the Pseudo-Solomon occupies in Jewish literature. The foundation of the doctrine is to be found in the book of Proverbs, where (viii.) Wisdom (*Khokmah*) is represented as present with God before (viii. 22) and during the creation of the world. So far it appears only as a principle regulating the action of the Creator, though even in this way it establishes a close connection between the world, as the outward expression of Wisdom, and God. Moreover, by the personification of Wisdom, and the relation of Wisdom to men (viii. 31), a preparation is made for the extension of the doctrine. This appears, after a long interval, in Ecclesiasticus. In the great description of Wisdom given in that book (xxiv.), Wisdom is represented as a creation of God (xxiv. 9), penetrating the whole universe (4–6), and taking up her special abode with the chosen people (8–12). Her personal existence and providential function are thus distinctly brought out. In the Book of Wisdom the conception gains yet further completeness. In this, Wisdom is identified with the Spirit of God (ix. 17) — an identification half implied in Eccles. xxiv. 3 — which brooded over the elements of the unformed world (ix. 9), and inspired the prophets (vii. 7, 27). She is the power which unites (i. 7) and directs all things (viii. 1). By her, in especial, men have fellowship with God (xii. 1); and her action is not confined to any period, for "in all ages entering into holy souls, she maketh them friends of God and prophets" (vii. 27). So also her working, in the providential history of God's people, is traced at length (x.); and her power is declared to reach beyond the world of man into that of spirits (vii. 23).

The conception of Wisdom, however boldly personified, yet leaves a wide chasm between the world and the Creator. Wisdom answers to the idea of a spirit vivifying and uniting all things in all time, as distinguished from any special outward revelation of the Divine Person. Thus at the same time that the doctrine of Wisdom was gradually constructed, the correlative doctrine of the Divine Word was also reduced to a definite shape. The Word (*Memra*), the Divine expression, as it was understood in Palestine, furnished the exact complement to Wisdom, the Divine thought, but the ambiguity of the Greek *Logos* (*sermo, ratio*) introduced considerable confusion into the later treatment of the two ideas. Broadly, however, it may be said that the *Word* properly represented the mediative element in the action of God, *Wisdom* the mediative element of his omnipresence. Thus, according to the later distinction of Philo, Wisdom corresponds to the *immanent* Word (Λόγος ἐνδιάθετος), while the Word, strictly speaking, was defined as *enunciative* (Λόγος προφορικός). Both ideas are included in the language of the prophets, and both found a natural development in Palestine and Egypt. The one prepared men for the revelation of the Son of God, the other for the revelation of the Holy Spirit.

The book of the Pseudo-Solomon, which gives the most complete view of Divine Wisdom, contains only two passages in which the Word is invested with the attributes of personal action (xvi. 12, xviii. 15; ix. 1 is of different character). These, however, are sufficient to indicate that the two powers were distinguished by the writer; and it has been commonly argued that the superior prominence given in the book to the conception of Wisdom is an indication of a date anterior to Philo. Nor is this conclusion unreasonable, if it is probably established on independent grounds that the book is of Alexandrine origin. But it is no less important to observe that the doctrine of Wisdom in itself is no proof of this. There is nothing in the direct teaching on this subject which might not have arisen in Palestine, and it is necessary that we should recur to the more special traits of Alexandrine thought in the book which have been noticed before (§ 6) for the primary evidence of its Alexandrine origin; and starting from this there appears to be, as far as can be judged from the imperfect materials at our command, a greater affinity in the *form* of the doctrine on wisdom to the teaching of Alexandria than to that of Palestine (comp. Ewald, *Gesch.* iv. 548 ff.; Welte, *Einl.* 161 ff., has some good criticisms on many supposed traces of Alexandrine doctrine in the book, but errs in denying all).

The doctrine of the Divine Wisdom passes by a transition, often imperceptible, to that of human wisdom, which is derived from it. This embraces not only the whole range of moral and spiritual virtues, but also the various branches of physical knowledge. [Comp. PHILOSOPHY.] In this aspect the enumeration of the great forms of natural science in vii. 17–20 (viii. 8), offers a most instructive subject of comparison with the corresponding passages in 1 K. iv. 32–34. In addition to the subjects on which Solomon wrote (Songs, Proverbs: Plants, Beasts, Fowls, Creeping Things, Fishes), Cosmology, Meteorology, Astronomy, Psychology, and even the elements of the philosophy of history (viii. 8), are included among the gifts of Wisdom. So far then the thoughtful Jew had already at the Christian era penetrated into the domain of speculation and inquiry, into each province, it would seem, which was then recognized, without abandoning the simple faith of his nation. The fact itself is most significant; and the whole book may be quoted as furnishing an important corrective to the later Roman descriptions of the Jews, which were drawn from the people when they had been almost uncivilized by the excitement of the last desperate struggle for national existence. (For detailed references to the chief authorities on the history of the Jewish doctrine of Wisdom, see PHILOSOPHY; adding Bruch, *Die Weisheitslehre der Hebräer*, 1851.)

8. *Place and Date of Writing.* — Without claiming for the internal indications of the origin of the book a decisive force, it seems most reasonable to believe on these grounds that it was composed at

Digitized by Google

Alexandria some time before the time of Philo (cir. 120–80 B. C.). This opinion in the main, though the conjectural date varies from 150–50 B. C. or even beyond these limits, is held by Heydenreich, Gfrörer, Bauermeister, Ewald, Bruch, and Grimm; and other features in the book go far to confirm it. Without entering into the question of the extent of the Hellenistic element at Jerusalem in the last century B. C., it may be safely affirmed that there is not the slightest evidence for the existence there of so wide an acquaintance with Greek modes of thought, and so complete a command of the resources of the Greek language, as is shown in the book of Wisdom. Alexandria was the only place where Judaism and Philosophy, both of the east and west, came into natural and close connection. It appears further that the mode in which Egyptian idolatry is spoken of, must be due in some degree to the influence of present and living antagonism, and not to the contemplation of past history. This is particularly evident in the great force laid upon the details of the Egyptian animal worship (xv. 18, etc); and the description of the condition of the Jewish settlers in Egypt (xix. 14–16) applies better to colonists fixed at Alexandria on the conditions of equality by the first Ptolemies, than to the immediate descendants of Jacob. It may, indeed, be said justly, that the local coloring of the latter part of the book is conclusive as to the place of its composition. But all the guesses which have been made as to its authorship are absolutely valueless. The earliest was that mentioned by Jerome, which assigned it to Philo (*Præf. in Lib. Sal.* "Nonnulli scriptorum veterum hunc esse Judæi Philonis affirmant"). There can be no doubt that the later and famous Philo was intended by this designation, though Jerome in his account of him makes no reference to the belief (*De vir. illustr.* xi.). Many later writers, including Luther and Gerhard, adopted this view; but the variations in teaching, which have been already noticed, effectually prove that it is unfounded. Others, therefore, have imagined that the name was correct, but that the elder Philo was intended by it (G. Wernsdorff, and in a modified form Huet and Bellarmin). But of this elder Jewish Philo it is simply known that he wrote a poem on Jerusalem.[a] Lutterbeck suggested Aristobulus. [ARISTOBULUS.] Eichhorn, Zeller, Jost, and several others supposed that the author was one of the Therapeutæ, but here the positive evidence against the conjecture is stronger, for the book contains no trace of the ascetic discipline which was of the essence of the Therapeutic teaching. The opinion of some later critics that the book is of Christian origin (Kirschbaum, C. H. Weisse), or even definitely the work of Apollos (Noack), is still more perverse; for not only does it not contain the slightest trace of the three cardinal truths of Christianity, the Incarnation, the Atonement, the Resurrection of the body, but it even leaves no room for them by the general tenor of its teaching.[b]

9. *History.*—The history of the book is extremely obscure. There is no trace of the use of it before the Christian era, but this could not be otherwise if the view which has been given of its date be correct. It is perhaps more surprising that Philo does not (as it seems) show any knowledge of it, and it is not unlikely that if his writings are carefully examined with this object, some allusions to it may be found which have hitherto escaped observation. On the other hand, it can scarcely be doubted that St. Paul, if not other of the Apostolic writers, was familiar with its language, though he makes no definite quotation from it (the supposed reference in Luke xi. 49 to Wisd. ii. 19–14, is wholly unfounded). Thus we have striking parallels in Rom. ix. 21 to Wisd. xv. 7; in Rom. ix. 22 to Wisd. xii. 20; in Eph. vi. 13–17 to Wisd. v 17–19 (the heavenly armor), etc. The coincidences in thought or language which occur in other books of the N. T., if they stood alone, would be insufficient to establish a direct connection between them and the Book of Wisdom; and even in the case of St. Paul, it may be questioned whether his acquaintance with the book may not have been gained rather orally than by direct study. The same remark applies to a coincidence of language in the epistle of Clement to the Corinthians pointed out by Grimm (*Ad Cor.* i. 27; Wisd. xi. 22, xii. 12); so that the first clear references to the book occur not earlier than the close of the second century. According to Eusebius (*H. E.* v. 26), Irenæus made use of it (and of the Ep. to the Hebrews) in a lost work, and in a passage of his great work (*adv. Hær.* iv. 38, 3), Irenæus silently adopts a characteristic clause from it (Wisd. vi. 19, ἀφθαρσία δὲ ἐγγὺς εἶναι ποιεῖ θεοῦ). From the time of Clement of Alexandria the book is constantly quoted as an inspired work of Solomon, or as "Scripture," even by those Fathers who denied its assumed authorship, and it gained a place in the Canon (together with the other Apocryphal books) at the Council of Carthage, cir. 397 A. D. (for detailed references see CANON, vol. i. pp. 364, 366). From this time its history is the same as that of the other Apocryphal books up to the period of the Reformation. In the controversies which arose then its intrinsic excellence commanded the admiration of those who refused it a place among the canonical books (so Luther *ap.* Grimm, § 2). Pellican directly affirmed its inspiration (Grimm, *l. c.*); and it is quoted as Scripture in both the books of Homilies (pp. 98–99; 174, ed. 1850). In later times the various estimates which have been formed of the book have been influenced by controversial prejudices. In England, like the rest of the Apocrypha, it has been most strangely neglected, though it furnishes several lessons for Church Festivals. It seems, indeed, impossible to study the book dispassionately, and not feel that it forms one of the last links in the chain of providential connection between the Old and New Covenants. How far it falls short of Christian truth, or rather how com-

[a] The conjecture of J. Faber, that the book was written by Zerubbabel, who rightly assumed the character of a second Solomon, is only worth mentioning as a specimen of misplaced ingenuity (comp. Welte, *Einl.* p. 191 ff.). Augustine himself corrected the mistake by which he attributed it to Jesus the son of Sirach.

[b] Dr. Tregelles has given a new turn to this opinion by supposing that the book may have been written by a Christian (otherwise unknown) named Philo. In support of this he suggests an ingenious conjectural emendation of a corrupt passage of the Muratorian Canon. Where the Latin text reads *et Sapientia ab amicis Salomonis in honorem ipsius scripta*, he imagines the original Greek may have read, καὶ ἡ Σοφία Σολομῶντος ὑπὸ φίλωνος (for ὑπὸ φίλων) . . . . Or again that Jerome so misread the passage (*Journal of Philol* 1855, p 87 ff.).

Digitized by Google

pletely silent it is on the essential doctrines of Christianity, has been already seen; and yet Christianity offers the only complete solution to the problems which it raises in its teaching on the immortality of man, on future judgment, on the catholicity of the divine Church, and the speciality of Revelation. It would not be easy to find elsewhere any pre-Christian view of religion equally wide, sustained, and definite. The writer seems to have looked to the east and west, to the philosophy of Persia and Greece, and to have gathered from both what they contained of Divine truth, and yet to have clung with no less zeal than his fathers to that central revelation which God made first to Moses, and then carried on by the O. T. prophets. Thus in some sense the book becomes a landmark by which we may partially fix the natural limits of the development of Jewish doctrine when brought into contact with heathen doctrine, and measure the aspirations which were thus raised before their great fulfillment. The teaching of the book upon immortality has left ineffaceable traces upon the language of Christendom. The noble phrase which speaks of a "hope full of immortality" (Wisd. iii. 4), can never be lost; and in mediæval art few symbols are more striking than that which represents in outward form that "the souls of the righteous are in the hand of God" (Wisd. iii. 1). Other passages less familiar are scarcely less beautiful when seen in the light of Christianity, as xv. 3, "To know Thee (O God) is perfect righteousness; yea, to know Thy power is the root of immortality" (comp. viii. 13, 17; St. John xvii. 3), or xi. 26, "Thou sparest all: for they are thine, O Lord, thou lover of souls" (comp. xii. 16); and many detached expressions anticipate the language of the Apostles (iii. 9, χάρις καὶ ἔλεος; iii. 14, τῆς πίστεως χάρις ἐκλεκτή; xi. 23, παροράς ἁμαρτήματα ἀνθρώπων εἰς μετάνοιαν; xvi. 7, διὰ σὲ τὸν πάντων σωτῆρα).

10. *Commentaries.* — The earliest commentary which remains is that of Rabanus Maurus († 856), who undertook the work, as he says in his preface, because he was not acquainted with any complete exposition of the book. It is uncertain from his language whether the homilies of Augustine and Ambrose existed in his time: at least they have now been long lost. Of the Roman Catholic commentaries the most important are those of Lorinus († 1634), Corn. a Lapide († 1637), Maldonatus († 1583), Calmet († 1757), J. A. Schmid (1858). Of other commentaries, the chief are those by Grotius († 1645), Heydenreich, Bauermeister (1828), and Grimm (1837). The last-mentioned scholar has also published a new and admirable commentary in the *Kurzgef. Exeg. Handb. zu d. Apok.* 1860, which contains ample references to earlier writers, and only errs by excess of fullness. The English commentary of R. Arnald († 1750) is extremely diffuse, but includes much illustrative matter, and shows a regard for the variations of MSS. and versions which was most unusual at the time. A good English edition, however, is still to be desired. B. F. W.

• **WISE MEN**, Matt. ii. 1. [MAGI; STAR OF THE WISE MEN.]

• **WIST** = "knew" (Ex. xvi. 15; Mark ix. 5). It is from the A.-S. *witan*, in Germ. *wissen*. See WIT, WOT. H.

• **WIT**, from the A.-S. *witan* = "to know" (Gen. xxiv. 21; Ex. ii. 4). Hence, "to *do to wit*" (2 Cor. viii. 1) is "to cause to know." H.

**WITCH, WITCHCRAFTS.** [MAGIC.]

• **WITHERED HAND.** [MEDICINE, vol. iii. p. 1866.]

**WITNESS.**[a] Among people with whom writing is not common, the evidence of a transaction is given by some tangible memorial or significant ceremony. Abraham gave seven ewe-lambs to Abimelech as an evidence of his property in the well of Beer-sheba. Jacob raised a heap of stones, "the heap of witness," as a boundary-mark between himself and Laban (Gen. xxi. 30, xxxi. 47, 52). The tribes of Reuben and Gad raised an "altar," designed expressly not for sacrifice, but as a witness to the covenant between themselves and the rest of the nation; Joshua set up a stone as an evidence of the allegiance promised by Israel to God; "for," he said, "it hath heard all the words of the Lord" (Josh. xxii. 10, 26, 34, xxiv. 26, 27). So also a pillar is mentioned by Isaiah as "a witness to the Lord of Hosts in the land of Egypt" (Is. xix. 19, 20). Thus also the sacred ark and its contents are called "the Testimony" (Ex. xvi. 33, 34, xxv. 16, xxxviii. 21; Num. i. 50, 53, ix. 15, x. 11, xvii. 7, 8, xviii. 2; Heb. ix. 4).

Thus also symbolical usages, in ratification of contracts or completed arrangements, as the ceremony of shoe-loosing (Deut. xxv. 9, 10; Ruth iv. 7, 8), the ordeal prescribed in the case of a suspected wife, with which may be compared the ordeal of the Styx (Num. v. 17–31; *Class. Mus.* vi. 386). The Bedouin Arabs practice a fiery ordeal in certain cases by way of compurgation (Burckhardt, *Notes*, i. 121; Layard, *Nin. and Bab.* p. 305). The ceremony also appointed at the oblation of first-fruits may be mentioned as partaking of the same character (Deut. xxvi. 4). [FIRST-FRUITS.]

But written evidence was by no means unknown to the Jews. Divorce was to be proved by a written document (Deut. xxiv. 1, 3), whereas among Bedouins and Mussulmans in general a spoken sentence is sufficient (Burckhardt, *Notes*, i. 110; Sale, *Koran*, c. 33, p. 348; Lane, *Mod. Eg.* i. 136, 236). In civil contracts, at least in later times, documentary evidence was required and carefully preserved (Is. viii. 16; Jer. xxxii. 10–16).

On the whole the Law was very careful to provide and enforce evidence for all its infractions and all transactions bearing on them: *e. g.* the memorial stones of Jordan and of Ebal (Deut. xxvii. 2–4; Josh. iv. 9, viii. 30); the fringes on garments (Num. xv. 39, 40); the boundary-stones of property (Deut. xix. 14, xxvii. 17; Prov. xxii. 28); the "broad plates" made from the censers of the Korahites (Num. xvi. 38); above all, the Ark of Testimony itself: all these are instances of the care taken by the Legislator to perpetuate evidence of the facts on which the legislation was founded, and by which it was supported (Deut. vi. 20–25). Appeal to the same principle is also repeatedly made in the case of prophecies as a test of their authenticity (Deut. xviii. 22; Jer. xxviii. 9, 16, 17; John iii. 11, v. 36, x. 38, xiv. 11; Luke xxiv. 48; Acts i. 3, ii. 32, iii. 15, &c.).

Among special provisions of the Law with respect to evidence are the following: —

[a] עֵד, עֵדָה f.: μάρτυς: *testis*: used both of persons and things.

Digitized by Google

1. Two witnesses at least are required to establish any charge (Num. xxxv. 30; Deut. xvii. 6, xix. 15; 1 K. xxi. 13; John viii. 17; 2 Cor. xiii. 1; Heb. x. 28); and a like principle is laid down by St. Paul as a rule of procedure in certain cases in the Christian Church (1 Tim. v. 19).

2. In the case of the suspected wife, evidence besides the husband's was desired, though not demanded (Num. v. 13).

3. The witness who withheld the truth was censured (Lev. v. 1).

4. False witness was punished with the punishment due to the offense which it sought to establish. [OATHS.]

5. Slanderous reports and officious witness are discouraged (Ex. xx. 16, xxiii. 1; Lev. xix. 16, 18; Deut. xix. 16–21; Prov. xxiv. 28).

6. The witnesses were the first executioners (Deut. xiii. 9, xvii. 7; Acts vii. 58).

7. In case of an animal left in charge and torn by wild beasts, the keeper was to bring the carcase in proof of the fact and disproof of his own criminality (Ex. xxii. 13).

8. According to Josephus, women and slaves were not admitted to bear testimony (*Ant.* iv. 8, § 15). To these exceptions the Mishna adds idiots, deaf, blind, and dumb persons, persons of infamous character, and some others, ten in all (Selden, *de Synedr.* ii. 13, 11; Otho, *Lex. Rabb.* p. 653). The high-priest was not bound to give evidence in any case except one affecting the king (*ibid.*). Various refinements on the quality of evidence and the manner of taking it are given in the Mishna (*Sanhedr.* iv. 5, v. 2, 3; *Maccoth*, i. 1, 9; *Sheb.* iii. 10, iv. 1, v. 1). In criminal cases evidence was required to be oral; in pecuniary, written evidence was allowed (Otho, *Lex. Rabb.* p. 653).

In the N. T. the original notion of a witness is exhibited in the special form of one who attests his belief in the Gospel by personal suffering. So St. Stephen is styled by St. Paul (Acts xxii. 20), and the "faithful Antipas" (Rev. ii. 13). St. John also speaks of himself and of others as witnesses in this sense (Rev. i. 9, vi. 9, xi. 3, xx. 4). See also Heb. xi. and xii. 1, in which passage a number of persons are mentioned, belonging both to O. T. and N. T. who bore witness to the truth by personal endurance; and to this passage may be added, as bearing on the same view of the term "witness," Dan. iii. 21, vi. 16; 1 Macc. i. 60, 63; 2 Macc. vi. 18, 19. Hence it is that the use of the ecclesiastical term "Martyr" has arisen, of which copious illustration may be seen in Suicer, *Thes.* vol. ii. p. 310, &c. [MARTYR, Amer. ed.]

H. W. P.

**WIZARD.** [MAGIC.]

**WOE WORTH** (Ez. xxx. 2) is equivalent to "woe be," *i. e.* to the day of which the prophet speaks. *Worth*, from the Anglo-Saxon, means to be" or "become," like *werden* in German.

H.

**WOLF** (זְאֵב, *zêêb*: λύκος: *lupus*). There can be little doubt that the wolf of Palestine is the common *Canis lupus*, and that this is the animal so frequently mentioned in the Bible, though it is true that we lack precise information with regard to the *Canidæ* of Palestine. Hemprich and Ehrenberg have described a few species, as, for instance, the *Canis Syriacus* and the *C. (Vulpes) Niloticus* (see figures in art. FOX, i. 840 f.); and Col. Hamilton Smith mentions, under the name of *derbouw*, a species of black wolf, as occurring in Arabia and Southern Syria; but nothing definite seems to be known of this animal. Wolves were doubtless far more common in Biblical times than they are now though they are occasionally seen by modern travellers (see Kitto's *Physical History of Palestine*, p. 364, and Russell's *Nat. Hist. of Aleppo*, ii. 184): "the wolf seldom ventures so near the city as the fox, but is sometimes seen at a distance by the sportsmen among the hilly grounds in the neighborhood; and the villages, as well as the herds, often suffer from them. It is called *deeb* in Arabic, and is common all over Syria."

The following are the Scriptural allusions to the wolf: Its ferocity is mentioned in Gen. xlix. 27; Ez. xxii. 27; Hab. i. 8; Matt. vii. 15: its nocturnal habits, in Jer. v. 6; Zeph iii. 3; Hab. i. 8: its attacking sheep and lambs, John x. 12; Matt. x. 16; Luke x. 3. Isaiah (xi. 6, lxv. 25) foretells the peaceful reign of the Messiah under the metaphor of a wolf dwelling with a lamb; cruel persecutors are compared with wolves (Matt. x. 16; Acts xx. 29).

Wolves, like many other animals, are subject to variation in color; the common color is gray with a tinting of fawn and long black hairs; the variety most frequent in Southern Europe and the Pyrenees is black; the wolf of Asia Minor is more tawny than those of the common color.

The people of Nubia and Egypt apply the term *dieb* to the *Canis anthus*, Fr. Cuv. (see Rüppell's *Atlas zu der Reise im Nördlichen Africa*, p. 46); this, however, is a jackal, and seems to be the *Lupus Syriacus*, which Hemp. and Ehrenb. noticed in Syria, and identical with the "Egyptian wolf" figured by Ham. Smith in Kitto's *Cycl.*

W. H.

**WOMEN.** The position of women in the Hebrew commonwealth contrasts favorably with that which in the present day is assigned to them generally in eastern countries. The social equality of the two sexes is most fully implied in the history of the original creation of the woman, as well as in the name assigned to her by the man, which differed from his own only in its feminine termination (Gen. ii. 18–23). This narrative is hence effectively appealed to as supplying an argument for enforcing the duties of the husband towards the wife (Eph. v. 28–31). Many usages of early times interfered with the preservation of this theoretical equality: we may instance the existence of polygamy, the autocratic powers vested in the head of the family under the patriarchal system, and the treatment of captives. Nevertheless a high tone was maintained generally on this subject by the Mosaic Law, and, as far as we have the means of judging, by the force of public opinion.

The most salient point of contrast in the usages of ancient as compared with modern oriental society was the large amount of liberty enjoyed by women. Instead of being immured in a harem, or appearing in public with the face covered, the wives and maidens of ancient times mingled freely and openly with the other sex in the duties and amenities of ordinary life. Rebekah travelled on a camel with her face unveiled, until she came into the presence of her affianced (Gen. xxiv. 64, 65). Jacob saluted Rachel with a kiss in the presence of the shepherds (Gen. xxix. 11). Each of these maidens was engaged in active employment, the former in fetching water from the well, the latter in tending her flock. Sarah wore no veil in Egypt, and yet this fairness

Digitized by Google

as ground for supposing her to be married (Gen. xii. 14–19). An outrage on a maiden in the open field was visited with the severest punishment (Deut. xxii. 25–27), proving that it was not deemed improper for her to go about unprotected. Further than this, women played no inconsiderable part in public celebrations: Miriam headed a band of women who commemorated with song and dance the overthrow of the Egyptians (Ex. xv. 20, 21); Jephthah's daughter gave her father a triumphal reception (Judg. xi. 34); the maidens of Shiloh danced publicly in the vineyards at the yearly feast (Judg. xxi. 21); and the women fêted Saul and David, on their return from the defeat of the Philistines, with singing and dancing (1 Sam. xviii. 6, 7). The odes of Deborah (Judg. v.) and of Hannah (1 Sam. ii. 1, etc.) exhibit a degree of intellectual cultivation which is in itself a proof of the position of the sex in that period. Women also occasionally held public offices, particularly that of prophetess or inspired teacher, as instanced in Miriam (Ex. xv. 20), Huldah (2 K. xxii. 14), Noadiah (Neh. vi. 14), Anna (Luke ii. 36), and above all Deborah, who applied her prophetical gift to the administration of public affairs, and was so entitled to be styled a "judge" (Judg. iv. 4). The active part taken by Jezebel in the government of Israel (1 K. xviii. 13, xxi. 25), and the usurpation of the throne of Judah by Athaliah (2 K. xi. 3), further attest the latitude allowed to women in public life.

The management of household affairs devolved mainly on the women. They brought the water from the well (Gen. xxiv. 15; 1 Sam. ix. 11), attended to the flocks (Gen. xxix. 6, etc.; Ex. ii. 16), prepared the meals (Gen. xviii. 6; 2 Sam. xiii. 8), and occupied their leisure hours in spinning (Ex. xxxv. 26; Prov. xxxi. 19) and making clothes, either for the use of the family (1 Sam. ii. 19; Prov. xxxi. 21), for sale (Prov. xxxi. 14, 24), or for charity (Acts ix. 39). The value of a virtuous and active housewife forms a frequent topic in the book of Proverbs (xi. 16, xii. 4, xiv. 1, xxxi. 10, etc.). Her influence was of course proportionably great; and, where there was no second wife, she controlled the arrangements of the house, to the extent of inviting or receiving guests on her own motion (Judg. iv. 18; 1 Sam. xxv. 18, etc.; 2 K. iv. 8, etc.). The effect of polygamy was to transfer female influence from the wives to the mother, as is incidentally shown in the application of the term *gebîreh* (literally meaning *powerful*) to the queen mother (1 K. ii. 19, xv. 13; 2 K. x. 13, xxiv. 12; Jer. xiii. 18, xxix. 2). Polygamy also necessitated a separate establishment for the wives collectively, or for each individually. Thus in the palace of the Persian monarch there was a "house of the women" (Esth. ii. 9) which was guarded by eunuchs (ii. 3); in Solomon's palace the harem was connected with, but separate from, the rest of the building (1 K. vii. 8); and on journeys each wife had her separate tent (Gen. xxxi. 33). In such cases it is probable that the females took their meals apart from the males (Esth. i. 9); but we have no reason to conclude that the separate system prevailed generally among the Jews. The women were present at festivals, either as attendants on the guests (John xii. 2), or as themselves guests (Job i. 4; John ii. 3); and hence there is good ground for concluding that on ordinary occasions also they joined the males at meals, though there is no positive testimony to that effect.

Further information on the subject of this article is given under the heads DEACONESS, DRESS, HAIR, MARRIAGE, SLAVE, VEIL, and WIDOW.

W. L. B.

WOOD. [FOREST.]

* WOOF. [WEAVING.]

WOOL (צֶמֶר; ἔριον). Wool was an article of the highest value among the Jews, as the staple material for the manufacture of clothing (Lev. xiii. 47; Deut. xxii. 11; Job xxxi. 20; Prov. xxxi. 13; Ez. xxxiv. 3; Hos. ii. 5). Both the Hebrew terms, *tsemer* and *gêz*, imply the act of shearing, the distinction between them being that the latter refers to the "fleece" (Deut. xviii. 4; Job xxxi. 20), as proved by the use of the cognate *gizzah*, in Judg. vi. 37–40, in conjunction with *tsemer*, in the sense of "a fleece of wool." The importance of wool is incidentally shown by the notice that Mesha's tribute was paid in a certain number of rams "with the wool" (2 K. iii. 4), as well as by its being specified among the first-fruits to be offered to the priests (Deut. xviii. 4). The wool of Damascus was highly prized in the mart of Tyre (Ez. xxvii. 18); and is compared in the LXX. to the wool of Miletus (ἔρια δὲ Μιλήτου), the fame of which was widely spread in the ancient world (Plin. viii. 73; Virg. *Georg.* iii. 306, iv. 334). Wool is occasionally cited as an image of purity and brilliancy (Is. i. 18; Dan. vii. 9; Rev. i. 14), and the flakes of snow are appropriately likened to it (Ps. cxlvii. 16). The art of dyeing it was understood by the Jews (Mishna, *Shab.* 1, § 6).

W. L. B.

WOOLEN (LINEN and). Among the laws against unnatural mixtures is found one to this effect: "A garment of mixtures [שַׁעַטְנֵז, *shaatnéz*] shall not come upon thee" (Lev. xix. 19); or, as it is expressed in Deut. xxii. 11, "thou shalt not wear *shaatnéz*, wool and flax together." Our version, by the help of the latter passage, has rendered the strange word *shaatnéz* in the former "of linen and woolen;" while in Deut. it is translated "a garment of divers sorts." In the Vulgate the difficulty is avoided; and κίβδηλος, "spurious" or "counterfeit," the rendering of the LXX., is wanting in precision. In the Targum of Onkelos the same word remains with a slight modification to adapt it to the Chaldee; but in the Peshito-Syriac of Lev. it is rendered by an adjective, "motley," and in Deut. a "motley garment," corresponding in some degree to the Samaritan version, which has "spotted like a leopard." Two things only appear to be certain about *shaatnéz* — that it is a foreign word, and that its origin has not at present been traced. Its signification is sufficiently defined in Deut. xxii. 11. The derivation given in the Mishna (*Cilaim*, ix. 8), which makes it a compound of three words, signifying "carded, spun, and twisted," is in keeping with Rabbinical etymologies generally. Other etymologies are proposed by Bochart (*Hieroz.* pt. i. b. 2, c. 45), Simonis (*Lex. Heb.* and Pfeiffer (*Dub. Vex.* cent. 2, loc. xi.). The last-mentioned writer defended the Egyptian origin of the word, but his knowledge of Coptic, according to Jablonski, extended not much beyond the letters, and little value, therefore, is to be attached to the solution which he proposed for the difficulty. Jablonski himself favors the suggestion of Forster, that a garment of linen and woolen was called by the Egyptians *shontnea* and that this word was bor-

Digitized by Google

rowed by the Hebrews, and written by them in the form *shaatnéz* (*Opusc.* i. 294).

The reason given by Josephus (*Ant.* iv 8, § 11) for the law which prohibited the wearing a garment woven of linen and woolen is, that such were worn by the priests alone (see Mishna, *Cilaim*, ix. 1). Of this kind were the girdle (of which Josephus says the warp was entirely linen, *Ant.* iii. 7, § 2), ephod, and breastplate (Braunius, *de Vest. Sac. Hebr.* pp. 110, 111) of the high-priest, and the girdle of the common priests (Maimonides, *Cilé Hammikdash*, cviii.). Spencer conjectured that the use of woolen and linen inwoven in the same garment prevailed amongst the ancient Zabii, and was associated with their idolatrous ceremonies (*De leg. Heb.* ii. 33, § 3); but that it was permitted to the Hebrew priests, because with them it could give rise to no suspicion of idolatry Maimonides found in the books of the Zabii that "the priests of the idolaters clothed themselves with robes of linen and woolen mixed together" (Townley, *Reasons of the Laws of Moses*, p. 207). By "wool" the Talmudists understood the wool of sheep (Mishna, *Cilaim*, ix. 1). It is evident from Zeph. i. 8, that the adoption of a particular dress was an indication of idolatrous tendencies, and there may be therefore some truth in the explanation of Maimonides. W. A. W.

• **WORD, THE** (ὁ λόγος: *verbum*), John i. 1, 14. This term is employed by St. John in a manner peculiar to himself among the sacred writers, but in such a manner as suggests that among those for whom he immediately wrote, it was already associated with a meaning or meanings somewhat analogous to that which he designed to convey by it. That this was in general the case, there is abundant evidence; but to determine precisely the various shades of meaning attached to it in different quarters by those who lived at the time of the Evangelist or not long before, and to show precisely in what relation his own employment of it stood to existing usage, are among the most difficult problems in the history of religious thought.

The idea of a distinction between the hidden and the manifested Deity, between God as He is in himself and as He makes himself known in creation and revelation, seems to have been early entertained among the Jews, and was naturally suggested by many of the representations of the Old Testament, such, *e. g.* as that of the Angel of Jehovah, Ex. xxiii. 20, 21, and elsewhere, the divine manifestation to Moses, Ex. xxxiii. 20–23, and the passage in which Wisdom is introduced as speaking, Prov. viii., particularly vv. 23–31.

In the apocryphal books of Ecclesiasticus (xxiv. 1, 4, 8, 9) and the Wisdom of Solomon (vii. 22–27, ix. 4, 9), both works of Alexandrine origin, the conception presented in the passage last referred to is developed in such a way as strongly to favor the supposition of a design to indicate a personal being as the medium of the divine communication with the world, and in a special manner (Ecclus.) with Israel. [WISDOM OF SOLOMON, § 7.] But the most prominent form among those in which the idea of the self-revealing God was wont to be expressed among the Jews subsequently to the Captivity, seems to have originated in what was the standing representation of the divine agency employed in the O. T. The earliest statement in relation to this subject is "God *said*, Let there be light, and there was light," Gen. i. 3. In a similar manner not only is the whole work of original creation elsewhere ascribed to the word of God (Ps. xxxiii. 6, 9), but it is his word that maintains the course of nature and accomplishes the purposes of Providence (Ps. cvii. 20, cxlvii. 15, 18; Is. lv. 11). Nowhere however in the O. T. does the use of the term exceed the limits of bold personification. Precisely at what period it began to be employed in Jewish theology as designating a distinct personality it is impossible to ascertain. The earliest instance of what is even apparently such a use occurs in Wisd. Sol. xviii. 15, 16. Speaking of the destruction of the first-born in Egypt, the writer says, "Thine almighty word (ὁ παντοδύναμός σου λόγος) leaped down from heaven, out of thy royal throne, as a fierce man of war into the midst of a land of destruction, bearing thine unfeigned commandment (τὴν ἀνυπόκριτον ἐπιταγήν σου φέρων) as a sharp sword." Here, whatever interpretation we may put upon the passage, the distinction manifestly made between "thine almighty word" and the "unfeigned commandment" interposes a serious difficulty in the way of the explanation resorted to by Grimm (*Exeg. Handb.* in loc.), that the whole is to be resolved into a "rhetorico-poetical personification of the divine will and agency in the infliction of punishment." This representation, however, it should be added, is wholly without a parallel, either in the same or in any nearly contemporary work. The passages Wisd. Sol. ix. 1, xvi. 12, 26; Ecclus. xliii. 26, xlviii. 3, 5 — comp. 2 Pet. iii. 5, 7; Heb. xi. 3 — exhibit nothing essentially different from the usage of the O. T., and the same is true of those passages in the book of Enoch where "the word" is spoken of (*e. g.* xiv. 24, xci. 1, cii. 1; see Hilgenfeld, *Die jüd. Apokalyptik*, p. 105, note 2). The passage in Enoch xc. 38, is probably corrupt; see Dillmann *in loc.*

Among the Jews of Palestine the fact of the early prevalence of some conception of the Word as a distinct hypostasis has been by many very confidently inferred from the Targums or Chaldee paraphrases of portions of the O. T. These writings, although their claims to antiquity have been of late years considerably reduced [VERSIONS, ANCIENT (TARGUM)], doubtless represent long-standing Jewish tradition, and it is among their most remarkable characteristic features that whenever God is spoken of in the Heb. especially as interposing in the affairs of men, the expression מֵימְרָא דַיְיָ, *Mêmrâ da-Yêyâ* (sometimes דִּבּוּרָא, *Dibbûrâ*), "the word of Jehovah," is very commonly substituted for the proper divine name.[a] But there are no data from which we may gather the exact form of thought which lay at the foundation of the usage, and the employment of it was plainly determined by no settled rule. Most, if not all the passages in which the expressions above cited occur may be explained by a reference to the principle suggested on

[a] • Interchanged occasionally with other expressions, such as יְקָרָא דַיְיָ, *Yekârâ da-Yêyâ*, שְׁכִינְתָּה דַיְיָ *Shechinath da-Yêyâ*, "the majesty or glory of Jehovah." The statement sometimes made that the מֵימְרָא דַיְיָ, "word of Jehovah," is in the Targums expressly identified with the Messiah can hardly be sustained D. & T.

p. 3404 *b* of this work (comp. pp. 3406 *b*, 3418 *a*), namely, the repugnance of the writers to bring the Divine Being into too close contact, as it were, with man. Comp. SHECHINAH.

The writings of Philo, the Jew of Alexandria, who flourished in the former half of the first century, present the earliest approximation to a definite doctrine of the Word. His system, if system it may be called, is a singular combination of Pythagoreanism, Platonism, Stoicism, and the Emanationism of the East with the doctrines of the O. T. Scriptures. Of this system the doctrine of the Logos[a] has been styled the central point, and it is often presented here in terms which bear a striking resemblance to the representations of St. John, although quite commonly a careful examination shows that the resemblance lies in the expression rather than in the thought.[b] That the Logos-doctrine of St. John is in some way connected with that of Philo, admits of no reasonable doubt. But the manifold incongruities,[c] not to say self-contradictions, to be found in the writings of the latter, the extraordinary latitude which he manifestly allows himself in his representations, and above all, the wide contrast presented by his whole style of thinking to that exhibited in the Fourth Gospel,[d] forbid us to believe that the author of that Gospel can have been indebted to the Alexandrian philosopher for any fundamental element of doctrine.

Whatever may have been the connection between the doctrine of the Logos as found in the writings of St. John, and the use that had been already made of the term in various quarters, it is very evident that in its essential features that doctrine was something wholly new to the world. It involved the revelation of a fact for which language furnished no entirely adequate expression. In such a case there are two courses open to the writer. He must either invent a new term to designate the new thought to be conveyed, or he must appropriate a term already employed in a sense somewhat related to that he wishes to express, and he must indicate in some way the limitations or enlargements of significance that are necessary to make it an adequate exponent of his meaning. The latter course is adopted by St. John, in accordance with the common practice of the sacred writers. In the term Logos and its Chaldee equivalents, as employed by the Jews of Palestine and Egypt, he finds the nearest approximation to such an expression as he needs in order to set forth his own conception of the being that has become incarnate in Jesus Christ. But the term is employed in a great variety of ways, at best indefinitely, and when most definitely, always in a sense more or less diverse from that which it is his object to convey. The necessity is thus laid upon him, in appropriating this term to his own purpose, to guard carefully against being misunderstood, and to make explicit statements in respect to those points where the term, as commonly employed, is likely either to fall short of fully conveying his own idea, or to suggest some erroneous conception of it. Accordingly, in announcing, by way of introduction to his Gospel, the doctrine of the Word, as that apparently which lies at the foundation of the whole history he is about to give, he first of all declares, with manifest reference to Gen. i. 1, "In the beginning *was* (Ἐν ἀρχῇ ἦν) the Word." Here, as in the opening of his first epistle, is distinctly brought to view the great fact of the uncreated, and therefore the eternal, existence of the Logos. Next follows a statement of the intimate relation which the Logos sustains to God (καὶ ὁ λόγος ἦν πρὸς τὸν Θεόν), and notwithstanding the distinction thus implied, it is immediately added, "the Word *was* God." Then as if to guard against the misapprehension being entertained that the distinction indicated as existing in the divine nature had originated in time, there is subjoined the affirmation "The same was *in the beginning* with God." To pursue further the account given of the Word in the sublime prologue of the Evan-

---

[a] * The selection of this term by Philo was doubtless determined by a reference to the peculiar use of it in the O. T. above alluded to. In accordance with the usage of Plato, from whom his conception of the Logos in its main features was derived, νοῦς was the expression which, but for this consideration, he would naturally have employed. D. S. T.

[b] * Thus the Logos is represented as the Son of God (*De Prof.* c. 20, *Opp.* i. 562 ed Mang.), the eldest Son, the first-begotten, πρεσβύτατος υἱός, πρωτόγονος (*De Conf. Ling.* cc. 14. 28, i. 414, 427; *De Agric.* c. 12, i. 308; *De Somn.* lib. i. c. 37, i. 653); the image of God, εἰκὼν θεοῦ (*De Opif. Mundi*, c. 8, i. 6; *De Conf. Ling.* c. 20, i. 419; *De Somn.* lib. i. c. 41, i. 656, and often elsewhere; his "eternal image," *De Conf. Ling.* c. 28, i. 427); the instrument by which the world was made, ὄργανον δι' οὗ ὁ κόσμος κατεσκευάσθη (*De Cherub.* c. 35, i. 162, where note Philo's distinction between τὸ ὑφ' οὗ, τὸ ἐξ οὗ, τὸ δι' οὗ, and τὸ δι' ὅ, as denoting respectively the primary or efficient cause, the material, the instrument or intermediate agent, and the end or final cause; comp. *Legg. Alleg.* lib. iii. c. 31, i 106, σκιὰ θεοῦ ὁ λόγος αὐτοῦ ἐστιν, ᾧ καθάπερ ὀργάνῳ προσχρησάμενος ἐκοσμοποίει, also *De Migr. Abr.* c. 1, i. 427; *De Monarch.* lib. ii. c. 5, i. 225); God's viceregent, ὕπαρχος, upon whom all things depend (*De Agric.* c. 12, i. 308; *De Somn.* lib. i. c. 41, i. 656); the interpreter of God, ἁρμηνεὺς καὶ προφήτης θεοῦ (*Legg. Alleg.* lib. iii. c. 74, i. 128; *Quod Deus sit immut.* c. 29, i. 298; *De Nom. Mut.* p. 8, i. 581); the light, φῶς (*De Somn.* lib. i. c. 12 . 632); the fountain of wisdom, σοφίας πηγή, from which those who draw obtain everlasting life, ζωὴν ἀΐδιον (*De Prof.* c. 18, i. 560); the intercessor for man, ἱκέτης τοῦ θνητοῦ, and mediator between God and the world, separating and yet connecting both (*Quis Rerum Div. Hæres*, c. 42, i. 501 f.); high-priest, ἀρχιερεύς, free from all sin (*De Prof.* cc. 20, 21, i. 562 f.; *De Somn.* lib. i. c. 37, i. 653), and perhaps advocate or paraclete, παράκλητος (*De Mose*, lib. iii. c. 14, ii 155), but in this passage some understand the term to be applied to the world as "the son of God;" comp. Mangey's note. The Logos is also called by Philo θεός, "God," or rather, "a divine being." the term being used by him in a lower sense (*De Somn.* lib. i. c. 38, i. 655, comp. *Legg. Alleg.* lib. iii. c. 73, i. 128; δεύτερος θεός, "a second God," *Fragm.* ap. Euseb. *Præp. Ev.* vii. 12, *Opp.* ii. 635). D. S. T.

[c] * A single illustration of these incongruities may suffice. While Philo expressly identifies the Logos with the Wisdom of God (*Legg. Alleg.* lib. i. c. 19, *Opp.* i. 56, and elsewhere), he also represents Wisdom as the spouse of God (*De Ebrietate*, c. 8, i. 361) and the mother of the Logos (*De Prof.* c. 20, i. 562). D. S. T.

[d] * In illustration of the radical difference between the religious system of Philo and that of St. John, it needs only to be stated that the idea of a personal Messiah finds no place in his writings, and his idea of the creation precludes the necessity of such a Messiah. Contrast too his conception of God as a being devoid of all qualities (*Quod Deus sit immut.* c. 11, *Opp.* i. 281) with such passages as John iii. 16, xvi. 27; 1 John iv 9. D. S. T.

gelist, would make it necessary to trench too much upon the province of the commentator. The main purpose of this article is to point out in general the probable relation of St. John's doctrine upon this subject to the previous history of the employment of the term, and to show in what manner it may be supposed that his own representations have been affected by existing tendencies of thought. While in the view above presented of the way in which his own special usage of the term was probably determined, nothing has been said of its fitness in its more ordinary acceptations for the purpose to which he applies it, we are under no necessity of supposing that in his selection of it, he had no regard to its more common significance, whether in the language of philosophy or in that of every-day life, as contributing to make it suitable for his purpose. It is, in particular, far from improbable that the import of λόγος as being preëminently the revelation of thought may have been distinctly in his mind, as most highly fit to be associated with Him who is The Truth revealed.[a]

The explanation of ὁ λόγος as = ὁ λέγων, and likewise that adopted by Beza, Tittmann, and others, as = ὁ λεγόμενος, or ὁ ἐπαγγελθείς, *the promised one*, are wholly unsustained by usage. Nor is there any valid foundation for supposing, as many do, that the term was adopted by St. John on the ground of its being specially suited, in certain of its acceptations, to express the idea of the Divine Reason. It should be added, however, that not only was the Evangelist furnished through the already prevailing conceptions of the Word, with the most suitable expression of his great idea, but he was thus enabled to avail himself of whatever there was of truth connected with past speculations upon the subject, and to show how his own doctrine effectually met the difficulties which had been felt so long, and which attempts had been so variously made to meet. It was as if he had said to those of his readers whom he more immediately had in view, What you have vainly sought to find, and what you may think that in your conception of the Word, you have found, I make known to you in the history of Jesus Christ.

Indeed, it is not in his presentation of the doctrine of the Word alone, that we find the indications of such a design. In all his writings we are met by the recurrence of peculiar phrases and representations (many of them often repeated), which stand connected in such a manner with systems of error that came to their full development only in a subsequent age, that we are enabled both to discern the germs of those systems as already in being in his own time, and to trace their origin in preceding thought, at the same time that we are called to note the admirable skill with which the inspired writer, without resorting to the form of polemics, effectually guards the truth against assault, and warns the dangers which threaten it into a source of strength. D. S. T.

[a] Many works relating to the subject of this article are referred to under JOHN, GOSPEL OF, vol. I. p. 1439. Among the writers there named, Lücke and Dorner, Niedner and Bucher, Stuart and Norton, are particularly worthy of consultation. Of the commentators on the Gospel of John, besides Lücke, the following are perhaps the most instructive in reference to the doctrine of the Logos: Grotius, Le Clerc (on John i. 1–18 in his Latin translation of Hammond, i. 391 ff., 2d ed.; comp his *Epist. Crit.* vii.–ix.), Whitby, Wetstein, Paulus, Kuinoel (who gives a detailed view of the earlier literature), Tholuck, De Wette, Meyer, and Baumgarten-Crusius. Out of the host of other writers who have treated of this subject, the following may be selected as worthy of notice: C. Sandius, *Diss. de λόγῳ*, appended to his *Interp. Paradoxa in Quat. Evang.*, Cosmop. [Amst.], 1670, pp. 259–303. Joh. Saubert, *Diss. de Voce λόγος ad Joh.* i. 1, Altorf., 1687, reprinted in Menthen's *Thesaurus* (supplementary to the *Critici Sacri*), ii. 347–362. (P. Allix,) *Judgment of the Ancient Jewish Church against the Unitarians*, Lond. 1699, 2d ed. 1821 (untrustworthy). (Souverain,) *Le Platonisme dévoilé*, Cologne, 1700; Eng. trans., *Platonism Unveiled*, n. p. 1700; German translation by J. F. C. Löffler, *Versuch üb. d. Platonismus d. Kirchenväter*, 2te Aufl., 1792, with an Appendix by the translator. Paulus, *Die Gottheit als Lehrer durch Werke u. Worte*, Joh. i. 1–18, in his *Memorabil.* viii. 94–198 (1796); see also his *Commentar* (1812). Keil, *De Λόγῳ*, in his *Opusc. Acad.* (1821), pp. 483–531. F. G. Süskind, *Etwas üb. d. neueren Ansichten der Stelle Joh.* i. 1–14, in his *Mag. f. christl. Dogm. u. Moral*, x. 1–91 (1803). Bertholdt, *Christologia Judæorum*, etc. Erl. 1811, pp. 104–134 (uncritical). C. W. Upham, *Letters on the Logos*, Bost. 1828. Bäumlein, *Versuch die Bedeutung des johan. Logos aus den Religionssystemen des Orients zu entwickeln*, Tüb. 1828. (Bäumlein now confesses, *Com. üb. d. Ev. d. Joh.*, p. 23, that his representations in this work were drawn from unreliable sources — the *Ouspnek'hat* and Kleuker's *Zendavesta*.) E. Burton, *Inquiry into the Heresies of the Apostolic Age* (Bampton Lectures), Lect. vii. Oxf. 1829. J. Pye Smith, *Scripture Testimony to the Messiah*, 5th ed. Edin. 1859, i. 341–350 (Chaldee Targums), 363–386 (Philo), and elsewhere; comp. W. Hincks's *Review* of this work in the *Monthly Repos.* for 1831, reprinted separately, Lond. 1832. J. F. Denham, *On the Doctrine of the Logos*, in Kitto's *Journ. of Sac. Lit.* for Jan. 1849; iii. 107–135 (superficial and inaccurate). James Strong, two arts. in the *Meth. Quar. Rev.* for July and Oct. 1851. G. F. Simmons, *Six Sermons*, Bost. 1856, pp. 31–60. M. Nicolas, *Des Doctrines religieuses des Juifs*, etc., Par. 1860, pp. 143–215; comp. art. in *Christ. Exam.* for Jan. 1863, on *The Palestinian Word*, founded on Nicolas, and erroneously identifying the *Logos* of Philo with the *Memra* of the Targums. A. Lamson, *Church of the First Three Centuries*, 2d ed. Bost. 1865, p. 58 ff. H. L. Mansel, art. *Philosophy* (Greek), in Kitto's *Cycl. of Bibl. Lit.*, 3d ed., iii. 520–531. Liddon, *The Divinity of our Lord* (Bampton Lect. 1866), 2d ed. 1868, p. 59 ff., 226 ff. Jos. Langen (Cath.), *Das Judenthum in Palästina zur Zeit Christi* (1866), pp. 248–281. L. T. Schulze, *Vom Menschensohn u. vom Logos*, Gotha, 1867 (dogmatic).

On the use of σοφία, λόγος, and πνεῦμα ἅγιον in the Apocrypha, see Brotschneider, *System. Darstellung d. Dogm.* u. s. w. *d. apocr. Schriften d*

[a] The supposition entertained by many, that, in the designation The Word, as understood with some reference to its common acceptation, it is intended to set forth an inward relation of the Divine Being to Himself, "the principle," as Tholuck expresses it, "through which God is revealed to Himself," would, if admitted, make the declaration negatory, "The Word was *with* God." D. S. T.

The passages relied on in proof that the Targumists regarded the *Mêmrâ da-Yĕyâ*, "Word of Jehovah," as a being or subsistence distinct from God, the medium of his revelations to man, will be found in the works of Allix, Bertholdt, J. P. Smith, and Langen, as referred to above, also in Gfrörer's *Jahrhundert des Heils* (1838), i. 307–318, and the Introductions to Etheridge's Trans. of the *Targums on the Pentateuch*, 2 vols. Lond. 1862–65. In opposition to this view, which appears to be wholly untenable, see the valuable *Diss.* of Saubert, *ubi supra*, p. 351 ff.; Lightfoot, *Hor. Hebr.* on John i. 1; J. G. Carpzov, *Crit. Sac. V. T.* (1748), p. 479 ff.; Süskind, *ubi supr.* p. 16 ff.; Faulus, *Comm. üb. d. Ev. d. Joh.* (1812), pp. 8–18, correcting his earlier representations in the *Memorab.* viii. 141 ff.; E. T. (= G.) Bengel, *Opusc. Acad.* (1834), p. 398 ff.; Burton, *Bampt. Lect.* (1829), p. 221; Noyes in the *Christ. Exam.* for May, 1836, p. 233 f.; Stuart in the *Bibl. Sacra* for Jan. 1850, p. 20 ff.; and Bucher (Cath.), *Des Apost. Johannes Lehre vom Logos* (1856), pp. 108–132, who discusses the matter pretty thoroughly. See also Levy's *Chald. Wörterb. üb. d. Targ.* ii. 32 (1868). Some of the writers referred to above find the *Memra* hypostasized in the *later* Targums, though not the earlier; but there seems to be no good ground for the distinction. The prize-essay of S. Maybaum, *Die Anthropomorphien u. Anthropopathien bei Onkelos u. d. spätern Targumim mit besond. Berücksicht. der Ausdrücke Memra, Jekara u. Schechinta*, Bresl. 1870, I have not yet seen. The older literature of the subject is given in Wolf's *Bibl. Hebr.* ii. 1185 ff. That the *Memra* is identified by the Targumists with the *Messiah* has been maintained by some, not only without any plausible reason, but in opposition to the clearest passages; see the Jerusalem Targ. on Ex. xii. 42; Pseudo-Jonathan on Deut. xxx. 4; and Jonathan ben Uzziel on Is. xlii. 1.[a]

On the Angel of Jehovah in the Old Test. see the references under ANGELS, vol. i. p. 98. Both on this subject, and on the use of the terms *Shechinah* and *Metatron* in the later Jewish writings, the reader is particularly recommended to consult Dr. Noyes's review of Hengstenberg in the *Christ. Examiner* for May and July, 1836. On the later Jewish notions generally, see the literature under the art. MESSIAH. A.

**WORM**, the representative in the A. V. of the Hebrew words *Sâs*, *Rimmâh*, and *Tôlê'âh*, *Tôlâ*, or *Tôlâath*, occurs in numerous passages in the Bible. The first-named term, *Sâs* (סָס: σής: *tinea*) occurs only in Is. li. 8, "For the *'âsh* (עָשׁ) shall eat them up like a garment, and the *sâs* shall eat them like wool." The word probably denotes some particular species of moth, whose larva is injurious to wool, while perhaps the former name is the more general one for any of the destructive *tineæ* or "clothes moths." For further information on the subject the reader is referred to MOTH.

2. *Rimmâh* (רִמָּה: σκώληξ, σῆψις, σαπρία: *vermis, putredo, tinea*). The manna that the dis-

---

[a] The student should be on his guard against the mistranslations which he will find, in various writers, of the Targums on Ps. ex. 1, Is. xlii. 1, Gen. xii. 22, xxviii. 20, xlix. 18, and Is. xvi. 1. The phrase מֵימְרָא מִן קֳדָם יְיָ or מֵימְרָא דַיְיָ, "a" or "the word from before the Lord" (Gen. xx. 3, Num. xxiii. 4, comp. Etheridge, i. 17, ii. 16) may also mislead but: note the similar use with פֻּרְקָנָם, *pithgâm*, Jer. l. 2, Ez. i. 3, etc., and see, for other illustrations of the idiom, Targ. on Is. lix. 1, and Gen. i. 27 (Jerus.). A

Digitized by Google

obedient Israelites kept till the morning of a week-day "bred worms" (תּוֹלָעִים), and stank (Ex. xvi. 20); while of that kept over the Sabbath and gathered the night before, it is said that "it did not stink, neither was there any worm (רִמָּה) therein." The Hebrew word is connected with the root רָמַם "to be putrid" (see Gesenius, *Thes.* s. v.), and points evidently to various kinds of maggots, and the larvæ of insects which feed on putrefying animal matter rather than to earth-worms; the words in the original are clearly used indiscriminately to denote either true *annelida*, or the larval condition of various insects. Thus, as may be seen above, *rimmáh* and *tólé'ah* are both used to express the maggot or caterpillar, whatever it might have been that consumed the bad manna in the wilderness of Sin. Job, under his heavy affliction, exclaims, "My flesh is clothed with *rimmáh*" (vii. 5; see also xvii. 14); there is no reason to doubt that the expression is to be understood literally; a person in Job's condition would very probably suffer from *entozoa* of some kind. In Job xxi. 26, xxiv. 20, there is an allusion to worms (insect larvæ) feeding on the dead bodies of the buried; our translators in the well-known passage (xix. 26) — "And though after my skin worms destroy this body" — have rather over-interpreted the words of the original, "My skin shall have been consumed." [a]

The patriarch uses both *rimmáh* and *tólé'ah* (תּוֹלָעָה) in ch. xxv. 6, where he compares the estate of man to a *rimmáh*, and the son of man to a *tólé'ah*. This latter word, in one or other of its forms (see above), is applied in Deut. xxviii. 39 to some kinds of larvæ destructive to the vines: "Thou shalt plant vineyards . . . . but shalt not gather the grapes, for the *tôlá'ath* shall eat them." Various kinds of insects attack the vine, amongst which one of the most destructive is the *Tortrix vitisana*, the little caterpillar of which eats off the inner parts of the blossoms, the clusters of which it binds together by spinning a web around them. The "worm" which is said to have destroyed Jonah's gourd was a *tôlá'ath* (Jonah iv. 7). Michaelis (*Suppl.* p. 2189) quotes Rumphius as asserting that there is a kind of black caterpillar, which, during sultry rainy weather, does actually strip the plant of its leaves in a single night. In Is. lxvi. 24 allusion is made to maggots feeding on the dead bodies of the slain in battle. The words of the prophet are applied by our Lord (Mark ix. 44, 46, 48) metaphorically to the stings of a guilty conscience in the world of departed spirits.

The death of Herod Agrippa I. was caused by worms (σκωληκόβρωτος, Acts xii. 23); according to Josephus (*Ant.* xix. 8), his death took place five days after his departure from the theatre. It is curious that the Jewish historian makes no mention of worms in the case of Agrippa, though he expressly notes it in that of Herod the Great (*Ant.* xvii. 6, § 5). A similar death was that of Antiochus Epiphanes (2 Macc. ix. 9; see also Eusebius, *Eccl. Hist.* viii. 16, and Lucian *Pseudomant.* i. p. 904; compare Wetstein on Acts xii. 23). Whether the worms were the cause or the result of the disease is an immaterial question. The "Angel of the Lord struck Herod" with some disease, the issue of which was fatal, and the loathsome spectacle of which could not fail to have had a marked humiliating effect on his proud heart. W. H.

WORMWOOD (לַעֲנָה, *la'anáh*: πικρία, χολή, ὀδύνη, and ἀνάγκη: *amaritudo absynthium*). The correct translation of the Heb. word occurs frequently in the Bible, and generally in a metaphorical sense, as in Deut. xxix. 18, where of the idolatrous Israelites it is said, "Lest there be among you a root that beareth wormwood" (see also Prov. v. 4). In Jer. ix. 15, xxiii. 15; Lam. iii. 15, 19, wormwood is symbolical of bitter calamity and sorrow; unrighteous judges are said to "turn judgment to wormwood" (Am. v. 7). The Orientals typified sorrows, cruelties, and calamities of any kind by plants of a poisonous or bitter nature. [GALL, i. 861.] The name of the star which at the sound of the third angel's trumpet fell upon the rivers, was called Wormword (Ἄψινθος; Rev. viii. 11). Kitto (*Phys. Hist. of Palestine*, p. 215) enumerates four kinds of wormwood as found in Palestine — *Artemisia nilotica*, *A. Judaica*, *A. fruticosa*, and *A. cinerea*. Rauwolf speaks of some kind of wormwood under the name of *Absinthium santonicum Judaicum*, and says it is very common in Palestine; this is perhaps the *Artemisia Judaica*. The Hebrew *Ladnah* is doubtless generic, and denotes several species of Artemisia (Celsius, *Hierob.* i. p. 480; Rosenmüller, *Bibl. Bot.* p. 116). W. H.

• **WORSHIP** (derived from *worth*, and the termination *ship*) originally = *worthiness*, became used to denote the honor or reverence of which one was regarded as worthy, and, as a verb, signified to pay such honor or reverence; the word not being originally restricted, as now, to religious worship. Thus Wycliffe translates Matt. xix. 19, "*Worschip* thi fadir and thi modir," and in the marriage service of the Church of England the bridegroom says to the bride "with my body I thee *worship*." The noun "worship" is so used in the A. V. Josh. v. 14; Luke xiv. 10; and the verb occurs in Matt. xviii. 26 and often elsewhere as the rendering of προσκυνέω when it denotes the civil reverence or homage expressed by the oriental custom of prostration. [ADORATION; ALTAR; PRAYER; PRIEST; SACRIFICE, etc.] A.

**WORSHIPPER.** A translation of the Greek word νεωκόρος, used once only, Acts xix. 35; in the margin "Temple-keeper." The *neocoros* was originally an attendant in a temple, probably entrusted with its charge (Eurip. *Ion*, 115, 121, ed. Dind.; Plato, *Leg.* vi. 7, Bekk.; Theodoret, *Hist. Eccl.* iii. 14, 16; Pollux, i. 14; Philo, *De Prov. Sac.* 6, ii. 237; Hesychius explains it by ὁ τὸν ναὸν κοσμῶν, καρεὶν γὰρ τὸ σαίρειν, Suidas, κοσμῶν καὶ σιντρεπίζων, ἀλλ' οὐχ' ὁ σαρῶν, ed. Gaisf. p. 2579). The divine honors paid in later Greek times to eminent persons even in their lifetime, were imitated and exaggerated by the Romans under the empire, especially in Asia (Plut. *Lys.* 23; Appian, *Mithr.* 76; Dion Cass. xxxi. 6). The term *neocoros* became thus applied to cities or communities which undertook the worship of particular emperors even in their lifetime; but there is no trace of the special title being applied to any city

[a] The Hebrew is, וְאַחֲרֵי עוֹרִי נִקְּפוּ־זֹאת, i. e. "And after that they shall have consumed this my skin," or, as Davidson renders it, "Yea, after my skin, when this (body) is destroyed" (*Introd. O. T.* ii. p. 227).

Digitized by Google

sefore the time of Augustus. The first occurrence of the term in connection with Ephesus is on coins of the age of Nero (A. D. 54–68), a time which would sufficiently agree with its use in the account of the riot there, probably in 55 or 56. In later times the title appears with the numerical adjuncts δίς, τρίς and even τετράκις. A coin of Nero's time bears on one side Ἐφεσίων νεωκόρων, and on the reverse a figure of the temple of Artemis (Mionnet, *Inscr.* iii. 93; Eckhel, *Doctr. Vet. Num.* ii. 520). The ancient veneration of Artemis and her temple on the part of the city of Ephesus, which procured for it the title of νεωκόρος τῆς Ἀρτέμιδος, is too well known to need illustration: but in later times it seems probable that with the term νεωκόρος the practice of Neocorism became reserved almost exclusively for the veneration paid to Roman emperors, towards whom many other cities also of Asia Minor are mentioned as Neocorists, *e. g.* Nicomedia, Perinthus, Sardis, Smyrna, Magnesia (Herod. I. 26; Strabo, xiv. 640; Aristid. *Or.* xlii. 775, ed. Dind.; Mionnet, *Inscr.* iii. 97, Nos. 281, 285; Eckhel, *De Num.* ii. 520, 521; Boeckh, *Inscr.* 2617, 2618, 2622, 2954, 2957, 2990, 2992, 2993; Krause, *De Civ. Neocoris*; Hofmann, *Lex.* 'Neocoros'). H. W. P.

* WOT and WOTTETH occur repeatedly in the A. V. (Gen. xxi. 26, xxxix. 8, xliv. 15; Exod. xxxii. 1, etc.) as forms of the indicative present of the old verb to *wit* = to "know." [WIST; WIT.] A.

WRESTLING. [GAMES.]

WRITING. It is proposed in the present article to treat, not of writing in general, its origin, the people by whom and the manner in which it was discovered, but simply with reference to the Hebrew race to give such indications of their acquaintance with the art as are to be derived from their books, to discuss the origin and formation of their alphabet, and the subsequent development of the present square character, and to combine with this discussion an account, so far as can be ascertained, of the material appliances which they made use of in writing, and the extent to which the practice prevailed among the people.

It is a remarkable fact that although, with respect to other arts, as for instance those of music and metal working, the Hebrews have assigned the honor of their discovery to the heroes of a remote antiquity, there is no trace or tradition whatever of the origin of letters, a discovery many times more remarkable and important than either of these. Throughout the book of Genesis there is not a single allusion, direct or indirect, either to the practice or to the existence of writing. The word כָּתַב, *câthab*, "to write," does not once occur; none of its derivatives are used; and סֵפֶר, *sêpher*, "a book," is found only in a single passage (Gen. v. 1), and there not in a connection which involves the supposition that the art of writing was known at the time to which it refers. The signet of Judah (Gen. xxxviii. 18, 25) which had probably some device engraven upon it, and Pharaoh's ring (Gen. xli. 42) with which Joseph was invested, have been appealed to as indicating a knowledge quite consistent with the existence of writing. But as there is nothing to show that the devices upon these rings, supposing them to exist, were written characters, or in fact anything more than emblematical figures, they cannot be considered as throwing much light upon the question. That the Egyptians in the time of Joseph were acquainted with writing of a certain kind there is other evidence to prove, but there is nothing to show that up to this period the knowledge extended to the Hebrew family. At the same time there is no evidence against it. The instance brought forward by Hengstenberg to prove that "signets commonly bore alphabetic writings," is by no means so decisive as he would have it appear. It is Ex. xxxix. 30: "And they made the plate of the holy crown of pure gold, and wrote upon it a writing of the engravings of a signet, 'Holiness to the Lord.'" That is, this inscription was engraved upon the plate as the device is engraved upon a signet, in intaglio; and the expression has reference to the manner of engraving, and not to the figures engraved, and therefore cannot be appealed to as proving the existence of alphabetic characters upon Judah's signet or Pharaoh's ring. Writing is first distinctly mentioned in Ex. xvii. 14, and the connection clearly implies that it was not then employed for the first time, but was so familiar as to be used for historic records. Moses is commanded to preserve the memory of Amalek's onslaught in the desert by committing it to writing. "And Jehovah said unto Moses, *Write this* for a memorial *in the book* (not 'a book,' as in the A. V.), and rehearse it in the ears of Joshua." It is clear that some special book is here referred to, perhaps, as Aben Ezra suggests, the book of the wars of Jehovah, or the book of Jashar, or one of the many documents of the ancient Hebrews which have long since perished. Or it may have been the book in which Moses wrote the words of Jehovah (Ex. xxiv. 4), that is the laws contained in chapters xx.–xxiii. The tables of the testimony are said to be "written by the finger of God" (Ex. xxxi. 18) on both sides, and "the writing was the writing of God, graven upon the tables" (Ex. xxxii. 16). It is not clear whether the passage in Ex. xxxiv. 28 implies that the second tables were written by Moses or by God himself. The engraving of the gems of the high-priest's breastplate with the names of the children of Israel (Ex. xxviii. 11), and the inscription upon the mitre (Ex. xxxix. 30) have to do more with the art of the engraver than of the writer, but both imply the existence of alphabetic characters. The next allusion is not so clear. The Israelites were forbidden, in imitation of the idolatrous nations, to put any "brand" (lit. "writing of burning") upon themselves. The figures thus branded upon the skin might have been alphabetical characters, but they were more probably emblematical devices, symbolising some object of worship, for the root כָּתַב, *câthab* (to write), is applied to picture-drawing (Judg. viii. 14), to mapping out a country (Josh. xviii. 8), and to plan-drawing (1 Chr. xxviii. 19). The curses against the adulteress were written by the priest "in *the* book," as before; and blotted out with water (Num. v. 23). This proceeding, though principally distinguished by its symbolical character, involves the use of some kind of ink, and of a material on which the curses were written which would not be destroyed by water. The writing on door-posts and gates, alluded to in Deut. vi. 9, xi. 20, though perhaps to be taken figuratively rather than literally, implies certainly an acquaintance with the art and the use of alphabetic characters. Hitherto, however, nothing has been said of the application of writing to the purposes

Digitized by Google

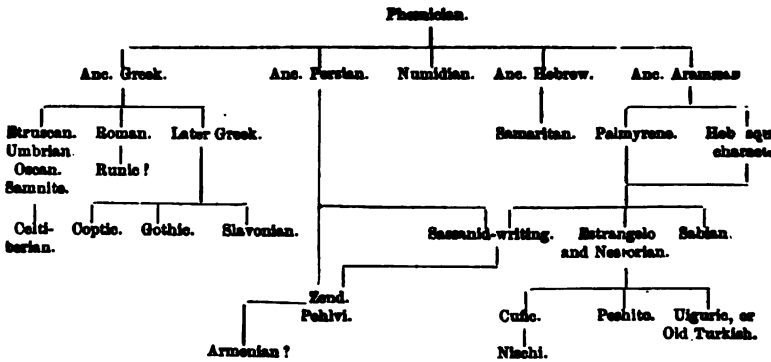
of ordinary life, or of the knowledge of the art among the common people. Up to this point such knowledge is only attributed to Moses and the priests. From Deut. xxiv. 1, 3, however, it would appear that it was extended to others. A man who wished to be separated from his wife for her infidelity, could relieve himself by a summary process. "Let him write her a bill (סֵפֶר *sêpher*, "a book") of divorcement, and give it in her hand, and send her out of his house." It is not absolutely necessary to infer from this that the art of writing was an accomplishment possessed by every Hebrew citizen, though there is no mention of a third party; and it is more than probable that these "bills of divorcement," though apparently so informal, were the work of professional scribes. It was enjoined as one of the duties of the king (Deut. xvii. 18), that he should transcribe the book of the Law for his own private study, and we shall find hereafter in the history that distinct allusions to writing occur in the case of several kings. The remaining instances in the Pentateuch are the writing of laws upon stone covered with plaster, upon which while soft the inscription was cut (Deut. xxvii. 3, 8), the writing of the song of Moses (Deut. xxxi. 24), and of the Law in a book which was placed in the side of the ark (Deut. xxxi. 26). One of the first acts of Joshua on entering the Promised Land was to inscribe a copy of the Law on the stones of the Altar on Mount Ebal (Josh. viii. 32). The survey of the country was drawn out in a book (Josh. xviii. 8). In the time of the Judges we first meet with the professional scribe (סֹפֵר, *sôphêr*), in his important capacity as marshal of the host of warriors (Judg. v. 14), with his staff (A. V. "pen") of office. Ewald (*Poet. Büch.* i. 129) regards *sôphêr* in this passage as equivalent to שֹׁפֵט, *shôphêt*, "judge," and certainly the context implies the high rank which the art of writing conferred upon its possessor. Later on in the history we read of Samuel writing in "the book" the manner of the kingdom (1 Sam. x. 25); but it is not till the reign of David that we hear for the first time of writing being used for the purposes of ordinary communication. The letter (lit. "book") which contained Uriah's death-warrant was written by David, and must have been intended for the eye of Joab alone; who was therefore able to read writing, and probably to write himself, though his message to the king, conveying the intelligence of Uriah's death, was a verbal one (2 Sam. xi. 14, 15). If we examine the instances in which writing is mentioned in connection with individuals, we shall find that in all cases the writers were men of superior position. In the Pentateuch the knowledge of the art is attributed to Moses, Joshua, and the priest alone. Samuel, who was educated by the high-priest, is mentioned as one of the earliest historians (1 Chr. xxix. 29), as well as Nathan the prophet (2 Chr. ix. 29), Shemaiah the prophet, Iddo the seer (2 Chr. xii. 15, xiii. 22), and Jehu the son of Hanani (2 Chr. xx. 34). Letters were written by Jesebel in the name of Ahab and sealed with his seal (1 K. xxi. 8, 9, 11); by Jehu (2 K. x. 6); by Hezekiah (2 Chr. xxx. 1); by Rabshakeh the Assyrian general (2 Chr. xxxii. 17); by the Persian satraps (Ezr. iv. 6, 7, 8); by Sanballat (Neh. vi. 5), Tobiah (Neh. vi. 19), Haman (Esth. viii. 5), Mordecai and Esther (Esth. ix. 29). The prophet Elijah wrote to Ahab (2 Chr. xxi. 12); Isaiah wrote some of the history of his time (2 Chr. xxvi. 22); Jeremiah committed his prophecies to writing (Jer. li. 60), sometimes by the help of Baruch the scribe (Jer. xxxvi. 4, 32); and the false prophet, Shemaiah the Nehelamite, endeavored to undermine Jeremiah's influence by the letters which he wrote to the high-priest (Jer. xxix. 25). In Is. xxix. 11, 12, there is clearly a distinction drawn between the man who was able to read, and the man who was not, and it seems a natural inference from what has been said that the accomplishments of reading and writing were not widely spread among the people, when we find that they are universally attributed to those of high rank or education, kings, priests, prophets, and professional scribes.

In addition to these instances in which writing is directly mentioned, an indirect allusion to its early existence is supposed to be found in the name of certain officers of the Hebrews in Egypt, שֹׁטְרִים, *shôtêrîm*, LXX. γραμματεῖς (Ex. v. 6, A. V. "officers"). The root of this word has been sought in the Arabic سطر, *satara*, "to write," and its original meaning is believed to be "writers," or "scribes;" an explanation adopted by Gesenius in his *Lexicon Hebraicum* and *Thesaurus*, though he rejected it in his *Geschichte der Hebräischen Sprache und Schrift*. In the name Kirjath-Sepher (Booktown, Josh. xv. 15) the indication of a knowledge of writing among the Phœnicians is more distinct. Hitzig conjectures that the town may have derived its name from the discovery of the art, for the Hittites, a Canaanitish race, inhabited that region, and the term Hittite may possibly have its root in the Arabic حتّ, *chatta*, "to write."

The Hebrews, then, a branch of the great Shemitic family, being in possession of the art of writing, according to their own historical records, at a very early period, the further questions arise, what character they made use of, and whence they obtained it. It is scarcely possible in the present day to believe that, two centuries since, learned men of sober judgment seriously maintained, almost as an article of faith, that the square character, as it is known to us, with the vowel points and accents, was a direct revelation from heaven, and that the commandments were written by the finger of God upon the tables of stone in that character. Such, however, was really the case. But recent investigations have shown that, so far from the square character having any claim to such a remote antiquity and such an august parentage, it is of comparatively modern date, and has been formed from a more ancient type by a gradual process of development, the steps of which will be indicated hereafter, so far as they can be safely ascertained. What then was this ancient type? Most probably the Phœnician. To the Phœnicians, the daring seamen, and adventurous colonisers of the ancient world, tradition assigned the honor of the invention of letters (Plin. v. 12). This tradition may be of no value as direct evidence, but as it probably originated with the Greeks, it shows that, to them at least, the Phœnicians were the inventors of letters, and that these were introduced into Europe by means of that intercourse with Phœnicia which is implied in the legend of Cadmus, the man of the East. The Phœnician companions of this hero

Digitized by Google

according to Herodotus (v. 58), taught the Greeks many accomplishments, and among others the use of letters, which hitherto they had not possessed. So Lucan, *Phars.* iii. 220: —



> "Phœnices primi, famæ si credimus, ausi
> Mansuram rudibus vocem signare figuris."

Pliny (vii. 56) was of opinion that letters were of Assyrian origin, but he mentions as a belief held by others that they were discovered among the Egyptians by Mercury, or that the Syrians had the honor of the invention. The last-mentioned theory is that given by Diodorus Siculus (v. 74), who says that the Syrians invented letters, and from them the Phœnicians, having learned them, transferred them to the Greeks. On the other hand, according to Tacitus (*Ann.* xi. 14), Egypt was believed to be the source whence the Phœnicians derived their knowledge. Be this as it may, the voice of tradition represents the Phœnicians as the disseminators, if not the inventors of the alphabet. Whether it came to them from an Aramæan or Egyptian source can at best be but the subject of conjecture. It may, however, be reasonably inferred that the ancient Hebrews derived from, or shared with, the Phœnicians the knowledge of writing and the use of letters. The two nations spoke languages of the same Shemitic family; they were brought into close contact by geographical position: all circumstances combine to render it probable that the ancient Hebrew alphabet was the common possession both of Hebrews and Phœnicians, and this probability is strengthened by the results of modern investigation into the Phœnician inscriptions which have of late years been brought to light. The names of the Hebrew letters indicate that they must have been the invention of a Shemitic people, and that they were moreover a pastoral people may be inferred from the same evidence. Such names as Aleph (an ox), Gimel (a camel), Lamed (an ox-goad), are most naturally explained by this hypothesis, which necessarily excludes the seafaring Phœnicians from any claim to their invention. If, as has been conjectured, they took the first idea of writing from the Egyptians, they would at least have given to the signs which they invented the names of objects with which they themselves were familiar. So far from this being the case, the letters of the Hebrew alphabet contain no trace whatever of ships or seafaring matters: on the contrary, they point distinctly to an inland and pastoral people. The Shemitic and Egyptian alphabets have this principle in common, that the object whose name is given to a letter was taken originally to indicate the letter which begins the name; but this fact alone is insufficient to show that the Shemitic races borrowed their alphabet from Egypt, or that the principle thus held in common may not have been the possession of other nations of a still earlier date than the Egyptians. "The phonetic use of hieroglyphics," says Mr. Kenrick, "would naturally suggest to a practical people, such as the Phœnicians were, a simplification of the cumbrous system of the Egyptians, by dispensing altogether with the pictorial and symbolical use, and assigning one character to each sound, instead of the multitude of homophones which made the reading of the hieroglyphics so difficult; the residence of the 'Phœnician shepherds,' the Hyksos, in Egypt might afford an opportunity for this adaptation, or it might be brought about by commercial intercourse. We cannot, however trace such a resemblance between the earliest Phœnician alphabet known to us, and the phonetic characters of Egypt, as to give any certainty to this conclusion" (*Phœnicia*, pp. 164, 165).

Perhaps all that can be inferred from the tradition that letters came to the Greeks from the Phœnicians, but that they were the invention of the Egyptians, is that the Egyptians possessed an alphabet before the Phœnicians. Wahl, De Wette, and Kopp are inclined to a Babylonian origin, understanding the Σύροι of Diodorus and the *Syri* of Pliny of the Babylonians. But Gesenius has shown this to be untenable, because (1) Pliny distinctly mentions both *Syri* and *Assyrii*, and by no means confounds them; and (2) because the inscription on the seal-stone, on which Kopp based his theory, is nothing more than Phœnician, and that not of the oldest form, but inclining to the somewhat later Aramaic character. This seal-stone or brick contained, besides a cuneiform inscription, some Shemitic characters which were deciphered by Kopp, and were placed by him at the head of his most ancient alphabets (*Bilder und Schriften*, ii. 154). Gesenius, however, read them with a very different result. He himself argues for a Phœnician origin of the alphabet, in opposition to a Babylonian or Aramæan, on the following grounds: 1. That the names of the letters are Phœnician, and not Syrian. Several of the names are found alike in the Hebrew and Aramaic dialects: as for instance, *beth*, *gimel*, *zain*, *nun*, *ain*, *resh*, *shin*, but others are not found in Syriac at all, at least not in the same sense. *Aleph*, in Syriac signifies "a thousand," not "an ox;" *daleth* is not "a door," and for this, as well as for *vau*, *yod*, *mem*, *pe*, *koph*, and *tau*, different words are used. The Greek forms of the names of the letters are somewhat in favor of an Aramaic origin, but there is no proof that they came in this shape from the East, and that they were not so modified by the Greeks themselves. 2. It is not probable that the Aramaic dialect was the language of the inventors; for the letters א ו י נ, which to them were certainly consonants, had become so weak in the Aramaic that they could scarcely any longer appear as such, and could not have been expressed by signs by an inventor who spoke a dialect of this kind. 3. If the Phœnician letters are pictorial, as there seems reason to believe, there is no model, among the old Babylonian discoverers of writing, after which they could have been formed; while, on the other hand, it is extremely probable that the Phœnicians, from their extended commerce, especially with Egypt, adopted an imitation of the Egyptian phonetic hieroglyphics, though they took neither the figures nor the names from this source. The names of some of the letters lead us to a nomad pastoral people, rich in herds: *aleph* (an ox), *gimel* (a camel), *lamed* (an ox-goad), *beth* (a tent), *daleth* (a tent-door), *vau* (a tent-peg), *cheth* (a hurdle or pen). It is a little remarkable that Gesenius did not see that this very fact militates strongly against the Phœnician origin of the letters, and points, as has been observed above, rather to a pastoral than a seafaring people as their inventors. But whether or not the Phœnicians were the inventors of the Shemitic alphabet, there can be no doubt of their just claim to being its chief disseminators; and with this understanding we may accept the genealogy of alphabets as given by Gesenius, and exhibited in the accompanying table.

Digitized by Google

Whatever minor differences may exist between the ancient and more modern Shemitic alphabets, they have two chief characteristics in common: (1.) That they contain only consonants and the three principal long vowels, א, ו, י [which must have been consonants originally. — W. H. W.]; the other vowels being represented by signs above, below, or in the middle of letters, or being omitted altogether. (2.) That they are written from right to left. The Ethiopic, being perhaps a non-Shemitic alphabet, is an exception to this rule, as is the cuneiform character in which some Shemitic inscriptions are found. The same peculiarity of Egyptian writing was remarked by Herodotus. No instance of what is called *boustrophedon* writing — that is in a direction from right to left, and from left to right in alternate lines — is found in Shemitic monuments.

The old Shemitic alphabets may be divided into two principal classes: (1.) The Phœnician, as it exists (*a*) in the inscriptions in Cyprus, Malta, Carpentras, and the coins of Phœnicia and her colonies. It is distinguished by an absence of vowels, and by sometimes having the words divided and sometimes no' (*b.*) In the inscriptions on Jewish coins. (*c* In the Phœnicio-Egyptian writing, with three vowel signs, deciphered by Caylus on the mummy bandages. From (*a*) are derived (*d*), the Samaritan character, and (*e*), the Greek. (2.) The Hebrew-Chaldee character; to which belong (*a*), the Hebrew square character; (*b*), the Palmyrene, which has some traces of a cursive hand; (*c*), the Estrangelo, or ancient Syriac; and (*d*), the ancient Arabic or Cufic. The eldest Arabic writing (the Himyaritic) was perhaps the same as the ancient Hebrew or Phœnician.[a]

It remains now to consider which of all these was the alphabet originally used by the ancient Hebrews. In considering this question it will on many accounts be more convenient to begin with the common square character, which is more familiar, and which from this familiarity is more constantly associated with the Hebrew language and writing. In the Talmud (*Sanh.* fol. 21, 22) this character is called כְּתָב מְרֻבָּע, "square writing," or כְּתָב אַשּׁוּרִית, "Assyrian writing;" the latter appellation being given because, according to the tradition, it came up with the Israelites from Assyria. Under the term Assyria are included Chaldæa and Babylonia in the wider sense; for it is clear that in ancient writers the names *Assyrian* and *Chaldæan* are applied indifferently to the same characters. The letters of the inscription on the tomb of Sardanapalus are called Chaldæan (Athen. xii. 529) and Assyrian (Athen. xii. 469; Arrian, *Exp. Alex.* ii. 5, § 4). Again, the *Assyrian* writing on the pillars erected by Darius at the Bosporus (Her. iv. 87), is called by Strabo *Persian* (xv. 502). Another derivation for the epithet אַשּׁוּרִית, *ashshûrith*, as applied to this writing, has been suggested by Rabbi Judah the Holy, who derives it from מְאֻשָּׁרֶת, *meushshereth*, "blessed;" the term being applied to it because it was employed in writing the sacred books. Another etymology (from אָשַׁר, *ashar*, to be straight), given by the Hebrew grammarian Abraham de Balmis, describes it as the straight, perpendicular writing, so making the epithet equivalent to that which we apply to it in calling it the square character. Hupfeld, starting from the same root, explains the Talmudic designation as merely a technical term used to denote the more modern writing, and as opposed to רַעַץ, *raats*, "broken," by which the ancient character is described.[b] According to him it signifies that which is firm, strong, protected and supported as with forts and walls, referring perhaps to the horizontal strokes on which the letters rest as on a foundation. In this view he compares it with the Ethiopic character, which is called in Arabic حبشى,

a • Schröder (*Phönizische Sprache*, pp. 77, 78) divides the Phœnician remains into four palæographical classes. The first, which he makes provisionally, as he had no monument to put in it, is the original Archaic Phœnician used with little alteration up to the seventh century before Christ. To this class, we may say, belongs the Moabite monument of King Mesha, first given to the public by M. Ganneau in January, 1870. The second class is the Eastern Phœnician, extending from the seventh or sixth century B. C. until the time of Christ. and called by M. de Vogüé the "Sidonian." The third class is the Carthaginian, and the fourth the New Punic of the time of the Roman domination of North Africa and Spain. W. H. W.

b • Probably the Talmud of Venice is right in printing this word דעץ instead of רעץ, from root דּוּץ, "to cut, engrave." W. H. W

"supported." It must be confessed that none of these explanations are so satisfactory as to be unhesitatingly accepted. The only fact to be derived from the word אַשּׁוּרִית is that it is the source of the whole Talmudic tradition of the Babylonian origin of the square character. This tradition is embodied in the following passages from the Jerusalem and Babylonian Talmuds: "It is a tradition: R. Jose says Ezra was fit to have the Law given by his hand, but that the age of Moses prevented it; yet though it was not given by his hand, the writing and the language were: the writing was written in the Syriac tongue, and interpreted in the Syriac tongue (Ezr. iv. 7), and they could not read the writing (Dan. v. 8); from hence it is learned that it was given on the same day. R. Nathan says the Law was given in broken characters (רַעַץ, *raats*), and agrees with R. Jose; but Rab (*i. e.* R. Judah the Holy) says that the Law was given in the Assyrian (*i. e.* the square) character, and when they sinned it was turned into the broken character, and when they were worthy, in the days of Ezra, it was turned to them again in the Assyrian character, according to Zech. ix. 12. It is a tradition: R. Simeon ben Eleazar says, on the account of R. Eleazar ben Parta, who also says, on the account of Eliezer Hammodai, the Law was written in the Assyrian character" (Talm. Jerus. *Megillah*, fol. 71, 72, 73). But the story, as best known, is told in the Babylonian Talmud: "Mar Zutra, or as others Mar Ukba, says, at first the Law was given to Israel in the Hebrew (עִבְרִי, *i. e.* the Samaritan) writing and the holy tongue; and again it was given to them, in the days of Ezra, in the Assyrian writing and the Syrian tongue. They chose for the Israelites the Assyrian writing and the holy tongue, and left to the *Idiotæ* the Hebrew writing and the Syrian tongue. Who are the *Idiotæ*? R. Chasda says, the Cutheans (or Samaritans). What is the Hebrew writing? R. Chasda says, the Libonasah writing" (*Sanhed.* fol. 21, 2; 22, 1). The Libonasah writing is explained by R. Solomon to mean the large characters in which the Jews wrote their amulets and *mezuzoth*. The broken character mentioned above can only apply to the Samaritan alphabet, or one very similar to it. In this character are written, not only manuscripts of the Samaritan Pentateuch, varying in age from the 13th to the 16th century, but also other works in Samaritan and Arabic. The Samaritans themselves call it *Hebrew writing*, in contradistinction to the square character, which they call the writing of Ezra. It has no vowel points, but a diacritical mark called *Marhetono* is employed, and words and sentences are divided. A form of character more ancient than the Samaritan, though closely resembling it, is found on the coins struck under Simon Maccabæus, cir. B. C. 142. Of this writing Gesenius remarks (art. *Palæographie* in Ersch and Gruber's *Encyclopädie*) that it was most probably employed, even in manuscripts, during the whole lifetime of the Hebrew language, and was gradually displaced by the square character about the birth of Christ. An examination of the characters on the Maccabæan coins shows that they bear an extremely close resemblance to those of the Phœnician inscriptions, and in many cases are all but identical with them. The figures of three characters (ר, ם, ס) do not occur, and that of כ is doubtful.

In order to explain the Talmudic story above given, and the relation between the square character and that of the coins, different theories have been constructed. Some held that the square character was sacred, and used by the priests, while the character on the coins was for the purposes of ordinary life. The younger Buxtorf (*De Lit. Hebr. Gen. Ant.*) maintained that the square alphabet was the oldest and the original alphabet of the Hebrews, and that before the Captivity the Samaritan character had existed side by side with it; that during the Captivity the priests and more learned part of the people cultivated the square or sacred character, while those who were left in Palestine adhered to the common writing. Ezra brought the former back with him, and it was hence called Assyrian or Chaldæan. The other was used principally by the Samaritans, though occasionally by the Jews themselves, as is shown by the characters on the Maccabæan coins. This opinion found many supporters, and a singular turn was given to it by Morinus (*De Lingua Primæva*, p. 271) and Loescher (*De Causis Ling. Hebr.* pp. 207, 208), who maintained that the characters on the coins were a kind of tachygraphic writing formed from the square character. Hartmann (*Ling. Einl.* p. 28, &c.) also upheld the existence of a twofold character, the sacred and profane. The favorers of this hypothesis of a double alphabet had some analogies to which they could appeal for support. The Egyptians had a twofold, or even a threefold character. The cuneiform writing of the ancient Persians and Medes was perhaps a sacred character for monuments, the Zend being used for ordinary life. The Arabs, Persians, and Turks, employ different characters according as they require them for letters, poems, or historical writings. But analogy is not proof, and therefore the passage in Is. viii. 1 has been appealed to as containing a direct allusion to the ordinary writing as opposed to the sacred character. But it is evident, upon examination, that the writing there referred to is that of a perfectly legible character, such as an ordinary unskilled man might read. Irenæus (*Adv. Hæres.* ii. 24), indeed, speaks of sacerdotal letters, but his information is not to be relied on. In fact the sole ground for the hypothesis lies in the fact that the only specimens of the Hebrew writing of common life are not in the usual character of the manuscripts. If this supposition of the coexistence of a twofold alphabet be abandoned as untenable, we must either substitute for it a second hypothesis, that the square character was the exclusive possession of the kingdom of Judah, and that the Samaritan was used in the northern kingdom, or that the two alphabets were successive and not contemporary. Against the former hypothesis stands the fact that the coins on which the so-called Samaritan character occurs were struck at Jerusalem, and the names *Hebrew* and *Assyrian*, as applied to the two alphabets, would still be unaccounted for. There remains then the hypothesis that the square character and the writing of the coins succeeded each other in point of time, and that the one gradually took the place of the other, just as in Arabic the Nischi writing has displaced the older Cufic character, and in Syriac the Estrangelo has given place to that at present in use. But did the square character precede the character on the coins, or was the reverse the case? According to some of the doctors of the Talmud (*Sanh.*

Digitized by Google

fol. 21, 2; 22, 1), in the passage above quoted, the Law was given to the Israelites in the Hebrew character and the holy tongue. It was given again in the days of Ezra in the Assyrian character and the Aramæan tongue. By the "Hebrew" character is to be understood what is elsewhere called the "broken" writing, which is what is commonly called Samaritan; and by the Assyrian writing is to be understood the square character. But Rabbi Judah the Holy, who adopted a different etymology for the word אַשּׁוּרִית (Assyrian), says that the Law was first given in this square character, but that afterwards, when the people sinned, it was changed into the broken writing, which again, upon their repentance in the days of Ezra, was converted into the square character. In both these cases it is evident that the tradition is entirely built upon the etymology of the word *ashshúrith*, and varies according to the different conceptions formed of its meaning: consequently it is of but slight value as direct testimony. The varying character of the tradition shows moreover that it was framed after the true meaning of the name had become lost. Origen (on Ex. ix. 4) says that in the ancient alphabet the *tau* had the form of a cross, and (*Hexapla*, i. 86, Montfaucon) that in some MSS. of the LXX. the word יהוה was written in ancient Hebrew characters, not with those in use in his day, "for they say that Ezra used other [letters] after the Captivity." Jerome, following Origen, gives out as certain what his predecessor only mentioned as a report, and the tradition in his hands assumes a different aspect. "It is certain," he says, "that Ezra the scribe and doctor of the law, after the taking of Jerusalem and the restoration of the Temple under Zerubbabel, discovered other letters which we now use: whereas up to that time the characters of the Samaritans and Hebrews were the same. . . . . And the tetragrammaton name of the Lord we find in the present day written in ancient letters in certain Greek rolls" (*Prol. Gal. in Libr. Reg.*). The testimony of Origen with regard to the form of *tau* undergoes a similar modification. "In the ancient Hebrew letters, which the Samaritans use to this day, the last letter, *tau*, has the form of a cross." Again, in another passage (*Ep.* 136 *ad Marcell.* ii. 704, Ep. 14, ed. Martianay) Jerome remarks that the ineffable name יהוה, being misunderstood by the Greeks when they met with it in their books, was read by them *pipi*, i. e. ΠΙΠΙ. It has been inferred from this that the ancient characters, to which both Jerome and Origen refer in the first-quoted passages, were the square characters, because in them alone, and not in the Samaritan, does any resemblance between יהוה and ΠΙΠΙ exist. There is nothing, however, to show that Jerome contemplated the same case in the two passages. In the one he expressly mentions the "ancient characters," and evidently as an exceptional instance, for they were only found in "certain rolls;" in the other he appears to speak of an occurrence by no means uncommon. Again, it is Jerome, and not Origen, who is responsible for the assertion that in the Samaritan alphabet the Tau has the form of a cross. Origen merely says this is the case in the ancient or original (ἀρχαίοις) Hebrew characters, and his assertion is true of the writing on the Maccabæan coins, and of the ancient and even the more modern Phœnician, but not of the alphabet known to us as the Samaritan. It seems clear, therefore, that Jerome's language on this point cannot be regarded as strictly accurate.

There are many arguments which go to show that the Samaritan character is older than the square Hebrew. One of these is derived from the existence of the Samaritan Pentateuch, which, according to some writers, must date at least from the time of the separation of the two kingdoms, the northern kingdom retaining the ancient writing which was once common to both. But there is no evidence for the existence of the Samaritan Pentateuch before the Captivity, and the opinion which now most commonly prevails is that the Samaritans received it first in the Maccabæan period, and with it the Jewish writing (Hävernick, *Einl.* i. 290). The question is still far from being decided, and while it remains in this condition the arguments derived from the Samaritan Pentateuch cannot be allowed to have much weight. Hupfeld (*Stud. und Krit.* 1830, ii. 279, &c.) contends that the common theory, that the Samaritans received their writing from the ancient Israelitish times, but maintained it more faithfully than the Jews, is improbable, because the Samaritans were a mixed race, entirely different from the ancient Israelites, and had, like their language, a preponderating Aramaic element: consequently, if they had had a character peculiar to themselves, independently of their sacred book, it would rather have been Aramaic. He argues that the Samaritans received their present writing with their Pentateuch from the Jews, because the Samaritan character differs in several important particulars from that on the Phœnician monuments, but coincides in all characteristic deviations with the ancient Hebrew on the Maccabæan coins. These deviations are — (1) the horizontal strokes in *beth*, *mem*, and *nun*, which have no parallel on the Phœnician monuments: (2) the angular heads of *beth*, *daleth*, and especially *'ain*, which last never occurs in an angular form in Phœnician: (3) the entirely different forms of *teade* and *vau*, as well as of *zain* and *samech*, which are not found on the Maccabæan coins. In the Samaritan letters *aleph*, *cheth*, *lamed*, *shin*, there is a closer relationship with the forms of the old Hebrew: the only marked deviation is in the form of *tau*.[a] To these considerations Hupfeld adds the traditions of Origen and Jerome and the Talmud already given, and the fact that the Samaritans have preserved their letters unchanged, a circumstance which is intelligible on the supposition that these letters were regarded by them with superstitious reverence as a sacred character which had come to them from without, and which, in the absence of any earlier indigenous tradition of writing, necessarily became a lifeless permanent type.

The names of the letters, and the correspondence of their forms to their names in the Phœnician and Phœnicio-Samaritan alphabets, supply another argument for the superior antiquity of this to the Hebrew square character: e. g. *'Ain* (an eye),

[a] * These remarks need modification if we take as our standard of comparison some lately discovered and quite old Samaritan inscriptions, such as the fragment of a copy of the Decalogue built into a Mohammedan mosque, of which Rosen gives a figure (*Zeitsch. d. Deutsch. Morg. Ges.* xiii. 278) Here, contrary to Hupfeld, the *tau* is a simple cross, being precisely the old Phœnician form. W. H. W.

which on the coins and Phœnician monuments has the form ○; *Resh* (a head), ◻.[a] On the other hand, the names *Vau* (a nail or peg), *Zain* (a weapon), *Caph* (the hollow hand), correspond to their forms better in the square character: this, however, at most, would only prove that both are derived from the same original alphabet in which the correspondence between the shape and name of each letter was more complete. Again, we trace the Phœnician alphabet much further back than the square character. The famous inscription on the sarcophagus of Eshmunazar, found at Sidon in 1855, is referred by the Duc de Luynes to the sixth century B. C. The date of the inscription at Marseilles is more uncertain. Some would place it before the foundation of the Greek colony there, B. C. 600. There is reason to believe, however, that it is much more recent. Besides these we have the inscriptions at Sigæum and Amycle in the ancient Greek character, which is akin to the Phœnician. On the other hand, the Hebræo-Chaldee character is not found on historic monuments before the birth of Christ. A consideration of the various readings which have arisen from the interchange of similar characters in the present text leads, as might naturally be expected, to results which are rather favorable to the square character, for in this alone are the manuscripts written which have come down to us. The following examples are given, with one exception, by Gesenius: —

(*a.*) In the square alphabet are confounded —

ב and כ. שבניה, Neh. xii. 14 = שכניה, Neh. xii. 3; זכרי, 1 Chr. ix. 15 = זבדי, Neh. xi. 17.

ו and י. ועקן, Gen. xlvi. 27 = יעקן, 1 Chr. i. 42.

כ and ם. כירות, 1 K. vii. 40 = סירות, 2 Chr. iv. 11.

כ and ר. חשכת, Ps. xviii. 12 = חשרת, 2 Sam. xxii. 12.

ץ and ן. מעוז, Ps. xxxi. 3 = מעון, Ps. lxxi. 3.

(*b.*) In both alphabets are confounded —

ר and ד. דיפת, 1 Chr. i. 6 = ריפת, Gen. x. 3; דדנים, 1 Chr. i. 7 = רדנים, Gen. x. 4; דאה, Lev. xi. 14 = ראה, Deut. xiv. 13; וידא, Ps. xviii. 11 = וירא, 2 Sam. xxii. 11.

(*c.*) In the Phœnician alone —

ב and ד. חלב, 2 Sam. xxiii. 29 = חלד, 1 Chr. xi. 30.

י and ש, whence probably עין, Josh. xxi. 16 = עשן, 1 Chr. vi. 44.

נ and פ. נערי, 1 Chr. xi. 37 = פעראי, 2 Sam. xxiii. 35.

(*d.*) In neither —

כ and ר. כחום, Neh. vii. 7 = רחום, Ezr ii. 2.

נ and ת. תחן, Num. xxvi. 35 = תחת, 1 Chr. vii. 20. חמון, 1 Chr. vi. 76 [61] = חמות, Josh. xxi 32.

The third class of these readings seems to point to a period when the Hebrews used the Phœnician character, and a comparison of the Phœnician alphabet and the Hebrew coin-writing shows that the examples of which Gesenius makes a fourth class, might really be included under the third: for in these some forms of כ and ר, as well as of נ and ת, are by no means unlike. This circumstance takes away some of the importance which the above results otherwise give to the square character. Indeed, after writing his *Hebräische Sprache und Schrift*, Gesenius himself appears to have modified some of the conclusions at which he arrived in that work, and instead of maintaining that the square character, or one essentially similar to it, was in use in the time of the LXX., and that the Maccabees retained the old character for their coins, as the Arabs retained the Cufic some centuries after the introduction of the Nischi, he concludes as most probable, in his article *Palæographie* (in Ersch and Gruber's *Encycl.*), that the ancient Hebrew was first changed for the square character about the birth of Christ. A comparison of the Phœnician with the square alphabet shows that the latter could not be the immediate development of the former, and that it could not have been formed gradually from it at some period subsequent to the time of the Maccabees. The essential difference of some characters, and the similarity of others, render it probable that the two alphabets are both descended from one more ancient than either, of which each has retained some peculiarities. This more ancient form, Hupfeld (*Hebräische Grammatik*, § 7) maintains, is the original alphabet invented by the Babylonians, and extended by the Phœnicians. From this the square character was developed by three stages.

1. In its oldest form it appears on Phœnician monuments, stones, and coins. The number of the inscriptions containing Phœnician writing was 77, greater and smaller, in the time of Gesenius, but it has since been increased by the discovery of the famous sarcophagus of Eshmunazar king of Sidon, and the excavations which have still more recently been made in the neighborhood of Carthage have brought to light many others which are now in the British Museum. Those described by Gesenius were found at Athens (three bilingual), at Malta (four, one of which is bilingual), in Cyprus, among the ruins of Kitium (thirty-three), in Sicily, in the ruins of Carthage (twelve), and in the regions of Carthage and Numidia. They belong for the most part to the period between Alexander and the age of Augustus. A Punic inscription on the arch of Septimius Severus brings down the Phœnician character as late as the beginning of the third century after Christ. Besides these inscriptions on stone, there are a number of coins bearing Phœni-

[a] No sort of dependence can be put on this argument. The oldest *Resh* has a triangular, and not a round head, and the gradual development of the Hebrew square characters is evident enough from palæographical data, without considering the resemblance they may be imagined to bear to the meaning of their names. W. H. W.

sian characters, of which those found in Cilicia are the most ancient, and belong to the times of the Persian domination. The character on all these is essentially the same. In its best form it is found on the Sicilian, Maltese, Cyprian, and Carthaginian inscriptions. On the Cicilian coins it is perhaps most original, degenerating on the later coins of Phœnicia, Spain, and the neighboring islands, and becoming almost a cursive character in the monuments of Numidia and the African provinces. There are no final letters, and no divisions of words. The characteristics of the Phœnician alphabet as it is thus discovered are, that it is purely consonantal; that it consists of twenty-two letters written from right to left, and is distinguished by strong perpendicular strokes, and the closed heads of the letters; that the names and order of the letters were the same as in the Hebrew alphabet, as may be inferred from the names of the Greek letters which came immediately from Phœnicia; and that originally the alphabet was pictorial, the letters representing figures. This last position has been strongly opposed by Wuttke (*Zeitsch. d. D. M. G.* xi. 75, etc.), who maintains that the ancient Phœnician alphabet contains no traces of a pictorial character, and that the letters are simply combinations of strokes. It is impossible here to give his arguments, and the reader is referred for further information to his article. This ancient Phœnician character in its earliest form was probably, says Hupfeld, adopted by the Hebrews from the Canaanites, and used by them during the whole period of the living language till shortly before the birth of Christ. Closely allied with it are the characters on the Maccabæan coins, and the Samaritan alphabet.

2. While the old writing remained so almost unchanged among the Phœnicians and Samaritans, it was undergoing a gradual transformation among its original inventors, the Aramæans, especially those of the West. This transformation was effected by opening the heads of the letters, and by bending the perpendicular stroke into a horizontal one, which in the cursive character served for a connecting stroke, and in the inscriptions on stone for a basis or foundation for the letters. The character in this form is found in the earliest stage on the stone of Carpentras, where the letters ע, ב, ד, ר, have open heads; and later in the inscriptions on the ruins of Palmyra, where the characters are distinguished by the open heads degenerating sometimes to a point, and by horizontal connecting strokes. Besides the stone of Carpentras, the older form of the modified Aramæan character is found on some fragments of papyrus found in Egypt, and preserved in the Library at Turin, and in the Museum of the Duke of Blacas. Plates of these are given in Gesenius' *Monumenta Phœnicia* (tab. 28–33). They belong to the time of the later Ptolemies, and are written in an Aramaic dialect. The inscription on the Carpentras stone was the work of heathen scribes, probably, as Dr. Levy suggests (*Zeitsch. d. D. M. G.* xi. 67), the Babylonian colonists of Egypt; the writing of the papyri he attributes to Jews. The inscription on the vase of the Serapeum at Memphis is placed by the Duc de Luynes and M. Mariette in the 4th century B. C. In the Blacas fragments the heads of the letters ב, ד, ר, have fallen away altogether. In the forms of ה, ח, כ, we see the origin of the figures of the square character. The final forms of *Caph* and *Nun* occur for the first time. The Palmyrene writing represents a later stage, and belongs principally to the second and third centuries after Christ, the time of the greatest prosperity of Palmyra. The oldest inscription belongs to the year 396 of the Greeks (A. D. 84), and the latest to the year 569 (A. D. 257). The writing was not confined to Palmyra, for an inscription in the same character was found at Abilene. The Palmyrene inscriptions are fifteen in number: ten bilingual, in Syriac and Greek, and Syriac and Latin. Two are preserved at Rome, four at Oxford. Those at Rome differ from the rest, in having lost the heads of the letters ב, ד, ר, צ, while the forms of the י, ס, ת, are like the Phœnician. Of the cursive Assyrian writing, which appears to be allied to the Aramæan, Mr. Layard remarks, "On monuments and remains purely Syrian, or such as cannot be traced to a foreign people, only one form of character has been discovered, and it so closely resembles the cursive of Assyria, that there can be little doubt as to the identity of the origin of the two. If, therefore, the inhabitants of Syria, whether Phœnicians or others, were the inventors of letters, and those letters were such as exist upon the earliest monuments of that country, the cursive character of the Assyrians may have been as ancient as the cuneiform. However that may be, this hieratic character has not yet been found in Assyria on remains of a very early epoch, and it would seem probable that simple perpendicular and horizontal lines preceded rounded forms, being better suited to letters carved on stone tablets or rocks. At Nimroud the cursive writing was found on part of an alabaster vase, and on fragments of pottery, taken out of the rubbish covering the ruins. On the alabaster vase it accompanied an inscription in the cuneiform character, containing the name of the Khorsabad king, to whose reign it is evident, from several circumstances, the vase must be attributed. It has also been found on Babylonian bricks of the time of Nebuchadnezzar" (*Nin.* ii. pp. 165, 166). M. Fresnel discovered at Kasr some fifty fragments of pottery covered with this cursive character in ink. These, too, are said to be of the age of Nebuchadnezzar (*Journ. Asiat.* July 1853, p. 77). Dr. Levy (*Zeitsch. d. D. M. G.* ix. 465) maintains, in accordance with the Talmudic tradition, that the Jews acquired this cursive writing in Babylon, and brought it back with them after the Captivity together with the Chaldee language, and that it gradually displaced the older alphabet, of which fragments remain in the forms of the final letters.

3. While this modification was taking place in the Aramaic letters, a similar process of change was going on in the old character among the Jews. We already find indications of this in the Maccabæan coins, where the straight strokes of some letters are broken. The Aramaic character, too, had apparently an influence upon the Hebrew, proportioned to the influence exercised by the Aramaic dialect upon the Hebrew language. The heads of the letters still left in the Palmyrene character are removed, the position and length of several oblique strokes are altered (as in ת, ח, ב, כ). It lost the character of a cursive hand by the separation of the several letters, and the stiff ornaments which they received at the hands of calligraphers, and thus became an angular, uniform, broken character, from which it receives its name square (כְּתָב מְרֻבָּע,

Digitized by Google

n the letters א, ב, ג, ב, מ, ב, ס, ע, פ, ר, the Ægypto-Aramaic appears the older, and the Palmyrene most resembles the square character. In others, on the contrary, as ח, מ, ן, ר, the square character is closely allied to the forms in the Blacas fragments; and in some, as ד, ח, ו, ז, י, ש, both the older alphabets agree with the square character. So far as regards the development of the square character from the Aramæan, as it appears on the stone of Carpentras and the ruins of Palmyra, Hupfeld and Gesenius are substantially agreed, but they differ widely on another and very important point. Gesenius is disposed to allow some weight to the tradition as preserved in the Talmud, Origen, and Jerome, that the Hebrews at some period adopted a character different from their own. The Chaldee square alphabet he considers as originally of Aramaic origin, but transferred to the Hebrew language. To this conclusion he appears to be drawn by the name *Assyrian* applied in the Talmud to the square character, which he infers was probably the ancient character of Assyria. If this were the case, it is remarkable that no trace of it should be found on the Assyrian monuments; and, in the absence of other evidence, it is unsafe to build a theory upon a name, the interpretation of which is uncertain The change of alphabet from the Phœnician to the Aramæan, and the development of the Syriac from the Aramæan, Gesenius regards as two distinct circumstances, which took place at different times, and were separated by a considerable interval. The formation of the square character he maintains cannot be put earlier than the second century after Christ. Hupfeld, on the other hand, with more show of reason, rejects altogether the theory of an abrupt change of character, because he doubts whether any instance can be shown of a simple exchange of alphabets in the case of a people who have already a tradition of writing. The ancient letters were in use in the time of the Maccabees, and from that period writing did not cease, but was rather more practiced in the transcription of the sacred books. Besides, on comparing the Palmyrene with the square character, it is clear that the former has been altered and developed, a result which would have been impossible in the case of a communication from without which overwhelmed all tradition and spontaneity. The case of the Samaritans, on the other hand, is that of a people who received an alphabet entire, which they regarded as sacred in consequence of its association with their sacred book, and which they therefore retained unaltered with superstitious fidelity. Moreover, in the old Hebrew writing on the coins we see already a tendency to several important alterations, as, for example, in the open heads of ב and ך, and the base lines of ב, כ, מ, נ; and many letters, as ח, are derived rather from the coin-character than from the Palmyrene, while מ and ק are entirely Phœnician. Finally, Hupfeld adds, "It is in the highest degree improbable — nay, almost inconceivable — that the Jews, in the fervor of their then enthusiasm for their sacred books, should, consciously and without apparent reason, have adopted a foreign character, and abandoned the ancient writing of their fathers."

Assuming, then, as approximately true, that the square character of the Hebrews was the natural result of a gradual process of development, and that it was not adopted in its present shape from without, but became what it is by an internal organic change, we have further to consider at what time it acquired its present form. Kopp (*Bilder und Schriften*, ii. 177) places it as late as the 4th century after Christ; but he appears to be guided to his conclusion chiefly by the fact that the Palmyrene character, to which it is most nearly allied, extended into the 3d century. It is evident, however, from several considerations, that in the 4th century the square character was substantially the same as it is to this day, and had for some time been so. The descriptions of the forms of the letters in the Talmud and Jerome coincide most exactly with the present; for both are acquainted with *final* letters, and describe as similar those letters which resemble each other in the modern alphabet, as, for instance, ב and כ, ד and ר, ח and ת, ו and ז, ז and ן, ם and ס. The calligraphic ornaments which were employed in the writing of the synagogue rolls, as the *tagyin* on the letters ש ע ם נ ז ג ץ, the point in the broken headline of ת (תּ), and many other prescriptions for the orthography of the Torah are found in the Talmud, and show that Hebrew calligraphy, under the powerful protection of minute laws observed with superstitious reverence, had long received its full development, and was become a fixed unalterable type, as it has remained ever since. The change of character, moreover, not only in the time of Jerome and the Talmud, but even as early as Origen, was an event already long passed, and so old and involved in the darkness of fable as to be attributed in the common legend to Ezra, or by most of the Talmudists to God Himself. The very obscurity which surrounds the meaning of the terms רעץ and אשוריות as applied to the old and new writing respectively, is another proof that in the time of the Talmudists the square character had become permanent, and that the history of the changes through which it had passed had been lost. In the Mishna (*Shabb.* xii. 5) the case is mentioned of two *Zains* (זז) being written for *Cheth* (ח), which could only be true of the square character. The often-quoted passage, Matt. v. 18, which is generally brought forward as a proof that the square character must have been in existence in the time of Christ, who mentions ἰῶτα, or *yod*, as the smallest letter of the alphabet, proves at least that the old Hebrew or Phœnician character was no longer in use, but that the Palmyrene character, or one very much like it, had been introduced. From these circumstances we may infer, with Hupfeld (*Stud. und Krit.* 1830, ii. 288), that Whiston's conjecture is approximately true; namely, that about the first or second century after Christ the square character assumed its present form; though in a question involved in so much uncertainty, it is impossible to pronounce with great positiveness.[a]

[a] Another link between the Palmyrene and the square character is supplied by the writing on some of the Babylonian bowls, described by Mr. Layard (*Nin. and Bab.* p. 509), which Dr. Levy (*Zeitsch. d. D. M. G.*) assigns to the 7th century A. D. [See the plate in Schrader's ed. of De Wette's *Einl.* (1869). — A. J.]

Next to the scattered hints as to the shape of the Hebrew letters which we find in the writings of Jerome, the most direct evidence on this point is supplied by the so-called *Alphabetum Jesuitarum*, which is found in a MS. (Codex Marchalianus, now lost) of the LXX. of Lam. ii. It is the work of a Greek scribe, imperfectly acquainted with, or more probably entirely ignorant of Hebrew, who copied slavishly the letters which were before him. In this alphabet ד is written Π; י and ו are of nearly equal length, the latter being distinguished by two dots; ק is made like ρ, and ר like H. The letters on the two Abraxas gems in his possession were thought by Montfaucon (*Prælim. ad Hex. Orig.* i. 22, 23) to have been Hebrew; but as they have not been fairly deciphered, nothing can be inferred from them. Other instances of the occurrence of the Hebrew alphabet written by ignorant scribes are found in a Codex of the New Testament, of which an account is given by Treschow (*Tent. descr. Cod. Vet. aliquot Gr. N. T.*), and three have been edited from Greek and Latin MSS. in the *Nouveau Traité Diplomatique* published by the Benedictines. To these, as to the *Alphabetum Jesuitarum*, Kennicott justly attributes no value (*Dissert. Gen.* p. 69 note). The same may be said of the Hebrew writing of a monk, taken from the work of Rabanus Maurus, *De inventione linguarum*. The Jews themselves recognize a double character in the writing of their synagogue rolls. The earlier of these is called the *Tam* writing (תם כתב) as some suppose, from Tam, the grandson of Rashi, who flourished in the 12th century, and is thought to be the inventor; or, according to others, from the *perfect* form of the letters, the epithet *Tam* being then taken as a significant epithet of the square character, in which sense the expression כְּתִיבָה תַמָּה, *cĕthîbâh thammâh*, occurs in the Talmud (*Shabbath*, fol. 103 *b*). Phylacteries written in this character were hence called *Tam tephillin*. The letters have fine pointed corners and perpendicular *taggin* (תגין), or little strokes attached to the seven letters שעטנזבץ. The *Tam* writing is chiefly found in German synagogue rolls, and probably also in those of the Polish Jews. The *Welsh* writing (וולש כתב), to which the Jews assign a later date than to the other, usually occurs in the synagogue rolls and other manuscripts of the Spanish and eastern Jews. The figures of the letters are rounder than in the *Tam* writing, and the *taggin*, or crown-like ornaments, terminate in a thick point. But besides these two forms of writing, which are not essentially distinct, there are minor differences observable in the manuscripts of different countries. The Spanish character is the most regular and simple, and is for the most part large and bold, forming a true square character. The German is more sloping and compressed, with pointed corners; but finer than the Spanish. Between these the French and Italian character is intermediate, and is hence called by Kennicott (*Diss. Gen.* p. 71) *character intermedius*. It is for the most part rather smaller than the others, and the forms of the letters are rounder (Eichhorn, *Einl.* ii. 37–41; Tychsen, *Tentamen de var. codd. Hebr. V. T. MSS. generibus*, p. 264; Bellermann, *De usu paleog. Hebr.* p. 43).

*The Alphabet.* — The oldest evidence on the subject of the Hebrew alphabet is derived from the alphabetical psalms and poems; Pss. xxv., xxxiv., xxxvii., cxi., cxii., cxix., cxlv.; Prov. xxxi. 10–31, Lam. i.–iv. From these we ascertain that the number of the letters was twenty-two, as at present. The Arabic alphabet originally consisted of the same number. Irenæus (*Adv. Hær.* ii. 24) says that the ancient sacred letters were ten in number. It has been argued by many that the alphabet of the Phœnicians at first consisted only of sixteen letters, or according to Hug of fifteen, ו, מ, כ, ס, פ, ש being omitted. The legend as told by Pliny (vii. 56) is as follows. Cadmus brought with him into Greece sixteen letters; at the time of the Trojan war Palamedes added four others, Θ, Ξ, Φ, Χ, and Simonides of Melos four more, Ζ, Η, Ψ, Ω. Aristotle recognized eighteen letters of the original alphabet, Α Β Γ Δ Ε Ζ Ι Κ Λ Μ Ν Ο Π Ρ Σ Τ Υ Φ, to which Θ and Χ were added by Epicharmus (comp. Tac. *Ann.* xi. 14). By Isidore of Seville (*Orig.* i. 3) it is said there were seventeen. But in the oldest story of Cadmus, as told by Herodotus (v. 58) and Diodorus (v. 24), nothing is said of the number of the letters. Recent investigations, however, have rendered it probable that at first the Shemitic alphabet consisted of but sixteen letters. It is true that no extant monuments illustrate the period when the alphabet was thus curtailed, but as the theory is based upon an organic arrangement first proposed by Lepsius, it may be briefly noticed. Dr. Donaldson (*New Cratylus*, p. 171, 3d ed.) says, "Besides the mutes and breathings, the Hebrew alphabet, as it now stands, has four sibilants, ז, ס, צ, ש. Now it is quite clear that all these four sibilants could not have existed in the oldest state of the alphabet. Indeed we have positive evidence that the Ephraimites could not pronounce שׁ, but substituted for it the simpler articulation ס (Judges xii 6). We consider it quite certain, that at the first there was only one sibilant, namely this ס, or *samech*. Finally, to reduce the Shemitic alphabet to its oldest form, we must omit *caph*, which is only a softened form of *koph*, the liquid *resh*, and the semivowel *jod*, which are of more recent introduction. . . . The remaining 16 letters appear in the following order: א, ב, ג, ד, ה, ו, ז, ח, ט, ל, מ, נ, ס, ע, פ, ק, ר, ת. If we examine this order more minutely, we shall see that it is not arbitrary or accidental, but strictly organic according to the Shemitic articulation. We have four classes, each consisting of 4 letters: the first and second classes consist each of 3 mutes preceded by a breathing, the third of the 3 liquids and the sibilant, which perhaps closed the oldest alphabet of all, and the fourth contains the three supernumerary mutes preceded by a breathing."[a] The original 16 letters of the Greek alphabet, corresponding to those of the

[a] "Dr. Donaldson's conjectures are at best rather fanciful. His second class does not consist of "three mutes." Even if ת can be called such, ר is no mute and never was, so far as we know. Why four sibilants "could not have existed in the oldest state of the alphabet" it would be difficult to show. If the language was developed sufficiently, at the time the a-

Shemitic, are thus given by Dr. Donaldson (*ibid.* p. 175).

| א | ב | ג | ד | ה | ו | ח | ט | י | כ | ל | מ | נ | ס | ע | פ | צ | ק | ר | ש | ת |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| A | B | Γ | Δ | E | F | H | Θ | I | K | Λ | M | N | Ξ | O | Π | Ϙ | Ϙ | T | Σ | T |

"In the Greek alphabet, as it is now given in the grammars, F and Q are omitted, and ten other characters added to these." The Shemitic *Tsade* (צ) became *zeta* (ζ), *Caph* (כ) became *kappa* (κ), and *Yod* (י) became *iota* (ι). *Resh* (ר) was adopted and called *rho* (ρ), and Σάν, which was used by the Dorians for Σῖγμα (Her. i. 139), is only another form of *Zain* (ז). *Shin* (שׁ) or *Sin* (שׂ) is the original of ξῖ, which from some cause or other has changed places with σῖγμα, the Shemitic *Samech*, just as ζῆτα has been transferred from its position. In like manner *Mem* became μῦ, and *Nun* became νῦ. With the remaining Greek letters we have nothing to do, as they do not appear to have been Shemitic in origin, and will therefore proceed to consider the Hebrew alphabet as known to us.

With regard to the arrangement of the letters, our chief sources of information are as before the alphabetical acrostics in the Psalms and Lamentations. In these poems some irregularities in the arrangement of the alphabet are observable. For instance, in Lam. ii., iii., iv., פ stands before ע: in Ps. xxxvii. ע stands before פ, and ע is wanting: in Pss. xxv., xxxiv. ו is omitted, and in both there is a final verse after ת beginning with פ. Hence פ has been compared with the Greek φ, and the transposition of ע and צ has been explained from the interchange of these letters in Aramaic. But as there are other irregularities in the alphabetical psalms, no stress can be laid upon these points. We find, for example, in Ps. xxv. two verses beginning with א, while ב is omitted; in Ps. xxxiv. two begin with ד, and so on.

The names of the letters are given in the LXX. of the Lamentations as found in the Vatican MS. as printed by Mai, and in the Codex Friderico-Augustanus, published by Tischendorf. Both these ancient witnesses prove, if proof were wanting, that in the 4th century after Christ the Hebrew letters were known by the same names as at the present day. These names all denote sensible objects which had a resemblance to the original form of the letters, preserved partly in the square alphabet, partly in the Phœnician, and partly perhaps in the alphabet from which both were derived.

The following are the letters of the Hebrew alphabet in their present shape, with their names and the meanings of these names, so far as they can be ascertained with any degree of probability.

א, *Aleph.* אָלֶף = אֶלֶף, an ox (comp. Plut. *Symp. Quæst.* ix. 2, § 3). In the old Phœnician forms of this letter can still be traced some resemblance to an ox-head. 𐤀. Gr. ἄλφα.

ב, *Beth.* בַּיִת = בַּיִת, a house. The figure in the square character corresponds more to its name, while the Ethiopic ⋂ has greater resemblance to a tent. Gr. βῆτα (B).

ג, *Gimel.* גִּימֶל = גָּמָל, a camel. The ancient form is supposed to represent the head and neck of this animal. In Phœnician it is 𐤂, and in Ethiopic ⅂, which when turned round became the Greek γάμμα (= γάμλα), Γ. Gesenius holds that the earliest form 𐤂 represented the camel's hump.

ד, *Daleth.* דָּלֶת = דֶּלֶת, a door. The significance of the name is seen in the older form 𐤃, whence the Greek δέλτα, Δ, a tent-door. [The simple triangle of the Greek Δ is a yet older form found in the Moabite Inscription, and still more resembles a tent-door. — W. H. W.]

ה, *He.* הֵא, without any probable derivation; perhaps corrupted, or merely a technical term. Ewald says it is the same as the Arabic هَوٌ a hole, fissure. Hupfeld connects it with the interjection הֵא, "lo!" The corresponding Greek letter is E, which is the Phœnician 𐤄 turned from left to right.

ו, *Vau.* וָו, a hook or tent-peg; the same as the old Greek βαῦ (𐤅), the form of which resembles the Phœnician 𐤅. [But the old Phœnician ו is 𐤉 and not 𐤅, and corresponds in shape with the Greek Υ, with which it also corresponds in sound. The Greek Υ has been supposed to be a late addition to the Greek alphabet, but it is found in the oldest inscriptions,[a] and its shape shows it to have been borrowed, with the other Phœnician characters, from the East. — W. H. W.]

ז, *Zain.* זַיִן, probably = زَيْن, *saino*, a weapon, sword (Ps. xliv. 7): omitting the final letter, it was also called זַי, *zai* (Mish. *Shabb.* xii. 5). It appears to be the same as the ancient Greek Σάν. [The same in name, perhaps; but the oldest form of ζῆτα, as found in the inscriptions from Halicarnassus and Teos, is 𐤆, the same as the most antique *Zain*. — W. H. W.]

ח, *Cheth.* חֵית, a fence, inclosure (= Arab. حَائِط, from حَاطَ, Syr. ܚܛ, to surround). Comp. the Phœn. 𐤇. *Cheth* is the Greek ἦτα (H).

---

alphabet was adopted, to distinguish the sounds, the alphabet must have represented the current pronunciation. The language, and even its literature, probably, had reached considerable development before alphabetic characters were derived from older hieroglyphic or syllabic forms. The oldest inscriptions shew all the letters (מ *happens* to be missing in the great Moabite Inscription), and they are all present in the alphabet received by the Greeks. W. H. W.

a * Kirchhoff's *Studien zur Gesch. d. griech. Alphabets*, in the *Abhandl.* of the Berlin Acad., 1863, p. 265 W. H. W.

Digitized by Google

ט, *Tet.* טֵית, a snake, or טַיִת, a basket. The Greek θῆτα.

י, *Yod.* יוֹד = יָד, a hand. The form of the letter was perhaps originally longer, as in the Greek ι (ἰῶτα). The Phœnician (𐤉) and Samaritan (𐤉) figures have a kind of distant resemblance to three fingers. In Ethiopic the name of the letter is *yaman*, the right hand. [But these are neither the oldest Phœnician nor Samaritan forms. The archaic *Yod*, 𐤉, had but two "fingers." — W. H. W.]

כ, *Caph.* כַּף, the hollow of the hand. The Greek κάππα (κ) is the old Phœnician form (𐤊) reversed.

ל, *Lamed.* לָמֶד, a cudgel or ox-goad (comp. Judg. iii. 31). The Greek λάμβδα (Λ); Phœnician, 𐤋, 𐤋. [In the Moabite stone and other very old inscriptions, the lower part of the *Lamed* is curved. — A.]

מ, *Mem.* מַיִם = מָיִם, water, as it is commonly explained, with reference to the Samaritan 𐤌. In the old alphabets it is 𐤌, in which Gesenius sees the figure of a trident, and so possibly the symbol of the sea. The Greek μῦ corresponds to the old word מוֹ, "water," Job ix. 30. [The oldest form of *Mem*, as M. de Vogüé shows, is not 𐤌 but 𐤌; and resembles waves more than a trident. — W. H. W.]

נ, *Nun.* נוּן a fish, in Chaldee, Arabic, and Syriac. In almost all Phœnician alphabets the figure is 𐤍. On the Maltese inscriptions it is nearly straight, and corresponds to its name. The Greek νῦ is derived from it.

ס, *Samech.* סָמַךְ, a prop, from סָמַךְ, to support; perhaps, says Gesenius, the same as the Syriac ܣܡܟܐ, *s'moco*, a triclinium. But this interpretation is solely founded on the rounded form of the letter in the square alphabet; and he has in another place (*Mon. Phœn.* p. 83) shown how this has come from the old Phœnician, which has no likeness to a triclinium, or to anything else save a flash of lightning striking a church spire. The Greek σἂν μα is undoubtedly derived from *Samech*, as its form is from the Phœnician character, although its place in the Greek alphabet is occupied by ξῖ. [The *name* of σἂν μα seems to be derived from *Samekh*, but its shape from that of *Shin*. *Samekh* agrees in its earliest form with that of ξῖ, which occupies its place in the alphabet. The oldest form of the Greek Ξ which has been preserved is 𐤎, which comes very near to the *Samekh*, 𐤎, which in this antique form is presented to us for the first time in the Moabite Inscription. — W. H. W.]

ע, *'Ain.* עַיִן, an eye; in the Phœnician and Greek alphabets O. Originally it had two powers, as in Arabic, and was represented in the LXX. by Γ, or a simple breathing

פ, *Pe.* פֶּה = פֵּא, a mouth. The Greek πῖ is from פִּי, the construct form of פֶּה.

צ, *Tsade.* צַדִי or צָדִי, a fish-hook or prong for spearing the larger fish. Others explain it as a nose, or an owl. One of the Phœnician forms is 𐤑. From *Tsade* is derived the Greek ζῆτα.

ק, *Koph.* קוֹף, perhaps the same as the Arabic قفا the back of the head. Gesenius originally explained it as equivalent to the Chaldee קוּפָא, the eye of a needle, or the hole for the handle of an axe. Hitzig rendered it "ear," and others "a pole." The old Hebrew form (P), inverted 𐤒, became the Greek κόππα (𐤒); and the form (𐤒), which occurs on the ancient Syracusan coins [and in the Moabite Inscription — W. H. W.], suggests the origin of the Roman Q.

ר, *Resh.* רֵישׁ, a head (comp. Aram. רֵאשׁ = רֹאשׁ). The Phœnician 𐤓 when turned round became the Greek Ρ, the name of which, ῥῶ, is corrupted from *Resh*.

ש *Shin* & *Sin.* שִׁין / שִׂין — Compare שֵׁן, a tooth, sometimes used for a jagged promontory. The letters ש and שׂ were probably at first one letter, and afterwards became distinguished by the diacritic point, which was known to Jerome, and called by him *accentus* (*Quæst. Hebr. in Gen.* ii. 23; *Am.* viii. 12). In Ps. cxix. 161–168, and Lam. iii. 61–63, they are used promiscuously, and in Lam. iv. 21 שׂ is put for שׁ. The narrative in Judg. xii. 6 points to a difference of dialect, marked by the difference in sound of these two letters. The Greek ξῖ is derived from *Shin*, as νῦ from *Nun*. [The *name* of the Greek ξῖ may be corrupted from that of *Shin*; but its shape, as we have seen, is from that of *Samech*, whose place it occupies. So σἂν μα, with the name of *Samech*, has the place and form of *Shin*, both being represented by W in the earliest alphabets. — W. H. W.]

ת, *Tau.* תָּו, a mark or sign (Ex. ix. 4); probably a sign in the shape of a cross, such as cattle were marked with. This signification corresponds to the shapes of the old Hebrew letter on coins +, ×, from the former of which comes the Greek ταῦ (Τ).

In the mystical interpretation of the alphabet given by Eusebius (*Præp. Evang.* x. 5) it is evident that *Tsade* was called *Tsedek*, and *Koph* was called *Kol*. The Polish Jews still call the former *Tsadek*.

*Divisions of Words.* — Hebrew was originally written, like most ancient languages, without any divisions between the words.[a] In most Greek in

[a] At first sight it appears strange that the words in ancient manuscripts should be thus run together as,

Digitized by Google

scriptions there are no such divisions, though in several of the oldest, as the Eugubine Tables and the Sigæan inscription, there are one or two, while others have as many as three points which serve this purpose. The same is the case with the Phœnician inscriptions. Most have no divisions of words at all, but others have a point, except where the words are closely connected.[a] The cuneiform character has the same point, as well as the Samaritan, and in Cufic the words are separated by spaces, as in the Aramæo-Egyptian writing. The various readings in the LXX. show that, at the time this version was made, in the Hebrew MSS. which the translators used the words were written in a continuous series.[b] The modern synagogue rolls and the MSS. of the Samaritan Pentateuch have no vowel-points, but the words are divided, and the Samaritan in this respect differs but little from the Hebrew.

*Final Letters, etc.* — In addition to the letters above described, we find in all Hebrew MSS. and printed books the forms ך, ם, ן, ף, ץ, which are the shapes assumed by the letters כ, מ, נ, פ, צ, when they occur at the end of words. Their invention was clearly due to an endeavor to render reading more easy by distinguishing one word from another, but they are of comparatively modern date. The various readings of the LXX. show, as has been already said, that that version was made at a time when the divisions of words were not marked, and consequently at this time there could be no final letters. Gesenius at first maintained that on the Palmyrene inscriptions there were neither final letters nor divisions of words, but he afterwards admitted, though with a little exhibition of temper, that the final *Nun* was found there, after his error had been pointed out by Kopp (*Bild. u. Schr.* ii. 132; Ges. *Mon. Phœn.* p. 82). In the Aramæo-Egyptian writing both final *Caph*, and final *Nun* occur, as may be seen in the Blacas fragments given by Gesenius. The five final letters "are mentioned in Bereshith Rabba (parash. i. fol. 1, 4), and in both Talmuds; in the one (T. Bab. *Sabbat.* fol. 104, 1) they are said to be used by the seers or prophets, and in the other (T. Hieros. *Megillah*, fol. 71, 4) to be an *Halacah* or tradition of Moses from Sinai; yea, by an ancient writer (Pirke Eliezer, c. 48) they are said to be known by Abraham" (Gill, *Dissertation concerning the Antiquity of the Heb. Language*, etc., p. 69). The final *Mem* in the middle of the word לִמַרְבָּה (Is. ix. 6) is mentioned in both Talmuds (Talm. Bab. *Sanhedrin*, fol. 94, 1; Talm. Jer. *Sanh.* fol. 27, 4), and by Jerome (*in loc.*). In another passage Jerome (*Prol. ad Libr. Reg.*) speaks of the final letters as if of equal antiquity with the rest of the alphabet. The similarity of shape between final *Mem* (ם) and *Samech* (ס) is indicated by the dictum of Rab *Chasda*, as given in the Babylonian Talmud (*Megillah*, c. 1; *Shabbath*, fol. 104, 1), that "*Mem* and *Samech*, which were on the Tables (of the Law) stood by a miracle." It was a tradition among the Jews that the letters on the tables of stone given to Moses were cut through the stone, so as to be legible on both sides; hence the miracle by which *Mem* and *Samech* kept their place. The final letters were also known to Epiphanius (*De Mens. et Ponderibus*, § 4). In our present copies of the Hebrew Bible there are instances in which final letters occur in the middle of words (see Is. ix. 6, as above), and, on the contrary, at the end of words the ordinary forms of the letters are employed (Neh. ii. 13; Job xxxviii. 1); but these are only to be regarded as clerical errors, which in some MSS. are corrected. On the ancient Phœnician inscriptions, just as in the Greek uncial MSS. the letters of a word were divided at the end of a line without any indication being given of such division, but in Hebrew MSS. a twofold course has been adopted in this case. If at the end of a line the scribe found that he had not space for the complete word, he either wrote as many letters as he could of this word, but left them unpointed, and put the complete word in the next line, or he made use of what are called extended letters, *literæ dilatabiles* (as א, ה, and the like), in order to fill up the superabundant space. In the former case, in order to indicate that the word at the end of the line was incomplete, the last of the unpointed letters was left unfinished, or a sign was placed after them, resembling sometimes an inverted כ, and sometimes like ה, ע, or מ. If the space left at the end of the line is inconsiderable it is either filled up by the first letter of the next word, or by any letter whatever, or by an arbitrary mark. In some cases, where the space is too small for one or two consonants, the scribe wrote the

succession of continuous lines. Yet in fact our mode of separating the words is the artificial one, and the other is the natural one, in reducing oral discourse to written. Spoken speech is an unbroken current. It is not the ear at all, except as slightly aided by some intonation of the voice, but the mind which separates the speech into words, and thus apprehends the meaning of what is uttered. The speaker runs together different words in the same manner as he runs together different syllables of the same word. The old method therefore simply adjusted the eye to the ear, and so made the discourse appear on parchment or stone very much as it sounded from the tongue of the speaker. H.

a * The words are separated by points in some of the most ancient Phœnician inscriptions, as in the second from Citium, that from Tucca, the bilingual of Sardinia, and notably so in the oldest of all, the Moabite Inscription, which also separates sentences by a perpendicular line. W. H. W.

b * And yet these cases are so rare that, after careful comparison, I find but six or eight in the five books of Moses, and even these generally require a slight variation in the letters, so that not much can be deduced on the subject. These cases are Gen. vii. 11, עֶשְׂרִים יוֹם for עֶשְׂרִים; Gen. xx. 16, כֹּלוֹ נָכֹחַת for כֹּל וְנֹכַח; Gen. xl. 17. מִכֹּל מַאֲכַל אֹכֶל for מִכֹּל מַאֲכַל; Num. xxiii. 10, וּמִי יִבֶּר אֶת רֹבַע יִשְׂרָאֵל for וּמִסְפָּר; Num. xxiv. 22, לְבָעֵר עַד אַשּׁוּר for לְבָעֵר עַד עַרְמָה; Deut. xxvi. 5, אֲרַמִּי אֹבֵד אָבִי for אֲרַמִּי: Deut. xxxiii. 2, apparently וְאִתָּהּ רִבְבוֹת קֹדֶשׁ for וְאִתָּם מִרְבְּבוֹת קֹדֶשׁ; and perhaps Deut. xxxii. 8, בְּנֵי יִשְׂרָאֵל for בְּנֵי יְשֻׁרוּן אֵל or אֲשֶׁר אֵל cf. Deut. xxxiii. 2, where אֲשֶׁרֹת seems to have been read for אֵשׁ דָּת. These are also specimens of the sources of cases where the vowels were differently read. W. H. W.

Digitized by Google

excluded letters in a smaller form on the margin above the line (Eichhorn, *Einl.* ii. 57–59). That *abbreviations* were employed in the ancient Hebrew writing is shown by the inscriptions on the Maccabæan coins. In MSS. the frequently recurring words are represented by writing some of their letters only, as יש׳ or ישׂ׳ for ישׂראל, and a frequently recurring phrase by the first letters of its words with the mark of abbreviation; as כ׳ ל ח׳ for כי לעולם חסדו, יי׳ or י״י for יהוה, which is also written ׳׳׳ or ׳׳׳. The *greater* and *smaller* letters which occur in the middle of words (comp. Ps. lxxx. 16; Gen. ii. 4), the *suspended* letters (Judg. xviii. 30; Ps. lxxx. 14), and the *inverted* letters (Num. x. 35), are transferred from the MSS. of the Masoretes, and have all received at the hands of the Jews an allegorical explanation. In Judg. xviii. 30 the suspended *Nun* in the word "Manasseh," without which the name is "Moses," is said to be inserted in order to conceal the disgrace which the idolatry of his grandson conferred upon the great lawgiver. Similarly the small כ in the word לִבְכֹּתָהּ, "to weep for her" (Gen. xxiii. 2), is explained by Baal Hatturim as indicating that Abraham wept little, because Sarah was an old woman.

Numbers were indicated either by letters or figures. The latter are found on Phœnician coins, on the sarcophagus of Eshmunazar, on the Palmyrene inscriptions, and probably also in the Aramæo-Egyptian writing. On the other hand, letters are found used as numerals on the Maccabæan coins, and among the Arabs, and their early adoption for the same purpose among the Greeks may have been due to the Phœnicians. It is not too much to conjecture from these analogies that figures and letters representing numbers may have been employed by the ancient Hebrews. It is even possible that many discrepancies in numbers may be explained in this way. For instance, in 1 Sam. vi. 19, for 50,070 the Syriac has 5,070; in 1 K. iv. 26 [v. 6] Solomon had 40,000 horses, while in the parallel passage of 2 Chr. ix. 25 he has only 4,000; according to 2 Sam. x. 18, David destroyed 700 chariots of the Syrians, while in 1 Chr. xix. 18, the number is increased to 7,000. If figures were in use such discrepancies are easily intelligible. On the other hand, the *seven* years of famine in 2 Sam. xxiv. 13, may be reconciled with the *three* of 1 Chr. xxi. 12 and the LXX. by supposing that a scribe, writing the square character, mistook ג (= 3) for ז (= 7). Again, in 2 Chr. xxi. 20, Jehoram dies at the age of 40, leaving a son, Ahaziah, who was 42 (2 Chr. xxii. 2). In the parallel passage of 2 K. viii. 26 Ahaziah is only 22, so that the scribe probably read מב instead of כב. On the whole, Gesenius concludes, the preponderance would be in favor of the letters, but he deprecates any attempt to explain by this means the enormous numbers we meet with in the descriptions of armies and wealth, and the variations of the Samaritan and LXX. from the Hebrew text in Gen. v.

*Vowel-points and Diacritical Marks.* — It is impossible here to discuss fully the origin and antiquity of the vowel-points and other marks which are found in the writing of Hebrew MSS. The most that can be done will be to give a summary of results, and to refer the reader to the sources of fuller information. Almost all the learned Jews of the Middle Ages maintained the equal antiquity of the vowels and consonants, or at least the introduction of the former by Ezra and the men of the Great Synagogue. The only exceptions to this uniformity of opinion are some few hints of Aben Ezra, and a doubtful passage of the book Cozri. The same view was adopted by the Christian writers Raymund Martini (cir. 1278), Peres de Valentin (cir. 1430), and Nicholas de Lyra, and these are followed by Luther, Calvin, and Pellicanus. The modern date of the vowel-points was first argued by Elias Levita, followed on the same side by Cappellus, who was opposed by the younger Buxtorf. Later defenders of their antiquity have been Gill, James Robertson, and Tychsen. Others, like Hottinger, Prideaux, Schultens, J. D. Michaelis, and Eichhorn, have adopted an intermediate view, that the Hebrews had some few ancient vowel-points, which they attached to ambiguous words. "The dispute about the antiquity and origin of the Hebrew vowels commenced at a very early date; for while Mar-Nartronai II., Gaon in Sura (859–869), prohibited to provide the copies of the Law with vowels, because these signs had not been communicated on Mount Sinai, but had only been introduced by the sages to assist the reader; the Karaites allowed no scroll of the Pentateuch to be used in the synagogue, unless it was furnished with vowels and accents, because they considered them as a divine revelation, which, like the language and the letter, was already given to Adam, or certainly to Moses" (Dr. Kalisch, *Heb. Gr.* ii. 65). No vowel-points are to be found on any of the Jewish coins, or in the Palmyrene inscriptions, and they are wanting in all the relics of Phœnician writing. Some of the Maltese inscriptions were once thought by Gesenius to have marks of this kind (*Gesch. der Hebr. Spr.* p. 184), but subsequent examination led him to the conclusion that the Phœnician monuments have not a vestige of vowel-points. The same was the case originally in the Estrangelo and Cufic alphabets. A single example of a diacritical mark occurs for the first time on one of the Carthaginian inscriptions (Gesen. *Mon. Phœn.* pp. 56, 179). It appears to correspond to the diacritical mark which we meet with in Syriac writing, and which is no doubt first alluded to by Ephraem Syrus (on Gen. xxxvi. 24, *Opp.* i. 184). The age of this mark in Syriac is uncertain, but it is most nearly connected with the *markhetono* of the Samaritans, which is used to distinguish words which have the same consonants, but a different pronunciation and meaning. The first certain indication of vowel-points in a Shemitic language is in the Arabic. Three were introduced by Ali, son of Abu-Thalleb, who died A. H. 40. The Sabian writing also has three vowel points, but its age is uncertain. Five vowel-points and several reading marks were introduced into the Syriac writing by Theophilus and Jacob of Edessa. The present Arabic system of punctuation originated with the introduction of the Nischi character by Ebn Mokla, who died A. D. 939. On the whole, taking into consideration the nature and analogies of the kindred Shemitic languages, and the Jewish tradition that the vowels were only transmitted orally by Moses, and were afterwards reduced to signs and fixed by Ezra and the Great Synagogue, the preponderance of evidence goes to show that Hebrew was written without

Digitized by Google

vowels or diacritical marks all the time that it was a living language. The fact that the synagogue rolls are written without points, and that a strong traditional prescription against their being pointed exists, is in favor of the later origin of the vowel marks The following passages from the Old Testament, quoted by Gesenius, tend to the same conclusion. In Gen. xix. 37, the name Moab (מוֹאָב), is explained as if it were מֵאָב, "from a father," in which case all trace not only of vocalization, but of the quiescent letter has disappeared. In Gen. xxxi. 47, גִּלְעָד, Gilead is made to take its name from גַּלְעֵד, "heap of witness," and Gen. l. 11, אָבֵל מִצְרַיִם = אֵבֶל מִצְרַיִם. So also in 2 K. xxii. 9, וַיָּבֵא שָׁפָן הַסֹּפֵר appears in the parallel narrative of 2 Chr. xxxiv. 16 as וַיָּבֵא שָׁפָן אֶת הַסֵּפֶר, which could not have happened if the chronicler had had a pointed text before him. Upon examining the version of the LXX. it is equally clear that the translators must have written from an unpointed text. It is objected to this that the ἅπαξ λεγόμενα are correctly explained, and that they also distinguish between words which have the same consonants but different vowel-points, and even between those which are written and pronounced alike. On the other hand they frequently confuse words which have the same consonants but different vowels. The passages which Gesenius quotes (*Gesch. d. Heb. Spr.* § 50) would necessarily be explained from the context, and we must besides this take into consideration that in the ambiguous cases there were in all probability traditional interpretations. The proper names afford a more accurate test. On examining these, we find that they sometimes have entirely different vowels, and sometimes are pointed according to an entirely different system, analogous to the Arabic and Syriac, but varying from the Masoretic. Examples of an entirely different vocalization are, אֲמָתַי, Αμαθι, יָקְמָן, Ιεκταν, יַרְדֵּן, Ιορδανης, מֶשֶׁךְ, Μοσοχ, מַרְדְּכַי, Μαρδοχαιος, רַמְלָיָה, Ρομελιας, צְפַנְיָה, Σοφονιας, סַגְבֵּי, Σοβοχαι, etc. That the punctuation followed by the LXX. was essentially distinct from that of the Masoretes is evident from the following examples. Moving *sheva* at the beginning of words is generally represented by *α*; as in Σαμουηλ, Σαβαωθ, Ζαβουλων: seldom by *ε*, as in Βελιαλ, Χερουβιμ; before י or ו by *ο* or *υ*, as Σοδομα, Σολομων, Γομορρα, Ζοροβαβελ, φυλιστιειμ, etc. *Pathach* is represented by *ε*; as Μελχισεδεχ, Νεφθαλειμ, Ελισαβεθ. *Pathach furtivum* = *α*; *e. g.* Ωσηε, Γελβουε, Θεκωε, Ζαρωε. Other examples might be multiplied. We find instances to the same effect in the fragments of the other Greek versions, and in Josephus. The agreement of the Targums with the present punctuation might be supposed to supply an argument in favor of the antiquity of the latter, but it might equally be appealed to to show that the translation of the Targums embodied the traditional pronunciation which was fixed in writing by the punctuators. The Talmud has likewise been appealed to in support of the antiquity of the modern points; but its utterances on this subject are extremely dark and difficult to understand. They have respect on the one hand to those passages in which the sense of a text is disputed, in so far as it depends upon a different pronunciation; for instance, whether in Cant. i. 2, we should read דּוֹדַיִךְ or דּוֹדַיִךְ; in Ex. xxi. 8, תִּבְרוֹ or תִּבְרוֹ; in Lev. x. 25, שִׂבְעִים or שִׂבְעִים; in Is. liv. 13, בָּנָיִךְ or בָּנָיִךְ. A Rabbinic legend makes Joab kill his teacher, because in Ex. xvii. 14 he had taught him to read זָכֹר for זָכוֹר. The last passage shows at least, that the Talmudists thought the text in David's time was unpointed, and the others prove that the punctuation could not have been fixed as it must have been if the vowel-points had been written. But in addition to these instances, which are supposed to involve the existence of vowel-points, there are certain terms mentioned in the Talmud, which are interpreted as referring directly to the vowel signs and accents themselves. Thus in the treatise *Berachoth* (fol. 62, 3) we find the phrase טעמי תורה, *ta'dmé thórâh*, which is thought to denote not only the distinctive accents and those which mark the tone, but also the vowel-points. Hupfeld, however, has shown that in all probability the term טעם, *ta'am*, denotes nothing more than a logical sentence, and that consequently פיכוח טעמים, *pisûk té' dmîm* (*Nedarim*, fol. 37, 1), is simply a division of a sentence, and has nothing whatever to do either with the tone or the vowels (*Stud. u. Krit.* 1830, ii. 567). The word סימן, *simân* (Gr. σημεῖον) which occurs in the Talmud (*Nedarim*, fol. 53), and which is explained by Rashi to signify the same as נקוד, *nikkûd*, "a point," has been also appealed to as an evidence of the existence of the vowel-points at the time the Talmud was composed, but its true meaning is rather that of a mnemonic sign made use of to retain the memory of what was handed down by oral tradition. The oldest Biblical critics, the collectors of the Keri and Cethib, have left no trace of vowel-points: all their notes have reference to the consonants. It is now admitted that Jerome knew nothing of the present vowel-points and their names. He expressly says that the Hebrews very rarely had vowels, by which he means the letters ע, ה, ו, י, א, in the middle of words; and that the consonants were pronounced differently according to the pleasure of the reader and the province in which he lived (*Epist. ad Evagr.* 125). The term *accentus*, which he there uses, appears to denote as well the pronunciation of the vowels as the nice distinctions of certain consonantal sounds, and has no connection whatever with accents in the modern sense of the word. The remarks which Jerome makes as to the possibility of reading the same Hebrew consonants differently, according to the different vowels which were affixed to them, is an additional proof that in his day the vowel-points were not written (see his *Comm. in Hos.* xlii. 3; *Hab.* iii. 5). Hupfeld concludes that the present system of pronunciation had not commenced in the 6th century, that it belonged to a new epoch in Jewish literature, the Masoretic in opposition to the Talmudic, and that, taking into consideration that the Syrians and Arabs, among whom the Jews lived, had already made a begin-

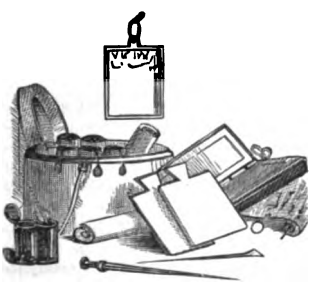
Digitized by Google

ning in punctuation, there is the highest probability that the Hebrew system of points is not indigenous, but transmitted or suggested from without (*Stud. u. Krit.* 1830, ii. 589). On such a question it is impossible to pronounce with absolute certainty, but the above conclusion has been arrived at by one of the first Hebrew scholars of Europe, who has devoted especial attention to the subject, and to whose opinion all deference is due.

"According to a statement on a scroll of the Law, which may have been in Susa from the eighth century, Moses the Punctator (Hannakdan) was the first who, in order to facilitate the reading of the Scriptures for his pupils, added vowels to the consonants, a practice in which he was followed by his son Judah, the Corrector or Reviser (Hammagiah). These were the beginnings of a full system of Hebrew points, the completion of which has, by tradition, been associated with the name of the Karaite Acha of Irak, living in the first half of the sixth century, and which comprised the vowels and accents, dagesh and rapheh, keri and kethiv. It was, from its local origin, called the Babylonian or Assyrian system. Almost simultaneously with these endeavors, the scholars of Palestine, especially of Tiberias, worked in the same direction, and here Rabbi Mocha, a disciple of Anan the Karaite, and his son Moses, fixed another system of vocalization (about 570), distinguished as that of Tiberias, which marks still more minutely and accurately the various shades and niceties of tone and pronunciation, and which was ultimately adopted by all the Jews. For though the Karaites, with their characteristic tenacity, and their antagonism to the Rabbanites, clung for some time to the older signs, because they had used them before their secession from the Talmudical sects, they were, at last, in 957, induced to abandon them in favor of those adopted in Palestine. Now the Babylonian signs, besides differing from those of Tiberias in shape, are chiefly remarkable by being almost uniformly placed above the letters. There still exist some manuscripts which exhibit them, and many more would probably have been preserved had not, in later times, the habit prevailed of substituting in old codices the signs of Tiberias for those of Babylonia" (Dr. Kalisch, *Hebr. Gram.* ii. 63, 64).[a] From the sixth century downwards the traces of punctuation become more and more distinct. The Masorah mentions by name two vowels, *kamets* and *pathach* (Kalisch, p. 66). The collation of the Palestinian and Babylonian readings (8th cent.) refers at least in two passages to the *mappik* in *He* (Eichhorn, *Einl.* i. 274); but the collation set on foot by Ben Asher and Ben Naphtali (cir. A. D. 1034) has to do exclusively with vowels and reading-marks, and their existence is presupposed in the Arabic of Saadias and the Veneto-Greek version, and by all the Jewish grammarians from the 11th century onwards.

It now remains to say a few words on the accents. Their especial properties and the laws by which they are regulated properly belong to the department of Hebrew grammar, and full information on these points will be found in the works of Gesenius, Hupfeld, Ewald, and Kalisch. The object of the accents is twofold. 1. They serve to mark the tone syllable, and at the same time to show the relation of each word to the sentence: hence they are called טְעָמִים, as marking the sense. 2. They indicate the modulation of the tone according to which the Old Testament was recited in the synagogues, and were hence called נְגִינוֹת. "The manner of recitation was different for the Pentateuch, the prophets, and the metrical books (Job, the Proverbs, and the Psalms): old modes of cantillation of the Pentateuch and the prophets (in the Haphtaroth) have been preserved in the German and Portuguese synagogues; both differ indeed, considerably, yet manifestly show a common character, and are almost like the same composition sung in two different keys; while the chanting of the metrical books, not being employed in the public worship, has long been lost" (Kalisch, p. 84). Several modern investigators have decided that the use of the accents for guiding the public recitations is anterior to their use as marking the tone of words and syntactical construction of sentences. The great number of the accents is in favor of this hypothesis, since one sign alone would have been sufficient to mark the tone, and the logical relation of the different parts of a sentence could have been indicated by a much smaller number. Gesenius, on the other hand, is inclined to think that the accents at first served to mark the tone and the sense (*Gesch.* p. 221). The whole question is one of mere conjecture. The advocates for the antiquity of the accents would carry them back as far as the time of the ancient Temple service. The Gemara (*Nedarim*, fol. 37, 2; *Megillah*, c. i. fol. 3) makes the Levites recite according to the accents even in the days of Nehemiah.

*Writing Materials, etc.* — The oldest documents which contain the writing of a Shemitic race are probably the bricks of Nineveh and Babylon on which are impressed the cuneiform Assyrian inscriptions. Inscribed bricks are mentioned by Pliny (vii. 56) as used for astronomical observations by the Babylonians. There is, however, no evidence that they were ever employed by the Hebrews,[b] who certainly at a very early period practiced the more difficult but not more durable method of writing on stone (Ex. xxiv. 12, xxxi. 18, xxxii. 15, xxxiv. 1, 28; Deut. x. 1, xxvii. 1; Josh. viii. 32), on which inscriptions were cut with an iron graver (Job xix. 24; Jer. xvii. 1). They were moreover acquainted with the art of engraving upon metal (Ex. xxviii. 36) and gems (Ex. xxviii. 9). Wood was used upon some occasions (Num. xvii. 3; comp. Hom. *Il.* vii. 175), and writing tablets of box-wood are mentioned in 2 Esdr. xiv. 24. The "lead," to which allusion is made in Job xix. 24, is supposed to have been poured when melted into the cavities of the stone made by the letters of an inscription, in order to render it durable,[c] and does not appear ever to have been used by the Hebrews as a writing material, like the χάρται μολύβδινοι at Thebes, on which were written Hesiod's *Works and Days* (Paus. ix. 31, § 4; comp. Plin. xiii. 21). Inscriptions and documents which were intended to be permanent were written



[a] For further information on the Babylonian system of punctuation, see Pinsker's *Einleitung in die Babylonisch-Hebraische Punktationssystem*, just published at Vienna (1863).

[b] The case of Ezekiel (iv. 1) is evidently an exception.

[c] Copper was used for the same purpose. M. Botta found traces of it in letters on the pavement slabs Khorsabad (Layard, *Nin.* ii. 188).

on tablets of brass (1 Macc. viii. 22, xiv. 27), but from the manner in which they are mentioned it is clear that their use was exceptional. It is most probable that the most ancient as well as the most common material which the Hebrews used for writing was dressed skin in some form or other. We know that the dressing of skins was practiced by the Hebrews (Ex. xxv. 5; Lev. xiii. 48), and they may have acquired the knowledge of the art from the Egyptians, among whom it had attained great perfection, the leather-cutters constituting one of the principal subdivisions of the third caste. The fineness of the leather, says Sir G. Wilkinson, "employed for making the straps placed across the bodies of mummies, discovered at Thebes, and the beauty of the figures stamped upon them, satisfactorily prove the skill of 'the leather-cutters,' and the antiquity of embossing: some of these bearing the names of kings who ruled Egypt about the period of the Exodus, or 3,300 years ago" (*Anc. Eg.* iii. 155). Perhaps the Hebrews may have borrowed, among their other acquirements, the use of papyrus from the Egyptians, but of this we have no positive evidence. Papyri are found of the most remote Pharaonic age (Wilkinson, *Anc. Eg.* iii. 148), so that Pliny is undoubtedly in error when he says that the papyrus was not used as a writing material before the time of Alexander the Great (xiii. 21). He probably intended to indicate that this was the date of its introduction to Europe.

**Ancient Writing Materials.**

In the Bible the only allusions to the use of papyrus are in 2 John 12, where *χάρτης* occurs, which refers especially to papyrus paper, and 3 Macc. iv. 20, where *χαρτήρια* is found in the same sense. In Josephus (*Ant.* iii. 11, § 6) the trial of adultery is made by writing the name of God on a *skin*, and the 70 men who were sent to Ptolemy from Jerusalem by the high-priest Eleazar, to translate the Law into Greek, took with them the *skins* on which the Law was written in golden characters (*Ant.* xii. 2, § 10). The oldest Persian annals were written on skins (Diod. Sic. ii. 32), and these appear to have been most frequently used by the Shemitic races if not peculiar to them.[a] Of the byssus which was used in India before the time of Alexander (Strabo xv. p. 717), and the palm-leaves mentioned by Pliny (vii. 23), there is no trace among the Hebrews, although we know that the Arabs wrote their earliest copies of the Koran upon the roughest materials, as stones, the shoulder-bones of sheep, and palm-leaves (De Sacy, *Mém. de l'Acad. des Inscript.* l. p. 307). Herodotus, after telling us that the Ionians learnt the art of writing from the Phœnicians, adds that they called their books skins (*τὰς βίβλους διφθέρας*), because they made use of sheep-skins and goat-skins when short of paper (*βίβλος*). Among the Cyprians, a writing-master was called *διφθεραλοιφος*. Parchment was used for the MSS. of the Pentateuch in the time of Josephus, and the *μεμβράνας* of 2 Tim iv. 13 were skins of parchment. It was one of the provisions in the Talmud that the Law should be written on the skins of clean animals, tame or wild, or even of clean birds. There are three kinds of skins distinguished, on which the roll of the Pentateuch may be written: 1. קֻלָּף, *keleph* (*Meg.* ii. 2; *Shabb.* viii. 3); 2. דוכסטוס = *διχαστός* or *δίξεστος*; and 3. גְּוִיל, *gĕvil*. The last is made of the undivided skin, after the hair is removed and it has been properly dressed. For the other two the skin was split. The part with the hairy side was called *keleph*, and was used for the *tephillin* or phylacteries; and upon the other (דוכס") the *mezuzoth* were written (Maimonides, *Hilc. Tephil.*). The skins when written upon were formed into rolls (מְגִלּוֹת, *mĕgillôth*; Ps. xl. 7 (8); comp Is. xxxiv. 4; Jer. xxxvi. 14; Ez. ii. 9: Zech. v. 1). They were rolled upon one or two sticks and fastened with a thread, the ends of which were sealed (Is. xxix. 11; Dan. xii. 4; Rev. v. 1, etc.). Hence the words גָּלַל, *gâlal* (*ελίσσειν*), to roll up (Is. xxxiv. 4; Rev. vi. 14), and פָּרַשׂ, *pâras* (*ἀναπτύσσειν*), to unroll (2 K. xix. 14; Luke iv. 17), are used of the closing and opening of a book. The rolls were generally written on one side only, except in Ez. ii. 10; Rev. v. 1. They were divided into columns (דַּלְתוֹת, *dĕlâthôth*, lit. "doors," A. V. "leaves," Jer. xxxvi. 23); the upper margin was to be not less than three fingers broad, the lower not less than four; and a space of two fingers' breadth was to be left between every two columns (Waehner, *Ant. Ebræor.* vol. i. sect. 1, cap. xlv. § 337). In the Herculaneum rolls the columns are two fingers broad, and in the MSS. in the library at Stuttgart there are three columns on each side, each three inches broad, with an inch space between the columns, and margins of three inches wide (Leyrer in Herzog's *Encykl.* "Schriftzeichen"). The case in which the rolls were kept was called *τεῦχος* or *θήκη*, Talmudic קֻנְדָּס, *cevec*, or קַרְטָא, *carcâ*. But besides skins, which were used for the more permanent kinds of writing tablets of wood covered with wax (Luke i. 63, *πινακίδια*) served for the ordinary purposes of life. Several of these were fastened together and formed volumes (טוֹמוֹת, = *tomos*). They were written upon with a pointed style (עֵט, *'ĕt*, Job xix. 24), sometimes of iron (Ps. xlv. 1 (2); Jer. viii. 8, xvii. 1) For harder materials a graver (חֶרֶט, *cheret*, Ex. xxxii. 4; Is. viii. 1) was employed: the hard point was called צִפֹּרֶן, *tsippôren* (Jer. xvii. 1). For parchment or skins a reed was used (3 John 13; 3 Macc. iv. 20 and according to some the

[a] The word for "book," סֵפֶר, *sêpher*, is from a root, סָפַר, *sâphar*, "to scrape, shave," and indirectly points to the use of skin as a writing material.

Digitized by Google

Law was to be written with nothing else (Waehner, § 334). The ink, דְּיוֹ, *dêyô* (Jer. xxxvi. 18), literally "black," like the Greek μέλαν (2 Cor. iii. 3; 2 John 12; 3 John 13), was to be of lampblack dissolved in gall juice, though sometimes a mixture of gall juice and vitriol was allowable (Waehner, § 335). It was carried in an inkstand (קֶסֶת הַסֹּפֵר, *keseth hassôphêr*), which was suspended at the girdle (Ez. ix. 2, 3), as is done at the present day in the East. The modern scribes "have an apparatus consisting of a metal or ebony tube for their reed pens, with a cup or bulb of the same material, attached to the upper end, for the ink. This they thrust through the girdle, and carry with them at all times" (Thomson, *The Land and the Book*, p. 131). Such a case for holding pens, ink, and other materials for writing is called in the Mishna קַלְמָרִין, *kalmârin*, or קַלְמַרְיוֹן *kalmaryôn* (*calamarium*; Mishn. *Celim*, ii. 7; *Mikv.* x. 1) while תַּרְוֹנְתָק, *tervôntêk* (Mish. *Celim*, xvi. 8), is a case for carrying pens, penknife, style, and other implements of the writer's art. To professional scribes there are allusions in Ps. xlv. 1 [2]; Ezr. vii. 6; 2 Esdr. xiv. 24. In the language of the Talmud these are called לַבְלָרִין, *lablârin*, which is a modification of the Lat. *libellarii* (Talm. *Shabb.* fol. 16, 1).

Sprache*, 1817; *Monumenta Phœnicia*, 1837; Art. *Palæographie* in Ersch and Gruber's *Allg. Encycl.*: Hupfeld, *Ausführliche hebräische Grammatik*, 1841, and his articles in the *Studien und Kritiken*, 1830, Band 2: A. T. [G.] Hoffmann, *Grammatica Syriaca*, 1827: A. G. Hoffmann, Art. *Hebräische Schrift* in Ersch and Gruber: Fürst, *Lehrgebäude der aramäischen Idiome*, 1835: Ewald, *Ausführliches Lehrbuch der hebr. Sprache*: Saalschütz, *Forschungen im Gebiete der hebräisch-ägyptischen Archäologie*, 1838; besides other works, which have been referred to in the course of this article. W. A. W.

* This may be a suitable place to speak of the *writing* on the Moabite stone recently discovered on the east of the Dead Sea. In August, 1868, the Rev. F. Klein, connected with the Church Missionary Society in Jerusalem, met with this monumental stone at *Dhibân*, the ancient Dibon (דִּיבֹן) on a journey from *Es-Salt* to *Kerak*, a region seldom visited by Europeans and still comparatively unknown. He copied a small part of the inscription and took measurements, which show the stone to have been about 3 feet 9 inches long, 2 feet 4 inches in breadth, and 1 foot 2 inches thick. It was in almost perfect preservation, lying with the inscription uppermost, and was a basaltic stone, exceedingly heavy. No inscription was on the bottom of the side, which was perfectly smooth, and without marks. But unfortunately, before the stone could be properly examined, owing to the unwillingness of the Arabs to give it up, it was broken into fragments by cold water having been thrown upon it after it had been heated by fire. We are indebted mainly to the efforts of Capt. Warren, and the French vice-consul at Jerusalem, M. Ganneau, for impressions or *squeezes* taken of the main block and some of the recovered parts, from which we learn the character and importance of this interesting monument. The investigations are not yet complete, but are supposed to establish the following results. (1.) The stone is undoubtedly the oldest Shemitic monument yet found. (2.) It is stated by Mr. Deutsch, of the British Museum, that the characters appear older "than many of the Assyrian bi-lingual cylinders in the British Museum, the date of which is, at the very least, as old as the ninth century, B. C." (3.) The stone chronicles the achievements of one Mesha, king of the Moabites. Now it was about this time (namely, 900 B. C.), that Mesha lived, against whom Jehoram and Jehoshaphat fought (2 K. iii. 4 ff.). [MESHA.] (4.) The inscription is full of well-known Biblical names, such as Beth-Bamoth Beth-Baal-Meon, Horonaim, and Dibon. (5.) Mention is frequently made of Israel, a rival power, and of Chemosh, the national God of Moab. (6.) It is invaluable to the student of alphabets. Nearly the whole of the Greek alphabet is found here, not merely similar to the Phœnician shape, but as identical with it as can well be.

Some of the words, and even lines, it should be added, are too illegible to be clearly deciphered; some parts of the stone remain (if still existing) to be examined, and interpreters differ somewhat in the reading of portions of the text in their possession. One value of the discovery is its confirming the Scripture intimations (1 Sam. vii. 12 and xv. 12), that the inhabitants of Palestine, like those of Egypt and Assyria, had monumental records, and it encourages the hope that by perseverance still others may be found. (For fuller details see *Quart. Statement of the Pal. Explor. Fund*, Nos. iv. and v.)

Among the best accounts of this stone is unquestionably that of Prof. Schlottmann, *Die Siegessäule Mesa's Königs der Moabiter; ein Beitrag zur hebräischen Alterthumskunde* (Halle, 1870), supplemented by an art. in the *Zeitschr. d. D. M. Gesellschaft*, 1870, p. 253 ff. He gives at length the details of its discovery, and shows the impossibility of any collusion or fraud on the part of the Arabs. He presents a German translation of the epigraph, supplying in brackets the missing or illegible words, on conjectural grounds of course, and gives the same in Hebrew, for the sake of comparing the cognate dialects. It is remarkable that no word occurs in the Moabite fragment of which the root does not exist in the Hebrew Biblical text. It reads in this respect, as M. de Vogüé remarks, almost like a page from the Hebrew Scriptures. Prof. Schlottmann points out various important connections between this document and the Biblical history. Prof. G. Rawlinson, on "the Moabite Stone" (*Contemp. Rev.* Aug. 1870, pp. 97–112), dwells particularly on "the palæographical value of the discovery." He argues, among other points, that the more primitive forms of the letters on "the stone" resemble the objects from which they are named much more strikingly than the later forms, and therefore confirm the theory of the pictorial origin of alphabetic writing. He finds evidence, also, in the closer resemblance between these more primitive figures and the earliest Greek letters, that the Greeks borrowed the art of writing from the Phœnicians at a much earlier date than many have assigned to that event. Letters, according to this view, were not necessarily unknown to the Greeks in the time of Homer and Hesiod. The Pentateuch and other oldest parts of the He-

Hebrew Scriptures were not improbably written at first in characters like those represented on the Moabite stone.

Essays on the Moabite stone, with translations of the inscription, have also been published by MM. Gannesu, de Vogüé, Sachs, Derenbourg, Nöldeke, Neubauer, Haug, Geiger, and others, and in this country by the Rev. W. H. Ward (*Proceedings of the Amer. Oriental Society* for May, 1870), to whom we are indebted for the palæographical supplements to the present article. Mr. Ward's essay is to appear, enlarged, in the *Bibl. Sacra* for Oct. 1870. H.

* The last few years have seen the study of the history of writing advanced considerably by the labors of Oslander, Geiger, Levy, Lauth, Brugsch, Kirchhoff, Lenormant, de Vogüé, and others. Scores of new and important inscriptions in various languages, of which the most important is that of King Mesha of Moab, found the present year in the ancient Dibon, have been discovered and seized upon by eager students.

The general result of these investigations has been to magnify the importance and to extend the sway of the old Canaanite or Phœnician alphabet, and to indicate more clearly to us its original characters. It is not improbable that every style of script now in use, with the exception of the Chinese and Japanese, is the lineal descendant of the letters of Cadmus.

Whether the three systems of picture-writing, the Egyptian, the Central American, and the Chinese; the two alphabetic systems of the ancient Persians and the Phœnicians, and the mixed system of Assyria had all a common origin, as Geiger maintains, in the valley of the Euphrates, it is as yet impossible to decide. In order to express thought to the eye, pictures would first be employed. These pictures would next stand for the first syllable of the words which they had represented, and finally for the first vocal elements of those syllables. Such, no doubt, was the history of the Shemitic alphabet. The names of the letters seem to point to a hieroglyphic period, as they all signify objects of which pictures could be drawn. Then the fact that the Shemitic alphabet has no vowels points to a period when the vowel system of the language was less developed, and when each written consonant carried its own vowel with it, as in the syllabic system of ancient Assyria. We know of two modern cases, one of the Cherokee Indian Sequoya or Guest, and the other of Doalu Bukere in Africa, in which savages, having gained some inkling of the civilized method of representing fractions of words by arbitrary signs, have themselves invented an alphabet. It is a suggestive fact that in both of these cases the system which they hit upon was syllabic. Sequoya in 1823 had devised an alphabet composed of two hundred syllables, which he afterwards reduced to eighty-five. Such was probably the original syllabic character of the Shemitic alphabet, consisting of consonants followed by the primitive vowel *a*. Had the alphabet originally been formed by making an ultimate analysis of sounds it would be difficult to explain the fact that the vowels, the most prominent elements in such an analysis, are all absent.

It is now generally admitted that the Phœnician or Shemitic alphabet was derived from the Egyptian hieratic characters (Brugsch, *Zeitschr. f. Hieroglyphic*, 1864, p. 70 ff., and in his *Bildung u. Entw. d. Schrift*, Berl. 1868. F. Lenormant, *Sur la prop. de l'alph. phén.*, Par. 1868. Lauth *Ueber d. ägypt. Ursprung uns. Buchstaben u. Ziffern*, in the *Sitzungsb. d. bair. Akad. d. Wiss.*, 1867, li. 84–124. G. Ebers, *Ägypten u. d. Bücher Mose's*, Leipz. 1868, pp. 147–151. Schröder, *Die phönic. Sprache*, Halle, 1869, p. 76. E. Schrader, in De Wette's *Einl. in d. Bücher d. A. T.*, 8te Aufl., 1869, p. 189). Taking as our basis for comparison on the one hand the most archaic Phœnician forms as given on gems and seals and on the Moabite Inscription, and on the other the most ancient hieratic characters as found on the papyrus *Prisse*, a manuscript of the twelfth dynasty, and so older than the Hyksos, we find that in at least half of the Phœnician letters there is an evident resemblance to the corresponding hieratic. In the Phœnician, as in the Hebrew, *Daleth* and *Resh* are almost identical. The same is true in the hieratic writing. In these two letters, and in *Lamed*, *Nun*, and *Shin*, the resemblance is quite striking. Probably the adaptation of the Egyptian characters to the use of the Phœnician or Canaanite language, was due to the large Shemitic colony which occupied the Delta of the Nile even before the Hyksos invasion; although some have given the credit to the Hyksos conquerors, and others even to the Israelites, although their condition in Egypt was certainly not favorable to literary pursuits.

The names of the letters are pure Shemitic and not Egyptian. This shows that although hieratic characters were borrowed, the Egyptian names were not taken with them. In selecting these names it is probable that the simplest and most familiar objects were chosen which happened to have names beginning with the desired letter. In most cases it is useless to try to find in the characters any resemblance to the objects whose names they bear. Thus in the Egyptian hieroglyphic *Lamed* is a lion. This in the hieratic is reduced to a conventional form which was adopted almost exactly into the Phœnician alphabet, but with a change of name from "lion" to לָמֶד, "an ox-goad," which it does not resemble at all in shape. The most we can say is that the selection of common visible objects for names of the letters is in imitation of the Egyptian picture-writing, and in a few cases it may have been possible, as in דָּלֶת, a door, and מַיִם, water, to find words beginning with the requisite letter which agreed in sense with the shape of the letters.

We can be approximately certain of the origina form of the Phœnician letters. By far the most important monument for this purpose is the Moabite column of Mesha, belonging to the first half of the ninth century before Christ. Next in importance to this are the inscriptions on some weights found in Assyria by Layard, and which are nearly as old. Beside these are quite a number of seals and gems of extreme antiquity. The later Phœnician monuments are counted by hundreds, and one of them, the great Sidonian inscription, is of considerable palæographical value. De Vogüé concludes as the result of his study of these remains that the alphabet in its archaic form was characterized by the prevalence of sharp angles (*Journal Asiatique*, 1867, p. 171). The zigzag shape of *Mem* and *Shin* is a certain proof of the antiquity of the monument that contains them. A few letters, notably *Zayin* and *Tsade*, retained their sharp angles to a late period. Of this original form we do not possess

Digitized by Google

a single pure example, unless it be a single scarabæus, bearing the legend לשלם, "belonging to Shallum," which may be as old as the time of David. In the Moabite Inscription these sharp angles are generally preserved, although *Lamed* has lost its angle to the right, and *Beth*, *Kaph*, *Mem*, *Nun*, and *Pe*, curve their first stroke somewhat to the left. *Ayin*, which means "an eye," may have been originally circular, as we here find it, and the same may have been the case with *Vau* and *Koph*, both of which have rounded heads on the Moabite stone. We here first find *Daleth* the simple Greek *Delta*, Δ, and quite distinguishable from *Resh*; and *Samekh* identical with the earliest Greek ξ as found in the Corcyra inscriptions of the forty-fifth Olympiad. From this archaic Phœnician, of which Lenormant gives the characters so far as they were then known (*Revue Archéologique*, 1867), were derived the Greek letters of which we have specimens as old as the ninth century before Christ, written so exactly in the Phœnician character, and still turned to the left, that Prof. F. Hitzig (*Zeitschr. d. D. M. G.* 1858, p. 273) has tried to translate, as if Phœnician, the inscription from Shera, cut under the picture of a fish, "[Τι]μων εγραφε με."

The first stage in the modification of the original Phœnician character was the substitution of transverse bars for the original zigzags, first in *Mem* and afterwards in *Shin*. At the same time the letters show more curves, and in the Aramæan dialects all the zigzags disappear; and the heads of *Beth*, *Daleth*, and *Resh*, which were at first closed and triangular, are opened at the top. From the Aramæan character by gradual changes was derived the Palmyrene and the modern square Hebrew.

This is hardly the place to give the genealogy of any other than the square Hebrew of all the alphabets that are descendants of the old Shemitic. For the Greek, reference may be made to the elaborate alphabets of Greece, Asia Minor, and the Ionian Islands given by Kirchhoff (*Stud. zur Gesch. d. griech. Alphabets*, in the *Abh. d. Akad. d. Wiss. zu Berlin*, 1863). For the Latin Mommsen has done a similar service. Weber, following Prinsep, makes it not improbable (*Zeitschr. d. D. M. G.* x. 389 ff.) that the Sanskrit had a similar origin, carrying with it all the alphabets of India, Burmah, Java, and Thibet. His argument, however, is by no means universally accepted as conclusive. The Zend and Pehlevi alphabets are of Shemitic origin, as Spiegel shows in his *Gram. der Huzvaresch-sprache*, pp. 26, 34 ff. Klaproth has remarked that the Mongolian, Tungusian, and Manchu alphabets are from the Syrian; though modified, it is true, by the perpendicular columnar arrangement of the Chinese. Add to these the Samaritan, Æthiopic, and Syriac; the Arabic, with its characters modified or unmodified as accepted by Turks, Persians, Malays, Hindostanees, Berbers, and Touareks; still further remember that the Cyrillian and Glagolitic alphabets of Bulgaria and Russia, and the Gothic of Ulphilas, were of Shemitic origin through the Greek, and those of the rest of the civilized world through the Latin: and we have the Chinese left as the only living written language whose alphabet is not lineally descended from that of Cadmus. To the literature referred to above, add M. A. Levy, *Phönicische Studien*, 4 Hefte, Breal. 1856–70; *Siegel u. Gemmen*, ibid. 1869; *Die palmyren. Inschriften*, in *Zeitschr. d. D. M. G.*, 1864, p. 65 ff. W. H. W.

# X.

XANTHICUS. [MONTH, iii 200]

# Y.

YARN (מִקְוֶה; μήκωνα). The notice of yarn is contained in an extremely obscure passage in 1 K. x. 28 (2 Chr. i. 16): "Solomon had horses brought out of Egypt, and linen yarn; the king's merchants received the linen yarn at a price." The LXX. gives ἐκ Θεκουέ, implying an original reading of מִתְּקוֹעַ; the Vulg. has *de Coa*, which is merely a Latinized form of the original. The Hebrew Received Text is questionable, from the circumstance that the second *mikvéh* has its final vowel lengthened as though it were in the *status constructus*. The probability is that the term does refer to some entrepôt of Egyptian commerce, but whether Tekoah, as in the LXX., or Coa, as in the Vulg., is doubtful. Gesenius (*Thes.* p. 1202) gives the sense of "number" as applying equally to the merchants and the horses: "A *band* of the king's merchants bought a *drove* (of horses) at a price;" but the verbal arrangement in 2 Chr. is opposed to this rendering. Thenius (*Exeg. Hdb.* on 1 K. x. 28) combines this sense with the former, giving to the first *mikvéh* the sense "from Tekoah," to the second the sense of "drove." Bertheau (*Exeg. Hdb.* on 2 Chr. i. 16) and Fürst (*Lex.* s. v.) side with the Vulgate, and suppose the place called *Coa* to have been on the Egyptian frontier: "The king's merchants from Coa (*i. e.* stationed at Coa) took the horses from Coa at a price." The sense adopted in the A. V. is derived from Jewish interpreters. W. L. B.

YEAR (שָׁנָה: ἔτος: *annus*), the highest ordinary division of time. The Hebrew name is identical with the root שָׁנָה, "he or it repeated, did the second time;" with which are cognate the ordinal numeral שֵׁנִי, "second," and the cardinal, שְׁנַיִם, "two." The meaning is therefore thought to be "an iteration," by Gesenius, who compares the Latin *annus*, properly a circle. Gesenius also compares the Arabic حَوْلٌ, which he says signifies "a circle, year." It signifies "a year," but not "a circle," though sometimes meaning "around:" its root is حَالَ, "it became altered or changed, it shifted, passed, revolved and passed, or became complete" (on Mr. Lane's authority). The ancient Egyptian RENP, "a year," seems to resemble *annus*; for in Coptic one of the forms of its equivalent, ⲣⲟⲙⲡⲓ, the Bashmuric ⲣⲁⲙⲡⲓ, ⲗⲁⲙⲡⲓ, is identical with the Sahidic ⲣⲁⲙⲡⲓ, "a handle, ring," ⲣⲁⲙⲡⲉⲓ, "rings." The sense of the Hebrew might either be a recurring period, or a circle of seasons, or else a period circling through the seasons. The first sense is agreeable with any period of time; the second, with the Egyptian

Digitized by Google

"primitive year," which, by the use of tropical seasons as divisions of the "Vague Year," is shown to have been tropical in reality or intention; the third agrees with all "wandering years."

I. Years, properly so called.

Two years were known to, and apparently used by, the Hebrews.

1. A year of 360 days, containing twelve months of thirty days each, is indicated by certain passages in the prophetical Scriptures. The time, times, and a half, of Daniel (vii. 25, xii. 7), where "time" (Ch. עִדָּן, Heb. מוֹעֵד) means "year," evidently represent the same period as the 42 months (Rev. xi. 2) and 1,260 days of the Revelation (xi. 3, xii. 6), for $360 \times 3.5 = 1{,}260$, and $30 \times 42 = 1{,}260$. This year perfectly corresponds to the Egyptian vague year, without the five intercalary days. It appears to have been in use in Noah's time, or at least in the time of the writer of the narrative of the Flood, for in that narrative the interval from the 17th day of the 2d month to the 17th day of the 7th of the same year appears to be stated to be a period of 150 days (Gen. vii. 11, 24, viii. 3, 4, comp. 13), and, as the 1st, 2d, 7th, and 10th months of one year are mentioned (viii. 13, 14, vii. 11, viii. 4, 5), the 1st day of the 10th month of this year being separated from the 1st day of the 1st month of the next year by an interval of at least 54 days (viii. 5, 6, 10, 12, 13), we can only infer a year of 12 months. Ideler disputes the former inference, arguing that as the water first began to sink after 150 days (and then had been 15 cubits above all high mountains), it must have sunk for some days ere the Ark could have rested on Ararat, so that the second date must have been more than 150 days later than the first (*Handbuch*, i. 69, 70, 478, 479). This argument depends upon the meaning of the expression "high mountains," and upon the height of "the mountains of Ararat," upon which the Ark rested (Gen. viii. 4), and we are certainly justified by Shemitic usage, if we do not consider the usual inference of the great height attained by the Flood to be a necessary one (*Genesis of the Earth and of Man*, 2d ed. pp. 97, 98). The exact correspondence of the interval mentioned to 5 months of 30 days each, and the use of a year of 360 days, or 12 such months, by the prophets, the latter fact overlooked by Ideler, favor the idea that such a year is here meant, unless indeed one identical with the Egyptian vague year, of 12 months of 30 days and 5 intercalary days. The settlement of this question depends upon the nature and history of these years, and our information on the latter subject is not sufficiently certain to enable us to do more than hazard a conjecture.

A year of 360 days is the rudest known. It is formed of 12 spurious lunar months, and was probably the parent of the lunar year of 354 days, and the vague year of 365. That it should have continued any time in use would be surprising were it not for the convenient length of the months. The Hebrew year, from the time of the Exodus, as we shall see, was evidently lunar, though in some manner rendered virtually solar, and we may therefore infer that the lunar year is as old as the date of the Exodus. As the Hebrew year was not an Egyptian year, and as nothing is said of its being new, save in its time of commencement, it was perhaps earlier in use among the Israelites, and either brought into Egypt by them or borrowed from Shemite settlers.

The vague year was certainly in use in Egypt in as remote an age as the earlier part of the XIIth dynasty (B. C. cir. 2000), and there can be no reasonable doubt that it was there used at the time of the building of the Great Pyramid (B. C. cir. 2350). The intercalary days seem to be of Egyptian institution, for each of them was dedicated to one of the great gods, as though the innovation had been thus made permanent by the priests, and perhaps rendered popular as a series of days of feasting and rejoicing. The addition would, however, date from a very early period, that of the final settlement of the Egyptian religion.

As the lunar year and the vague year run up parallel to so early a period as that of the Exodus, and the former seems to have been then Shemite, the latter then, and for several centuries earlier, Egyptian, and probably of Egyptian origin, we may reasonably conjecture that the former originated from a year of 360 days in Asia, the latter from the same year in Africa, this primitive year having been used by the Noachians before their dispersion.

2. The year used by the Hebrews from the time of the Exodus may be said to have been then instituted, since a current month, Abib, on the 14th day of which the first Passover was kept, was then made the first month of the year. The essential characteristics of this year can be clearly determined, though we cannot fix those of any single year. It was essentially solar, for the offerings of productions of the earth, first-fruits, harvest-produce, and ingathered fruits, were fixed to certain days of the year, two of which were in the periods of great feasts, the third itself a feast reckoned from one of the former days. It seems evident that the year was made to depend upon these times, and it may be observed that such a calendar would tend to cause thankfulness for God's good gifts, and would put in the background the great luminaries which the heathen worshipped in Egypt and in Canaan. Though the year was thus essentially solar, it is certain that the months were lunar, each commencing with a new moon. There must therefore have been some method of adjustment. The first point to be decided is how the commencement of each year was fixed. On the 16th day of Abib ripe ears of corn were to be offered as first-fruits of the harvest (Lev. ii. 14, xxiii. 10, 11): this was the day on which the sickle was begun to be put to the corn (Deut. xvi. 9), and no doubt Josephus is right in stating that until the offering of first-fruits had been made no harvest-work was to be begun (*Ant.* iii. 10, § 5). He also states that ears of barley were offered (*ibid.*). That this was the case, and that the ears were the earliest ripe, is evident from the following circumstances. The reaping of barley commenced the harvest (2 Sam. xxi. 9), that of wheat following, apparently without any considerable interval (Ruth ii. 23). On the day of Pentecost thanksgiving was offered for the harvest, and it was therefore called the "Feast of Harvest." It was reckoned from the commencement of the harvest, on the 16th day of the 1st month. The 50 days must include the whole time of the harvest of both wheat and barley throughout Palestine. According to the observations of modern travellers, barley is ripe, in the warmest parts of Palestine, in the first days of April. The barley-harvest therefore begins about half a month or less after the vernal equinox. Each year, if solar, would thus begin at about that

Digitized by Google

equinox, when the earliest ears of barley must be ripe. As, however, the months were lunar, the commencement of the year must have been fixed by a new moon near this point of time. The new moon must have been that which fell about or next after the equinox, not more than a few days before, on account of the offering of first-fruits. Ideler, whose observations on this matter we have thus far followed, supposes that the new moon was chosen by observation of the forwardness of the barley-crops in the warmer parts of the country (*Handbuch*, i. 490). But such a method would have caused confusion on account of the different times of the harvest in different parts of Palestine; and in the period of the Judges there would often have been two separate commencements of the year in regions divided by hostile tribes, and in each of which the Israelite population led an existence almost independent of any other branch. It is more likely that the Hebrews would have determined their new year's day by the observation of heliacal or other star-risings or settings known to mark the right time of the solar year. By such a method the beginning of any year could have been fixed a year before, either to one day, or, supposing the month-commencements were fixed by actual observation, within a day or two. And we need not doubt that the Israelites were well acquainted with such means of marking the periods of a solar year. In the ancient Song of Deborah we read how "They fought from heaven; the stars in their courses fought against Sisera. The river of Kishon swept them away, that ancient river, the river Kishon" (Judg. v. 20, 21). The stars that marked the times of rain are thus connected with the swelling of the river in which the fugitive Canaanites perished. So too we read how the LORD demanded of Job, "Canst thou bind the sweet influences of Cimah, or loose the bands of Cesil?" (Job xxxviii. 31). "The best and most fertilizing of the rains," in Palestine and the neighboring lands, save Egypt, "fall when the Pleiades set at dawn (not exactly heliacally), at the end of autumn; rain scarcely ever falling at the opposite season, when Scorpio sets at dawn." That Cimah signifies the Pleiades does not admit of reasonable doubt, and Cesil, as opposite to it, would be Scorpio, being identified with Cor Scorpionis by Aben Ezra. These explanations we take from the article FAMINE [vol. i. p. 810 *b*, and note]. Therefore it cannot be questioned that the Israelites, even during the troubled time of the Judges, were well acquainted with the method of determining the seasons of the solar year by observing the stars. Not alone was this the practice of the civilized Egyptians, but, at all times of which we know their history, of the Arabs, and also of the Greeks in the time of Hesiod, while yet their material civilization and science were rudimentary. It has always been the custom of pastoral and scattered peoples, rather than of the dwellers in cities; and if the Egyptians be thought to form an exception, it must be recollected that they used it at a period not remote from that at which their civilization came from the plain of Shinar.

It follows, from the determination of the proper new moon of the first month, whether by observation of a stellar phenomenon, or of the forwardness of the crops, that the method of intercalation can only have been that in use after the Captivity, the addition of a thirteenth month whenever the twelfth ended too long before the equinox for the offering of the first-fruits to be made at the time fixed. This method is in accordance with the permission granted to postpone the celebration of the Passover for one month in the case of any one who was legally unclean, or journeying at a distance (Num. ix. 9–13); and there is a historical instance in the case of Hezekiah of such a postponement, for both reasons, of the national celebration (2 Chr. xxx. 1–3, 15). Such a practice as that of an intercalation varying in occurrence is contrary to western usage; but the like prevails in all Muslim countries in a far more inconvenient form in the case of the commencement of every month. The day is determined by actual observation of the new moon, and thus a day is frequently unexpectedly added to or deducted from a month at one place, and months commence on different days at different towns in the same country. The Hebrew intercalation, if determined by stellar phenomena, would not be liable to a like uncertainty, though such may have been the case with the actual day of the new moon.

The later Jews had two commencements of the year, whence it is commonly but inaccurately said that they had two years, the sacred year and the civil. We prefer to speak of the sacred and civil reckonings. Ideler admits that these reckonings obtained at the time of the Second Temple. The sacred reckoning was that instituted at the Exodus, according to which the first month was Abib: by the civil reckoning the first month was the seventh. The interval between the two commencements was thus exactly half a year. It has been supposed that the institution at the time of the Exodus was a change of commencement, not the introduction of a new year, and that thenceforward the year had two beginnings, respectively at about the vernal and the autumnal equinoxes. The former supposition is a hypothesis, the latter may almost be proved. The strongest point of evidence as to two beginnings of the year from the time of the Exodus, strangely unnoticed in this relation by Ideler, is the circumstance that the sabbatical and jubilee years commenced in the 7th month, and no doubt on the 10th day of the 7th month, the Day of Atonement (Lev. xxv. 9, 10), and as this year immediately followed a sabbatical year, the latter must have begun in the same manner. Both were full years, and therefore must have commenced on the first day. The jubilee year was proclaimed on the first day of the month, the Day of Atonement standing in the same relation to its beginning, and perhaps to the civil beginning of the year, as did the Passover to the sacred beginning. This would be the most convenient, if not the necessary commencement of a year of total cessation from the labors of agriculture, as a year so commencing would comprise the whole round of such occupations in regular sequence from seed-time to harvest, and from harvest to vintage and gathering of fruit. The command as to both years, apart from the mention of the Day of Atonement, clearly shows this, unless we suppose but this is surely unwarrantable, that the injunction in the two places in which it occurs follows the regular order of the seasons of agriculture (Ex. xxiii. 10, 11; Lev. xxv. 3, 4, 11), but that this was not intended to apply in the case of the observance. Two expressions, used with reference to the time of the Feast of Ingathering on the 15th day of the 7th month, must be here noticed. This feast is spoken of as תְּקוּפַת הַשָּׁנָה, "in the going out" or "end of the year" (Ex. xxiii. 16), and as

Digitized by Google

תְּקוּפַת הַשָּׁנָה, [at] the change of the year" (xxxiv. 22), the latter a vague expression, as far as we can understand it, but quite consistent with the other, whether indicating the turning-point of a natural year, or the half of the year by the sacred reckoning. The Rabbins use the term תְּקוּפוֹת to designate the commencement of each of the four seasons into which they divide the year (*Handbuch*, i 550, 551). Our view is confirmed by the similarity of the 1st and 7th months as to their observances, the one containing the Feast of Unleavened Bread from the 15th to the 21st inclusive; the other, that of Tabernacles, from the 15th to the 22d. Evidence in the same direction is found in the special sanctification of the 1st day of the 7th month, which in the blowing of trumpets resembles the proclamation of the jubilee year on the Day of Atonement. We therefore hold that from the time of the Exodus there were two beginnings of the year, with the 1st of the 1st and the 1st of the 7th month, the former being the sacred reckoning, the latter, used for the operations of agriculture, the civil reckoning. In Egypt, in the present day, the Muslims use the lunar year for their religious observances, and for ordinary affairs, except those of agriculture, which they regulate by the Coptic Julian year.

We must here notice the theories of the derivation of the Hebrew year from the Egyptian vague year, as they are connected with the tropical point or points, and agricultural phenomena, by which the former was regulated. The vague year was commonly used by the Egyptians; and from it only, if from an Egyptian year, is the Hebrew likely to have been derived. Two theories have been formed connecting the two years at the Exodus.

(1.) Some hold that Abib, the first month of the Hebrew year by the sacred reckoning, was the Egyptian Epiphi, called in Coptic ⲉⲡⲏⲡ, and in Arabic, by the modern Egyptians, أَبِيب, Abeeb, or Ebeeb, the 11th month of the vague year. The similarity of sound is remarkable, but it must be remembered that the Egyptian name is derived from that of the goddess of the month, PEP-T or APAP-T (?) [a] whereas the Hebrew name has the sense of "an ear of corn, a green ear," and is derived from the unused root אָבַב, traceable in אָב, "verdure," אֵב, Chaldee, "fruit," אֵב, "green fodder." Moreover, the Egyptian P is rarely, if ever, represented by the Hebrew ב, and the converse is not common. Still stronger evidence is afforded by the fact that we find in Egyptian the root AB, "a nosegay," which is evidently related to Abib and its cognates. Supposing, however, that the Hebrew calendar was formed by fixing the Egyptian Epiphi as the first month, what would be the chronological result? The latest date to which the Exodus is assigned is about B. C. 1320. In the Julian year B. C. 1320 the month Epiphi of the Egyptian vague year commenced May 16, 44 days after the day of the vernal equinox, April 2, very near which the Hebrew year must have begun. Thus at the latest date of the Exodus, there is an interval of a month and a half between the beginning of the Hebrew year and Epiphi 1. This interval represents about 180 years, through which the vague year would retrograde in the Julian until the commencement of Epiphi corresponded to the vernal equinox, and no method can reduce it below 100. It is possible to effect thus much by conjecturing that the month Abib began somewhat after this tropical point, though the precise details of the state of the crops at the time of the plagues, as compared with the phenomena of agriculture in Lower Egypt at the present day, make half a month an extreme extension. At the time of the plague of hail, the barley was in the ear and was smitten with the flax, but the wheat was not sufficiently forward to be destroyed (Ex. ix. 31, 32). In Lower Egypt, at the present day, this would be the case about the end of February and beginning of March. The Exodus cannot have taken place many days after the plague of hail, so that it must have occurred about or a little after the time of the vernal equinox, and thus Abib cannot possibly have begun much after that tropical point: half a month is therefore excessive. We have thus carefully examined the evidence as to the supposed derivation of Abib from Epiphi, because it has been carelessly taken for granted, and more carelessly alleged in support of the latest date of the Exodus.

(2.) We have founded an argument for the date of the Exodus upon another comparison of the Hebrew year and the vague year. We have seen that the sacred commencement of the Hebrew year was at the new moon about or next after, but not much before, the vernal equinox: the civil commencement must usually have been at the new moon nearest the autumnal equinox. At the earliest date of the Exodus computed by modern chronologers, about the middle of the 17th century B. C., the Egyptian vague year commenced at or about the latter time. The Hebrew year, reckoned from the civil commencement, and the vague year, therefore, then nearly or exactly coincided. We have already seen that the Hebrews in Egypt, if they used a foreign year, must be supposed to have used the vague year. It is worth while to inquire whether a vague year of this time would further suit the characteristics of the first Hebrew year. It would be necessary that the 14th day of Abib, on which fell the full moon of the Passover of the Exodus, should correspond to the 14th of Phamenoth, in a vague year commencing about the autumnal equinox. A

---

a The names of the Egyptian months derived from their divinities, are alone known to us in Greek and Coptic forms. These forms are shown by the names of the divinities given in the sculptures of the ceiling of the Rameseum of El-Kurneh to be corrupt; but in several cases they are traceable. The following are certain: 1. Θώθ, ⲑⲱⲟⲩⲧ, divinity THET (Thoth), as well as a goddess. 2. Παῦφι, ⲡⲁⲱⲡⲓ, PTEH, *i. e.* PAPTEH, belonging to Ptah. 3. Ἀθύρ, ⲁⲑⲱⲣ, HATHAR. 9. Παχών, ⲡⲁϫⲱⲛ, KHUNS, *i. e.* PAKHUNS. 11. Παῦνι, ⲉⲡⲏⲡ, PEP-T, or APAP-T. The names of months are therefore, in their corrupt forms, either derived from the names of divinities, or the same as those names. The name of the goddess of Epiphi is written PT TEK, or PT, "twice." As T is the feminine termination, the root appears to be P, "twice," thus PEP-T or APAP-T, the latter being Lepsius's reading. (See Lepsius *Denkmäler*, abth. iii. bl. 170, 171, *Chron. d. Ägg.* i 141, and Poole, *Horæ Ægyptiacæ*, pp. 7–9, 14, 15 18.)

Digitized by Google

full moon fell on the 14th of Phamenoth, or Thursday, April 21, B. C. 1652, of a vague year commencing on the day of the autumnal equinox, Oct. 10, B. C. 1653. A full moon would not fall on the same day of the vague year within a shorter interval than twenty-five years, and the triple near coincidence of new moon, vague year, and autumnal equinox, would not recur in less than 1,500 vague years (*Enc. Brit.* 8th ed. *Egypt*, p. 458). This date of the Exodus, B. C. 1652, is only four years earlier than Hales's, B. C. 1648. In confirmation of this early date, it must be added that in a list of confederates defeated by Thothmes III. at Megiddo in the 23d year of his reign, are certain names that we believe can only refer to Israelite tribes. The date of this king's accession cannot be later than about B. C. 1460, and his 23d year cannot therefore be later than about B. C. 1440.[a] Were the Israelites then settled in Palestine, no date of the Exodus but the longest would be tenable. [CHRONOLOGY.]

II. Divisions of the Year. — 1. *Seasons.* Two seasons are mentioned in the Bible, קַיִץ, "summer," and חֹרֶף, "winter." The former properly means the time of cutting fruits, the latter, that of gathering fruits; they are therefore originally rather summer and autumn than summer and winter. But that they signify ordinarily the two grand divisions of the year, the warm and cold seasons, is evident from their use for the whole year in the expression קַיִץ וָחֹרֶף, "summer and winter" (Ps. lxxiv. 17; Zech. xiv. 8, perhaps Gen. viii. 22), and from the mention of "the winter house" (Jer. xxxvi. 22) and "the summer house" (Am. iii. 15, where both are mentioned together). Probably חֹרֶף, when used without reference to the year (as in Job xxix. 4), retains its original signification. In the promise to Noah, after the Flood, the following remarkable passage occurs: "While the earth remaineth, seed time and harvest, and cold and heat, and summer and winter, and day and night shall not cease" (Gen. viii. 22). Here "seed-time," זֶרַע, and "harvest," קָצִיר, are evidently the agricultural seasons. It seems unreasonable to suppose that they mean winter and summer, as the beginnings of the periods of sowing and of harvest are not separated by six months, and they do not last for six months each, or nearly so long a time. The phrase "cold and heat," לֹר וָחֹם, probably indicates the great alternations of temperature. The whole passage indeed speaks of the alternations of nature, whether of productions, temperature, the seasons, or light and darkness. As we have seen, the year was probably then a wandering one, and therefore the passage is not likely to refer to it, but to natural phenomena alone. [SEASONS; CHRONOLOGY.]

2. *Months.* — The Hebrew months, from the time of the Exodus, were lunar. The year appears ordinarily to have contained twelve, but, when intercalation was necessary, a thirteenth. The older year contained twelve months of thirty days each. [MONTH; CHRONOLOGY.]

3. *Weeks.* — The Hebrews, from the time of the institution of the Sabbath, whether at or before the Exodus, reckoned by weeks, but, as no lunar year could have contained a number of weeks without a fractional excess, this reckoning was virtually independent of the year as with the Muslims. [WEEK, SABBATH; CHRONOLOGY.]

4. *Festivals, Holy Days, and Fasts.* — The Feast of the Passover was held on the 14th day of the 1st month. The Feast of Unleavened Bread lasted 7 days; from the 15th to the 21st, inclusive, of the same month. Its first and last days were kept as sabbaths. The Feast of Weeks, or Pentecost, was celebrated on the day which ended seven weeks counted from the 16th of the 1st month, that day being excluded. It was called the "Feast of Harvest," and "Day of First-fruits." The Feast of Trumpets (lit. "of the sound of the trumpet"), was kept as a sabbath on the 1st day of the 7th month. The Day of Atonement (lit. "of Atonements") was a fast, held the 10th day of the 7th month. The "Feast of Tabernacles," or "Feast of Gathering," was celebrated from the 15th to the 22d day, inclusive, of the 7th month. Additions made long after the giving of the Law, and not known to be of higher than priestly authority, are the Feast of Purim, commemorating the defeat of Haman's plot; the Feast of the Dedication, recording the cleansing and re-dedication of the Temple by Judas Maccabæus; and four fasts.

III. Sacred Years. — 1. The Sabbatical year, שְׁנַת הַשְּׁמִטָּה, "the fallow year," or, possibly, "year of remission," or שְׁמִטָּה alone, kept every seventh year, was commanded to be observed as a year of rest from the labors of agriculture, and of remission of debts. Two Sabbatical years are recorded, commencing and current, B. C. 164–3 and 136–5. [SABBATICAL YEAR; CHRONOLOGY.]

2. The Jubilee year, שְׁנַת הַיּוֹבֵל, "the year of the trumpet," or יוֹבֵל alone, a like year, which immediately followed every seventh Sabbatical year. It has been disputed whether the Jubilee year was every 49th or 50th: the former is more probable. [JUBILEE; CHRONOLOGY.]

• **YELLOW.** [COLORS.]

• **YER** = *ere*, in the A. V. ed. 1611. Num. xi. 33, xiv. 11. H.

**YOKE.** 1. A well-known implement of husbandry, described in the Hebrew language by the terms *môt*,[b] *môṭâh*,[c] and *'ôl*,[d] the two former specifically applying to the bows of wood out of which it was constructed, and the last to the application (*binding*) of the article to the neck of the ox. The expressions are combined in Lev. xxvi. 13 and Ez. xxxiv. 27, with the meaning, "bands of the yoke." The term "yoke" is frequently used metaphorically for *subjection* (e. g. 1 K. xii. 4, 9–11; Is. ix. 4; Jer. v. 5): hence an "iron yoke" represents an unusually galling bondage (Deut. xxviii. 48; Jer. xxviii. 13). 2. A pair of oxen, so termed as being yoked together (1 Sam. xi. 7; 1 K. xix. 19, 21). The Hebrew term, *tsemed*,[e] is also applied to asses (Judg. xix. 10) and mules (2 K. v. 17), and even to a couple of riders (Is. xxi. 7). 3. The term *tsemed* is also applied to a certain amount of land equivalent to that which a couple of oxen could plough in a day (Is. v. 10; A. V. "acre"), cor

Digitized by Google

responding to the Latin *jugum* (Varro, *R. R* i. 10). The term stands in this sense in 1 Sam. xiv. 14 (A. V. "yoke"); but the text is doubtful, and the rendering of the LXX. suggests that the true reading would refer to the instruments (ἐν κόχλαξι) wherewith the slaughter was effected. [OXEN.] W. L. B.

* **YOKE-FELLOW.** The interest of this word lies in the question whether the Greek word (σύζυγε or σύνζυγε) is correctly so rendered, Phil. iv. 3, or should be taken as a proper name, *Syzygus* or *Synzygus*. If as in the A. V. it has the appellative force, it must be a man who is meant and not a woman; for the accompanying adjective (γνήσιε) has properly three terminations, and is here masculine, and hence though the noun may be masculine or feminine, the Apostle's wife is not to be thought of, as some strangely imagine, in opposition also to the manifest inference from 1 Cor. vii. 8 that Paul was never married (ἄγαμος). Some suppose Luke to be intended, who from the omission of his name in Phil. i. 1 appears not to have been at Rome when Paul wrote the letter; and others that it was Epaphroditus, who was at the Apostle's side at the moment, and was thus abruptly addressed (ἐρωτῶ καὶ σε). These and similar explanations presuppose a knowledge of personal relations on the part of the readers rendering the allusion obvious to them though utterly obscure to us.

We think the best view after all to be that of Meyer (*Br. an die Philipper*, in loc.), Laurent (*Neutest. Studien*, pp. 134–137), and others, that Syzygus or Synzygus is a proper name, borne by one who had been associated with Paul in Christian labors, who was at Philippi when the Apostle wrote the letter, and was well known there as deserving the encomium which this appeal to him implies. Paul nowhere else uses this word (σύζυγος) of any one of his official associates, not using it in fact in any other passage. It is found here in the midst of other proper names (vv. 2, 3); and the attributive "genuine" (γνήσιε) corresponds finely and significantly to the appellative sense of such a name. That such an alliteration is not foreign to Paul's manner, see Philem., vv. 10, 11. The name, it is true, does not appear anywhere else; but many other names also are found only in single instances, and certainly many names must have been in use among the ancients which have not been transmitted at all. Paul himself repeatedly mentions persons in his epistles who are named only once, and a catalogue of names might be made out from the Acts of the Apostles, of those whose whole history for us lies in a single passage. H.

# Z.

## ZAANA'IM, THE PLAIN OF (אַלּוֹן בְּצַעֲנַיִם: δρῦς πλεονεκτούντων; Alex. δ. ἀναπαυομένων: *Vallis quæ vocatur Sennim*); or, more accurately, "the oak by Zaannaim," such being probably the meaning of the word *élón*. [PLAIN, iii. 2547 *b*.] A tree — probably a sacred tree — mentioned as marking the spot near which Heber the Kenite was encamped when Sisera took refuge in his tent (Judg. iv. 11). Its situation is defined as "near Kedesh," *i. e.* Kedesh-Naphtali, the name of which still lingers on the high ground, south of *Safed*, and west of the Lake of *el-Huleh*, usually identified with the Waters of Merom. The Targum gives as the equivalent of the name, *mishor aggamiya*, "the plain of the swamp," and in the well-known passage of the Talmud (*Megillah Jerush.* i.) which contains a list of several of the towns of Galilee with their then identifications, the equivalent for "Elon (or Aijalon) be-Zaannaim" is *Agmiya hak-kodesh*. *Agme* appears to signify a swamp, and can hardly refer to anything but the marsh which borders the lake of *Huleh* on the north side, and which was probably more extensive in the time of Deborah than it now is [MEROM]. On the other hand, Professor Stanley has pointed out (*Jewish Church*, p. 324; *Localities*, p. 197) how appropriate a situation for this memorable tree is afforded by "a green plain . . . . studded with massive terebinths," which adjoins on the south the plain containing the remains of Kedesh. The whole of this upland country is more or less rich in terebinths. One such, larger than usual, and bearing the name of *Sejar em-Messiah*, is marked on the map of Van de Velde as 6 miles N. W. of *Kedes*. These two suggestions — of the ancient Jewish and the modern Christian student — may be left side by side to await the result of future investigation. In favor of the former is the slight argument to be drawn from the early date of the interpretation, and the fact that the basin of the *Huleh* is still the favorite camping-ground of Bedouins. In favor of the latter is the instinct of the observer and the abundance of trees in the neighborhood.

No name answering to either Zaannaim or Agne has yet been encountered.

The *Keri*, or correction, of Judg. iv. 11, substitutes Zaananim for Zaanaim, and the same form is found in Josh. xix. 33. This correction the lexicographers adopt as the more accurate form of the name. It appears to be derived (if a Hebrew word) from a root signifying to load beasts as nomads do when they change their places of residence (Gesen. *Thes.* p. 1177). Such a meaning agrees well with the habits of the Kenites. But nothing can be more uncertain than such explanations of topographical names — most to be distrusted when most plausible. G.

**ZA'ANAN** (צַעֲנָן [*rich in herds:*] Σενναάρ; [Comp. Σαανάν:] *in exitu*). A place named by Micah (i. 11) in his address to the towns of the *Shefélah*. This sentence, like others of the same passage, contains a play of words founded on the meaning (or on a possible meaning) of the name Zaanan, as derived from *yatsah*, to go forth: —

"The inhabitress of Tsaanan came not forth."

The division of the passage shown in the LXX. and A. V., by which Zaanan is connected with Beth-ezel, is now generally recognised as inaccurate. It is thus given by Dr. Pusey, in his *Commentary*: "The inhabitant of Zaanan came not forth. The mourning of Beth-ezel shall take from you its standing." So also Ewald, De Wette, and Zunz.

Zaanan is doubtless identical with ZENAN. G.

* **ZAANAN'NIM** (צַעֲנַנִּים: Βεσεμείν, Va. -ειν; Alex. Βεσεναείμ; Comp. Σεσεναείμ: *Sa..nanim*), Josh. xix. 33. [ZAANAIM.] A.

**ZA'AVAN** (זַעֲוָן [*disquieted*]: Ζουάβ, Alex. Ιωυκαμ, Ιεσαυ: *Zavan*). A Horite chief, son of Ezer the son of Seir (Gen. xxxvi. 27; 1 Chr.

Digitized by Google

I. 42). The LXX. appear to have read וְיָדָן In 1 Chr. the A. V. has ZAVAN.

**ZA'BAD** (זָבָד [*gift, present*]: Ζαβάδ, Ζαβέρ; Alex. Ζαβαρ in 1 Chr. xi.: *Zabad*: short for זְבַדְיָה: see Zebadiah, Zabdi, Zabdiel, Zebedee, "*God* hath given *him*").

1. Son of Nathan, son of Attai, son of Ahlai, Sheshan's daughter (1 Chr. ii. 31–37), and hence called son of Ahlai (1 Chr. xi. 41). He was one of David's mighty men, but none of his deeds have been recorded. The chief interest connected with him is his genealogy, which is of considerable importance in a chronological point of view, and as throwing incidental light upon the structure of the book of Chronicles, and the historical value of the genealogies in it. Thus in 1 Chr. ii. 26–41, we have the following pedigree, the generations preceding Jerahmeel being prefixed: —

| | | |
|---|---|---|
| (1.) Judah. | | (13.) Nathan. |
| (2.) Pharez. | | (14.) ZABAD. |
| (3.) Hezron. | | (15.) Ephlal. |
| (4.) Jerahmeel. | | (16.) Obed. |
| (5.) Onam. | | (17.) Jehu. |
| (6.) Shammai. | | (18.) AZARIAH. |
| (7.) Nadab. | | (19.) Heles. |
| (8.) Appaim. | | (20.) Eleasah. |
| (9.) Ishi. | | (21.) Sisamai. |
| (10.) Sheshan. | | (22.) Shallum. |
| (11.) Ahlai, his daughter | = Jarha the Egyptian. | (23.) Jekamiah. |
| (12.) Attai. | | (24.) Elishama. |

Here, then, is a genealogy of twenty-four generations, commencing with the patriarch, and terminating we know not, at first sight, where; but as we happen to know, from the history, where Zabad the son of Ahlai lived, we are at least sure of this fact, that the *fourteenth* generation brings us to the time of David; and that this is about the correct number we are also sure, because out of seven other perfect genealogies, covering the same interval of time, four have the same number (*fourteen*), two have *fifteen*, and David's own has *eleven*. [GENEAL. OF JESUS CHRIST, i. 886.]

But it also happens that another person in the line is an historical personage, whom we know to have lived during the usurpation of Athaliah, namely, Azariah the son (*i. e.* grandson) of Obed (2 Chr. xxiii. 1). [AZARIAH, 18.] He was *fourth* after Zabad, while Jehoram, Athaliah's husband, was *sixth* after David — a perfectly satisfactory correspondence when we take into account that Zabad [a] may probably have been considerably younger than David, and that the early marriages of the kings have a constant tendency to increase the number of generations in the royal line. Again, the last name in the line is the sixth after Azariah; but Hezekiah was the sixth king after Athaliah, and we know that many of the genealogies were written out by "the men of Hezekiah," and therefore of course came down to his time [BÖCHER. i. 259] (see 1 Chr. iv. 41; Prov. xxv. 1). So that we may conclude, with great probability, both that this genealogy ends in the time of Hezekiah, and that all its links are perfect.

One other point of importance remains to be noticed, namely, that Zabad is called, after his great-grandmother, the founder of his house, *son of Ahlai*. For that Ahlai was the name of Sheshan's daughter is certain from 1 Chr. ii. 31; and it is also certain, from vv. 35, 36, that from her marriage with Jarha descended, in the third generation, Zabad. It is therefore as certain as such matters can be, that Zabad the son of Ahlai, David's mighty man, was so called from Ahlai his female ancestor. The case is analogous to that of Joab, and Abishai, and Asahel, who are always called *sons of Zeruiah*, Zeruiah, like Ahlai, having married a foreigner. Or if any one thinks there is a difference between a man being called the son of his mother, and the son of his great-grandmother, a more exact parallel may be found in Gen. xxv. 4, xxxvi. 12, 13, 16, 17, where the descendants of Keturah, and of the wives of Esau, in the third and fourth generation, are called "the sons of Keturah," "the sons of Adah" and "of Basbemath" respectively.

2. (Ζαβάδ; [Vat.] Alex. Ζαβεδ.) An Ephraimite, if the text of 1 Chr. vii. 21 is correct. [See SHUTHELAH.]

3. (Ζαβάδ; [Vat. Ζαβελ;] Alex. Ζαβεθ.) Son of Shimeath, an Ammonitess, an assassin who, with Jehozabad, slew king Joash, according to 2 Chr. xxiv. 26; but in 2 K. xii. 21, his name is written, probably more correctly, Jozachar [JOZACHAR]. He was one of the domestic servants of the palace, and apparently the agent of a powerful conspiracy (2 Chr. xxv. 3; 2 K. xiv. 5). Joash had become unpopular from his idolatries (2 Chr. xxiv. 18), his oppression (*ibid.* 22), and, above all, his calamities (*ibid.* 23–25). The explanation given in the article JOZACHAR is doubtless the true one, that the chronicler represents this violent death of the king, as well as the previous invasion of the Syrians, as a Divine judgment against him for the innocent blood of Zechariah shed by him: not that the assassins themselves were actuated by the desire to avenge the death of Zechariah. They were both put to death by Amaziah, but their children were spared in obedience to the law of Moses (Deut. xxiv. 16). The coincidence between the names *Zechariah* and *Jozachar* is remarkable.

A. C. H.

4. (Ζαβάδ [Vat. Ζαβαδαβ].) A layman of Israel, of the sons of Zattu, who put away his foreign wife at Ezra's command (Ezr. x. 27). He is called SABATUS in 1 Esdr. ix. 28.

5. ([Rom.] Ζαδάβ; [Vat. FA., with prec. word, Αθαζαβελ; Alex.] Ζαβαδ.) One of the descendants of Hashum, who had married a foreign wife after the Captivity (Ez. x. 33): called BANNAIA in 1 Esdr. ix. 33.

6. (Ζαβάδ; [Vat. FA. Ζεδεμ;] Alex. om.) One of the sons of Nebo, whose name is mentioned under the same circumstances as the two preceding (Ezr. x. 43). It is represented by ZABADAIAS in 1 Esdr. ix. 35.

W. A. W.

**ZABADA'IAS** [4 syl.] (Ζαβαδαίας: *Sabadus*). ZABAD 6 (1 Esdr. ix. 35; comp. Ez. x. 43).

**ZABADE'ANS** [properly ZABADÆ'ANS] (Ζαβεδαῖοι; [Sin. Ζαβαδαιοι;] Alex. Ζαβαδεοι: *Zabadæi*). An Arab tribe who were attacked and spoiled by Jonathan, on his way back to Damascus from his fruitless pursuit of the army of Demetrius (1 Macc. xii. 31). Josephus calls them Nabatæans (*Ant.* xiii. 5, § 10), but he is evidently in error Nothing certain is known of them. Ewald (*Geseh*

[a] He does not appear in the list in 2 Sam. xxiv., and may therefore be presumed to have been added in the latter part of David's reign.

Digitized by Google

iv. 382 finds a trace of their name in that of the place *Zabdn* given by Robinson in his lists; but this is too far south, between the *Yarmuk* and the *Zurka*. Michaelis suggests the Arab tribe *Zebideh*; but they do not appear in the necessary locality. Jonathan had pursued the enemy's army as far as the river Eleutherus (*Nahr el-Kebir*), and was on his march back to Damascus when he attacked and plundered the Zabadeans. We must look for them, therefore, somewhere to the north-west of Damascus. Accordingly, on the road from Damascus to Baalbek, at a distance of about 8½ hours (26 miles) from the former place, is the village *Zebdâny*, standing at the upper end of a plain of the same name, which is the very centre of Anti-Libanus. The name *Zebdâny* is possibly a relic of the ancient tribe of the Zabadeans. According to Burckhardt (*Syria*, p. 3), the plain "is about three quarters of an hour in breadth, and three hours in length; it is called *Ard Zebdeni*, or the district of Zebdeni; it is watered by the Barrada, one of whose sources is in the midst of it; and by the rivulet called *Moiet Zebdeni*, whose source is in the mountain behind the village of the same name." The plain is "limited on one side by the eastern part of the Anti-Libanus, called here *Djebel Zebdeni*." The village is of considerable size, containing nearly 3,000 inhabitants, who breed cattle, and the silkworm, and have some dyeing-houses (*ibid.*). Not far from *Zebdâny*, on the western slopes of Anti-Libanus, is another village called *Kefr Zebad*, which again seems to point to this as the district formerly occupied by the Zabadeans. W. A. W.

**ZAB'BAI** [2 syl.] (זַבַּי [perh. *pure, innocent*]: Ζαβού: *Zabbai*). 1. One of the descendants of Bebai, who had married a foreign wife in the days of Ezra (Ezr. x. 28). He is called JOSABAD in 1 Esdr. ix. 29.

2. (Ζαβού; FA. Ζαβρου: *Zachai*.) Father of Baruch, who assisted Nehemiah in rebuilding the city wall (Neh. iii. 20).

**ZAB'BUD** (זַבּוּד [*given, bestowed*], *Keri*, זַכּוּר: Ζαβούδ; [Vat. omits:] *Zachur*). One of the sons of Bigvai, who returned in the second caravan with Ezra (Ezr. viii. 14). In 1 Esdr. viii. 40 his name is corrupted into ISTALCURUS.

**ZABDE'US** [properly ZABDÆUS] (Ζαβδαῖος: Vulg. om.). ZEBADIAH of the sons of Immer (1 Esdr. ix. 21; comp. Ez. x. 20).

**ZAB'DI** (זַבְדִּי [*Jehovah gave*]: Ζαμβρί [Vat. -βρει]; Alex. Ζαβρι in Josh. vii. 1: *Zabdi*). 1. Son of Zerah, the son of Judah, and ancestor of Achan (Josh. vii. 1, 17, 18).

2. (Ζαβδί: [Vat. Ζαββει.]) A Benjamite, of the sons of Shimhi (1 Chr. viii. 19).

3 ([Vat. Ζαχρει:] *Zabdius*.) David's officer over the produce of the vineyards for the wine-cellars (1 Chr. xxvii. 27). He is called "the Shiphmite," that is, in all probability, native of Shepham," but his native place has not been traced.

4. ([Rom.] Vat. and Alex. om.; FA. third hand, Ζαχρι: *Zebedeus*.) Son of Asaph the minstrel Neh. xi. 17); called elsewhere ZACCUR (Neh. xii. 35) and ZICHRI (1 Chr. ix 15).

**ZAB'DIEL** (זַבְדִּיאֵל [*gift of God*]: Ζαβδιήλ [Vat. -δει-]: *Zabdiel*). 1. Father of Jashobeam, the chief of David's guard (1 Chr. xxvii. 2)

2. (Βαβδιήλ; Alex. Ζοχριηλ; [FA.[1] βαζιηλ.]) A priest, son of the great men, or, as the margin gives it, "Haggedolim" (Neh. xi. 14). He had the oversight of 128 of his brethren after the return from Babylon.

3. (Ζαβδιήλ; Joseph. Ζάβηλος: *Zabdiel*.) An Arabian chieftain who put Alexander Balas to death (1 Macc. xi. 17; Joseph. *Ant.* xiii. 4, § 8). According to Diodorus, Alexander Balas was murdered by two of the officers who accompanied him (Müller, *Fragm. Hist.* ii. 16).

**ZA'BUD** (זָבוּד [*given*]: Ζαβούθ; Alex. Ζαββουθ; [Comp. Ζαβούδ:] *Zabud*). The son of Nathan (1 K. iv. 5). He is described as a priest (A. V. "principal officer;" PRIEST, iii. 2576), and as holding at the court of Solomon the confidential post of "king's friend," which had been occupied by Hushai the Archite during the reign of David (2 Sam. xv. 37, xvi. 16; 1 Chr. xxvii. 33). This position, if it were an official one, was evidently distinct from that of counsellor, occupied by Ahithophel under David, and had more of the character of private friendship about it, for Absalom conversely calls David the "friend" of Hushai (2 Sam. xvi. 17). In the Vat. MS of the LXX. the word "priest" is omitted, and in the Arabic of the London Polyglot it is referred to Nathan. The Peshito-Syriac and several Hebrew MSS. for "Zabud" read "Zaccur." The same occurs in the case of ZABBUD.

**ZAB'ULON** (Ζαβουλών: *Zabulon*). The Greek form of the name ZEBULUN (Matt. iv. 13, 15, Rev. vii. 8).

**ZAC'CAI** [2 syl.] (זַכַּי [*pure, innocent*]: Ζακχού; [Vat. FA. Ζαθου in Neh.]; Alex. Ζακχαι in Ezra: *Zachai*). The sons of Zaccai, to the number of 760, returned with Zerubbabel (Ezr. ii. 9; Neh. vii. 14). The name is the same which appears in the N. T. in the familiar form of ZACCHÆUS.

**ZACCHÆ'US** [A. V. ZACCHE'US] (Ζακχαῖος: *Zacchæus*). The name of a tax-collector near Jericho, who being short in stature climbed up into a sycamore-tree,[a] in order to obtain a sight of Jesus as He passed through that place.[b] Luke only has related the incident (xix. 1–10). Zacchæus was a Jew, as may be inferred from his name, and from the fact that the Saviour speaks of him expressly as "a son of Abraham" (υἱὸς Ἀβραάμ). So the latter expression should be understood, and not in a spiritual sense; for it was evidently meant to assert that he was one of the chosen race, notwithstanding the prejudice of some of his countrymen that his office under the Roman government made him an alien and outcast from the privileges of the Israelite. The term which designates this office (ἀρχιτελώνης) is unusual, but describes him no doubt as the superintendent of customs or tribute in the district of Jericho, where he lived, as one having a commission from his Roman principal (*manceps, publicanus*) to collect the imposts levied

[a] * They plant this tree in the East by the wayside, and it is easily ascended because the branches start not comparatively near the ground. [STANLEY, note 1] H.

[b] * The A. V. (Luke xix. 1) has: "And [Jesus] entered and passed through Jericho," as if the incident took place after our Lord had left the city. But the verb is διέρχεσθαι, *was passing through*, which places the occurrence in Jericho H.

Digitized by Google

on the Jews by the Romans, and who in the execution of that trust employed subalterns (the ordinary τελῶναι), who were accountable to him, as he in turn was accountable to his superior, whether he resided at Rome, as was more commonly the case, or in the province itself (see Winer, *Realw.* ii. 711, and *Dict. of Ant.* p. 806). The office must have been a lucrative one in such a region, and it is not strange that Zacchæus is mentioned by the Evangelist as a rich man (οὗτος ἦν πλούσιος). Josephus states (*Ant.* xv. 4, § 2) that the palm-groves of Jericho and its gardens of balsam were given as a source of revenue by Antony to Cleopatra, and, on account of their value, were afterwards redeemed by Herod the Great for his own benefit. The sycamore-tree is no longer found in that neighborhood (Robinson, *Bibl. Res.* i. 559); but no one should be surprised at this, since "even the solitary relic of the palm-forest, seen as late as 1838" — which existed near Jericho, has now disappeared (Stanley, *S. & P.* p. 307).[a] The eagerness of Zacchæus to behold Jesus indicates a deeper interest than that of mere curiosity. He must have had some knowledge, by report at least, of the teachings of Christ, as well as of his wonder-working power, and could thus have been awakened to some just religious feeling, which would make him the more anxious to see the announcer of the good tidings, so important to men as sinners. The readiness of Christ to take up his abode with him, and his declaration that "salvation" had that day come to the house of his entertainer, prove sufficiently that "He who knows what is in man" perceived in him a religious susceptibility which fitted him to be the recipient of spiritual blessings. John the Baptist must often have preached near Jericho, and Zacchæus may on some occasion have been a hearer. Reflection upon his conduct on the part of Zacchæus himself appears to have revealed to him deficiencies which disturbed his conscience, and he was ready, on being instructed more fully in regard to the way of life, to engage to "restore fourfold" for the illegal exactions of which he would not venture to deny (εἴ τινός τι ἐσυκοφάντησα) that he might have been guilty. At all events he had not lived in such a manner as to oversome the prejudice which the Jews entertained against individuals of his class, and their censure fell on him as well as on Christ when they declared that the latter had not scorned to avail Himself of the hospitality of "a man that was a sinner." The Saviour spent the night probably (μεῖναι, ver. 5, and καταλῦσαι, ver. 7,[b] are the terms used) in the house of Zacchæus, and the next day pursued his journey to Jerusalem. He was in the caravan from Galilee, which was going up thither to keep the Passover. The entire scene is well illustrated by Josterzee (Lange's *Bibelwerk*, iii. 235).

We read in the Rabbinic writings also of a Zacchæus who lived at Jericho at this same period, well known on his own account, and especially as the father of the celebrated Rabbi Jochanan ben Zachai (see Sepp's *Leben Jesu*, iii. 166). This person may have been related to the Zacchæus named in the sacred narrative. The family of the Zacchæi was an ancient one, as well as very numerous. They are mentioned in the books of Ezra (ii. 9 and Nehemiah (vii. 14) as among those who returned from the Babylonian Captivity under Zerubbabel, when their number amounted to seven hundred and sixty. It should be noticed that the name is given as ZACCAI in the Authorized Version of the Old Testament. (See Bishop Hall's discourse on Zacchæus in his *Contemplations on the N. T.* bk. iv. 3, and Archbishop Trench, on Zacchæus, in his *Studies in the Gospels.*) H. B. H.

**ZACCHE'US** [properly ZACCHÆ'US] (Ζακχαῖος: *Zacchæus*). An officer of Judas Maccabæus (2 Macc. x. 19). Grotius, from a mistaken reference to 1 Macc. v. 56, wishes to read καὶ τὸν τοῦ Ζαχαρίου. B. F. W.

**ZAC'CHUR** (זַכּוּר [*mindful*]: Ζακχούρ; [Vat. omits:] *Zachur*). A Simeonite, of the family of Mishma (1 Chr. iv. 26). His descendants, through his son Shimei, became one of the most numerous branches of the tribe.

**ZAC'CUR** (זַכּוּר [*mindful*]: Ζαχούρ; [Vat. Ζακχουρ;] Alex. Ζαχουρ: *Zechur*). 1. A Reubenite, father of Shammua, the spy selected from his tribe (Num. xiii. 4).

2. (Ζακχούρ; [Vat.] Alex. Ζακχουρ: *Zachur.*) A Merarite Levite, son of Jaaziah (1 Chr. xxiv. 27).

3. (Ζακχούρ, Ζακχούρ; [Vat. Ζακχουι, Ζακχουθ;] Alex. Ζακχουρ: *Zachur*, [*Zechur.*]) Son of Asaph, the singer, and chief of the third division of the Temple choir as arranged by David (1 Chr. xxv. 2, 10; Neh. xii. 35).

4. (Ζακχούρ; [Vat. Ζαβαουρ;] FA. Ζαχχουρ: *Zachur.*) The son of Imri, who assisted Nehemiah in rebuilding the city wall (Neh. iii. 2).

5. (Ζακχόρ.) A Levite, or family of Levites, who signed the covenant with Nehemiah (Neh. x. 12).

6. (Ζακχούρ.) A Levite, whose son or descendant Hanan was one of the treasurers over the treasuries appointed by Nehemiah (Neh. xiii. 13).

**ZACHARI'AH**, or properly ZECHARI'AH (זְכַרְיָה, "remembered by Jehovah:" Ζαχαρίας; [Vat. Αζαριας in 2 K. xiv. 29; Alex. Αζαριας in 2 K. xiv. 29, xv. 8, 11:] *Zacharias*), was son of Jeroboam II., 14th king of Israel, and the last of the house of Jehu. There is a difficulty about the date of his reign. We are told that Amaziah ascended the throne of Judah in the second year of Joash king of Israel, and reigned 29 years (2 K. xiv. 1, 2). He was succeeded by Uzziah or Azariah, in the 27th year of Jeroboam II., the successor of Joash (2 K. xv. 1), and Uzziah reigned 52 years. On the other hand, Joash king of Israel reigned 16 years (2 K. xiii. 10), was succeeded by Jeroboam, who reigned 41 (2 K. xiv. 23), and he by Zachariah, who came to the throne in the 38th year of Uzziah king of Judah (2 K. xv. 8). Thus we have (1) from the accession of Amaziah to the 38th of Uzziah, 29+38 = 67 years: but (2) from the second year of Joash to the accession of Zachariah (or at least to the death of Jeroboam) we have 15+41 = 56 years. Further, the accession of Uzziah, placed in the 27th year of Jeroboam, according to

---

[a] * Both these statements now require correction. The sycamore and the palm-tree cannot be said to flourish there, but it is found that they are not yet extinct. See PALM-TREE, vol. iii. p. 2226, note *b*, and SYCAMORE, vol. iv. p. 3131, note *b*. H

[b] * Luke uses καταλῦσαι elsewhere only in ix. 12 and evidently of a lodging for the night. The term of itself may denote a shorter "breaking up," or halt but "for the night" is more probable here. M.

Digitized by Google

the above reckoning occurred in the 15th. And this latter synchronism is confirmed, and that with the 27th year of Jeroboam contradicted, by 2 K. xiv. 17, which tells us that Amaziah king of Judah survived Joash king of Israel by 15 years. Most chronologers assume an interregnum of 11 years between Jeroboam's death and Zachariah's accession, during which the kingdom was suffering from the anarchy of a disputed succession, but this seems unlikely after the reign of a resolute ruler like Jeroboam, and does not solve the difference between 2 K. xiv. 17 and xv. 1. We are reduced to suppose that our present MSS. have here incorrect numbers, to substitute 15 for 27 in 2 K. xv. 1, and to believe that Jeroboam II. reigned 52 or 53 years. Josephus (ix. 10, § 3) places Uzziah's accession in the 14th year of Jeroboam, a variation of a year in these synchronisms being unavoidable, since the Hebrew annalists in giving their dates do not reckon fractions of years. [ISRAEL, KINGDOM OF, vol. ii. 1178 *a*.] But whether we assume an interregnum, or an error in the MSS., we must place Zachariah's accession B. C. 771–772. His reign lasted only six months. He was killed in a conspiracy, of which Shallum was the head, and by which the prophecy in 2 K. x. 30 was accomplished. We are told that during his brief term of power he did evil, and kept up the calf-worship inherited from the first Jeroboam, which his father had maintained in regal splendor at Bethel (Am. vii. 13). [SHALLUM.] G. E. L. C.

2. (Alex. Ζαχχαιας.) The father of Abi, or Abijah, Hezekiah's mother (2 K. xviii. 2). In 2 Chr. xxix. 1 he is called ZECHARIAH.

ZACHARI'AS ([*remembered by Jehovah*]: Ζαχαρίας: Vulg. om.). 1. Zechariah the priest in the reign of Josiah (1 Esdr. i. 8).

2. In 1 Esdr. i. 15 Zacharias occupies the place of Heman in 2 Chr. xxxv. 15.

3. (Ζαραΐας; Alex. Ζαρεας; [Ald. Ζαχαρίας:] *Areores.*) = SERAIAH 6, and AZARIAH 20 (1 Esdr. v. 8; comp. Ezr. ii. 2; Neh. vii. 7). It is not clear from whence this rendering of the name is derived. Our translators follow the Geneva Version [and the Bishops' Bible. This form of the name comes from the Aldine edition. — A.].

4. (Ζαχαρίας: *Zacharias.*) The prophet ZECHARIAH (1 Esdr. vi. 1, vii. 3).

5. ZECHARIAH of the sons of Pharosh (1 Esdr. viii. 30; comp. Ezr. viii. 3).

6. ZECHARIAH of the sons of Bebai (1 Esdr. viii. 37; [comp.] Ezr. viii. 11).

7. ZECHARIAH, one of "the principal men and learned," with whom Ezra consulted (1 Esdr. viii. 44; comp. Ezr. viii. 16).

8. ZECHARIAH of the sons of Elam (1 Esdr. ix. 27; comp. Ezr. x. 26).

9. Father of Joseph, a leader in the first campaign of the Maccabæan war (1 Macc. v. 18, 56–32).

10. Father of John the Baptist (Luke i. 5, etc.). [JOHN THE BAPTIST.]

11. Son of Barachias, who, our Lord says, was slain by the Jews between the altar and the Temple (Matt. xxiii. 35· Luke xi. 51). There has been much dispute who this Zacharias was. From the time of Origen, who relates that the father of John the Baptist was killed in the Temple, many of the Greek Fathers have maintained that this is the person to whom our Lord alludes; but there can be little or no doubt that the allusion is to Zacharias, the son of Jehoiada (2 Chr. xxiv. 20, 21). As the book of Chronicles — in which the murder of Zacharias, the son of Jehoiada, occurs — closes the Hebrew canon, this assassination was the last of the murders of righteous men recorded in the Bible, just as that of Abel was the first. (Comp. Renan, *Vie de Jésus*, p. 353.) The name of the father of Zacharias is not mentioned by St. Luke; and we may suppose that the name of Barachias crept into the text of St. Matthew from a marginal gloss, a confusion having been made between Zacharias, the son of Jehoiada, and Zacharias, the son of Barachias (Berechiah), the prophet. [Comp. ZECHARIAH, 6.]

ZACH'ARY (*Zacharias*). The prophet Zechariah (2 Esdr. i. 40).

ZA'CHER (זַכֻּר, in pause זָכֻר [*memorial*]: Ζαχχούρ; [Vat. Ζαχουρ:] *Zacher*). One of the sons of Jehiel, the father or founder of Gibeon, by his wife Maachah (1 Chr. viii. 31). In 1 Chr. ix. 37 he is called ZECHARIAH.

ZA'DOK (צָדוֹק [*just, upright*]: Σαδώκ; [Vat. Alex. also Σαδδουκ, Σαδδωκ, and other forms:] *Sadoc*: "righteous"). 1. Son of Ahitub, and one of the two chief priests in the time of David, Abiathar being the other. [ABIATHAR.] Zadok was of the house of Eleazar, the son of Aaron (1 Chr. xxiv. 3), and eleventh in descent from Aaron. The first mention of him is in 1 Chr. xii. 28, where we are told that he joined David at Hebron after Saul's death with 22 captains of his father's house, and, apparently, with 900 men (4600–3700, vv. 26, 27). Up to this time, it may be concluded, he had adhered to the house of Saul. But henceforth his fidelity to David was inviolable. When Absalom revolted, and David fled from Jerusalem, Zadok and all the Levites bearing the Ark accompanied him, and it was only at the king's express command that they returned to Jerusalem, and became the medium of communication between the king and Hushai the Archite (2 Sam. xv., xvii.). When Absalom was dead, Zadok and Abiathar were the persons who persuaded the elders of Judah to invite David to return (2 Sam. xix. 11). When Adonijah, in David's old age, set up for king, and had persuaded Joab, and Abiathar the priest, to join his party, Zadok was unmoved, and was employed by David to anoint Solomon to be king in his room (1 K. i.). And for this fidelity he was rewarded by Solomon, who "thrust out Abiathar from being priest unto the Lord," and "put in Zadok the priest" in his room (1 K. ii 27, 35). From this time, however, we hear little of him. It is said in general terms in the enumeration of Solomon's officers of state that Zadok was the priest (1 K. iv. 4; 1 Chr. xxix. 22), but no single act of his is mentioned. Even in the detailed account of the building and dedication of Solomon's Temple, his name does not occur, so that though Josephus says that "Sadoc the high-priest was the first high-priest of the Temple which Solomon built" (*Ant.* x. 8, § 6), it is very doubtful whether he lived till the dedication of Solomon's Temple, and it seems far more likely that Azariah, his son or grandson, was high-priest at the dedication (comp. 1 K. iv. 2, and 1 Chr. vi. 10, and see AZARIAH 2). Had Zadok been present, it is scarcely possible that he should not have been named in so detailed an account as that in 1 K. viii. [HIGH-PRIEST, ii. 1071.]

Digitized by Google

Several interesting questions arise in connection with Zadok in regard to the high-priesthood. And first, as to the causes which led to the descendants of Ithamar occupying the high-priesthood to the prejudice of the house of Eleazar. There is, however, nothing to guide us to any certain conclusion. We only know that Phinehas the son of Eleazar was high-priest after his father, and that at a subsequent period Eli of the house of Ithamar was high-priest, and that the office continued in his house till the time of Zadok, who was first Abiathar's colleague, and afterwards superseded him. Zadok's descendants continued to be hereditary high-priests till the time of Antiochus Eupator, and perhaps till the extinction of the office. [HIGH-PRIEST, ii. 1073.] But possibly some light may be thrown on this question by the next which arises, namely, what is the meaning of the double priesthood of Zadok and Abiathar (2 Sam. xv. 29; 1 Chr. xxiv. 6, 31). In later times we usually find two priests, the high-priest, and the second priest (2 K. xxv. 18), and there does not seem to have been any great difference in their dignity. So too Luke iii. 2. The expression "the chief priest of the house of Zadok" (2 Chr. xxxi. 10), seems also to indicate that there were two priests of nearly equal dignity. Zadok and Abiathar were of nearly equal dignity (2 Sam. xv. 35, 36, xix. 11). Hophni and Phinehas again, and Eleazar and Ithamar are coupled together, and seem to have been holders of the office as it were in commission. The duties of the office too were in the case of Zadok and Abiathar divided. Zadok ministered before the Tabernacle at Gibeon (1 Chr. xvi. 39), Abiathar had the care of the Ark at Jerusalem. Not, however, exclusively, as appears from 1 Chr. xv. 11; 2 Sam. xv. 24, 25, 29. Hence, perhaps, it may be concluded that from the first there was a tendency to consider the office of the priesthood as somewhat of the nature of a corporate office, although some of its functions were necessarily confined to the chief member of that corporation; and if so, it is very easy to perceive how superior abilities on the one hand, and infancy or incapacity on the other, might operate to raise or depress the members of this corporation respectively. Just as in the Saxon royal families, considerable latitude was allowed as to the particular member who succeeded to the throne. When hereditary monarchy was established in Judæa, then the succession to the high-priesthood may have become more regular. Another circumstance which strengthens the conclusion that the origin of the double priesthood was anterior to Zadok, is that in 1 Chr. ix. 11; Neh. xi. 11, Ahitub the father of Zadok seems to be described as "ruler of the House of God," an office usually held by the chief priest, though sometimes by the second priest. [HIGH-PRIEST, ii. 1069 *a*.] And if this is so, it implies that the house of Eleazar had maintained its footing side by side with the house of Ithamar, although for a time the chief dignity had fallen to the lot of Eli. What was Zadok's exact position when he first joined David, is impossible to determine. He there appears inferior to Jehoiada "the leader of the Aarontes."

2. [Σαδώκ: *Sadoc.*] According to the genealogy of the high-priests in 1 Chr. vi. 12, there was a second Zadok, son of a second Ahitub, son of Amariah; about the time of King Ahaziah. But it is highly improbable that the same sequence, Amariah, Ahitub, Zadok, should occur twice over; and no trace whatever remains in history of this second Ahitub, and second Zadok. It is probable, therefore, that no such person as this second Zadok ever existed; but that the insertion of the two names is a copyist's error. Moreover, these two names are quite insufficient to fill up the gap between Amariah in Jehoshaphat's reign, and Shallum in Amon's, an interval of much above 200 years.

3. [Vat. in 2 Chr. xxvii. 1, Σαδωρ.] Father of Jerushah, the wife of King Uzziah, and mother of King Jotham [2 K. xv. 33; 2 Chr. xxvii. 1]. He was probably of a priestly family.

4. [Σαδώκ, Σαδούκ; in Neh. x. 21, Vat. FA. Σαδδουκ; iii. 4, FA. Σαδουκ, Alex. omits.] Son of Baana, who repaired a portion of the wall in the time of Nehemiah (Neh. iii. 4). He is probably the same as is in the list of those that sealed the covenant in Neh. x. 21, as in both cases his name follows that of Meshezabeel. But if so, we know that he was not a priest, as his name would at first sight lead one to suppose, but one of "the chief of the people," or laity. With this agrees his patronymic Baana, which indicates that he was of the tribe of Judah; for Baanah, one of David's mighty men, was a Netophathite (2 Sam. xxiii. 29), i. e. of Netophah, a city of Judah. The men of Tekoah, another city of Judah, worked next to Zadok. Meshullam of the house of Meshezabeel, who preceded him in both lists (Neh. iii. 4, and x. 20, 21), was also of the tribe of Judah (Neh. xi. 24). Intermarriages of the priestly house with the tribe of Judah were more frequent than with any other tribe. Hence probably the name of Sadoc (Matt. i. 14).

5. [Σαδδούκ; FA. Σαδουχ.] Son of Immer, a priest who repaired a portion of the wall over against his own house (Neh. iii. 29). He belonged to the 16th course (1 Chr. xxiv. 14), which was one of those which returned from Babylon (Ezr. ii. 37).

6. [Σαδώκ, Σαδδούκ; Alex. in Ezr. Σααδουκ FA. in Neh. Σαδουκ: *Sadoch, Sadoc.*] In Neh. xi. 11, and 1 Chr. ix. 11, mention is made in a genealogy of Zadok, the son of Meraioth, the son of Ahitub. But as such a sequence occurs nowhere else, Meraioth being always the grandfather of Ahitub (or great-grandfather, as in Ezr. vii. 2, 3),[a] it can hardly be doubtful that Meraioth is inserted by the error of a copyist, and that Zadok the son of Ahitub is meant.

It is worth noticing that the N. T. name Justus (Acts i. 23, xviii. 7; Col. iv. 11) is the literal translation of Zadok. Zedekiah, Jehozadak, may be compared.

The name appears occasionally in the post-biblical history. The associate of Judah the Gaulonite, the well-known leader of the agitation against the census of Quirinus, was a certain Pharisee named Zadok (Joseph. *Ant.* xviii. 1, § 1), and the sect of the Sadducees is reputed to have derived both its

name and origin from a person of the same name, a disciple of Antigonus of Socho. (See the citations of Lightfoot, *Hebr. and Talm. Exerc.* on Matt. iii. 8.) The personality of the last mentioned Sadok has been strongly impugned in the article SADDUCEES (p. 2778 f.); but see, on the other hand, the remark of M. Renan (*Vie de Jésus*, p. 216). A. C. H.

* 7. (Σαδώκ; Vat. FA. Σαδδουκ: *Sadoc.*) A scribe in the time of Nehemiah, one of the "treasurers" (Neh. xiii. 13). A.

**ZA'HAM** (זָהַם [*loathing*]: Ζαδμ; [Vat. Ροολλαμ;] Alex. Ζαλαμ: *Zoom*). Son of Rehoboam by Abihail, the daughter of Eliab (2 Chr. xi. 19). As Eliab was the eldest of David's brothers, it is more probable that Abihail was his granddaughter.

**ZA'IR** (צָעִיר [*small, few*]: [Rom. Σιδρ; Vat.] Σειωρ; Alex. omits: *Seira*). A place named in 2 K. viii. 21 only, in the account of Joram's expedition against the Edomites. He went over to Zair with all his chariots; there he and his force appear to have been surrounded,[a] and only to have escaped by cutting their way through in the night. The parallel account in Chronicles (2 Chr. xxi. 9) agrees with this, except that the words "to Zair" are omitted, and the words "with his princes" inserted. This is followed by Josephus (*Ant.* ix. 5, § 1). The omitted and inserted words have a certain similarity both in sound and in their component letters, צָעִירָה and עִם־שָׂרָיו; and on this it has been conjectured that the latter were substituted for the former, either by the error of a copyist, or intentionally, because the name Zair was not elsewhere known (see Keil, *Comm.* on 2 K. viii. 21). Others again, as Movers (*Chronik*, p. 218) and Ewald (*Gesch.* iii. 524), suggest that Zair is identical with Zoar (צֹעַר or צוֹעַר). Certainly in the Middle Ages the road by which an army passed from Judæa to the country formerly occupied by Edom lay through the place which was then believed to be Zoar, below *Kerak*, at the S. E. quarter of the Dead Sea (Fulcher, *Gesta Dei*, p. 405), and so far this is in favor of the identification; but there is no other support to it in the MS. readings either of the original or the Versions.

The Zoar of Genesis (as will be seen under that head) was probably near the N.E. end of the lake, and the chief interest that exists in the identification of Zair and Zoar, resides in the fact that if it could be established it would show that by the time 2 K. viii. 21 was written, Zoar had been shifted from its original place, and had come to be located where it was in the days of Joseph, Jerome, and the Crusades. Possibly the previous existence there of a place called Zair, assisted the transfer.[b]

A third conjecture grounded on the readings of the Vulgate (*Seira*) and the Arabic version (*Sa'ir*, ساعير) is, that Zair is an alteration for Seir (שֵׂעִיר), the country itself of the Edomites (Theniua, *Kursg. Ex. Handb.*). The objection to this is, that the name of Seir appears not to have been known to the author of the Book of Kings.[c] G.

**ZA'LAPH** (צָלָף [*bruise, wound*]: Σελέφ; [Vat. Σελε; FA.] Ελεφ: *Seleph*). Father of Hanun, who assisted in rebuilding the city wall (Neh. iii. 30).

**ZAL'MON** (צַלְמוֹן [*shady*]: Ἐλλάν; Alex. Σελλωμ; [Comp. Σελμάν:] *Selmon*). An Ahohite, one of David's guard (2 Sam. xxiii. 28). In 1 Chr. xi. 29 he is called ILAI, which Kennicott (*Diss* p. 187) decides to be the true reading.

**ZAL'MON, MOUNT,** (הַר־צַלְמוֹן [*shady mount*]: [ὄρος Σελμάν; Vat. Alex.] ορος Ερμων: *mons Selmon*). A wooded eminence in the immediate neighborhood of Shechem, from which Abimelech and his people cut down the boughs with which he suffocated and burnt the Shechemites who had taken refuge in the citadel (Judg. ix. 48). It is evident from the narrative that it was close to the city. But beyond this there does not appear to be the smallest indication either in or out of the Bible of its position. The Rabbis mention a place of the same name, but evidently far from the necessary position (Schwarz, p. 137). The name *Suleimîjeh* is attached to the S. E. portion of Mount Ebal (see the map of Dr. Rosen, *Zeitsch. der D. M. G.* xiv. 634); but without further evidence, it is hazardous even to conjecture that there is any connection between this name and Tsalmon.

The reading of the LXX. is remarkable both in itself, and in the fact that the two great MSS. agree in a reading so much removed from the Hebrew; but it is impossible to suppose that Hermon (at any rate the well-known mountain of that name), is referred to in the narrative of Abimelech.

The possibility of a connection between this mount and the place of the same name in Ps. lxviii. 14 (A. V. Salmon), is discussed under the head of SALMON, p. 2791 f.

The name of Dalmanutha has been supposed to be a corruption of that of Tsalmon (Otho, *Lex. Rabb.* "Dalmanutha"). G.

**ZALMO'NAH** (צַלְמֹנָה [*shady*]: Σελμωνά: *Salmona*). The name of a desert-station of the Israelites, which they reached between leaving Mount Hor and camping at Punon, although they must have turned the southern point of Edomitish territory by the way (Num. xxxiii. 41). It lies on the east side of Edom; but whether or not identical with *Mamn*, a few miles E. of Petra, as Raumer thinks, is doubtful. More probably Zalmonah may be in the *Wady Ithm*, which runs into the Arabah close to where Elath anciently stood. H. H.

**ZALMUN'NA** (צַלְמֻנָּע [perh. *shelter denied to one*]: [Vat.] Σελμανα, [exc. once, Σελ-, Rom.] Alex. Σελμανά, and so also Josephus: *Salmana*). One of the two "kings" of Midian whose capture and death by the hands of Gideon himself

---

[a] This is not, however, the interpretation of the Jewish commentators, who take the word חֲמֹרָיו to refer to the neighboring parts of the country of Edom. See Rashi on 2 Chr. xxi. 9.

[b] * Under the heads SODOM and ZOAR (Amer ed., the reader will find reasons for the belief that the latter has not been "shifted from its original place." S. W.

[c] The variations of the MSS. of the LXX. (Holmes and Parsons) are very singular — ex Σωορ, ex Σηιρ, ex Σηρ. But they do not point to any difference in the Hebrew text from that now existing.

formed the last act of his great conflict with Midian (Judg. viii. 5–21; Ps. lxxxiii. 11). No satisfactory explanation of the name of Zalmunna has been given. That of Gesenius and Fürst ("shelter is denied him")[a] can hardly be entertained.

The distinction between the "kings" (מְלָכִים) and the "princes" (שָׂרִים) of the Midianites on this occasion is carefully maintained throughout the narrative[b] (viii. 5, 12, 26). "Kings" of Midian are also mentioned in Num. xxxi. 8. But when the same transaction is referred to in Josh. xiii. 21, they are designated by the title *Nêsîê* (נְשִׂיאֵי), A. V. "princes." Elsewhere (Num. xxii. 4, 7) the term *sekênim* is used, answering in signification, if not in etymology, to the Arabic *sheikh*. It is difficult, perhaps impossible, to tell how far these distinctions are accurate, and how far they represent the imperfect acquaintance which the Hebrews must have had with the organization of a people with whom, except during the orgies of Shittim, they appear to have been always more or less at strife and warfare (1 Chr. v. 10, 19–22).

The vast horde which Gideon repelled must have included many tribes under the general designation of "Midianites, Amalekites, children of the East;" and nothing would be easier or more natural than for the Hebrew scribes who chronicled the events to confuse one tribe with another in so minute a point as the title of a chief.

In the great Bedouin tribes of the present day, who occupy the place of Midian and Amalek, there is no distinctive appellation answering to the *melec* and *sar* of the Hebrew narrative. Differences in rank and power there are, as between the great chief, the acknowledged head of the parent tribe, and the lesser chiefs who lead the sub-tribes into which it is divided, and who are to a great extent independent of him. But the one word *sheikh* is employed for all. The great chief is the *Sheikh el-kebîr*, the others are *min el-masheikh*, "of the sheikhs," *i. e.* of sheikh rank. The writer begs to express his acknowledgments to Mr. Layard and Mr. Cyril Graham for information on this point.

G.

**ZAM'BIS** (Ζαμβρί [Vat. -βρει]; Alex. Ζαμβρις; [Ald. Ζαμβίς:] *Zambris*). The same as AMARIAH (1 Esdr. ix. 34; comp. Ezr. x. 42).

**ZAM'BRI** (Ζαμβρί; [Sin. Ζαμβρει:] *Zamri*). ZIMRI the Simeonite slain by Phinehas (1 Macc. ii. 26).

**ZA'MOTH** (Ζαμώθ; [Vat.] Alex. Ζαμωθ: *Zathoim*) = ZATTU (1 Esdr. ix. 28; comp. Ezr. x. 27).

**ZAMZUM'MIMS** (זַמְזֻמִּים [see below]: [Rom.] Ζοχομμίν [Vat. -μειν]; Alex. [Ζομζομμειν:] *Zomzommim*). The Ammonite name for the people, who by others (though who they were does not appear) were called REPHAIM (Deut. ii. 20 only). They are described as having originally been a powerful and numerous nation of giants, — "great, many, and tall," — inhabiting the district which at the time of the Hebrew conquest was in the possession of the Ammonites, by whom the Zamzummim had a long time previously been destroyed. Where this district was, it is not perhaps possible exactly to define; but it probably lay in the neighborhood of Rabbath-Ammon (*Ammân*), the only city of the Ammonites of which the name or situation is preserved to us, and therefore eastward of that rich undulating country from which Moab had been forced by the Amorites (the modern *Belka*), and of the numerous towns of that country, whose ruins and names are still encountered.

From a slight similarity between the two names, and from the mention of the Emim in connection with each, it is usually assumed that the Zamzummim are identical with the ZUZIM (Gesenius, *Thes.* p. 410 *a*; Ewald, *Gesch.* i. 308, *note*; Knobel on Gen. xiv. 5). Ewald further supports this by identifying HAM, the capital city of the Zuzim (Gen. xiv. 5) with Ammon. But at best the identification is very conjectural.

Various attempts have been made to explain the name: as by comparison with the Arabic زَمْزَمَ, "long-necked;" or صمصم, "strong and big" (Simonis, *Onom.* 135); or as "obstinate," from זָמַם (Luther), or as "noisy," from זָמַם (Gesenius, *Thes.* p. 419), or as onomatopoetic,[c] intended to imitate the unintelligible jabber of foreigners. Michaelis (*Suppl.* No. 629) playfully recalls the likeness of the name to that of the well Zem-zem at Mecca, and suggests thereupon that the tribe may have originally come from Southern Arabia. Notwithstanding this banter, however, he ends his article with the following discreet words, "Nihil historiæ, nihil originis populi novimus: fas sit etymologiam æque ignorare."

G.

**ZANO'AH** (זָנוֹחַ [perh. *marsh, bog*]: Ζανώχ in both MSS.; [Ald. Ζανώ; Comp. Ζανωέ:] *Zanoë*). In the genealogical lists of the tribe of Judah in 1 Ch., Jekuthiel is said to have been the father of Zanoah (iv. 18); and, as far as the passage can be made out, some connection appears to be intended with "Bithiah, the daughter of Pharaoh." Zanoah is the name of a town of Judah [ZANOAH 2], and this mention of Bithiah probably points to some colonization of the place by Egyptians or by Israelites directly from Egypt. In Seetzen's account of Sanûte (or more accurately *Za'nûtah*), which is possibly identical with Zanoah, there is a curious token of the influence which events in Egypt still exercised on the place (*Reisen*, iii. 29).

The Jewish interpreters considered the whole of this passage of 1 Chr. iv. to refer to Moses, and interpret each of the names which it contains as titles of him. "He was chief of Zanoach," says the Targum, "because for his sake God *put away* (זָנַח) the sins of Israel."

G.

**ZANO'AH** (זָנוֹחַ [*marsh* or *bog*]). The name of two towns in the territory of Judah.

1. (Ταννέ, Ζανέ; Alex. Ζανω; [in Neh. xi. 30

[a] The unintelligibility of the names is in favor of their being correctly retained rather than the reverse. And it should not be overlooked that they are not, like Oreb and Zeeb, attached also to localities, which always throws a doubt on the name when attributed to a person as well.

[b] Josephus inverts the distinction. He styles Oreb and Zeeb βασιλεῖς, and Zebah and Zalmunna ἡγεμόνε (*Ant.* v. 7, § 5).

[c] In this sense the name was applied by controversialists of the 17th century as a nickname for fanatics who pretended to speak with tongues.

Digitized by Google

Rom. Vat. FA.[1] Alex. omit, FA.[2] Ζανωε:] *Zanoé*, [*Zanoa.*]) In the *Shefelah* (Josh. xv. 34), named in the same group with Zoreah and Jarmuth. It is possibly identical with *Zânû'a*,[a] a site which was pointed out to Dr. Robinson from *Beit Nettif* (*Bibl. Res.* ii. 16), and which in the maps of Van de Velde and of Tobler (*3te Wanderung*) is located on the N. side of the *Wady Ismail*, 2 miles E. of *Zareah*, and 4 miles N. of *Yarmuk*. This position is sufficiently in accordance with the statement of Jerome (*Onomast.* "Zannohus"), that it was in the district of Eleutheropolis, on the road to Jerusalem, and called Zanua.

The name recurs in its old connection in the lists of Nehemiah, both of the towns which were re-inhabited by the people of Judah after the Captivity (xi. 30[b]), and of those which assisted in repairing the wall of Jerusalem (iii. 13). It is an entirely distinct place from

2. (Ζακαναμ [Vat. -αιμ]; Alex. Ζανωακειμ: *Zanoêl.*) A town in the highland district, the mountain proper (Josh. xv. 56). It is named in the same group with Maon, Carmel, Ziph, and other places known to lie south of Hebron. It is (as Van de Velde suggests, *Memoir*, p. 354) not improbably identical with *Sanûte*, which is mentioned by Seetzen (*Reisen*, iii. 29) as below *Senuta*, and appears to be about 10 miles S. of Hebron. At the time of his visit it was the last inhabited place to the south. Robinson (*Bibl. Res.* ii. 204, *note*) gives the name differently, زعنوطة, *Za'nûtah*; and it will be observed that, like *Zanu'ah* just mentioned, it contains the *'Ain*, which the Hebrew name does not, and which rather shakes the identification.

According to the statement of the genealogical lists of 1 Chr., Zanoah was founded or colonized by a person named Jekuthiel (iv. 18). Here it is also mentioned with Socho and Eshtemoa, both of which places are recognizable in the neighborhood of *Za'nûtah*. G.

## ZAPHNATH-PAANE'AH (צָפְנַת פַּעְנֵחַ)

פַּעְנֵחַ [see below]: Φονθομφανήχ: *Salvator mundi*), a name given by Pharaoh to Joseph (Gen. xli. 45). Various forms of this name, all traceable to the Heb. or LXX. original, occur in the works of the early Jewish and Christian writers, chiefly Josephus, from different MSS. and editions of whose *Ant.* (ii. 6, § 1) no less than eleven forms have been collected, following both originals, some variations being very corrupt; but from the translation given by Josephus it is probable that he transcribed the Hebrew. Philo (*De Nominum Mut.* p. 819, e, ed. Col. 613) and Theodoret (i. p. 106, ed. Schulz) follow the LXX., and Jerome, the Hebrew. The Coptic version nearly transcribes the LXX., ⲯⲁⲛⲑⲱⲙⲫⲁⲛⲏⲕ.

In the Hebrew text the name is divided into two parts. Every such division of Egyptian words being in accordance with the Egyptian orthography, as No-Ammon, Pi-beseth, Poti-pherah, we cannot, if the name be Egyptian, reasonably propose any change in this case; if the name be Hebrew, the same is certain. There is no *primâ facie* reason for any change in the consonants.

The LXX. form seems to indicate the same division, as the latter part, φανήχ, is identical with the second part of the Hebrew, while what precedes is different. There is again no *primâ facie* reason for any change from the ordinary reading of the name. The cause of the difference from the Hebrew in the earlier part of the name must be discussed when we come to examine its meaning.

This name has been explained as Hebrew or Egyptian, and always as a proper name. It has not been supposed to be an official title, but this possibility has to be considered.

1. The Rabbins interpreted Zaphnath paaneah as Hebrew, in the sense "revealer of a secret." This explanation is as old as Josephus (κρυπτῶν εὑρετήν, *Ant.* ii. 6, § 1); and Theodoret also follows it (τῶν ἀποῤῥήτων ἑρμηνευτήν, i. p. 106, Schulz). Philo offers an explanation, which, though seemingly different, may be the same (ἐν ἀνοκρίσει στόμα κρίνον; but Mangey conjectures the true reading to be ἐν ἀνοκρύψει στόμα ἀνοκρυόμενον, *l. c.*). It must be remembered that Josephus perhaps, and Theodoret and Philo certainly, follow the LXX. form of the name.

2. Isidore, though mentioning the Hebrew interpretation, remarks that the name should be Egyptian, and offers an Egyptian etymology: "Joseph . . . . hunc Pharao Zaphanath Phaaneca appellavit, quod Hebraice absconditorum repertorem sonat . . . . tamen quia hoc nomen ab Ægyptio ponitur, ipsius linguæ debet habere rationem. Interpretatur ergo Zaphanath Phaaneca Ægyptio sermone salvator mundi" (*Orig.* vii. c. 7, t. iii. p. 327, Arev.). Jerome adopts the same rendering.

3. Modern scholars have looked to Coptic for an explanation of this name, Jablonski and others proposing as the Coptic of the Egyptian original ⲡⲥⲱⲧ ⲙ̀ ⲫⲉⲛⲉⲉⲓ, or ⲡⲥⲱⲧⲒ, etc., "the preservation" or "preserver of the age." This is evidently the etymology intended by Isidore and Jerome.

We dismiss the Hebrew interpretation, as unsound in itself, and demanding the improbable concession that Pharaoh gave Joseph a Hebrew name.

It is impossible to arrive at a satisfactory result without first inquiring when this name was given, and what are the characteristics of Egyptian titles and names. These points having been discussed, we can show what ancient Egyptian sounds correspond to the Hebrew and LXX. forms of this name, and a comparison with ancient Egyptian will then be possible.

After the account of Joseph's appointment to be governor, of his receiving the insignia of authority, and Pharaoh's telling him that he held the second place in the kingdom, follow these words: "And Pharaoh called Joseph's name Zaphnath-paaneah; and he gave him to wife Asenath the daughter of Poti-pherah priest of On." It is next stated, "And Joseph went out over [all] the land of Egypt" (Gen. xli. 45). As Joseph's two sons were born "before the years of famine came" (ver. 50), it seems evident that the order is here strictly chronological, at least that the events spoken of are of

---

[a] This name, however (زانوع), exhibits the *'ain*, which is not present in the Hebrew name

[b] Here the name is contracted to זָנֹחַ.

[c] These curious words are produced by joining Zanoah to the name following it, Cain, or hac-Cain.

Digitized by Google

the time before the famine. It is scarcely to be supposed that Pharaoh would have named Joseph "the preserver of the age," or the like, when the calamity, from the worst effects of which his administration preserved Egypt, had not come. The name, at first sight, seems to be a proper name, but, as occurring after the account of Joseph's appointment and honors, may be a title.

Ancient Egyptian titles of dignity are generally connected with the king or the gods, as SUTEN-SA, king's son, applied not only to royal princes, but to the governors of KEESH, or Cush. Titles of place are generally simply descriptive, as MER-KETU, "superintendent of buildings" ("public works"?). Some few are tropical. Ancient Egyptian names are either simple or compound. Simple names are descriptive of occupation, as MA, "the shepherd," an early king's name, or are the names of natural objects, as PE-MAY(?), "the cat," etc.; more rarely they indicate qualities of character, as S-NUFRE, "doer of good." Compound names usually express devotion to the gods, as PET-AMEN-APT, "Belonging to Amen of Thebes;" some are composed with the name of the reigning king, as SHAFRA-SHA, "Shafra rules;" SESERTESEN-ANKH, "Sesertesen lives." Others occur which are more difficult of explanation, as AMEN-EM-HA, "Amen in the front," a warcry? Double names, not merely of kings, but of private persons, are found, but are very rare, as SNUFRE ANKHEE, "Doer of good, living one." These double names are usually of the period before the XVIIIth dynasty.

Before comparing Zaphnath-paaneah and Psonthomphanech with Egyptian names we must ascertain the probable Egyptian equivalents of the letters of these forms. The Egyptian words occurring in Hebrew are few, and the forms of some of them evidently Shemiticized, or at least changed by their use by foreigners: a complete and systematic alphabet of Hebrew equivalents of Egyptian letters therefore cannot be drawn up. There are, on the other hand, numerous Shemitic words, either Hebrew or of a dialect very near it, the geographical names of places and tribes of Palestine, given, according to a system, in the Egyptian inscriptions and papyri, from which we can draw up, as M. de Rougé has done (*Revue Archéologique*, N. S. iii. 351–354), a complete alphabet, certain in nearly all its details, and approximatively true in the few that are not determined, of the Egyptian equivalents of the Hebrew alphabet. The two comparative alphabets do not greatly differ, but we cannot be sure that in the endeavor to ascertain what Egyptian sounds are intended by Hebrew letters, or their Greek equivalents, we are quite accurate in employing the latter. For instance, different Egyptian signs are used to represent the Hebrew ר and ל, but it is by no means certain that these signs in Egyptian represented any sound but R, except in the vulgar dialect.

It is important to observe that the Egyptians had a hard "t," the parent of the Coptic ⲧ and ϭ, which we represent by an Italic *T*; that they had an "a" corresponding to the Hebrew ע, which we represent by an Italic *A*; and that the Hebrew פ may be represented by the Egyptian P, also pronounced P'h, and by the F. The probable originals of the Egyptian name of Joseph may be thus stated: —

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| י | פ | נ | ה | פ | ע | נ | ח |
| *T* | P | N | T | P | *A* | N | KH |
| | F | | | | | | |

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| 𓊪 | 𓊃 | 𓈖 | 𓏏 | 𓊃 | 𓄡 | 𓈖 | 𓎛 |
| PS | N | T | M | P | | N | KH |
| | | | | F | | | |

The second part of the name in the Hebrew is the same as in the LXX., although in the latter it is not separate: we therefore examine it first. It is identical with the ancient Egyptian proper name P-ANKHEE, "the living," borne by a king who was an Ethiopian ruling after Tirhakah, and probably contemporary with the earlier part of the reign of Psammetichus I. The only doubtful point in the identification is that it is not certain that the "a" in P-ANKHEE is that which represents the Hebrew ע. It is a symbolic sign of the kind which serves as an initial, and at the same time determines the signification of the word it partly expresses and sometimes singly represents, and it is only used in the single sense "life," "to live." It may, however, be conjectured from its Coptic equivalents to have begun with either a long or a guttural "a" (ⲁⲛⲁϩ B, S, ⲁⲛⲟϩ B, ⲟⲛⲁϩ, ⲟⲛϩ S, ⲟⲛϭ. ⲱⲛϭ M, ⲱⲛⲁϩ B, ⲱⲛⲟϩ S).

The second part of the name, thus explained, affords no clew to the meaning of the first part, being a separate name, as in the case of a double name already cited SNUFRE ANKHEE. The LXX. form of the first part is at once recognized in the ancient Egyptian words P-SENT-N, "the defender" or "preserver of" the Coptic ⲡ ⲥⲱⲧⲉ ⲛ̄, "the preserver of." It is to be remarked that the ancient Egyptian form of the principal word is that found in the LXX., but that the preposition N in hieroglyphics, however pronounced, is always written N, whereas in Coptic ⲛ̄ becomes ⲙ̄ before ⲡ. The word SENT does not appear to be used except as a divine, and, under the Ptolemies, regal title, in the latter case for Soter. The Hebrew form seems to represent a compound name commencing with *TETEF*, or *TEF*, "he says," a not infrequent element in compound names (the root being found in the Coptic ϯⲟ, ϯⲟⲧ: S ϯⲟⲟ, ϯⲟⲩ), or *TEF*, "incense, delight"? the name of the sacred incense, also known to us in the Greek form κῦφι (Plutarch, *de Isid. et Osir.* c. 80, p. 383; Diosc. *M. m.* I. 24, Spr.). But, if the name commence with either of these words, the rest seems inexplicable. It is remarkable that the last two consonants are the same as in Asenath, the name of Joseph's wife. It has been supposed that in both cases this element is the name of the goddess Neith, Asenath having been conjectured to be AS-NEET; and Zaphnath, by Mr. Osburn, we believe, *TEF-NEET*, "the delight(?) of Neith" Neith, the goddess of Sais, is not likely to have been reverenced at Heliopolis, the city of Asenath. It is also improbable that Pharaoh would have given Joseph a name connected with idolatry; for Joseph's position, unlike Daniel's, when he was first called Belteshazzar, would have enabled him effectually to protest against receiving such a name. The latter part of the name might suggest the possibility of

Digitized by Google

the letters "aneah" corresponding to ANKH, and the whole preceding portion, Zaphnath and the initial of this part, forming the name of Joseph's Pharaoh; the form being that of SESERTESEN-ANKH, "Sesertesen lives," already mentioned; but the occurrence of the letter P shows that the form is P-ANKHEE, and were this not sufficient proof, no name of a Pharaoh, or other proper name is known that can be compared with the supposed first portion. We have little doubt that the monuments will unexpectedly supply us with the information we need, giving us the original Egyptian name, though probably not applied to Joseph, of whose period there are, we believe, but few Egyptian records. R. S. P.

**ZA'PHON** (צָפוֹן [*northward*]: Σαφών; Alex. Σαφων: *Saphon*). The name of a place mentioned in the enumeration of the allotment of the tribe of Gad (Josh. xiii. 27). It is one of the places in "the valley" which appear to have constituted the "remainder" (יֶתֶר) of the kingdom of Sihon" — apparently referring to the portion of the same kingdom previously allotted to Reuben (vv. 17-21). The enumeration appears to proceed from south to north, and from the mention of the Sea of Chinneroth it is natural to infer that Zaphon was near that lake. No name resembling it has yet been encountered.

In Judg. xii. 1, the word rendered "northward" (*tsâphônâh*) may with equal accuracy be rendered "to Zaphon." This rendering is supported by the Alex. LXX. (κεφειρα) and a host of other MSS., and it has consistency on its side. G.

* Of the later critics, Ewald, Bunsen, Keil, and Cassel make Zaphon a proper name. It is evident from vv. 1 and 5 that the Ephraimites crossed the Jordan, and the main direction of the march would be from west to east. If they went northward it would be for strategic reasons which are not apparent. The known existence of a place of this name (Josh. xiii. 27) fully justifies this conclusion (see especially Cassel, *Richter u. Ruth*, in loc.). Bertheau (*Richter*, p. 166), De Wette (*Uebersetzung*) and Perret-Gentil (*version*), prefer "northward." H.

**ZA'RA** (Ζαρά: *Zara*). ZARAH [or ZERAH] the son of Judah (Matt. i. 3).

**ZAR'ACES** (Ζαράκης; [Vat. Ζαραιος:] *Zaraceles*). Brother of Jeoiim, or Jehoiakim, king of Judah (1 Esdr. i. 38). His name is apparently a corruption of Zedekiah.

**ZA'RAH** (זָרַח [*rising* of light]: Ζαρά: *Zara*). Properly ZERAH, the son of Judah by Tamar (Gen. xxxviii. 30, xlvi. 12).

**ZARA'IAS** [3 syl.] [Rom.] (Vat. omit; Alex. Ζαραιας: Vulg. omits). 1. ZERAHIAH, one of the ancestors of Ezra (1 Esdr. viii. 2); called ARNA in 2 Esdr. i. 2.

2. (Ζαραίας: *Zareus.*) ZERAHIAH, the father of Elihoënai (1 Esdr. viii. 31).

3. (Ζαραΐας; [Alex. omits:] *Zarias.*) ZERADIAH, the son of Michael (1 Esdr. viii. 34).

**ZA'REAH** (צָרְעָה [perh. *place of hornets*]: Vat. [Rom. Alex. FA.[1]] omit; Alex. [rather FA.[2]] Σαρα: *Sarae*). The form in which our translators have once (Neh. xi. 29) represented the name, which they elsewhere present (less accurately) as ZORAH and ZOREAH. G.

**ZA'REATHITES, THE** (הַצָּרְעָתִי [patr.]: οἱ Σαραθαῖοι: *Saraitae*). The inhabitants of ZAREAH or ZORAH. The word occurs in this form only in 1 Chr. ii. 53. Elsewhere the same Hebrew word appears in the A. V. as THE ZORATHITES. G.

**ZA'RED, THE VALLEY OF** (נַחַל זֶרֶד [*valley of thick foliage*]: [Rom.] φάραγξ Ζαρέδ; [Vat. φ. Ζαρετ;] Alex. φ. Ζαρε: *torrens Zared*). The name is accurately ZERED; the change in the first syllable being due to its occurring at a pause It is found in the A. V. in this form only in Num. xxi. 12; though in the Hebr. it occurs also Deut. ii. 13. G.

**ZAR'EPHATH** (צָרְפַת, *i.e.* Tsarfah [*smelting house*, Ges.]: Ζαρεπτά;[a] in Obad. plural: *Sarephtha*, [*Sarepta*].). A town which derives its claim to notice from having been the residence of the prophet Elijah during the latter part of the drought (1 K. xvii. 9, 10). Beyond stating that it was near to, or dependent on, Zidon (צִידוֹן), the Bible gives no clew to its position. It is mentioned by Obadiah (ver. 20), but merely as a Canaanite (that is Phœnician) city. Josephus (*Ant.* viii. 13, § 2), however, states that it was "not far from Sidon and Tyre, for it lies between them." And to this Jerome adds (*Onom.* "Sarefta") that it "lay on the public road," that is the coast-road. Both these conditions are implied in the mention of it in the Itinerary of Paula by Jerome (*Epit. Paulæ*, § 8), and both are fulfilled in the situation of the modern village of *Sârafend*[b] (صرفند), a name which, except in its termination, is almost identical with the ancient Phœnician. *Sârafend* has been visited and described by Dr. Robinson (*B. R.* ii. 475) and Dr. Thomson (*Land and Book*, ch. xii.). It appears to have changed its place, at least since the 11th century, for it is now more than a mile from the coast, high upon the slope of a hill (Rob. p. 474), whereas, at the time of the Crusades, it was on the shore. Of the old town, considerable indications remain. One group of foundations is on a headland called *Ain el-Kentarah*: but the chief remains are south of this, and extend for a mile or more, with many fragments of columns, slabs, and other architectural features. The Roman road is said to be unusually perfect there (Beamont, *Diary*, etc., ii. 186). The site of the chapel erected by the Crusaders on the spot then reputed to be the site of the widow's house, is probably still preserved.[c] (See the citations of Robinson.) It is near the water's edge, and is now marked by a wely and small khan dedicated to *el-Khudr*, the well-known personage who unites, in the popular Moslem faith, Elijah and St. George.

In the N. T. Zarephath appears under the Greek form of SAREPTA. G.

**ZAR'ETAN** (צָרְתָן, *i. e.* Tsarthan [*cool-*

---

[a] In 1 K. xvii. 9, the Alex. MS. has Σεφθα, but in the other two passages agrees with the Vat.

[b] The name is given as *Surfand* by Ibn Idris; *Surfent* by Maundeville; and *Surpass* by Maundrell.

[c] A grotto (as usual) at the foot of the hill on which the modern village stands is now shown as the residence of Elijah (Van de Velde, *S. & P.* i. 302).

Digitized by Google

*ing*]: LXX. omits in both MSS.: *Sarthan*). An inaccurate representation of the name elsewhere more correctly given as ZARTHAN. It occurs only in Josh. iii. 16, in defining the position of Adam, the city by which the upper waters of the Jordan remained during the passage of the Israelites: "The waters rushing down from above stood and rose up upon one heap very far off — by Adam, the city that is by the side of Zarthan." No trace of these names has been found, nor is anything known of the situation of Zarthan.

It is remarkable that the LXX. should exhibit no [a] trace of the name. G.

**ZA'RETH-SHA'HAR** (צֶרֶת הַשָּׁחַר), *i. e.* Zereth has-shachar [*brightness of dawn*]: Σαρὰδ καὶ Σιὼν [Vat. Σειων]; Alex. Σαρθ καὶ Σιωρ: *Sereth Asachar*). A place mentioned only in Josh. xiii. 19, in the catalogue of the towns allotted to Reuben. It is named between SIBMAH and BETH-PEOR, and is particularly specified as "in Mount ha-Emek" (A. V. "in the Mount of the Valley"). From this, however, no clew can be gained to its position. Seetzen (*Reisen*, ii. 369) proposes, though with hesitation (see his note), to identify it with a spot called *Sard* at the mouth of the *Wady Zerka Main*, about a mile from the edge of the Dead Sea. A place *Shakûr* is marked on Van de Velde's map, about six miles south of *es-Salt*, at the head of the valley of the *Wady Seir*. But nothing can be said of either of these in the present state of our knowledge. G.

**ZAR'HITES, THE** (הַזַּרְחִי [patr.]: ὁ Ζαραΐ; [Vat.] Alex. ὁ Ζαρασι, [exc. Vat. Ζαρια in 1 Chr. xxvii. 11, Alex.] Ζαριει in Josh.: *Zarchita, Zare, stirps Zarahi* and *Zarai*). A branch of the tribe of Judah: descended from Zerah the son of Judah (Num. xxvi. 13, 20; Josh. vii. 17; 1 Chr. xxvii. 11, 13). Achan was of this family, and it was represented in David's time by two distinguished warriors, Sibbechai the Hushathite and Maharai the Netophathite.

**ZARTA'NAH** (צָרְתָנָה [*cooling*]: Σεσαθάν; Alex. Εσλιαθαν; [Comp. Ald. Ζαρθάν:] *Sarthana*). A place named in 1 K. iv. 12, to define the position of BETH-SHEAN. It is possibly identical with ZARTHAN, but nothing positive can be said on the point, and the name has not been discovered in post-biblical times. G.

**ZAR'THAN** (צָרְתָן [*cooling*]: Σειρά; Alex. Σιαρας: *Sarthan*).

1. A place in the *circar* or circle of Jordan, mentioned in connection with Succoth (1 K. vii. 46).

2. It is also named, in the account of the passage of the Jordan by the Israelites (Josh. iii. 16), as defining the position of the city Adam, which was beside (מֵעֻצַּד) it. The difference which the translators of the A. V. have introduced into the name in this passage (ZARETAN) has no existence in the original.

3. A place with the similar name of ZARTANAH (which in the Hebrew differs from the two forms already named only in its termination) is mentioned in the list of Solomon's commissariat districts. It is there specified as "close to" (אֵצֶל) Beth-shean, that is, in the upper part of the Jordan Valley.

4. Further, in Chronicles ZERERATHAH is substituted for Zarthan, and this again is not impossibly identical with the Zererah, Zererath, or Zererathah, of the story of Gideon. All these spots agree in proximity to the Jordan, but beyond this we are absolutely at fault as to their position. ADAM is unknown; SUCCOTH is, to say the least, uncertain; and no name approaching Zarthan has yet been encountered, except it be *Surtabeh* (صرطبه), the name of a lofty and isolated hill which projects from the main highlands into the Jordan Valley, about 17 miles north of Jericho (Van de Velde, *Memoir*, p. 354). But *Surtabeh*, if connected with any ancient name, would seem rather to represent some compound of the ancient Hebrew or Phœnician *Tsor*, which in Arabic is represented by *Sûr* (صور), as in the name of the modern Tyre. G.

**ZATH'OË** (Ζαθόη: *Zachues*). This name occurs in 1 Esdr. viii. 32, for ZATTU, which appears to have been omitted in the Hebrew text of Ezr. viii. 5, which should read, "Of the sons of Zattu, Shechaniah the son of Jahaziel."

**ZATHUI** (Ζαθουί; [Vat. Ζαγουρ:] *Dama*). ZATTU (1 Esdr. v. 12; comp. Ezr. ii. 8).

**ZAT'THU** (זַתּוּא [*lovely, pleasant*, Fürst]: Ζαθουια; Alex. Ζαθθουια: *Zethu*). Elsewhere ZATTU (Neh. x. 14).

**ZAT'TU** (זַתּוּא [*lovely, pleasant*]: Ζαττούδ, Ζαθούα, Ζαθουία; Alex. Ζαθθουα: FA. Ζαθουια, Ζαθουεια: *Zethua*). The sons of Zattu were a family of laymen of Israel who returned with Zerubbabel (Ezr. ii. 8; Neh. vii. 13). A second division accompanied Ezra, though in the Hebrew text of Ezr. viii. 5 the name has been omitted. [ZATHOE.] Several members of this family had married foreign wives (Ezr. x. 27).

**ZA'VAN** = ZAAVAN (1 Chr. i. 42).

**ZA'ZA** (זִזָא [*projection*, Fürst]: Ὀζάμ; Alex. Οζαζα; [Ald. Ζαζά; Comp. Ζιζᾶ:] *Ziza*). One of the sons of Jonathan, a descendant of Jerahmeel (1 Chr. ii. 33).

**ZEBADI'AH** (זְבַדְיָה [*gift of Jehovah*, Ges.]: Ζαβαδία; [Vat. Αζαβαβια; Alex. Αζαβδια:] *Zabudia*). 1. A Benjamite of the sons of Beriah (1 Chr. viii. 15).

2. [Ζαβαδία.] A Benjamite of the sons of Elpaal (1 Chr. viii. 17).

3. [Vat. M. Ζαβιδια.] One of the sons of Jeroham of Gedor, a Benjamite who joined the fortunes of David in his retreat at Ziklag (1 Chr. xii. 7).

4. (Ζαβαδίας; [Vat. Αβδειας:] Alex. Ζαββδας: *Zabadias*.) Son of Asahel the brother of Joab (1 Chr. xxvii. 7).

5. ([Rom. Alex. as in 4; Vat. Ζαββδειας:] *Zebedia*.) Son of Michael of the sons of Shephatiah (Ezr. viii. 8). He returned with 80 of his clan in the second caravan with Ezra. In 1 Esdr. viii. 34 he is called ZARAIAS.

6. (Ζαββία; [Vat.] FA. Ζαββεους.) A priest

[a] This is not only the case in the two principal MSS.; the edition of Holmes and Parsons shows it in one only, and that a cursive MS. of the 12th cent. [This MS., however, No. 58, is described by Holmes as "quantivis pretii." Comp. art. SEPTUAGINT, p 2914. The Comp. Polyglott also reads Ζαθόν. — A.

Digitized by Google

of the sons of Immer who had married a foreign wife after the return from Babylon (Ezr. x. 20). Called ZABDEUS in 1 Esdr. ix. 21.

7. (זַבְדִּיָה: *Zaβδία*; [Vat. *Zαχαριας*;] Alex. *Zaβδιας*: *Zabdias*.) Third son of Meshelemiah the Korhite (1 Chr. xxvi. 2).

8. (*Zaβδίας*; [Vat. *Zaββεμας*.]) A Levite in the reign of Jehoshaphat who was sent to teach the Law in the cities of Judah (2 Chr. xvii. 8).

9. [As in 8.] The son of Ishmael and prince of the house of Judah in the reign of Jehoshaphat (2 Chr. xix 11). In conjunction with Amariah the chief priest, he was appointed to the superintendence of the Levites, priests and chief men who had to decide all causes, civil and ecclesiastical, which were brought before them. They possibly may have formed a kind of court of appeal, Zebediah acting for the interests of the king, and Amariah being the supreme authority in ecclesiastical matters.

**ZE'BAH** (זֶבַח [*sacrifice*]: *Zεβεέ*: *Zebee*). One of the two "kings" of Midian who appear to have commanded the great invasion of Palestine, and who finally fell by the hand of Gideon himself. He is always coupled with Zalmunna, and is mentioned in Judg. viii. 5–21; Ps. lxxxiii. 11.

It is a remarkable instance of the unconscious artlessness of the narrative contained in Judg. vi. 33–viii. 28, that no mention is made of any of the chiefs of the Midianites during the early part of the story, or indeed until Gideon actually comes into contact with them. We then discover (viii. 18) that while the Bedouins were ravaging the crops in the valley of Jezreel, before Gideon's attack, three[a] or more of his brothers had been captured by the Arabs, and put to death by the hands of Zebah and Zalmunna themselves. But this material fact is only incidentally mentioned, and is of a piece with the later references by prophets and psalmists to other events in the same struggle, the interest and value of which have been alluded to under OREB.

Ps. lxxxiii. 12 purports to have preserved the very words of the cry with which Zeba and Zalmunna rushed up at the head of their hordes from the Jordan into the luxuriant growth of the great plain, "Seize these goodly[b] pastures!"

While Oreb and Zeeb, two of the inferior leaders of the incursion, had been slain, with a vast number of their people, by the Ephraimites, at the central fords of the Jordan (not improbably those near *Jisr Damieh*), the two kings had succeeded in making their escape by a passage further to the north (probably the ford near Beth-shean), and thence by the *Wady Yabis*, through Gilead, to Karkor, a place which is not fixed, but which lay doubtless high up on the Hauran. Here they were reposing with 15,000 men, a mere remnant of their huge horde, when Gideon overtook them. Had they resisted there is little doubt that they might have easily overcome the little band of "fainting" heroes who had toiled after them up the tremendous passes of the mountains; but the name of Gideon was still full of terror, and the Bedouins were entirely unprepared for his attack — they fled in dismay, and the two kings were taken.

Such was the Third Act of the great Tragedy. Two more remain. First, the return down the long defiles leading to the Jordan. We see the cavalcade of camels, jingling the golden chains, and the crescent-shaped collars or trappings hung round their necks. High aloft rode the captive chiefs clad in their brilliant *keffiyehs* and embroidered *'ibbayehs*, and with their "collars" or "jewels" in nose and ear, on neck and arm. Gideon probably strode on foot by the side of his captives. They passed Penuel, where Jacob had seen the vision of the face of God; they passed Succoth; they crossed the rapid stream of the Jordan; they ascended the highlands west of the river, and at length reached Ophrah, the native village of their captor (Joseph. *Ant.* iv. 7, § 5). Then at last the question which must have been on Gideon's tongue during the whole of the return found a vent. There is no appearance of its having been alluded to before, but it gives, as nothing else could, the key to the whole pursuit. It was the death of his brothers, "the children of his mother," that had supplied the personal motive for that steady perseverance, and had led Gideon on to his goal against hunger, faintness, and obstacles of all kinds. "What manner of men were they which ye slew at Tabor?" Up to this time the sheikhs may have believed that they were reserved for ransom; but these words once spoken there can have been no doubt what their fate was to be. They met it like noble children of the Desert, without fear or weakness. One request alone they make — that they may die by the sure blow of the hero himself — "and Gideon arose and slew them;" and not till he had revenged his brothers did any thought of plunder enter his heart — then, and not till then, did he lay hands on the treasures which ornamented their camels. G.

**ZEBA'IM** (צְבֹיִם, in Neb. צְבוֹיִם [*gazelles*]: [Vat.] *υιοι Aσεβαεω*; [Rom.] Alex. *'Aσεβοελμ*; in Neb. *vl.* *Maβαΐμ* [Vat. Alex. FA. *-ειμ*]: *Asebaim*, *Sabaim*). The sons of Pochereth hat-Tsebaim are mentioned in the catalogue of the families of "Solomon's slaves," who returned from the Captivity with Zerubbabel (Ezra ii. 57; Neh. vii. 59). The name is in the original all but identical with that of ZEBOIM,[c] the fellow-city of Sodom; and as many of "Solomon's slaves" appear to have been of Canaanite[d] stock, it is possible that the family of Pochereth were descended from one of the people who escaped from Zeboim in the day of the great catastrophe in the Valley of the Jordan. This, however, can only be accepted as conjecture, and on the other hand the two names Pochereth hat-Tsebaim are considered by some to have no reference to place, but to signify the "snarer or hunter of roes" (Gesenius, *Thes.* p. 1102 *b*; Bertheau, *Exeg. Handb.* Ezr. ii. 57). G.

**ZEBE'DEE** (זַבְדִּי or זַבְדָי [*Jehovah's gift*]: *Zεβεδαΐος*). A fisherman of Galilee, the father of the Apostles James the Great and John

[a] It is perhaps allowable to infer this from the use of the plural (not the dual) to the word brethren (ver 19).

[b] Such is the meaning of "pastures of God" in the early idiom.

[c] Even to the double *yod*. This name, on the other hand, is distinct from the ZEBOIM of Benjamin.

[d] See this noticed more at length under HAZARSUSAH, SHEBA, etc.

(Matt. iv. 21), and the husband of Salome (Matt. xxvii. 56; Mark xv. 40). He probably lived either at Bethsaida or in its immediate neighborhood. It has been inferred from the mention of his "hired servants" (Mark i. 20), and from the acquaintance between the Apostle John and Annas the high-priest (John xviii. 15), that the family of Zebedee were in easy circumstances (comp. John xix. 27), although not above manual labor (Matt. iv. 21). Although the name of Zebedee frequently occurs as a patronymic, for the sake of distinguishing his two sons from others who bore the same names, he appears only once in the Gospel narrative, namely in Matt. iv. 21, 22, Mark i. 19, 20, where he is seen in his boat with his two sons mending their nets. On this occasion he allows his sons to leave him at the bidding of the Saviour, without raising any objection; although it does not appear that he was himself ever of the number of Christ's disciples. His wife, indeed, appears in the catalogue of the pious women who were in constant attendance on the Saviour towards the close of his ministry, who watched Him on the cross, and ministered to Him even in the grave (Matt. xxvii. 55, 56; Mark xv. 40, xvi. 1; comp. Matt. xx. 20, and Luke viii. 3). It is reasonable to infer that Zebedee was dead before this time. It is worthy of notice, and may perhaps be regarded as a minute confirmation of the evangelical narrative, that the name of Zebedee is almost identical in signification with that of John, since it is likely that a father would desire that his own name should be, as it were, continued, although in an altered form. [JOHN THE APOSTLE.] W. B. J.

**ZEBI'NA** (זִבְינָא) [*bought or sold*]: Ζεβεννά; [Vat. Ζαρβιν; FA. (with next word) Ζαμβεινααια;] Alex. omits: *Zubina*). One of the sons of Nebo, who had taken foreign wives after the return from Babylon (Ezr. x. 43).

**ZEBO'IM** [or **ZEBOI'IM**]. This word represents in the A. V. two names which in the original are quite distinct.

1. (צְבֹיִם, צביים, צְבָאִים, and, in the *Keri*, צבויים: [Rom. Ζεβωλμ,] [a] Ζεβοειλμ, [Ζεβοειλ; Vat. Ζεβωειμ;] Alex. Ζεβωειμ, Ζεβωειμ, [Ζεβωειν:] *Seboim*) One of the five cities of the "plain" or circle of Jordan. It is mentioned in Gen. x. 19, xiv. 2, 8; Deut. xxix. 23; and Hos. xi. 8, in each of which passages it is either coupled with Admah, or placed next it in the lists. The name of its king, Shemeber, is preserved (Gen. xiv. 2); and it perhaps appears again, as ZEBAIM, in the lists of the menials of the Temple.

No attempt appears to have been made to discover the site of Zeboim, till M. de Saulcy suggested the *Talûla Sebâan*, a name which he, and he alone, reports as attached to extensive ruins on the high ground between the Dead Sea and *Kerak* (*Voyage*, Jan. 22; *Map*, sht. 7). Before however this can be accepted, M. de Saulcy must explain how a place which stood in the plain or circle *of the Jordan*, can have been situated on the high lands at least 50 miles from that river. [See SODOM and ZOAR.]

In Gen. xiv. 2, 8, the name is given in the A. V ZEBOIIM, a more accurate representative of the form in which it appears in the original both there and in Deut. xxix. 23.[b]

2. THE VALLEY OF ZEBOIM (גֵּי הַצְּבֹעִים· [Vat.] Γα. των Ζαμεω; [Rom. Ald. Ζαβιμ; Comp. Ζαβαιν;] the passage is lost in Alex.: *Vallis Seboim*). The name differs from the preceding, not only in having the definite article attached to it, but also in containing the characteristic and stubborn letter *Ain*, which imparts a definite character to the word in pronunciation. It was a ravine or gorge, apparently east of Michmash, mentioned only in 1 Sam. xiii. 18. It is there described with a curious minuteness, which is unfortunately no longer intelligible. The road running from Michmash to the east, is specified as "the road of the border that looketh to the ravine of Zeboim towards the wilderness." The wilderness (*midbar*) is no doubt the district of uncultivated mountain tops and sides which lies between the central district of Benjamin and the Jordan Valley; and here apparently the ravine of Zeboim should be sought. In that very district there is a wild gorge, bearing the name of *Shuk ed-Dubba'* (شق الضبع),[c] "ravine of the hyena," the exact equivalent of *Ge hat-tsebo'im*. Up this gorge runs the path by which the writer was conducted from Jericho to *Mukhmas*, in 1858. It does not appear that the name has been noticed by other travellers, but it is worth investigation. G.

* The name Zeboim (with the *Ain*) also occurs in Neh. xi. 34 (Rom. Vat. Alex. FA.[1] omit; FA.[2] Ζεβοειμ, Comp. Ζεβωειμ), perhaps designating a town near the ravine of the same name. It is mentioned in connection with Hadid, Neballat, Lod and Ono. A.

**ZEBU'DAH** (זְבוּדָה: *Keri* זְבוּדָה [*given, bestowed*]: Ἰεβδά; [Vat. Ἰελλα;] Alex. Ζεβεδαφ; [Comp. Ζαβουδά:] *Zebida*). Daughter of Pedaiah of Rumah, wife of Josiah and mother of king Jehoiakim (2 K. xxiii. 36). The Peshito-Syriac and Arabic of the London Polyglot read זבידה; the Targum has זבודה.

**ZE'BUL** (זְבוּל [*habitation, chamber*]: Ζεβούλ: *Zebul*). Chief man (שַׂר, A. V. "ruler") of the city of Shechem at the time of the contest between Abimelech and the native Canaanites. His name occurs Judg. ix. 28, 30, 36, 38, 41. He governed the town as the "officer" (פְּקִיד: ἐπίσκοπος) of Abimelech while the latter was absent, and he took part against the Canaanites by shutting them out of the city when Abimelech was encamped outside it. His conversation with Gaal the Canaanite leader, as they stood in the gate of Shechem watching the approach of the armed bands, gives Zebul a certain individuality amongst the many characters of that time of confusion. G.

---

[a] In Gen. x. 19 only, this appears in Vat. (Mai), Ζεβωνειμ. [The Vat. MS. does not contain this part of Genesis. — A.]

[b] * The conjecture of M. de Saulcy has no apparent basis; but the present distance of the site from the river is not a fatal objection to it. The explanation asked for above, the reader will find from Mr. Grove's own pen in the article LOT (ii. 1686). S. W.

[c] The writer was accompanied by Mr. Consul R. T. Rogers, well known as one of the best living scholars in the common Arabic, who wrote down the name for him at the moment. [Dr. Van Dyck writes the last word without doubling the ب. — A.]

Digitized by Google

**ZEB'ULONITE** (הַזְּבֻלֹנִי, with the def. article [patr.]: ὁ Ζαβουλωνίτης [Vat. -νει-]; Alex. in both verses, ὁ Ζαβουνίτης: *Zabulonites*), *i. e.* member of the tribe of Zebulun. Applied only to ELON, the one judge produced by the tribe (Judg. xii. 11, 12). The article being found in the original, the sentence should read, "Elon the Zebulonite." G.

**ZEB'ULUN** (זְבוּלֻן, זְבֻלוֹן, and זְבוּלוֹן [*abode, dwelling*]: Ζαβουλών: *Zabulon*). The tenth of the sons of Jacob, according to the order in which their births are enumerated; the sixth and last of Leah (Gen. xxx. 20, xxxv. 23, xlvi. 14; 1 Chr. ii. 1). His birth is recorded in Gen. xxx. 19, 20, where the origin of the name is as usual ascribed to an exclamation of his mother's, "'Now will my husband [b] dwell-with-me (*izbelēnī*), for I have borne him six sons!' and she called his name Zebulun."

Of the individual Zebulun nothing is recorded. The list of Gen. xlvi. ascribes to him three sons, founders of the chief families of the tribe (comp. Num. xxvi. 26) at the time of the migration to Egypt. In the Jewish traditions he is named as the first of the five who were presented by Joseph to Pharaoh — Dan, Naphtali, Gad, and Asher being the others (*Targ. Pseudojon.* on Gen. xlvii. 2).

During the journey from Egypt to Palestine the tribe of Zebulun formed one of the first camp, with Judah and Issachar (also sons of Leah), marching under the standard of Judah. Its numbers, at the census of Sinai, were 57,000, surpassed only by Simeon, Dan, and Judah. At that of Shittim they were 60,500, not having diminished, but not having increased nearly so much as might naturally be expected. The head of the tribe at Sinai was Eliab son of Helon (Num. vii. 24); at Shiloh, Elizaphan son of Parnach (*ib.* xxxiv. 25). Its representative amongst the spies was Gaddiel son of Sodi (xiii. 10). Besides what may be implied in its appearances in these lists, the tribe is not recorded to have taken part, for evil or good, in any of the events of the wandering or the conquest. Its allotment was the third of the second distribution (Josh. xix. 10). Judah, Joseph, Benjamin, had acquired the south and the centre of the country. To Zebulun fell one of the fairest of the remaining portions. It is perhaps impossible, in the present state of our knowledge, exactly to define its limits;[c] but the statement of Josephus (*Ant.* v. 1, § 22) is probably in the main correct, that it reached on the one side to the lake of Gennesaret, and on the other to Carmel and the Mediterranean. On the south it was bounded by Issachar, who lay in the great plain or valley of the Kishon; on the north it had Naphtali and Asher. In this district the tribe possessed the outlet (the "going-out," Deut. xxxiii. 18) of the plain of *Akka;* the fisheries of the lake of Galilee: the splendid agricultural capabilities of the great plain of the *Buttauf* (equal in fertility, and almost equal in extent, to that of Jezreel, and with the immense advantage of not being, as that was, the high road of the Bedouins); and, last not least, it included sites so strongly fortified by nature, that in the later struggles of the nation they proved more impregnable than any in the whole country.[d] The sacred mountain of TABOR, Zebulun appears to have shared with Issachar (Deut. xxxiii. 19), and it and Rimmon were allotted to the Merarite Levites (1 Chr. vi. 77). But these ancient sanctuaries of the tribe were eclipsed by those which arose within it afterwards, when the name of Zebulun was superseded by that of Galilee. Nazareth, Cana, Tiberias, and probably the land of Gennesaret itself, were all situated within its limits.

The fact recognized by Josephus that Zebulun extended to the Mediterranean, though not mentioned or implied, as far as we can discern, in the lists of Joshua and Judges, is alluded to in the Blessing of Jacob (Gen. xlix. 13): —

> "Zebulun dwells at the shore of the seas,
> Even he at the shore of ships:
> And his thighs are upon Zidon" —

a passage which seems to show that at the date at which it was written, the tribe was taking a part in Phœnician [e] commerce. The "way of the sea" (Is. ix. 1), the great road from Damascus to the Mediterranean, traversed a good portion of the territory of Zebulun, and must have brought its people into contact with the merchants and the commodities of Syria, Phœnicia, and Egypt.

Situated so far from the centre of government, Zebulun remains throughout the history, with one exception, in the obscurity which envelops the whole of the northern tribes. That exception, however, is a remarkable one. The conduct of the tribe during the struggle with Sisera, when they fought with desperate valor side by side with their brethren of Naphtali, was such as to draw down the especial praise of Deborah, who singles them out from all the other tribes (Judg. v. 18): —

> "Zebulun is a people that threw away its life even unto death:
> And Naphtali, on the high places of the field."

The same poem contains an expression which seems to imply that, apart from the distinction gained by their conduct in this contest, Zebulun was already in a prominent position among the tribes: —

> "Out of Machir came down governors;
> And out of Zebulun those that handle the pen (or the wand) of the scribe;"

---

[a] Of these three forms the first is employed in Genesis, Isaiah, Psalms, and Chronicles, except Gen. xlix. 13, and 1 Chr. xxvii. 19; also occasionally in Judges; the second is found in the rest of the Pentateuch, in Joshua, Judges, Ezekiel, and the above place in Chronicles. The third and more extended form is found in Judg. i. 30 only. The first and second are used indiscriminately: *e. gr.* Judg. iv. 6 and v. 18 exhibit the first; Judg. iv. 10 and v. 14 the second form.

[b] This play is not preserved in the original of the "Blessing of Jacob," though the language of the A. V. implies it. The word rendered "dwell" in Gen. xlix. 13 is יִשְׁכֹּן, with no relation to the name Zebulun. The LXX. put a different point on the exclamation of Leah: "My husband will choose me" (*aipereî με*). This, however, hardly implies any difference in the original text. Josephus (*Ant.* i. 19, § 8) gives only a general explanation: "a pledge of goodwill towards her."

[c] Few of the towns in the catalogue of Josh. xix. 10–16 have been identified. The tribe is omitted in the lists of 1 Chronicles.

[d] Sepphoris, Jotapata, &c.

[e] In the "Testament of Zabulon" (Fabricius, *Pseudepigr. V. T.* i. 630–45) great stress is laid on his skill in fishing, and he is commemorated as the first to navigate a skiff on the sea.

Digitized by Google

referring probably to the officers, who registered and marshalled the warriors of the host (comp. Josh. i. 10). One of these "scribes" may have been ELON, the single judge produced by the tribe, who is recorded as having held office for ten years (Judg. xii. 11, 12).

A similar reputation is alluded to in the mention of the tribe among those who attended the inauguration of David's reign at Hebron. The expressions are again peculiar: "Of Zebulun such as went forth to war, rangers of battle, with all tools of war, 50,000; who could set the battle in array; they were not of double heart" (1 Chr. xii. 33). The same passage, however, shows that while proficient in the arts of war they did not neglect those of peace, but that on the wooded hills and fertile plains of their district they produced bread, meal, figs, grapes, wine, oil, oxen, and sheep in abundance (ver. 40). The head of the tribe at this time was Ishmaiah ben-Obadiah (1 Chr. xxvii. 19).

We are nowhere directly told that the people of Zebulun were carried off to Assyria. Tiglath-pileser swept away the whole of Naphtali (2 K. xv. 29; Tob. i. 2), and Shalmaneser in the same way took "Samaria" (xvii. 6); but though the deportation of Zebulun and Issachar is not in so many words asserted, there is the statement (xvii. 18) that the whole of the northern tribes were removed; and there is also the well-known allusion of Isaiah to the affliction of Zebulun and Naphtali (ix. 1), which can hardly point to anything but the invasion of Tiglath-pileser. It is satisfactory to reflect that the very latest mention of the Zebulunites is the account of the visit of a large number of them to Jerusalem to the Passover of Hezekiah, when, by the enlightened liberality of the king, they were enabled to eat the feast, even though, through long neglect of the provisions of the Law, they were not cleansed in the manner prescribed by the ceremonial law. In the visions of Ezekiel (xlviii. 26–33) and of St. John (Rev. vii. 8) this tribe finds its due mention. G.

**ZEBU'LUNITES, THE** (הַזְּבוּלֹנִי, *i. e.* "the Zebulonite" [patr.]: Ζαβουλών: *Zabulon*). The members of the tribe of Zebulun (Num. xxvi. 27 only). It would be more literally accurate if spelt ZEBULONITES. G.

**ZECHARI'AH** (זְכַרְיָה [*Jehovah remembers*]: Ζαχαρίας: *Zacharias*). 1. The eleventh in order of the twelve minor prophets. Of his personal history we know but little. He is called in his prophecy the son of Berechiah, and the grandson of Iddo, whereas in the book of Ezra (v. 1, vi. 14) he is said to have been the son of Iddo. Various attempts have been made to reconcile this discrepancy. Cyril of Alexandria (*Pref. Comment. ad Zech.*) supposes that Berechiah was the father of Zechariah, according to the flesh, and that Iddo was his instructor, and might be regarded as his spiritual father. Jerome too, according to some MSS., has in Zech. i. 1, "filium Barachiæ, filium Addo," as if he supposed that Berechiah and Iddo were different names of the same person; and the same mistake occurs in the LXX.: τὸν τοῦ Βαραχίου, υἱὸν Ἀδδώ. Gesenius (*Lex.* s. v. עָדָה) and Rosenmüller (*On Zech.* i. 1) take עָדָה in the passages in Ezra to mean "grand son," as in Gen. xxix. 5 Laban is termed "the son," *i. e.* "grandson," of Nahor. Others, again, have suggested that in the text of Ezra no mention is made of Berechiah, because he was already dead, or because Iddo was the more distinguished person, and the generally recognized head of the family. Knobel thinks that the name of Berechiah has crept into the present text of Zechariah from Isaiah viii. 2, where mention is made of a Zechariah "the son of *Jeberechiah*," which is virtually the same name (LXX. Βαραχίου) as Berechiah.[a] His theory is that chapters ix.–xi. of our present book of Zechariah are really the work of the older Zechariah (Is. viii. 2); that a later scribe finding the two books, one bearing the name of Zechariah the son of Iddo, and the other that of Zechariah the son of Berechiah, united them into one, and at the same time combined the titles of the two, and that hence arose the confusion which at present exists. This, however, is hardly a probable hypothesis. It is surely more natural to suppose, as the prophet himself mentions his father's name, whereas the historical books of Ezra and Nehemiah mention only Iddo, that Berechiah had died early, and that there was now no intervening link between the grandfather and the grandson. The son, in giving his pedigree, does not omit his father's name: the historian passes it over, as of one who was but little known, or already forgotten. This view is confirmed if we suppose the Iddo here mentioned to have been the Iddo the priest who, in Neh. xii. 4, is said to have returned from Babylon in company with Zerubbabel and Joshua. He is there said to have had a son Zechariah (ver. 16), who was contemporary with Joiakim the son of Joshua; and this falls in with the hypothesis that, owing to some unexplained cause — perhaps the death of his father — Zechariah became the next representative of the family after his grandfather Iddo. Zechariah, according to this view, like Jeremiah and Ezekiel before him, was priest as well as prophet. He seems to have entered upon his office while yet young (נַעַר, Zech. ii. 4; comp. Jer. i. 6), and must have been born in Babylon, whence he returned with the first caravan of exiles under Zerubbabel and Joshua.

It was in the eighth month, in the second year of Darius, that he first publicly discharged his office. In this he acted in concert with Haggai, who must have been considerably his senior, if, as seems not improbable, Haggai had been carried into captivity, and hence had himself been one of those who had seen "the house" of Jehovah "in her first glory" (Hag. ii. 3). Both prophets had the same great object before them; both directed all their energies to the building of the Second Temple. Haggai seems to have led the way in this work, and then to have left it chiefly in the hands of his younger contemporary. The foundations of the new building had already been laid in the time of Cyrus; but during the reigns of Cambyses and the pseudo-Smerdis the work had been broken off through the jealousies of the Samaritans. When, however, Darius Hystaspis ascended the throne (521), things took a more favorable turn. He seems to have been a large-hearted and gracious prince, and to have been well-disposed towards the

Jews. Encouraged by the hopes which his accession held out, the prophets exerted themselves to the utmost to secure the completion of the Temple.

It is impossible not to see of how great moment, under such circumstances, and for the discharge of the special duty with which he was entrusted, would be the priestly origin of Zechariah.

Too often the prophet had had to stand forth in direct antagonism to the priest. In an age when the service of God had stiffened into formalism, and the priests' lips no longer kept knowledge, the prophet was the witness for the truth which lay beneath the outward ceremonial, and without which the outward ceremonial was worthless. But the thing to be dreaded now was not superstitious formalism, but cold neglect. There was no fear now lest in a gorgeous temple, amidst the splendors of an imposing ritual and the smoke of sacrifices ever ascending to heaven, the heart and life of religion should be lost. The fear was all the other way, lest even the body, the outward form and service, should be suffered to decay.

The foundations of the Temple had indeed been laid, but that was all (Ezr. v. 16). Discouraged by the opposition which they had encountered at first, the Jewish colony had begun to build, and were not able to finish; and even when the letter came from Darius sanctioning the work, and promising his protection, they showed no hearty disposition to engage in it. At such a time, no more fitting instrument could be found to rouse the people, whose heart had grown cold, than one who united to the authority of the prophet the zeal and the traditions of a sacerdotal family.

Accordingly, to Zechariah's influence we find the rebuilding of the Temple in a great measure ascribed. "And the elders of the Jews builded," it is said, "and they prospered through the prophesying of Haggai the prophet, and Zechariah the son of Iddo" (Ezr. vi. 14). It is remarkable that in this juxtaposition of the two names both are not styled prophets: not "Haggai and Zechariah the prophets," but "Haggai the prophet, and Zechariah *the son of Iddo*." Is it an improbable conjecture that Zechariah is designated by his father's (or grandfather's) name, rather than by his office, in order to remind us of his priestly character? Be this as it may, we find other indications of the close union which now subsisted between the priests and the prophets. Various events connected with the taking of Jerusalem and the Captivity in Babylon had led to the institution of solemn fast-days; and we find that when a question arose as to the propriety of observing these fast-days, now that the city and the Temple were rebuilt, the question was referred to "the priests which were in the house of Jehovah, and to the prophets,"—a recognition, not only of the joint authority, but of the harmony subsisting between the two bodies, without parallel in Jewish history. The manner, too, in which Joshua the high-priest is spoken of in this prophecy shows how lively a sympathy Zechariah felt towards him.

Later traditions assume, what is indeed very probable, that Zechariah took personally an active part in providing for the liturgical service of the Temple. He and Haggai are both said to have composed psalms with this view. According to the LXX., Pss. cxxxvii., cxlv.–cxlviii.; according to the Peshito, Pss. cxxv., cxxvi.; according to the Vulg., Ps. cxi.; are psalms of Haggai and Zechariah.[a] The triumphant "Hallelujah," with which many of them open, was supposed to be characteristic of those psalms which were first chanted in the Second Temple, and came with an emphasis of meaning from the lips of those who had been restored to their native land. The allusions, moreover, with which these psalms abound, as well as their place in the psalter, leave us in no doubt as to the time when they were composed, and lend confirmation to the tradition respecting their authorship.

If the later Jewish accounts[b] may be trusted, Zechariah, as well as Haggai, was a member of the Great Synagogue. The patristic notices of the prophet are worth nothing. According to these, he exercised his prophetic office in Chaldæa, and wrought many miracles there; returned to Jerusalem at an advanced age, where he discharged the duties of the priesthood, and where he died and was buried by the side of Haggai.[c]

The genuine writings of Zechariah help us but little in our estimation of his character. Some faint traces, however, we may observe in them of his education in Babylon. Less free and independent than he would have been, had his feet trod from childhood the soil, —

> "Where each old poetic mountain
> Inspiration breathed around,"

he leans avowedly on the authority of the older prophets, and copies their expressions. Jeremiah especially seems to have been his favorite; and hence the Jewish saying, that "the spirit of Jeremiah dwelt in Zechariah." But in what may be called the peculiarities of his prophecy, he approaches more nearly to Ezekiel and Daniel. Like them he delights in visions; like them he uses symbols and allegories, rather than the bold figures and metaphors which lend so much force and beauty to the writings of the earlier prophets; like them he beholds angels ministering before Jehovah, and fulfilling his behests on the earth. He is the only one of the prophets who speaks of Satan. That some of these peculiarities are owing to his Chaldæan education can hardly be doubted. It is at least remarkable that both Ezekiel and Daniel, who must have been influenced by the same associations, should in some of these respects so closely resemble Zechariah, widely as they differ from him in others.

Even in the *form* of the visions a careful criticism might perhaps discover some traces of the

---

[a] Hence Pseud-Epiphanius, speaking of Haggai, says καὶ αὐτὸς ἤψαλλεν ἐκεῖ πρῶτος ἀλληλουΐα (in allusion to the Hallelujah with which some of these Psalms begin) διὸ λέγουσιν· ἀλληλουΐα ὅ ἐστιν ὕμνος Ἀγγαίου καὶ Ζαχαρίου. Dorotheus, p. 144: "Hic Zacharias e Chaldæa venit cum setate jam esset provecta atque ibi populo multa vaticinatus est prodigiaque probandi gratia edidit, et sacerdotio Hierosolymis functus est," etc. Isidorus, cap. 51. "Zacharias de regione Chaldæorum valde senex in terram suam reversus est, in qua et mortuus est ac sepultus juxta Aggæum qui ecit in pace."

[b] Tr. Megilla, fol. 17, 2. 18, 1; Rashi *ad Baba Bathra*, fol. 15, 1.

[c] Pseud-Epiph. *de Proph.* cap. 21, οὗτος ἦλθεν ἐκεῖ εἰς Χαλδαίαν ἦδη προβεβηκὼς καὶ ἐκεῖ ὢν πολλὰ τῷ λαῷ προεφήτευσεν, κτλ.

prophet's early training. Possibly the "valley of myrtles" in the first vision may have been suggested by Chaldæa rather than by Palestine. At any rate it is a curious fact that myrtles are never mentioned in the history of the Jews before the exile. They are found, besides this passage of Zechariah, in the Deutero-Isaiah xli. 19, lv. 13, and in Neh. viii. 15.[a] The forms of trial in the third vision, where Joshua the high-priest is arraigned, seem borrowed from the practice of Persian rather than Jewish courts of law. The filthy garments in which Joshua appears are those which the accused must assume when brought to trial; the white robe put upon him is the caftan or robe of honor which to this day in the East is put upon the minister of state who has been acquitted of the charges laid against him.

The vision of the woman in the Ephah is also oriental in its character. Ewald refers to a very similar vision in Tod's *Rajasthan*, t. ii. p. 688.

Finally, the chariots issuing from between two mountains of brass must have been suggested, there can scarcely be any doubt, by some Persian symbolism.

Other peculiarities of style must be noticed, when we come to discuss the question of the Integrity of the Book. Generally speaking, Zechariah's style is pure, and remarkably free from Chaldaisms. As is common with writers in the decline of a language, he seems to have striven to imitate the purity of the earlier models; but in orthography, and in the use of some words and phrases, he betrays the influence of a later age. He writes אֹתִי, and דָּוִיד, and employs אַחַת (v. 7) in its later use as the indefinite article, and צְפַנְיָהוּ with the fem. termination (iv. 12). A full collection of these peculiarities will be found in Köster, *Meletemata in Zech.*, etc.

*Contents of the Prophecy.* — The book of Zechariah, in its existing form, consists of three principal parts, chaps. i.–viii., chaps. ix.–xi., chaps. xii.–xiv.

I. The first of these divisions is allowed by all critics to be the genuine work of Zechariah the son of Iddo. It consists, first, of a short introduction or preface, in which the prophet announces his commission; then of a series of visions, descriptive of all those hopes and anticipations of which the building of the Temple was the pledge and sure foundation; and finally of a discourse, delivered two years later, in reply to questions respecting the observance of certain established fasts.

1. The short introductory oracle (chap. i. 1–6) is a warning voice from the past. The prophet solemnly reminds the people, by an appeal to the experience of their fathers, that no word of God had ever fallen to the ground, and that therefore, if with sluggish indifference they refused to cooperate in the building of the Temple, they must expect the judgments of God. This warning manifestly rests upon the former warnings of Haggai.

2. In a dream of the night there passed before the eyes of the prophet a series of visions (chap. i. 7–vi. 15) descriptive in their different aspects of events, some of them shortly to come to pass, and others losing themselves in the mist of the future. These visions are obscure, and accordingly the prophet asks their meaning. The interpretation is given, not as to Amos by Jehovah Himself, but by an angel who knows the mind and will of Jehovah, who intercedes with Him for others, and by whom Jehovah speaks and issues his commands: at one time he is called "the angel who spake with me" [or "by me"] (i. 9); at another, "the angel of Jehovah" (i. 11, 12, iii. 1–6).

(1.) In the first vision (chap. i. 7–15) the prophet sees, in a valley of myrtles,[b] a rider upon a roan horse, accompanied by others who, having been sent forth to the four quarters of the earth, had returned with the tidings that the whole earth was at rest (with reference to Hag. ii. 20). Hereupon the angel asks how long this state of things shall last, and is assured that the indifference of the heathen shall cease, and that the Temple shall be built in Jerusalem. This vision seems to have been partly borrowed from Job i. 7, etc.

(2.) The second vision (chap. ii. 1–17, A. V. i. 18–ii. 13) explains *how* the promise of the first is to be fulfilled. The four horns are the symbols of the different heathen kingdoms in the four quarters of the world, which have hitherto combined against Jerusalem. The four carpenters or smiths symbolize their destruction. What follows, ii. 5–9 (A. V. ii. 1–5), betokens the vastly extended area of Jerusalem, owing to the rapid increase of the new population. The old prophets, in foretelling the happiness and glory of the times which should succeed the Captivity in Babylon, had made a great part of that happiness and glory to consist in the gathering together again of the whole dispersed nation in the land given to their fathers. This vision was designed to teach that the expectation thus raised — the return of the dispersed of Israel — should be fulfilled; that Jerusalem should be too large to be compassed about by a wall, but that Jehovah Himself would be to her a wall of fire — a light and defense to the holy city, and destruction to her adversaries. A song of joy, in prospect of so bright a future, closes the scene.

(3.) The next two visions (iii. iv.) are occupied with the Temple, and with the two principal persons on whom the hopes of the returned exiles rested. The permission granted for the rebuilding of the Temple had no doubt stirred afresh the malice and the animosity of the enemies of the Jews. Joshua the high-priest had been singled out, it would seem, as the especial object of attack,

---

[a] In the last passage the people are told to "fetch olive-branches and cypress-branches, and myrtle-branches and palm-branches . . . . to make booths" for the celebration of the Feast of Tabernacles. It is interesting to compare this with the original direction, as given in the wilderness, when the only trees mentioned are "palms and willows of the brook." Palestine was rich in the olive and cypress. Is it very improbable that the myrtle may have been an importation from Babylon? Esther was also called Hadassah (the myrtle), perhaps her Persian designation (Esth. ii. 7); and the myrtle is said to be a native of Persia.

[b] Ewald understands by מְצֻלָה not "a valley" or "bottom," as the A. V. renders, but the heavenly tent or tabernacle (the expression being chosen with reference to the Mosaic tabernacle), which is the dwelling-place of Jehovah. Instead of "myrtles" he understands by הֲדַסִּים (with the LXX. ἀπὸ μέσου τῶν ὀρέων τῶν κατασκίων) "mountains," and supposes these to be the "two mountains" mentioned vi. 1 and which are there called "mountains of brass."

Digitized by Google

and perhaps formal accusations had already been laid against him before the Persian court.[a] The prophet, in vision, sees him summoned before a higher tribunal, and solemnly acquitted, despite the charges of the Satan or Adversary. This is done with the forms still usual in an eastern court. The filthy garments in which the accused is expected to stand are taken away, and the caftan or robe of honor is put upon him in token that his innocence has been established. Acquitted at that bar, he need not fear, it is implied, any earthly accuser. He shall be protected, he shall carry on the building of the Temple, he shall so prepare the way for the coming of the Messiah, and upon the foundation-stone laid before him shall the seven eyes of God, the token of his ever-watchful Providence, rest.

(4.) The last vision (iv.) supposes that all opposition to the building of the Temple shall be removed. This sees the completion of the work. It has evidently a peculiarly impressive character; for the prophet, though his dream still continues, seems to himself to be awakened out of it by the angel who speaks to him. The candlestick (or more properly chandelier) with seven lights (borrowed from the candlestick of the Mosaic Tabernacle, Ex. xxv. 31 ff.) supposes that the Temple is already finished. The seven pipes which supply each lamp answer to the seven eyes of Jehovah in the preceding vision (iii. 9), and this sevenfold supply of oil denotes the presence and operation of the Divine Spirit, through whose aid Zerubbabel will overcome all obstacles, so that, as his hands had laid the foundation of the house, his hands should also finish it (iv. 9). The two olive-branches of the vision, belonging to the olive-tree standing by the candlestick, are Zerubbabel himself and Joshua.

The two next visions (v. 1–11) signify that the land, in which the sanctuary has just been erected, shall be purged of all its pollutions.

(5.) First, the curse is recorded against wickedness in *the whole land* (not in the *whole earth*, as A. V.), v. 3; that due solemnity may be given to it, it is inscribed upon a roll, and the roll is represented as flying, in order to denote the speed with which the curse will execute itself.

(6.) Next, the unclean thing, whether in the form of idolatry or any other abomination, shall be utterly removed. Caught and shut up as it were in a cage, like some savage beast, and pressed down with a weight as of lead upon it so that it cannot escape, it shall be carried into that land where all evil things have long made their dwelling (Is. xxxiv. 13), the land of Babylon (Shinar, v. 11), from which Israel had been redeemed.

(7.) And now the night is waning fast, and the morning is about to dawn. Chariots and horses appear, issuing from between two brazen mountains, the horses like those in the first vision; and these receive their several commands and are sent forth to execute the will of Jehovah in the four quarters of the earth. The four chariots are images of the four winds, which, according to Ps. civ. 3, as servants of God, fulfill his behests; and of the one that goes to the north it is particularly said that it shall let the Spirit of Jehovah rest there — is it a spirit of anger against the nations, Assyria, Babylon, Persia, or is it a spirit of hope and desire of return in the hearts of those of the exiles who still lingered in the land of their captivity? Stähelin, Maurer, and others adopt the former view, which seems to be in accordance with the preceding vision: Ewald gives the latter interpretation, and thinks it is supported by what follows.

Thus, then, the cycle of visions is completed. Scene after scene is unrolled till the whole glowing picture is presented to the eye. All enemies crushed; the land repeopled and Jerusalem girt as with a wall of fire; the Temple rebuilt, more truly splendid than of old, because more abundantly filled with a Divine Presence; the leaders of the people assured in the most signal manner of the Divine protection; all wickedness solemnly sentenced, and the land forever purged of it: such is the magnificent panorama of hope which the prophet displays to his countrymen.

And very consolatory must such a prospect have seemed to the weak and disheartened colony in Jerusalem. For the times were dark and troublous. According to recent interpretations of newly-discovered inscriptions, it would appear that Darius I. found it no easy task to hold his vast dominions. Province after province had revolted both in the east and in the north, whither, according to the prophet (vi. 8), the winds had carried the wrath of God; and if the reading Mudraja, *i. e.* Egypt, is correct (Lassen gives Kurdistan), Egypt must have revolted before the outbreak mentioned in Herod. vii. 1, and have again been reduced to subjection. To such revolt there may possibly be an allusion in the reference to "the land of the south" (vi. 6).

It would seem that Zechariah anticipated, as a consequence of these perpetual insurrections, the weakening and overthrow of the Persian monarchy and the setting up of the kingdom of God, for which Judah in faith and obedience was to wait.[b]

Immediately on these visions there follows a symbolical act. Three Israelites had just returned from Babylon, bringing with them rich gifts to Jerusalem, apparently as contributions to the Temple, and had been received in the house of Josiah the son of Zephaniah. Thither the prophet is commanded to go, — whether still in a dream or not, is not very clear, — and to employ the silver and the gold of their offerings for the service of Jehovah. He is to make of them two crowns, and to place these on the head of Joshua the high-priest, — a sign that in the Messiah who should build the Temple, the kingly and priestly offices should be united. This, however, is expressed somewhat enigmatically, as if king and priest should be perfectly at one, rather than that the same person should be both king and priest. These crowns moreover, were to be a memorial in honor of those by whose liberality they had been made, and should serve at the same time to excite other rich Jews still living in Babylon to the like liberality. Hence their symbolical purpose having been accomplished, they were to be laid up in the Temple.

3. From this time, for a space of nearly two years, the prophet's voice was silent, or his words have not been recorded. But in the fourth year of King Darius, in the fourth day of the ninth month, there came a deputation of Jews to the Temple, anxious to know whether the fast-days which had been instituted during the seventy

[a] So Ewald. *Die Propheten*, ii. 525.

Digitized by Google

years' captivity were still to be observed. On the one hand, now that the Captivity was at an end, and Jerusalem was rising from her ashes, such set times of mourning seemed quite out of place. On the other hand, there was still much ground for serious uneasiness; for some time after their return they had suffered severely from drought and famine (Hag. i. 6–11), and who could tell that they would not so suffer again? the hostility of their neighbors had not ceased; they were still regarded with no common jealousy; and large numbers of their brethren had not yet returned from Babylon. It was a question therefore, that seemed to admit of much debate.

It is remarkable, as has been already noticed, that this question should have been addressed to priests and prophets conjointly in the Temple. This close alliance between two classes hitherto so separate, and often so antagonistic, was one of the most hopeful circumstances of the times. Still Zechariah, as chief of the prophets, has the decision of this question. Some of the priests, it is evident (vii. 7), were inclined to the more gloomy view; but not so the prophet. In language worthy of his position and his office, language which reminds us of one of the most striking passages of his great predecessor (Is. lviii. 5–7), he lays down the same principle that God loves mercy rather than fasting, and truth and righteousness rather than sackcloth and a sad countenance. If they had perished, he reminds them it was because their hearts were hard while they fasted; if they would dwell safely, they must abstain from fraud and violence and not from food (vii. 4–14).

Again he foretells, but now in vision, the glorious times that are near at hand when Jehovah shall dwell in the midst of them, and Jerusalem be called a city of truth. He sees her streets thronged by old and young, her exiles returning, her Temple standing in all its beauty, her land rich in fruitfulness, her people a praise and a blessing in the earth (viii. 1–15). Again, he declares that "truth and peace" (vv. 16, 19) are the bulwarks of national prosperity. And once more reverting to the question which had been raised concerning the observance of the fasts, he announces, in obedience to the command of Jehovah, not only that the fasts are abolished, but that the days of mourning shall henceforth be days of joy, the fasts be counted for festivals. His prophecy concludes with a prediction that Jerusalem shall be the centre of religious worship to all nations of the earth (viii. 16–23).

II. The remainder of the book consists of two sections of about equal length, ix.–xi. and xii.–xiv., each of which has an inscription. They have the general prophetic tone and character, and in subject they so far harmonize with i.–viii., that the prophet seeks to comfort Judah in a season of depression with the hope of a brighter future.

1. In the first section he threatens Damascus and the sea-coast of Palestine with misfortune; but declares that Jerusalem shall be protected, for Jehovah himself shall encamp about her (where ix. 8 reminds us of ii. 5); her king shall come to her, he shall speak peace to the heathen, so that all weapons of war shall perish, and his dominion shall be to the ends of the earth. The Jews who are still in captivity shall return to their land; they shall be mightier than Javan (or Greece); and Ephraim and Judah once more united shall vanquish all enemies. The land too shall be fruitful as of old (compare vii. 12). The Teraphim and the false prophets may indeed have spoken lies, but upon these will the Lord execute judgment, and then He will look with favor upon his people and bring back both Judah and Ephraim from their captivity. The possession of Gilead and Lebanon is again promised, as the special portion of Ephraim, and both Egypt and Assyria shall be broken and humbled.

The prophecy now takes a sudden turn. An enemy is seen approaching from the north, who having forced the narrow passes of Lebanon, the great bulwark of the northern frontier, carries desolation into the country beyond. Hereupon the prophet receives a commission from God to feed his flock, which God himself will no more feed because of their divisions. The prophet undertakes the office, and makes to himself two staves (naming the one Beauty, and the other Union), in order to tend the flock, and cuts off several evil shepherds whom his soul abhors; but observes at the same time that the flock will not be obedient. Hence he throws up his office; he breaks asunder the one crook in token that the covenant of God with Israel was dissolved. A few, the poor of the flock, acknowledge God's hand herein; and the prophet demanding the wages of his service, receives thirty pieces of silver, and casts it into the house of Jehovah. At the same time he sees that there is no hope of union between Judah and Israel whom he had trusted to feed as one flock, and therefore cuts in pieces the other crook, in token that the brotherhood between them is dissolved.

2. The second section, xii.–xiv., is entitled, "The burden of the word of Jehovah for Israel." But *Israel* is here used of the nation at large, not of Israel as distinct from Judah. Indeed, the prophecy which follows, concerns Judah and Jerusalem. In this the prophet beholds the near approach of troublous times, when Jerusalem should be hard pressed by enemies. But in that day Jehovah shall come to save them: "the house of David be as God, as the angel of Jehovah" (xii. 8) and all the nations which gather themselves against Jerusalem shall be destroyed. At the same time the deliverance shall not be from outward enemies alone. God will pour out upon them a spirit of grace and supplications, so that they shall bewail their sinfulness with a mourning greater than that with which they bewailed the beloved Josiah in the valley of Megiddon. So deep and so true shall be this repentance, so lively the aversion to all evil, that neither idol nor false prophet shall again be seen in the land. If a man shall pretend to prophesy, "his father and his mother that begat him shall thrust him through when he prophesieth," fired by the same righteous indignation as Phinehas was when he slew those who wrought folly in Israel (xii. 1–xiii. 6).

Then follows a short apostrophe to the sword of the enemy to turn against the shepherds of the people; and a further announcement of searching and purifying judgments; which, however, it must be acknowledged, is somewhat abrupt. Ewald's suggestion that the passage xiii. 7–9, is here out of place, and should be transposed to the end of chap. xi. is certainly ingenious, and does not seem improbable.

The prophecy closes with a grand and stirring picture. All nations are gathered together against Jerusalem; and seem already sure of their prey. Half of their cruel work has been accomplished when Jehovah himself appears on behalf of his

Digitized by Google

people. At his coming all nature is moved: the Mount of Olives on which his feet rest cleaves asunder; a mighty earthquake heaves the ground, and even the natural succession of day and night is broken. He goes forth to war against the adversaries of his people. He establishes his kingdom over all the earth. Jerusalem is safely inhabited, and rich with the spoils of the nations. All nations that are still left shall come up to Jerusalem, as the great centre of religious worship, there to worship "the King, Jehovah of hosts," and the city from that day forward shall be a holy city.

Such is, briefly, an outline of the second portion of that book which is commonly known as the Prophecy of Zechariah. It is impossible, even on a cursory view of the two portions of the prophecy, not to feel how different the section xi.–xiv. is from the section i.–viii. The next point, then, for our consideration is this, — Is the book in its present form the work of one and the same prophet, Zechariah the son of Iddo, who lived after the Babylonish exile?

*Integrity.* — Mede was the first to call this in question. The probability that the later chapters from the ixth to the xivth were by some other prophet, seems first to have been suggested to him by the citation in St. Matthew. He says (Epist. xxxi.), "It may seem the Evangelist would inform us that those latter chapters ascribed to Zachary (namely, ixth, xth, xiith, etc.), are indeed the prophecies of Jeremy; and that the Jews had not rightly attributed them." Starting from this point, he goes on to give reasons for supposing a different author. "Certainly, if a man weighs the contents of some of them, they should in likelihood be of an elder date than the time of Zachary; namely, before the Captivity: for the subjects of some of them were scarce in being after that time. And the chapter out of which St. Matthew quotes may seem to have somewhat much unsuitable with Zachary's time; as, a prophecy of the destruction of the Temple, then when he was to encourage them to build it. And how doth the sixth verse of that chapter suit with his time? There is no scripture saith they are Zachary's; but there is scripture saith they are Jeremy's, as this of the Evangelist." He then observes that the mere fact of these being found in the same book as the prophecies of Zechariah does not prove that they were his; difference of authorship being allowable in the same way as in the collection of Agur's Proverbs under one title with those of Solomon, and of Psalms by other authors with those of David. Even the absence of fresh title is, he argues, no evidence against a change of author. "The Jews wrote in rolls or volumes, and the title was but once. If aught were added to the roll, *ob similitudinem argumenti*, or for some other reason, it had a new title, as that of Agur; or perhaps none, but was ἀνώνυμον." The utter disregard of anything like chronological order in the prophecies of Jeremiah, where "sometimes all is ended with Zedekiah; then we are brought back to Jehoiakim, then to Zedekiah again" — makes it probable, he thinks, that they were only hastily and loosely put together in those distracted times. Consequently some of them might not have been discovered till after the return from the Captivity, when they were approved by Zechariah, and so came to be incorporated with his prophecies. Mede evidently rests his opinion, partly on the authority of St. Matthew, and partly on the contents of the later chapters, which he considers require a date earlier than the exile. He says again (Epist. lxi.): "That which moveth me more than the rest is in chap. xii., which contains a prophecy of the destruction of Jerusalem, and a description of the wickedness of the inhabitants, for which God would give them to the sword, and have no more pity on them. It is expounded of the destruction by Titus; but methinks such a prophecy was nothing seasonable for Zachary's time (when the city yet, for a great part, lay in her ruins, and the Temple had not yet recovered hers), nor agreeable to the scope of Zachary's commission, who, together with his colleague Haggai, was sent to encourage the people lately returned from captivity to build their temple, and to instaurate their commonwealth. Was this a fit time to foretell the destruction of both, while they were but yet a building? and by Zachary, too, who was to encourage them? would not this better befit the desolation by Nebuchadnezzar?"

Archbishop Newcome went further. He insisted on the great dissimilarity of style as well as subject between the earlier and later chapters. And he was the first who advocated the theory which Bunsen calls one of the triumphs of modern criticism, that the last six chapters of Zechariah are the work of two distinct prophets. His words are: "The eight first chapters appear by the introductory parts to be the prophecies of Zechariah, stand in connection with each other, are pertinent to the time when they were delivered, are uniform in style and manner, and constitute a regular whole. But the six last chapters are not expressly assigned to Zechariah; are unconnected with those which precede: the three first of them are unsuitable in many parts to the time whom Zechariah lived; all of them have a more adorned and poetical turn of composition than the eight first chapters; and they manifestly break the unity of the prophetical book."

"I conclude," he continues, "from internal marks in chaps. ix., x., xi., that these three chapters were written much earlier than the time of Jeremiah and before the captivity of the tribes. Israel is mentioned chaps. ix. 1, xi. 14. (But that this argument is inconclusive, see Mal. ii. 11.) Ephraim, chaps. ix. 10, 13, x. 7; and Assyria, chap. x. 10, 11. . . . . They seem to suit Hosea's age and manner. . . . . The xiith, xiiith, and xivth chapters form a distinct prophecy, and were written after the death of Josiah; but whether before or after the Captivity, and by what prophets, is uncertain. Though I incline to think that the author lived before the destruction of Jerusalem by the Babylonians." In proof of this he refers to xiii. 2, on which he observes that the "prediction that idols and false prophets should cease at the final restoration of the Jews seems to have been uttered when idolatry and groundless pretensions to the spirit of prophecy were common among the Jews, and therefore before the Babylonish Captivity."

A large number of critics have followed Mede and Archbishop Newcome in denying the later date of the last six chapters of the book. In England, Bishop Kidder, Whiston, Hammond, and more recently Pye Smith, and Davidson; in Germany, Flügge, Eichhorn, Bauer, Bertholdt, Augusti, Forberg, Rosenmüller, Gramberg, Credner, Ewald, Maurer, Knobel, Hitzig, and Bleek, are agreed in maintaining that these later chapters are not the work of Zechariah the son of Iddo.

On the other hand, the later date of these chapters has been maintained among ourselves by Blay

Digitized by Google

ney and Henderson, and on the continent by Carpzov, Beckhaus, Jahn, Köster, Hengstenberg, Hävernick, Keil, De Wette (in later editions of his *Einleitung*; in the first three he adopted a different view), and Stäbelin.

Those who impugn the later date of these chapters of Zechariah rest their arguments on the change in style and subject after the viiith chapter, but differ much in the application of their criticism. Rosenmüller, for instance (*Schol. in Proph. Min.* vol. iv. p. 257), argues that chaps. ix.–xiv. are so alike in style, that they must have been written by one author. He alleges in proof his fondness for images taken from pastoral life (ix. 16, x. 2, 3, xi. 3, 4, 5, 7, 8, 9, 11, 15, 17, xiii. 7, 8). From the allusion to the earthquake (xiv. 5, comp. Am. i. 1) he thinks the author must have lived in the reign of Uzziah.

Davidson (in Horne's *Introd.* ii. 982) in like manner declares for one author, but supposes him to have been the Zechariah mentioned Is. viii. 2, who lived in the reign of Ahaz.

Eichhorn, on the other hand, whilst also assigning (in his *Einleitung*, iv. 444) the whole of chaps. ix.–xiv. to one writer, is of opinion that they are the work of a *later* prophet who flourished in the time of Alexander.

Others again, as Bertholdt, Gesenius, Knobel, Maurer, Bunsen, and Ewald, think that chaps. ix.–xi. (to which Ewald adds xiii. 7–9) are a distinct prophecy from chaps. xii.–xiv., and separated from them by a considerable interval of time. These critics conclude from internal evidence, that the former portion was written by a prophet who lived in the reign of Ahaz (Knobel gives ix., x. to the reign of Jotham, and xi. to that of Ahaz), and most of them conjecture that he was the Zechariah the son of Jeberechiah (or Berechiah), mentioned Is. viii. 2.

Ewald, without attempting to identify the prophet with any particular person, contents himself with remarking that he was a subject of the Southern kingdom (as may be inferred from expressions such as that in ix. 7, and from the Messianic hopes which he utters, and in which he resembles his countryman and contemporary Isaiah); and that like Amos and Hosea before him, though a native of Judah, he directs his prophecies against Ephraim.

There is the same general agreement among the last-named critics as to the date of the section xii.–xiv.

They all assign it to a period immediately previous to the Babylonish Captivity, and hence the author must have been contemporary with the prophet Jeremiah. Bunsen identifies him with Urijah the son of Shemaiah of Kirjath-jearim (Jer. xxvi. 20–23, who prophesied "in the name of Jehovah" against Judah and Jerusalem.

According to this hypothesis we have the works of three different prophets collected into one book, and passing under one name: —

1. Chapters ix.–xi., the book of Zechariah I., contemporary of Isaiah, under Ahaz, about 736.

2. Chapters xii.–xiv., author unknown, or perhaps Urijah, a contemporary of Jeremiah, about 607 or 606.

3. Chapters i.–viii. the work of the son (or grandson) of Iddo, Haggai's contemporary, about 520–518.

We have then two distinct theories before us. The one merely affirms that the six last chapters of our present book are not from the same author as the first eight. The other carries the dismemberment of the book still further, and maintains that the six last chapters are the work of two distinct authors who lived at two distinct periods of Jewish history. The arguments advanced by the supporters of each theory rest on the same grounds. They are drawn partly from the difference in style, and partly from the difference in the nature of the contents, the historical references, etc., in the different sections of the book; but the one sees this difference only in ix.–xiv., as compared with i.–viii.; the other sees it also in xii.–xiv., as compared with ix.–xi. We must accordingly consider, —

1. The difference generally in the style and contents of chapters ix.–xiv., as compared with chapters i.–viii.

2. The differences between xii.–xiv., as compared with ix.–xi.

1. The difference in point of style between the latter and former portions of the prophecy is admitted by all critics. Rosenmüller characterizes that of the first eight chapters as "prosaic, feeble, poor," and that of the remaining six as "poetic, weighty, concise, glowing." But without admitting so sweeping a criticism, and one which the verdict of abler critics on the former portion has contradicted, there can be no doubt that the general tone and character of the one section is in decided contrast with that of the other. "As he passes from the first half of the prophet to the second," says Eichhorn, "no reader can fail to perceive how strikingly different are the impressions which are made upon him by the two. The manner of writing in the second portion is far loftier and more mysterious; the images employed grander and more magnificent; the point of view and the horizon are changed. Once the Temple and the ordinances of religion formed the central point from which the prophet's words radiated, and to which they ever returned; now these have vanished. The favorite modes of expression, hitherto so often repeated, are now as it were forgotten. The chronological notices which before marked the day on which each several prophecy was uttered, now fail us altogether. Could a writer all at once have forgotten so entirely his habits of thought? Could he so completely disguise his innermost feelings? Could the world about him, the mode of expression, the images employed, be so totally different in the case of one and the same writer?" (*Einl.* iv. 443, § 605).

I. Chapters i.–viii. are marked by certain peculiarities of idiom and phraseology which do not occur afterwards. Favorite expressions are — "The word of Jehovah came unto," etc. (i. 7, iv. 8, vi. 9, vii. 1, 4, 8, viii. 1, 18); "Thus saith Jehovah God of hosts" (i. 4, 16, 17, ii. 11, viii. 2, 4, 6, 7, 9, 14, 18, 20, 23); "And I lifted up mine eyes and saw" (i. 18, ii. 1, v. 1, vi. 1): none of these modes of expression are to be met with in chapters ix.–xiv. On the other hand, the phrase "In that day" is entirely confined to the later chapters, in which it occurs frequently. The form of the inscriptions is different. Introductions to the separate oracles, such as those in ix. 1, xii. 1, do not present themselves in the earlier portion. Zechariah, in several instances, states the time at which a particular prophecy was uttered by him (i. 1, 7, vii. 1). He mentions his own name in three passages, and also in vii. 8, and the names of contem-

Digitized by Google

poraries in iii. 1, iv. 6, vi. 10, vii. 2: the writer (or writers) of the second portion of the book never does this. It has also been observed that after the first eight chapters we hear nothing of "Satan," or of "the seven eyes of Jehovah;" that there are no more visions; that chap. xi. contains an allegory, not a symbolic action; that here are no riddles which need to be solved, no *angelus interpres* to solve them.

II. Chapters ix.–xi. These chapters, it is alleged, have also their characteristic peculiarities: —

(1.) In point of style, the author resembles Hosea more than any other prophet: such is the verdict both of Knobel and Ewald. He delights to picture Jehovah as the Great Captain of his people. Jehovah comes to Zion, and pitches his camp there to protect her (ix. 8, 9). He blows the trumpet, marches against his enemies, makes his people his bow, and shoots his arrows (ix. 13, 14); or He rides on Judah as his war-horse, and goes forth thereon to victory (x. 3, 5). Again, he speaks of the people as a flock, and the leaders of the people as their shepherds (ix. 16, x. 2, 3, xi. 4 ff.). He describes himself also, in his character of prophet, as a shepherd in the last passages, and assumes to himself, in a symbolic action, which however may have been one only of the imagination, all the guise and the gear of a shepherd. In general he delights in images (ix. 3, 4, 13–17, x. 3, 5, 7, &c.), some of which are striking and forcible.

(2.) The notes of time are also peculiar: —

1. It was a time when the pride of Assyria was yet at its height (x., xi.), and when the Jews had already suffered from it. This first took place in the time of Menahem (B. C. 772–761).

2. The Trans-jordanic territory had already been swept by the armies of the invader (x. 10), but a still further desolation threatened it (xi. 1–3). The first may have been the invasion of Pul (1 Chr. v. 26), the second that of Tiglath-Pileser.[a]

3. The kingdoms of Judah and Ephraim are both standing (ix. 10, 13, x. 6), but many Israelites are nevertheless exiles in Egypt and Assyria (ix. 11, x. 6, 8, 10, &c.).

4. The struggle between Judah and Israel is supposed to be already begun (xi. 14). At the same time Damascus is threatened (ix. 1). If so, the reference must be to the alliance formed between Pekah king of Israel and Rezin of Damascus, the consequence of which was the loss of Elath (739).

5. Egypt and Assyria are *both* formidable powers (x. 9, 10, 11). The only other prophets to whom these two nations appear as formidable, *at the same time*, are Hosea (vii. 11, xii. 1, xiv. 3) and his contemporary Isaiah (vii. 17, &c.); and that in prophecies which must have been uttered between 743 and 740. The expectation seems to have been that the Assyrians, in order to attack Egypt, would march by way of Syria, Phœnicia, and Philistia, along the coast (Zech. ix. 1–9), as they did afterwards (Is. xx. 1), and that the kingdom of Israel would suffer chiefly in consequence (Zech. ix. 9-12), and Judah in a smaller degree (ix. 8, 9).

6. The kingdom of Israel is described as "a flock for the slaughter" in chap. xi., over which three shepherds have been set in one month. This corresponds with the season of anarchy and confusion which followed immediately on the murder of Zechariah the son of Jeroboam II. (760). This son reigned only six months, his murderer Shallum but one (2 K. xv. 8–15), being put to death in his turn by Menahem. Meanwhile another rival king may have arisen, Bunsen thinks, in some other part of the country, who may have fallen as the murderer did, before Menahem.

The symbolical action of the breaking of the two shepherds' staves — Favor and Union — points the same way. The breaking of the first showed that God's favor had departed from Israel, that of the second that all hope of union between Judah and Ephraim was at an end.

All these notes of time point in the same direction, and make it probable that the author of chaps. ix.–xi. was a contemporary of Isaiah, and prophesied during the reign of Ahaz.[b]

2. Chaps. xii.–xiv. — By the majority of those critics who assign these chapters to a third author, that author is supposed to have lived shortly before the Babylonish Captivity. The grounds for separating these three chapters from chapters ix.–xi. are as follows: —

1. This section opens with its own introductory formula, as the preceding one (ix. 1) does. This, however, only shows that the sections are distinct, not that they were written at different times.

2. The object of the two sections is altogether different. The author of the former (ix.–xi.) has both Israel and Judah before him; he often speaks of them together (ix. 13, x. 6, xi. 14, comp. x. 7); he directs his prophecy to the Trans-jordanic territory, and announces the discharge of his office in Israel (xi. 4 ff.). The author of the second section, on the other hand, has only to do with Judah and Jerusalem: he nowhere mentions Israel.

3. The political horizon of the two prophets is different. By the former, mention is made of the Syrians, Phœnicians, Philistines (ix. 1–7), and Greeks (ix. 13), as well as of the Assyrians and Egyptians, the two last being described as at that time the most powerful. It therefore belongs to the earlier time when these two nations were beginning to struggle for supremacy in Western Asia. By the latter, the Egyptians only are mentioned as a hostile nation: not a word is said of the Assyrians. The author consequently must have lived at a time when Egypt was the chief enemy of Judah.

4. The anticipations of the two prophets are different. The first trembles only for Ephraim. He predicts the desolation of the Trans-jordanic territory, the carrying away captive of the Israelites, but also the return from Assyria and Egypt

[a] So Knobel supposes. Ewald also refers, xi. 1–3, to the deportation of Tiglath-Pileser, and thinks that x. 10 refers to some earlier deportation, the Assyrians having invaded this portion of the kingdom of Israel in the former half of Pekah's reign of twenty years. To this Bunsen (*Gott in der Gesch.* i. 470) objects that we have no record of any earlier removal of the inhabitants from the land than that of Tiglath-Pileser, which occurred at the close of Pekah's reign, and which in x. 10 is supposed to have taken place already.

[b] According to Knobel, ix. and x. were probably delivered in Jotham's reign, and xi. in that of Ahaz who summoned Tiglath-Pileser to his aid. Maurer thinks that ix. and x. were written between the first (2 K. xv. 29) and second (2 K. xvii. 4–6) Assyrian invasions, chap. x. during the seven years' interregnum which followed the death of Pekah, and xi. in the reign of Hoshea.

Digitized by Google

(x. 7, 10). But for Judah he has no cause of fear. Jehovah will protect her (ix. 8), and bring back those of her sons who in earlier times had gone into captivity (ix. 11). The second prophet, on the other hand, making no mention whatever of the northern kingdom, is full of alarm for Judah. He sees hostile nations gathering together against her, and two thirds of her inhabitants destroyed (xiii. 6); he sees the enemy laying siege to Jerusalem, taking and plundering it, and carrying half of her people captive (xii. 3, xiv. 2, 5). Of any return of the captives nothing is here said.

5. The style of the two prophets is different. The author of this last section is fond of the prophetic formulæ: וְהָיָה, "And it shall come to pass" (xii. 9, xiii. 2, 3, 4, 8, xiv. 6, 8, 13, 16); בַּיּוֹם הַהוּא, "in that day" (xii. 3, 4, 6, 8, 9, 11, xiii. 1, 2, 4, xiv. 8, 9, 13, 20, 21); נְאֻם יְהוָה, "saith Jehovah" (xii. 1, 4, xiii. 2, 7, 8). In the section ix.–xi. the first does not occur at all, the second but once (ix. 16), the third only twice (x. 12, xi. 6). We have moreover in this section certain favorite expressions: "all peoples," "all people of the earth," "all nations round about," "all nations that come up against Jerusalem," "the inhabitants of Jerusalem," "the house of David," "family" for nation, "the families of the earth," "the family of Egypt," etc.

6. There are apparently few notes of time in this section. One is the allusion to the death of Josiah in "the mourning of Hadadrimmon in the valley of Megiddon;" another to the earthquake in the days of Uzziah *king of Judah*. This addition to the name of the king shows, Knobel suggests, that he had been long dead; but the argument, if it is worth anything, would make even more for those who hold a post-exile date. It is certainly remarkable occurring thus in the body of the prophecy, and not in the inscription as in Isaiah i. 1.

In reply to all these arguments, it has been urged by Keil, Stähelin, and others, that the difference of style between the two principal divisions of the prophecy is not greater than may reasonably be accounted for by the change of subject. The language in which visions are narrated would, from the nature of the case, be quieter and less animated than that in which prophetic anticipations of future glory are described. They differ as the style of the narrator differs from that of the orator. Thus, for instance, how different is the style of Hosea, chaps. i.–iii., from the style of the same prophet in chaps. iv.–xiv.; or again, that of Ezekiel vi., vii. from Ezekiel iv.

But besides this, even in what may be termed the more oratorical portions of the first eight chapters, the prophet is to a great extent occupied with warnings and exhortations of a practical kind (see i. 4–6, vii. 4–14, viii. 9–23); whereas in the subsequent chapters he is rapt into a far distant and glorious future. In the one case, therefore, the language would naturally sink down to the level of prose; in the other, it would rise to an elevation worthy of its exalted subject.

In like manner the notes of time in the former part (i. 1, 7, vii. 1), and the constant reference to the Temple, may be explained on the ground that the prophet here busies himself with the events of his own time, whereas afterwards his eye is fixed on a far distant future.

On the other hand, where predictions do occur in the first section, there is a general similarity between them and the predictions of the second. The scene, so to speak, is the same; the same visions float before the eyes of the seer. The times of the Messiah are the theme of the predictions in chaps. i.–iv., in ix., x., and in xii.–xiii. 6, whilst the events which are to prepare the way for that time, and especially the sifting of the nation, are dwelt upon in chap. v., in xi., and in xiii. 7–xiv. 2.

(3.) The same peculiar forms of expression occur in the two divisions of the prophecy. Thus, for instance, we find מָעוֹבֵר וּמָשׁוֹב not only in vii. 14, but also in ix.[a] 8; וְלֹא יַעֲבִיר, in the sense of "to remove," in iii. 4, and in xiii. 2 — elsewhere it occurs in this unusual sense only in later writings (2 K. xvi. 3; 2 Chr. xv. 8) — "the eye of God," as betokening the Divine Providence, in iii. 9, iv. 10, and in ix. 1, 8.

In both sections the return of the whole nation after the exile is the prevailing image of happiness, and in both it is similarly portrayed. As in ii. 10, the exiles are summoned to return to their native land, because now, according to the principles of righteous recompense, they shall rule over their enemies, so also a similar strain occurs in ix. 12, &c. Both in ii. 10 and in ix. 9 the renewed protection wherewith God will favor Zion is represented as an entrance into his holy dwelling: in both his people are called on to rejoice, and in both there is a remarkable agreement in the words. In ii. 14, רִנִּי וְשִׂמְחִי בַּת צִיּוֹן כִּי הִנְנִי בָא, and in ix. 9, גִּילִי מְאֹד בַּת צִיּוֹן הָרִיעִי בַת יְרוּשָׁלִַם הִנֵּה מַלְכֵךְ יָבוֹא לָךְ.

Again, similar forms of expression occur in ii. 9, 11, and xi. 11; the description of the increase in Jerusalem, xiv. 10, may be compared with ii. 4; and the prediction in viii. 20–23 with that in xiv. 16. The resemblance which has been found in some other passages is too slight to strengthen the argument; and the occurrence of Chaldaisms, such as צָבָא (ix. 8), רָאַמְתִּי (xiv. 10), בהל (which occurs besides only in Prov. xx. 21), and the phrase מָלֵא יָשַׁת (ix. 13), instead of דָּרַךְ קָשֶׁת, really prove nothing as to the age of the later chapters of Zechariah. Indeed, generally, as regards these minute comparisons of different passages to prove an identity of authorship, Maurer's remark holds true: "Sed quæ potest vis esse disjectorum quorundam locorum, ubi res judicanda est ex toto?"

Of far more weight, however, than the arguments already advanced is the fact that the writer of these last chapters (ix.–xiv.) shows an acquaintance with the later prophets of the time of the exile. That there are numerous allusions in it to

[a] Maurer's reply to this, namely, that the like phrase, עָבְרִי וָשׁוּבִי, occurs in Ex. xxxii. 27, and עֹבֵר וָשָׁב in Ps. xxxv. 7, it must be confessed is of little force, because those who argue for one author build not only on the fact that the same forms of expression are to be found in both sections of the prophecy, but that the second section, like the first, evinces a familiarity with other writings, and especially with later prophets like Ezekiel. See below.

Digitized by Google

earlier prophets, such as Joel, Amos, Micah, has been shown by Hitzig (*Comment.* p. 354, 2d ed.), but there are also, it is alleged allusions to Zephaniah, Jeremiah, Ezekiel, and the later Isaiah (cc. xl.–lxvi). If this can be established, it is evidence that this portion of the book, if not written by Zechariah himself, was at least written after the exile. We find, then, in Zech. ix. 2 an allusion to Ez. xxviii. 3; in ix. 3 to 1 K. x. 27; in ix. 5 to Zeph. ii. 4; in ix. 11 to Is. li. 14; in ix. 12 to Is. xlix. 9 and Is. lxi. 7; in x. 3 to Ez. xxxiv. 17. Zech. xi. is derived from Ez. xxxiv. (comp. esp. xi. 4 with xxxiv. 4), and Zech. xi. 3 from Jer. xii. 5. Zech. xii. 1 alludes to Is. li. 13; xiii. 8, 9, to Ez. v. 12; xiv. 8 to Ez. xlvii. 1–12; xiv. 10, 11, to Jer. xxxi. 38–40; xiv. 16–19 to Is. lxvi. 23 and lx. 12; xiv. 20, 21, to Ez. xliii. 12 and xliv. 9.

This manifest acquaintance on the part of the writer of Zech. ix.–xiv. with so many of the later prophets seemed so convincing to De Wette that, after having in the first three editions of his *Introduction* declared for two authors, he found himself compelled to change his mind, and to admit that the later chapters must belong to the age of Zechariah, and might have been written by Zechariah himself.

Bleek, on the other hand, has done his best to weaken the force of this argument, first by maintaining that in most instances the alleged agreement is only apparent, and next, that where there is a real agreement (as in Zech. ix. 12, xi. 3, xii. 1, xiv. 16) with the passages above cited, Zechariah may be the original from whom Isaiah and Jeremiah borrowed. It must be confessed, however, that it is more *probable* that one writer should have allusions to many others, than that many others should borrow from one; and this probability approaches certainty in proportion as we multiply the number of quotations or allusions. If there are passages in Zechariah which are manifestly similar to other passages in Zephaniah, in Jeremiah, Ezekiel, and the Deutero-Isaiah, which is the more probable, that they all borrowed from him, or he from them? In ix. 12 especially, as Stähelin argues, the expression is decidedly one to be looked for after the exile rather than before it, and the passage rests upon Jer. xvi. 18, and has an almost verbal accordance with Is. lxi. 7.

Again, the same critics argue that the *historical references* in the later chapters are perfectly consistent with a post-exile date. This had been already maintained by Eichhorn, although he supposes these chapters to have been written by a *later* prophet than Zechariah. Stähelin puts the case as follows: Even under the Persian rule the political relations of the Jews continued very nearly the same as they were in earlier times. They still were placed between a huge eastern power on the one side and Egypt on the other, the only difference now being that Egypt as well as Judæa was subject to the Persians. But Egypt was an unwilling vassal, and as in earlier times when threatened by Assyria she had sought for alliances among her neighbors or had endeavored to turn them to account as a kind of outwork in her own defenses, so now she would adopt the same policy in her attempts to cast off the Persian yoke. It would follow as a matter of course that Persia would be on the watch to check such efforts, and would wreak her vengeance on those among her own tributary or dependent provinces which should venture to form an alliance with Egypt. Such of these provinces as lay on the sea-coast must indeed suffer in any case, even if they remained true in their allegiance to the Persians. The armies which were destined for the invasion of Egypt would collect in Syria and Phœnicia, and would march by way of the coast; and, whether they came as friends or as foes, they would probably cause sufficient devastation to justify the prophecy in Zech. ix. 1, &c., delivered against Damascus, Phœnicia, and Philistia. Meanwhile the prophet seeks to calm the minds of his own people by assuring them of God's protection, and of the coming of the Messiah, who at the appointed time shall again unite the two kingdoms of Judah and Ephraim. It is observable moreover that the prophet, throughout his discourses, is anxious not only to tranquillize the minds of his countrymen, but to prevent their engaging in any insurrection against their Persian masters, or forming any alliance with their enemies. In this respect he follows the example of Jeremiah and Ezekiel, and, like these two prophets, he foretells the return of Ephraim, the union of Ephraim and Judah, and the final overthrow both of Assyria (x. 11), that is, Persia,[a] and of Egypt, the two countries which had, more than all others, vexed and devastated Israel. That a large portion of the nation was still supposed to be in exile is clear from ix. 11, 12, and hence verse 10 can only be regarded as a reminiscence of Mic. v. 10; and even if x. 9 must be explained of the past (with De Wette, *Einl.* § 250, 6, note *a*), still it appears from Josephus (*Ant.* xii. 2, § 5) that the Persians carried away Jews into Egypt, and from Syncellus (p. 486, Niebuhr's ed.), that Ochus transplanted large numbers of Jews from Palestine to the east and north; the earlier custom of thus forcibly removing to a distance those conquered nations who from disaffection or a turbulent spirit were likely to give occasion for alarm, having not only continued among the Persians, but having become even more common than ever (Heeren, *Ideen*, i. 254, 2d ed.). This well-known policy on the part of their conquerors would be a sufficient ground for the assurance which the prophet gives in x. 9. Even the threats uttered against the false prophets and the shepherds of the people are not inconsistent with the times after the exile. In Neh. v. and vi. we find the nobles and rulers of the people oppressing their brethren, and false prophets active in their opposition to Nehemiah. In like manner "the idols" (עֲצַבִּים) in xiii. 1–5 may be the same as the "Teraphim" of x. 2, where they are mentioned in connection with "the diviners" (קֹסְמִים), Malachi (iii. 5) speaks of "sorcerers" (מְכַשְּׁפִים), and that such superstition long held its ground among the Jews is evident from Joseph. *Ant.* viii. 2, § 5. Nor does xiv. 21 of necessity imply either idol-worship or heathen pollution in the Temple. Chapter xi. was spoken by the prophet later than ix. and x. In ver. 14 he declares the impossibility of any reunion between Judah and Ephraim, either because the northern territory had already been laid waste, or because the inhabitants of it had shown a disposition to league with Phœnicia in a

[a] Although the Persians had succeeded to the Assyrians, the land might still be called by its ancient name of Assyria. See Ewr. vi. 22 and Ewald, *Gesch* iv 120.

vain effort to throw off the Persian yoke, which would only involve them in certain destruction. This difficult passage Stähelin admits he cannot solve to his satisfaction, but contends that it may have been designed to teach the new colony that it was not a part of God's purpose to reunite the severed tribes; and in this he sees an argument for the post-exile date of the prophecy, inasmuch as the union of the ten tribes with the two was ever one of the brightest hopes of the prophets who lived before the Captivity.

Having thus shown that there is no reason why the sections ix.–xi. should not belong to a time subsequent to the return from Babylon, Stähelin proceeds to argue that the prophecy directed against the nations (ix. 1–7) is really more applicable to the Persian era than to any other. It is only the coast-line which is here threatened; whereas the earlier prophets, whenever they threaten the maritime tribes, unite with them Moab and Ammon, or Edom. Moreover the nations here mentioned are not spoken of as enemies of Judah; for being Persian subjects they would not venture to attack the Jewish colony when under the special protection of that power. Of Ashdod it is said that a foreigner (מַמְזֵר, A. V. "bastard") shall dwell in it. This, too, might naturally have happened in the time of Zechariah. During the exile, Arabs had established themselves in Southern Palestine, and the prophet foresees that they would occupy Ashdod; and accordingly we learn from Neh. xiii. 24 that the dialect of Ashdod was unintelligible to the Jews, and in Neh. iv. 7 the people of Ashdod appear as a distinct tribe united with other Arabians against Judah. The king of Gaza (mentioned Zech. ix. 5) may have been a Persian vassal, as the kings of Tyre and Sidon were, according to Herod. viii. 67. A king in Gaza would only be in conformity with the Persian custom (see Herod. iii. 15), although this was no longer the case in the time of Alexander. The mention of the "sons of Javan" (ix. 13; A. V. "Greece") is suitable to the Persian period (which is also the view of Eichhorn), as it was then that the Jews were first brought into any close contact with the Greeks. It was in fact the fierce struggle between Greece and Persia which gave a peculiar meaning to his words when the prophet promised his own people victory over the Greeks, and so reversed the earlier prediction of Joel iv. 6, 7 (A. V. iii. 6, 7). If, however, we are to understand by Javan Arabia, as some maintain, this again equally suits the period supposed, and the prophecy will refer to the Arabians, of whom we have already spoken.

We come now to the section xii.–xiv. The main proposition here is, that however hard Judah and Jerusalem may be pressed by enemies (of Israel there is no further mention), still with God's help they shall be victorious; and the result shall be that Jehovah shall be more truly worshipped both by Jews and Gentiles. That this anticipation of the gathering of hostile armies against Jerusalem was not unnatural in the Persian times may be inferred from what has been said above. Persian hosts were often seen in Judæa. We find an instance of this in Josephus (*Ant.* xi. 7, § 1), and Sidon was laid in ashes in consequence of an insurrection against Persia (Diod. xvi. 45). On the other hand, how could a prophet in the time immediately preceding the exile — the time to which, on account of xii. 12, most critics refer this section — have uttered predictions such as these? Since the time of Zephaniah all the prophets looked upon the fate of Jerusalem as sealed, whereas here, in direct contradiction to such views, the preservation of the city is announced even in the extremest calamities. Any analogy to the general strain of thought in this section is only to be found in Is. xxix.–xxxiii. Besides, no king is here mentioned, but only "the house of David," which, according to Jewish tradition (Herzfeld, *Gesch. des Volkes Israel*, p. 378 ff.), held a high position after the exile, and accordingly is mentioned (xii. 12, 13) in its different branches (comp. Movers, *Das Phönix. Alterth.* i. 531), together with the tribe of Levi; the prophet, like the writer of Ps. lxxxix., looking to it with a kind of yearning, which before the exile, whilst there was still a king, would have been inconceivable. Again, the manner in which Egypt is alluded to (xiv. 19) almost of necessity leads us to the Persian times; for then Egypt, in consequence of her perpetual efforts to throw off the Persian yoke, was naturally brought into hostility with the Jews, who were under the protection of Persia. Before the exile this was only the case during the interval between the death of Josiah and the battle of Carchemish.

It would seem then that there is nothing to compel us to place this section xii.–xiv. in the times before the exile; much, on the contrary, which can only be satisfactorily accounted for on the supposition that it was written during the period of the Persian dominion. Nor must it be forgotten that we have here that fuller development of the Messianic idea which at such a time might be expected, and one which in fact rests upon all the prophets who flourished before the exile.

Such are the grounds, critical and historical, on which Stähelin rests his defense of the later date of the second portion of the prophet Zechariah. We have given his arguments at length as the ablest and most complete, as well as the most recent, on his side of the controversy. Some of them, it must be admitted, are full of weight. And when critics like Eichhorn maintain that of the whole section ix. 1–x. 17, no explanation is possible, unless we derive it from the history of Alexander the Great; and when De Wette, after having adopted the theory of different authors, felt himself obliged to abandon it for reasons already mentioned, and to vindicate the integrity of the book, the grounds for a post-exile date must be very strong. Indeed, it is not easy to say which way the weight of evidence preponderates.

With regard to the quotation in St. Matthew, there seems no good reason for setting aside the received reading. Jerome observes, "This passage is not found in Jeremiah. But in Zechariah, who is nearly the last of the twelve prophets, something like it occurs; and though there is no great difference in the meaning, yet both the order and the words are different. I read a short time since, in a Hebrew volume, which a Hebrew of the sect of the Nazarenes presented to me, an apocryphal book of Jeremiah, in which I found the passage word for word. But still I am rather inclined to think that the quotation is made from Zechariah, in the usual manner of the Evangelists and Apostles, who neglecting the order of the words, only give the general sense of what they cite from the Old Testament." [a]

[a] *Comment. in Evang. Matth.* cap. xxvii. 9, 10.

Eusebius (*Evangel. Demonstr.* lib. x.) is of opinion that the passage thus quoted stood originally in the prophecy of Jeremiah, but was either erased subsequently by the malice of the Jews [a very improbable supposition it need hardly be said]; or that the name of Zechariah was substituted for that of Jeremiah through the carelessness of copyists. Augustine (*de Cons. Evangel.* iii. 30) testifies that the most ancient Greek copies had *Jeremiah*, and thinks that the mistake was originally St. Matthew's, but that this was divinely ordered, and that the Evangelist would not correct the error even when pointed out, in order that we might thus infer that all the prophets spake by one Spirit, and that what was the work of one was the work of all (et singula esse omnium, et omnia singulorum). [a] Some later writers accounted for the non-appearance of the passage in Jeremiah by the confusion in the Greek MSS. of his prophecies — a confusion, however, it may be remarked, which is not confined to the Greek, but which is found no less in our present Hebrew text. Others again suggest that in the Greek autograph of Matthew, ΖΡΙΟΥ may have been written, and that copyists may have taken this for ΙΡΙΟΥ. But there is no evidence that abbreviations of this kind were in use so early. Epiphanius and some of the Greek Fathers seem to have read ἐν τοῖς προφήταις. And the most ancient copy of the Latin Version of the Gospels omits the name of Jeremiah, and has merely *dictum est per Prophetam*. It has been conjectured that this represents the original Greek reading τὸ ῥηθὲν διὰ τοῦ προφήτου, and that some early annotator wrote Ἱερεμίου on the margin, whence it crept into the text. The choice lies between this, and a slip of memory on the part of the Evangelist if we admit the integrity of our present book of Zechariah, unless, indeed, we suppose, with Eichhorn, who follows Jerome, that an apocryphal book of Jeremiah is quoted. Theophylact proposes ℵ insert a καί, and would read διὰ Ἱερεμίου καὶ τοῦ προφήτου ἡγοῦν Ζαχαρίου. He argues that the quotation is really a fusion of two passages: that concerning the price paid occurring in Zechariah, chap. xi.; and that concerning the field in Jeremiah, chap. xix. But what N. T. writer would have used such a form of expression "by Jeremy *and* the prophet"? Such a mode of quotation is without parallel. At the same time it must be borne in mind that the passage as given in St. Matthew does not represent exactly either the Hebrew text of Zechariah, or the version of the LXX. The other passages of the prophet quoted in the N. T. are ix. 9 (in Matt. xxi. 5; John xiii. 15); xii. 10 (in John. xix. 37; Rev. i. 7); xiii. 7 (in Matt. xxvi. 31; Mark xiv. 27); but in no instance is the prophet quoted by name. [b]

[a] This extraordinary method of solving the difficulty has been adopted by Dr. Wordsworth in his note on the passage in St. Matthew. He says: "On the whole there is reason to believe . . . that the prophecy which we read in Zech. (xi. 12, 13) had, *in the first instance*, been delivered by Jeremiah; and that by referring here not to Zech. where *we* read it, but to Jer. where we do *not* read it, the Holy Spirit teaches us *not* to regard the prophets as the *authors* of their prophecies," etc. And again: "He intends to teach, that *all* prophecies proceed from *One* Spirit, and that those by whom they were uttered are not sources, but only *channels* of the same Divine truth." But if so, why, it may be asked, do the writers of the Sacred Books ever give their names at all? Why trouble ourselves with the question whether St. Luke wrote the Acts, or whether St. Paul wrote the Ep. to the Hebrews or the Pastoral Epistles? What becomes of the argument, usually deemed so strong, derived from the testimony of the *Four* Evangelists, if, after all, the four are but *one*?

It would not be too much to say that such a theory is as pernicious as that against which it is directed.

2. (Ζαχαρίας; [in 1 Chr. xvi. 2, Vat. Ζαχαρίου:] *Zacharias.*) Son of Meshelemiah, or Shelemiah, a Korhite, and keeper of the north gate of the tabernacle of the congregation (1 Chr. ix. 21) in the arrangement of the porters in the reign of David. In 1 Chr. xxvi. 2, 14, his name appears in the lengthened form זְכַרְיָהוּ, and in the last quoted verse he is described as "one counselling with understanding."

3. (Ζαχχόβρ; [Vat. Sin. Ζαχαρια;] Alex. Ζαχχουρ.) One of the sons of Jehiel, the father or founder of Gibeon (1 Chr. ix. 37). In 1 Chr. viii. 31 he is called ZACHER.

4. (Ζαχαρίας.) A Levite in the Temple band as arranged by David, appointed to play "with psalteries on Alamoth" (1 Chr. xv. 20). He was of the second order of Levites (ver. 18), a porter or gatekeeper, and may possibly be the same as Zechariah the son of Meshelemiah. In 1 Chr. xv. 18 his name is written in the longer form, זְכַרְיָהוּ.

5. One of the princes of Judah in the reign of Jehoshaphat who were sent with priests and Levites to teach the people the law of Jehovah (2 Chr. xvii. 7).

6. (Ἀζαρίας.) Son of the high-priest Jehoiada, in the reign of Joash king of Judah (2 Chr. xxiv. 20), and therefore the king's cousin. After the death of Jehoiada Zechariah probably succeeded to his office, and in attempting to check the reaction in favor of idolatry which immediately followed, he fell a victim to a conspiracy formed against him by the king, and was stoned with stones in the court of the Temple. The memory of this unrighteous deed lasted long in Jewish tradition. In the Jerusalem Talmud (*Taanith*, fol. 69, quoted by Lightfoot, *Temple Service*, c. xxxvi.) there is a legend told of eighty thousand young priests who were slain by Nebuzaradan for the blood of Zechariah, and the evident hold which the story had taken upon the minds of the people renders it probable that "Zacharias son of Barachias," who was slain between the Temple and the altar (Matt. xxiii. 35), is the same with Zechariah the son of Jehoiada, and that the name of Barachias as his father crept into the text from a marginal gloss, the writer confusing this Zechariah either with Zechariah the prophet, who was the son of Berechiah, or with another Zechariah the son of Jeberechiah (Is. viii. 2).

7. (Ζαχαρίας.) A Kohathite Levite in the reign of Josiah, who was one of the overseers of the workmen engaged in the restoration of the Temple (2 Chr. xxxiv. 12).

8. The leader of the sons of Pharosh who returned with Ezra (Ezr. viii. 3).

9. [Vat. Ἀζαρια.] Son of Bebai, who came up from Babylon with Ezra (Ezr. viii. 11).

10. (*Zacharia* in Neh.) One of the chiefs of the people whom Ezra summoned in council at the river Ahava, before the second caravan returned from Babylon (Ezr. viii. 16). He stood at Ezra's left hand when he expounded the Law to the people (Neh. viii. 4).

11. (Ζαχαρία: *Zacharias.*) One of the family of Elam, who had married a foreign wife after the Captivity (Ezr. x. 26).

12. Ancestor of Athaiah, or Uthai (Neh. xi. 4).

13. (Ζαχαρίας; [Vat. Θηζεια; FA. Θηδεια.]) A Shilonite, descendant of Perez (Neh. xi. 5).

14. (Ζαχαρία.) A priest, son of Pashur (Neh. xi. 12).

15. (*Zacharia.*) The representative of the priestly family of Iddo in the days of Joiakim the son of Jeshua (Neh. xii. 16). Possibly the same as Zechariah the prophet the son of Iddo.

16. ([Ζαχαρίας; ver. 41, Rom. Vat. Alex. FA.[1] omit:] *Zacharias, Zacharia.*) One of the priests, son of Jonathan, who blew with the trumpets at the dedication of the city wall by Ezra and Nehemiah (Neh. xii. 35, 41).

17. (זְכַרְיָהוּ: Ζαχαρία.) A chief of the Reubenites at the time of the captivity by Tiglath-Pileser (1 Chr. v. 7).

18. [Alex. Ζαχαριας.] One of the priests who blew with the trumpets in the procession which accompanied the ark from the house of Obed-edom (1 Chr. xv. 24).

19. [Ζαχαρία.] Son of Isshiah, or Jesiah, a Kohathite Levite descended from Uzziel (1 Chr xxiv. 25).

20. (Ζαχαρίας.) Fourth son of Hosah of the children of Merari (1 Chr. xxvi. 11).

21. (Ζαβαλας; [Vat. Ζαββειας;] Alex. Ζαββίας.) A Manassite, whose son Iddo was chief of his tribe in Gilead in the reign of David (1 Chr. xxvii. 21).

22. (Ζαχαρίας.) The father of Jahaziel, a Gershonite Levite in the reign of Jehoshaphat (2 Chr. xx. 14).

23. One of the sons of Jehoshaphat (2 Chr. xxi. 2).

24. A prophet in the reign of Uzziah, who appears to have acted as the king's counsellor, but of whom nothing is known (2 Chr. xxvi. 5). The chronicler in describing him makes use of a most remarkable and unique expression, "Zechariah, who understood the seeing of God," or, as our A. V. has it, "who had understanding in the visions of God" (comp. Dan. i. 17). As no such term is ever employed elsewhere in the description of any prophet, it has been questioned whether the reading of the received text is the true one. The LXX., Targum, Syriac, Arabic, Rashi, and Kimchi, with many of Kennicott's MSS., read בִּירִאַת, "in the fear of," for בִּרְאוֹת, and their reading is most probably the correct one.

25. [Vat. Ζαχαρια (gen.).] The father of Abijah or Abi, Hezekiah's mother (2 Chr. xxix. 1) called also ZACHARIAH in the A. V.

26. [Vat. Ἀζαριας.] One of the family of Asaph the minstrel, who in the reign of Hezekiah

Digitized by Google

ook part with other Levites in the purification of he Temple (2 Chr. xxix. 13).

27. One of the rulers of the Temple in the reign of Josiah (2 Chr. xxxv. 8). He was probably, as Bertheau conjectures, "the second priest" (comp. 2 K. xxv. 18).

28. The son of Jeberechiah, who was taken by the prophet Isaiah as one of the "faithful witnesses to record," when he wrote concerning Maher-shalal-hash-baz (Is. viii. 2). He was not the same as Zechariah the prophet, who lived in the time of Uzziah and died before that king, but he may have been the Levite of that name, who in the reign of Hezekiah assisted in the purification of the Temple (2 Chr. xxix. 13). As Zechariah the prophet is called the son of Berechiah, with which Jeberechiah is all but identical, Bertholdt (*Einl.* iv. 1722, 1727) conjectured that some of the prophecies attributed to him, at any rate cc. ix.–xi., were really the production of Zechariah, the contemporary of Isaiah, and were appended to the volume of the later prophet of the same name (Gesen. *Der Proph. Jesaia*, i. 327). Another conjecture is that Zechariah the son of Jeberechiah is the same as Zechariah the father of Abijah, the queen of Ahaz (Poli, *Synopsis*, in loc.): the witnesses summoned by Isaiah being thus men of the highest ecclesiastical and civil rank. W. A. W.

**ZE'DAD** (צְדָד [*mountain-side*, or *steep place*]: Σαραδάκ, Ἡμασελδάμ; Alex. Σαδαδακ, Ελδαμ; [Comp. Ald. Σαδαδ, Σηδαδ:] *Sedada*). One of the landmarks on the north border of the land of Israel, as promised by Moses (Num. xxxiv. 8) and as restored by Ezekiel (xlvii. 15), who probably passed through it on his road to Assyria as a captive. In the former case it occurs between "the entrance of Hamath" and Ziphron, and in the latter between the "road to Hethlon" and Hamath. A place named *Sâdâd* exists to the east of the northern extremity of the chain of Anti-Libanus, about 50 miles E. N. E. of *Baalbec*, and 35 S. S. E. of *Hums*. It is possible that this may ultimately turn out to be identical with Zedad; but at present the passages in which the latter is mentioned are so imperfectly understood, and this part of the country has been so little explored with the view of arriving at topographical conclusions, that nothing can be done beyond directing attention to the coincidence in the names (see Porter, *Five Years*, etc., ii. 354–356). G.

**ZEDECHI'AS** (Σεδεκίας: *Sedecias*). ZEDEKIAH king of Judah (1 Esdr. i. 46).

**ZEDEKI'AH.** 1. (צִדְקִיָּהוּ, Tsidkiyyahu, and thrice צִדְקִיָּהוּ,[a] Tsidkiyyah [*justice of Jehovah*]: Σεδεκία,[b] Σεδεκίας: *Sedecias.*) The last king of Judah and Jerusalem. He was the son of Josiah by his wife Hamutal, and therefore own brother to Jehoahaz (2 K. xxiv. 18; comp. xxiii. 31). His original name had been MATTANIAH, which was changed to Zedekiah by Nebuchadnezzar, when he carried off his nephew Jehoiachim to Babylon, and left him on the throne of Jerusalem. Zedekiah was but twenty-one years old when he was thus placed in charge of an impoverished kingdom, and a city which, though still strong in its natural and artificial impregnability, was bereft of well-nigh all its defenders. But Jerusalem might have remained the head of the Babylonian province of Judah, and the Temple of Jehovah continued standing, had Zedekiah possessed wisdom and firmness enough to remain true to his allegiance to Babylon. This, however, he could not do (Jer. xxxviii. 5). His history is contained in the short sketch of the events of his reign given in 2 K. xxiv. 17–xxv. 7, and, with some trifling variations, in Jer. xxxix. 1–7, lii. 1–11, together with the still shorter summary in 2 Chr. xxxvi. 10, &c.; and also in Jer. xxi., xxiv., xxvi., xxviii., xxix., xxxii., xxxiii., xxxiv., xxxvii., xxxviii. (being the chapters containing the prophecies delivered by this prophet during this reign and his relation of various events more or less affecting Zedekiah), and Ez. xvii. 11–21. To these it is indispensable to add the narrative of Josephus (*Ant.* x. 7, 1–8, § 2), which is partly constructed by comparison of the documents enumerated above, but also contains information derived from other and independent sources. From these it is evident that Zedekiah was a man not so much bad at heart as weak in will. He was one of those unfortunate characters, frequent in history, like our own Charles I. and Louis XVI. of France, who find themselves at the head of affairs during a great crisis, without having the strength of character to enable them to do what they know to be right, and whose infirmity becomes moral guilt. The princes of his court, as he himself pathetically admits in his interview with Jeremiah, described in chap. xxxviii., had him completely under their influence. "Against them," he complains, "it is not the king that can do anything." He was thus driven to disregard the counsels of the prophet, which, as the event proved, were perfectly sound; and he who might have kept the fragments of the kingdom of Judah together, and maintained for some generations longer the worship of Jehovah, brought its final ruin on his country, destruction on the Temple, death to his family, and a cruel torment and miserable captivity on himself.

It is evident from Jer. xxvii.[c] and xxviii. (apparently the earliest prophecies delivered during this reign), that the earlier portion of Zedekiah's reign was marked by an agitation throughout the whole of Syria against the Babylonian yoke. Jeru-

---

[a] Jer. xxvii. 12, xxviii. 1, xxix. 3. In this form it is identical with the name which appears in the A. V. (in connection with a different person) as ZEDEKIAH. A similar inconsistency of our translators is shown in the cases of Hezekiah, Hilkiah, and Hilkiah; Ezekiel and Jehezekel.

[b] The peculiarities of the name, as it appears in the Vatican LXX. (Mai), may be noted:—

(*a.*) It is Σεδεκία in 2 K. xxiv. 17 · 1 Chr. iii. 15; Jer. xxxiv. 4 only.

(*b.*) The genitive is Σεδεκίου in 2 K. xxv. 2; Jer. li. 59, lii. 1, 10, 11; but Σεδεκία in Jer. i. 3, xxviii. 1, xxxix. 1; and Σεδεκεία in xxxix. 2 only.

(*c.*) The name is occasionally omitted where it is present in the Hebrew text, *e. g.* Jer. xxxviii., lii. 5, 8; but on the other hand is inserted in xlvi. 1, where also Riam is put for "gentiles."

N. B. The references above given to Jeremiah are according to the Hebrew capitulation.

[c] There can be no doubt that ver. 1 of xxvii., as it at present stands, contains an error, and that for Jehoiakim we should read Zedekiah. The mention of Zedekiah in vv. 3 and 12, and in xxviii. 1, as well as of the captivity of Jeconiah in ver. 20, no less than the whole argument of the latter part of the chapter, renders this evident.

Digitized by Google

salem seems to have taken the lead, since in the fourth year of Zedekiah's reign we find ambassadors from all the neighboring kingdoms — Tyre, Sidon, Edom, and Moab — at his court, to consult as to the steps to be taken. This happened either during the king's absence or immediately after his return from Babylon, whither he went on some errand, the nature of which is not named, but which may have been an attempt to blind the eyes of Nebuchadnezzar to his contemplated revolt (Jer. li. 59). The project was attacked by Jeremiah with the strongest statement of the folly of such a course — a statement corroborated by the very material fact that a man of Jerusalem named Hananiah, who had opposed him with a declaration in the name of Jehovah, that the spoils of the Temple should be restored within two years, had died, in accordance with Jeremiah's prediction, within two months of its delivery. This, and perhaps also the impossibility of any real alliance between Judah and the surrounding nations, seems to have put a stop, for the time, to the anti-Babylonian movement. On a man of Zedekiah's temperament the sudden death of Hananiah must have produced a strong impression; and we may without improbability accept this as the time at which he procured to be made in silver a set of the vessels of the Temple, to replace the golden plate carried off with his predecessor by Nebuchadnezzar (Bar. i. 8).

The first act of overt rebellion of which any record survives was the formation of an alliance with Egypt, of itself equivalent to a declaration of enmity with Babylon. In fact, according to the statement of Chronicles and Ezekiel (xvii. 13), with the expansion of Josephus, it was in direct contravention of the oath of allegiance in the name of Elohim, by which Zedekiah was bound by Nebuchadnezzar, namely, that he would keep the kingdom for Nebuchadnezzar, make no innovation, and enter into no league with Egypt (Ez. xvii. 13; 2 Chr. xxxvi. 13; Jos. *Ant.* x. 7, § 1). As a natural consequence it brought on Jerusalem an immediate invasion of the Chaldæans. The mention of this event in the Bible, though sure, is extremely slight, and occurs only in Jer. xxxvii. 5–11, xxxiv. 21, and Ez. xvii. 15–20; but Josephus (x. 7, § 3) relates it more fully, and gives the date of its occurrence, namely the eighth year of Zedekiah. Probably also the denunciations of an Egyptian alliance, contained in Jer. ii. 18, 36, have reference to the same time. It appears that Nebuchadnezzar, being made aware of Zedekiah's defection, either by the non-payment of the tribute or by other means, at once sent an army to ravage Judæa. This was done, and the whole country reduced, except Jerusalem and two strong places in the western plain, Lachish and Azekah, which still held out (Jer. xxxiv. 7). In the panic which followed the appearance of the Chaldæans, Zedekiah succeeded in inducing the princes and other inhabitants of Jerusalem to abolish the odious custom which prevailed of enslaving their countrymen. A solemn rite (ver. 18), recalling in its form that in which the original covenant of the nation had been made with Abram (Gen. xv. 9, &c.), was performed in the Temple (ver. 15), and a crowd of Israelites of both sexes found themselves released from slavery.

In the mean time Pharaoh had moved to the assistance of his ally. On hearing of his approach the Chaldees at once raised the siege and advanced to meet him. The nobles seized the moment of respite to reassert their power over the king, and their defiance of Jehovah, by reënslaving those whom they had so recently manumitted; and the prophet thereupon utters a doom on those miscreants which, in the fierceness of its tone and in some of its expressions, recalls those of Elijah on Ahab (ver. 20). This encounter was quickly followed by Jeremiah's capture and imprisonment, which but for the interference of the king (xxxvii. 17, 21) would have rapidly put an end to his life (ver. 20). How long the Babylonians were absent from Jerusalem we are not told. It must have required at least several months to move a large army and baggage through the difficult and tortuous country which separates Jerusalem from the Philistine Plain, and to effect the complete repulse of the Egyptian army from Syria, which Josephus affirms was effected. All we certainly know is that on the tenth day of the tenth month of Zedekiah's ninth year the Chaldæans were again before the walls (Jer. lii. 4). From this time forward the siege progressed slowly but surely to its consummation, with the accompaniment of both famine and pestilence (Joseph.). Zedekiah again interfered to preserve the life of Jeremiah from the vengeance of the princes (xxxviii. 7–13), and then occurred the interview between the king and the prophet of which mention has already been made, and which affords so good a clew to the condition of abject dependence into which a long course of opposition had brought the weak-minded monarch. It would seem from this conversation that a considerable desertion had already taken place to the besiegers, proving that the prophet's view of the condition of things was shared by many of his countrymen. But the unhappy Zedekiah throws away the chance of preservation for himself and the city which the prophet set before him, in his fear that he would be mocked by those very Jews who had already taken the step Jeremiah was urging him to take (xxxviii. 19). At the same time his fear of the princes who remained in the city is not diminished, and he even condescends to impose on the prophet a subterfuge, with the view of concealing the real purport of his conversation from these tyrants of his spirit (vv. 24–27).

But while the king was hesitating the end was rapidly coming nearer. The city was indeed reduced to the last extremity. The fire of the besiegers had throughout been very destructive (Joseph.), but it was now aided by a severe famine. The bread had for long been consumed (Jer. xxxviii. 9), and all the terrible expedients had been tried to which the wretched inhabitants of a besieged town are forced to resort in such cases. Mothers had boiled and eaten the flesh of their own infants (Bar. ii. 3; Lam. iv. 10). Persons of the greatest wealth and station were to be seen searching the dung-heaps for a morsel of food. The effeminate nobles, whose fair complexions had been their pride, wandered in the open streets like blackened but living skeletons (Lam. iv. 5, 8). Still the king was seen in public, sitting in the gate where justice was administered, that his people might approach him, though indeed he had no help to give them (xxxviii. 7).

At last, after sixteen dreadful months had dragged on, the catastrophe arrived. It was on the ninth day of the fourth month, about the middle of July, at midnight, as Josephus with careful minuteness informs us, that the breach in those stout and venerable walls was effected. The news

Digitized by Google

nine days old, had gone down below the hills which form the western edge of the basin of Jerusalem, or was, at any rate, too low to illuminate the utter darkness which reigns in the narrow lanes of an eastern town, where the inhabitants retire early to rest, and where there are but few windows to emit light from within the houses. The wretched remnants of the army, starved and exhausted, had left the walls, and there was nothing to oppose the entrance of the Chaldæans. Passing in through the breach, they made their way, as their custom was, to the centre of the city, and for the first time the Temple was entered by a hostile force, and all the princes of the court of the great king took their seats in state in the middle gate of the hitherto virgin house of Jehovah. The alarm quickly spread through the sleeping city, and Zedekiah, collecting his wives and children (Joseph.) and surrounding himself with the few soldiers who had survived the accidents of the siege, made his way out of the city at the opposite end to that at which the Assyrians had entered, by a street which, like the *Bein es-Surein* at Damascus, ran between two walls (probably those on the east and west sides of the so-called Tyropœon valley), and issued at a gate above the royal gardens and the Fountain of Siloam. Thence he took the road towards the Jordan, perhaps hoping to find refuge, as David had, at some fortified place in the mountains on its eastern side. On the road they were met and recognized by some of the Jews who had formerly deserted to the Chaldæans. By them the intelligence was communicated, with the eager treachery of deserters, to the generals in the city (Joseph.), and, as soon as the dawn of day permitted it, swift pursuit was made. The king's party must have had some hours' start, and ought to have had no difficulty in reaching the Jordan; but, either from their being on foot, weak and infirm, while the pursuers were mounted, or perhaps owing to the incumbrance of the women and baggage, they were overtaken near Jericho, when just within sight of the river. A few of the people only remained round the person of the king. The rest fled in all directions, so that he was easily taken.

Nebuchadnezzar was then at Riblah, at the upper end of the valley of Lebanon, some 35 miles beyond Baalbec, and therefore about ten days' journey from Jerusalem. Thither Zedekiah and his sons were dispatched; his daughters were kept at Jerusalem, and shortly after fell into the hands of the notorious Ishmael at Mispah. When he was brought before Nebuchadnezzar, the great king reproached him in the severest terms, first for breaking his oath of allegiance, and next for ingratitude (Joseph.). He then, with a refinement of cruelty characteristic of those cruel times, ordered his sons to be killed before him, and lastly his own eyes to be thrust out. He was then loaded with brazen fetters, and at a later period taken to Babylon, where he died. We are not told whether he was allowed to communicate with his brother Jehoiachin, who at that time was also in captivity there; nor do we know the time of his death; but from the omission of his name in the statement of Evil-Merodach's release by Evil-Merodach, 26 years after the fall of Jerusalem, it is natural to infer that by that time Zedekiah's sufferings had ended.

The fact of his interview with Nebuchadnezzar at Riblah, and his being carried blind to Babylon, reconciles two predictions of Jeremiah and Ezekiel, which at the time of their delivery must have appeared conflicting, and which Josephus indeed particularly states Zedekiah alleged as his reason for not giving more heed to Jeremiah. The former of these (Jer. xxxii. 4) states that Zedekiah shall "speak with the king of Babylon mouth to mouth, and his eyes shall behold his eyes;" the latter (Ez. xii. 13), that "he shall be brought to Babylon, yet shall he not see it, though he die there." The whole of this prediction of Ezekiel, whose prophecies appear to have been delivered at Babylon (Ez. i. 1–3, xl. 1), is truly remarkable as describing almost exactly the circumstances of Zedekiah's flight.

2. צִדְקִיָּהוּ and צִדְקִיָּהוּ [a]: Σεδεκίας; [Vat. in 1 K. xxii. 24. Σεδεκιου:] *Sedecias.*) Son of Chenaanah, a prophet at the court of Ahab, head, or, if not head, virtual leader of the college. He appears but once, namely, as spokesman when the prophets are consulted by Ahab on the result of his proposed expedition to Ramoth-Gilead (1 K. xxii.; 2 Chr. xviii.).

Zedekiah had prepared himself for the interview with a pair of iron horns after the symbolic custom of the prophets (comp. Jer. xiii., xix.), the horns of the *reem*, or buffalo, which was the recognised emblem of the tribe of Ephraim (Deut. xxxiii. 17). With these, in the interval of Micaiah's arrival, he illustrated the manner in which Ahab should drive the Syrians before him. When Micaiah appeared and had delivered his prophecy, Zedekiah sprang forward and struck him a blow on the face, accompanying it by a taunting sneer. For this he is threatened by Micaiah in terms which are hardly intelligible to us, but which evidently allude to some personal danger to Zedekiah.

The narrative of the Bible does not imply that the blow struck by Zedekiah was prompted by more than sudden anger, or a wish to insult and humiliate the prophet of Jehovah. But Josephus takes a very different view, which he develops at some length (*Ant.* viii. 15, § 3). He relates that after Micaiah had spoken, Zedekiah again came forward, and denounced him as false on the ground that his prophecy contradicted the prediction of Elijah, that Ahab's blood should be licked up by dogs in the field of Naboth of Jezreel; and as a further proof that he was an impostor, he struck him, daring him to do what Iddo, in somewhat similar circumstances, had done to Jeroboam namely, wither his hand.

This addition is remarkable, but it is related by Josephus with great circumstantiality, and was doubtless drawn by him from that source, unhappily now lost, from which he has added so many admirable touches to the outlines of the sacred narrative.

As to the question of what Zedekiah and his followers were, whether prophets of Jehovah or of some false deity, it seems hardly possible to entertain any doubt. True, they use the name of Jehovah, but that was a habit of false prophets (Jer. xxviii. 2, comp. xxix. 21, 31), and there is a vast difference between the casual manner in which they mention the awful Name, and the full, and as it were, formal style in which Micaiah proclaims and reiterates it. Seeing also that Ahab and his queen were professedly worshippers of Baal and Ashtaroth, and that a few years only before this event they had an establishment consisting of two

[a] Once only, namely, 1 K. xxii. 11.

Digitized by Google

bodies — one of 450, the other of 400 — prophets of this false worship, it is difficult to suppose that there could have been also 400 prophets of Jehovah at his court. But the inquiry of the king of Judah seems to decide the point. After hearing the prediction of Zedekiah and his fellows, he asks at once for a prophet of Jehovah: "Is there not here besides (עוֹד) a prophet of *Jehovah* that we may inquire of *him*?" The natural inference seems to be that the others were *not* prophets of Jehovah, but were the 400 prophets of Ashtaroth (A. V. "the groves") who escaped the sword of Elijah (comp. 1 K. xviii. 19 with 22, 40). They had spoken in His name, but there was something about them — some trait of manner, costume, or gesture — which aroused the suspicions of Jehoshaphat, and, to the practised eye of one who lived at the centre of Jehovah-worship and was well versed in the marks of the genuine prophet, proclaimed them counterfeits. With these few words Zedekiah may be left to the oblivion in which, except on this one occasion, he remains. G.

3. (צִדְקִיָּהוּ.) The son of Maaseiah, a false prophet in Babylon among the captives who were taken with Jeconiah (Jer. xxix. 21, 22). He was denounced in the letter of Jeremiah for having, with Ahab the son of Kolaiah, buoyed up the people with false hopes, and for profane and flagitious conduct. Their names were to become a by-word, and their terrible fate a warning. Of this fate we have no direct intimation, or of the manner in which they incurred it: the prophet simply pronounces that they should fall into the hands of Nebuchadnezzar and be burnt to death. In the Targum of R. Joseph on 2 Chr. xxviii. 3, the story is told that Joshua the son of Josadak the high-priest was cast into the furnace of fire with Ahab and Zedekiah, but that, while they were consumed, he was saved for his righteousness' sake.

4. The son of Hananiah, one of the princes of Judah who were assembled in the scribes' chamber of the king's palace, when Micaiah announced that Baruch had read the words of Jeremiah in the ears of the people from the chamber of Gemariah the scribe (Jer. xxxvi. 12). W. A. W.

**ZE'EB** (זְאֵב [see below]: ὁ Ζήβ: *Zeb*). One of the two "princes" (שָׂרֵי) of Midian in the great invasion of Israel — inferior to the "kings" Zebah and Zalmunna. He is always named with OREB (Judg. vii. 25, viii. 3; Ps. lxxxiii. 11). The name signifies in Hebrew "wolf," just as Oreb does "crow," [or "raven"] and the two are appropriate enough to the customs of predatory warriors, who delight in conferring such names on their chiefs.

Zeb and Oreb were not slain at the first rout of the Arabs below the spring of Harod, but at a later stage of the struggle, probably in crossing the Jordan at a ford further down the river, near the passes which descend from Mount Ephraim. An enormous mass of their followers perished with them. [OREB.] Zeb, the wolf, was brought to bay in a wine-press which in later times bore his name — the "wine-press of Zeb" (יְקֶב זְאֵב 'Ιακεφζήφ; Alex. Ιακεφζηβ: *Torcular Zeb*). G.

**ZE'LAH** (צֶלַע and צֵלָע, a i. e. Tsela [רִיב *side*]: in Josh. [Rom.] Vat. omit [or read Σελαχ κατ]; Alex. Σηλα[λεφ; [Sarrav. Σελα;] in Sam. ἐν τῇ πλευρᾷ in both: *Sela, in latere*). One of the cities in the allotment of Benjamin (Josh. xviii 28). Its place in the list is between Taralah and ha-Eleph. None of these places have, however, been yet discovered. The interest of Zelah resides in the fact that it contained the family tomb of Kish the father of Saul (2 Sam. xxi. 14), in which the bones of Saul and Jonathan, and also apparently of the two sons and five grandsons of Saul, sacrificed to Jehovah on the hill of Gibeah, at last found their resting-place (comp. ver. 13). As containing their sepulchre, Zelah was in all probability the native place [b] of the family of Kish, and therefore his home, and the home of Saul before his selection as king had brought him into prominence. This appears to have been generally overlooked, but it is important, because it gives a different starting-point to that usually assumed for the journey of Saul in quest of his father's asses, as well as a different goal for his return after the anointing; and although the position of Zelah is not and may never be known, still it is one step nearer the solution of the complicated difficulties of that route to know that Gibeah — Saul's royal residence after he became king — was not necessarily the point either of his departure or his return.

The absence of any connection between the names of Zelah and Zelzah (too frequently assumed) is noticed under the latter head. G.

**ZE'LEK** (צֶלֶק) [*cleft*]: Ελαλ [Vat. Ελεαε] Σελή; Alex. Σβλεγι, Σελληχ: *Zelec*). An Ammonite, one of David's guard (2 Sam. xxiii. 37; 1 Chr. xi. 39).

**ZELOPH'EHAD** (צְלָפְחָד [perh. *first-born*, Ges.]: Σαλπαάδ, [exc. Josh. xvii. 3, Alex. Σαλφααδ; 1 Chr. vii. 15, Rom. Vat. Σασφαδδ:] *Salphaad*). Son of Hepher, son of Gilead, son of Machir, son of Manasseh (Josh. xvii. 3). He was apparently the second son of his father Hepher (1 Chr. vii. 15), though Simonis and others, following the interpretation of the Rabbis, and under the impression that the etymology of his name indicates a first-born, explains the term הַצְּעִירִי as meaning that his lot came up second. Zelophehad came out of Egypt with Moses; and all that we know of him is that he took no part in Korah's rebellion, but that he died in the wilderness, as did the whole of that generation (Num. xiv. 35, xxvii. 3). On his death without male heirs, his five daughters, just after the second numbering in the wilderness, came before Moses and Eleazar to claim the inheritance of their father in the tribe of Manasseh. The claim was admitted by Divine direction, and a law was promulgated, to be of general application, that if a man died without sons his inheritance should pass to his daughters (Num. xxvi. 33, xxvii. 1–11), which led to a further enactment (Num. xxxvi.), that such heiresses should

[a] The meaning is slightly altered by the change in the vowel-points. In the former case it signifies an "addition" (*abhang*), in the latter a "rib" (Fürst, *Hwb.* ii. 275 *a*). Compare the equivalents of the LXX. and Vulg. in Samuel, as given above.

[b] In like manner the sepulchre of the family of Jesse was at Bethlehem (2 Sam. ii. 32).

Digitized by Google

not marry out of their own tribe — a regulation which the five daughters of Zelophehad complied with, being all married to sons of Manasseh, so that Zelophehad's inheritance continued in the tribe of Manasseh. The law of succession, as exemplified in the case of Zelophehad, is treated at length by Selden (*De Success.* capp. xxii., xxiii.).

The interest of the case, in a legal point of view, has led to the careful preservation of Zelophehad's genealogy. Beginning with Joseph, it will be seen that the daughters of Zelophehad are the seventh generation. So are Salmon, Bezaleel, and Zophai (apparently the first settler of his family), from their patriarchal ancestors; while Caleb, Achan, and Phinehas are the sixth; Joshua seems to have been the eighth. [SHUTHELAH.] The average, therefore, seems to be between 6 and 7 generations, which, at 40 years to a generation (as suited to the length of life at that time), gives between 240 and 280 years, which agrees very well with the reckoning of 215 years for the sojourning of the Israelites in Egypt + 40 years in the wilderness = 255 (Joseph. *Ant.* iv. 7, § 5; Selden, *De Succes.* xxii., xxiii.). A. C. H.

**ZELO'TES** (Ζηλωτής: *Zelotes*). The epithet given to the Apostle Simon to distinguish him from Simon Peter (Luke vi. 15). In Matt. x. 4, he is called "Simon the Canaanite," the last word being a corruption of the Aramaic term, of which "Zelotes" is the Greek equivalent. [CANAANITE; SIMON 5.]

**ZEL'ZAH** (צֶלְצַח: *i. e.* Tseltsach [*shadow*, Ges.; or, *double shadow*, Fürst]: ἀλλαγμένους[a] μεγδλα, in both MSS.: *in meridie*). A place named once only (1 Sam. x. 2), as on the boundary of Benjamin, close to (עִם) Rachel's sepulchre. It was the first point in the homeward journey of Saul after his anointing by Samuel. Rachel's sepulchre is still shown a short distance to the north of Bethlehem, but no acceptable identification of Zelzach has been proposed. It is usually considered as identical with Zelah, the home of Kish and Saul, and that again with *Beit-jala*. But this is not tenable; at any rate there is nothing to support it. The names Zelah and Zelzach are not only not identical, but they have hardly anything in common, still less have צלצח and חלע; nor is *Beit-jala* close enough to the *Kubbet Rahil* to answer to the expression of Samuel. [RAMAH.] G.

**ZEMARA'IM** (צְמָרַיִם [*double forest-mount*, Fürst]: Σδρα: Alex. Σεμριμ: *Semarraim*). One of the towns of the allotment of Benjamin (Josh. xviii. 22). It is named between Beth ha-Arabah and Bethel, and therefore on the assumption that Arabah in the former name denotes as usual the Jordan Valley, we should expect to find Zemaraim either in the valley or in some position on its western edge, between it and Bethel. In the former case a trace of the name may remain in *Chürbet el-Szómra*, which is marked in Seetzen's map (*Reisen*, vol. iv. map 2) as about 4 miles north of Jericho, and appears as *es-Sümrah*[b] in those of Robinson and Van de Velde.[c] (See also Rob. *Bibl. Res.* i. 569.) In the latter case Zemaraim may be connected, or identical, with MOUNT ZEMARAIM, which must have been in the highland district.

In either event Zemaraim may have derived its name from the ancient tribe of the Zemarim or Zemarites, who were related to the Hittites and Amorites; who, like them, are represented in the Biblical account as descendants of Canaan, but, from some cause or other unexplained, have left but very scanty traces of their existence. The list of the towns of Benjamin are remarkable for the number of tribes which they commemorate. The Avites, the Ammonites, the Ophnites, the Jebusites, are all mentioned in the catalogue of Josh. xviii. 22–28, and it is at least possible that the Zemarites may add another to the list. G.

**ZEMARA'IM, MOUNT** (הַר צְמָרַיִם [see above]: τὸ ὄρος Χομόρων: *mons Semeron*). An eminence mentioned in 2 Chr. xiii. 4 only. It was "in Mount Ephraim," that is to say within the general district of the highlands of that great tribe. It appears to have been close to the scene of the engagement mentioned in the narrative, which again may be inferred to have been south of Bethel and Ephraim (ver. 19). It may be said in passing, that a position so far south is no contradiction to its being in Mount Ephraim. It has been already shown under RAMAH [iii. 2670 *b*] that the name of Mount Ephraim probably extended as far as *er-Ram*, 4 miles south of *Beitin*, and 8 of *Taiyibeh*, the possible representative of Ephraim. Whether Mount Zemaraim is identical with, or related to the place of the same name mentioned in the preceding article, cannot be ascertained. If they prove to be distinct places they will furnish a double testimony to the presence of the ancient tribe of Zemarites in this part of the country. No name answering to Zemaraim has been yet discovered in the maps or information of travellers on the highland.

It will be observed that in the LXX. and Vulgate, this name is rendered by the same word which in the former represents Samaria. But this, though repeated (with a difference) in the case of Zemarite, can hardly be more than an accidental error, since the names have little or no resemblance in Hebrew. In the present case Samaria is besides inadmissible on topographical grounds. G.

**ZEM'ARITE, THE** (הַצְּמָרִי [patr.]: ὁ Χαμαραῖος; [in 1 Chr. Rom. Vat. omit:] *Samareus*). One of the Hamite tribes who in the genealogical table of Gen. x. (ver. 18), and 1 Chr. i. (ver. 16), are represented as "sons of Canaan." It is named between the Arvadite, or people of Ruad, and the Hamathite, or people of Hamah. Nothing is certainly known of this ancient tribe.

---

[a] Apparently reading צלצל. The Talmud has numerous explanations, the favorite one being that Zelzah was Jerusalem — "the shadow (צל) of God." Something of this kind is at the root of the *meridie* of the Vulg.

[b] The name *Sumrah* occurs more than once elsewhere in the Jordan Valley. It is found close to the "Round Fountain" in the Plain of Gennesareth; also at the S. E. end of the Lake of Tiberias.

[c] In the 2d ed. of Robinson (i. 569) the name is given as *es-Sümra*; but this is probably a misprint. See the Arabic Index to ed. i., the text, ii. 305, and the maps to both editions.

Digitized by Google

the old interpreters (Jerusalem Targum, Arabic Version, etc.) place them at Emesa, the modern *Hums*. Michaelis (*Spicilegium*, ii. 51), revolting at the want of similarity between the two names (which is perhaps the strongest argument in favor of the old identification), proposes to locate them at *Sumra* (the Simyra of the classical geographers), which name is mentioned by Shaw as attached to a site of ruins near *Arka*, on the west coast of Syria, 10 or 11 miles above Tripoli.

On the new French map of the Lebanon (*Carte du Liban*, etc., 1862) it appears as *Kobbet oum Shoumra*, and lies between *Arka* and the Mediterranean, 2 kilomètres from the latter, and 5½ from the former. Beyond, however, the resemblance in the names, and the proximity of *Ruad* and *Arka*, the probable seats of the Arvadites and Arkites, and the consequent inference that the original seat of the Zemarites must have been somewhere in this direction, there is nothing to prove that *Sumra* or *Shoumra* have any connection with the Tsemarites of the ancient records.

Traces of their having wandered to the south are possibly afforded by the name Zemaraim, formerly attached to two places in the topographical lists of Central Palestine — a district which appears to have been very attractive to the aboriginal wandering tribes from every quarter. [ZEMARAIM; see also AVIM, OPHNI, etc.]

The LXX. and Vulgate would connect the Zemarites with Samaria. In this they have been followed by some commentators. But the idea is a delusion, grounded on the inability of the Greek alphabet to express the Hebrew letters of both names. G.

**ZEMI'RA** (צְמִירָה [*song*, Ges.]: Ζεμιρά; [Vat. Αμαριας;] Alex. Ζαμιριας: *Zamira*). One of the sons of Becher the son of Benjamin (1 Chr. vii. 8).

**ZE'NAN** (צְנָן [*place of flocks*]: Σενναμ; Alex. Σενναμ: *Sennan*). One of the towns in the allotment of Judah, situated in the district of the *Shefēlah* (Josh. xv. 37). It occurs in the second group of the enumeration, which contains amongst others Migdal-gad and Lachish. It is probably identical with ZAANAN, a place mentioned by the prophet Micah in the same connection.

Schwarz (p. 103) proposes to identify it with "the village Zan-abra, situated 2½ English miles southeast of Mareshah." By this he doubtless intends the place which in the lists of Robinson (*Bibl. Res.* 1st ed., vol. iii., App. 117) is called *es-Sendbirah*, السنابرة, and in Tobler's *Dritte Wanderung* (p. 149), *es-Semdbereh*. The latter traveller in his map places it about 2½ miles due east of *Marash* (*Maresha*). But this identification is more than doubtful. G.

**ZE'NAS** (Ζηνᾶς, a contraction from Ζηνόδωρος, as Ἀρτεμᾶς from Ἀρτεμίδωρος, Νυμφᾶς from Νυμφόδωρος, and, probably, Ἑρμᾶς from Ἑρμόδωρος), a believer, and, as may be inferred from the context, a preacher of the gospel, who is mentioned in Tit. iii. 13 in connection with Apollos, and, together with him, is there commended by St. Paul to the care and hospitality of Titus and the Cretan brethren. He is further described as a "the lawyer" (τὸν νομικόν). It is impossible to determine with certainty whether we are to infer from this designation that Zenas was a Roman jurisconsult or a Jewish doctor. Grotius accepts the former alternative, and thinks that he was a Greek who had studied Roman Law. The N. T. usage of νομικός leads rather to the other inference. Tradition has been somewhat busy with the name of Zenas. The *Synopsis de Vita et Morte Prophetarum Apostolorum et Discipulorum Domini* ascribed to Dorotheus of Tyre, makes him to have been one of the "seventy-two" disciples, and subsequently bishop of Diospolis in Palestine (*Bibl. Patr.* iii. 150). The "seventy-two" disciples of Dorotheus are, however, a mere string of names picked out of salutations and other incidental notices in the N. T. The Greek Menologies on the festival of SS. Bartholomew and Titus (Aug. 25) refer to a certain Life of Titus, ascribed to Zenas, which is also quoted for the supposed conversion of the younger Pliny (compare Fabricius, *Codex Apocr. N. T.* ii. 831 f.). The association of Zenas with Titus, in St. Paul's epistle to the latter, sufficiently accounts for the forgery. W. B. J.

**ZEPHANI'AH** (צְפַנְיָה: Σοφονίας: *Sophonia*. These forms refer to another punctuation, צְפַנְיָהוּ, a participial form). Jerome derives the name from צפה, and supposes it to mean *speculator Domini*, "watcher of the Lord," an appropriate appellation for a prophet. The pedigree of Zephaniah, ch. i. 1, is traced to his fourth ancestor, Hezekiah: supposed by Aben Ezra to be the celebrated king of that name. This is not in itself improbable, and the fact that the pedigree terminates with that name, points to a personage of rank and importance. Late critics and commentators generally acquiesce in the hypothesis, namely, Eichhorn, Hitzig, F. Ad. Strauss (*Vaticinia Zephaniæ*, Berlin, 1843), Hävernick, Keil, and Bleek (*Einleitung in das Alte Testament*).

*Analysis.* Chap. i. The utter desolation of Judæa is predicted as a judgment for idolatry, and neglect of the Lord, the luxury of the princes, and the violence and deceit of their dependents (3–9). The prosperity, security, and insolence of the people is contrasted with the horrors of the day of wrath; the assaults upon the fenced cities and high towers, and the slaughter of the people (10–18). Ch. ii., a call to repentance (1–3), with prediction of the ruin of the cities of the Philistines and the restoration of the house of Judah after the visitation (4–7). Other enemies of Judah, — Moab, Ammon, — are threatened with perpetual destruction, Ethiopia with a great slaughter, and Nineveh, the capital of Assyria, with desolation (8–15). Ch. iii. The prophet addresses Jerusalem, which he reproves sharply for vice and disobedience, the cruelty of the princes and the treachery of the priests, and for their general disregard of warnings and visitations (1–7). He then concludes with a series of promises, the destruction of the enemies of God's people, the restoration of exiles, the extirpation of the proud and violent, and the permanent peace and blessedness of the poor and afflicted remnant who shall trust in the name of the Lord. These exhortations to rejoicing and exertion are mingled with intimations of a complete manifestation of God's righteousness and love in the restoration of his people (8–20).

The chief characteristics of this book are the unity and harmony of the composition, the grace energy, and dignity of its style, and the rapid and effective alternations of threats and promises. Its

Digitized by Google

prophetical import is chiefly shown in the accurate predictions of the desolation which has fallen upon each of the nations denounced for their crimes; Ethiopia, which is menaced with a terrible invasion, being alone exempted from the doom of perpetual ruin. The general tone of the last portion is Messianic, but without any specific reference to the Person of our Lord.

The date of the book is given in the inscription; namely, the reign of Josiah, from 642 to 611 B. C. This date accords fully with internal indications. Nineveh is represented as in a state of peace and prosperity, while the notices of Jerusalem touch upon the same tendencies to idolatry and crime which are condemned by the contemporary Jeremiah.

It is most probable, moreover, that the prophecy was delivered before the 18th year of Josiah, when the reformation, for which it prepares the way, was carried into effect, and about the time when the Scythians overran the empires of western Asia, extending their devastations to Palestine. The notices which are supposed by some critics to indicate a somewhat later date are satisfactorily explained. The king's children, who are spoken of, in ch. i. 8, as addicted to foreign habits, could not have been sons of Josiah, who was but eight years old at his accession, but were probably his brothers or near relatives. The remnant of Baal (ch. i. 4) implies that some partial reformation had previously taken place, while the notices of open idolatry are incompatible with the state of Judah after the discovery of the Book of the Law.

F. C. C.

• *Literature.* — Among the special writers on Zephaniah are J. H. Gebhardi, *Erklärung des Proph. Zephanjah* (1728); D. G. C. von Cölln, *Spicileg. Observatt. exeg.-crit. ad Zephaniæ Vaticinia* (1818); P. Ewald, *Der Prophet Zephanias* (1827); Fr. A. Strauss, *Vaticinia Zephaniæ Comm. illustr.* (1843); and L. Reinke, *Der Proph. Zephanja* (1868). On particular topics, J. A. Nolten, *Diss. exeg. in Prophetiam Zephaniæ* (1719); C. F. Cramer, *Scythische Denkmäler in Palästina*, with a Commentary (1777), and C. Th. Anton, *Versio* c. iii. *Proph. Zeph.* etc. (1811). The later writers on Zephaniah are Rosenmüller, Hitzig, Theiner, Maurer, Ewald, Umbreit, Keil (1866), Kleinert (1866, in Lange's *Bibelwerk*), Henderson, Noyes, Cowles, and Pusey (1870), in their well known commentaries on the minor prophets. For works relating to the overthrow of Nineveh, so distinctly foretold by Zephaniah, see the additions to NAHUM and NINEVEH. See also the art. *Zephanja* by Delitzsch in Herzog's *Real-Encyk.* xviii. 493–501 (1864). H.

2. (Σαφανίας; Alex. Σαφανιας: *Sophonias.*) A Kohathite Levite, ancestor of Samuel and Heman (1 Chr. vi. 36 [21]).

3. (Σοφονίας.) The son of Maaseiah (Jer. xxi. 1), and *sagan* or second priest in the reign of Zedekiah. He succeeded Jehoiada (Jer. xxix. 25, 26), and was probably a ruler of the Temple, whose office it was among others to punish pretenders to the gift of prophecy. In this capacity he was appealed to by Shemaiah the Nehelamite, in a letter from Babylon, to punish Jeremiah (Jer. xxix. 29). Twice was he sent from Zedekiah to inquire of Jeremiah the issue of the siege of the city by the Chaldæans (Jer. xxi. 1), and to implore him to intercede for the people (Jer. xxxvii. 3). On the capture of Jerusalem by Nebuzaradan he was taken with Seraiah the high-priest and others, and slain at Riblah (Jer. lii. 24, 27; 2 K. xxv. 18, 21) In 2 K. xxv. 18, Jer. xxxvii. 3, his name is written in the longer form צְפַנְיָהוּ.

4. Father of Josiah 2 (Zech. vi. 10), and of Hen, according to the reading of the received text of Zech. vi. 14, as given in the A. V.

W. A. W.

**ZEPHATH** (צְפַת [*watch-tower*]: [Rom. Σεφέθ; Vat.] Σεφεκ; Alex. Σεφερ: *Sephaath*). The earlier name (according to the single notice of Judg. i. 17) of a Canaanite town, which after its capture and destruction was called by the Israelites HORMAH. Two identifications have been proposed for Zephath: that of Dr. Robinson with the well-known pass *es-Sufâ* (الصفا), by which the ascent is made from the borders of the *Arabah* to the higher level of the "South country" (*Bibl. Res.* ii. 181), and that of Mr. Rowlands (Williams's *Holy City*, i. 464) with *Sebâta*, 2½ hours beyond *Khalasa*, on the road to Suez, and ½ of an hour north of *Ruheibeh* or *Ruheibeh*.

The former of these, Mr. Wilton (*The Negeb*, etc., pp. 199, 200) has challenged, on account of the impracticability of the pass for the approach of the Israelites, and the inappropriateness of so rugged and desolate a spot for the position of a city of any importance. The question really forms part of a much larger one, which this is not the place to discuss — namely, the route by which the Israelites approached the Holy Land. But in the mean time it should not be overlooked that the attempt in question was an unsuccessful one, which is so far in favor of the steepness of the pass. The argument from the nature of the site is one which might be brought with equal force against the existence of many others of the towns in this region. On the identification of Mr. Rowlands some doubt is thrown by the want of certainty as to the name, as well as by the fact that no later traveller has succeeded in finding the name *Sebâta*, or the spot. Dr. Stewart (*Tent and Khan*, p. 205) heard of the name, but east of *Khalasa* instead of south, and this was in answer to a leading question — always a dangerous experiment with Arabs.

It is earnestly to be hoped that some means may shortly be found, to attempt at least the examination and reconcilement of these and the like contradictory statements and inferences. G.

**ZEPH'ATHAH, THE VALLEY OF** (גֵּיא צְפָתָה [*watch-tower*]: ἡ φάραγξ κατὰ Βοῤῥᾶν,[a] in both MSS.; Joseph. φ. Σαφθά: *Vallis Sephatæ*). The spot in which Asa joined battle with Zerah the Ethiopian (2 Chr. xiv. 10 only). It was "at" or rather "belonging to" Mareshah (לְמָרֵשָׁה: Joseph. οὐκ ἄπωθεν). This would seem to exclude the possibility of its being, as suggested by Dr. Robinson (ii. 31), at *Tell es-Safieh* which is not less than 8 miles from *Marash*, the modern representative of Mareshah. It is not improbable that an examination of the neighborhood might reveal both spot and name. Considering the enormous number of the combatants, the valley must be an extensive one. G.

• Mareshah has not been identified by name, but

[a] Probably reading צְפֹרָה. It will be observed that Josephus here forsakes the LXX. for the Hebrew text.

Digitized by Google

is probably marked by "the foundations on the southeastern part of the remarkable *Tell*" south of *Beit Jibrîn* (Robinson). There is a deep valley which runs past the *Tell* down to *Beit Jibrîn* and thence into the plain of Philistia. Mr. Porter suggests (if *Tell es-Sâfieh* be too far from the supposed site of Mareshah) that this valley may be Zephathah (Kitto, *Cycl. of Bibl. Lit.*, iii. 1156). H.

**ZE'PHI** (צְפִי [*watch-tower*]: Σωφάρ: *Sephi*), 1 Chr. i. 36. [ZEPHO]

**ZE'PHO** (צְפֹו [*watch-tower*]: Σωφάρ: *Sephu*). A son of Eliphaz son of Esau (Gen. xxxvi. 11), and one of the "dukes," or phylarchs, of the Edomites (ver. 15). In 1 Chr. i. 36 he is called ZEPHI. E. S. P.

**ZE'PHON** (צְפוֹן [*a looking out*]: Σαφών; Alex. omits: *Sephon*). ZIPHION the son of Gad (Num. xxvi. 15), and ancestor of the family of the ZEPHONITES.

**ZE'PHONITES, THE** (הַצְּפֹנִי [patr.]: ὁ Σαφωνί [Vat. -νει]: *Sephonites*). A branch of the tribe of Gad, descended from Zephon or Ziphion (Num. xxvi. 15).

**ZER** (צֹר [*flint*]: Τύρος: *Ser*). One of the fortified towns of the allotment of Naphtali (Josh. xix. 35 only). From the names which succeed it in the list it may be inferred that it was in the neighborhood of the S. W. side of the Lake of Gennesareth. The versions of the LXX. and of the Peshito, both of this name and that which precedes it, are grounded on an obvious mistake. Neither of them has anything to do with Tyre or Zidon.

Ziddim may possibly be identified with *Hattîn*; but no name resembling Tsêr appears to have been yet discovered in the neighborhood of Tiberias. G.

**ZE'RAH** (זֶרַח [*rising, origin*]: Ζαρά, [Ζαρέ:] *Zara*, [*Zare*]). A son of Reuel son of Esau (Gen. xxxvi. 13; 1 Chr. i. 37), and one of the "dukes," or phylarchs, of the Edomites (Gen. xxxvi. 17). Jobab of Bozrah, one of the early kings of Edom, perhaps belonged to his family (xxxvi. 33; 1 Chr. i. 44). E. S. P.

**ZE'RAH**, less properly, **ZA'RAH** (זָרַח, with the pause accent, זֶרַח [*rising*]: Ζαρά; [in 1 Chr. ix. 6, Vat. Ζαρας:] *Zara*). Twin son with his elder brother Pharez of Judah and Tamar (Gen. xxxviii. 30; 1 Chr. ii. 6; Matt. i. 3). His descendants were called Zarhites, Ezrahites, and Izrahites (Num. xxvi. 20; 1 K. iv. 31; 1 Chr. xxvii. 8, 11), and continued at least down to the time of Zerubbabel (1 Chr. ix. 7; Neh. xi. 24). Nothing is related of Zerah individually, beyond the peculiar circumstances of his birth (Gen. xxxviii. 27–30), concerning which see Heidegg. *Hist. Patriarch.* xviii. 28. A. C. H.

2. (Ζαρέ; Alex. Ζαρας: *Zara*.) Son of Simeon (1 Chr. iv. 24), called ZOHAR in Gen. xlvi. 10.

3. (Ζαρά [Vat. Ιααρα], Ζααρα; Alex. Ζαρα, Ἀζαριας.) A Gershonite Levite, son of Iddo or Adaiah (1 Chr. vi. 21, 41 [Heb. vi. 26]).

4. (זֶרַח: Ζαρέ: *Zerah*.) The Ethiopian or Cushite, הַכּוּשִׁי, an invader of Judah, defeated by Asa [2 Chr. xiv. 9].

1. In its form the name is identical with the Hebrew proper name above. It has been supposed to represent the Egyptian USARKEN, possibly pronounced USARCHEN, a name almost certainly of Shemitic origin [SHISHAK, ii. 1289]. The difference is great, but may be partly accounted for, if we suppose that the Egyptian deviates from the original Shemitic form, and that the Hebrew represents that form, or that a further deviation than would have been made was the result of the similarity of the Hebrew proper name Zerah. So, סוא, even if pronounced SEWA, or SEVA, is more remote from SHEBEK or SHEBETEK than Zerah from USARKEN. It may be conjectured that these forms resemble those of Memphis, Moph, Noph, which evidently represent current pronunciation, probably of Shemites.

2. The war between Asa and Zerah appears to have taken place soon after the 10th, and shortly before the 15th year of Asa, probably late in the 14th, as we shall see in examining the narrative. It therefore occurred in about the same year of Usarken II., fourth king of the XXIId dynasty, who began to reign about the same time as the king of Judah. Asa's reign, as far as the 14th year inclusive, was B. C. cir. 953–940, or, if Manasseh's reign be reckoned of 55 years, 933–920. [SHISHAK, pp. 3010 ff.]

3. The first ten years of Asa's reign were undisturbed by war. Then Asa took counsel with his subjects, and walled and fortified the cities of Judah. He also maintained an army of 580,000 men, 300,000 spearmen of Judah, and 280,000 archers of Benjamin. This great force was probably the whole number of men able to bear arms (2 Chr. xiv. 1–8). At length, probably in the 14th year of Asa, the anticipated danger came. Zerah, the Ethiopian, with a mighty army of a million, Cushim and Lubim, with three hundred chariots, invaded the kingdom, and advanced unopposed in the field as far as Mareshah. As the invaders afterwards retreated by way of Gerar, and Mareshah lay on the west of the hill-country of Judah, where it rises out of the Philistine plain, in the line of march from Egypt to Jerusalem, it cannot be doubted that they came out of Egypt. Between the border on the side of Gerar and Mareshah, lay no important city but Gath. Gath and Mareshah were both fortified by Rehoboam before the invasion of Shishak (xi. 8), and were no doubt captured and probably dismantled by that king (comp. xii. 4), whose list of conquered towns, etc., shows that he not only took some strong towns, but that he subdued the country in detail. A delay in the capture of Gath, where the warlike Philistines may have opposed a stubborn resistance, would have removed the only obstacle on the way to Mareshah, thus securing the retreat that was afterwards made by this route. From Mareshah, or its immediate neighborhood, was a route to Jerusalem, presenting no difficulties but those of a hilly country; for not one important town is known to have lain between the capital and this outpost of the tribe of Judah. The invading army had swarmed across the border and devoured the Philistine fields before Asa could march to meet it. The distance from Gerar or the southwestern border of Palestine, to Mareshah, was not much greater than from Mareshah to Jerusalem, and considering the nature of the tracts, would have taken about the same time to traverse and only such delay as would have been caused by

Digitized by Google

the sieges of Gath and Mareshah could have enabled Asa hastily to collect a levy and march to relieve the beleaguered town, or hold the passes. "In the Valley of Zephathah at Mareshah," the two armies met. We cannot perfectly determine the site of the battle. Mareshah, according to the *Onomasticon*, lay within two miles of Eleutheropolis, and Dr. Robinson has reasonably conjectured its position to be marked by a remarkable "tell," or artificial mound, a mile and a half south of the site of the latter town. Its signification, "that which is at the head," would scarcely suit a position at the opening of a valley. But it seems that a narrow valley terminates, and a broad one commences at the supposed site. The Valley of Zephathah, "the watch-tower," is supposed by Dr. Robinson to be the latter, a broad wady, descending from Eleutheropolis in a northwesterly direction towards *Tell es-Sâfieh*, in which last name he is disposed to trace the old appellation (*Bibl. Res.* ii. 31). The two have no connection whatever, and Robinson's conjecture is extremely hazardous. If this identification be correct, we must suppose that Zerah retired from before Mareshah towards the plain, that he might use his "chariots and horsemen" with effect, instead of entangling them in the narrow valleys leading towards Jerusalem. From the prayer of Asa we may judge that, when he came upon the invading army, he saw its hugeness, and so that, as he descended through a valley, it lay spread out beneath him. The Egyptian monuments enable us to picture the general disposition of Zerah's army. The chariots formed the first corps in a single or double line; behind them, massed in phalanxes, were heavy armed troops; probably on the flanks stood archers and horsemen in lighter formations. Asa, marching down a valley, must have attacked in a heavy column; for none but the most highly disciplined troops can form line from column in the face of an enemy. His spearmen of Judah would have composed this column: each bank of the valley would have been occupied by the Benjamite archers, like those who came to David, "helpers of the war, armed with bows, and [who] could use both the right hand and the left in [hurling] stones and [shooting] arrows out of a bow" (1 Chr. xii. 1, 2). No doubt the Ethiopian, confident in his numbers, disdained to attack the Hebrews or clear the heights, but waited in the broad valley, or the plain. Asa's prayer before the battle is full of the noble faith of the age of the Judges: "Lord [it is] alike to Thee to help, whether the strong or the weak: help us, O Lord our God; for we rest on Thee, and in Thy name we go against the multitude. O Lord, Thou [art] our God; let not man prevail against Thee." From the account of Abijah's defeat of Jeroboam, we may suppose that the priests sounded their trumpets, and the men of Judah descended with a shout (2 Chr. xiii. 14, 15). The hills and mountains were the favorite camping-places of the Hebrews, who usually rushed down upon their more numerous or better-disciplined enemies in the plains and valleys. If the battle were deliberately set in array, it would have begun early in the morning, according to the usual practice of these times, when there was not a night surprise, as when Goliath challenged the Israelites (1 Sam. xvii. 20–23), and when Thothmes III. fought the Canaanites at Megiddo, and as we may judge from the long pursuits at this period, the sun would have been in the eyes of the army of Zerah, and its archers would have been thus useless. The chariots, broken by the charge and with horses made unmanageable by flights of arrows, must have been forced back upon the cumbrous host behind. "So the Lord smote the Ethiopians before Asa, and before Judah; and the Ethiopians fled. And Asa and the people that [were] with him pursued them unto Gerar: and [or "for"] the Ethiopians were overthrown, that they could not recover themselves." This last clause seems to relate to an irremediable overthrow at the first; and, indeed, had it not been so, the pursuit would not have been carried, and, as it seems at once, beyond the frontier. So complete was the overthrow, that the Hebrews could capture and spoil the cities around Gerar, which must have been in alliance with Zerah. From these cities they took very much spoil, and they also smote "the tents of cattle, and carried away sheep and camels in abundance" (2 Chr. xiv. 9–15). More seems to have been captured from the Arabs, than from the army of Zerah: probably the army consisted of a nucleus of regular troops, and a great body of tributaries, who would have scattered in all directions, leaving their country open to reprisals. On his return to Jerusalem, Asa was met by Azariah, who exhorted him and the people to be faithful to God. Accordingly Asa made a second reformation, and collected his subjects at Jerusalem in the 3d month of the 16th year, and made a covenant, and offered of the spoil "seven hundred oxen and seven thousand sheep" (xv. 1–15). From this it would appear that the battle was fought in the preceding winter. The success of Asa, and the manifest blessing that attended him, drew to him Ephraimites, Manassites, and Simeonites. His father had already captured cities in the Israelite territory (xiii. 19), and he held cities in Mount Ephraim (xv. 8), and then was at peace with Israel. Simeon, always at the mercy of a powerful king of Judah, would have naturally turned to him. Never was the house of David stronger after the defection of the ten tribes; but soon the king fell into the wicked error, so constantly to be repeated, of calling the heathen to aid him against the kindred Israelites, and hired Benhadad, king of Syria-Damascus, to lay their cities waste, when Hanani the prophet recalled to him the great victory he had achieved when he trusted in God (xvi. 1–9). The after years of Asa were troubled with wars (ver. 9); but they were with Baasha (1 K. xv. 16, 32). Zerah and his people had been too signally crushed to attack him again.

4. The identification of Zerah has occasioned some difference of opinion. He has been thought to have been a Cushite of Arabia, or a Cushite of Ethiopia above Egypt. But lately it has been supposed that Zerah is the Hebrew name of Usarken I., second king of the Egyptian XXIId dynasty; or perhaps more probably Usarken II., his second successor. This question is a wider one than seems at first sight. We have to inquire whether the army of Zerah was that of an Egyptian king, and, if the reply be affirmative, whether it was led by either Usarken I. or II.

The war of Shishak had reduced the angle of Arabia that divided Egypt from Palestine. Probably Shishak was unable to attack the Assyrians, and endeavored, by securing this tract, to guard the approach to Egypt. If the army of Zerah were Egyptian, this would account for its connection with the people of Gerar and the pastoral tribes of

Digitized by Google

the neighborhood. The sudden decline of the power of Egypt after the reign of Shishak would be explained by the overthrow of the Egyptian army about thirty years later.

The composition of the army of Zerah, of Cushim and Lubim (2 Chr. xvi. 8), closely resembles that of Shishak, of Lubim, Sukkiim, and Cushim (xii. 3): both armies also had chariots and horsemen (xvi. 8, xii. 3). The Cushim might have been of an Asiatic Cush, but the Lubim can only have been Africans. The army, therefore, must have been of a king of Egypt, or Ethiopia above Egypt. The uncertainty is removed by our finding that the kings of the XXIId dynasty employed mercenaries of the MASHUWASHA, a Libyan tribe, which apparently supplied the most important part of their hired force. The army, moreover, as consisting partly, if not wholly, of a mercenary force, and with chariots and horsemen, is, save in the horsemen, exactly what the Egyptian army of the empire would have been, with the one change of the increased importance given to the mercenaries, that we know to have marked it under the XXIId dynasty. [SHISHAK, p. 3012.] That the army was of an Egyptian king therefore cannot be doubted.

As to the identification of Zerah with an Usarken, we speak diffidently. That he is called a Cushite must be compared with the occurrence of the name NAMURET, Nimrod, in the line of the Usarkens, but that line seems rather to have been of eastern than of western Ethiopians (see, however, SHISHAK, p. 3012). The name Usarken has been thought to be Sargon [SHISHAK, *l. c.*], in which case it is unlikely, but not impossible, that another Hebrew or Shemitic name should have been adopted to represent the Egyptian form. On the other hand, the kings of the XXIId dynasty were of a warlike family, and their sons constantly held military commands. It is unlikely that an important army would have been intrusted to any but a king or prince. Usarken is less remote from Zerah than seems at first sight, and, according to our computation, Zerah might have been Usarken II., but according to Dr. Hincks's, Usarken I.

5. The defeat of the Egyptian army by Asa is without parallel in the history of the Jews. On no other occasion did an Israelite army meet an army of one of the great powers on either side and defeat it. Shishak was unopposed, Sennacherib was not met in the field, Necho was so met and overthrew Josiah's army, Nebuchadnezzar, like Shishak, was only delayed by fortifications. The defeat of Zerah thus is a solitary instance, more of the power of faith than of the bravery of the Hebrews, a single witness that the God of Israel was still the same who had led his people through the Red Sea, and would give them the same aid if they trusted in Him. We have, indeed, no distinct statement that the defeat of Zerah was a miracle, but we have proof enough that God providentially enabled the Hebrews to vanquish a force greater in number, stronger in the appliances of war, with horsemen and chariots, more accurate in discipline, no raw levies hastily equipped from the king's armory, but a seasoned standing militia, strengthened and more terrible by the addition of swarms of hungry Arabs, bred to war, and whose whole life was a time of pillage. This great deliverance is one of the many proofs that God is to his people ever the same, whether He bids them stand still and behold his salvation, or nerves them with that courage that has wrought great things in his name in our later age: thus it bridges over a chasm between two periods outwardly unlike, and bids us see in history the immutability of the Divine actions. R. S. P.

**ZERAHI'AH** (זְרַחְיָה [*Jehovah caused to spring forth*]: Ζαραΐα, Ζαραΐα, Ζαραΐα; Alex. Ζαραιας, Ζαραϊ, Ζαραΐα: *Zaraïas, Zarahia*). A priest, son of Uzzi, and ancestor of Ezra the scribe (1 Chr. vi. 6, 51 [Heb. v. 32, vi. 36]; Ezr. vii. 4 [where the A. V. ed. 1611 reads ZERAIAH]).

2. (Ζαραΐα; [Vat. Ζαραια;] Alex. Ζαραια: *Zareke.*) Father of Elioenai of the sons of Pahath Moab (Ezr. viii. 4): called ZARAIAS in 1 Esdr. viii. 31.

* **ZERA'IAH** (3 syl.), Ezr. vii. 4 (A. V. ed. 1611). [ZERAHIAH 1.]

**ZE'RED** (זֶרֶד [*dense forest*]: [Rom.] Ζαρέδ, [Vat.] Ζαρερ, [Alex. Ζαρε, Ζαρερ:] *Zared*). The name of a brook or valley running into the Dead Sea near its S. E. corner, which Dr. Robinson (*Bibl. Res.* ii. 157) with some probability suggests as identical with the *Wady el-Ahsy*. It lay between Moab and Edom, and is the limit of the proper term of the Israelites' wandering (Deut. ii. 14). Laborde, arguing from the distance, thinks that the source of the *Wady Ghurundel* in the Arabah is the site; as from Mount Hor to *el-Ahsy* is by way of Ezion-geber 65 leagues, in which only four stages occur: a rate of progress quite beyond their power. This argument, however, is feeble, since it is clear that the march-stations mentioned indicate not daily stages, but more permanent encampments. He also thinks the palm-trees of *Wady G.* would have attracted notice, and that *Wady Jethum* (*el-Ithm*) could not have been the way consistently with the precept of Deut. ii. 3. The camping station in the catalogue of Num. xxiii., which corresponds to the "pitching in the valley of Zared" of xxi. 12, is probably Dibon-Gad, as it stands next to Ije-Abarim; compare Num. xxxiii. 44, 45 with xxi. 12. The *Wady el-Ahsy* forms the boundary between the districts of *Jebal* and *Kerek*. The stream runs in a very deep ravine and contains a hot spring which the Arabs call the "Bath of Solomon, son of David" (Irby, May 29). [ZARED.]

The Jewish interpreters translate the name in the first case "osiers," and in the second "baskets" (Targum Pseudojonathan), which recalls the "brook of the willows" of Isaiah (xv. 7). The name *Sefsaf* (willow) is attached to the valley which runs down from *Kerak* to the Dead Sea; but this appears to be too far north for the Zered. [WILLOWS, BROOK OF THE.] H. H.

**ZERE'DA** (צְרֵדָה, i. e. the Tsarêdâh, with the *def.* article [*cooling*]: ἡ Σαρίρα [Vat. -ρει-]; Alex. ἡ Σαρεδα: *Sareda*). The native place, according to the present Hebrew text, of Jeroboam, the leader of the revolt of the northern tribes, and the first king of the "Kingdom of Israel." It occurs in 1 K. xi. 26 only. The LXX. (in the Vatican Codex) for Zereda substitute Sareira, as will be seen above. This is not in itself remarkable, since it is but an instance of the exchange of *r* and *d*, which is so often observed both in the LXX. and Syriac Versions, and which has not impossibly taken place in the Hebrew text itself of Judg. vii. 22, where the name Zererah appears attached to a place which is perhaps else

Digitized by Google

where called Zeredathah. But it is more remarkable that in the long addition to the history of Jeroboam which these translators insert between 1 K. xii. 24 and 25 of the Hebrew text, Sarira is frequently mentioned. In strong contrast to the merely casual mention of it in the Hebrew narrative as Jeroboam's native place, it is elevated in the narrative of the LXX. into great prominence, and becomes in fact the most important and, it may naturally be presumed, the most impregnable fortress of Ephraim. It there appears as the town which Jeroboam fortified for Solomon in Mount Ephraim; thither he repairs on his return from Egypt; there he assembles the tribe of Ephraim, and there he builds a fortress. Of its position nothing is said except that it was "in Mount Ephraim," but from the nature of the case it must have been central. The LXX. further make it the residence of Jeroboam at the time of the death of his child, and they substitute it for Tirzah (not only on the single occasion on which the latter name occurs in the Hebrew of this narrative, but) three times over. No explanation has been given of this change of תִּרְצָה into צְרֵרָה. It is hardly one which would naturally occur from the corruptions either of copyists or of pronunciation. The question of the source and value of these singular additions of the LXX. has never yet been fully examined; but in the words of Dean Milman (*Hist. of the Jews*, 3d ed. i. 332), "there is a circumstantialness about the incidents which gives them an air of authenticity, or rather antiquity," and which it is to be hoped will prompt some scholar to a thorough investigation.

Zeredah has been supposed to be identical with ZEBEDATIAH (2 Chr. iv. 17) and ZARTHAN or ZARTANAH. But even if the two last of these names were more similar to it than they are, there would remain the serious topographical difficulty to such an identification, that they were in the valley of the Jordan, while Zeredah was, according to the repeated statement of the LXX., on Mount Ephraim. If, however, the restricted statement of the Hebrew Bible be accepted, which names Zeredah merely as the native place of Jeroboam, and as not concerned in the events of his mature life, then there is no obstacle to its situation in that part of the tribe of Ephraim which lay in the Jordan Valley. G.

**ZEREDA'THAH** (צְרֵדָתָה [*cooling*]: [Vat.] Σιρδαθα; [Rom. Σαρηδαθά;] Alex. Σαδαθα: *Sareda'thai*). Named (in 2 Chr. iv. 17 only) in specifying the situation of the foundries for the brass-work of Solomon's Temple. In the parallel passage in 1 K. vii. 46, ZARTHAN occupies the place of Zeredathah, the rest of the sentence being literally the same; but whether the one name is merely an accidental variation of the other, or whether, as there is some ground for believing, there is a connection between Zeredah, Zeredathah, Zererah, and Zarthan, we have now no means of determining. It should be observed that Zeredah has in the original the definite article prefixed to it, which is not the case with either Zeredathah or Zerera. G.

**ZER'ERATH** (צְרֵרָה," *i. e.* Tsererah: Ταγαραγαθά;[b] Alex. και συνηγμενη: Vulg. omits). A place named only in Judg. vii. 22, in describing the flight of the Midianite host before Gideon. The A. V. has somewhat unnecessarily added to the original obscurity of the passage, which runs as follows: "And the host fled into Beth hashittah to Zererah,[c] unto the brink of Abel-meholah upon Tabbath" — apparently describing the two lines of flight taken by the two portions of the horde.

It is natural to presume that Zererah is the same name as Zeredathah.[d] They both appear to have been in the Jordan Valley, and as to the difference in the names, the termination is insignificant, and the exchange of ד and ר is of constant occurrence. Zeredathah, again, appears to be equivalent to Zarthan.

It is also difficult not to suppose that Zererah is the same place with the Sarira which the LXX. present as the equivalent of Zereda and of Tirzah. But in the way of this there is the difficulty which has been pointed out under Zereda, that the two last-named places appear to have been in the highlands of Ephraim, while Zererah and Zeredathah were in the Jordan Valley. G.

**ZE'RESH** (זֶרֶשׁ [Pers. *gold*]: Ζωσαρα; [Alex.] Ζωσαρα; Joseph. Ζάρας: *Zares*). The wife of Haman the Agagite (Esth. v. 10, 14, vi. 13), who counselled him to prepare the gallows for Mordecai, but predicted her husband's ruin as soon as she knew that Mordecai was a Jew. A. C. H.

**ZE'RETH** (צֶרֶת [perh. *splendor*]: Σαρεθ; [Vat. Αρεθ;] Alex. Σαρεθ: *Sereth*). Son of Ashur the founder of Tekoa, by his wife Helah (1 Chr. iv. 7).

**ZE'RI** (צֵרִי [patr., JEZER]: Σουρι [Vat. -ρει]: *Sori*). One of the sons of Jeduthun in the reign of David (1 Chr. xxv. 3). In ver. 11 he is called IZRI.

**ZE'ROR** (צְרוֹר [*pebble*]: Ιαρέδ; Alex. Αρεδ: [Comp. Σαρόρ:] *Seror*). A Benjamite, ancestor of Kish the father of Saul (1 Sam. ix. 1).

**ZERU'AH** (צְרוּעָה [*leprous*]: [Rom.] Vat. omit; Alex. Σαρουα: *Sarua*). The mother of Jeroboam the son of Nebat (1 K. xi. 26). In the additional narrative of the LXX. inserted after 1 K. xii. 24, she is called Sarira (a corruption of Zereda), and is said to have been a harlot.

**ZERUB'BABEL** (זְרֻבָּבֶל, *dispersed*, or

---

[a] The *th* terminating the name in the A. V. is the Hebrew mode of connecting it with the particle of motion: Zererathah, *i. e.* to Zererah.

[b] The Τα at the commencement of this barbarous word no doubt belongs to the preceding name, Beth-shittah; and they should be divided as follows, Βαιθσεττα Ταγαραγαθα. The Vatican Codex appears to be the only MS. which retains any trace of the name. The others quoted by Holmes and Parsons either substitute σως σαθ σους for it, or exhibit some variation of the words quoted above from the Alex. MS. The Vulgate entirely omits the name.

[c] Or possibly the two first of these four names should be joined, Beth-hac-shittah-Zererathah.

[d] Zererah appears in Judg. vii. 22, צְרֵרָתָה, with the particle of motion attached, which is all but identical with צְרֵדָתָה, Zeredathah.

*begotten, in Babylon:* Ζοροβάβελ: *Serubabel*). The head of the tribe of Judah at the time of the return from the Babylonish Captivity in the first year of Cyrus. His exact parentage is a little obscure, from his being always called the son of Shealtiel (Ezr iii. 2, 8, v. 2, &c.; Hag. i. 1, 12, 14, &c.), and appearing as such in the genealogies (Matt. i. 12; Luke iii. 27), whereas in 1 Chr. iii. 19, he is represented as the son of Pedaiah, Shealtiel or Salathiel's brother, and consequently as Salathiel's nephew. Probably the genealogy in 1 Chr. exhibits his true parentage, and he succeeded his uncle as head of the house of Judah — a supposition which tallies with the facts that Salathiel appears as the first-born, and that no children are assigned to him.

There are two histories of Zerubbabel: the one, that contained in the canonical Scriptures: the other, that in the apocryphal books and Josephus.

The history of Zerubbabel in the Scriptures is as follows: In the first year of Cyrus he was living at Babylon, and was the recognized prince (נָשִׂיא) of Judah in the Captivity, what in later times was called רֹאשׁ הַגּוֹלָה or רֵישָׁתָא (Rhesa), "the Prince of the Captivity," or "the Prince." On the issuing of Cyrus's decree he immediately availed himself of it, and placed himself at the head of those of his countrymen "whose spirit God had raised to go up to build the House of the Lord which is in Jerusalem." It is probable that he was in the king of Babylon's service, both from his having, like Daniel and the three children, received a Chaldee name [SHESHBAZZAR], and from his receiving from Cyrus the office of governor (פַּחַת) of Judæa. The restoration of the sacred vessels, which Nebuchadnezzar had brought from the Temple, having been effected, and copious presents of silver and gold, and goods, and beasts, having been bestowed upon the captives, Zerubbabel went forth at the head of the returning colony, accompanied by Jeshua the high-priest, and perhaps by the prophets Haggai and Zechariah, and a considerable number of priests, Levites, and heads of houses of Judah and Benjamin with their followers. On arriving at Jerusalem, Zerubbabel's first care was to build the altar on its old site, and to restore the daily sacrifice. [JESHUA.] Perhaps also they kept the Feast of Tabernacles, as it is said they did in Ezr. iii. 4: but there is some reason to suspect that vv. 4, 5, and the first half of ver. 6, are interpolated, and are merely an epitome of Neh. viii., which belongs to very different times. [EZRA, BOOK OF; NEHEMIAH, BOOK OF.] But his great work, which he set about immediately, was the rebuilding of the Temple. Being armed with a grant from Cyrus of timber and stone for the building, and of money for the expenses of the builders (Ezr. vi. 4), he had collected the materials, including cedar-trees brought from Lebanon to Joppa, according to the precedent in the time of Solomon (2 Chr. ii. 16), and got together masons and carpenters to do the work, by the opening of the second year of their return to Jerusalem. And accordingly, in the second month of the second year of their return, the foundation of the Temple was laid with all the pomp which they could command: the priests in their vestments with trumpets, and the sons of Asaph with cymbals, singing the very same psalm of praise for God's unfailing mercy to Israel which was sung when Solomon dedicated his Temple (2 Chr. v. 11–14); while the people responded with a great shout of joy, "because the foundation of the house of the Lord was laid." How strange must have been the emotions of Zerubbabel at this moment! As he stood upon Mount Zion, and beheld from its summit the desolations of Jerusalem, the site of the Temple blank, David's palace a heap of ashes, his fathers' sepulchres defiled and overlaid with rubbish, and the silence of desertion and emptiness hanging oppressively over the streets and waste places of what was once the joyous city; and then remembered how his great ancestor David had brought up the ark in triumph to the very spot where he was then standing, how Solomon had reigned there in all his magnificence and power, and how the petty kings and potentates of the neighboring nations had been his vassals and tributaries, how must his heart alternately have swelled with pride, and throbbed with anguish, and sunk in humiliation! In the midst of these mighty memories he was but the officer of a foreign heathen despot, the head of a feeble remnant of half-emancipated slaves, the captain of a band hardly able to hold up their heads in the presence of their hostile and jealous neighbors; and yet there he was, the son of David, the heir of great and mysterious promises, returned by a wonderful Providence to the home of his ancestors. At his bidding the daily sacrifice had been restored after a cessation of half a century, and now the foundations of the Temple were actually laid, amidst the songs of the Levites singing according to David's ordinance, and the shouts of the tribe of Judah. It was a heart-stirring situation; and, despite all the discouragements attending it, we cannot doubt that Zerubbabel's faith and hope were kindled by it into fresh life.

But there were many hindrances and delays to be encountered before the work was finished. The Samaritans or Cutheans put in a claim to join with the Jews in rebuilding the Temple; and when Zerubbabel and his companions refused to admit them into partnership, they tried to hinder them from building, and hired counsellors to frustrate their purpose. They probably contrived, in the first instance, to intercept the supplies of timber and stone, and the wages of the workmen, which were paid out of the king's revenue, and then by misrepresentation to calumniate them at the court of Persia. Thus they were successful in putting a stop to the work during the seven remaining years of the reign of Cyrus, and through the eight years of Cambyses and Smerdis. Nor does Zerubbabel appear quite blameless for this long delay. The difficulties in the way of building the Temple were not such as need have stopped the work: and during this long suspension of sixteen years Zerubbabel and the rest of the people had been busy in building costly houses for themselves, and one might even suspect that the cedar-wood which had been brought for the Temple had been used to decorate private dwellings (comp. the use of סְפוּנִים in Hag. i. 4, and 1 K. vii. 3, 7). They had, in fact, ceased to care for the desolation of the Temple (Hag. i. 2–4), and had not noticed that God was rebuking their lukewarmness by withholding his blessing from their labors (Hag. i. 5–11). But in the second year of Darius light dawned upon the darkness of the colony from Babylon. In that year — it was the most memorable event in Zerubbabel's life — the spirit of prophecy suddenly blazed up with a most brilliant light amongst the returned

Digitized by Google

captives; and the long silence which was to ensue till the ministry of John the Baptist was preceded by the stirring utterances of Haggai and Zechariah. Their words fell like sparks upon tinder. In a moment Zerubbabel, roused from his apathy, threw his whole strength into the work, zealously seconded by Jeshua and all the people. [JESHUA.] Undeterred by a fresh attempt of their enemies to hinder the progress of the building, they went on with the work even while a reference was being made to Darius; and when, after the original decree of Cyrus had been found at Ecbatana, a most gracious and favorable decree was issued by Darius, enjoining Tatnai and Shetharboznai to assist the Jews with whatsoever they had need of at the king's expense, the work advanced so rapidly that on the third day of the month Adar, in the sixth year of Darius, the Temple was finished, and was forthwith dedicated with much pomp and rejoicing. It is difficult to calculate how great was the effect of the prophecies of Haggai and Zechariah in sustaining the courage and energy of Zerubbabel in carrying his work to completion. Addressed, as many of them were, directly to Zerubbabel by name, speaking, as they did, most glorious things of the Temple which he was building, conveying to Zerubbabel himself extraordinary assurances of Divine favor, and coupling with them magnificent and consolatory predictions of the future glory of Jerusalem and Judah, and of the conversion of the Gentiles, they necessarily exercised an immense influence upon his mind (Hag. i. 13, 14, ii. 4–9, 21–23; Zech. iv. 6–10, viii. 3–8, 9, 18–23). It is not too much to say that these prophecies upon Zerubbabel were the immediate instrument by which the church and commonwealth of Judah were preserved from destruction, and received a life which endured till the coming of Christ.

The only other works of Zerubbabel which we learn from the Scripture history are the restoration of the courses of priests and Levites, and of the provision for their maintenance, according to the institution of David (Ezr. vi. 18; Neh. xii. 47); the registering the returned captives according to their genealogies (Neh. vii. 5); and the keeping of a Passover in the seventh year of Darius, with which last event ends all that we know of the life of Zerubbabel the son of Shealtiel: a man inferior to few of the great characters of Scripture, whether we consider the perilous undertaking to which he devoted himself, the importance, in the economy of the Divine government, of his work, his courageous faith, or the singular distinction of being the object of so many and such remarkable prophetic utterances.

The apocryphal history of Zerubbabel, which, as usual, Josephus follows, may be summed up in a few words. The story told in 1 Esdr. iii.–vii. is, that on the occasion of a great feast made by Darius on his accession, three young men of his body-guard had a contest who should write the wisest sentence. That one of the three (Zerubbabel) writing "Women are strongest, but above all things Truth beareth away the victory;" and afterwards defending his sentence with much eloquence, was declared by acclamation[a] to be the wisest, and claimed for his reward, at the king's hand, that the king should perform his vow which he had vowed to rebuild Jerusalem and the Temple. Upon which the king gave him letters to all his treasurers and governors on the other side the river, with grants of money and exemption from taxes, and sent him to rebuild Jerusalem and the Temple, accompanied by the families of which the list is given in Ezr. ii., Neh. vii.; and then follows, in utter confusion, the history of Zerubbabel as given in Scripture. Apparently, too, the compiler did not perceive that Sanabassar[b] (Sheshbazzar) was the same person as Zerubbabel. Josephus, indeed, seems to identify Sheshbazzar with Zerubbabel, and tries to reconcile the story in 1 Esdr. by saying, "Now it so fell out that about this time Zorobabel, who had been made governor of the Jews that had been in captivity, came to Darius from Jerusalem, for there had been an old friendship between him and the king," etc. (*Ant.* xi. 3). But it is obvious on the face of it that this is simply Josephus's invention to reconcile 1 Esdr. with the canonical Ezra. [ESDRAS, FIRST BOOK OF.] Josephus has also another story (*Ant.* xi. 4, § 9) which is not found in 1 Esdr., of Zorobabel going on an embassy to Darius to accuse the Samaritan governors and hipparchs of withholding from the Jews the grants made by Darius out of the royal treasury, for the offering of sacrifices and other Temple expenses, and of his obtaining a decree from the king commanding his officers in Samaria to supply the high-priest with all that he required. But that this is not authentic history seems pretty certain from the names of the governors, *Sambabas* being an imitation or corruption of *Sanballat*, *Tanganes* of *Tatnai* (or Thauthansi, as in LXX.), *Sadraces* of Sathrabouzanes, confused with *Shadrach*, *Bobelo* of Zoro-babel; and the names of the ambassadors, which are manifestly copied from the list in 1 Esdr. v. 8, where Zorobabel, Enenius, and Mardochæus, correspond to Zorobabel, Ananias, and Mardochæus of Josephus. Moreover the letter or decree of Darius, as given by Josephus, is as manifestly copied from the decree of Darius in Ezr. vi. 6–10. In all probability, therefore, the document used by Josephus was one of those numerous apocryphal religious romances which the Hellenistic Jews were so fond of about the 4th and 3d century before Christ, and was written partly to explain Zorobabel's presence at the court of Darius, as spoken of in 1 Esdr., partly to explain that of Mordecai at the court of Ahasuerus, though he was in the list of those who were Zorobabel's companions (as it seemed), and partly to give an opportunity for reviling and humiliating the Samaritans. It also gratified the favorite taste for embellishing, and corroborating, and giving, as was thought, additional probability to the Scripture narrative, and dwelling upon bygone times of Jewish triumphs. [ESTHER, BOOK OF.]

It only remains to notice Zerubbabel's place in the genealogy of Christ. It has already been observed that in the genealogies Matt i. 12, and Luke iii. 27, he is represented as son of Salathiel, though the book of Chronicles tells us he was the son of Pedaiah, and nephew of Salathiel. It is of more moment to remark that, while St. Matthew deduces his line from Jechonias and Solomon, St. Luke deduces it through Neri and Nathan. Here then we have the head of the nation, the Prince of

[a] With the shout, "Magna est veritas, et prævalebit!"

[b] Σανασσάρ is merely a corruption of Σασσαβασσάρ

Digitized by Google

Judah, the foremost man of his country, with a double genealogy, one representing him as descending from all the kings of Judah, the other as the descendant indeed of David, but through a long line of private and unknown persons. We find him, too, filling the position of Prince of Judah at a time when, as far as the history informs us, the royal family was utterly extinct. And though, if descended from the last king, he would have been his grandson, neither the history, nor the contemporary prophets, nor Josephus, nor the apocryphal books, give the least hint of his being a near relative of Jeconiah, while at the same time the natural interpretation of Jer. xxii. 30 shows Jeconiah to have been childless. The inference from all this is obvious. Zerubbabel was the legal successor and heir of Jeconiah's royal estate, the grandson of Neri, and the lineal descendant of Nathan the son of David. [SALATHIEL; GENEALOGY OF CHRIST. For Zerubbabel's descendants see HANANIAH 8.]

In the N. T. the name appears in the Greek form of ZOROBABEL. A. C. H.

**ZERUI'AH** (צְרוּיָה, and once [a] צְרוּיָת: Σαρουία; [Alex. 1 Sam. xxvi. 6, Σαρουεια:] *Servi*). A woman who, as long as the Jewish records are read, will be known as the mother of the three leading heroes of David's army — Abishai, Joab, and Asahel — the "sons of Zeruiah." She and Abigail are specified in the genealogy of David's family in 1 Chr. ii. 13–17 as "sisters of the sons of Jesse" (ver. 16; comp. Joseph. *Ant.* vii. 10, § 1). The expression is in itself enough to raise a suspicion that she was not a daughter of Jesse, a suspicion which is corroborated by the statement of 2 Sam. xvii. 25, that Abigail was the daughter of Nahash. Abigail being apparently the younger of the two women, it is a probable inference that they were both the daughters of Nahash, but whether this Nahash be — as Professor Stanley has ingeniously conjectured — the king of the Ammonites, and the former husband of Jesse's wife, or some other person unknown, must forever remain a mere conjecture. [DAVID, vol. i. p. 552.] Other explanations are given under NAHASH, vol. iii. p. 2053 f. Her relation to Jesse (in the original Ishai) is expressed in the name of her son Abishai.

Of Zeruiah's husband there is no mention in the Bible. Josephus (*Ant.* vii. 1, § 3) explicitly states his name to have been Souri (Σουρί), but no corroboration of the statement appears to have been discovered in the Jewish traditions, nor does Josephus himself refer to it again. The mother of such remarkable sons must herself have been a remarkable woman, and this may account for the fact, unusual if not unique, that the family is always called after her, and that her husband's name has not been considered worthy of preservation in the sacred records. G.

**ZETHAM** (זֵתָם [perh. *olive-tree*]: Ζηθάν [Vat. Ζεθομ], Ζεθάμ; Alex. Ζαιθομ, Ζοθομ: *Zetham, Zethan*). The son of Laadan, a Gershonite Levite (1 Chr. xxiii. 8). In 1 Chr. xxvi. 22 he appears as the son of Jehiel, or Jehieli, and so the grandson of Laadan.

**ZETHAN** (זֵיתָן: Ζαιθάν; Alex. Ηθαν: *Zethan*). A Benjamite of the sons of Bilhan (1 Chr. vii. 10).

**ZETHAR** (זֵתַר [perh. *star*]: Ἀβαταζα. *Zethar*). One of the seven eunuchs of Ahasuerus who attended upon the king, and were commanded to bring Vashti into his presence (Esth. i. 10).

**ZI'A** (זִיעָא: Ζουί; [Comp. Ζιά:] *Zia*). One of the Gadites who dwelt in Bashan (1 Chr. v 13).

**ZI'BA** (צִיבָא, once צִבְא [b]: [Rom. Σιβά, Vat.] Σειβα; Alex. Σιβα, and in ch. xvi. [1,] 2 [b, 3, 4,] Σιββα; Joseph. Σιβάς: *Siba*). A person who plays a prominent part, though with no credit to himself, in one of the episodes of David's history (2 Sam. ix. 2–12, xvi. 1–4, xix. 17, 29). He had been a slave (עֶבֶד) of the house of Saul before the overthrow of his kingdom, and (probably at the time of the great Philistine incursion which proved so fatal to his master's family) had been set free (Joseph. *Ant.* vii. 5, § 5). The opportunities thus afforded him he had so far improved, that when first encountered in the history he is head of an establishment of fifteen sons and twenty slaves. David's reception of Mephibosheth had the effect of throwing Ziba with his whole establishment back into the state of bondage from which he had so long been free. It reduced him from being an independent landholder to the position of a mere dependent. The knowledge of this fact gives the key to the whole of his conduct towards David and towards Mephibosheth. Beyond this the writer has nothing to add to his remarks on Ziba under the head of MEPHIBOSHETH. G.

* The adverse judgment here expressed, though it may rest on a probability, strikes us as more decisive than the record warrants. In Ziba's "conduct towards David" we fail to discover evidence of anything but kindness in feeling and act. If an explanation of his course is necessary, we do not find "the key" to his supposed treachery in any derogatory service to which the king had subjected him. His relation to the survivor of the royal family that he had served, in which he retained his own servants, was a token of David's confidence in him; and we think that an Oriental of his standing, at that day or this, would regard it in the light of a responsible, honorable, remunerative trust. [MEPHIBOSHETH, Amer. ed.] S. W.

**ZIB'EON** (צִבְעוֹן [*dyed*]: Σεβεγών: *Sebeon*). Father of Anah, whose daughter Aholibamah was Esau's wife (Gen. xxxvi. 2). Although called a Hivite, he is probably the same as Zibeon the son of Seir the Horite (vv. 20, 24, 29; 1 Chr. i. 38, 40), the latter signifying "cave-dweller," and the former being the name of his tribe, for we know nothing of the race of the Troglodytes; or more probably הַחִוִּי (the Hivite), is a mistranscription for הַחֹרִי (the Horite).

Another difficulty connected with this Zibeon is, that Anah in ver. 2 is called his daughter, and in ver. 24 his son; but this difficulty appears to be easily explained by supposing that בַּת refers to Aholibamah, and not to the name next preceding it: the Samaritan, it should be observed, has בֵּן

An allusion is made to some unrecorded fact in the history of the Horites in the passage, "this [was that] Anah that found the mules in the wilderness, as he fed the asses of Zibeon his father" (Gen. xxxvi. 24). The word rendered "mules" in the A. V. is the Heb. יְמִים, perhaps the Emims or giants, as in the reading of the Sam. הָאֵימִים, and so also Onkelos and Pseudojonathan. Gesenius prefers "hot-springs," following the Vulg. rendering. Zibeon was also one of the dukes, or phylarchs, of the Horites (ver. 29). For the identification with Beeri, father of Judith the Hittite (Gen. xxvi. 34), see BEERI, and see also ANAH. E. S. P.

**ZIB'IA** (צִבְיָא [*roe*]: Ζεβιά; [Vat. Ιεβια:] *Sebia*). A Benjamite, apparently, as the text now stands, the son of Shaharaim by his wife Hodesh (1 Chr. viii. 9).

**ZIB'IAH** (צִבְיָה [*roe*]: Ζαβιά, [Vat.] Alex. Αβια: *Sebia*). A native of Beer-sheba, and mother of king Joash (2 K. xii. 1; 2 Chr. xxiv. 1).

**ZICH'RI** (זִכְרִי [*remembered, famous*]: Ζεχρεί: *Zechri*). 1. Son of Izhar the son of Kohath (Ex. vi. 21). His name is incorrectly given in modern editions of the A. V. "Zithri," though it is printed ZICHRI in the ed. of 1611.

2. (Ζαχρί [Vat. -ρει]; Alex. Ζεχρί.) A Benjamite of the sons of Shimhi (1 Chr. viii. 19).

3. (Ζεχρί [Vat. -ρει]; Alex. Ζοχρι.) A Benjamite of the sons of Shashak (1 Chr. viii. 23).

4. (Ζεχρί; [Vat. Ζαχρει.]) A Benjamite of the sons of Jeroham (1 Chr. viii. 27).

5. [Ζεχρί; Vat. Ζαχρει.] Son of Asaph, elsewhere called ZABDI and ZACCUR (1 Chr. ix. 15).

6. [Ζεχρί; Vat. Ζεχρει.] A descendant of Eliezer the son of Moses (1 Chr. xxvi. 25).

7. The father of Eliezer, the chief of the Reubenites in the reign of David (1 Chr. xxvii. 16).

8. (Ζαρί; [Vat. Ζαρει;] Alex. Ζαχρι.) Of the tribe of Judah. His son Amasiah commanded 200,000 men in Jehoshaphat's army (2 Chr. xvii. 16).

9. (Ζαχαρίας; [Comp. Ζεχρί.]) Father of Elishaphat, one of the conspirators with Jehoiada (2 Chr. xxiii. 1).

10. (Ζεχρί; [Vat. Εζεχρει:] Alex. Εζεχρι.) An Ephraimite hero in the invading army of Pekah the son of Remaliah (2 Chr. xxviii. 7). In the battle which was so disastrous to the kingdom of Judah, Maaseiah the king's son, Azrikam, the prefect of the palace, and Elkanah, who was next to the king, fell by the hand of Zichri.

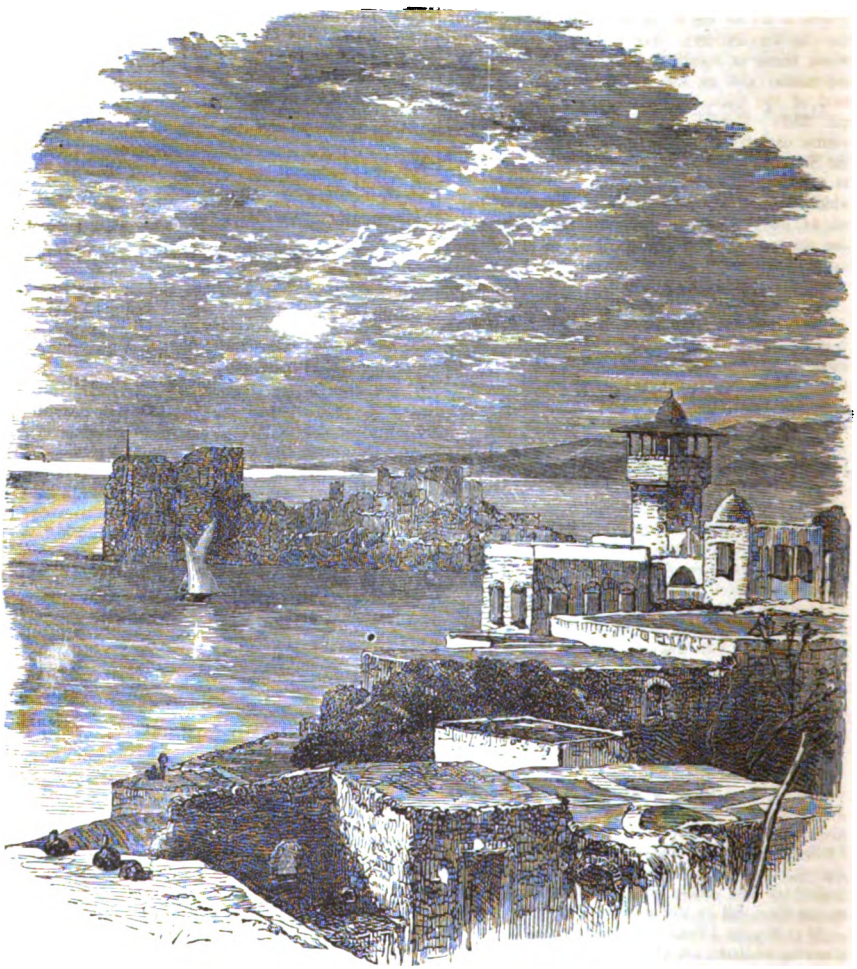
11. (Ζεχρί: [Vat. FA. Ζεχρει.]) Father or ancestor of JOEL 14 (Neh. xi. 9). He was probably a Benjamite.

12. [Vat. Alex. FA.[1] omit.] A priest of the family of Abijah, in the days of Joiakim the son of Jeshua (Neh. xii. 17). W. A. W.

**ZID'DIM** (הַצִּדִּים, with the def. article [*lectivities*, Dietr.]: τῶν Τυρίων: *Aseddim*). One of the fortified towns of the allotment of Naphtali, according to the present condition of the Hebrew text (Josh. xix. 35). The translators of the Vat. LXX. appear to have read the word in the original, הַצֹּרִים, "the Tyrians," while those of the Peshito-Syriac, on the other hand, read it as צִדוֹן, Zidon. These readings were probably both influenced by the belief that the name next following that in question, namely, ZER, was that of Tyre. But this is more than doubtful, and indeed Tyre and Zidon were included in the allotment, not of Naphtali, but of Asher (xix. 28, 29). The Jerusalem Talmud (*Megillah*, i.) is probably nearer the mark in identifying hat-Tsiddim with *Kefr Chittni*, which Schwarz (p. 182) with much probability takes to be the present *Hattin*, at the northern foot of the well-known *Kurn Hattin*, or "Horns of Hattin," a few miles west of Tiberias. This identification falls in with the fact that the three next names in the list are all known to have been connected with the lake. G

**ZIDKI'JAH** (צִדְקִיָּה [*justice of Jehovah*]: Σεδεκίας: *Sedecias*). A priest, or family of priests, who signed the covenant with Nehemiah (Neh. x. 1). The name is identical with that elsewhere in the A. V. rendered ZEDEKIAH.

**ZI'DON** or **SI'DON** (צִידוֹן and צִידֹן: Σιδών; [Vat. generally Σειδων; Judg. xviii. 28, Σιδώνιοι, Vat. Σειδωνιοι; Ezr. iii. 7, οἱ Σιδώνιοι, Vat. Σηδαμειν; 1 K. xvi. 9, ἡ Σιδώνια, Vat. Σειδωνια; Is. xxiii. 2, Φοινίκη; Is. xxiii. 12, Alex. Σιων.] *Sidon*). Gen. x. 15, 19; Josh. xi. 8, xix. 28; Judg. i. 31, xviii. 28; Joel iii. 4 (iv. 4); Is. xxiii. 2, 4, 12; Jer. xxv. 22, xxvii. 3; Ez. xxviii. 21, 22; Zech. ix. 2; Matt. xi. 21, 22, xv. 21; Luke vi. 17, x. 13, 14; Mark iii. 8, vii. 24, 31. An ancient and wealthy city of Phœnicia, on the eastern coast of the Mediterranean Sea, in latitude 33° 34′ 05″ N., less than twenty English miles to the north of Tyre. Its Hebrew name, Tsidôn, signifies "Fishing," or "Fishery" (see Gesenius, *s. v.*). Its modern name is *Saida*. It is situated in the narrow plain between the Lebanon and the sea, to which it once gave its own name (Joseph. *Ant.* v. 3, § 1, τὸ μέγα πεδίον Σιδῶνος πόλεως) at a point where the mountains recede to a distance of two miles (Kenrick's *Phœnicia*, p. 19). Adjoining the city there are luxuriant gardens and orcharda, in which there is a profusion of the finest fruit trees suited to the climate. "The plain is flat and low," says Mr. Porter, author of the *Handbook for Syria and Palestine*, "but near the coast line rises a little hill, a spur from which shoots out a few hundred yards into the sea in a southwestern direction. On the northern slope of the promontory thus formed stands the old city of Zidon. The hill behind on the south is covered by the citadel" (*Enc. Britannica*, 8th edition, *s. v.*).



From a Biblical point of view, this city is inferior in interest to its neighbor Tyre, with which its name is so often associated. Indeed, in all the passages above referred to in which the two cities are mentioned together, Tyre is named first — a circumstance which might at once be deemed accidental, or the mere result of Tyre's being the nearest of the two cities to Palestine, were it not that some doubt on this point is raised by the order being reversed in two works which were written at a period after Zidon had enjoyed a long temporary superiority (Ezr. iii. 7; 1 Chr. xxii. 4). However this may be, it is certain that, of the two, Tyre is of the greater importance in reference to the writings of the most celebrated Hebrew prophets; and the splendid prophecies directed against Tyre as a single colossal power (Ez. xxvi., xxvii., xxvii' 1–19; Is. xxiii.), have no parallel in the

Digitized by Google

shorter and vaguer utterances against Zidon (Ez. xxviii. 21–23). And the predominant Biblical interest of Tyre arises from the prophecies relating to its destiny.

If we could believe Justin (xviii. 3), there would be no doubt that Zidon was of greater antiquity than Tyre, as he says that the inhabitants of Zidon, when their city had been reduced by the king of Ascalon, founded Tyre the year before the capture of Troy. Justin, however, is such a weak authority for any disputed historical fact, and his account of the early history of the Jews, wherein we have some means of testing his accuracy, seems to be so much in the nature of a romance (xxxvi. 2) that, without laying stress on the unreasonableness of any one's assuming to know the precise time when Troy was taken, he cannot be accepted as an authority for the early history of the Phœ-

Modern *Saida* — Zidon or Sidon (Kitto).

nicians. In contradiction of this statement, it has been further insisted on, that the relation between a colony and the mother-city among the Phœnicians was sacred, and that as the Tyrians never acknowledged this relation towards Zidon, the supposed connection between Tyre and Zidon is morally impossible. This is a very strong point; but, perhaps, not absolutely conclusive, as no one can prove that this was the custom of the Phœnicians at the very distant period when alone the Zidonians would have built Tyre, if they founded it at all; or that it would have applied not only to the conscious and deliberate founding of a colony, but likewise to such an almost accidental founding of a city, as is implied in the account of Justin. Certainly, there is otherwise nothing improbable in Zidonians having founded Tyre, as the Tyrians are called Zidonians, but the Zidonians are never called Tyrians. And at any rate this circumstance tends to show that in early times Zidon was the most influential of the two cities. This is shadowed forth in the book of Genesis by the statement that Zidon was the first-born of Canaan (Gen. x. 15), and is implied in the name of "Great Zidon" or "the Metropolis Zidon," which is twice given to it in Joshua (xi. 8, xix. 28). It is confirmed, also

Digitized by Google

wise, by Sidonians being used as the generic name of the Phœnicians or Canaanites (Josh. xiii. 6; Judg. xviii. 7); and by the reason assigned for there being no deliverer to Laish when its peaceable inhabitants were massacred, that "it was *far from Zidon*;" whereas, if Tyre had been of equal importance, it would have been more natural to mention Tyre, which professed substantially the same religion, and was almost twenty miles nearer (Judg. xviii. 28). It is in accordance with the inference to be drawn from these circumstances that in the Homeric poems Tyre is not named, while there is mention both of Sidon and the Sidonians (*Od.* xv. 425; *Il.* xxiii. 743); and the land of the Sidonians is called "Sidonia" (*Od.* xiii. 285). One point, however, in the Homeric poems deserves to be specially noted concerning the Sidonians, that they are never here mentioned as *traders*, or praised for their nautical skill, for which they were afterwards so celebrated (Herod. vii. 44, 96). The traders are invariably known by the general name of Phœnicians, which would, indeed, include the Sidonians: but still the special praise of Sidonians was as skilled workmen. When Achilles distributed prizes at the games in honor of Patroclus, he gave as the prize of the swiftest runner, a large silver bowl for mixing wine with water, which had been cunningly made by the skillful Sidonians, but which Phœnicians had brought over the sea (*Il.* xxiii. 743, 744). And when Menelaus wished to give to Telemachus what was most beautiful and most valuable, he presented him with a similar mixing-bowl of silver, with golden rim, a divine work, the work of Hephæstus, which had been a gift to Menelaus himself from Phædimus, king of the Sidonians (*Od.* iv. 614–618, and *Od.* xv. *l. c.*). And again, all the beautifully embroidered robes of Andromache, from which she selected one as an offering to Athene, were the productions of Sidonian women, which Paris, when coming to Troy with Helen, had brought from Sidonia (*Il.* vi. 289–295). But in no case is anything mentioned as having been brought from Sidon in Sidonian vessels or by Sidonian sailors. Perhaps at this time the Phœnician vessels were principally fitted out at sea-ports of Phœnicia to the north of Sidon.

From the time of Solomon to the invasion of Nebuchadnezzar Zidon is not often directly mentioned in the Bible, and it appears to have been subordinate to Tyre. When the people called "Zidonians" is mentioned, it sometimes seems that the Phœnicians of the plain of Zidon are meant, as, for example, when Solomon said to Hiram that there was none among the Jews that could skill to hew timber like the Zidonians (1 K. v. 6); and possibly, when Ethbaal, the father of Jezebel, is called their king (1 K. xvi. 31), who, according to Menander in Josephus (*Ant.* viii. 13, § 2), was king of the Tyrians. This may likewise be the meaning when Ashtoreth is called the Goddess, or Abomination, of the Zidonians (1 K. xi. 5, 33; 2 K. xxiii. 13), or when women of the Zidonians are mentioned in reference to Solomon (1 K. xi. 1). And this seems to be equally true of the phrases, "daughter of Zidon," and "merchants of Zidon," and even once of "Zidon" itself (Is. xxiii. 2, 4, 12) in the prophecy of Isaiah against Tyre. There is no doubt, however, that Zidon itself, the city properly so called, was threatened by Joel (iii. 4) and Jeremiah (xxvii. 3). Still, all that is known respecting it during this epoch is very scanty, amounting to scarcely more than that one of its sources of gain was trade in slaves, in which the inhabitants did not shrink from selling inhabitants of Palestine [PHŒNICIANS, iii. 2518 *b*]; that the city was governed by kings (Jer. xxvii. 3 and xxv. 22); that, previous to the invasion of Nebuchadnezzar, it had furnished mariners to Tyre (Ez. xxvii. 8); that, at one period, it was subject, in some sense or other, to Tyre; and that, when Shalmaneser king of Assyria invaded Phœnicia, Zidon seized the opportunity to revolt. It seems strange to hear of the subjection of one great city to another great city only twenty miles off, inhabited by men of the same race, language, and religion; but the fact is rendered conceivable by the relation of Athens to its allies after the Persian war, and by the history of the Italian republics in the Middle Ages. It is not improbable that its rivalry with Tyre may have been influential in inducing Zidon, more than a century later, to submit to Nebuchadnezzar, apparently without offering any serious resistance.

During the Persian domination, Zidon seems to have attained its highest point of prosperity; and it is recorded that, towards the close of that period, it far excelled all other Phœnician cities in wealth and importance (Diod. xvi. 44; Mela, i. 12). It is very probable that the long siege of Tyre by Nebuchadnezzar had tended not only to weaken and impoverish Tyre, but likewise to enrich Zidon at the expense of Tyre; as it was an obvious expedient for any Tyrian merchants, artisans, and sailors, who deemed resistance useless or unwise, to transfer their residence to Zidon. However this may be, in the expedition of Xerxes against Greece, the Sidonians were highly favored, and were a preëminently important element of his naval power. When, from a hill near Abydos, Xerxes witnessed a boat race in his fleet, the prize was gained by the Sidonians (Herod. vii. 44). When he reviewed his fleet, he sat beneath a golden canopy in a Sidonian galley (vii. 100); when he wished to examine the mouths of the river Peneus, he intrusted himself to a Sidonian galley, as was his wont on similar occasions (vii. 128); and when the tyrants and general officers of his great expedition sat in order of honor, the king of the Sidonians sat first (viii. 67). Again, Herodotus states that the Phœnicians supplied the best vessels of the whole fleet; and of the Phœnicians, the Sidonians (vii. 96). And lastly, as Homer gives a vivid idea of the beauty of Achilles by saying that Nireus (thrice-named) was the most beautiful of all the Greeks who went to Troy, *after* the son of Peleus, so Herodotus completes the triumph of the Sidonians, when he praises the vessels of Artemisia (probably for the daring of their crews), by saying that they were the most renowned of the whole fleet, "*after the Sidonians*" (vi. 9).

The prosperity of Sidon was suddenly cut short by an unsuccessful revolt against Persia, which led to one of the most disastrous catastrophes recorded in history. Unlike the siege and capture of Tyre by Alexander the Great, which is narrated by several writers, and which is of commanding interest through its relation to such a renowned conqueror, the fate of Sidon is only known through the history of Diodorus (xvi. 42–45), and is mainly connected with Artaxerxes Ochus (B. C. 359–338), a monarch who is justly regarded with mingled aversion and contempt. Hence the calamitous overthrow of Sidon has not, perhaps, attracted so much

Digitized by Google

attention as it deserves. The principal circumstances were these. While the Persians were making preparations in Phœnicia to put down the revolt in Egypt, some Persian satraps and generals behaved oppressively and insolently to Sidonians in the Sidonian division of the city of Tripolis.[a] On this, the Sidonian people projected a revolt; and having first concerted arrangements with other Phœnician cities, and made a treaty with Nectanebus, they put their designs into execution. They commenced by committing outrages in a residence and park (παράδεισος) of the Persian king; they burnt a large store of fodder which had been collected for the Persian cavalry; and they seized and put to death the Persians who had been guilty of insults towards the Sidonians. Afterwards, under their King Tennes, with the assistance from Egypt of 4,000 Greek mercenaries under Mentor, they expelled the Persian satraps from Phœnicia; they strengthened the defenses of their city, they equipped a fleet of 100 triremes, and prepared for a desperate resistance. But their King Tennes proved a traitor to their cause — and in performance of a compact with Ochus, he betrayed into the king's power one hundred of the most distinguished citizens of Sidon, who were all shot to death with javelins. Five hundred other citizens, who went out to the king with ensigns of supplication, shared the same fate; and by concert between Tennes and Mentor, the Persian troops were admitted within the gates, and occupied the city walls. The Sidonians, before the arrival of Ochus, had burnt their vessels to prevent any one's leaving the town; and when they saw themselves surrounded by the Persian troops, they adopted the desperate resolution of shutting themselves up with their families, and setting fire each man to his own house (B. C. 351). Forty thousand persons are said to have perished in the flames. Tennes himself did not save his own life, as Ochus, notwithstanding his promise to the contrary, put him to death. The privilege of searching the ruins was sold for money.

After this dismal tragedy, Sidon gradually recovered from the blow; fresh immigrants from other cities must have settled in it; and probably many Sidonian sailors survived, who had been plying their trade elsewhere in merchant vessels at the time of the capture of the city. The battle of Issus was fought about eighteen years afterwards (B. C. 333), and then the inhabitants of the restored city opened their gates to Alexander of their own accord, from hatred, as is expresly stated, of Darius and the Persians (Arrian, *Anab. Al.* ii. 15). The impolicy, as well as the cruelty of Ochus in his mode of dealing with the revolt of Sidon now became apparent; for the Sidonian fleet in joining Alexander was an essential element of his success against Tyre. After aiding to bring upon Tyre as great a calamity as had afflicted their own city, they were so far merciful that they saved the lives of many Tyrians by concealing them in their ships, and then transporting them to Sidon (Q. Curtius, iv. 4, 15). From this time Sidon, being dependent on the fortunes of war in the contests between the successors of Alexander, ceases to play any important political part in history. It became, however, again a flourishing town — and Polybius (v. 70) incidentally mentions that Antiochus in his war with Ptolemy Philopator encamped over against Sidon (B. C. 218), but did not venture to attack it from the abundance of its resources, and the great number of its inhabitants, either natives or refugees. Subsequently, according to Josephus (*Ant* xiv. 10, § 2), Julius Cæsar wrote a letter respecting Hyrcanus, which he addressed to the "*Magistrates, Council, and Demos* of Sidon." This shows that up to that time the Sidonians enjoyed the forms of liberty, though Dion Cassius says (xlvii 7) that Augustus, on his arrival in the East, deprived them of it for seditious conduct. Not long after, Strabo, in his account of Phœnicia, says of Tyre and Sidon, "Both were illustrious and splendid formerly, *and now;* but which should be called the capital of Phœnicia, is a matter of dispute between the inhabitants" (xvi. p 756). He adds that it is situated on the main-land, on a fine naturally-formed harbor. He speaks of the inhabitants as cultivating the sciences of arithmetic and astronomy; and says that the best opportunities were afforded in Sidon for acquiring a knowledge of these and of all other branches of philosophy. He adds, that in his time there were distinguished philosophers, natives of Sidon, as Boethus, with whom he studied the philosophy of Aristotle, and his brother Diodotus. It is to be observed that both these names were Greek; and it is to be presumed that in Strabo's time, Greek was the language of the educated classes at least, both in Tyre and Sidon. This is nearly all that is known of the state of Sidon when it was visited by Christ. It is about fifty miles distant from Nazareth, and is the most northern city which is mentioned in connection with his journeys. Pliny notes the manufacture of glass at Sidon (*Hist. Nat.* v. 17, 19);[b] and during the Roman period we may conceive Tyre and Sidon as two thriving cities, each having an extensive trade, and each having its staple manufacture; the latter of glass, and Tyre of purple dyes from shell-fish.

There is no Biblical reason for following minutely the rest of the history of Sidon. It shared generally the fortunes of Tyre, with the exception that it was several times taken and retaken during the wars of the Crusades, and suffered accordingly more than Tyre previous to the fatal year 1291 A D. Since that time it never seems to have fallen quite so low as Tyre. Through Fakhr ed-Dîn, emir of the Druses between 1594 and 1634, and the settlement at Sayda of French commercial

---

[a] In an excellent account of this revolt, Bp. Thirlwall seems to have regarded Diodorus as meaning Sidon itself by the words ἐν τῇ Σιδωνίων, xvi. 41 (*History of Greece*, vi. 179); and Miot, in his French translation of Diodorus (*Bibliothèque Historique de Diodore de Sicile*, Paris, 1837, tom. v. 73), actually translates the words by "Sidon." The real meaning, however, seems to be as stated in the text. Indeed, otherwise there was no sufficient reason for mentioning Tripolis as specially connected with the causes of the war.

[b] Pliny elsewhere (*Hist. Nat.* xxxvi. 65 [26]) gives an account of the supposed accidental invention of glass in Phœnicia. The story is that some merchants on the sea-shore made use of some lumps of natron to support their cauldrons; and that, when the natron was subjected to the action of fire in conjunction with the sea sand, a translucent vitreous stream was seen to flow along the ground. This story, however, is now discredited; as it requires intense furnace heat to produce the fusion. See article "Glass" in the *Encyclopædia Britannica*, 8th edition.

Digitized by Google

houses, it had a revival of trade in the 17th and part of the 18th century, and became the principal city on the Syrian coast for commerce between the east and the west (see *Mémoires du Chevalier d'Arvieux*, Paris, 1735, tom. i. p. 294–379). This was put an end to at the close of last century by violence and oppression (Ritter's *Erdkunde*, siebzehnter Theil, erste Abtheilung, drittes Buch, pp. 405, 406), closing a period of prosperity in which the population of the city was at one time estimated at 20,000 inhabitants. The population, if it ever approached such a high point, has since materially decreased, and apparently does not now exceed 5,000; but the town still shows signs of former wealth, and the houses are better constructed and more solid than those at Tyre, being many of them built of stone. Its chief exports are silk, cotton, and nutgalls (Robinson's *Biblical Researches*, iii. 418, 419). As a protection against the Turks, its ancient harbor was filled up with stones and earth by the orders of Fakhr ed-Dîn, so that only small boats can now enter it; and larger vessels anchor to the northward, where they are only protected from the south and east winds (Porter's *Handbook for Syria and Palestine*, 1858, p. 398). The trade between Syria and Europe now mainly passes through Beyrout, as its most important commercial centre; and the natural advantages of Beyrout in this respect, for the purposes of modern navigation, are so decided that it is certain to maintain its present superiority over Sidon and Tyre.

In conclusion it may be observed, that while in our own times no important remains of antiquity have been discovered at or near Tyre, the case is different with Sidon. At the base of the mountains to the east of the town there are numerous sepulchres in the rock, and there are likewise sepulchral caves in the adjoining plain (see Porter, *Encyclop. Britann.* l. c.). "In January, 1855," says Mr. Porter, "one of the sepulchral caves was accidentally opened at a spot about a mile S. E. of the city, and in it was discovered one of the most beautiful and interesting Phœnician monuments in existence. It is a sarcophagus . . . . the lid of which was hewn in the form of a mummy with the face bare. Upon the upper part of the lid is a perfect Phœnician inscription in twenty-two lines, and on the head of the sarcophagus itself is another almost as long." This sarcophagus is now in the Nineveh division of the Sculptures in the Louvre. At first sight, the material of which it is composed may be easily mistaken; and it has been supposed to be black marble. On the authority, however, of M. Suchard of Paris, who has examined it very closely, it may be stated that the sarcophagus is of black syenite, which, as far as is known, is more abundant in Egypt than elsewhere. It may be added that the features of the countenance on the lid are decidedly of the Egyptian type, and the head-dress is Egyptian, with the head of a bird sculptured on what might seem the place of the right and left shoulder. There can therefore be little reason to doubt that this sarcophagus was either made in Egypt and sent thence to Sidon, or that it was made in Phœnicia in imitation of similar works of art in Egypt. The inscriptions themselves are the longest Phœnician inscriptions which have come down to our times. A translation of them was published by Professor Dietrich at Marburg in 1855, and by Professor Ewald at Göttingen in 1856.[a] The predominant idea of them seems to be to warn all men, under penalty of the monarch's curse, against opening his sarcophagus or disturbing his repose for any purpose whatever, especially in order to search for treasures, of which he solemnly declares there are none in his tomb. The king's title is "King of the Sidonians"; and, as is the case with Ethbaal, mentioned in the book of Kings (1 K. xvi. 31), there must remain a certain doubt whether this was a title ordinarily assumed by kings of Sidon, or whether it had a wider signification. We learn from the inscription that the king's mother was a priestess of Ashtoreth. With regard to the precise date of the king's reign, there does not seem to be any conclusive indication. Ewald conjectures that he reigned not long before the 11th century B. C. E. T.

Coin of Zidon.

* ZIDON or SIDON has points of contact also with the N. Testament. The Saviour himself in all probability visited that city (certainly if we read διὰ Σιδῶνος, Mark vii. 31, according to the best opinion), and at all events passed near it in his excursion across the southern spur of Lebanon and back thence into Decapolis (Matt. xv. 21 ff.; Mark vii. 24 ff.). The Apostle Paul touched at this port on his voyage to Rome, and found Christians there whom the courtesy of Julius permitted him to visit (Acts xxvii. 3). Very possibly a church had existed there from the time of the dispersion of the disciples from Jerusalem after the death of Stephen, some of whom went into Phœnicia (Acts xi. 19).

Among the antiquities of Zidon may be mentioned "the immense stones which form the northwest angle of the inner harbor, each one some ten feet square . . . . and columns, sarcophagi, broken statuary, and other evidences of a great city found everywhere in the gardens, with the oldest trees growing in a fertile soil many feet thick above them" (Thomson, *Land and Book*, i. 154 f.). Greek and Roman coins are not uncommon, having on them the commercial emblem of a ship. Zidon has become in our own day the seat of a flourishing mission from this country, with outposts at various points in that part of Syria. H.

**ZIDONIANS** (צִדֹנִי, Ks. xxxii. 30, צִידֹנִים, צִידוֹנִים, צִדֹנִים, and once (1 K. xi. 33) צִדֹנִין: Σιδόνιοι, [Vat. Σειδωνιοι,] exc. Ex. xxxii. 30, στρατηγοὶ Ἀσσούρ: *Sidonii*, exc. Ex. xxxii. 30, *venatores*). The inhabitants of Zidon. They were among the nations of Canaan left to practice the Israelites in the art of war (Judg. iii. 3),

* * The translation of this epitaph by Mr. Deutsch of the British Museum, on the basis of that of Munk and Levy (inserted in Kitto's *Bibl. Cyclopædia*, iii. 1161), is no doubt as trustworthy as any other. H.

Digitized by Google

and colonies of them appear to have spread up into the hill country from Lebanon to Misrephoth-maim (Josh. xiii. 4, 6), whence in later times they hewed cedar-trees for David and Solomon (1 Chr. xxii. 4). They oppressed the Israelites on their first entrance into the country (Judg. x. 12), and appear to have lived a luxurious, reckless life (Judg. xviii. 7); they were skillful in hewing timber (1 K. v. 6), and were employed for this purpose by Solomon. They were idolaters, and worshipped Ashtoreth as their tutelary goddess (1 K. xi. 5, 33; 2 K. xxiii. 13), as well as the sun-god Baal, from whom their king was named (1 K. xvi. 31). The term Zidonians among the Hebrews appears to have been extended in meaning as that of Phœnicians among the Greeks.

In Ex. xxxii. 30, the Vulgate read יְדִים, the LXX. probably שָׁרֵי אֲשֵׁר, for צִדְנִי אֲשֵׁר. Zidonian women (צִדְנִיּוֹת: Σύραι: *Sidonia*) were in Solomon's harem (1 K. xi. 1).

**ZIF**[a] (זִו) [*bloom*]: [Rom. Ζιού; Vat.] νεισω: Alex. Ζειου: *Zio*), 1 K. vi. 37. [MONTH.]

**ZI'HA** (צִיחָא) [*dry, thirsty*]: Σουθία, Σηά; Alex. Σουαα, Σιαα: *Siha, Soha*). 1. The children of Ziha were a family of Nethinim who returned with Zerubbabel (Ezr. ii. 43; Neh. vii. 46).

2. (Vat. [Rom. Alex. FA.[1]] omit; [FA.[2]] Σιαδ: *Svaha.*) Chief of the Nethinim in Ophel (Neh. xi. 21). The name is probably that of a family, and so identical with the preceding.

**ZIK'LAG** (צִקְלַג and twice[b] צִיקְלָג [*a winding, bending*, Fürst]: Σεκελάκ, once Σικελάκ; in Chr. [Vat.] Σωκλα, Σωγλαμ; Alex. Σικελαγ, but also Σικελεγ, [Σικελα,] Σεκελα; Joseph. Σεκελα: *Siceley*). A place which possesses a special interest from its having been the residence and the private property of David. It is first mentioned in the catalogue of the towns of Judah in Josh. xv., where it is enumerated (ver. 31) amongst those of the extreme south, between Hormah (or Zephath) and Madmannah (possibly Beth-marcaboth). It next occurs, in the same connection, amongst the places which were allotted out of the territory of Judah to Simeon (xix. 5). We next encounter it in the possession of the Philistines (1 Sam. xxvii. 6), when it was, at David's request, bestowed upon him by Achish king of Gath. He resided there for a year[c] and four months (xxvii. 7, xxx. 14, 26; 1 Chr. xii. 1, 20). It was there he received the news of Saul's death (2 Sam. i. 1, iv. 10). He then relinquished it for Hebron (ii. 1). Ziklag is finally mentioned, in company with Beer-sheba, Hazar-shual, and other towns of the south, as being reinhabited by the people of Judah after their return from the Captivity (Neh. xi. 28).

The situation of the town is difficult to determine, notwithstanding so many notices. On the one hand, that it was in "the south" (*negeb*) seems certain, both from the towns named with it, and also from its mention with "the south of the Cherethites" and "the south of Caleb," some of whose descendants we know were at Ziph and Maon, perhaps even at Paran (1 Sam. xxv. 1). On the other hand, this is difficult to reconcile with its connection with the Philistines, and with the fact — which follows from the narrative of 1 Sam. xxx (see 9, 10, 21) — that it was north of the brook Besor. The word employed in 1 Sam. xxvii. 5, 7 11, to denote the region in which it stood, is peculiar. It is not *ha-Shefelah*, as it must have been had Ziklag stood in the ordinary lowland of Philistia, but *ha-Sâdeh*, which Professor Stanley (*S. & P.* App. § 15) renders "the field." On the whole, though the temptation is strong to suppose (as some have suggested) that there were two places of the same name, the only conclusion seems to be that Ziklag was in the south or Negeb country, with a portion of which the Philistines had a connection which may have lasted from the time of their residence there in the days of Abraham and Isaac. It is remarkable that the word *sâdeh* is used in Gen. xiv. 7, for the country occupied by the Amalekites, which seems to have been situated far south of the Dead Sea, at or near Kadesh. The name of Paran also occurs in the same passage. But further investigation is necessary before we can remove the residence of Nabal so far south. His Maon would in that case become, not the *Main* which lies near *Zif* and *Kirmal*, but that which was the headquarters of the Maonites, or Mehunim.

Ziklag does not appear to have been known to Eusebius and Jerome, or to any of the older travellers. Mr. Rowlands, however, in his journey from Gaza to Suez in 1842 (in Williams's *Holy City*, i. 463–468) was told of "an ancient site called *Asloudy*, or *Kasloudy*, with some ancient walls," three hours east of *Sebâta*, which again was two hours and a half south of *Khalasa*. This he considers as identical with Ziklag. Dr. Robinson had previously (in 1838) heard of '*Asluj* as lying southwest of *Milh*, on the way to *Abdeh* (*Bibl. Res.* ii. 201), a position not discordant with that of Mr. Rowlands. The identification is supported by Mr. Wilton (*Negeb*, p. 209); but it is impossible at present, and until further investigation into the district in question has been made, to do more than name it. If Dr. Robinson's form of the name is correct — and since it is repeated in the Lists of Dr. Eli Smith (عسلوج, App. to vol. iii. of 1st ed. p. 115 *a*) there is no reason to doubt this — the similarity which prompted Mr. Rowlands's conjecture almost entirely disappears. This will be evident if the two names are written in Hebrew, עשלג, צקלג. G.

**ZIL'LAH** (צִלָּה [*shadow*]: Σελλά: *Sella*). One of the two wives of Lamech the Cainite, to whom he addressed his song (Gen. iv. 19, 22, 23). She was the mother of Tubal-Cain and Naamah. Dr. Kalisch (*Comm. on Gen.*) regards the names of Lamech's wives and of his daughter as significant of the transition into the period of art which took place in his time, and the corresponding change in the position of the woman. "Naamah signifies the lovely, beautiful woman; whilst the wife of the first man was simply Eve, the lifegiving. . . . The women were, in the age of Lamech, no more regarded merely as the propagators of the human family; beauty and gracefulness began to command homage. . . . Even the wives of Lamech manifest the transition

[a] The only instance in the A. V. of the use of *F* in a proper name.

[b] 1 Chr. xii 1 and 20.

[c] Josephus (*Ant.* vi. 12, § 19) gives this as one month and twenty days.

Digitized by Google

into this epoch of beauty; for whilst one wife, Zillah, remains still of assistance and protection (צִלָּה, 'shadow'), the other, Adah, bears a name almost synonymous with Naamah, and likewise signifying ornament and loveliness."

In the apocryphal book of Jashar, Adah and Zillah are both daughters of Cainan. Adah bare children, but Zillah was barren till her old age, in consequence of some noxious draught which her husband gave her to preserve her beauty and to prevent her from bearing. W. A. W.

**ZIL'PAH** (זִלְפָּה [*drop?*]: [Ζελφάν,] Ζελφά: *Zelpha*). A Syrian given by Laban to his daughter Leah as an attendant (Gen. xxix. 24), and by Leah to Jacob as a concubine. She was the mother of Gad and Asher (Gen. xxx. 9–13, xxxv. 26, xxxvii. 2, xlvi. 18).

**ZIL'THAI** [2 syl.] (צִלְתַי [*shadowy*]: Σαλαθί; [Vat. Σαλθει:] Alex. Σαλει: *Selethai*). 1. A Benjamite, of the sons of Shimhi (1 Chr. viii. 20).

2. (Σαμαθί; [Vat.] FA. Ζεμαθει; [Comp. Ald. Σαλαθί:] *Salathi.*) One of the captains of thousands of Manasseh who deserted to David at Ziklag (1 Chr. xii. 20).

**ZIM'MAH** (זִמָּה [*plan, purpose*]: Ζαμμάθ; [Vat. Ζεμμα;] Alex. Ζαμμα: *Zimma*). 1. A Gershonite Levite, son of Jahath (1 Chr. vi. 20).

2. (Ζαμμάμ; [Alex. Ζαμμα; Comp. Ald. Ζεμμα.]) Another Gershonite, son of Shimei (1 Chr. vi. 42); possibly the same as the preceding.

3. (Ζεμμάθ; [Comp. Ald. Ζεμμά:] *Zemma.*) Father or ancestor of Joah, a Gershonite in the reign of Hezekiah (2 Chr. xxix. 12). At a much earlier period we find the same collocation of names, Zimmah and Joah as father and son (1 Chr. vi. 20). Compare "Mahath the son of Amasai" in 2 Chr. xxix. 12 with the same in 1 Chr. vi. 35; "Joel the son of Azariah" in 2 Chr. xxix. 12 and 1 Chr. vi. 36; and "Kish the son of Abdi" 2 Chr. xxix. 12 with "Kishi the son of Abdi" in 1 Chr. vi. 44. Unless these names are the names of families and not of individuals, their recurrence is a little remarkable.

**ZIM'RAN** (זִמְרָן [*song, celebrated*]: Ζομβράν, Ζεμβράμ [Vat. -ραν]; Alex. * Ἰεβράν, ** Ζεμβραν, Ζεμραν: *Zamran*, [*Zamram*]). The eldest son of Keturah (Gen. xxv. 2; 1 Chr. i. 32). His descendants are not mentioned, nor is any hint given that he was the founder of a tribe: the contrary would rather appear to be the case. Some would identify Zimran with the Zimri of Jer. xxv. 25, but these lay too far to the north. The Greek form of the name, as found in the LXX., has suggested a comparison with Ζαβρδμ, the chief city of the Cinaedocolpitae, who dwelt on the Red Sea, west of Mecca. But this is extremely doubtful, for this tribe, probably the same with the ancient *Kenda*, was a branch of the Joktanite Arabs, who in the most ancient times occupied Yemen, and may only have come into possession of Zabram at a later period (Knobel, *Genesis*). Hitzig and Lengerke propose to connect the name Zimran with Zimiris, a district of Ethiopia mentioned by Pliny (xxxvi. 25); but Grotius, with more plausibility, finds a trace of it in the Zamareni, a tribe of the interior of Arabia. The identification of Zimran with the modern Beni Omran, and the Bani Zomaneis of Diodorus, proposed by Mr. Forster (*Geogr. of Arabia*, i. 431), cannot be seriously maintained. W. A. W.

**ZIM'RI** (זִמְרִי [*sung, theme of song*]: Ζαμβρί [Vat. -βρει]: *Zambri*). 1. The son of Salu, a Simeonite chieftain, slain by Phinehas with the Midianitish princess Cozbi (Num. xxv. 14). When the Israelites at Shittim were smitten with plagues for their impure worship of Baal-peor, and were weeping before the Tabernacle, Zimri, with a shameless disregard to his own high position and the sufferings of his tribe, brought into their presence the Midianitess in the sight of Moses and in the sight of the whole congregation. The fierce anger of Phinehas was aroused, and in the swift vengeance with which he pursued the offenders, he gave the first indication of that uncompromising spirit which characterized him in later life. The whole circumstance is much softened in the narrative of Josephus (*Ant.* iv. 6, §§ 10–12), and in the hands of the apologist is divested of all its vigor and point. In the Targum of [Pseudo-] Jonathan ben Uzziel several traditional details are added. Zimri retorts upon Moses that he himself had taken to wife a Midianitess, and twelve miraculous signs attend the vengeance of Phinehas.

In describing the scene of this tragedy an unusual word is employed, the force of which is lost in the rendering "tent" of the A. V. of Num. xxv. 8. It was not the *ohel*, or ordinary tent of the encampment, but the קֻבָּה, *kubbáh* (whence Span. *alcoba*, and our *alcove*), or dome-shaped tent, to which Phinehas pursued his victims. Whether this was the tent which Zimri occupied as chief of his tribe, and which was in consequence more elaborate and highly ornamented than the rest, or whether it was, as Gesenius suggests, one of the tents which the Midianitess used for the worship of Peor, is not to be determined, though the latter is favored by the rendering of the Vulg. *lupanar*. The word does not occur elsewhere in Hebrew. In the Syriac it is rendered a cell, or inner apartment of the tent. W. A. W.

2. (זִמְרִי: Ζαμβρί [Vat. -βρει]; Joseph. *Ant.* viii. 12, § 5, Ζαμδρης: *Zambri.*) Fifth sovereign of the separate kingdom of Israel, of which he occupied the throne for the brief period of seven days in the year B. C. 930 or 929. Originally in command of half the chariots in the royal army, he gained the crown by the murder of king Elah son of Baasha, who, after reigning for something more than a year (compare 1 K. xvi. 8 and 10), was indulging in a drunken revel in the house of his steward Arza at Tirzah, then the capital. In the midst of this festivity Zimri killed him, and immediately afterwards all the rest of Baasha's family. But the army which at that time was besieging the Philistine town of Gibbethon, when they heard of Elah's murder, proclaimed their general Omri king. He immediately marched against Tirzah, and took the city. Zimri retreated into the innermost part of the late king's palace," set it on fire and perished in the ruins (1 K. xvi. 9–20).

* The word is אַרְמוֹן, which Ewald (after J. D. Michaelis), both here and in 2 K. xv. 25, insists on translating "harem," with which word he thinks that it is etymologically connected, and hence seeks confirmation of his view that Zimri was a voluptuous

Digitized by Google

Ewald's inference from Jezebel's speech to Jehu (2 K. ix. 31), that on Elah's death the queen-mother welcomed his murderer with smiles and blandishments, seems rather arbitrary and far-fetched. [JEZEBEL.] G. E. L. C.

3. (*Zimri.*) One of the five sons of Zerah the son of Judah (1 Chr. ii. 6).

4. [Alex. twice, 1 Chr. viii. 36, Ζαμρι.] Son of Jehoadah and descendant of Saul (1 Chr. viii. 36, ix. 42).

5. (Om. in LXX.: *Zambri.*) An obscure name, mentioned (Jer. xxv. 25) in probable connection with Dedan, Tema, Buz, Arabia (עֲרָב), the mingled people "'ereb" (עֲרֹבִי), all of which immediately precede it, besides other peoples; and followed by Elam, the Medes, and others. The passage is of wide comprehension, but the reference, as indicated above, seems to be a tribe of the sons of the East, the Beni-Kedem. Nothing further is known respecting Zimri, but it may possibly be the same as, or derived from ZIMRAN, which see.

E. S. P.

**ZIN** (צִין) [*low palm-tree*, Ges.]: Σίν; [Vat. Σειν; Num. xxvii. 14 a, Alex. Σινα; Josh. xv. 1, Alex. Σιμ; Josh. xv. 3, Rom. Alex. Σενέ, Vat.[1] Ενναν, 2. m. Θενναν: *Sin.*]) The name given to a portion of the desert tract between the Dead Sea, Ghôr, and Arabah (possibly including the two latter, or portions of them) on the E., and the general plateau of the *Tih* which stretches westward. The country in question consists of two or three successive terraces of mountain converging to an acute angle (like stairs where there is a turn in the flight) at the Dead Sea's southern verge, towards which also they slope. Here the drainage finds its chief vent by the *Wady el-Fikreh* into the Ghôr, the remaining waters running by smaller channels into the Arabah, and ultimately by the *Wady el-Jeib* also to the Ghôr. Judging from natural features, in the vagueness of authority, it is likely that the portion between, and drained by these wadies, is the region in question; but where it ended westward, whether at any of the above named terraces, or blending imperceptibly with that of Paran, is quite uncertain. Kadesh lay in it, or on this unknown boundary, and here also Idumæa was conterminous with Judah; since Kadesh was a city in the border of Edom (see KADESH; Num. xiii. 21, xx. 1, xxvii. 14, xxxiii. 36, xxxiv. 3; Josh. xv. 1). The researches of Williams and Rowlands on this subject, although not conclusive in favor of the site *el-Kûdeis* for the city, yet may indicate that the "wilderness of Kadesh," which is indistinguishable from that of Zin, follows the course of the *Wady Murreh* westward. The whole region requires further research; but its difficulties are of a very formidable character. Josephus (*Ant.* iv. 4, § 6) speaks of a "hill called Sin" (Σίν), where Miriam, who died in Kadesh, when the people had "come to the desert of Zin," was buried. This "Sin" of Josephus may recall the name Zin, and, being applied to a hill, may perhaps indicate the most singular and wholly isolated conical acclivity named *Moderah* (*Madura*, or *Madara*), standing a little S. of the *Wady Fikreh*, near its outlet into the Ghôr. This would precisely agree with the tract of country above indicated (Num. xx. 1, Seetzen *Reisen*, iii. *Hebron to Madara*; Wilton, *Negeb* pp. 127, 134). H. H.

**ZI'NA** (זִינָא) [prob *abundance*]: Ζιζά: *Zizan*) ZIZAH the second son of Shimei (1 Chr. xxiii. 10 comp. 11) the Gershonite. One of Kennicott's MSS. reads אזינא, Ziza, like the LXX. and Vulg

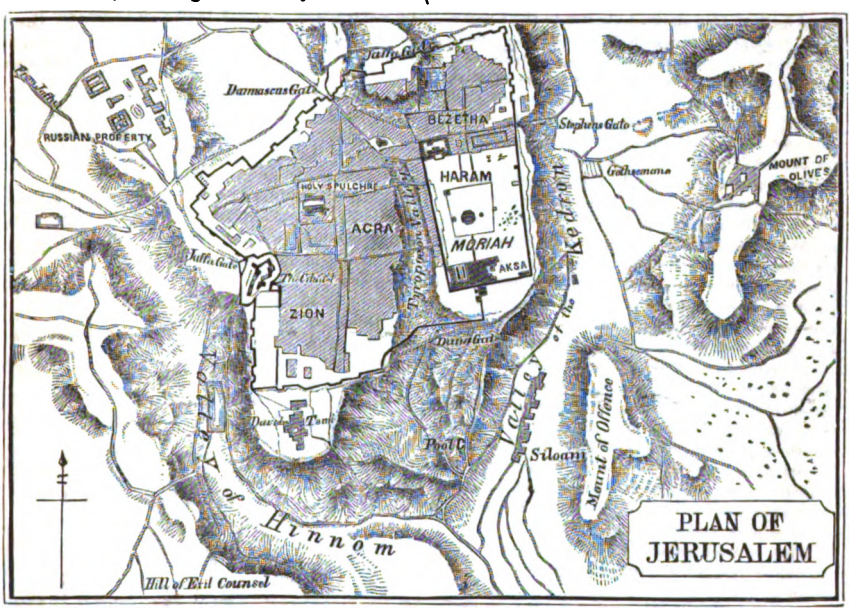
• **ZI'ON** (צִיּוֹן, *sunny*, from צִיָּה: Σιών; Vat. Σειων, exc. Am. i. 2, and 21 places in Psalms; Sin. or FA. Σειων in Ps. ii. 6, xlviii. 2, lxix. 35, lxxxiv. 7, lxxxvii. 2, 5, xcix. 2, cxlvii. 12, cxlix. 2; Is. i. 8, iii. 16, 17, viii. 18, x. 32, xii. 6, xviii. 7, xxviii. 16, xxxi. 4, 9, xxxvii. 22, xl. 9, xli. 27, li. 3, 11, lix. 20, lxi. 3, lxiv. 10; Jer. xxvi. 18 (so Alex.); Joel iii. 21; Obad. 17; Zech. ii. 10, ix. 13; elsewhere Σιων; in Cant. iii. 11 Vat. and Sin. omit: *Sion*). In the Apoc. and N. T. the A. V., following the Greek, uses *Sion* as a variation of Zion [SION, MOUNT, 2]; but the latter is an essentially different name from the *Sion* of Deut. iv. 48 [SION, MOUNT, 1].

Mount Zion is the southern terminus and western tongue of the high table-land, or double promontory, on which Jerusalem was built, and is the highest of its hills. Elevated, and surrounded by deep, trench-like ravines on the west, south, and east, with a deep depression, or valley, in the ridge on the north, it was a position of great natural strength. It first appears in sacred history as a stronghold of the Jebusites who had fortified it, and who held possession of it long after the Israelites had gained the rest of the territory (Josh. xv. 63). It was assaulted at length, and captured by king David (1 Chr. xi. 4–7), who built both a palace and a citadel upon it, and subsequently brought to it the ark of the Lord.

As the seat not only of regal dominion, but of sacred worship until the Temple was built, this eminence came to be designated as the "holy hill of Zion" (Ps. ii. 6) and as the "chosen habitation" of Jehovah (Ps. cxxii. 13), and this naturally led to its employment by the N. T. writers as a type of heaven (Heb. xii. 22; Rev. xiv. 1). It being the royal residence, it was called *the City of David* (2 Sam. vi. 12); and its prominence in the city led to the frequent use of its name as the synonym of *Jerusalem* (Is. x. 24); as, also, to the designation of the inhabitants of the city collectively, as *Zion*, or *the daughter of Zion* (Is. xlix. 14; Ps. ix. 14; Zech. ii. 10).

The summit of the ridge presented a broad level tract, the southern portion of which lies outside of the modern walls. This is now occupied, in part, by the cemeteries of different Christian sects, including the Protestants, and among them is the stone building, once a Christian church, which covers the traditional site of the sepulchre of king David. Muslim jealousy has, hitherto, prevented a thorough exploration of the locality. A part of this ground has been cultivated — literally fulfilling the remarkable prediction that Zion should be "ploughed like a field" (Is. xxvi. 18; Mic. iii. 12). Zion was a natural rocky terrace, and hence the force of the Scriptural comparisons which associate with its strong foundations the safety of be-

---



slave of women. But its root seems to be אָרַם, "to be high" (Gesenius); and in other passages, especially Prov. xviii. 19, the meaning is "a lofty fortress," rather than "a harem." Ewald, in his sketch of Zimri, is perhaps somewhat led astray by the desire of finding a historical parallel with Sardanapalus.

Digitized by Google

flowers and the stability of Christ's kingdom (Is. xxviii. 16).

Until a late period, the site of Zion was unquestioned. A glance at the ground of the city, or at a plan of it, shows that the southwest hill was the largest and most important of the hills on which it was built. The position of this hill accords so fully with almost all the traditional and historical notices which have reached us, that it has been accepted without dissent as the Zion of David. A few years since, Mr. Fergusson started the theory that Zion was identical with the southeast hill, or Moriah. The present writer in a preceding article has stated the grounds of dissent from this view (JERUSALEM, ii. 1330–1332; see also *Bibl. Sacra*, xxiv. 116–140).

Quite lately, still another theory, as novel, has been started, affirming the identity of Zion with Akra, the hill on the north; and this we will briefly examine here. (See also *Bibl. Sacra*, xxvii. 565–569.) This originated with Captain Warren, the British engineer who has made such important and interesting subterranean explorations in Jerusalem, and who appears to have enlivened his labors below ground with historical researches above, which are quite independent of his professional work. It is propounded by him in *Quarterly Statement*, No. III., of the *Palestine Exploration Fund*, under the title: "The Comparative Holiness of Mounts Zion and Moriah" (pp. 76–88). It is expanded and defended by Rev. John Forbes, LL. D., Edinburgh, in the *Bibl. Sacra* (xxvii. 191–196). Both writers concede the baselessness of Mr. Fergusson's theory, which will not, probably, be put forward again; and the new theory, we apprehend, will be as transient.

(Palestine Exploration Fund.)

A decisive test which does not appear to have occurred to these writers, is the ascertained course of the ancient walls, respecting which Josephus has given us the desired information. He says: "The city was fortified by three walls wherever it was not encircled by impassable valleys; for in that quarter there was but one wall" (*B. J.* v. 4, § 1). He then describes the configuration of the city, — its hills and valleys, — and in the next section traces the courses of these walls, respecting the first and oldest of which there is no dispute. Beginning at Hippicus, on the north, it ran southward, and then eastward, along the western and southern brow of the southwest hill, and thence across to Ophel and the eastern side of the Temple on Moriah. The latter part of its course is not definitely known; but all are agreed that from Hippicus it followed the brow of the southwest hill, forming, with the deep valleys below, ample protection in this quarter. From Hippicus eastward this wall ran along the northern brow of the southwest hill to the Xystus, an open place on the eastern crest of this hill opposite the Temple, and thence across the valley to the western side of the Temple-area. This is undisputed. And this part of the first and oldest wall, from Hippicus eastward, was the strongest wall in Jerusalem, and the last which was taken in every siege. Josephus describes it as difficult to be taken, and assigns two reasons. The first is its natural position, built on the brow of a hill; and recent excavations have strikingly confirmed his statement, and vindicated Robinson's theory of the course of the Tyropœon Valley, disclosing, below the present surface, depths at different points of from thirty to nearly eighty feet along the ancient cliff (JERUSALEM, ii. 1221). His second reason is the extraordinary strength of the wall itself, through the zeal which David and Solomon and the kings who succeeded them took in the work (*B. J.* v. 4, § 2). All are agreed that this oldest and strongest of the walls of Jerusalem protected the southwest hill, and was constructed for this special purpose. This part of the city, having the highest area and the most precipitous sides, offered the strongest natural advantages for defense; and king David and his successors took advantage of

Digitized by Google

its natural position, and threw around it a wall which made it well nigh impregnable.

Now, the advocates of the new theory must give some consistent explanation of the royal zeal, shown through successive reigns, in fortifying this broad and goodly summit. They take pains to explain that Zion was not an isolated fortress, but included a considerable part of the city — the palace of the king and the dwellings of the people; and the upper city was, confessedly, larger than the lower. The most commanding spot in the capital, by nature and art combined made the most secure, and of ample extent, withal, — the royal palaces (according to their theory) were not here; the royal treasures were not here; the royal sepulchres were not here; the citadel was not here; the Tabernacle and the ark of the covenant, before the building of the Temple, were not here; and the wise monarchs of Israel fortified this elevated quarter of their capital, until it could bid defiance to almost any assault, and then built their own residence outside of it, looking up with admiration to its strong bulwarks, congratulating the inhabitants who dwelt within its fastnesses, but depriving themselves, their families, and their possessions, secular and sacred, of the benefit of their own defenses!

There succeeded a period of prolonged peace, in which the monarch could have his summer residence in the country, and build a palace for his queen in the unwalled suburbs. But from the first conquest it was necessary to have a point of as absolute security as possible; and what conceivable point would naturally be guarded with more jealous care than the principal seat of the royal family — the seat of empire? For a considerable period (we know not how long) the wall around the southwest hill was the *only* wall of the city. Josephus repeatedly refers to it as, by way of distinction, "the old wall." And the interval in which it served as the sole protection of the capital was not a season of peace, but a period of incessant war with the tribes and nations on every side of Israel. And when new walls were afterwards erected, new defenses were added to this.

Capt. Warren says: "If we place three round shot close together we have a rough model of Jerusalem in the time of Solomon — the shot to the north being Mount Zion; that to the southeast, Moriah; and that to the southwest, the remainder of Jerusalem" (p. 81). Accepting this "model," we call the north shot Akra; the southeast, Moriah; and the southwest (which to Warren is nameless), Zion. The north hill was subsequently protected on its exposed side by a strong wall — the second wall of Josephus; and at a still later day, in the reign of king Herod Agrippa, a fourth hill, on the northeast (Bezetha), was protected on its exposed side by the third wall of Josephus. Jerusalem was never attacked from the south. The point of menace and peril, in every siege, was in the highlands on the north. These three walls on the north were successive breastworks against a foreign foe. When the hill represented by Warren's north shot was protected by one wall, the southwest hill was protected by two walls; when the former was protected by two, the latter was protected by three. And the security enjoyed by the upper city, on the southwest hill, above that of the lower city, consisted, besides its natural defenses on the south, in the strength of the old wall on the north, in the construction of which successive kings had taken an enthusiastic interest. Consequently, as we have said, this part of Jerusalem held out the longest in every siege. "No attack or approach is ever described as made against the *upper* city of Zion until after the besiegers had broken through the second wall, and had thus got possession of the *lower* city" (Rob. *Bibl. Res.* 1852, p. 214). When the city was invested by Titus after he had stormed and carried every part but the southwest hill, the course of the siege is thus stated by Mr. Grove: "The upper city, higher than Moriah, inclosed by the original wall of David and Solomon, and on all sides precipitous, except on the north, where it was defended by the wall and towers of Herod, was still to be taken. . . . . It took eighteen days to erect the necessary works for the siege. The four legions were once more stationed on the west or northwest corner, where Herod's palace abutted on the wall, and where the three magnificent and impregnable towers of Hippicus, Phasaëlus, and Mariamne rose conspicuous. This was the main attack" (JERUSALEM, ii. 1307). The wall thus strengthened by Herod for the protection of that part of the city which embraced his own palace was the old wall, which ran from Hippicus eastward to the Xystus. "The interior and most ancient of the three walls on the north was, no doubt, the same wall which ran along the northern brow of Zion," or the southwest hill. (Rob. *Bibl. Res.* i. 413.) For whose protection, as more important than their own, was this wall built and strengthened by David and Solomon and their immediate successors?

The reasons offered by these writers for their hypothesis are not based on recent discoveries, nor are they new. These speculations have not the remotest connection with Capt. Warren's explorations in Jerusalem. The argument rests mainly on two or three passages in Josephus and the first book of Maccabees, relating to the *Akra* or castle which Antiochus Epiphanes built on the hill sustaining the lower city, and which are familiar to all who have studied the topography of the city. These parallel narratives involve a perplexity which Prof. Robinson fully examined, and, we think, satisfactorily explained, almost a quarter of a century ago (*Bibl. Sacra*, iii. 629–634). His suggestion is, that in process of time "the City of David," at first restricted to the Hill of Zion, came to be used by synecdoche for the whole city, so as to be synonymous with Jerusalem; and he cites evident traces of such usage from Isaiah, the Maccabees, and Josephus. This is a much simpler solution of the difficulty than the transfer of site by these writers.

The immemorial conviction, which has not merely survived centuries of observation, but been confirmed by the investigations of keen eyed witnesses, will, we are confident, abide. The southwest hill, fortified beyond the rest, and its dwellings more carefully protected; the most important strategic point in the city, and the last rallying-point in memorable sieges; the hill for which the propounders of the new theory have no name — Forbes contenting himself with applying the epithet "pseudo" to the current appellation, and Warren designating it as "the remainder of Jerusalem," — this historic hill has borne, and will continue to bear the sacred and classic name of ZION.

Every Christian reader has felt — what every Christian visitor to the holy city who has stood on its southwest hill has felt more — the force and beauty of such passages as these, in the Psalms o

Digitized by Google

David: "Beautiful for situation. the joy of the whole earth, is Mount Zion, on the sides of the north, the city of the great King" (Ps. xlviii. 2); "They that trust in the Lord shall be as Mount Zion, which cannot be removed, but abideth forever" (Ps. cxxv. 1). From strains like these the transition is abrupt and startling to such sentences as the following "The site where Zion once was, and is not" (Warren, p. 85); "Mount Zion, once so holy, was at length razed to the ground and obliterated" (Forbes, p. 195). We take comfort in the undoubting conviction that the grand similes of the sacred writers have not been thus emptied of their significance. The Zion of the psalmist and the prophet still stands, with its rocky, precipitous sides, and the deep valleys sweep around its base, as of old. Its "palaces" have disappeared; and in its desolation, literal and moral, it is no longer "the joy" which it once was. But "beautiful for situation" it still is; and, to the eye of the traveller who approaches it from the south, it still lifts itself in strength, though not in the ancient grandeur, "on the sides of the north." [GUTTKE; JEBUS; JERUSALEM; TYROPOEON.] S. W.

**ZIOR** (צִיעֹר [*smallness*]: Σεφαλθ; Alex. Σιωρ: *Sior*). A town in the mountain district of Judah (Josh. xv. 54, only). It belongs to the same group with Hebron, next to which it occurs in the list. By Eusebius and Jerome (*Onom.* Σιώρ) it is spoken of as a village between Ælia (Jerusalem) and Eleutheropolis (*Beit jibrin*), in the tribe of Judah. A small village named *Su'ir* (سعير) lies on the road between *Tekûa* and Hebron, about six miles northeast of the latter (Rob. *Bibl. Res.* i. 488), which may probably be that alluded to in the *Onomasticon;* and but for its distance from Hebron, might be adopted as identical with Zior. So little, however, is known of the principle on which the groups of towns are collected in these lists, that it is impossible to speak positively on the point, either one way or the other. G.

**ZIPH** (זִיף [*battlement, pinnacle*, Ges. ed. 1863; *melting-place*, Fürst]). The name borne by two towns in the territory of Judah.

1. (Μαωνάμ; Alex. Ιθνα]ζιφ: *Ziph.*) In the south (*negeb*); named between Ithnan and Telem (Josh. xv. 24). It does not appear again in the history — for the Ziph of David's adventures is an entirely distinct spot — nor has any trace of it been met with. From this, from the apparent omission of the name in the Vatican LXX., and from the absence of the "and" before it, Mr. Wilton has been led to suggest that it is an interpolation (*Negeb*, 85); but his grounds for this are hardly conclusive. Many names in this list have not yet been encountered on the ground; before several others the "and" is omitted; and though not now recognizable in the Vat. LXX., the name is found in the Alex. and in the Peshito (*Zib*). In our present ignorance of the region of the Negeb it is safer to postpone any positive judgment on the point.

2. ([Rom. Ὀζιβ, Ζιφ; Vat.] Οζειβ, Ζειφ, ε Ζειβ; Alex. Ζιφ, Ζειφ: *Ziph.*) In the highland district; named between Carmel and Juttah (Josh. xv. 55). The place is immortalized by its connection with David, some of whose greatest perils and happiest escapes took place in its neighborhood (1 Sam. xxiii. 14, 15, 24, xxvi. 2). These passages show, that at that time it had near it a wilderness (*midbar*, i. e. a waste pasture ground) and a wood. The latter has disappeared, but the former remains. The name of *Zif* is found about three miles S. of Hebron, attached to a rounded hill of some 100 feet in height, which is called *Tell Zif*. About the same distance still further S. is *Kûrmûl* (Carmel), and between them a short distance to the W. of the road is *Yûtta* (Juttah). About half a mile E. of the *tell* are some considerable ruins, standing at the head of two small wadies, which, commencing here, run off towards the Dead Sea. These ruins are pronounced by Dr. Robinson (*Bibl. Res.* i. 492) to be those of the ancient Ziph, but hardly on sufficient grounds. They are too far from the *tell* for it to have been the citadel to them. It seems more probable that the *tell* itself is a remnant of the ancient place which was fortified by Rehoboam (2 Chr. xi. 8).[a]

"Zib" is mentioned in the *Onomasticon* as 8 miles east of Hebron; "the village," adds Jerome, "in which David hid is still shown." This can hardly be the spot above referred to, unless the distance and direction have been stated at random, or the passage is corrupt both in Eusebius and Jerome. At 7 Roman miles east of Hebron a ruin is marked on Van de Velde's map, but it does not appear to have been investigated. Elsewhere (under "Zeib" and "Ziph") they place it near Carmel, and connect it with Ziph the descendant of Caleb.

From Eusebius to Dr. Robinson no one appears to have mentioned *Zif*. Yet many travellers must have passed the *tell*, and the name is often in the mouths of the Arab guides (Stanley, *S. & P.* p. 101 [b]).

There are some curious differences between the text of the LXX. and the Hebrew of these passages which may be recorded here.

| HEBREW. | VATICAN LXX. (MAI). | ALEX. LXX. |
|---|---|---|
| 1 Sam. xxiii. 14. . . remained in the mountain in the wilderness of Ziph. | ἐκάθητο ἐν τῇ ἐρήμῳ ἐν τῷ ὄρει Ζείφ, ἐν τῇ γῇ τῇ αὐχμώδει. | . . . . ἐν τῷ ὄρει ἐν τῇ ἐρήμῳ Ζειφ ἐπ ὄρους τοῦ αὐχμωδοῦς ἐν γῇ αὐχμώδει. |
| 15. . . . . in the wilderness of Ziph in the wood. | ἐν τῇ ὕλῃ τῷ αὐχμώδει ἐν τῇ καυσῇ Ζείφ, γῇ καυσῇ [καυσῃ = חֹרֶשׁ read for חֹרְשָׁה]. | . . . . . Ζειφ ἐν τῇ καυσῃ. |
| 19. And Ziphites came to Saul | καὶ ἀνέβησαν οἱ Ζειφαῖοι ἐπὶ τὸν αὐχμώδουν πρὸς Σ. | . . . . . |

[a] * In his Index to Clark's *Bible Atlas*, p. 111, Mr. Grove withdraws this objection and speaks of Ziph as "now *Zif*, 8 miles south of Hebron." H.

[b] See a remark curiously parallel to this by Maundrell in his *Voyage* between Naplouse and Jerusalem.

| Hebrew. | Vatican LXX. (Mai). | Alex. LXX. |
|---|---|---|
| 1 Sam. xxiii. 24. And they arose and went to Ziph before Saul. | καὶ ἀνέστησαν οἱ Ζοφαῖοι καὶ ἐπορεύθησαν ἔμπροσθεν Σ. | . . . . . καὶ ἐπορεύθησαν π Ζοφαιοι . . |
| xxvi. 1. And the Ziphites came unto Saul. | α. ἦλθοντες οἱ Ζοφαῖοι ἐκ τῆς αὐχμώδους πρὸς τὸν Σ. | . . . . . |

The recurrence of the word αὐχμώδης, "dried up," "parched," would almost suggest that the LXX. understood the Ziph of the *negeb* to be intended. G.

**ZIPH** (זִיף: Ζίβ; [Vat. omits;] Alex. Ζιφλ: *Siph*). Son of Jehaleleel (1 Chr. iv. 16).

**ZI'PHAH** (זִיפָה: Ζεφά; [Vat. Ζαφά;] Alex. Ζαιφα: *Ziphа*). One of the sons of Jehaleleel, whose family is enumerated in an obscure genealogy of the tribe of Judah (1 Chr. iv. 16).

**ZIPH'IMS, THE** (הַזִּפִים: τοὺς Ζειφαίους: *Ziphaei*). The inhabitants of ZIPH (see the foregoing article, No. 2). In this form the name is found in the A. V. only in the title of Ps. liv. In the narrative it occurs in the more usual [a] form of

**ZIPH'ITES, THE** (הַזִּפִי: οἱ Ζιφαῖοι [Vat. Ζειφ-]: *Ziphaei*), 1 Sam. xxiii. 19,[b] xxvi. 1. G.

**ZIPH'ION** (צְפִיוֹן: Ζαφών: *Sephion*). Son of Gad (Gen. xlvi. 16); elsewhere called ZEPHON.

**ZIPH'RON** (זִפְרוֹן) [*fragrance*]: Ἀσφρών; [c] Alex. Ζεφρων: *Zephrona*). A point in the north boundary of the promised land as specified by Moses (Num. xxxiv. 9). It occurs between Zedad and Hatsar-Enan. If Zedad is *Sâdâd*, and Hatsar-Enan *Kurietein*, as is not impossible, then Ziphron must be looked for somewhere between the two. At present no name at all suitable has been discovered in this direction. But the whole of this topography is in a most unsatisfactory state as regards both comprehension of the original record and knowledge of the ground; and in the absence of more information we must be content to abstain from conjectures.

In the parallel passage of Ezekiel (xlvii. 16, 17) the words "Hazar-hatticon, which is by the border of Hauran," appear to be substituted for Ziphron. The Hauran here named may be the modern village *Hauarîn*, which lies between *Sâdâd* and *Kurietein*, and not the district of the same name many miles further south. G.

**ZIP'POR** (צִפֹּר, and twice [d] צִפּוֹר [*sparrow*]: Σεπφώρ: *Sephor*). Father of Balak king of Moab. His name occurs only in the expression "son [e] of Zippor" (Num. xxii. 2, 4, 10, 16, xxiii. 18; Josh. xxiv. 9; Judg. xi. 25). Whether he was the "former king of Moab" alluded to in Num. xxi. 26, we are not told, nor do we know that he himself ever reigned. The Jewish tradition already noticed [MOAB, iii. 1981] is, that Moab and Midian were united into one kingdom, and ruled by a king chosen alternately from each. In this connection the similarity between the names Zippor and Zipporah, the latter of which we know to have been the name of a Midianitess, *pur sang*, is worthy of notice, as it suggests that Balak may have been of Midianite parentage. G.

**ZIPPO'RAH** (צִפֹּרָה [fem. *sparrow*]: Σεπφώρα; Joseph. Σαπφώρα: *Sephora*). Daughter of Reuel or Jethro, the priest of Midian, wife of Moses, and mother of his two sons Gershom and Eliezer (Ex. ii. 21, iv. 25, xviii. 2, comp. 6). The only incident recorded in her life is that of the circumcision of Gershom (iv. 24–26), the account of which has been examined under the head of MOSES (iii. 2019. See also Stanley's *Jewish Church*, p. 114).

It has been suggested that Zipporah was the Cushite (A. V. "Ethiopian") wife who furnished Miriam and Aaron with the pretext for their attack on Moses (Num. xii. 1, &c.). The chief ground for this appears to be that in a passage of Habakkuk (iii. 7) the names of Cushan and Midian are mentioned together. But in the immense interval which had elapsed between the Exodus and the period of Habakkuk (at least seven centuries), the relations of Cush and Midian may well have altered too materially to admit of any argument being founded on the later passage, even if it were certain that their being mentioned in juxtaposition implied any connection between them, further than that both were dwellers in tents and enemies of Israel; and unless the events of Num. xii. should be proved to be quite out of their proper place in the narrative, it is difficult to believe that a charge could have been made against Moses on the ground of his marriage, after so long a period, and when the children of his wife must have been several years old. The most feasible suggestion appears to be that of Ewald (*Geschichte*, ii. 229, *note*), namely, that the Cushite was a second wife, or a concubine, taken by Moses during the march through the wilderness — whether after the death of Zipporah (which is not mentioned) or from other circumstances must be uncertain. This — with the utmost respect to the eminent scholar who has supported the other alternative — the writer ventures to offer as that which commends itself to him.

The similarity between the names of Zipper and Zipporah, and the possible inference from that similarity, have been mentioned under the former head. [ZIPPOR.] G.

**ZITH'RI** (סִכְרִי [*Jehovah's protection*]: Σεχρεί; [Vat. Σεχρει;] Alex. Σεθρι: *Sethri*). Properly "Sithri;" one of the sons of Uzziel, the son of Kohath (Ex. vi. 22). In Ex. vi. 21, "Zithri" should be "Zichri," as in A. V. of 1611.

**ZIZ, THE CLIFF OF** (הַצִּיץ [*ascent of the*]: ἡ ἀναβαστις Ἀσαδ [Rom. Ἀσσεῖς] in both MSS.: *clivus nomine Sis*). The pass (such is more accurately the meaning of the word *maâlêh*; comp. ADUMMIM; Gr[v], etc.) by which

[a] Examples of the same inconsistency in the A. V. are found in AVIM, AVITES; HORIM, HORITES; PHILISTIM, PHILISTINES.

[b] In this passage there is no article to the name in the Hebrew.

[c] The final ν in LXX. and Vulgate is due to the Hebrew particle of motion — "*to* Ziphron."

[d] Num. xxii. 10, xxiii. 18.

[e] In LXX. with Σ., except in Josh. xxiv. 9, ὁ υἱὸς Σ

the horde of Moabites, Ammonites, and Mehunnim, made their way up from the shores of the Dead Sea to the wilderness of Judah near Tekoa (2 Chr. xx. 16 only; comp. 20). There can be very little doubt that it was the pass of *'Ain Jidy* — "the very same route," as Dr. Robinson remarks, "which is taken by the Arabs in their marauding expeditions at the present day; along the shore as far as to *'Ain Jidy*, and then up the pass, and so northwards below *Tekûa*" (*Bibl. Res.* i. 508, 530). The very name (which since it has the article prefixed is more accurately haz-Ziz than Ziz) may perhaps be still traceable in *el-Hüsâ'ah*, which is attached to a large tract of table-land lying immediately above the pass of *Ain Jidy*, between it and *Tekûa*, and bounded on the north by a wady of the same name (*Bibl. Res.* i. 527). May not both haz-Ziz and Hüsâ'ah be descended from Hasezon-tamar, the early name of En-gedi? G.

**ZI'ZA** (צִיזָא [*full breast, abundance*]: Ζουζά; [Vat. corrupt:] *Ziza*). 1. Son of Shiphi a chief of the Simeonites, who in the reign of Hezekiah made a raid upon the peaceable Hamite shepherds of Gedor, and smote them, "because there was pasture there for their flocks" (1 Chr. iv. 37).

2. (Ζηζά; [Vat. Ζειζα; Alex. Ζιζα.]) Son of Rehoboam by Maachah the granddaughter of Absalom (2 Chr. xi 20).

**ZI'ZAH** (זִיזָה [*full breast*]: Ζιζά: *Ziza*). A Gershonite Levite, second son of Shimei (1 Chr. xxiii. 11); called ZINA in ver. 10.

**ZO'AN** (צֹעַן: Τανίς: *Tanis*, [Ex. xxx. 14, in *Taphnis*]), an ancient city of Lower Egypt. It is mentioned by a Shemitic and by an Egyptian name, both of the same signification. Zoan, preserved in the Coptic ⲤⲀⲚⲒ, ⲤⲀⲚⲈ, S. Ⲥⲁⲛⲓ, Ⲥⲁⲛⲉ, the Arabic صَانَ (a village on the site), and the classical Τάνις, Tanis, whence the Coptic transcription ⲦⲀⲚⲒⲤ, comes from the root צָעַן, "he moved tents" (Is. xxxiii. 20), cognate with טָעַן, "he loaded a beast of burden;" and thus signifies "a place of departure," like צַעֲנַנִּים, Zaanannim (Josh. xix. 33), or צַעֲנַיִם, Zaanaim[a] (Judg. iv. 11), "removings" (Gesen.), a place in northernmost Palestine, on the border of Naphtali near Kedesh. The place just mentioned is close to the natural and constant northern border of Palestine, whether under the spurs of Lebanon or of Hermon. Zoan lay near the eastern border of Lower Egypt. The sense of departure or removing, therefore, would seem not to indicate a mere resting-place of caravans, but a place of departure from a country. The Egyptian name HA-AWAR, or PA-AWAR, Avaris, Ἀουαρις, means "the abode" or "house" of "going out" or "departure." Its more precise sense fixes that of the Shemitic equivalent.[b]

Tanis is situate in N. lat. 31°, E. long. 31° 55′, on the east bank of the canal which was formerly the Tanitic branch. Anciently a rich plain extended due east as far as Pelusium, about thirty miles distant, gradually narrowing towards the east, so that in a southeasterly direction from Tanis it was not more than half this breadth. The whole of this plain, about as far south and west as Tanis, was anciently known as "the Fields" or "Plains," שְׂדֵה צוֹעַן, "the Marshes," τὰ Ἕλη, Ἑλεμρχία, or "the pasture-lands," Βουκολία. Through the subsidence of the Mediterranean coast, it is now almost covered by the great Lake Menzeleh. Of old it was a rich marsh-land, watered by four of the seven branches of the Nile, the Pathnitic, Mendesian, Tanitic, and Pelusiac, and swept by the cool breezes of the Mediterranean. Tanis, while Egypt was ruled by native kings, was the chief town of this territory, and an important post towards the eastern frontier.

At a remote period, between the age when the pyramids were built and that of the empire, seemingly about B. C. 2080, Egypt was invaded, overrun, and subdued, by the strangers known as the Shepherds, who, or at least their first race, appear to have been Arabs cognate with the Phœnicians. How they entered Egypt does not appear. After a time they made one of themselves king, a certain Salatis, who reigned at Memphis, exacting tribute of Upper and Lower Egypt, and garrisoning the fittest places, with especial regard to the safety of the eastern provinces, which he foresaw the Assyrians would desire to invade. With this view, finding in the Saïte (better elsewhere Sethroïte) nome, on the east of the Bubastite branch, a very fit city called Avaris, he rebuilt, and very strongly walled it, garrisoning it with 240,000 men. He came hither in harvest-time (about the vernal equinox), to give corn and pay to the troops, and exercise them so as to terrify foreigners. This is Manetho's account of the foundation of Avaris, the great stronghold of the Shepherds. Several points are raised by it. We see at a glance that Manetho did not know that Avaris was Tanis. By his time the city had fallen into obscurity, and he could not connect the HA-AWAR of his native records with the Tanis of the Greeks. His account of its early history must therefore be received with caution. Throughout, we trace the influence of the pride that made the Egyptians hate, and affect to despise the Shepherds above all their conquerors, except the Persians. The motive of Salatis is not to overawe Egypt but to keep out the Assyrians; not to terrify the natives but these foreigners, who, if other history be correct, did not then form an important state. The position of Tanis explains the case. Like the other principal cities of this tract, Pelusium, Bubastis, and Heliopolis, it lay on the east bank of the river, towards Syria. It was thus outside a great line of defense, and afforded a protection to the cultivated lands to the east, and an obstacle to an invader, while to retreat from it was always possible, so long as the Egyptians held the river. But Tanis, though doubtless fortified partly with the object of repelling an invader, was too far inland to be the frontier fortress. It was near enough to be the place of departure for caravans, perhaps was the last town in the Shepherd-period, but not near enough to command the entrance of Egypt. Pelusium lay upon the great road to Palestine, — it has been until lately placed too far north [SIN], — and the plain was here narrow, from north to south, so that no invader could safely pass the fortress; but it soon became broader, and, by turning in a southwesterly direction, an advancing enemy would leave Tanis

[a] *Keri*, as in Joshua.

[b] The identification of Zoan with Avaris is due to M. de Rougé.

Digitized by Google

far to the northward, and a bold general would detach a force to keep its garrison in check and march upon Heliopolis and Memphis. An enormous standing militia, settled in the Bucolia, as the Egyptian militia afterwards was in neighboring tracts of the Delta, and with its headquarters at Tanis, would have overawed Egypt, and secured a retreat in case of disaster, besides maintaining hold of some of the most productive land in the country, and mainly for the former two objects we believe Avaris to have been fortified.

Manetho explicitly states Avaris to have been older than the time of the Shepherds; but there are reasons for questioning his accuracy in this matter. The name is more likely to be of foreign than of Egyptian origin, for Zoan distinctly indicates the place of departure of a migratory people, whereas Avaris has the simple signification "abode of departure."

A remarkable passage in the book of Numbers, not hitherto explained, "Now Hebron was built seven years before Zoan in Egypt" (xiii. 22), seems to determine the question. Hebron was anciently the city of Arba, Kirjath-Arba, and was under the rule of the Anakim. These Anakim were of the old warlike Palestinian race that long dominated over the southern Canaanites. Here, therefore, the Anakim and Zoan are connected. The Shepherds who built Avaris were apparently of the Phœnician stock which would be referred to this race as, like them, without a pedigree in the Noachian geographical list. Hebron was already built in Abraham's time, and the Shepherd-invasion may be dated about the same period. Whether some older village or city were succeeded by Avaris matters little: its history begins in the reign of Salatis.

What the Egyptian records tell us of this city may be briefly stated. Apepee, probably Apophis of the XVth dynasty, a Shepherd-king who reigned shortly before the XVIIIth dynasty, built a temple here to Set, the Egyptian Baal, and worshipped no other god. According to Manetho, the Shepherds, after 511 years of rule, were expelled from all Egypt and shut up in Avaris, whence they were allowed to depart by capitulation, by either Amosis or Thummosis (Aahmes or Thothmes IV.), the first and seventh kings of the XVIIIth dynasty. The monuments show that the honor of ridding Egypt of the Shepherds belongs to Aahmes, and that this went occurred about B. C. 1500. Rameses II. embellished the great temple of Tanis, and was followed by his son Memptah.

It is within the period from the Shepherd-invasion to the reign of Memptah, that the sojourn and Exodus of the Israelites are placed. We believe that the Pharaoh of Joseph as well as the oppressors were Shepherds, the former ruling at Memphis and Zoan, the latter probably at Zoan only; though in the case of the Pharaoh of the Exodus, the time would suit the annual visit Manetho states to have been paid by Salatis. Zoan is mentioned in connection with the Plagues in such a manner as to leave no doubt that it is the city spoken of in the narrative in Exodus as that where Pharaoh dwelt. The wonders were wrought "in the field of Zoan" (Ps. lxxviii. 12, 43), שְׂדֵה צֹעַן, which may either denote the territory immediately around the city, or its nome, or even a kingdom (Gesen. *Lex.* s. v. שָׂדֶה). This would accord best with the Shepherd-period; but it cannot be doubted that Rameses II. paid great attention to Zoan, and may have made it a royal residence.

After the fall of the empire, the first dynasty is the XXIst, called by Manetho that of Tanites. Its history is obscure, and it fell before the stronger line of Bubastites, the XXIId dynasty, founded by Shishak. The expulsion of Set from the Pantheon, under the XXIId dynasty, must have been a blow to Tanis: and perhaps a religious war occasioned the rise of the XXIIId. The XXIIId dynasty is called Tanite, and its last king is probably Sethos, the contemporary of Tirhakah, mentioned by Herodotus. At this time Tanis once more appears in sacred history, as a place to which came ambassadors, either of Hoshea, or Ahaz, or else, possibly, Hezekiah: "For his princes were at Zoan, and his messengers came to Hanes" (Is. xxx. 4). As mentioned with the frontier town Tahpanhes, Tanis is not necessarily the capital. But the same prophet perhaps more distinctly points to a Tanite line where saying, in "the burden of Egypt," "the princes of Zoan are become fools: the princes of Noph are deceived" (xix. 13). The doom of Zoan is foretold by Ezekiel: "I will set fire in Zoan" (xxx. 14), where it occurs among the cities to be taken by Nebuchadnezzar.

"The plain of Sán is very extensive, but thinly inhabited: no village exists in the immediate vicinity of the ancient Tanis; and, when looking from the mounds of this once splendid city towards the distant palms of indistinct villages, we perceive the desolation spread around it. The 'field' of Zoan, is now a barren waste: a canal passes through it without being able to fertilize the soil; 'fire' has been set in 'Zoan;' and one of the principal capitals or royal abodes of the Pharaohs is now the habitation of fishermen, the resort of wild beasts, and infested with reptiles and malignant fevers." It is "remarkable for the height and extent of its mounds, which are upwards of a mile from N. to S., and nearly ¾ of a mile from E. to W. The area in which the sacred inclosure of the temple stood is about 1,500 ft. by 1,250, surrounded by mounds of fallen houses. The temple was adorned by Rameses II. with numerous obelisks and most of its sculptures. It is very ruinous, but its remains prove its former grandeur. The number of its obelisks, ten or twelve, all now fallen, is unequaled, and the labor of transporting them from Syene shows the lavish magnificence of the Egyptian kings. The oldest name found here is that of Sesertesen III. of the XIIth dynasty, the latest that of Tirhakah (Sir Gardner Wilkinson's *Handbook*, pp. 221, 222). Recently, M. Mariette has made excavations on this site and discovered remains of the Shepherd-period, showing a markedly-characteristic style, especially in the representation of face and figure, but of Egyptian art, and therefore afterwards appropriated by the Egyptian kings.

R. S. P.

* The past ten years have been rich in discoveries of historical value at *Sán*, the site of the ancient *Avaris*, *Tanis*, or *Zoan*. M. Mariette's excavations have brought to light a colossal statue of Amenembe I. founder of the XIIth dynasty; a colossal statue of Osirtasen I. represented as Osiris; a third of Sévekhotep III. of the XIIIth dynasty; a fourth of another Sévekhotep, not fully identified, but having the prefix of Osirtasen II.; and a fifth colossus of a sovereign whose name is not yet known from any list of kings.

In addition to these, a number of sphinxes of

Digitized by Google

the workmanship have been unveiled. From a personal inspection of these monuments, Count de Rougé states that the art has all the vigor, the nicety, the perfection of the time of the old empire, but the type cannot be confounded with any Egyptian type; so characteristic is its impress that the difference of races at once strikes the eye of the observer. The god Soutekh or Set is also prominent upon these monuments. Here then are indubitable traces of the Hyksos or "Shepherds," who do not appear to have been such ruthless iconoclasts as Egyptian historians have represented them.

The papyrus "Sallier I." establishes the fact that a Shepherd-king built to Set a substantial temple at Avaris, and established in his honor festivals and sacrificial days; and a religious feud arising from the attempt to force this hostile divinity upon the Egyptians seems to have prompted the expulsion of the Shepherds.

There are serious objections to the theory that the Hebrews were in Egypt under the Hyksos. If the Pharaoh of Joseph's time was a Hyksos, how could the name "Shepherd" have been an "abomination" to him, and how could Joseph have secured the isolation of his brethren by introducing them as shepherds? What motive could have led these foreign invaders, if then in power in Egypt, to suppress a kindred people, strangers and shepherds like themselves, and who would have been their natural allies against Egypt, in a civil war? The narrative of the Exodus forbids the supposition that the Hebrews were driven out with the Hyksos, and it is not easy to conceive that they were suffered to remain, if they were in the country at the Hyksos period.

For a full discussion of this question, see Ebers, *Ægypten und die Bücher Mose's;* Chabas, *Les Pasteurs en Égypte*, and the *Bibl. Sacra*, vol. xxvi. p. 581.

Tanis has recently furnished a valuable help to Egyptian philology in a stone containing an inscription of Ptolemy III. Euergetes I. in thirty-seven lines of hieroglyphics, followed by seventy-six of Greek. The complete disinterment of the stone has also very recently brought to light a third, or demotic text of the inscription, also completely preserved. (See *Proceedings of the Amer. Oriental Society*, May, 1870, p. viii.) This Tablet of Canopus remarkably confirms the general system of Champollion. See *Das bilingue Dekret von Kanopus*, von R. Lepsius (Berl. 1867): *Die zweisprachige Inschrift von Tanis*, von Reinisch und Roesler (Wien, 1867); also *Bibl. Sacra*, vol. xxiv. p. 771. J. P. T.

**ZO'AR** (צֹעַר, and twice[a] צוֹעַר [*smallness*]: Samar. throughout צער: Ζόγορα, Σηγώρ, Ζογώρ; Joseph. Ζοάρ, τὰ Ζόαρα, or Ζόαρα: *Segor*). One of the most ancient cities of the land of Canaan [Moab. — S. W.]. Its original name was BELA, and it was still so called at the time of Abram's first residence in Canaan (Gen. xiv. 2, 8). It was then in intimate connection with the cities of the "plain of Jordan" — Sodom, Gomorrah, Admah, and Zeboiim (see also xiii. 10; but not x. 19) — and its king took part with the kings of those cities in the battle with the Assyrian host which ended in their defeat and the capture of Lot. In the general destruction of the cities of the plain, Zoar was spared to afford shelter to Lot, and it was on that occasion, according to the quaint statement of the ancient narrative, that the change in its name took place (xix. 22, 23, 30).[b] It is mentioned in the account of the death of Moses as one of the landmarks which bounded his view from Pisgah (Deut. xxxiv. 3), and it appears to have been known in the time both of Isaiah (xv. 5) and Jeremiah (xlviii. 34). These are all the notices of Zoar contained in the Bible.

1. It was situated in the same district with the four cities already mentioned, namely, in the *Ciccâr*, the "plain" or "circle" "of the Jordan," and the narrative of Gen. xix. evidently implies that it was very near to Sodom — sufficiently near for Lot and his family to traverse the distance in the time between the first appearance of the morning and the actual rising of the sun (vv. 15, 23, 27). The definite position of Sodom is, and probably will always be a mystery, but there can be little doubt that the plain of the Jordan was at the north of the Dead Sea, and that the cities of the plain must therefore have been situated there instead of at the southern end of the lake, as it is generally taken for granted they were. The grounds for this conclusion have been already indicated under SODOM (p. 3068), but it will be well to state them here more at length. They are as follows: —

(*a.*) The northern and larger portion of the lake has undoubtedly existed in, or very nearly in its present form since a date long anterior to the age of Abraham. (The conviction of the writer is that this is true of the whole lake, but every one will agree as to the northern portion, and that is all that is necessary to the present argument.) The Jordan therefore at that date discharged itself into the lake pretty nearly where it does now, and thus the "plain of the Jordan," unless unconnected with the river, must have lain on the north of the Dead Sea.

(*b.*) The plain was within view of the spot from which Abram and Lot took their survey of the country (Gen. xiii. 1–13), and which, if there is any connection in the narrative, was "the mountain east of Bethel," "between Bethel and Ai," with "Bethel on the west and Ai on the east" (xii. 8, xiii. 3). Now the lower part of the course of the Jordan is plainly visible from the hills east of *Beitîn* — the whole of that rich and singular valley spread out before the spectator. On the other hand, the southern half of the Dead Sea is not only too far off to be discerned, but is actually shut out from view by intervening heights.

(*c.*) In the account of the view of Moses from Pisgah the *Ciccâr* is more strictly defined as "the *Ciccâr* of the plain of Jericho" (A. V. "plain of the valley of Jericho"), and Zoar is mentioned in immediate connection with it. Now no person who knows the spot from actual acquaintance, or from study of the topography, can believe that the "plain of Jericho" can have been extended to the southern end of the Dead Sea. The Jerusalem Targum (not a very ancient authority in itself, but still valuable as a storehouse of many ancient traditions and explanations), in paraphrasing this passage, actually identifies Zoar with Jericho — "the plain of the

[a] Gen. xix. 22, 30.

[b] In the Targum Pseudojonathan, to vv. 22, 28, the name of Zoar is given זוֹעַר and the play on the "smallness" of the town is superseded

Digitized by Google

valley of Jericho, the city which produces the palms, that is Zoër" (צֹעַר).[a]

These considerations appear to the writer to render it highly probable that the Zoar of the Pentateuch was to the north of the Dead Sea, not far from its northern end, in the general parallel of Jericho. That it was on the east side of the valley seems to be implied in the fact that the descendants of Lot, the Moabites and Ammonites, are in possession of that country as their original seat when they first appear in the sacred history. It seems to follow that the "mountain" in which Lot and his daughters dwelt when Moab and Ben-Ammi were born, was the "mountain" to which he was advised to flee by the angel, and between which and Sodom stood Zoar (xix. 30, compare 17, 19). It is also in favor of its position north of the Dead Sea, that the earliest information as to the Moabites makes their original seat in the plains of Heshbon, N. E. of the lake, not, as afterwards, in the mountains on the S. E., to which they were driven by the Amorites (Num. xxi. 26).

2. The passages in Isaiah and Jeremiah in which Zoar is mentioned give no clew to its situation. True they abound with the names of places, apparently in connection with it, but they are places (with only an exception or two) not identified. Still it is remarkable that one of these is Elealeh, which, if the modern *el-Aal*, is in the parallel of the north end of the Dead Sea, and that another is the Waters of Nimrim, which may turn out to be identical with *Wady Nimrin*, opposite Jericho. *Wady Seir*, a short distance south of *Nimrin*, is suggestive of Zoar, but we are too ill-informed of the situations and the orthography of the places east of Jordan to be able to judge of this.

3. So much for the Zoar of the Bible. When however we examine the notices of the place in the post-Biblical sources, we find a considerable difference. In these its position is indicated with more or less precision, as at the S. E. end of the Dead Sea. Thus Josephus says that it retained its name (Ζοάρ) to his day (*Ant.* i. 11, § 4), that it was at the further end of the Asphaltic Lake, in Arabia — by which he means the country lying S. E. of the lake, whose capital was Petra (*B. J.* iv. 8, § 4; *Ant.* xiv. 1, § 4). The notices of Eusebius are to the same tenor: the Dead Sea extended from Jericho to Zoar (Ζοορῶν; *Onom.* Θαλασσα η αλυκη). Phæno lay between Petra and Zoar (*Ib.* Φινών). It still retained its name (Ζοαρά), lay close to (παρακειμένη) the Dead Sea, was crowded with inhabitants, and contained a garrison of Roman soldiers; the palm and the balsam still flourished, and testified to its ancient fertility (*Ib.* Βαλά).

To these notices of Eusebius St. Jerome adds little or nothing. Paula in her journey beholds Segor (which Jerome gives on several occasions as the Hebrew form of the name in opposition to Zoora or Zoara, the Syrian form) from Caphar Baructha (possibly *Beni Naim*, near Hebron), at the same time with Engaddi, and the land where once stood the four cities;[b] but the terms of the statement are too vague to allow of any inference as to its position (*Epist.* cviii. § 11). In his commentary on Is. xv. 5, he says that it was "in the boundary of the Moabites, dividing them from the land of the Philistines," and thus justifies his use of the word *sectis* to translate בְּרִיחֶהָ (A. V. "his fugitives," marg. "borders;" Gesen. *flüchtlinge*). The *terra Philisthiim*, unless the words are corrupt, can only mean the land of Palestine[c] — *i. e.* (according to the inaccurate usage of later times) of Israel — as opposed to Moab. In his *Quæstiones Hebraicæ* on Gen. xix. 30 (comp. xiv. 3) Jerome goes so far as to affirm the accuracy of the Jewish conjecture, that the later name of Zoar was Shalisha: "Bale primum et postea Salisa appellata" (comp. also his comment on Is. xv. 5). But this is probably grounded merely on an interpretation of *shelishiyeh* in Is. xv. 5, as connected with *bela*, and as denoting the "third" destruction of the town by "earthquakes."[d]

In more modern times Zoar is mentioned by the Crusading historians. Fulcher (*Gesta Dei*, p. 406, quoted by von Raumer, p. 239) states that "having encircled (*girato*) the southern part of the lake on the road from Hebron to Petra, we found there a large village which was said to be Segor, in a charming situation, and abounding with dates. Here we began to enter the mountains of Arabia." The palms are mentioned also by William of Tyre (xxii. 30) as being so abundant as to cause the place to be called *Villa Palmarum*, and *Palmer* (*i. e.* probably *Paumier*). Abulfeda (cir. A. D. 1320) does not specify its position more nearly than that it was adjacent to the lake and the *Ghôr*, but he testifies to its then importance by calling the lake after it — Bahretzeghor (see, too, Ibn Idris, in Reland, p. 272). The natural inference from the description of Fulcher is, that Segor lay in the *Wady Kerak*, the ordinary road, then and now, from the south of the Dead Sea to the eastern highlands. The conjecture of Irby and Mangles (June 1, and see May 9), that the extensive ruins which they found in the lower part of this wady were those of Zoar, is therefore probably accurate. The name *Dra'a* or *Dera'ah* (ذراع), which they, Poole (*Geogr. Journ.* xxvi. 63), and Burckhardt (July 15), give to the valley, may even without violence be accepted as a corruption of Zoar.

Zoar was included in the province of Palestina Tertia, which contained also Kerak and Areopolis. It was an episcopal see, in the patriarchate of Jerusalem and archbishopric of Petra; at the Council of Chalcedon (A. D. 451) it was represented by its bishop Musonius, and at the Synod of Constantinople (A. D. 536) by John (Le Quien, *Oriens Christ.* iii. 743–746).

4. To the statements of the mediæval travellers just quoted there are at least two remarkable exceptions. (1.) Brocardus (cir. A. D. 1290), the author of the *Descriptio Terræ Sanctæ*, the standard "Handbook to Palestine" of the Middle Ages, the work of an able and intelligent resident in the country, states (cap. vii.) that "five leagues[e]

[a] The Samaritan Text and Version afford no light on this passage, as they, for reasons not difficult to divine, have thrown the whole into confusion

[b] None of these places, however, can be seen from *Beni Naim* (Rob. i. 491).

[c] Similarly, Stephanus of Byzantium places Zoar ἐν Παλαιστίνῃ (quoted by Reland, p. 1065).

[d] See Rahmer, *Die Hebr. Traditt. des Hieronymus* (Breslau, 1861), p. 29.

[e] The distance from Jericho to En-gedi is understated here. It is really about 24 English miles.

Digitized by Google

(Isaeus) to the south of Jericho is the city Segor, situated beneath the mountain of Engaddi, between which mountain and the Dead Sea is the statue of salt." [a] True he confesses that all his efforts to visit the spot had been frustrated by the Saracens; but the passage bears marks of the greatest desire to obtain correct information, and he must have nearly approached the place, because he saw with his own eyes the "pyramids" which covered the "wells of bitumen," which he supposes to have been those of the vale of Siddim. This is in curious agreement with the connection between En-gedi and Zoar implied in Jerome's Itinerary of Paula. (2.) The statement of Thietmar (A. D. 1217) is even more singular. It is contained in the 11th and 12th chapters of his *Peregrinatio* (ed. Laurent, Hamburgi, 1857). After visiting Jericho and Gilgal he arrives at the "fords of Jordan" (xi. 20), where Israel crossed and where Christ was baptized, and where then, as now, the pilgrims bathed (22). Crossing this ford (33) he arrives at "the field and the spot where the Lord overthrew Sodom and Gomorra." After a description of the lake come the following words: "On the shore of this lake, about a mile (*ad miliare*) from the spot at which the Lord was baptized, is the statue of salt into which Lot's wife was turned" (47). "Hence I came from the lake of Sodom and Gomorra, and arrived at Segor, where Lot took refuge after the overthrow of Sodom; which is now called in the Syrian tongue Zora, but in Latin the city of palms. In the mountain hard by this Lot sinned with his daughters (xii. 1–3). After this I passed the vineyard of Benjamin (?) and of Engaddi. . . . . Next I came into the land of Moab and to the mountain in which was the cave where David hid . . . . leaving on my left hand Sethim (Shittim), where the children of Israel tarried. . . . . At last I came to the plains of Moab, which abound in cattle and grain. . . . . A plain country, delightfully covered with herbage, but without either woods or single trees; hardly even a twig or shrub (4–15). . . . After this I came to the torrent Jabbok" (xiv. 1).

Making allowance for the confusion into which this traveller seems to have fallen as to Engaddi and the cavern of David, it seems almost certain from his description that, having once crossed the Jordan, he did not recross it,[b] and that the site of Sodom and Gomorrah, the pillar of salt, and Zoar, were all seen by him on the east of the Dead Sea — the two first at its northeast end. Taken by itself this would not perhaps be of much weight, but when combined with the evidence which the writer has attempted to bring forward that the "cities of the plain" lay to the north of the lake, it seems to him to assume a certain significance.

5. But putting aside the accounts of Brocardus and Thietmar, as exceptions to the ordinary mediæval belief which placed Zoar at the *Wady ed-Dra'a*, how can that belief be reconciled with the inference drawn above from the statements of the Pentateuch? It agrees with those statements in one particular only, the position of the place on the eastern side of the lake. In everything else it disagrees not only with the Pentateuch, but with the locality ordinarily [c] assigned to Sodom. For if *Usdum* be Sodom, at the S. W. corner of the lake, its distance from the *Wady ed-Dra'a* (at least 15 miles) is too great to agree with the requirements of Gen. xix.

This has led M. de Saulcy to place Zoar in the *Wady Zuweirah*, the pass leading from Hebron to the Dead Sea. But the names Zuweirah and Zoar are not nearly so similar in the originals as they are in their western forms, and there is the fatal obstacle to the proposal that it places Zoar on the west of the lake, away from what appears to have been the original cradle of Moab and Ammon.[d] If we are to look for Zoar in this neighborhood, it would surely be better to place it at the *Tell um-Zoghal*,[e] the latter part of which name (زوغل) is almost literally the same as the Hebrew Zoar. The proximity of this name and that of *Usdum*, so like Sodom, and the presence of the salt mountain — to this day splitting off in pillars which show a rude resemblance to the human form — are certainly remarkable facts; but they only add to the general mystery in which the whole of the question of the position and destruction of the cities is involved, and to which the writer sees at present no hope of a solution.

In the A. V. of 1611 the name Zoar [Ἀδάρ: *Isaar*, or *et Sahar*, ed. 1590] is found in 1 Chr. iv. 7, following (though inaccurately) the *Keri* (וְצֹחָר). The present received text of the A. V. follows (with the insertion of "and") the *Cethib* (וְיִצְחָר). In either case the name has no connection with Zoar proper, and is more accurately represented in English as Zohar (Tsochar) or Jezohar. [JEZOAR.] G.

* The theory offered above, "that the Zoar of the Pentateuch was to the north of the Dead Sea, not far from its northern end, in the general parallel of Jericho," is, we believe, original with its author; and we present some reasons for discarding it, and in favor of the received opinion that it lay southeast of the sea.

Zoar was a frontier town of Moab. The "burden" or wail of Moab which appears in the prophecy of Isaiah (xv.) and is repeated in that of Jeremiah (xlviii.) both possibly derived from a more ancient common source, associates the town with the territory, and Mr. Grove includes it in his list of the towns of Moab. The borders of Israel and Moab touched, as we know (Num. xxiv. 3), near the southeast corner of the Salt Sea. Zoar, then,

---

[a] In the map to the *Theatrum Terræ Sanctæ* of Adrichomius, Sodom is placed within the lake, at its N. W. end; Segor near it on the shore; and the Statua Salis close to the mouth of the torrent (apparently Kidron).

[b] Thietmar did not return to the west of the Jordan. From the torrent Jabbok he ascended the mountains of Abarim. He then recrossed the plain of Heshbon to the river Arnon; and passing the ruins of Robda (Rabba), and Crach (Kerak), and again crossing the Arnon (probably the *Wady el-Ahsy*), reached the top of a very high mountain, where he was half killed by the cold. Thence he journeyed to Petra and Mount Hor, and at length reached the Red Sea His itinerary is full of interest and intelligence.

[c] Though incorrectly, if the writer's argument for the position of the plain of Jordan is tenable.

[d] Dr. Robinson's arguments against this proposal of De Saulcy (*Bibl. Res.* ii. 107, 517), though they might be more pleasant in tone, are unanswerable in substance.

[e] The *Redjam el-Mezorrhat* of De Saulcy. The *gh* and *rrh* each strive to represent the Arabic *ghain*, which is pronounced like a guttural rolling *r*.

was east of the boundary, and Sodom west of it, and both were near it.

The first allusion to the spot (Gen. xiii. 10) accords entirely with the position which we advocate, and does not readily admit of any other construction. The sacred writer refers to the extent of the watered and fruitful plain of Jordan, before the Lord destroyed the cities, "as thou comest unto Zoar." Like a later description, in which Zoar is a terminus, the reader naturally understands a reference to the southern extremity of the plain. If Zoar had been east of the Jordan, on a line with Jericho, the description would be unnatural. It might still be claimed to be an allusion to the breadth of the valley divided by the Jordan, but it would exclude the more pertinent and manifest allusion to its length. So far is this "narrative in Genesis" from seeming to "state positively" that the site "lay at the northern end of the Dead Sea," that it becomes unintelligible to us on any other hypothesis than that it lay at the southern end. And the description is perfectly natural, though the terminus was not actually visible.

The above interpretation, which Mr. Grove sets aside as impossible, he has himself put forward as unquestioned and unencumbered, and in previous articles it stands as his own. His exposition (see LOT, vol. ii. p. 1685 *a*) reads thus: —

"The two Hebrews looked over the comparatively empty land in the direction of Sodom, Gomorrah, and Zoar (xiii. 10). And Lot lifted up his eyes toward the left, and beheld all the precinct of the Jordan that it was well-watered everywhere; like a garden of Jehovah, like that unutterably green and fertile land of Egypt he had only lately quitted. Even from that distance through the clear air of Palestine, can be distinctly discovered the long and thick masses of vegetation which fringe the numerous streams that descend from the hills on either side, to meet the central stream in its tropical depths. And what it now is immediately opposite Bethel, such it seems then to have been 'even to Zoar,' to the furthest extremity of the sea which now covers the 'valley of the fields' ('Valley of Siddim,' Siddim fields), the fields of Sodom and Gomorrah. So Lot 'chose all the precinct of the Jordan, and journeyed east,' down the ravines which give access to the Jordan Valley; and then when he reached it, turned again southward and advanced as far as Sodom (11, 12)." See also BETHEL, vol. i. p. 289.

Besides the passages in Genesis and the two in the prophecies which have been referred to, Zoar is named in but one other place in the Bible (Deut. xxxiv. 3), and that is decisive against Mr. Grove's theory. Moses had ascended "the mountain of Nebo, to the top of Pisgah, that is over against Jericho," to take his view of the Promised Land. The Lord showed him its different sections, and among others "the plain of the valley of Jericho, the city of palm-trees unto Zoar." Mount Nebo has been identified, if we accept Mr. Tristram's selection, and if we do not, Mr. Grove has stated precisely where, on the testimony of the Bible, and also of Josephus (*Ant.* iv. 8, § 48) and the Fathers, it must be, "facing Jericho on the east of Jordan." If, now, "the Zoar of the Pentateuch was to the north of the Dead Sea, not far from its northern end, in the general parallel of Jericho" "on the east side of the valley," it must have lain between Jericho and Nebo, near the base of the latter, a supposition which renders unintelligible the descriptive sketch just quoted, as also Mr. Grove's own declaration that the site which, on this theory, thus lay directly below the prophet-leader, was "one of the landmarks which bounded his view from Pisgah."

The two definite references in the Pentateuch to the extent of the plain obviously mean the same. They both describe it as seen lengthwise from northern summits, the one on the one side, and the other on the other side of the valley. The incredible feature of Mr Grove's theory is, that it makes Lot and Moses look across the plain of the Jordan eastward and westward on the same parallel, extending in both cases "unto Zoar," though one viewed it from the western hills, and the other from the eastern.

Has Mr. Grove considered, withal, the relation of the river Jordan to this theory? Lot was admonished not to tarry in the plain, but escape with all haste to the mountain — flee, that is, from the plain west of the river in the territory of Canaan, where Mr. Grove places Sodom, to the mountain on the further border of the plain east of the river in the territory of Moab, near which he places Zoar, crossing with his family, without any apparent facilities, the deep and rapid river.

Lot subsequently ascended the mountain and dwelt in a cave with his daughters; and thence sprung the mountain-tribes of Moab and Ammon. The heights southeast of the Dead Sea have been the traditional seat and radiating "centre," as stated by Mr. Grove, of these "brother tribes." They pushed northward and eastward and spread over a large territory, keeping distinct, and the former were afterwards dispossessed of theirs as far south as the line of the Arnon by the Amorites, but retained their original fastnesses (Num. xxi. 26). This natural interpretation of the sacred record is sustained by Ritter, who has sketched with great clearness the territories and courses of conquest of the "tribes outside of Canaan" (*Geog. of Palestine*, ii. 149, 151).

The argument adduced above, "that the earliest information as to the Moabites makes their original seat in the plains of Heshbon, northeast of the lake, not as afterwards in the mountains on the southeast, to which they were driven by the Amorites (Num. xxi. 26)" has been refuted by Mr. Grove himself in a preceding article (MOAB, vol. iii. p. 1980 *b*): "The warlike Amorites, either forced from their original seats on the west, or perhaps lured over by the increasing prosperity of the young nation, crossed the Jordan, and overran the richer portion of the territory on the north, driving Moab back to his original position behind the natural bulwark of the Arnon."

In the former of these passages, the "original seat" of the Moabites is represented to have been northeast of the sea. In the latter their "original position" is represented to have been southeast of the sea, and again, in the same article, "the southeastern border of the Dead Sea" is spoken of as "their original seat." In the former they are said to have been driven by the Amorites out of their original seat; and in the latter they are said to have been driven by the same into their original position.

We accept the second interpretation as that which lies on the face of the sacred narrative, and has been received by all Biblical students until now. And in the highlands above what we claim to have been the site of Zoar, are identified, at this day, the ruins of the strongholds, Kir of Moab and Ar of Moab. To remove the cradle of these tribes north

Digitized by Google

ward is to disturb and dislocate the associations and allusions of the sacred writers, as universally understood by their readers.

Mr. Grove suggests that "if *Usdum* be Sodom, its distance from the *Wady ed-Dra'a* (at least 15 miles) is too great to agree with the requirements of Gen. xix." — assuming the necessity of the present circuitous route. While we recognize in the name of this singular mountain a memorial of ancient Sodom, it is not necessary to suppose that it designates the exact site of the city, nor is it certain that Zoar lay at the mouth of *Wady Kerak*. We only claim that both places lay not very far from a point southeast of the Dead Sea, and this we think demonstrable. We would suggest that a fugitive family might even reach *Wady ed-Dra'a* from near the site of *Khashm Usdum* with less difficulty and in less time (especially in the direct line which may then have been practicable) than they could cross the Jordan and reach the base of the eastern mountains on the parallel of Jericho.

The allusions to this site by Josephus are explicit. He says: "It is to this day called Zoar" (*Ant.* i. 11, § 4). In describing the lake Asphaltites, he says: "It extended as far as Zoar in Arabia" (*B. J.* iv. 8, § 4) by which he plainly designates its southern point; conformably with his own definition. "Arabia is a country that borders upon Judæa" (*Ant.* xiv. 1, § 4). Ritter, with his usual thoroughness, collates the early post-Biblical testimony, and says: "Zoar can only be looked for at the southern extremity of the Dead Sea." Of the two "mediæval travellers" quoted above as apparent exceptions to this general current of testimony and belief, only one wrote from personal observation, and both are nearly unintelligible. Their confused testimony, on which no stress is laid, is not worth sifting; and that it has no weight with the writer is evident from his admission in another place: "that the Zoar of Josephus, Jerome, and the Crusaders probably lay where Dr. Robinson places it" (SODOM, p 3069 *a*). The cautious Professor, who devoted a special paper to the site of Zoar (*Bibl. Res.* ii. 648–651), speaks of it without references in his latest work as an ascertained site: "Zoar, as we know, was in the mouth of *Wady Kerak*, as it opens upon the neck of the peninsula" (*Phys. Geog.* p. 233). While this may have been the exact site of Zoar, we have no data which gives us absolute knowledge, and probably never shall have. His earlier conclusion was impregnable: "All these circumstances seem to be decisive as to the position of Zoar on the eastern side of the Dead Sea, at the foot of the mountains near its southern end" (*Bibl. Res.* ii. 649). This is not more positive than Mr. Grove's original statement: "There is no doubt that it [Zoar] was situated on the southeastern border of the Dead Sea." (MOAB, vol. ii. p. 391 *b*. 1st Eng. ed.; comp. iii. 1980 *a*, Amer. ed., for a later alteration.)

Mr. Tristram offers a still stranger theory respecting the site of Zoar. He proposes to place it on the west side of the valley, south of Jericho. He suggests this location without any trace of name or ruin, or any hint of history or tradition, as corresponding with the view granted to Moses from the top of Pisgah. "If we place Zoar, as it naturally would be placed according to the narrative of Lot's escape, at the foot of the hill, between *Wady Dabâr* and *Ras Feshkhah*, we see that here was just the limit of Moses's view, in accordance with the record." (*Land of Israel*, p. 366, 2d ed.) No one can have imagined that the southeast border of the Dead Sea and the walls of Zoar at that point were visible to the prophet from the top of Pisgah, unless, as suggested by Mr. Melvill in his sermon on the "Death of Moses," his vision was aided by God who was with his servant on that lonely summit. The suggestion of Dean Stanley on this point commends itself to us. He says: "It was a view, doubtless, which in its full extent was to be imagined, rather than actually seen. The foreground of the picture alone was clearly discernible; its dim distances were to be supplied by what was beyond, though suggested by what was within the range of the actual prospect of the seer" (*S. & P.* p. 295).

Mr. Tristram's own description is as full a confirmation of the sacred record as we could have anticipated from a visitor who should identify the locality and describe the scene. In selecting this site, without any indication, local or traditional, he sets aside, without answering it, the array of evidence convincing to Mr. Grove, as to the writers of note who preceded him, which makes the Zoar of the Pentateuch a town of Moab on the east side of the valley. And by no possible interpretation can the plaintive cry and panic flight, recorded in "the burden of Moab," be associated with a city off on the northwestern shore of the sea: "My heart shall cry out for Moab; his fugitives shall flee unto Zoar, an heifer of three years old; for by the mounting up of Luhith with weeping shall they go it up; for in the way of Horonaim, they shall raise up a cry of destruction" (Is. xv. 5). "From the cry of Heshbon even unto Elealah, and even unto Jahaz, have they uttered their voice, from Zoar even unto Horonaim, as an heifer of three years old; for the waters also of Nimrim shall be desolate" (Jer. xlviii. 34).

A fuller examination of Mr. Tristram's positions may be found in *Bibl. Sac.* (1868), xxv. 136–143. In a private letter since written, Mr. T. intimates his relinquishment of his published theory. For further argument against the theory that the Pentapolis lay north of the sea, as applied to the other cities, see under SODOM (Amer. ed.). S. W.

## ZO'BA or ZO'BAH (צוֹבָא, צוֹבָה [*statue, public place*]: Σουβά; [2 Sam. viii. 12; 2 Chr. viii. 3, Alex. Σωβα; 1 Chr. xix. 6, Rom Vat. Σωβδλ, FA. Σωβα; 2 Chr. viii. 3, Rom. Vat. Βαι]σωβα; Ps. lx., title, Σοβδλ, Sin. Σωβαλ; 2 Sam. xxiii. 36, Πολυδυνάμεως, Alex. πολλυς δυναμεως:] *Soba*, [once] *Suba*, [once *Sobal*]) is the name of a portion of Syria, which formed a separate kingdom in the time of the Jewish monarchs, Saul, David, and Solomon. It is difficult to fix its exact position and limits; but there seem to be grounds for regarding it as lying chiefly eastward of Cœle-Syria, and extending thence northeast and east, towards, if not even to the Euphrates. [SYRIA.] It would thus have included the eastern flank of the mountain-chain which shuts in Cœle-Syria on that side, the high land about Aleppo, and the more northern portion of the Syrian desert.

Among the cities of Zobah were a Hamath (2 Chr. viii. 3), which must not be confounded with "Hamath the Great" (HAMATH-ZOBAH); a place called Tibhath or Betah (2 Sam. viii. 8; 1 Chr. xviii. 8), which is perhaps *Taibeh*, between Palmyra and Aleppo; and another called Berothai, which has been supposed to be Beyrût. See

Digitized by Google

Winer, *Realwörterbuch*, vol. i. p. 155.) This last supposition is highly improbable, for the kingdom of Hamath must have intervened between Zobah and the coast. [Berothah.]

We first hear of Zobah in the time of Saul, when we find it mentioned as a separate country, governed apparently by a number of kings who own no common head or chief (1 Sam. xiv. 47). Saul engaged in war with these kings, and "vexed them," as he did his other neighbors. Some forty years later than this, we find Zobah under a single ruler, Hadadezer, son of Rehob, who seems to have been a powerful sovereign. He had wars with Toi, king of Hamath (2 Sam. viii. 10), while he lived in close relations of amity with the kings of Damascus, Beth-Rehob, Ish-tob, etc., and held various petty Syrian princes as vassals under his yoke (2 Sam. x. 19). He had even a considerable influence in Mesopotamia, beyond the Euphrates, and was able on one occasion to obtain an important auxiliary force from that quarter (*ibid.* 16; compare title to Ps. lx.). David, having resolved to take full possession of the tract of territory originally promised to the posterity of Abraham (2 Sam. viii. 3; compare Gen. xv. 18), attacked Hadadezer in the early part of his reign, defeated his army, and took from him a thousand chariots, seven hundred (seven thousand, 1 Chr. xviii. 4) horsemen, and 20,000 footmen. Hadadezer's allies, the Syrians of Damascus, having marched to his assistance, David defeated them in a great battle, in which they lost 22,000 men. The wealth of Zobah is very apparent in the narrative of this campaign. Several of the officers of Hadadezer's army carried "shields of gold" (2 Sam. viii. 7), by which we are probably to understand iron or wooden frames overlaid with plates of the precious metal. The cities, moreover, which David took, Betah (or Tibhath) and Berothai, yielded him "exceeding much brass" (ver. 8). It is not clear whether the Syrians of Zobah submitted and became tributary on this occasion, or whether, although defeated, they were able to maintain their independence. At any rate a few years later, they were again in arms against David. This time the Jewish king acted on the defensive. The war was provoked by the Ammonites, who hired the services of the Syrians of Zobah, among others, to help them against the people of Israel, and obtained in this way auxiliaries to the amount of 33,000 men. The allies were defeated in a great battle by Joab, who engaged the Syrians in person with the flower of his troops (2 Sam. x. 9). Hadadezer, upon this, made a last effort. He sent across the Euphrates into Mesopotamia, and "drew forth the Syrians that were beyond the river" (1 Chr. xix. 16), who had hitherto taken no part in the war. With these allies and his own troops he once more renewed the struggle with the Israelites, who were now commanded by David himself, the crisis being such as seemed to demand the presence of the king. A battle was fought near Helam — a place, the situation of which is uncertain (Helam) — where the Syrians of Zobah and their new allies were defeated with great slaughter, losing between 40,000 and 50,000 men. After this we hear of no more hostilities. The petty princes hitherto tributary to Hadadezer transferred their allegiance to the king of Israel, and it is probable that he himself became a vassal to David.

Zobah, however, though subdued, continued to cause trouble to the Jewish kings. A man of Zobah, one of the subjects of Hadadezer — Rezon, son of Eliadah — having escaped from the battle of Helam, and "gathered a band" (i. e. a body of irregular marauders), marched southward, and contrived to make himself master of Damascus, where he reigned (apparently) for some fifty years, proving a fierce adversary to Israel all through the reign of Solomon (1 K. xi. 23–25). Solomon also was (it would seem) engaged in a war with Zobah itself. The Hamath-Zobah, against which he "went up" (2 Chr. viii. 3), was probably a town in that country which resisted his authority, and which he accordingly attacked and subdued. This is the last that we hear of Zobah in Scripture. The name, however, is found at a later date in the Inscriptions of Assyria, where the kingdom of Zobah seems to intervene between Hamath and Damascus, falling thus into the regular line of march of the Assyrian armies. Several Assyrian monarchs relate that they took tribute from Zobah, while others speak of having traversed it on their way to or from Palestine. G. R.

**ZOBE'BAH** (צֹבֵבָה [*slow moving*]: Ἀμ Βαθά; Alex. Ἀωβηβα: *Sobeba*). Son of Coz, in an obscure genealogy of the tribe of Judah (1 Chr iv. 8).

**ZO'HAR** (צֹחַר [*whiteness*]: Ζααρ: *Seor*). 1. Father of Ephron the Hittite (Gen. xxiii. 8, xxv. 9).

2. (*Sohar, Soar.*) One of the sons of Simeon (Gen. xlvi. 10; Ex. vi. 15); called Zerah in 1 Chr. iv. 24.

* 3. Incorrectly printed Zoar (A. V. ed. 1611, later eds. Jezoar), 1 Chr. iv. 7. [Zoar, p. 3641 *b*.] A.

**ZOHE'LETH, THE STONE** (אֶבֶן הַזֹּחֶלֶת [see below]: Λίθῃ τοῦ Ζωελεθί [Vat. -θει]; Alex. τον λιθον του Ζωελεθ: *lapis Zoheleth*). This was "by En-Rogel" (1 K. i. 9); and therefore, if En-Rogel be the modern *Um-ed-Deroj*, this stone, "where Adonijah slew sheep and oxen," was in all likelihood not far from the Well of the Virgin. [En-Rogel.] The Targumists translate it "the rolling stone;" and Jarchi affirms that it was a large stone on which the young men tried their strength in attempting to roll it. Others make it "the serpent stone" (Gesen.), as if from the root זָחַל, "to creep." Jerome simply says, "Zoelet tractum sive protractum." Others connect it with running water: but there is nothing strained in making it "the stone of the conduit" (מִזְחִילָה, *Mazchelah*), from its proximity to the great rock-conduit or conduits that poured into Siloam. Bochart's idea is that the Hebrew word *zuhel* denotes "a slow motion" (*Hieroz.* part i. bk. 1, c. 9): "the fullers here pressing out the water which dropped from the clothes that they had washed in the well called Rogel." If this be the case, then we have some relics of this ancient custom at the massive breastwork below the present *Birket el-Hamra*, where the donkeys wait for their load of skins from the well, and where the Arab washerwomen may be seen to this day beating their clothes.[a]

[a] We give the following Rabbinical note on Zoheleth, from the Arabic commentary of Tanchum of Jerusalem, translated by Haarbrucker: —

"Ver. 9. הזוחלת verbum זחל significationem

The practice of placing stones, and naming them from a person or an event, is very common. Jacob did so at Bethel (Gen. xxviii. 22, xxxv. 14; see Bochart's *Canaan*, pp. 785, 786); and he did it again when parting from Laban (Gen. xxxi. 45). Joshua set up stones in Jordan and Gilgal, at the command of God (Josh. iv. 9–20); and again in Shechem (Josh. xxiv. 26). Near Beth-shemesh there was the *Eben-gedolah* ("great stone," 1 Sam. vi. 14), called also *Abel-gedolah* ("the great weeping," 1 Sam. vi. 18). There was the *Eben-Bohan*, south of Jericho, in the plains of Jordan (Josh. xv. 6, xviii. 17), "the stone of Bohan the son of Reuben," the Ehrenbreitstein of the *Ciccâr*, or "plain" of Jordan, a memorial of the son or grandson of Jacob's eldest born, for which the writer once looked in vain, but which Felix Fabri in the 15th century (*Evagat.* ii. 32) professes to have seen. The Rabbis preserve the memory of this stone in a book called *Eben-Bohan*, or the touchstone (*Chron of Rabbi Joseph*, transl by Biallobloizky, i. 192). There was the stone set up by Samuel between Mizpeh and Shen, *Eben-Ezer*, "the stone of help" (1 Sam. vii. 11, 12). There was the *Great Stone* on which Samuel slew the sacrifices, after the great battle of Saul with the Philistines (1 Sam. xiv. 33). There was the *Eben-Ezel* ("lapis discessus vel abitus, a discessu Jonathanis et Davidis," Simonis, *Onom.* p. 156), where David hid himself, and which some Talmudists identify with Zoheleth. Large stones have always obtained for themselves peculiar names, from their shape, their position, their connection with a person or an event. In the Sinaitic Desert the writer found the *Hajar el-Rekab* ("stone of the rider"), *Hajar el-Ful* ("stone of the bean"), *Hajar Musa* ("stone of Moses"). The subject of *stones* is by no means uninteresting, and has not in any respect been exhausted. (See the Notes of De Sola and Lindenthal in their edition of *Genesis*, pp. 175, 226; Bochart's *Canaan*, p. 785; Vossius *de Idolatr. vi.* 38; Scaliger *on Eusebius*, p. 198; Heraldus *on Arnobius*, bk. vii., and Elmenhorstius *on Arnobius*; also a long note of Ouselius in his edition of *Minucius Felix*, p. 15; Calmet's *Fragments*, Nos. 166, 735, 736; Kitto's *Palestine*. See, besides, the works of antiquaries on stones and stone circles; and an interesting account of the curious Phœnician *Hajar Chem* in Malta, in Tallack's recent volume on that island, pp. 115–127) H. B.

* It should be added that M. Clermont-Ganneau, connected with the French consulate at Jerusalem, reports the supposed recovery of Zoheleth in the present *En-Zehwele*, the name of a rocky plateau nearly in the centre of the line along which stretches the village of SILOAM (which see): the western face, cut perpendicularly, slightly overhangs the valley. He assumes this to be *the stone of Zoheleth*, near (אֶבֶן) En-Rogel (1 K. i. 9), though the Hebrew and the Arabic names differ, as *Zohelet* and *Zehwele*. He proposes also to identify *En-Rogel* with the Virgin's Fountain, and not with *Bîr Eyub*: the former being only 60 metres from *Zehwele*, while the latter is 700 metres and the Pool of Siloam 400. He suggests further, that on this supposition we can more easily trace the line which separated the territories of Benjamin and Judah as stated in Josh. xv. 7, xviii. 16. He maintains that the *fellahin* divide the valley of the Kedron into three sections, the second of which, extending from the southeast angle of the Haram to the confluence at the north of *Bîr Eyub*, they call *Wady Fer'aun*, Pharaoh's Valley, i. e., as the name imports in that application, "Valley of the King;" and the front of the valley so designated is precisely that which the *King's Gardens* (GARDEN, i. 870) used to occupy (*Quarterly Statement of the P. E. Fund*, No. v., pp. 251–253). H.

**ZO'HETH** (זוֹחֶת [*corpulent, strong*, Fürst]: Ζωδι; Alex. Ζωχαθ: *Zoheth*). Son of Ishi of the tribe of Judah (1 Chr. iv. 20).

**ZO'PHAH** (צוֹפָח [*a cruse*]: Ζωφά; [Vat. in ver. 35, Ζωχαθ:] Alex. [in ver. 35] Ζωφαρ: *Supha*). Son of Helem, or Hotham, the son of Heber, an Asherite (1 Chr. vii. 35, 36).

**ZO'PHAI** [2 syl.] (צוֹפַי [patr.]: Ζουφί; [Vat. Ζουφει:] *Sophai*). A Kohathite Levite, son of Elkanah and ancestor of Samuel (1 Chr. vi. 26 [11]). In ver. 35 he is called ZUPH.

**ZO'PHAR** (צוֹפַר [perh. *sparrow*]: Ζωφάρ: *Sophar*). One of the three friends of Job (Job ii. 11, xi. 1, xx. 1, xlii. 9). He is called in the Hebrew "the Naamathite," and in the LXX. "the Minsean," and "the king of the Minseans."

**ZO'PHIM, THE FIELD OF** (שְׂדֵה צֹפִים [prob. *field of droppings*, i. e. *fertile*]: ἀγρὸς σκοπιᾶς: *locus sublimis*). A spot on or near the top of Pisgah, from which Balaam had his second view of the encampment of Israel (Num. xxiii. 14).

---

trepidationis habet et reptationis et cunctationis in incessu. Inde Saturnum זחל appellaverunt propter multos ejus regressus incessusque retrogrados. Hinc sententia est in verbis זוחלתי ואירא (*Hi.* 32, 6) *i. e.* cunctabar vobis respondere consiliumque meum vobiscum communicare, propterea quia vos verebar et gravitatem ætatis vestræ admirabar. Serpentes זוחלי עפר appellantur, quia in terra serpunt, et ob incessum suum quasi trepidantem cunctantemque. Inde perro dicunt: (*Sabb.* fol 65, *b.*) שלא ירבו הנוטפין על הזוחלין (vid. *Mechin Gibeoneh*, cap. 5), והמים נחלין ויצאין *e.* aqua leniter fluens in terra. Fortasse igitur אבן הזוחלת similiter explican fuit est, nimirum lapis volutatus et hic illic tractus, quem sæpe quasi ludentes volvebant; aut census est eum per se fuisse teretem (volubilem) acclivitatis instar, cujus latus alterum elatius, alterum depressius esset in modum pontis extructi, in quo ad locum altiorem sine gradibus ascendatur; quem כבש vocaverunt qualemque ad altare struxerunt, ut eo ascenderent, quum ad altare per gradus ascendere non liceret (Ex. xx. 23). Nec absurdum mihi videtur eundem fuisse hunc lapidem atque eum, qui in Davidis Jonathanique historia אבן האזל vocatus est, quem interpretantur lapidem viatorum, ad quem videlicet viatores devertebant Targum h. l. אבן סכורא transtulit, *i. e.* altus; fortasse enim lapis altus fuit et elatus, quem viatores e longinquo conspicerent."

If the word *sâdeh* (rendered "field") may be taken in its usual sense, then the "field of Zophim" was a cultivated spot[a] high up on the top of the range of Pisgah. But that word is the almost invariable term for a portion of the upper district of Moab, and therefore may have had some local sense which has hitherto escaped notice, and in which it is employed in reference to the spot in question. The position of the field of Zophim is not defined, it is only said that it commanded merely a portion of the encampment of Israel. Neither do the ancient versions afford any clew. The Targum of Onkelos, the LXX., and the Peshito-Syriac take Zophim in the sense of "watchers" or "lookers-out," and translate it accordingly. But it is probably a Hebrew version of an aboriginal name, related to that which in other places of the present records appears as Mizpeh or Mizpah.[b] May it not be the same place which later in the history is mentioned (once only) as MIZPAH-MOAB?

Mr. Porter, who identifies *Attârûs* with Pisgah[c] mentions (*Handbook*, p. 300 *a*) that the ruins of *Main*, at the foot of that mountain, are surrounded by a fertile and cultivated plain, which he regards as the field of Zophim. G.

* The gently sloping and turf-clad brow, a mile and a half west of *Main*, and eight miles north of *'Attârûs*, which Tristram proposes as the site of Nebo, he also suggests as the probable "field of Zophim." (*Land of Israel*, p. 540, 2d ed.) [NEBO, Amer. ed.] S. W.

**ZO'RAH** (צָרְעָה [perh. *sinking down, low ground*]: Σαράθ, Σαραα [Vat. Josh. xiii. 2, Σαραλ]; Alex. Σαραα, Σαρα, Αραα; Joseph. Σαρίασα: *Sarua*). One of the towns in the allotment of the tribe of Dan (Josh. xix. 41). It is previously mentioned (xv. 33) in the catalogue of Judah, among the places in the district of the *Shefelah* (A. V. ZOREAH). In both lists it is in immediate proximity to ESHTAOL, and the two are elsewhere named together almost without an exception (Judg. xiii. 25, xvi. 31, xviii. 2, 8, 11; and see 1 Chr. ii. 53). Zorah was the residence of Manoah and the native place of Samson. The place both of his birth and his burial is specified with a curious minuteness as "between Zorah and Eshtaol;" "in Mahaneh-Dan" (Judg. xiii. 25, xvi. 31). In the genealogical records of 1 Chr. (ii. 53, iv. 2), the "Zareathites and Eshtaulites" are given as descended from (*i. e.* colonized by) Kirjath-jearim.

Zorah is mentioned amongst the places fortified by Rehoboam (2 Chr. xi. 10), and it was re-inhabited by the men of Judah after the return from the Captivity (Neh. xi. 29, A. V. ZAREAH).

In the *Onomasticon* (Σαρβα and "Saara") it is mentioned as lying some 10 miles north of Eleutheropolis on the road to Nicopolis. By the Jewish traveller hap-Parchi (Zunz's *Benjamin of Tud.* li. 441), it is specified as three hours S. E. of Lydd. These notices agree in direction — though in neither is the distance nearly sufficient — with the modern village of *Sûr'ah* (صرعة), which has been visited by Dr. Robinson (*Bibl. Res.* iii. 153) and Tobler (*3te Wand.* 181–183). It lies just below the brow of a sharp-pointed, conical hill, at the shoulder of the ranges which there meet and form the north side of the *Wady Ghurâb*, the northernmost of the two branches which unite just below *Sûr'ah*, and form the great *Wady Surar*. Near it are to be seen the remains of Zanoah, Beth-shemesh, Timnath, and other places more or less frequently mentioned with it in the narrative. Eshtaol, however, has not yet been identified. The position of *Sûr'ah* at the entrance of the valley, which forms one of the inlets from the great lowland, explains its fortification by Rehoboam. The spring is a short distance below the village, "a noble fountain" — this was at the end of April — "walled up square with large hewn stones, and gushing over with fine water. As we passed on," continues Dr. Robinson, with a more poetical tone than is his wont, "we overtook no less than twelve women toiling upwards to the village, each with her jar of water on her head. The village, the fountain, the fields, the mountain, the females bearing water, all transported us back to ancient times, when in all probability the mother of Samson often in like manner visited the fountain and toiled homeward with her jar of water."

In the A. V. the name appears also as ZAREAH and ZOREAH. The first of these is perhaps most nearly accurate. The Hebrew is the same in all. G.

**ZO'RATHITES, THE** (הַצָּרְעִי: ὁ Ἀραθί [Vat -θει]; Alex. τ. Σαραθι: *Sarathi*), *i. e.* the people of ZORAH, are mentioned in 1 Chr. iv. 2 as descended from Shobal, one of the sons of Judah, who in 1 Chr. ii. 52 is stated to have founded Kirjath-jearim, from which again "the Zareathites and the Eshtaulites" were colonized. G.

**ZO'REAH** (צָרְעָה: Ἐρέα; Alex. Σαραα: *Sarea*). Another (and slightly more accurate) form of the name usually given in the A. V. as ZORAH, but once as ZAREAH. The Hebrew is the same in all cases. Zoreah occurs only in Josh. xv. 33, among the towns of Judah. The place appears, however, to have come later into the possession of Dan. [ZORAH.] G.

**ZO'RITES, THE** (הַצָּרְעִי [patr.]: Ἡσαρί [Vat. -ρει]; Alex. Ησαραει; [Comp. ὁ Σαραΐ:] *Sarai*), are named in the genealogies of Judah (1 Chr. ii. 54), apparently (though the passage is probably in great confusion) amongst the descendants of Salma and near connections of Joab. The Targum regards the word as being a contraction for "the Zorathites;" but this does not seem likely, since the Zareathites are mentioned in ver. 52 of the same genealogy in another connection.

**ZOROB'ABEL** (Ζοροβάβελ: *Zorobabel*), 1 Esdr. iv. 13, v. 5–70, vi. 2–29; Ecclus. xlix. 11; Matt. i. 12, 13; Luke iii. 27. [ZERUBBABEL.]

**ZU'AR** (צוּעָר [*smallness*]: Σαγγώρ: *Suar*). Father of Nethaneel the chief of the tribe of Issachar at the time of the Exodus (Num. i. 8, ii. 5, vii. 18, 23, x. 15).

**ZUPH, THE LAND OF** (אֶרֶץ צוּף [*honey-comb*]: εἰς γῆν [Χιφ, Vat.] Σειφ;[d] Alex

---

a See Stanley, *S. & P.*, Appendix, § 15.

b The Targum treats the names Mizpeh and Zophim as identical, translating them both by סָכוּתָא.

c * Mr. Porter disavows this inference from the language (*Handb.* p. 300 *a*) as well as the opinion itself that *Attârûs* is Pisgah. (See Kitto's *Bibl. Cycl.* vol. iii. p. 1162.) E.

d As if reading צִיף (Tsiph), which the original text (*Cethîb*) of 1 Chr. vi. 35 still exhibits for Zuph

ארץ צוף Σειφ; Syr. Peshito, ܛܘܪ *Tsur*: Vulg. *terra Suph*). A district at which Saul and his servant arrived after passing through those of Shalisha, of Shalim, and of the Benjamites[a] (1 Sam. ix. 5 only). It evidently contained the city in which they encountered Samuel (ver. 6), and that again, if the conditions of the narrative are to be accepted, was certainly not far from the "tomb of Rachel," probably the spot to which that name is still attached, a short distance north of Bethlehem. The name Zuph is connected in a singular manner with Samuel. One of his ancestors was named Zuph (1 Sam. i. 1; 1 Chr. vi. 35) or Zophai (*ibid.* 26); and his native place was called Ramathaim-sophim (1 Sam. i. 1).

But it would be unsafe to conclude that the "land of Zuph" had any connection with either of these. If Ramathaim-zophim was the present *Neby Samwil*, — and there is, to say the least, a strong probability that it was, — then it is difficult to imagine that Ramathaim-zophim can have been in the land of Zuph, when the latter was near Rachel's sepulchre, at least seven miles distant from the former. *Neby Samwil*, too, if anywhere, is in the very heart of the territory of Benjamin, whereas we have seen that the land of Zuph was outside of it.

The name, too, in its various forms of Zophim, Mizpeh, Mizpah, Zephathah, was too common in the Holy Land, on both sides of the Jordan, to permit of much stress being laid on its occurrence here.

The only possible trace of the name of Zuph in modern Palestine, in any suitable locality, is to be found in *Soba*, a well-known place about seven miles due west of Jerusalem, and five miles south-west of *Neby Samwil*. This Dr. Robinson (*Bibl. Res.* ii. 8, 9) once proposed as the representative of Ramathaim *Zophim*; and although on topographical grounds he virtually renounces the idea (see the foot-note to the same pages), yet those grounds need not similarly affect its identity with Zuph, provided other considerations do not interfere. If Shalim and Shalisha were to the N. E. of Jerusalem, near *Tuiyibeh*, then Saul's route to the land of Benjamin would be S. or S. W., and pursuing the same direction he would arrive at the neighborhood of *Soba*. But this is at the best no more than conjecture, and unless the land of Zuph extended a good distance east of *Soba*, the city in which the meeting with Samuel took place could hardly be sufficiently near to Rachel's sepulchre.

The signification of the name of Zuph is quite doubtful. Gesenius explains it to mean "honey;" while Fürst understands it as "abounding with water." It will not be overlooked that when the LXX. version was made, the name probably stood in the Hebrew Bible as Ziph (Tsiph). Zophim is usually considered to signify watchmen or lookers-out; hence, prophets; in which sense the author of the Targum has actually rendered 1 Sam. ix. 5, — "they came into the land in which was a prophet of Jehovah." G.

ZUPH (צוּף: [in 1 Sam., Alex. Σουν, Comp. Σόφ; Rom. Vat. corrupt:] Σούφ in 1 Chr.: *Suph*). A Kohathite Levite, ancestor of Elkanah and Samuel (1 Sam. i. 1; 1 Chr. vi. 35 [20]). In 1 Chr. vi. 26 he is called ZOPHAI.

ZUR (צוּר [*rock*]: Σούρ: *Sur*). 1. One of the five princes of Midian who were slain by the Israelites when Balaam fell (Num. xxxi. 8). His daughter Cozbi was killed by Phinehas, together with her paramour Zimri, the Simeonite chieftain (Num. xxv. 15). He appears to have been in some way subject to Sihon king of the Amorites (Josh. xiii. 21).

2. [In 1 Chr. viii. 30, Alex. Ισουρ; in ix. 36, Vat. Sin. Alex. Ισειρ.] Son of Jehiel the founder of Gibeon by his wife Maachah (1 Chr. viii. 30, ix. 36).

ZU'RIEL (צוּרִיאֵל [*my rock is God*]: Σουριήλ: *Suriel*). Son of Abihail, and chief of the Merarite Levites at the time of the Exodus (Num. iii. 35).

ZURISHAD'DAI [4 syl.] (צוּרִישַׁדָּי [*my rock is the Almighty*]: Σουρισαδαί [Vat. in Num. i. 6, -σει-]: *Surisadai*). Father of Shelumiel the chief of the tribe of Simeon at the time of the Exodus (Num. i. 6, ii. 12, vii. 36, 41, x. 19). It is remarkable that this and Ammishaddai, the only names in the Bible of which Shaddai forms a part, should occur in the same list. In Judith (vii. 1) Zurishaddai appears as SALASADAI.

ZU'ZIMS, THE (זוּזִים: ἔθνη ἰσχυρά in both MSS.: *Zuzim*; but Jerome in *Quæst. Hebr.*, *gentes fortes*). The name of an ancient people who, lying in the path of Chedorlaomer and his allies, were attacked and overthrown by them (Gen. xiv. 5 only). Of the etymology or signification of the name nothing is known. The LXX., Targum of Onkelos, and Sam. Version (with an eye to some root not now recognisable[b]) render it "strong people." The Arab. Version of Saadiah (in Walton's *Polyglott*) gives *ed-Dukakin*, by which it is uncertain whether a proper name or appellative is intended. Others understand by it "the wanderers" (Le Clerc, from זוּז), or "dwarfs" (Michaelis, *Suppl.* No. 606).[c] Hardly more ascertainable is the situation which the Zuzim occupied. The progress of the invaders was from north to south. They first encountered the Rephaim in Ashteroth Karnaim (near the *Leja* in the north of the *Hauran*); next the Zuzim in Ham; and next the Emim in Shaveh Kiriathaim. The last named place has not been identified, but was probably not far north of the Arnon. There is therefore some plausibility in the suggestion

(see margin of A. V.). This is a totally distinct name from Ziph (זִיף).

[a] If indeed the "land of Yemini" be the territory of Benjamin.

[b] "Sensum magis quam verbum ex verbo transferentes" (Jerome, *Quæst. Hebr. in Gen.*). Schumann (*Genesis*, p. 237) suggests that for הַזּוּזִים they read עַזִּזִים. The change in the initial letter is the same which Ewald proposes in identifying Ham (Gen. xiv. 5) with Ammon.

[c] Comparing the Arabic زَوَّزَ. By adopting this (which however Gesenius, *Thes.* p. 510 *a*, resists) and altering the points of הָאֵם to הָאֵמִים, as it is plain the LXX. and Vulg. read them, Michaelis ingeniously obtains the following reading: "They smote the giants in Ashteroth Karnaim, and the people of smaller (*i. e.* ordinary) stature, who were with them."

Digitized by Google

of Ewald (*Gesch.* i. 308, *note*), provided it is etymologically correct, that Ham חם, is עם, Am, *i. e.* Ammon; and thus that the Zuzim inhabited the country of the Ammonites, and were identical with the Zamzummim, who are known to have been exterminated and succeeded in their land by the Ammonites. This suggestion has been already mentioned under ZAMZUMMIM, but at the best it can only be regarded as a conjecture, in respect to which the writer desires to say with Reland — and it would be difficult to find a fitter sentence with which to conclude a Dictionary of the Bible — "conjecturæ, quibus non delectamur"

G.

# APPENDIX.

## NOTES ON THE ART. "WILDERNESS OF THE WANDERING."

BY THE REV. F. W. HOLLAND, FELLOW OF THE ROYAL GEOGRAPHICAL SOCIETY OF LONDON.

[THE following notes were received too late for insertion in their proper place, but are too valuable to be omitted. Mr. Holland here gives the results of personal observation, having four times visited the Sinaitic Peninsula and spent many months in wandering over it on foot. — A.]

Page 3513 *a*, line 35, "the wilderness of Etham." — It is not necessary to suppose that the wilderness of Etham extended on both shores of the gulf. "*The edge of the wilderness*" probably refers not to the limits of vegetation, but to the boundary of the desert east of the gulf, marked by the higher ground which divides the Bitter Lakes from the sea. This would form, then as now, the natural road from Egypt to the Peninsula of Sinai, and thither Moses would lead the Israelites. A deviation from the natural road seems to be implied in the command to turn and encamp before Pihahiroth.

Page 3513 *b*, l. 17, "The wilderness hath shut them in." — Pharaoh seeing that the Israelites had missed the road leading round the head of the gulf, would naturally exclaim "The wilderness hath shut them in." The sea was on their left, the high range of *Jebel Attakah* on their right, and beyond them a narrow road along the shore leading only to a yet more barren desert. Escape was impossible unless God had opened a way for them through the sea.

Page 3513 *b*, l. 2 from bottom, "*Wady Ahthi*." — The proper name is *Wady el-Ahdhâ* (الأحذ), derived from *hadhwah*, impression of a horse's foot.

Page 3513, note *c*. — The excavations of the Palestine Exploration Fund at Jerusalem have proved that the language of Josephus concerning the height of the buildings of the Temple was not extravagant.

Page 3514, note *a*. — The warm spring mentioned by Mr. Hamilton is situated near *Tor*, and has no reference to the *Ayún Músa* near Suez; it is that referred to in the following note. The springs of *Hammâm Pharaún* have a temperature of 160°, and emit a strong sulphurous smell. I have never seen any warm spring among those at *Ayún Músa*, although I have several times examined them. Water is found there by digging, and the water-holes are increased at the pleasure of the gardener.

Page 3514 *a*, l. 37, "Shur 'before Egypt,'" etc. — The name *Shur* means "a wall," and was perhaps given to the wilderness of Etham, which lay on the east of the Isthmus of Suez and of the head of the gulf, from the wall-like range of mountains, *Jebel er-Rahah*, by which it is bounded. When seen from a distance this range presents the appearance of a long line of white cliffs, with a remarkable tabular outline. The Arabs know many places in the Peninsula by two names, — one being the proper name, the other a name derived from some characteristic feature.

Page 3514 *b*, l. 20, "*Debbet er-Ramleh*." — This tract of sand does not run uninterruptedly across the Peninsula. It is divided by the rocky plateau at the head of *Wady el-Akhdar* and *Wady el-Osh*. The name appears to be applied more particularly to the belt of sand near *Wady Nusb* and *Serâbit el-Khâdim*.

Page 3514 *b*, l. 36. — *El-Kâa* cannot be Sin, which lay north of *Wady Feirân*, the most southerly road that the Israelites can have taken to Mount Sinai. The name *el-Kâa* is only applied to the plain south of *Wady Feirân*. The plain to the north is called *el-Murkhah*, and that probably corresponded with the Wilderness of Sin. The *Wady Hibrân* south of *Jebel Serbâl* was pronounced by the Sinai Survey Expedition to be an impossible route for the Israelites to have taken.

Page 3515 *a*, l. 10. — *Um Shaumer* is not the highest mountain. *Mount Catherine* is considerably higher, and forms the true Omphalos of the Peninsula. *Jebel Zebir* is the highest peak of *Mount Catherine*, and therefore the highest point in Sinai.

Page 3515 *b*, l. 6 from bottom, "Three passes through the *et-Tîh* range," etc. — Besides the three passes mentioned by Robinson, there is a road leading over *Jebel Odjmeh* from the head of *Wady es-Sik*, a pass to the east of *Jebel Dhelel*, and another further eastward at the head of *Wady el-Ain*.

Page 3516 *b*, note *f*. — The sound produced by the sand at *Jebel Nakûs* is not caused by its pouring over the cliffs, but by the friction of its grains when set in motion. The sand is drifted up into a steep bank in a recess in the mountain side, and when set in motion, either artificially, or by the wind, rolls down like a cascade, and then the sound is produced. It resembles the noise made by rubbing the finger round a glass, but is so loud as to be heard sometimes at a distance of several hundred yards. It causes a great vibration, which often sets in motion the surrounding sand. The Arabs suppose that the sound is caused by the *nakûs* (wooden boards used for bells) of a monastery, which was swallowed up by the earth in consequence of the wickedness of the monks. See *Proceedings of the Royal Geog. Soc.* vol. xiii. p. 215 f.

Page 3517 *b*, l. 11. — The *Mecca pilgrims* are previously provided for, stores of corn being sent on to the various stations on the *Hadj* road, and tanks prepared for water. Their case, therefore, is quite different from that of the Israelites

Digitized by Google

Page 3517 *b*. note *c*. — I have measured acacia trees upwards of nine feet in circumference. The trees grow to a large size, when they are not stunted by having their shoots annually cut off to feed the goats of the Arabs.

Page 3518, l. 2, "the *Wady er-Raheh*." — I have myself seen the *Wady er-Rahah* "a vast *green* plain," so that looking up its slope it appeared completely covered by herbage. It is never entirely bare, being thickly studded with low plants, which after a few showers of rain in spring quickly become green. I have even seen blades of grass springing up in every direction upon it. But I have also seen the *er-Rahah* after a long dry season to all appearance from a little distance a barren plain.

Page 3518 *b*, l. 1. — Quicksands in *Debbet er-Ramleh* are merely caused by the sand drifting into the hollows, which catch the rain-water. They are not real quicksands.

Pages 3517–3521. — *Supply of Water and Pasturage*. — Large tracts of the northern portion of the plateau of the *Tih*, which are now desert, were evidently formerly under cultivation. The Gulf of Suez (probably by means of an artificial canal connecting it with the Bitter Lakes) once extended nearly fifty miles further north than it does at present, and the mountains of Palestine were well clothed with trees. Thus there formerly existed a rain-making area of considerable extent, which must have added largely to the dews and rains of Sinai. Probably, also, the Peninsula itself was formerly much more thickly wooded.

The amount of vegetation and herbage in the Peninsula, even at the present time, has been very much underrated; and a slight increase in the present rain-fall would produce an enormous addition to the amount of pasturage. I have several times seen the whole face of the country, especially the wadies, marvelously changed in appearance by a single shower.

It is a great mistake to suppose that the convent gardens at the foot of *Jebel Mûsa*, and those in *Wady Feirân*, and at *Tor*, mark the only three spots where any considerable amount of cultivation could exist in the Peninsula. Hundreds of old monastic gardens, with copious wells and springs, are scattered over the mountains throughout the granitic districts; and I could mention at least twenty streams which are perennial, excepting perhaps in unusually dry seasons.

It has been said that the present physical conditions of the country are such as to render it utterly impossible that the events recorded in the book of Exodus can ever have occurred there. It is wonderful, however, how apparent difficulties melt away as one's acquaintance with the country increases. I see no difficulty myself in the provision of sufficient pasturage for the flocks and herds, if, as I have shown, there are good reasons for supposing the rain-fall was in former days larger than it is at present; and with regard to the cattle, I will point out one important fact, which appears to me to have been overlooked, namely, that they were probably used as beasts of burden, and, in addition to other things, carried their own water, sufficient for several days, slung in water-skins by their side, just as Sir Samuel Baker found them doing at the present day in Abyssinia. — See paper *On Recent Exploration in the Peninsula of Sinai*, read [by Mr. Holland] at the Liverpool Church Congress, Oct. 1869. [See also art. SINAI, p. 3054, Amer. ed.]

Page 3521 *a*, l. 34. — "*'Ain el-Hawdra*." — The water varies much in bitterness. I have found it at one time so bitter that I could not even hold it in my mouth, at another more pleasant to drink than the water I had brought in water-skins from Suez. The size of the spring is very small, but the mass of calcareous deposit which surrounds it seems to prove that the water-supply from it was formerly larger than at the present time.

There appears to be a strange confusion of places here by the writer of the article. My own observations, made at several different times, and confirmed by those of the Sinai Survey Expedition in 1868, have led me to the following conclusions. *'Ain Hawdra* is not a brook, but a spring standing on an elevated plateau at the head of *Wady Amâra*, which does not contain any other water, although a little to the north of its mouth are the *Ayûn Abu Szoweirah*, two water-holes about 8 feet deep, supplied, I think, by the drainage from *Wady Wardân*. A few stunted palms grow near them. The water-holes might be increased by digging. The water is slightly brackish but drinkable. *Wady Tâl*[a] lies to the south of *Wady Ghurundel*, running into the gulf a few miles to the north of *Wady Tayibeh*. The Arabs obtain rock-salt from it. At *Jebel Bisher*, commonly, but wrongly, known as *Taset es-Sudr*, there is a good supply of water. This mountain lies much nearer to Suez. It is known in the charts as "Barn Hill," and forms a prominent landmark.

Page 3521 *b*, l. 2 from bottom. — By "*water-courses*" Stanley evidently does not intend to imply the presence of water; he especially mentions their being dry. *Wady Useit* does not connect *Ghurundel* with *Tayibeh*; it is entirely separate from both, but drains the plateau that lies between them. The hot springs near it, visited by Niebuhr, are those of the *Hummâm Pharaûn*. *Wady Useit* drains an elevated plateau at the back of *Jebel Hummâm*. *Wady Tayibeh* runs from the south of the same plateau. *Wady Ghurundel*, as it approaches the sea, is certainly one of the best watered and wooded valleys in the whole Peninsula.

Page 3522 *a*, 4th par. "*Tûr*." — The advantages of this spot for an encampment have been much exaggerated. The water is brackish and unwholesome, and it is the most unhealthy spot in the Peninsula. It is true that there are large groves of palms and thickets of tamarisk, but the ground is impregnated with salt, and is not otherwise particularly fertile. At the mouth of *Wady Tayibeh* is the plain of *Ras Abu Zelimeh*, which probably was the spot where the Israelites encamped; it is divided from *el-Murkhah* by a narrow strip of desert, and might almost be considered as a portion of the Wilderness of Sin.[b]

---

[a] *W. Ethâl* is its real name, so called from *Ethel*, a species of tamarisk.

[b] * It is important to notice here that Mr. Holland has altered the opinion respecting the route of the Israelites which he had presented in a paper read before the Roy. Geog. Society in 1868, already referred to in this *Dictionary* under the arts. SIN, WILDERNESS OF, p. 3049, note *a*, and SINAI, p. 3064. He now regards *el-Murkhah*, and not the plain of *es-Seyh*, as the "Wilderness of Sin," and supposes the Israelites from this point to have journeyed up the *Wady Feirân*. See his paper *On Recent Explorations in the Peninsula of Sinai*, read at the Liverpool Church Congress, Oct 1869. A

Digitized by Google

Page 3522 *b*, l. 12.— *El-Kâa.* — This name is confined to the plain south of *Wady Feirân*. The whole of the northern plain is, I believe, known by the general name of *el-Murkhah*.

Page 3522 *b*, 2d par. — *Manna.* — I have now (1870) some pots of manna that I brought from Sinai in 1861. It remains perfectly good, but becomes liquid like honey in hot weather. When I first obtained it, it still remained, as when collected from the trees, in the shape of hardened drops. It is sold in Egypt for medicinal purposes, or to pilgrims as a relic from the desert.

Page 3523 *a*, near end of 1st par. — The height of the Sinaitic inscriptions has been much exaggerated. I have not seen one that I have failed to reach without difficulty, except in a few cases, where there were evident traces of a lower ledge of rock having fallen down. See *Proceedings R. G. Soc.*, vol. xiii. p. 213 f.

Page 3523 *a*. — *Rephidim.* — On the site of Rephidim, where the battle with the Amalekites was fought, my opinion differs from that of Captain Wilson and Mr. Palmer. They believe the battle to have been fought in the *Wady Feirân*, near the site of the ancient city of Paran, and that *Jebel Tahûnah* (not the hill on which the old church stands, which the Dean of Westminster advocates, but one opposite it on the other side of the valley) was the hill on which Moses sat, with Aaron and Hur supporting his arms.

The road up this hill, and the churches and chapels on its summit and sides, certainly mark this hill as a very sacred spot in the eyes of the old inhabitants of Paran. I have little doubt that they believed it to be the site of Rephidim, when *Serbâl*, as was once certainly the case, was held to be the traditional Mount Sinai. But I have no faith in monastic traditions, either ancient or modern, as far as the monks of the convent of St. Catherine are concerned.

Besides, it appears to me that Rephidim is clearly spoken of in the Bible as within a day's journey of Mount Sinai; and this spot is two days' journey from *Jebel Mûsa*, even by the short cut of the *Nukb Hâwy*.

I am strongly of opinion that the Israelites marched up the *Wady es-Sheikh*, and that the narrow defile of *el-Watiyeh*, about twelve miles from *Jebel Mûsa*, marks the site of the battle of Rephidim.

From the head of *Wady Hibrân* there stretches across the western side of the Peninsula a remarkable line of precipitous granite mountains,[a] through which are found only three passes, leading to the high and well-watered central group of mountains, which includes *Jebel Mûsa*. The two western passes of *Wady Tlâh* and *Nukb Hâwy* are too narrow and rugged to have afforded a road for the mass of the Israelites.

They are altogether out of the question, if the Israelites had wagons with them at this time. We know that the princes presented six wagons for the use of the Tabernacle at Mount Sinai, and we can hardly suppose them to have been built there.

The remaining pass of *el-Watiyeh* is a narrow defile, with perpendicular rocks on either side, and the holding of this defile by the Amalekites would render them secure.

All the requirements of the account of the battle are found at this spot. There is a large plain, destitute of water, for the encampment of the Israelites; a conspicuous hill on the north side of the defile, commanding the battle-ground, and presenting a bare cliff, such as we may suppose the rock to have been which Moses struck.[b]

There is another plain on the south of the pass for the encampment of the Amalekites, with abundance of water within easy reach; and, curiously enough, at this very spot, at the foot of the hill on which Moses sat, if this be Rephidim, the Arabs point out a rock, which they call "the seat of the prophet Moses."— See paper read before the Liverpool Church Congress, pp. 7, 8; also paper read before R. G. S., May 11th, 1868, p. 17.

Page 3523 *a*, 2d par. — *Horeb.* — A name given probably to the central granite mountains (including *Jebel Mûsa*, *St. Catherine*, *Fureiah*, etc.), which lie to the south of the remarkable line of cliffs stretching eastward from the head of *Wady Hebrân*. The country between this line and *Wady es-Sheikh*, including the low mountains of *Jebel el-Orf*, is comparatively open, and contains several plains or broad wadies of considerable size. No trace of the name Horeb now remains, unless *Jebel 'Aribeh*, the central portion of *Jebel ed-Deir*, be a corruption of it. The Arabs, however, say that this mountain is so called from a plant that grows there.

Page 3524 *b*, end of 1st par.— *Jebel Feirân.* — The Arabs often call the mountains by the names of the adjoining wadies.

Page 3524 *b*, 2d par. — *Summit of Serbâl.* — Dr. Stewart's "circle of loose stones," and Dr. Stanley's "ruins of a building, granite fragments cemented with lime and mortar," refer to the same ruins. The latter description is the true one. There are a considerable number of inscriptions on the summit, some painted under an overhanging rock covered with whitewash, which seems to connect them with this building, similar whitewash being found upon its stones. For a description of *Jebel Serbâl*, see *Proceedings R. G. Soc.*, vol. xiii. p. 212.

Page 3525 *a*, 2d par. — *Jebel Mûsa.* — For description see *Proceedings R. G. Soc.*, vol. xiii. p. 210. The approach from the W. by *Nukb Hâwy* is not so difficult as represented. I have several times ascended the pass with lightly-laden camels.

*W. Solam* should be written *Soldf*. *The Râs Sufsâf'eh* is not a mountain interposed between the slope of *Jebel Mûsa* and the plain," but the northern portion of *Jebel Mûsa* itself.

Page 3525 *b*, l. 10. — *Jebel Fureid.* — There is properly speaking no mountain of that name. The name *el-Fureiah* is applied to the high and fertile mountain plateau that lies between *Wady er-Rahah* and the upper part of *Wady es-Sheikh* The surrounding peaks each have a separate name.

Page 3525 *b*, note *c*. — It is a mistake to think that *the dendrites* have become scarce — at the top of Abbas Pasha's road they especially abound.

Page 3527 *a*, l. 38. — The "offerings of the princes" included wagons (Num. vii. 3), a proof that the route followed by the Israelites did not lead over any very difficult passes, and therefore a help in tracing out their course.

Page 3527 *a*, l. 4 from bottom. "Over its south-

[a] This formed, probably, the northern limit of the Wilderness of Sinai, the high central cluster of mountains to the south bearing the district name of Horeb. E. W. H.

[b] This would be "*in Horeb*" if the suggestion in the preceding note is correct. E. W. H.

Digitized by Google

ern face," etc. — There are several passes over the southern face of the *Tîh* range; if the Israelites did not march down to the Gulf of Akaba, they probably crossed by one or more of these, if not too steep for their wagons. The direct road from *Jebel Mûsa* northward to the *Tîh* range presents no difficulty, a rising expanse of hard desert leading gradually up to the plateau of *Tewanik*, where there is plenty of vegetation, and good water at *Ain el-Akhdhar*. The wadies leading down to the Gulf of Akaba are somewhat narrow and rocky; a stream of good water is found at the lower *Wady el-Ain*. There is an upper *el-Ain* at the bottom of *Wady Zellegei* further to the northwest. The two, I believe, are connected.

Page 3527 *b*, l. 29. — *Dahab* appears to me too far to the south to be identified with Dizahab; it is also inclosed by mountains on the north. The road to it lies down *Wady Nush*, which rises south of *Jebel Catherine*. There is another road across the plain of *Senned* which joins *Wady Nush*.

Page 3527 *b*, l. 36. — *El-Hudherâ*. — This copious spring is situated at the head of the wady of the same name, which forms a *cul-de-sac* surrounded by high cliffs. Two narrow paths, so steep that a laden camel cannot well descend them, lead down to it. It is difficult to identify this with Hazeroth, where the whole host of the Israelites encamped for seven days. If they marched straight north from Mount Sinai we might place Hazeroth in the open plateau near *el-Akhdhar*. Here numerous very ancient inclosures and ruins of *namûs* are found. The *namûs*, or in the plural *nudmis*, "mosquitos," are the dwellings or storehouses of the ancient inhabitants of the Peninsula. Their style of architecture is the oldest that is known, resembling the "Beehive Houses" in Scotland. They were perhaps built by the Amalekites. (See *Proceedings R. G. Soc.* vol. xiii. p. 211; paper read before R. G. S., May 11, 1868; and paper read at Liverpool Church Congress, Oct. 1869.)

Page 3527, note *a*. — The edible locusts invade the Peninsula in great numbers about every third year. I have seen the ground covered with them. The Arabs in Sinai do not eat them. Partridges of two kinds are very common. Quails are met with occasionally. Vast flocks of storks annually cross northwards from Egypt. I have counted them by hundreds on several occasions.

Page 3532 *a*, l. 4. — *El-'Ain*. — When tracing up *Wady el-Ain*, my Arabs pointed out a route leading northwards to Palestine. They said the road was good, and the pass over the *Tîh* range not difficult.

P. 3534 *b*. — *Zoölogy*. — There are no lions, I believe, in Sinai. Hyenas are common; so also are foxes, of which there are two kinds. Leopards are found on the higher mountains; wolves in *Wady Feirân*, and other places. The ibex is very common. I have sometimes seen as many as 40 or 50 in a day; and have occasionally found 30 or 40 in one herd. The flesh is excellent, and when stationary for a few days the traveller can generally employ an Arab to shoot him some. They are quite contented with five or six shillings for each ibex. The young are killed in considerable numbers for the sake of their skins, which are used for sewing dates in. The ibexes are commonly known by the name of *bedru*, but other names are given them according to their age and the length of their horns. Hares are common. Amongst other animals which are often seen may be mentioned the gazelle, coney (*Hyrax Syriacus*), called by the Arabs *webr*, jerboas, mice of several kinds, lizards and snakes, of which I have caught five or six different kinds. Amongst the birds, vultures of two kinds, kites, hawks, storks, wild ducks, teal, snipe, herons, partridges, sand-grouse, quail, pigeons, turtle-doves, *Drymoecas*, stonechats, plovers, ravens, crows, owls, bats, red-starts, larks, swallows, sea-gulls, etc., etc. Porcupines and hedgehogs are found, but they are rare. Small fish are found in the warm springs near *Tûr*. One cannot, of course, compare the amount of life found in a desert with that in other countries, which supply a larger amount of food, but I have frequently seen, and have shot or caught most of the animals and birds which I have mentioned, besides others the names of which I cannot now remember.

Page 3536 *a*. — *Vegetation*. — The statement that "the palms are almost always dwarf," is not correct. The dwarf trees are the exception, not the rule. Many of the trees at *Tûr* and *Wady Feirân* are particularly fine.

Roses of Jericho are found at the mouth of *Wady Ghurundel*, *Wady Mokatteb*, and many other places.

The *Lusof*, or caper plant, is found in *Tayibeh*, and is very common in the wadies south of *Jebel Mûsa*. The fruit, which is of the size and shape of a moderate sized pear, is eaten by the Arabs It has a pungent and very pleasant taste.

The *Ban-tree* (*Balsamum Aaronis*) abounds in some of the wadies near *Serbâl*.

The *Osher* I have found in *Wady Nush*, S. E. of *Jebel Mûsa* and also near *Wady el-Ain*. A large blue kind of locust feeds upon it.

The *Butm* (*Pistachia terebinthus?*) occurs on the west of *Jebel Serbâl* on the higher slopes; it does not appear to grow on the east of the mountain.

Page 3537. — The name *Serbâl* is not derived from *Ser*; the word *serbal* (سربال) signifies a "shirt" or "coat of mail," and the name has reference to the manner in which a storm clothes the smooth summit of the mountain, and perhaps to the sheet of ice with which it is sometimes covered, when it shines in the sun like a coat of mail.

F. W. H.

* We ought perhaps to mention here, as at least a curiosity, a new theory of the route of the Israelites, set forth with no little learning and ingenuity by a writer in Lawson and Wilson's *Cyclopædia of Bibl. Geography*, etc., vol. ii. pp. 59–199 (Edin. 1866), under the title *Exode, Alternative View of the*. We can only indicate his chief results, without discussing the arguments by which they are supported. This writer maintains that the Gulf of Akaba is the "Red Sea" of our version, and was of much larger dimensions in the days of Moses and Herodotus, extending across modern Arabia to the Persian Gulf, that *Misraim* is improperly rendered "Egypt" in our version, being really applied to a part of Arabia near Egypt; that the water in which Moses, as an infant, was laid, was not the Nile, but a sweet water channel connecting, in early times, the isthmus of Suez with the Mediterranean Sea; that Goshen was the high region known to the ancients as Mount Casion; that the Horeb of Scripture was the ridge of the *Tîh*, and Mount Sinai *Jebel el-Ajmah* (or *Ojmeh*).
